Debt has multiplied tenfold in ninety-six years. The annual increase since 1870 has averaged 118 millions sterling. The increase from the date of the Treaty of Utrecht, 1713, to the present is shown in successive stages thus:—

| Period              | Millions, £ | Per Annum   |
|---------------------|-------------|-------------|
| 1713-63 . . . . .   | 164         | £ 3,300,000 |
| 1764-93 . . . . .   | 327         | 10,900,000  |
| 1794-1816 . . . . . | 1,039       | 45,200,000  |
| 1817-1848 . . . . . | 87          | 2,700,000   |
| 1849-70 . . . . .   | 2,140       | 97,300,000  |
| 1871-89 . . . . .   | 2,244       | 118,100,000 |
| 176 years . . . . . | 6,001       | 34,100,000  |

The origin of the debt may be approximately summed up thus:—

|                                  |                |
|----------------------------------|----------------|
| War and armaments . . . . .      | 3,610 millions |
| Railways and telegraph . . . . . | 1,450 „        |
| Roads and bridges . . . . .      | 780 „          |
| Sundries . . . . .               | 161 „          |

6,001

In 1889 the interest which bondholders received, taking the various loans of nations at the prices current in the market, were as follows per £100 per annum.

|                           | £   |                        | £   |
|---------------------------|-----|------------------------|-----|
| United Kingdom . . . . .  | 2.7 | Austria . . . . .      | 4.3 |
| United States . . . . .   | 3.1 | Chile . . . . .        | 4.3 |
| Belgium . . . . .         | 3.2 | Russia . . . . .       | 4.6 |
| Holland . . . . .         | 3.3 | Brazil . . . . .       | 4.8 |
| New South Wales . . . . . | 3.4 | Spain . . . . .        | 4.9 |
| Canada . . . . .          | 3.5 | Portugal . . . . .     | 5.0 |
| Switzerland . . . . .     | 3.5 | Argentina . . . . .    | 5.1 |
| France . . . . .          | 3.6 | Egypt . . . . .        | 5.1 |
| Victoria . . . . .        | 3.5 | China . . . . .        | 5.4 |
| Cape Colony . . . . .     | 3.6 | Buenos Ayres . . . . . | 5.9 |
| Prussia . . . . .         | 3.7 | Hawaii . . . . .       | 6.0 |
| Norway . . . . .          | 3.7 | Santa Fé . . . . .     | 6.0 |
| Sweden . . . . .          | 3.8 | Japan . . . . .        | 6.3 |
| New Zealand . . . . .     | 3.9 | Uruguay . . . . .      | 6.6 |

The following table shows approximately the wealth and debt of the principal nations in 1888:—

|                             | Millions £ Sterling |       |               |
|-----------------------------|---------------------|-------|---------------|
|                             | Wealth              | Debt  | Ratio of Debt |
| United Kingdom . . . . .    | 9,400               | 698   | 7.7           |
| France . . . . .            | 8,598               | 1,269 | 14.7          |
| Germany . . . . .           | 6,437               | 435   | 6.8           |
| Russia . . . . .            | 5,089               | 756   | 14.8          |
| Austria . . . . .           | 3,855               | 580   | 15.0          |
| Italy . . . . .             | 2,963               | 460   | 15.5          |
| Spain . . . . .             | 2,516               | 260   | 10.3          |
| Portugal . . . . .          | 408                 | 113   | 27.5          |
| Sweden and Norway . . . . . | 880                 | 20    | 2.2           |
| Denmark . . . . .           | 404                 | 11    | 2.8           |
| Holland . . . . .           | 980                 | 89    | 9.1           |
| Belgium . . . . .           | 1,007               | 77    | 7.6           |
| Switzerland . . . . .       | 494                 | 17    | 3.5           |
| Greece . . . . .            | 300                 | 23    | 7.7           |
| Roumania . . . . .          | 593                 | 36    | 6.1           |
| Servia . . . . .            | 217                 | 13    | 6.0           |
| Turkey . . . . .            | 593                 | 180   | 30.3          |
| Europe . . . . .            | 44,734              | 5,037 | 11.2          |
| United States . . . . .     | 12,824              | 221   | 1.7           |
| Canada . . . . .            | 980                 | 49    | 5.0           |
| Australia . . . . .         | 1,373               | 171   | 12.5          |
| South Africa . . . . .      | 135                 | 27    | 20.0          |
| Argentina . . . . .         | 509                 | 110   | 21.6          |
| Total . . . . .             | 60,555              | 5,615 | 9.3           |

For local finances see *Local Taxation*.

#### UNITED KINGDOM

The financial year ends March 31. The various principal items of revenue and expenditure for 52 years to date are shown as follows:—

#### REVENUE IN MILLIONS £ STERLING

|                       | 1837-51 | 1852-61 | 1862-71 | 1872-81 | 1882-89 | 52 Years |
|-----------------------|---------|---------|---------|---------|---------|----------|
| Customs . . . . .     | 324     | 237     | 221     | 199     | 159     | 1,140    |
| Excise . . . . .      | 216     | 181     | 204     | 268     | 210     | 1,079    |
| Stamps . . . . .      | 101     | 78      | 94      | 110     | 95      | 478      |
| Income-tax . . . . .  | 55      | 102     | 78      | 71      | 103     | 409      |
| Post-office . . . . . | 25      | 30      | 45      | 74      | 79      | 253      |
| Sundries . . . . .    | 66      | 50      | 69      | 77      | 58      | 320      |
| Total . . . . .       | 787     | 678     | 711     | 799     | 704     | 3,679    |

#### EXPENDITURE IN MILLIONS £ STERLING

| Years              | Millions £ |       |               |       |
|--------------------|------------|-------|---------------|-------|
|                    | Government | Debt  | Army and Navy | Total |
| 1837-51 . . . . .  | 139        | 395   | 219           | 753   |
| 1852-61 . . . . .  | 136        | 285   | 288           | 709   |
| 1862-71 . . . . .  | 164        | 265   | 263           | 692   |
| 1872-81 . . . . .  | 233        | 281   | 280           | 794   |
| 1882-89 . . . . .  | 238        | 222   | 247           | 707   |
| 52 years . . . . . | 910        | 1,448 | 1,297         | 3,655 |

Expenditure includes sums paid for redemption of national debt, and as this has been reduced 94 millions during the present reign, the net expenditure may be set down thus:—

|                               | Millions £ | Per Annum, £ |
|-------------------------------|------------|--------------|
| Revenue of 52 years . . . . . | 3,679      | 70,700,000   |
| Reduction of debt . . . . .   | 94         | 1,800,000    |
| Real expenditure . . . . .    | 3,585      | 68,900,000   |

The following table shows approximately the revenue and expenditure from the accession of William III. to the present time :—

| Reign        | Date      | Millions £ |             | Annual Average, £ |             | Public Debt, Millions £ |
|--------------|-----------|------------|-------------|-------------------|-------------|-------------------------|
|              |           | Revenue    | Expenditure | Revenue           | Expenditure |                         |
| William III. | 1689-1702 | 59         | 72          | 4,500,000         | 5,500,000   | 13                      |
| Anne         | 1702-14   | 62         | 122         | 5,200,000         | 10,200,000  | 73                      |
| George I.    | 1714-27   | 77         | 80          | 5,900,000         | 6,100,000   | 76                      |
| George II.   | 1727-60   | 217        | 276         | 6,600,000         | 8,400,000   | 135                     |
| George III.  | 1760-1820 | 1,666      | 2,252*      | 27,800,000        | 37,500,000  | 900                     |
| George IV.   | 1820-30   | 648        | 608         | 64,800,000        | 60,800,000  | 800                     |
| William IV.  | 1830-37   | 439        | 431         | 62,400,000        | 61,300,000  | 792                     |
| Victoria     | 1837-51   | 787        | 753         | 60,500,000        | 57,900,000  | 787                     |
| "            | 1852-61   | 678        | 709         | 67,800,000        | 70,900,000  | 819                     |
| "            | 1862-71   | 711        | 692         | 71,100,000        | 69,200,000  | 798                     |
| "            | 1872-81   | 799        | 794         | 79,900,000        | 79,400,000  | 772                     |
| "            | 1882-89   | 704        | 707         | 88,000,000        | 88,400,000  | 698                     |

The following table shows the revenue of England down to 1707, of Great Britain from 1713 to 1810, and of the United Kingdom from the last-mentioned year down to date. The groat, 4d., from William the Conqueror down to Edward III., had more than three times as much silver as our shilling of to-day; hence the real amount in silver must be distinguished from the nominal. The purchasing power of £1 sterling has also varied, and in the following table this is likewise given :—

| Date | Reign        | Nominal    | In Silver   | Purchasing Value | Shillings per Inhab. |
|------|--------------|------------|-------------|------------------|----------------------|
|      |              |            |             |                  | In Silver            |
| 1066 | William I.   | £ 400,000  | £ 1,320,000 | 4,010,000        | 12                   |
| 1099 | Rufus        | 350,000    | 1,150,000   | 3,520,000        | 10                   |
| 1120 | Henry I.     | 300,000    | 990,000     | 3,005,000        | 9                    |
| 1150 | Stephen      | 250,000    | 830,000     | 2,510,000        | 8                    |
| 1180 | Henry II.    | 200,000    | 660,000     | 2,005,000        | 6                    |
| 1210 | John         | 100,000    | 330,000     | 1,000,000        | 3                    |
| 1272 | Henry III.   | 80,000     | 264,000     | 800,000          | 2½                   |
| 1300 | Edward I.    | 150,000    | 495,000     | 1,502,000        | 4½                   |
| 1350 | Edward III.  | 154,000    | 460,000     | 1,360,000        | 4                    |
| 1400 | Henry IV.    | 100,000    | 264,000     | 900,000          | 2                    |
| 1480 | Edward IV.   | 100,000    | 162,000     | 530,000          | 1                    |
| 1500 | Henry VII.   | 400,000    | 650,000     | 2,100,000        | 3                    |
| 1540 | Henry VIII.  | 800,000    | 1,300,000   | 2,600,000        | 6                    |
| 1600 | Elizabeth    | 500,000    | 550,000     | 1,000,000        | 2                    |
| 1620 | James I.     | 600,000    | 640,000     | 1,000,000        | 2½                   |
| 1640 | Charles I.   | 806,000    | 950,000     | 1,300,000        | 4½                   |
| 1662 | Charles II.  | 1,800,000  | 1,910,000   | 2,300,000        | 7                    |
| 1686 | James II.    | 2,002,000  | 2,120,000   | 2,300,000        | 8                    |
| 1700 | William III. | 3,895,000  | 4,135,000   | ...              | 15                   |
| 1713 | Anne         | 5,692,000  | 6,030,000   | ...              | 18                   |
| 1716 | George I.    | 6,763,000  | 7,160,000   | ...              | 21                   |
| 1726 | George II.   | 8,523,000  | 9,030,000   | ...              | 25                   |
| 1760 | George III.  | 8,880,000  | 9,420,000   | ...              | 20                   |
| 1790 | "            | 13,745,000 | 14,540,000  | ...              | 29                   |
| 1800 | "            | 37,520,000 | 39,700,000  | ...              | 76                   |
| 1810 | "            | 52,672,000 | 55,810,000  | ...              | 93                   |
| 1820 | George IV.   | 61,634,000 | 61,634,000  | ...              | 62                   |
| 1830 | William IV.  | 59,365,000 | 59,365,000  | ...              | 50                   |
| 1840 | Victoria     | 52,916,000 | 52,916,000  | ...              | 40                   |
| 1850 | "            | 58,205,000 | 58,205,000  | ...              | 43                   |
| 1860 | "            | 71,090,000 | 71,090,000  | ...              | 49                   |
| 1870 | "            | 75,434,000 | 75,434,000  | ...              | 49                   |
| 1880 | "            | 81,265,000 | 81,265,000  | ...              | 47                   |
| 1889 | "            | 88,470,000 | 88,470,000  | ...              | 49                   |

The value of the £ sterling in gold and silver coin was unaltered from the time of James II. until the year 1817, when the currency was debased 5 per cent., the same quantity of metal serving for 21s. as previously for 20s.

The following table shows the incidence of revenue and expenditure per inhabitant during the present reign :—

#### SHILLINGS PER INHABITANT YEARLY

|         | Revenue |        |          |       | Expenditure |      |            |       |
|---------|---------|--------|----------|-------|-------------|------|------------|-------|
|         | Customs | Excise | Sundries | Total | Army, &c.   | Debt | Government | Total |
| 1837-51 | 16.7    | 11.2   | 14.1     | 42.0  | 11.9        | 21.3 | 7.5        | 40.7  |
| 1852-61 | 16.9    | 12.8   | 18.5     | 48.2  | 20.5        | 20.3 | 9.7        | 50.5  |
| 1862-71 | 14.7    | 13.5   | 18.9     | 47.1  | 17.5        | 17.7 | 10.9       | 46.1  |
| 1872-81 | 12.2    | 16.2   | 20.2     | 48.6  | 16.9        | 17.0 | 14.2       | 48.1  |
| 1882-89 | 11.0    | 14.5   | 23.1     | 48.6  | 17.0        | 15.2 | 16.3       | 48.5  |

The following table shows the outlay compared with population over the whole period of 52 years, taking the mean population at 32 million souls :—

|                    | Expenditure, Millions £ | Average, £ Yearly | Shillings per Inhabitant Yearly |
|--------------------|-------------------------|-------------------|---------------------------------|
| Army and navy      | 1,297                   | 24,940,000        | 15.7                            |
| Debt               | 1,354                   | 26,040,000        | 16.3                            |
| Redemption of debt | 94                      | 1,810,000         | 1.1                             |
| Government         | 910                     | 17,500,000        | 11.0                            |
| Total              | 3,655                   | 70,290,000        | 44.1                            |

The following table shows how the three kingdoms contribute to the national revenue (1888) :—

|            | "Economist" Estimates |             |            |               |
|------------|-----------------------|-------------|------------|---------------|
|            | England, £            | Scotland, £ | Ireland, £ | U. Kingdom, £ |
| Stamps     | 7,440,000             | 840,000     | 440,000    | 8,720,000     |
| Customs    | 16,130,000            | 1,640,000   | 2,020,000  | 19,790,000    |
| Excise     | 16,680,000            | 4,680,000   | 4,260,000  | 25,620,000    |
| Income-tax | 12,500,000            | 1,180,000   | 600,000    | 14,280,000    |
| Land, &c.  | 2,790,000             | 160,000     | ...        | 2,950,000     |
| Total      | 55,540,000            | 8,500,000   | 7,320,000  | 71,360,000    |

\* Loans amounting nominally to 733 millions sterling were emitted, the net product of which was 526 millions, which helped to meet deficit, there being also 60 millions of floating debt, which brings up the total expenditure to 2252 millions.

The above compare with the Treasury estimates thus:—

|              | Economist,<br>£ | Treasury,<br>£ | Ratio     |          |
|--------------|-----------------|----------------|-----------|----------|
|              |                 |                | Economist | Treasury |
| England . .  | 55,540,000      | 58,860,000     | 77.8      | 81.0     |
| Scotland . . | 8,500,000       | 7,790,000      | 11.9      | 10.7     |
| Ireland . .  | 7,320,000       | 6,080,000      | 10.3      | 8.3      |
| Total . .    | 71,360,000      | 72,730,000     | 100.0     | 100.0    |

If we compare the income-tax assessments with the share of revenue raised in each of the three kingdoms, we find, taking the latter at a medium between the "Economist" and the Treasury estimates, as follows:—

|              | Assessed<br>Incomes | Revenue    | Ratio of Latter<br>to Income, |
|--------------|---------------------|------------|-------------------------------|
|              | £                   | £          | £                             |
| England . .  | 542,500,000         | 57,200,000 | 10.6                          |
| Scotland . . | 57,200,000          | 8,200,000  | 14.3                          |
| Ireland . .  | 36,600,000          | 6,700,000  | 18.0                          |
| Total . .    | 636,300,000         | 72,100,000 | 11.3                          |

It would appear that England bears much less than her share, and the sister kingdoms a great deal too much.

*Debt.*—The National Debt began with William III., and reached its maximum in 1816, after the overthrow of Bonaparte, when the amount was variously estimated, viz.:—

|                     |             |
|---------------------|-------------|
| Douleday . . . . .  | 944,152,000 |
| Porter . . . . .    | 885,186,000 |
| M'Culloch . . . . . | 840,850,000 |

The last mentioned appears to have regarded only the funded debt, the total, according to Whittaker, having stood thus in January 1816:—

|                                |             |
|--------------------------------|-------------|
| Funded . . . . .               | 816,312,000 |
| Unfunded . . . . .             | 44,727,000  |
| Terminable annuities . . . . . | 39,397,000  |

Total . . . . . 900,436,000

The estimated wealth of the nation, according to the best authorities, may be placed side by side with the debt to show the relative magnitude of the latter at different epochs:—

| Date | Millions £ Stg. |      | Ratio<br>of Debt | £ per Inhab. |      | Obs.       |
|------|-----------------|------|------------------|--------------|------|------------|
|      | Wealth          | Debt |                  | Wealth       | Debt |            |
| 1702 | 490             | 13   | 2.7              | 72           | 2    | England    |
| 1763 | 1,100           | 147  | 13.4             | 156          | 21   | G. Britain |
| 1797 | 1,800           | 413  | 22.9             | 177          | 41   | "          |
| 1816 | 2,400           | 900  | 37.5             | 120          | 45   | U. K.      |
| 1837 | 3,900           | 788  | 20.2             | 158          | 32   | "          |
| 1860 | 5,560           | 826  | 14.9             | 193          | 29   | "          |
| 1870 | 7,080           | 801  | 11.3             | 230          | 26   | "          |
| 1889 | 9,400           | 698  | 7.4              | 250          | 19   | "          |

The history of the National Debt may be briefly explained thus:—

|                                       | Millions £ | Date      |
|---------------------------------------|------------|-----------|
| Wars of William and Anne . . . . .    | 73         | 1689-1712 |
| Conquest of Canada . . . . .          | 62         | 1759-61   |
| American war . . . . .                | 121        | 1775-80   |
| Campaigns against Bonaparte . . . . . | 581        | 1793-1815 |
| Malversation in Ireland . . . . .     | 63         | 1802-16   |

Total in 1816 . . . . . 900

The war loans negotiated by George II. and George III. amounted to 794 millions sterling, but produced in

reality only 585 millions, or 73 per cent. of the written value, viz.:—

| Years     | Nominal<br>Amount | Realised     | Annual<br>Charge | Actual<br>Interest |
|-----------|-------------------|--------------|------------------|--------------------|
| 1756-63   | £ 60,670,000      | £ 59,500,000 | £ 2,315,000      | 3.90               |
| 1776-84   | 114,687,000       | 92,700,000   | 5,012,000        | 5.40               |
| 1785-1816 | 618,404,000       | 433,000,000  | 23,387,000       | 5.40               |
| 60 years  | 793,761,000       | 585,200,000  | 30,714,000       | 5.25               |

The principal conversions of debt were the following:—

| Date    | Minister   | Sum, £      | Annual<br>Saving, £ |
|---------|------------|-------------|---------------------|
| 1716    | Walpole    | 32,500,000  | 325,000             |
| 1749    | Pelham     | 56,500,000  | 565,000             |
| 1822    | Vansittart | 153,000,000 | 1,530,000           |
| 1824    | Robinson   | 76,000,000  | 380,000             |
| 1830    | Goulburn   | 153,000,000 | 760,000             |
| 1844    | "          | 248,000,000 | 1,240,000           |
| 1860-74 | Gladstone  | 59,000,000  | 330,000             |
| 1884    | "          | 79,000,000  | "                   |
| 1888    | Goschen    | 549,100,000 | 1,400,000           |

Walpole and Vansittart converted 5 into 4 per cents., Pelham 4 into 3 per cents., Robinson 4 into 3½ per cents. The conversions effected by Gladstone were connected with sums held in the Court of Chancery and Savings-bank funds. Goschen's conversion reduced the 3 per cents. into new stock bearing 2½ per cent. for a number of years, after which to be reduced to 2½ per cents., which latter will lead to an annual saving of £2,800,000, as compared with the interest payable in 1887.

In March 1889 the debt was made up thus:—

|                                |             |
|--------------------------------|-------------|
| Funded . . . . .               | 607,058,000 |
| Terminable annuities . . . . . | 75,279,000  |
| Unfunded debt . . . . .        | 16,093,000  |
| Total . . . . .                | 698,430,000 |

The following table shows the quotations of Consols:—

| Period          | Debt,<br>Millions £ | Quotations |         |         | Year of |        |
|-----------------|---------------------|------------|---------|---------|---------|--------|
|                 |                     | Maximum    | Minimum | Average | Highest | Lowest |
| 1740-60 . . . . | 78                  | 104        | 82      | 93.5    | 1749    | ...    |
| 1761-80 . . . . | 139                 | 91         | 61      | 82.1    | ...     | 1780   |
| 1781-1800 . . . | 240                 | 97         | 47      | 67.2    | ...     | 1798   |
| 1801-20 . . . . | 841                 | 84         | 50      | 64.9    | 1817    | 1803   |
| 1821-40 . . . . | 781                 | 97         | 69      | 85.8    | 1824    | 1821   |
| 1841-60 . . . . | 786                 | 102        | 79      | 93.4    | 1852    | 1847   |
| 1861-81 . . . . | 776                 | 103        | 84      | 93.1    | 1867    | 1866   |
| 1882-88 . . . . | 740                 | 103        | 96      | 100.8   | 1883    | 1885   |

The following table shows the number of holders of Consols at various dates:—

| Average, £ | 1830    | 1848    | 1880    |
|------------|---------|---------|---------|
| 100,000    | 172     | 177     | 283     |
| 50,000     | 1,810   | 1,550   | 1,892   |
| 10,000     | 22,189  | 20,561  | 19,140  |
| 3,000      | 124,014 | 120,487 | 112,077 |
| 500        | 132,960 | 141,352 | 103,122 |
| Total      | 281,145 | 284,127 | 236,514 |

Unclaimed dividends in March 1882 amounted to £3,027,000.

When Mr. Goschen converted the debt in 1889, no fewer than 12,700 notices were returned by the Post-Office as "not known." After every inquiry, £7,850,000 was unclaimed, and credited to 10,900 accounts in the Bank of England; most were probably dead or gone away.

## SCOTLAND

Official returns of Scottish revenue show as follows:—

| Period            | Annual Average | Per Inhabitant |
|-------------------|----------------|----------------|
|                   | £              | £ s. d.        |
| 1804-09 . . . . . | 3,500,000      | 2 1 0          |
| 1810-15 . . . . . | 4,950,000      | 2 15 0         |

In the estimate already given for 1881 the revenue of Scotland appears as £9,990,000, or 54s. per inhabitant, almost the same as the ratio of 75 years ago.

## IRELAND

Ware says that the revenue of the royal palace at Kincora was 5100 horned cattle, 100 horses, and 4800 swine, contributed yearly by the various chieftains. Noy states that Edward III. drew £30,000 from Ireland for the campaigns of the Black Prince. Henry VII. levied a duty of 5 per cent. *ad valorem* on all Irish imports and exports, which would probably produce £10,000 a year. Regular records were kept under William III. and subsequent monarchs, which show as follows:—

| Period              | Annual Average, £ | Per Inhab. |
|---------------------|-------------------|------------|
|                     | £ s. d.           |            |
| 1690-1700 . . . . . | 640,000           | 0 7 6      |
| 1730-60 . . . . .   | 620,000           | 0 6 3      |
| 1761-70 . . . . .   | 890,000           | 0 6 8      |
| 1771-80 . . . . .   | 1,340,000         | 0 9 6      |
| 1790 . . . . .      | 2,162,000         | 0 11 0     |
| 1809-10 . . . . .   | 5,480,000         | 1 0 2      |
| 1811-16 . . . . .   | 7,400,000         | 1 5 0      |
| 1817-20 . . . . .   | 5,850,000         | 0 17 0     |
| 1821-30 . . . . .   | 4,930,000         | 0 14 0     |

In 1801 the Act of Union ordained the revenues and debt of Ireland to be kept distinct. The debt was:—

| Year           | £          |
|----------------|------------|
| 1784 . . . . . | 1,997,000  |
| 1793 . . . . . | 2,220,000  |
| 1801 . . . . . | 31,950,000 |
| 1809 . . . . . | 77,445,000 |

The finances got into very bad hands after the Union. The Budgets of Ireland from 1802 to 1816 summed up as follows:—

| Period             | Revenue    | Expenditure | Deficit    |
|--------------------|------------|-------------|------------|
|                    | £          | £           | £          |
| 1809-10 . . . . .  | 49,400,000 | 89,500,000  | 40,100,000 |
| 1811-16 . . . . .  | 44,200,000 | 90,300,000  | 46,100,000 |
| 15 years . . . . . | 93,600,000 | 179,800,000 | 86,200,000 |

| Reign                    | Date    | Millions £ |             | Annual Average, £ |             | Debt, Millions £ |
|--------------------------|---------|------------|-------------|-------------------|-------------|------------------|
|                          |         | Revenue    | Expenditure | Revenue           | Expenditure |                  |
| Bourbons . . . . .       | 1815-30 | 595        | 659         | 36,800,000        | 41,100,000  | 177              |
| Louis Philippe . . . . . | 1831-48 | 749        | 979         | 47,800,000        | 50,600,000  | 230              |
| Republic . . . . .       | 1848-52 | 220        | 280         | 55,000,000        | 70,000,000  | 290              |
| Empire . . . . .         | 1853-70 | 1,354      | 1,497       | 74,500,000        | 82,200,000  | 468              |
| Republic . . . . .       | 1871-80 | 1,151      | 1,301       | 115,100,000       | 130,100,000 | 1,060            |
| " . . . . .              | 1881-88 | 1,118      | 1,280       | 139,700,000       | 160,000,000 | 1,269            |
| 74 years . . . . .       | ...     | 5,187      | 5,996       | ...               | ...         | ...              |

In 1817 Great Britain took over the Irish debt and amalgamated the finances of the two countries, but separate statements of revenue were published down to 1831, from which date none have been kept. The revenue from 1821 to 1830 was made up thus:—

|                    | Annual Average, £ |
|--------------------|-------------------|
| Customs . . . . .  | 1,920,000         |
| Excise . . . . .   | 1,940,000         |
| Sundries . . . . . | 1,070,000         |
| Total . . . . .    | 4,930,000         |

## FRANCE

The revenue at various periods has been as follows:—

| Date | Reign                    | Amount      | Per Inhabitant | National Debt, Millions £ |
|------|--------------------------|-------------|----------------|---------------------------|
|      |                          | £           | £ s. d.        |                           |
| 1252 | Louis IX. . . . .        | 140,000     | 0 0 4          | ...                       |
| 1380 | Charles V. . . . .       | 120,000     | 0 0 4          | ...                       |
| 1460 | Charles VII. . . . .     | 150,000     | 0 0 4          | ...                       |
| 1546 | Francis I. . . . .       | 640,000     | 0 1 0          | ...                       |
| 1607 | Henry IV. . . . .        | 1,300,000*  | 0 2 0          | ...                       |
| 1661 | Louis XIV. . . . .       | 3,400,000   | 0 4 0          | ...                       |
| 1683 | " . . . . .              | 4,800,000   | 0 5 6          | 48                        |
| 1742 | Louis XV. . . . .        | 13,700,000  | 0 13 0         | 110                       |
| 1775 | Louis XVI. . . . .       | 14,800,000  | 0 12 0         | 129                       |
| 1786 | " . . . . .              | 20,800,000  | 0 16 0         | 200                       |
| 1791 | " . . . . .              | 27,800,000  | 1 2 0          | 468                       |
| 1814 | Napoleon I. . . . .      | 40,000,000  | 1 7 0          | 50                        |
| 1830 | Charles X. . . . .       | 36,500,000  | 1 2 6          | 187                       |
| 1846 | Louis Philippe . . . . . | 46,400,000  | 1 7 0          | 260                       |
| 1850 | Republic . . . . .       | 51,000,000  | 1 9 0          | 248                       |
| 1860 | Napoleon III. . . . .    | 68,500,000  | 1 16 0         | 410                       |
| 1870 | " . . . . .              | 87,600,000  | 2 6 0          | 504                       |
| 1880 | Republic . . . . .       | 135,700,000 | 3 10 0         | 1,060                     |
| 1889 | " . . . . .              | 121,800,000 | 3 5 0          | 1,269                     |

\* The gross revenue, including tithes and local taxes, was £3,800,000; the royal revenue as here given.

The following is an official statement of national revenue and expenditure during 71 years to 1885:—

| Period             | Millions £ Sterling |             |                  |
|--------------------|---------------------|-------------|------------------|
|                    | Revenue             | Expenditure | Excess of Latter |
| 1815-20 . . . . .  | 211                 | 257         | 46               |
| 1821-30 . . . . .  | 384                 | 402         | 18               |
| 1831-40 . . . . .  | 419                 | 458         | 39               |
| 1841-50 . . . . .  | 504                 | 610         | 106              |
| 1851-60 . . . . .  | 619                 | 762         | 143              |
| 1861-70 . . . . .  | 781                 | 926         | 145              |
| 1871-80 . . . . .  | 1,151               | 1,301       | 150              |
| 1881-85 . . . . .  | 687                 | 814         | 127              |
| 71 years . . . . . | 4,756               | 5,530       | 774              |

Some extraordinary items, such as the indemnity to Germany in 1872, are omitted. The above may be also stated according to the successive forms of government as follows:—

During the decade 1871-80 loans were emitted to the nominal sum of 410 millions sterling, producing 329 millions, besides which about 65 millions were added to floating debt. The following table shows the expenditure at different dates :—

|                        | 1830              | 1851              | 1869              | 1877               | 1885               |
|------------------------|-------------------|-------------------|-------------------|--------------------|--------------------|
| Debt . . . . .         | 14,500,000        | 16,600,000        | 21,400,000        | 47,600,000         | 52,800,000         |
| Army . . . . .         | 7,500,000         | 11,800,000        | 16,800,000        | 21,600,000         | 24,000,000         |
| Navy . . . . .         | 2,600,000         | 4,200,000         | 7,200,000         | 7,700,000          | 12,400,000         |
| Public works . . . . . | 1,600,000         | 4,900,000         | 5,200,000         | 9,200,000          | 16,800,000         |
| Government . . . . .   | 10,300,000        | 13,500,000        | 35,200,000        | 38,900,000         | 51,700,000         |
| <b>Total</b> . . . . . | <b>36,500,000</b> | <b>51,000,000</b> | <b>85,800,000</b> | <b>125,000,000</b> | <b>157,700,000</b> |

The increase in items of revenue is as follows :—

|                        | 1869              | 1875               | 1885               | Ratio of Increase |            |            |
|------------------------|-------------------|--------------------|--------------------|-------------------|------------|------------|
|                        |                   |                    |                    | 1869              | 1875       | 1885       |
| Customs . . . . .      | 5,800,000         | 10,700,000         | 16,800,000         | 100               | 184        | 290        |
| Excise . . . . .       | 25,100,000        | 42,300,000         | 42,600,000         | 100               | 169        | 170        |
| Stamps . . . . .       | 18,200,000        | 24,300,000         | 27,000,000         | 100               | 134        | 149        |
| Taxes . . . . .        | 23,000,000        | 27,400,000         | 30,300,000         | 100               | 119        | 132        |
| Post-office . . . . .  | 3,800,000         | 4,800,000          | 6,600,000          | 100               | 126        | 173        |
| Sundries . . . . .     | 8,300,000         | 14,500,000         | 18,300,000         | 100               | 175        | 220        |
| <b>Total</b> . . . . . | <b>84,200,000</b> | <b>124,000,000</b> | <b>141,600,000</b> | <b>100</b>        | <b>148</b> | <b>170</b> |

The total revenue and expenditure in the decade 1871-80 were as follows :—

#### MILLIONS £ STERLING

| Revenue                |              | Expenditure                   |              |
|------------------------|--------------|-------------------------------|--------------|
| Customs . . . . .      | 109          | Franco-German war . . . . .   | 304          |
| Excise . . . . .       | 386          | Army and navy . . . . .       | 305          |
| Stamps . . . . .       | 240          | Debt and pensions . . . . .   | 466          |
| Direct taxes . . . . . | 271          | Justice and schools . . . . . | 60           |
| Post-office . . . . .  | 44           | Public works . . . . .        | 90           |
| Sundries . . . . .     | 101          | Gen. administration . . . . . | 380          |
| <b>Total</b> . . . . . | <b>1,151</b> | <b>Total</b> . . . . .        | <b>1,605</b> |

Mr. Yves Guyot compares the rise of revenue since the Bonaparte epoch\* thus :—

|                         | 1800-10 | 1822 | 1840 | 1860 | 1870 | 1880 |
|-------------------------|---------|------|------|------|------|------|
| Customs . . . . .       | 100     | 154  | 198  | 190  | 171  | 408  |
| Stamps . . . . .        | 100     | 92   | 130  | 203  | 223  | 400  |
| Property-tax . . . . .  | 100     | 85   | 85   | 92   | 102  | 112  |
| Value of land . . . . . | 100     | 140  | ...  | 370  | 400  | 366  |

*Debt.*—This began with Louis XIV., who spent great sums in war and in building Versailles. It increased with John Law's state-bank, and rose in the latter years of Louis XVI. to 468 millions sterling. It was repudiated by the Republic, some creditors getting 33 per cent., the rest nothing, and thus reduced to about 30 millions sterling. At the fall of Bonaparte it was only 50 millions. Of late years the accounts published are incomplete, but M. Leroy Beaulieu estimates it now at

\* The Budget for 1802 was made up thus :—

| Revenue                |                   | Expenditure            |                   |
|------------------------|-------------------|------------------------|-------------------|
| Land-tax . . . . .     | 8,800,000         | Army . . . . .         | 9,700,000         |
| Forests . . . . .      | 7,600,000         | Navy . . . . .         | 5,100,000         |
| Customs, &c. . . . .   | 6,400,000         | Government . . . . .   | 6,200,000         |
| <b>Total</b> . . . . . | <b>22,800,000</b> | <b>Total</b> . . . . . | <b>21,000,000</b> |

1269 millions sterling, exclusive of municipal debts. The official returns are as follows :—

| Year           | Millions £ Sterling |          |       |
|----------------|---------------------|----------|-------|
|                | Funded              | Floating | Total |
| 1814 . . . . . | 50                  | ...      | ...   |
| 1830 . . . . . | 177                 | 10       | 187   |
| 1848 . . . . . | 238                 | 22       | 260   |
| 1852 . . . . . | 221                 | 27       | 248   |
| 1869 . . . . . | 468                 | 36       | 504   |
| 1880 . . . . . | 794                 | 61       | 855   |
| 1886 . . . . . | 789                 | 40       | 829   |

These returns are misleading, as it would appear from them that the debt declined 26 millions between 1880 and 1886, whereas it increased. Even the Budget returns show a deficit of 93 millions sterling in those six years, the aggregate revenue being 834 millions, expenditure 927 millions. The floating debt in 1888 was officially stated at 118 millions sterling. The following table shows the funded debt at various dates :—

| Year           | Millions £ Sterling |              |             |             |       |
|----------------|---------------------|--------------|-------------|-------------|-------|
|                | 5 per Cent.         | 4½ per Cent. | 4 per Cent. | 3 per Cent. | Total |
| 1814 . . . . . | 51                  | ...          | ...         | ...         | 51    |
| 1830 . . . . . | 131                 | 1            | 3           | 42          | 177   |
| 1848 . . . . . | 117                 | 1            | 26          | 94          | 238   |
| 1852 . . . . . | 146                 | 1            | 2           | 72          | 221   |
| 1871 . . . . . | ...                 | 33           | ...         | 465         | 498   |
| 1880 . . . . . | 276                 | 33           | ...         | 485         | 794   |
| 1887 . . . . . | ...                 | 301          | ...         | 527         | 828   |

The floating debt at different dates was stated thus :—

| Year           | Millions £ Sterling |               |          |       |
|----------------|---------------------|---------------|----------|-------|
|                | Exchequer Bills     | Savings Banks | Sundries | Total |
| 1860 . . . . . | 5.7                 | 9.2           | 17.5     | 32.4  |
| 1869 . . . . . | 4.6                 | 10.2          | 17.0     | 31.8  |
| 1880 . . . . . | 6.2                 | 23.5          | 31.5     | 61.2  |
| 1888 . . . . . | 59.1                | 38.4          | 21.0     | 118.5 |

Taking the total debt at M. Leroy Beaulieu's estimate of 1269 millions, it may be said approximately to represent the following extraordinary outlay:—

|                                    | Millions £  |
|------------------------------------|-------------|
| Bonaparte's wars . . . . .         | 51          |
| Restoration indemnities . . . . .  | 60          |
| Conquest of Algeria . . . . .      | 38          |
| Crimean war . . . . .              | 93          |
| Wars in Italy, Mexico, &c. . . . . | 33          |
| Franco-German . . . . .            | 316         |
| Sundries . . . . .                 | 678         |
| <b>Total . . . . .</b>             | <b>1269</b> |

There was a loss of 200 millions on the issue of loans, and an expenditure of 260 millions on public works, which leaves a balance of 218 millions for sundries unaccounted for. The loans issued between 1816 and 1881 were as follows:—

| Period       | Number of Loans | Issue, £           | Realised, £        | Per Cent. |
|--------------|-----------------|--------------------|--------------------|-----------|
| 1816-30      | 11              | 80,000,000         | 57,500,000         | 72        |
| 1831-48      | 13              | 95,000,000         | 70,400,000         | 74        |
| 1849-69      | 14              | 200,000,000        | 134,600,000        | 67        |
| 1870-81      | 6               | 410,000,000        | 329,000,000        | 80        |
| <b>Total</b> | <b>44</b>       | <b>785,000,000</b> | <b>591,500,000</b> | <b>75</b> |

The interest paid yearly on the above loans was as follows:—

| Period        | Sum Realised, £ | Interest, £ | Rate |
|---------------|-----------------|-------------|------|
| 1816-30 . . . | 57,500,000      | 3,970,000   | 6.9  |
| 1831-48 . . . | 70,400,000      | 3,850,000   | 5.5  |
| 1849-69 . . . | 134,600,000     | 6,240,000   | 4.6  |
| 1870-81 . . . | 329,000,000     | 18,140,000  | 5.5  |

The total issues of 65 years are summed up thus:—

|                        | Millions £ |
|------------------------|------------|
| 6 per cent . . . . .   | 10         |
| 5 " . . . . .          | 400        |
| 4½ " . . . . .         | 16         |
| 4 " . . . . .          | 11         |
| 3 " . . . . .          | 348        |
| <b>Total . . . . .</b> | <b>785</b> |

If we compare the debt of France with the estimated wealth at various dates, we find thus:—

| Year           | Millions £ Sterling |       | Ratio of Debt |
|----------------|---------------------|-------|---------------|
|                | Wealth              | Debt  |               |
| 1830 . . . . . | 3,480               | 187   | 5.3           |
| 1848 . . . . . | 5,000               | 260   | 5.2           |
| 1869 . . . . . | 7,000               | 504   | 7.2           |
| 1889 . . . . . | 8,600               | 1,269 | 14.7          |

The burden of debt is almost double what it is in the United Kingdom. See also *Local Taxation*.

#### GERMANY

The revenue and debt of Prussia singly, and also of Prussia and the other States now composing the German Empire, were at various dates approximately as follows:—

| Year | Prussia    |             | Germany     |             |
|------|------------|-------------|-------------|-------------|
|      | Revenue, £ | Debt, £     | Revenue, £  | Debt, £     |
| 1752 | 1,800,000  | ...         | ...         | ...         |
| 1786 | 5,400,000  | ...         | ...         | ...         |
| 1801 | 4,700,000  | 4,500,000   | 10,000,000  | 8,000,000   |
| 1810 | 2,700,000  | 10,000,000  | 11,500,000  | 20,000,000  |
| 1822 | 7,000,000  | 14,000,000  | 14,400,000  | 39,000,000  |
| 1850 | 13,300,000 | 27,000,000  | 23,800,000  | 69,000,000  |
| 1865 | 21,800,000 | 42,200,000  | 36,000,000  | 128,300,000 |
| 1875 | 34,700,000 | 65,000,000  | 85,000,000  | 215,000,000 |
| 1890 | 79,300,000 | 207,300,000 | 154,700,000 | 434,800,000 |

The revenue and expenditure of Germany since 1850 may be stated approximately as follows:—

| Period          | Millions £   |              | Yearly Average    |                   |
|-----------------|--------------|--------------|-------------------|-------------------|
|                 | Revenue      | Expenditure  | Revenue, £        | Expenditure, £    |
| 1851-70         | 740          | 850          | 37,000,000        | 42,500,000        |
| 1871-80         | 725          | 840          | 72,500,000        | 84,000,000        |
| 1881-89         | 1,050        | 1,170        | 117,000,000       | 130,000,000       |
| <b>39 years</b> | <b>2,515</b> | <b>2,860</b> | <b>64,500,000</b> | <b>73,300,000</b> |

#### Revenue, £

|                        | 1822              | 1850              | 1867              | 1882              | 1887              |
|------------------------|-------------------|-------------------|-------------------|-------------------|-------------------|
| Prussia . . . . .      | 7,000,000         | 13,300,000        | 25,300,000        | 39,000,000        | 64,400,000        |
| Bavaria . . . . .      | 2,500,000         | 4,000,000         | 5,900,000         | 11,100,000        | 12,000,000        |
| Wurtemberg . . . . .   | 1,000,000         | 1,100,000         | 1,300,000         | 2,500,000         | 2,700,000         |
| Saxony . . . . .       | 900,000           | 1,400,000         | 2,200,000         | 3,200,000         | 3,800,000         |
| Other States . . . . . | 3,000,000         | 4,000,000         | 5,800,000         | 10,700,000        | 11,200,000        |
| <b>Total . . . . .</b> | <b>14,400,000</b> | <b>23,800,000</b> | <b>40,500,000</b> | <b>66,500,000</b> | <b>94,100,000</b> |

The total for 1882 and 1887 do not include the Imperial revenue.

The revenue of Prussia from 1822 to 1833 averaged thus:—

|                        | £                |
|------------------------|------------------|
| Customs . . . . .      | 3,200,000        |
| Land-tax . . . . .     | 2,700,000        |
| Sundries . . . . .     | 1,900,000        |
| <b>Total . . . . .</b> | <b>7,800,000</b> |

The total revenue of Germany is made up approximately as follows:—

|                                   | £                  |
|-----------------------------------|--------------------|
| Customs . . . . .                 | 13,500,000         |
| Income-tax . . . . .              | 12,500,000         |
| Excise . . . . .                  | 22,100,000         |
| Stamps, &c. . . . .               | 16,800,000         |
| Railways . . . . .                | 55,000,000         |
| Post-office, domains, &c. . . . . | 34,800,000         |
| <b>Total . . . . .</b>            | <b>154,700,000</b> |

It may also be classified thus :—

|                                   |                      |
|-----------------------------------|----------------------|
| Imperial taxes . . . . .          | £ 27,700,000         |
| Direct State taxes . . . . .      | 13,700,000           |
| Indirect State taxes . . . . .    | 23,500,000           |
| Railways . . . . .                | 55,000,000           |
| Post-office, domains, &c. . . . . | 34,800,000           |
| <b>Total . . . . .</b>            | <b>£ 154,700,000</b> |

Besides the Imperial taxes the Empire receives "matri-  
cular quotas" from the several States in this order  
(1890) :—

|                      |             |                  |           |
|----------------------|-------------|------------------|-----------|
| Prussia . . . . .    | £ 7,800,000 | Baden . . . . .  | £ 500,000 |
| Bavaria . . . . .    | 1,900,000   | Alsace . . . . . | 500,000   |
| Saxony . . . . .     | 900,000     | Hesse . . . . .  | 260,000   |
| Wurtemberg . . . . . | 700,000     | Others . . . . . | 940,000   |

Making a total of £13,500,000 sterling. These matricu-  
lar quotas are included in the revenue of the several States.

The total Budgets for 1890 may be summed up thus :—

|                                |                      |
|--------------------------------|----------------------|
| Imperial revenue . . . . .     | £ 60,400,000         |
| Prussian budget . . . . .      | 79,300,000           |
| Bavaria, Saxony, &c. . . . .   | 28,500,000           |
| <b>Total . . . . .</b>         | <b>£ 168,200,000</b> |
| Deduct repetitions . . . . .   | 13,500,000           |
| <b>Total revenue . . . . .</b> | <b>£ 154,700,000</b> |

The reason for deducting repetitions is that the "matri-  
cular quotas" are counted in the State Budgets and also  
in that of the Empire.

The civil list of the Emperor is defrayed solely by  
Prussia, and reaches £786,000, of which £386,000 arises  
from crown forests, the rest from ordinary revenue.

As near as we can ascertain the debts of the several  
States at different periods, they stood thus :—

|                        | 1820-22           | 1849-50           | 1889               |
|------------------------|-------------------|-------------------|--------------------|
|                        | £                 | £                 | £                  |
| Prussia . . . . .      | 14,000,000        | 27,000,000        | 222,500,000        |
| Bavaria . . . . .      | 9,200,000         | 10,700,000        | 67,100,000         |
| Saxony . . . . .       | 3,700,000         | 7,000,000         | 32,700,000         |
| Wurtemberg . . . . .   | 2,000,000         | 4,800,000         | 21,700,000         |
| Baden . . . . .        | 2,000,000         | 3,300,000         | 19,400,000         |
| Hamburg . . . . .      | 1,200,000         | 1,600,000         | 11,800,000         |
| Brunswick . . . . .    | 1,000,000         | 1,500,000         | 3,600,000          |
| Small States . . . . . | 6,000,000         | 13,100,000        | 10,800,000         |
| <b>Total . . . . .</b> | <b>39,100,000</b> | <b>69,000,000</b> | <b>389,600,000</b> |

The total for 1889 does not include the Imperial debt,  
which is £45,200,000, bringing up the whole debt of the  
nation to nearly 435 millions sterling.

The items of Russian revenue and expenditure have been as follows, reduced to gold values :—

| Revenue                |                   |                   | Expenditure            |                   |                   |
|------------------------|-------------------|-------------------|------------------------|-------------------|-------------------|
|                        | 1875              | 1889              |                        | 1875              | 1889              |
|                        | £                 | £                 |                        | £                 | £                 |
| Customs . . . . .      | 8,300,000         | 14,100,000        | Debt . . . . .         | 14,400,000        | 27,900,000        |
| Excise . . . . .       | 29,700,000        | 31,100,000        | Army . . . . .         | 23,300,000        | 21,200,000        |
| Poll-tax . . . . .     | 16,000,000        | 8,200,000         | Navy . . . . .         | 3,500,000         | 4,100,000         |
| Post-office . . . . .  | 2,100,000         | 2,900,000         | Interior . . . . .     | 7,000,000         | 7,200,000         |
| Crown lands . . . . .  | 3,200,000         | 3,300,000         | Schools . . . . .      | 1,900,000         | 2,100,000         |
| Sundries . . . . .     | 15,100,000        | 30,300,000        | Sundries . . . . .     | 22,300,000        | 25,700,000        |
| <b>Total . . . . .</b> | <b>74,400,000</b> | <b>89,900,000</b> | <b>Total . . . . .</b> | <b>72,400,000</b> | <b>88,200,000</b> |

The debt of Germany in 1887 stood as follows :—

| Class                  | Amount,<br>Million £ | Interest, £       |
|------------------------|----------------------|-------------------|
| 4 per cents. . . . .   | 310                  | 12,400,000        |
| 3½ per cents. . . . .  | 50                   | 1,750,000         |
| Various . . . . .      | 59                   | 2,550,000         |
| <b>Total . . . . .</b> | <b>419</b>           | <b>16,700,000</b> |

There are 20,000 miles of State railways, representing  
a value of 410 millions sterling, that is, practically the  
whole sum of public debt. Hence it would be in a  
manner justifiable to say that Germany has no public  
debt.

#### RUSSIA

Revenue and debt have been so violently affected by  
the fluctuation of currency, that they can only be taken  
approximately at the various dates, thus :—

| Year | Reign                  | Revenue, £ | Millions £     |               |
|------|------------------------|------------|----------------|---------------|
|      |                        |            | Funded<br>Debt | Total<br>Debt |
| 1620 | Michael . . . . .      | 160,000    | ...            | ...           |
| 1725 | Peter I. . . . .       | 1,600,000  | ...            | ...           |
| 1799 | Paul . . . . .         | 3,900,000  | 7              | 47            |
| 1806 | Alexander I. . . . .   | 9,500,000  | 7              | 95            |
| 1810 | " . . . . .            | 11,200,000 | 7              | 146           |
| 1840 | Nicholas . . . . .     | 17,600,000 | 40             | 150           |
| 1861 | Alexander II. . . . .  | 54,000,000 | 90             | 200           |
| 1875 | " . . . . .            | 74,400,000 | 240            | 370           |
| 1889 | Alexander III. . . . . | 89,900,000 | 624            | 756           |

In 1799 the revenue was made up thus :—

|                        |                  |
|------------------------|------------------|
| Customs . . . . .      | 700,000          |
| Serf-tax . . . . .     | 1,500,000        |
| Liquor-tax . . . . .   | 700,000          |
| Sundries . . . . .     | 1,000,000        |
| <b>Total . . . . .</b> | <b>3,900,000</b> |

The finances since 1850 may be summed up approxi-  
mately thus :—

| Period          | Millions £   |              | Annual Average    |                   |
|-----------------|--------------|--------------|-------------------|-------------------|
|                 | Revenue      | Expenditure  | Revenue           | Expenditure       |
| 1851-70         | 840          | 1,050        | 42,000,000        | 52,500,000        |
| 1871-80         | 603          | 903          | 60,300,000        | 90,300,000        |
| 1881-87         | 518          | 668          | 74,000,000        | 95,400,000        |
| <b>37 years</b> | <b>1,961</b> | <b>2,621</b> | <b>53,000,000</b> | <b>70,800,000</b> |

The above includes extraordinary expenditure. New railways, for example, took 19 millions sterling during the interval of 1884-87.

*Debt.*—It commenced with the issue of inconvertible notes, which rose as follows:—

| Year           | £ Sterling  | Exchange per 100 Gold Roubles |
|----------------|-------------|-------------------------------|
| 1774 . . . . . | 3,250,000   | 103                           |
| 1796 . . . . . | 25,600,000  | 190                           |
| 1800 . . . . . | 34,600,000  | 220                           |
| 1810 . . . . . | 93,800,000  | 300                           |
| 1815 . . . . . | 145,000,000 | 418                           |
| 1823 . . . . . | 96,800,000  | 360                           |
| 1843 . . . . . | 27,000,000  | 100                           |
| 1850 . . . . . | 49,000,000  | 100                           |
| 1864 . . . . . | 113,000,000 | 105                           |
| 1873 . . . . . | 130,000,000 | 116                           |
| 1880 . . . . . | 190,000,000 | 170                           |
| 1888 . . . . . | 174,500,000 | 170                           |

In 1843 the Empire was declared bankrupt, the Treasury calling in the paper issue of 97 millions sterling, and giving the holders new notes of 2 roubles for 7 of the old currency. The new issue began to lose value in 1864, and has now depreciated 40 per cent., a paper rouble being worth only 60 kopecks silver, that is to say, a silver rouble is worth 170 kopecks of paper-money. The first foreign loan was in 1818, which was followed by another in 1820. The growth of debt since 1842 is shown as follows:—

| Year           | Millions £ |          |             |       |
|----------------|------------|----------|-------------|-------|
|                | Foreign    | Internal | Paper-Money | Total |
| 1842 . . . . . | 6          | 23       | 8           | 37    |
| 1852 . . . . . | 12         | 61       | 22          | 95    |
| 1862 . . . . . | 41         | 99       | 61          | 202   |
| 1872 . . . . . | 105        | 133      | 104         | 342   |
| 1882 . . . . . | 189        | 273      | 161         | 623   |
| 1888 . . . . . | 216        | 408      | 132         | 756   |

In the above table only "uncovered" paper-money is counted under that heading. Most of the debt being payable in paper-money worth 2s. per rouble, the debt may be properly put down thus: Foreign 216, internal 324, total 540 millions sterling. The origin of the debt may be approximately set down thus:—

|                                   | Millions £ |
|-----------------------------------|------------|
| Redemption of serfs . . . . .     | 85         |
| Railways and telegraphs . . . . . | 170        |
| Crimean war . . . . .             | 142        |
| Turkish war . . . . .             | 133        |
| Sundries . . . . .                | 226        |
| Total . . . . .                   | 756        |

In 1887 the existing railway loans amounted to 143 millions sterling.

#### AUSTRIA-HUNGARY

The revenue and expenditure since 1831 were approximately:—

| Period   | Millions £ |             | Yearly Average, £ |             |
|----------|------------|-------------|-------------------|-------------|
|          | Revenue    | Expenditure | Revenue           | Expenditure |
| 1831-50  | 340        | 440         | 17,000,000        | 22,000,000  |
| 1851-70  | 720        | 940         | 36,000,000        | 47,000,000  |
| 1871-80  | 560        | 630         | 56,000,000        | 63,000,000  |
| 1881-88  | 544        | 652         | 68,000,000        | 81,500,000  |
| 58 years | 2,164      | 2,662       | 37,300,000        | 46,000,000  |

The revenue and debt are shown approximately thus:—

| Year | Millions £ |      | Year | Millions £ |      |
|------|------------|------|------|------------|------|
|      | Revenue    | Debt |      | Revenue    | Debt |
| 1740 | 4          | 12   | 1862 | 35         | 252  |
| 1793 | 8          | 42   | 1872 | 51         | 324  |
| 1815 | 12         | 83   | 1880 | 62         | 420  |
| 1840 | 16         | 125  | 1889 | 78         | 580  |

The general revenue and expenditure are made up thus (1889):—

|                           | Revenue, £ |                    | Expenditure, £ |
|---------------------------|------------|--------------------|----------------|
| Customs . . . . .         | 3,300,000  | Army . . . . .     | 9,500,000      |
| Austrian quota . . . . .  | 5,800,000  | Navy . . . . .     | 900,000        |
| Hungarian quota . . . . . | 2,700,000  | Sundries . . . . . | 600,000        |
| Total . . . . .           | 11,800,000 | Total . . . . .    | 11,000,000     |

The special budgets of Austria and Hungary may be stated thus:—

|                   | Revenue, £ | Expenditure, £ |
|-------------------|------------|----------------|
| Austria . . . . . | 45,300,000 | 45,000,000     |
| Hungary . . . . . | 29,500,000 | 29,600,000     |
| Total . . . . .   | 74,800,000 | 74,600,000     |

These Budgets include the quotas previously mentioned for the joint or general revenue. The total outlay, therefore, of the whole monarchy is £78,100,000, at the current rate of exchange in 1889, that is, 20d. to the florin.

The finances of Austria proper in 1889 were:—

|                                    | Revenue, £ |                          | Expenditure, £ |
|------------------------------------|------------|--------------------------|----------------|
| Customs . . . . .                  | 3,100,000  | Imperial quota . . . . . | 5,800,000      |
| Excise . . . . .                   | 16,800,000 | Debt . . . . .           | 12,000,000     |
| Property-tax . . . . .             | 8,500,000  | Army and navy . . . . .  | 8,500,000      |
| Stamps . . . . .                   | 1,600,000  | Schools . . . . .        | 1,000,000      |
| Lottery . . . . .                  | 1,800,000  | Board of Trade . . . . . | 4,700,000      |
| Post-office and railways . . . . . | 6,200,000  | Justice . . . . .        | 1,700,000      |
| Sundries . . . . .                 | 7,300,000  | Government . . . . .     | 11,400,000     |
| Total . . . . .                    | 45,300,000 | Total . . . . .          | 45,100,000     |

The Hungarian budget for 1889 was as follows:—

|                        | Revenue, £ |                          | Expenditure, £ |
|------------------------|------------|--------------------------|----------------|
| Trade items . . . . .  | 5,300,000  | Imperial quota . . . . . | 2,700,000      |
| Agricultural . . . . . | 1,000,000  | Debt . . . . .           | 11,000,000     |
| Financial . . . . .    | 22,200,000 | Army . . . . .           | 900,000        |
| Sundries . . . . .     | 1,200,000  | Government, &c. . . . .  | 15,100,000     |
| Total . . . . .        | 29,700,000 | Total . . . . .          | 29,700,000     |

The whole debt of the Empire was as follows:—

|                     | 1875        | 1889        |
|---------------------|-------------|-------------|
|                     | £           | £           |
| General . . . . .   | 300,800,000 | 320,000,000 |
| Austrian . . . . .  | 33,200,000  | 105,900,000 |
| Hungarian . . . . . | 72,000,000  | 154,500,000 |
| Total . . . . .     | 406,000,000 | 580,400,000 |

## ITALY

Estimates were made in 1810, in 1830, and again in 1850 of the revenue and debt of the various States, excepting those provinces held by Austria. Since 1861 the kingdom of Italy publishes official returns :—

| Year | Revenue, £ | Funded Debt, £ | Total Debt, £ |
|------|------------|----------------|---------------|
| 1810 | 4,600,000  | ...            | ...           |
| 1830 | 8,300,000  | ...            | 48,300,000    |
| 1850 | 12,000,000 | ...            | ...           |
| 1861 | 38,000,000 | 85,000,000     | 97,000,000    |
| 1870 | 48,000,000 | 242,000,000    | 333,000,000   |
| 1880 | 55,000,000 | 322,000,000    | 393,000,000   |
| 1890 | 72,000,000 | 363,000,000    | 460,000,000   |

Revenue and expenditure since 1860 have been approximately as follows :—

|          | Millions £ Sterling |             |
|----------|---------------------|-------------|
|          | Revenue             | Expenditure |
| 1861-70  | 430                 | 660         |
| 1871-80  | 534                 | 594         |
| 1881-87  | 440                 | 505         |
| 27 years | 1,404               | 1,759       |

The annual excess of expenditure over revenue since 1861 has been about 13 millions sterling.

The revenue and debt of the various States in 1830 showed as follows :—

|                  | Population | Revenue, £ | Debt, £    | Per Head, £ |      |
|------------------|------------|------------|------------|-------------|------|
|                  |            |            |            | Revenue     | Debt |
| Naples           | 7,420,000  | 3,400,000  | 20,000,000 | 0.45        | 2.70 |
| Sardinia         | 4,160,000  | 2,600,000  | 4,000,000  | 0.63        | 0.98 |
| Church           | 2,590,000  | 1,200,000  | 24,000,000 | 0.45        | 9.20 |
| Tuscany          | 1,280,000  | 700,000    | ...        | 0.55        | ...  |
| Parma and Modena | 790,000    | 400,000    | 300,000    | 0.50        | 0.40 |
| Total            | 16,240,000 | 8,300,000  | 48,300,000 | 0.51        | 5.80 |

The items of ordinary revenue at various dates were :—

|              | 1871       | 1880       | 1888       | Ratio |      |
|--------------|------------|------------|------------|-------|------|
|              | £          | £          | £          | 1871  | 1888 |
| Customs      | 3,200,000  | 5,000,000  | 9,800,000  | 100   | 306  |
| Excise       | 5,900,000  | 7,400,000  | 9,800,000  | 100   | 166  |
| Property-tax | 13,400,000 | 14,400,000 | 15,800,000 | 100   | 118  |
| Grist-tax    | 1,700,000  | 2,200,000  | ...        | ...   | ...  |
| Lottery      | 3,400,000  | 2,900,000  | 3,400,000  | 100   | 100  |
| Stamps       | 1,200,000  | 1,600,000  | 1,500,000  | 100   | 125  |
| Post-office  | 1,100,000  | 1,500,000  | 2,400,000  | 100   | 218  |
| Sundries     | 11,400,000 | 17,300,000 | 20,900,000 | 100   | 183  |
| Total        | 41,300,000 | 52,300,000 | 63,600,000 | 100   | 154  |

The expenditure was made up as follows :—

|              | 1871       | 1880       | 1888       |
|--------------|------------|------------|------------|
|              | £          | £          | £          |
| Debt         | 15,200,000 | 17,400,000 | 20,700,000 |
| Army         | 6,400,000  | 8,300,000  | 12,900,000 |
| Navy         | 1,200,000  | 1,700,000  | 4,900,000  |
| Public works | 4,800,000  | 5,300,000  | 14,600,000 |
| Schools      | 600,000    | 1,100,000  | 1,500,000  |
| Government   | 22,900,000 | 21,600,000 | 26,000,000 |
| Total        | 51,100,000 | 55,400,000 | 80,600,000 |

*Debt.*—This has grown very rapidly, the increase since 1861 being 363 millions sterling, say 14 millions per annum. It may be approximately accounted for as follows :—

|                              | Millions £ |
|------------------------------|------------|
| Railways                     | 80         |
| War and military expenditure | 270        |
| Sundries                     | 110        |
| Total                        | 460        |

Communal and provincial finances in 1885 showed :—

|          | £          |
|----------|------------|
| Revenues | 27,200,000 |
| Debts    | 41,400,000 |

The incidence of debt and interest on population showed thus :—

| Year | Debt, Millions £ | Interest, £ | Debt per Inhabitant, £ | Interest per Inhabitant, Shillings |
|------|------------------|-------------|------------------------|------------------------------------|
| 1850 | 40               | 2,000,000   | 2.0                    | 2                                  |
| 1861 | 97               | 4,600,000   | 4.4                    | 4                                  |
| 1870 | 333              | 16,600,000  | 13.0                   | 13                                 |
| 1880 | 393              | 19,700,000  | 14.0                   | 14                                 |
| 1887 | 460              | 20,700,000  | 15.0                   | 14                                 |

## SPAIN

From official and other statements we find as follows :—

| Year | Reign          | Revenue, £ | Debt, £     |
|------|----------------|------------|-------------|
| 1610 | Philip III.    | 1,320,000  | 40,000,000  |
| 1670 | Charles II.    | 1,930,000  | ...         |
| 1750 | Ferdinand VI.  | 3,320,000  | 11,000,000  |
| 1780 | Charles III.   | 6,400,000  | 20,000,000  |
| 1808 | Ferdinand VII. | 6,000,000  | 69,000,000  |
| 1817 | "              | 7,130,000  | 117,000,000 |
| 1836 | Isabella II.   | 8,500,000  | 276,000,000 |
| 1850 | "              | 11,500,000 | 113,000,000 |
| 1868 | "              | 21,000,000 | 221,000,000 |
| 1878 | Alfonso XII.   | 29,500,000 | 550,000,000 |
| 1888 | Alfonso XIII.  | 35,400,000 | 260,000,000 |

Revenue and expenditure since 1831 have been approximately as follows :—

| Period   | Millions £ |             | Annual Average, £ |             |
|----------|------------|-------------|-------------------|-------------|
|          | Revenue    | Expenditure | Revenue           | Expenditure |
| 1831-50  | 210        | 320         | 10,500,000        | 16,000,000  |
| 1851-70  | 320        | 410         | 16,000,000        | 20,500,000  |
| 1871-80  | 298        | 450         | 29,800,000        | 45,000,000  |
| 1881-88  | 264        | 284         | 33,000,000        | 35,500,000  |
| 58 years | 1,092      | 1,464       | 19,000,000        | 25,400,000  |

The finances of Spain for 1887 showed as follows :—

|                  | Revenue,<br>£ |                  | Expendi-<br>ture, £ |
|------------------|---------------|------------------|---------------------|
| Customs . . . .  | 6,900,000     | Debt . . . . .   | 10,900,000          |
| Direct taxes . . | 12,400,000    | Army and navy .  | 7,300,000           |
| Indirect taxes . | 12,600,000    | Public works . . | 4,000,000           |
| Sundries . . . . | 2,100,000     | Sundries . . . . | 11,800,000          |
| Total . . . . .  | 34,000,000    | Total . . . . .  | 34,000,000          |

*Debt.*—It amounted in 1556 to one million sterling, rising to 40 millions under Philip III., after whose reign it was repudiated. A new debt arose with the War of Succession, which reached eight millions sterling in 1713, and went on increasing till Ferdinand repudiated the most of it. A third debt was caused by the wars of Isabella II. and the Carlists, which reached 276 millions, and was likewise repudiated, holders getting new scrip for about 30 per cent. of the old stock. The fourth debt amounted to 550 millions, when Spain again compounded in 1882, giving bondholders about 40 per cent. in new scrip.

The actual debt stands thus :—

|                               | Amount, £   | Interest, £ |
|-------------------------------|-------------|-------------|
| 4 per cent. foreign . . . .   | 78,800,000  | 3,100,000   |
| Home debt, 4 and 4½ per cent. | 143,200,000 | 5,700,000   |
| Floating, &c. . . . .         | 38,000,000  | 1,200,000   |
| Total . . . . .               | 260,000,000 | 10,000,000  |

#### PORTUGAL

Various statements since 1810 show revenue and debt as follows :—

| Year           | Revenue, £ | Debt, £     |
|----------------|------------|-------------|
| 1810 . . . . . | 1,200,000  | ...         |
| 1825 . . . . . | 2,200,000  | 7,000,000   |
| 1840 . . . . . | 2,700,000  | 17,000,000  |
| 1850 . . . . . | 3,200,000  | 22,000,000  |
| 1878 . . . . . | 5,700,000  | 94,000,000  |
| 1888 . . . . . | 8,400,000  | 113,000,000 |

The finances in 1887 were as follows :—

|                  | Revenue,<br>£ |                 | Expendi-<br>ture, £ |
|------------------|---------------|-----------------|---------------------|
| Customs . . . .  | 4,000,000     | Debt . . . . .  | 3,600,000           |
| Property-tax . . | 700,000       | Army and navy . | 1,400,000           |
| Sundries . . . . | 3,700,000     | Government . .  | 4,000,000           |
| Total . . . . .  | 8,400,000     | Total . . . . . | 9,000,000           |

Since 1850 expenditure has exceeded revenue by 80 millions, say two millions per annum.

Revenue and expenditure since 1831 were approximately as follows :—

| Period   | Millions £ |             | Annual Average, £ |             |
|----------|------------|-------------|-------------------|-------------|
|          | Revenue    | Expenditure | Revenue           | Expenditure |
| 1831-50  | 54         | 74          | 2,700,000         | 3,700,000   |
| 1851-70  | 80         | 120         | 4,000,000         | 6,000,000   |
| 1871-80  | 58         | 87          | 5,800,000         | 8,700,000   |
| 1881-88  | 60         | 72          | 7,500,000         | 9,000,000   |
| 58 years | 252        | 353         | 4,300,000         | 6,000,000   |

*Debt.*—This dates from 1500, but was small in amount till the middle of the present century. It consists at present of 51 millions foreign 3 per cents., 58 millions home 3 per cents., and four millions of floating debt.

#### SWEDEN AND NORWAY

The revenue of these two kingdoms showed as follows :—

| Year           | Sweden, £ | Norway, £ | Total, £  |
|----------------|-----------|-----------|-----------|
| 1810 . . . . . | 1,000,000 | ...       | ...       |
| 1822 . . . . . | 1,300,000 | 300,000   | 1,600,000 |
| 1850 . . . . . | 1,500,000 | 800,000   | 2,300,000 |
| 1878 . . . . . | 4,100,000 | 2,400,000 | 6,500,000 |
| 1888 . . . . . | 4,800,000 | 2,400,000 | 7,200,000 |

Before the annexation of Norway the finances of Sweden showed thus :—

|                     | 1772      | 1784      |
|---------------------|-----------|-----------|
|                     | £         | £         |
| Crown lands . . . . | 330,000   | 330,000   |
| Sundries . . . . .  | 730,000   | 920,000   |
| Total . . . . .     | 1,060,000 | 1,250,000 |

The Swedish debt in 1784 amounted to £8,800,000 sterling.

The items composing the revenue of the two kingdoms in 1887 were :—

|                    | Sweden, £ | Norway, £ | Total, £  |
|--------------------|-----------|-----------|-----------|
| Customs . . . .    | 2,000,000 | 1,100,000 | 3,100,000 |
| Excise . . . . .   | 840,000   | 230,000   | 1,070,000 |
| Property-tax . . . | 440,000   | ...       | 440,000   |
| Railways . . . .   | 330,000   | 330,000   | 660,000   |
| Post-office . . .  | 330,000   | 170,000   | 500,000   |
| Sundries . . . .   | 860,000   | 570,000   | 1,430,000 |
| Total . . . . .    | 4,800,000 | 2,400,000 | 7,200,000 |

The expenditure in 1887 showed as follows :—

|                   | Sweden, £ | Norway, £ | Total, £  |
|-------------------|-----------|-----------|-----------|
| Debt . . . . .    | 500,000   | 200,000   | 700,000   |
| Army and navy .   | 1,100,000 | 350,000   | 1,450,000 |
| Schools . . . . . | 600,000   | 240,000   | 840,000   |
| Government . . .  | 2,600,000 | 1,610,000 | 4,210,000 |
| Total . . . . .   | 4,800,000 | 2,400,000 | 7,200,000 |

Revenue and expenditure for the two kingdoms collectively may be stated approximately since 1831 as follows :—

|          | Millions £ |             | Annual Average, £ |             |
|----------|------------|-------------|-------------------|-------------|
|          | Revenue    | Expenditure | Revenue           | Expenditure |
| 1831-50  | 42         | 42          | 2,100,000         | 2,100,000   |
| 1851-70  | 66         | 74          | 3,300,000         | 3,700,000   |
| 1871-80  | 69         | 74          | 6,900,000         | 7,400,000   |
| 1881-88  | 56         | 61          | 7,000,000         | 7,600,000   |
| 58 years | 233        | 251         | 3,800,000         | 4,200,000   |

*Debt.*—The amount at various dates is shown thus :—

| Year           | Sweden, £  | Norway, £ | Total, £   |
|----------------|------------|-----------|------------|
| 1784 . . . . . | 8,800,000  | ...       | 8,800,000  |
| 1840 . . . . . | 1,200,000  | 300,000   | 1,500,000  |
| 1876 . . . . . | 9,800,000  | 3,900,000 | 13,700,000 |
| 1888 . . . . . | 13,700,000 | 5,900,000 | 19,600,000 |

State railways represent an outlay of £19,800,000, so that it may be said that the public debt of Sweden and Norway is merely a nominal one.

## DENMARK

Revenue and debt since 1771 are shown thus:—

| Year           | Revenue, £ | Debt, £    |
|----------------|------------|------------|
| 1771 . . . . . | 1,060,000  | 3,000,000  |
| 1786 . . . . . | 1,580,000  | 5,800,000  |
| 1810 . . . . . | 1,100,000  | 10,000,000 |
| 1835 . . . . . | 1,560,000  | 14,100,000 |
| 1850 . . . . . | 1,500,000  | 11,800,000 |
| 1866 . . . . . | 2,000,000  | 14,800,000 |
| 1882 . . . . . | 3,000,000  | 11,100,000 |
| 1889 . . . . . | 3,040,000  | 10,800,000 |

Before the French revolution Denmark comprised not only that kingdom and the duchies of Schleswig-Holstein, but also Norway; and the Budget of 1786 showed as follows:—

| Revenue, £                     | Expenditure, £                  |
|--------------------------------|---------------------------------|
| From Denmark . . . . . 900,000 | Army and navy . . . . . 600,000 |
| „ Duchies . . . . . 300,000    | Debt . . . . . 260,000          |
| „ Norway . . . . . 380,000     | Civil service . . . . . 670,000 |
| Total . . . . . 1,580,000      | Total . . . . . 1,530,000       |

The Budgets of 1872 and 1890 compare thus:—

|                        | Revenue, £ |           |                         | Expenditure, £ |           |
|------------------------|------------|-----------|-------------------------|----------------|-----------|
|                        | 1872       | 1890      |                         | 1872           | 1890      |
| Customs . . . . .      | 900,000    | 1,400,000 | Debt . . . . .          | 530,000        | 390,000   |
| Property-tax . . . . . | 400,000    | 500,000   | Army and navy . . . . . | 710,000        | 920,000   |
| Stamps . . . . .       | 100,000    | 150,000   | Schools . . . . .       | 40,000         | 110,000   |
| Railways . . . . .     | 60,000     | 210,000   | Public works . . . . .  | 100,000        | 170,000   |
| Sundries . . . . .     | 610,000    | 780,000   | Sundries . . . . .      | 650,000        | 1,610,000 |
| Total . . . . .        | 2,070,000  | 3,040,000 | Total . . . . .         | 2,030,000      | 3,200,000 |

In 1856 Denmark received £3,600,000 from the European Powers for abolition of the Sound Dues. In 1864 Schleswig-Holstein, on joining Prussia, took over £3,300,000 of the Danish debt.

## HOLLAND

Revenue and debt at various dates stood thus:—

| Year           | Revenue, £ | Debt, £     |
|----------------|------------|-------------|
| 1770 . . . . . | 2,200,000  | ...         |
| 1786 . . . . . | 3,300,000  | ...         |
| 1810 . . . . . | 4,800,000  | ...         |
| 1828 . . . . . | 6,400,000  | 152,000,000 |
| 1850 . . . . . | 5,800,000  | 98,000,000  |
| 1879 . . . . . | 9,400,000  | 80,500,000  |
| 1888 . . . . . | 10,000,000 | 89,200,000  |

The sources of revenue were as follows:—

|                        | 1879      | 1888       |
|------------------------|-----------|------------|
|                        | £         | £          |
| Customs . . . . .      | 380,000   | 400,000    |
| Excise . . . . .       | 3,220,000 | 2,000,000  |
| Property-tax . . . . . | 1,700,000 | 1,900,000  |
| Post-office . . . . .  | 420,000   | 450,000    |
| Sundries . . . . .     | 3,680,000 | 5,250,000  |
| Total . . . . .        | 9,400,000 | 10,000,000 |

The expenditure was as follows:—

|                      | 1879      | 1888       |
|----------------------|-----------|------------|
|                      | £         | £          |
| Debt . . . . .       | 2,400,000 | 3,100,000  |
| Army . . . . .       | 1,800,000 | 1,700,000  |
| Navy . . . . .       | 1,100,000 | 1,100,000  |
| Government . . . . . | 4,600,000 | 5,500,000  |
| Total . . . . .      | 9,900,000 | 11,400,000 |

The revenue of Denmark in the eighteenth century consisted partly of a land-tax, averaging 1s. per acre. The Budget of 1835 was made up as follows:—

| Revenue, £                         | Expenditure, £               |
|------------------------------------|------------------------------|
| Land and forests . . . . . 520,000 | Army . . . . . 300,000       |
| Customs . . . . . 390,000          | Debt . . . . . 530,000       |
| Sundries . . . . . 650,000         | Government . . . . . 750,000 |

Total . . . . . 1,560,000      Total . . . . . 1,580,000

Denmark contributed £1,060,000, the duchies £500,000 to the revenue.

The revenue and expenditure from 1831 were approximately as follows:—

|                    | Millions £ |             | Annual Average, £ |             |
|--------------------|------------|-------------|-------------------|-------------|
|                    | Revenue    | Expenditure | Revenue           | Expenditure |
| 1831-50 . . . . .  | 28         | 28          | 1,400,000         | 1,400,000   |
| 1851-70 . . . . .  | 36         | 40          | 1,800,000         | 2,000,000   |
| 1871-80 . . . . .  | 27         | 23          | 2,700,000         | 2,300,000   |
| 1881-87 . . . . .  | 21         | 21          | 3,000,000         | 3,000,000   |
| 57 years . . . . . | 112        | 112         | 1,900,000         | 1,900,000   |

Holland had no public debt till its conquest by the French in 1793, but when Louis Bonaparte was made king in 1806 the debt was 83 millions sterling, and it rapidly rose to 152 millions. At present there is a set-off to the amount of 21 millions for State railways, so that the debt may be properly stated at 68 millions sterling. When Belgium separated from Holland in 1830 it caused a decline of revenue, as shown above. The revenue and expenditure since 1830 were approximately as follows:—

| Period            | Millions £ |             | Annual Average, £ |             |
|-------------------|------------|-------------|-------------------|-------------|
|                   | Revenue    | Expenditure | Revenue           | Expenditure |
| 1831-50 . . . . . | 94         | 94          | 4,700,000         | 4,700,000   |
| 1851-80 . . . . . | 240        | 220         | 8,000,000         | 7,300,000   |
| 1881-88 . . . . . | 76         | 85          | 9,500,000         | 10,600,000  |
| Total . . . . .   | 410        | 399         | ...               | ...         |

## BELGIUM

When Belgium formed part of the kingdom of the Netherlands, her contribution to the national exchequer averaged, says Kolb, £3,500,000 per annum, or half the total revenue. On attaining her independence she took over £8,800,000 of the Dutch debt, involving an annual burden of £440,000. The revenue and debt at various dates show thus:—

| Year           | Revenue, £ | Debt, £    |
|----------------|------------|------------|
| 1832 . . . . . | 3,500,000  | 8,800,000  |
| 1850 . . . . . | 4,700,000  | 25,100,000 |
| 1870 . . . . . | 7,600,000  | 27,300,000 |
| 1878 . . . . . | 10,200,000 | 42,000,000 |
| 1890 . . . . . | 12,900,000 | 77,400,000 |

The revenue and expenditure have been approximately as follows :—

| Period  | Millions £ |             | Annual Average, £ |             |
|---------|------------|-------------|-------------------|-------------|
|         | Revenue    | Expenditure | Revenue           | Expenditure |
| 1831-50 | 82         | 98          | 4,100,000         | 4,900,000   |
| 1851-70 | 124        | 126         | 6,200,000         | 6,300,000   |
| 1871-87 | 186        | 236         | 11,000,000        | 14,000,000  |
| Total   | 392        | 460         | ...               | ...         |

The revenue was made up as follows :—

|                | 1835      | 1850      | 1870      | 1890       |
|----------------|-----------|-----------|-----------|------------|
|                | £         | £         | £         | £          |
| Customs . . .  | 300,000   | 500,000   | 900,000   | 1,100,000  |
| Income-tax . . | 1,000,000 | 1,100,000 | 1,200,000 | 1,800,000  |
| Railways . . . | ...       | 600,000   | 1,700,000 | 4,200,000  |
| Sundries . . . | 2,300,000 | 2,500,000 | 3,800,000 | 5,800,000  |
| Total          | 3,600,000 | 4,700,000 | 7,600,000 | 12,900,000 |

The items of expenditure were :—

|            | 1835      | 1850      | 1870      | 1890       |
|------------|-----------|-----------|-----------|------------|
|            | £         | £         | £         | £          |
| Army . . . | 1,600,000 | 1,000,000 | 2,400,000 | 1,800,000  |
| Debt . . . | 400,000   | 1,400,000 | 1,700,000 | 4,000,000  |
| Government | 1,400,000 | 2,200,000 | 3,600,000 | 7,000,000  |
| Total      | 3,400,000 | 4,600,000 | 7,700,000 | 12,800,000 |

There are 2000 miles of State railways, which cost 29 millions sterling, representing nearly 40 per cent. of the public debt.

#### SWITZERLAND

The *Almanac de Gotha* for 1810 puts the revenue at only £100,000 for that year. The *Repertoire Economique* puts it for 1822 at £500,000, whereas a statement published in 1850 makes it for the last-mentioned year only £500,000.

Official figures give us the following for later years :—

| Year       | Revenue, £ | Debt, £   |
|------------|------------|-----------|
| 1868 . . . | 1,700,000  | 200,000   |
| 1877 . . . | 1,700,000  | 1,300,000 |
| 1889 . . . | 2,400,000  | 1,200,000 |

The above debt is that of the Confederation, besides which the various Cantons have their own, which Kauffmann says amounted in 1876 to 16 millions sterling. The sources of Federal revenue were :—

|                | 1877      | 1888      |
|----------------|-----------|-----------|
|                | £         | £         |
| Customs . . .  | 650,000   | 1,200,000 |
| Sundries . . . | 1,050,000 | 1,200,000 |
| Total . . .    | 1,700,000 | 2,400,000 |

The expenditure was as follows :—

|                | 1877      | 1888      |
|----------------|-----------|-----------|
|                | £         | £         |
| Army . . .     | 600,000   | 800,000   |
| Government . . | 1,100,000 | 1,600,000 |
| Total . . .    | 1,700,000 | 2,400,000 |

These tables do not include the Cantonal revenues or expenditure.

#### GREECE

The kingdom dates from 1832, but the finances for some years were obscure. The following shows approximately revenue and debt :—

| Year       | Revenue, £ | Debt, £    |
|------------|------------|------------|
| 1840 . . . | 800,000    | 10,000,000 |
| 1879 . . . | 1,600,000  | 19,400,000 |
| 1889 . . . | 3,400,000  | 22,700,000 |

Revenue and expenditure were approximately as follows :—

| Period   | Millions £ |             | Annual Average, £ |             |
|----------|------------|-------------|-------------------|-------------|
|          | Revenue    | Expenditure | Revenue           | Expenditure |
| 1833-50  | 16         | 25          | 900,000           | 1,400,000   |
| 1851-70  | 24         | 30          | 1,200,000         | 1,500,000   |
| 1871-80  | 14         | 18          | 1,400,000         | 1,800,000   |
| 1881-87  | 18         | 22          | 2,600,000         | 3,100,000   |
| 55 years | 72         | 95          | 1,300,000         | 1,700,000   |

The finances for 1887 showed as follows :—

|                  | Revenue, £ |             | Expenditure, £ |
|------------------|------------|-------------|----------------|
| Direct taxes . . | 900,000    | Debt . . .  | 1,500,000      |
| Indirect taxes . | 1,900,000  | Army . . .  | 600,000        |
| Sundries . . .   | 1,000,000  | Government  | 1,700,000      |
| Total . . .      | 3,800,000  | Total . . . | 3,800,000      |

The debt is mostly internal, and includes £3,200,000 of bank-notes.

#### ROUMANIA AND SERVIA

The finances of these two kingdoms in 1889 showed thus :—

|                     | Roumania, £ | Servia, £ |
|---------------------|-------------|-----------|
| <b>Revenue—</b>     |             |           |
| Customs . . .       | 900,000     | 200,000   |
| Excise . . .        | 1,700,000   | 800,000   |
| Taxes . . .         | 3,600,000   | 800,000   |
| Total . . .         | 6,200,000   | 1,800,000 |
| <b>Expenditure—</b> |             |           |
| Debt . . .          | 2,600,000   | 460,000   |
| Army . . .          | 1,400,000   | 640,000   |
| Government . .      | 2,500,000   | 700,000   |
| Total . . .         | 6,500,000   | 1,800,000 |

The Roumanian debt is 36 millions sterling, that of Servia 13 millions, one-half of the amount in each case having its origin in State railways.

#### BULGARIA

Revenue, £2,900,000. A loan for £1,200,000 in 6 per cents. was effected at Vienna in January 1890. The estimates for 1890 are—Army, £1,200,000; debt, £250,000; public works, £400,000; government, £1,150,000, making a total of three millions sterling. Deficit, £100,000.

#### TURKEY

Revenue and debt are shown approximately thus :—

| Year       | Revenue, £ | Debt, £     |
|------------|------------|-------------|
| 1810 . . . | 3,000,000  | ...         |
| 1830 . . . | 4,000,000  | 8,000,000   |
| 1854 . . . | 9,000,000  | 12,000,000  |
| 1870 . . . | 12,000,000 | 92,000,000  |
| 1878 . . . | 15,000,000 | 245,000,000 |
| 1887 . . . | 16,200,000 | 180,000,000 |

The debt has been reduced by compounding with the bond-holders. It now comprises 105 millions foreign consols, over 40 millions of internal debt, and 32 millions war indemnity due to Russia. Revenue and expenditure since 1851 were approximately as follows :—

| Period   | Millions £ |             | Annual Average, £ |             |
|----------|------------|-------------|-------------------|-------------|
|          | Revenue    | Expenditure | Revenue           | Expenditure |
| 1851-70  | 210        | 300         | 10,500,000        | 15,000,000  |
| 1871-80  | 140        | 240         | 14,000,000        | 24,000,000  |
| 1881-87  | 110        | 110         | 16,000,000        | 16,000,000  |
| 37 years | 460        | 650         | 12,400,000        | 17,600,000  |

The Budget for 1889 showed—Revenue, £16,700,000; expenditure, £19,300,000. Since the composition of 1882 the bond-holders receive 1 per cent. annual interest. The taxes set apart for this purpose gave as follows in 1888 :—

|         |           |          |           |
|---------|-----------|----------|-----------|
| Tobacco | £ 680,000 | Excise   | £ 200,000 |
| Salt    | £ 620,000 | Sundries | £ 480,000 |

These taxes also provide a sinking-fund.

#### EGYPT

The finances may be approximately set down thus :—

| Year | Revenue, £ | Debt, £     |
|------|------------|-------------|
| 1833 | 2,520,000  | ...         |
| 1863 | 6,000,000  | 3,300,000   |
| 1870 | 7,000,000  | 37,000,000  |
| 1878 | 7,400,000  | 85,000,000  |
| 1889 | 9,700,000  | 103,400,000 |

Revenue and expenditure were approximately as follows :—

| Period   | Millions £ |             | Annual Average, £ |             |
|----------|------------|-------------|-------------------|-------------|
|          | Revenue    | Expenditure | Revenue           | Expenditure |
| 1841-60  | 90         | 90          | 4,500,000         | 4,500,000   |
| 1861-70  | 65         | 100         | 6,500,000         | 10,000,000  |
| 1871-80  | 75         | 135         | 7,500,000         | 13,500,000  |
| 1881-88  | 68         | 68          | 8,500,000         | 8,500,000   |
| 48 years | 298        | 393         | 6,200,000         | 8,200,000   |

Revenue and expenditure for 1889 showed as follows :—

| Revenue, £ |           | Expenditure, £ |           |
|------------|-----------|----------------|-----------|
| Land-tax   | 4,890,000 | Debt charge    | 4,090,000 |
| Customs    | 1,030,000 | Police         | 740,000   |
| Railways   | 1,300,000 | Khedive        | 270,000   |
| Sundries   | 2,375,000 | Government     | 4,300,000 |
| Total      | 9,595,000 | Total          | 9,400,000 |

The sources of American revenue have been as follows :—

| Period    | Millions £ Sterling |                  |          |       | Annual Average, £ |            |           |
|-----------|---------------------|------------------|----------|-------|-------------------|------------|-----------|
|           | Customs             | Internal Revenue | Sundries | Total | Customs           | Internal   | Sundries  |
| 1790-1809 | 35                  | 1                | 4        | 40    | 1,750,000         | 50,000     | 200,000   |
| 1810-29   | 73                  | 3                | 9        | 85    | 3,650,000         | 150,000    | 450,000   |
| 1830-59   | 201                 | ...              | 37       | 238   | 6,700,000         | ...        | 1,230,000 |
| 1860-69   | 165                 | 183              | 22       | 370   | 16,500,000        | 18,300,000 | 2,200,000 |
| 1870-79   | 316                 | 236              | 44       | 596   | 31,600,000        | 23,600,000 | 4,400,000 |
| 1880-89   | 426                 | 266              | 65       | 757   | 42,600,000        | 26,600,000 | 6,500,000 |
| 100 years | 1,216               | 689              | 181      | 2,086 | 12,160,000        | 6,890,000  | 1,810,000 |

*Debt.*—Before 1860 there was no debt, although large sums had been expended in irrigation works. The debt reached 120 millions sterling in 1880, and was thus accounted for :—

|                       | £          | Loss on             | £          |
|-----------------------|------------|---------------------|------------|
| Railways              | 13,360,000 | Goschen loans       | 1,900,000  |
| Suez Canal            | 6,770,000  | Oppenheim do.       | 18,900,000 |
| Nile Canal            | 12,600,000 | Bischoffsheim do.   | 2,100,000  |
| Sugar-mills           | 6,100,000  | Rothschild do.      | 2,500,000  |
| Alexandria harbour    | 2,540,000  | Various do.         | 1,000,000  |
| Bridges, schools, &c. | 4,890,000  | Ballet-dancers, &c. | 47,340,000 |

Public works 46,260,000

Unproductive 73,740,000

The nine loans effected between 1862 and 1880 represented nominally £77,000,000, but produced only £50,589,000, the difference being lost in discounts and other unavoidable drawbacks.

#### UNITED STATES

Official returns for 100 years show as follows :—

| Year | Revenue, £ | Expenditure, £ | Debt, £     |
|------|------------|----------------|-------------|
| 1790 | 900,000    | 600,000        | 15,700,000  |
| 1800 | 2,200,000  | 2,200,000      | 17,200,000  |
| 1810 | 1,900,000  | 1,800,000      | 11,000,000  |
| 1820 | 3,500,000  | 3,800,000      | 19,000,000  |
| 1830 | 5,100,000  | 3,100,000      | 9,000,000   |
| 1840 | 4,100,000  | 5,000,000      | 1,100,000   |
| 1850 | 9,200,000  | 8,600,000      | 13,300,000  |
| 1860 | 11,600,000 | 13,100,000     | 13,500,000  |
| 1870 | 71,500,000 | 53,700,000     | 485,000,000 |
| 1880 | 69,200,000 | 55,000,000     | 399,000,000 |
| 1889 | 80,600,000 | 68,600,000     | 221,000,000 |

The total revenue and expenditure of 100 years were :—

| Period    | Millions £ Sterling |             | Annual Average, £ |             |
|-----------|---------------------|-------------|-------------------|-------------|
|           | Revenue             | Expenditure | Revenue           | Expenditure |
| 1790-1809 | 40                  | 31          | 2,000,000         | 1,550,000   |
| 1810-1829 | 85                  | 82          | 4,250,000         | 4,100,000   |
| 1830-1849 | 115                 | 112         | 5,750,000         | 5,600,000   |
| 1850-1859 | 123                 | 120         | 12,300,000        | 12,000,000  |
| 1860-1869 | 370                 | 713         | 37,000,000        | 71,300,000  |
| 1870-1879 | 596                 | 517         | 59,600,000        | 51,700,000  |
| 1880-1889 | 757                 | 545         | 75,700,000        | 54,500,000  |
| 100 years | 2,086               | 2,120       | 20,860,000        | 21,200,000  |

If we compare revenue with population we find :—

| Period  | Shillings per Inhab. |
|---------|----------------------|
| 1831-50 | 7                    |
| 1851-60 | 8                    |
| 1861-70 | 22                   |
| 1871-80 | 26                   |
| 1881-88 | 28                   |

The items of expenditure were as follows :—

| Period          | Millions £ Sterling |               |         |          |          | Total |
|-----------------|---------------------|---------------|---------|----------|----------|-------|
|                 | Government          | Army and Navy | Indians | Pensions | Interest |       |
| 1790-1809 . . . | 6                   | 12            | ...     | ...      | 13       | 31    |
| 1810-29 . . .   | 12                  | 47            | 2       | 4        | 17       | 82    |
| 1830-49 . . .   | 25                  | 68            | 8       | 8        | 3        | 112   |
| 1850-59 . . .   | 48                  | 55            | 7       | 3        | 7        | 120   |
| 1860-69 . . .   | 57                  | 527           | 5       | 17       | 107      | 713   |
| 1870-79 . . .   | 125                 | 115           | 11      | 57       | 209      | 517   |
| 1880-89 . . .   | 151                 | 117           | 14      | 136      | 127      | 545   |
| 100 years . . . | 424                 | 941           | 47      | 225      | 483      | 2,120 |

*Debt.*—There was hardly any (except local debts) previous to the war of 1861. It reached its maximum in August 1865, namely, 572 millions sterling (2756 million dollars), being £16 per inhabitant, and fell in 1889 to 221 millions sterling, or less than £4 per inhabitant.

Debt and wealth compared thus :—

| Year       | Millions £ Sterling |      | Ratio of Debt  |
|------------|---------------------|------|----------------|
|            | Wealth              | Debt |                |
| 1865 . . . | 4,180               | 572  | 13.6 per cent. |
| 1889 . . . | 12,824              | 221  | 1.7 " "        |

#### AUSTRALIA

The aggregate revenue and debt of the seven colonies which form Australia are shown thus :—

| Year | Revenue, £ | Debt, £     | Ratio per Inhabitant |         |
|------|------------|-------------|----------------------|---------|
|      |            |             | Revenue, £           | Debt, £ |
| 1825 | 72,000     | ...         | 0.8                  | ...     |
| 1840 | 680,000    | ...         | 2.2                  | ...     |
| 1850 | 930,000    | ...         | 2.0                  | ...     |
| 1860 | 6,700,000  | 11,900,000  | 5.3                  | 9.5     |
| 1870 | 11,600,000 | 36,200,000  | 5.8                  | 18.1    |
| 1880 | 17,100,000 | 87,900,000  | 6.0                  | 31.0    |
| 1888 | 27,600,000 | 166,500,000 | 7.5                  | 45.0    |

The revenue of the several colonies in 1888 was made up thus :—

|                 | Customs   | Railways, &c. | Lands     | Sundries  | Total      |
|-----------------|-----------|---------------|-----------|-----------|------------|
| New South Wales | 2,140,000 | 3,660,000     | 2,270,000 | 820,000   | 8,890,000  |
| Victoria        | 2,350,000 | 3,230,000     | 660,000   | 1,370,000 | 7,610,000  |
| Queensland      | 1,350,000 | 1,000,000     | 640,000   | 470,000   | 3,460,000  |
| South Australia | 530,000   | 1,170,000     | 320,000   | 470,000   | 2,490,000  |
| West Australia  | 180,000   | 60,000        | 80,000    | 40,000    | 360,000    |
| Tasmania        | 300,000   | 110,000       | 80,000    | 150,000   | 640,000    |
| New Zealand     | 1,390,000 | 1,330,000     | 300,000   | 1,090,000 | 4,110,000  |
| Total           | 8,240,000 | 10,560,000    | 4,350,000 | 4,410,000 | 27,560,000 |

*Debt.*—In June 1889 it amounted to 171 millions sterling, having risen almost 160 millions since 1860. The money has been expended thus :—

|             |             |
|-------------|-------------|
| Railways    | 99,300,000  |
| Waterworks  | 13,000,000  |
| Immigration | 5,500,000   |
| Sundries    | 48,700,000  |
| Total       | 166,500,000 |

The revenue and expenditure since 1850 may be summed up approximately as follows :—

| Millions £     |         |             |
|----------------|---------|-------------|
| Period         | Revenue | Expenditure |
| 1851-60 . . .  | 38      | 50          |
| 1861-70 . . .  | 92      | 116         |
| 1871-80 . . .  | 147     | 199         |
| 1881-88 . . .  | 186     | 265         |
| 38 years . . . | 463     | 630         |

The income and expenditure of the several colonies in the last eight years, 1881-88, were :—

|                 | Millions £ |             |                     |
|-----------------|------------|-------------|---------------------|
|                 | Revenue    | Expenditure | Surplus Expenditure |
| New South Wales | 60         | 89          | 29                  |
| Victoria        | 50         | 64          | 14                  |
| Queensland      | 22         | 36          | 14                  |
| South Australia | 17         | 26          | 9                   |
| West Australia  | 2          | 3           | 1                   |
| Tasmania        | 4          | 6           | 2                   |
| New Zealand     | 31         | 41          | 10                  |
| Total           | 186        | 265         | 79                  |

The aggregate of customs revenue in the last eight years compares with trade and population as follows :—

| Customs      | Trade, Millions £ | Population | Ratio of Customs   |                       |
|--------------|-------------------|------------|--------------------|-----------------------|
|              |                   |            | Per cent. of Trade | Per Inhabitant Yearly |
| N. S. Wales  | 13,760,000        | 309        | 900,000            | 4.5                   |
| Victoria     | 16,050,000        | 269        | 950,000            | 5.8                   |
| Queensland   | 7,270,000         | 87         | 290,000            | 8.4                   |
| S. Australia | 4,330,000         | 88         | 300,000            | 5.0                   |
| W. Australia | 1,110,000         | 9          | 35,000             | 12.1                  |
| Tasmania     | 2,220,000         | 24         | 130,000            | 9.3                   |
| New Zealand  | 11,160,000        | 113        | 590,000            | 9.8                   |
| Total        | 55,900,000        | 899        | 3,195,000          | 6.2                   |

The revenue of New South Wales in 1889 reached £9,100,000.

The railways in 1889 showed gross receipts £8,160,000, working expenses £5,110,000, leaving a net profit of £3,050,000, equal to 3 per cent. on cost of construction. The annual interest on debt is £7,000,000; hence the railways pay nearly half the annual charge on the country for debt. If we deduct the value of railways and waterworks, the public debt will be only 54 millions sterling, or 4 per cent. of the wealth of Australia, against 7½ per cent. in the United Kingdom.

The increase of public debt has been accompanied by an enormous increase of wealth, as we see by comparing the two items :—

| Year           | Millions £ Sterling |      | Ratio to Wealth |
|----------------|---------------------|------|-----------------|
|                | Wealth              | Debt |                 |
| 1860 . . . . . | 180                 | 12   | 6.6 per cent.   |
| 1870 . . . . . | 320                 | 36   | 11.2 "          |
| 1888 . . . . . | 1,373               | 166  | 12.1 "          |

The wealth and debt of the several colonies in 1888 were as follows :—

|                             | Millions £ |      | Debt Ratio |
|-----------------------------|------------|------|------------|
|                             | Wealth     | Debt |            |
| New South Wales . . . . .   | 483        | 44   | 9.1        |
| Victoria . . . . .          | 370        | 35   | 9.5        |
| Queensland . . . . .        | 132        | 26   | 19.5       |
| South Australia . . . . .   | 131        | 19   | 14.5       |
| Western Australia . . . . . | 13         | 1    | 7.7        |
| Tasmania . . . . .          | 36         | 4    | 11.2       |
| New Zealand . . . . .       | 208        | 37   | 17.8       |
| Total . . . . .             | 1,373      | 166  | 12.1       |

The increase of debt since 1870 has averaged in the aggregate 7 millions sterling per annum, that of wealth 58 millions. Debt is equal to six years of revenue, the same as in Canada.

The debt and annual charge in the several colonies in December 1889 stood as follows :—

|                             | Debt, £     | Interest, £ | Debt per Inhab., £ |
|-----------------------------|-------------|-------------|--------------------|
| New South Wales . . . . .   | 46,800,000  | 1,810,000   | 43                 |
| Victoria . . . . .          | 37,400,000  | 1,520,000   | 34                 |
| Queensland . . . . .        | 25,800,000  | 1,035,000   | 65                 |
| South Australia . . . . .   | 20,500,000  | 820,000     | 63                 |
| New Zealand . . . . .       | 37,000,000  | 1,530,000   | 60                 |
| Tasmania . . . . .          | 5,300,000   | 210,000     | 36                 |
| Western Australia . . . . . | 1,300,000   | 50,000      | 30                 |
| Total . . . . .             | 174,100,000 | 6,975,000   | 48                 |

## CANADA

Official returns show revenue and debt as follows :—

| Year           | Amount, £ |            | Per Inhabitant |         |
|----------------|-----------|------------|----------------|---------|
|                | Revenue   | Debt       | Revenue, £     | Debt, £ |
| 1840 . . . . . | 500,000   | 1,200,000  | 0.3            | 0.7     |
| 1860 . . . . . | 2,400,000 | 14,100,000 | 0.7            | 4.0     |
| 1870 . . . . . | 3,600,000 | 16,700,000 | 1.0            | 4.6     |
| 1880 . . . . . | 5,100,000 | 32,100,000 | 1.1            | 7.0     |
| 1889 . . . . . | 7,760,000 | 49,200,000 | 1.5            | 9.9     |

The revenue and expenditure since 1840 may be approximately summed up as follows :—

| Period             | Millions £ Sterling |             |                     |
|--------------------|---------------------|-------------|---------------------|
|                    | Revenue             | Expenditure | Surplus Expenditure |
| 1841-60 . . . . .  | 30                  | 43          | 13                  |
| 1861-70 . . . . .  | 33                  | 36          | 3                   |
| 1871-80 . . . . .  | 49                  | 64          | 15                  |
| 1881-89 . . . . .  | 66                  | 83          | 17                  |
| 49 years . . . . . | 178                 | 226         | 48                  |

Customs revenue averages 60 per cent. of total revenue, and is about 12 per cent. as compared with the value of trade. Debt has been largely caused by expenditure for railways. If we compare it with an approximate of public wealth, the account stands thus :—

| Year           | Millions £ Sterling |      | Debt Ratio | Per Inhabitant |         |
|----------------|---------------------|------|------------|----------------|---------|
|                | Wealth              | Debt |            | Wealth, £      | Debt, £ |
| 1860 . . . . . | 392                 | 14   | 3.6        | 120            | 4.2     |
| 1888 . . . . . | 980                 | 49   | 5.0        | 196            | 9.9     |

The incidence of debt is less than £10 per inhabitant, against £48 in Australia; but, compared with revenue, it is equal, being six times the revenue in both cases.

In 1889 the debt consisted of £39,000,000 due in London and £10,000,000 internal debt. When the Dominion was constituted in 1867 the total debt was £15,600,000; the subsequent increase of £33,600,000 was caused thus :—

|                              | £          |
|------------------------------|------------|
| Pacific Railway . . . . .    | 13,000,000 |
| Other railways . . . . .     | 8,300,000  |
| Canals . . . . .             | 6,800,000  |
| Other public works . . . . . | 5,500,000  |

Total . . . . . 33,600,000

The total cost of the Pacific Railway was £21,600,000. The annual interest on the public debt of Canada is £2,040,000.

## INDIA

Revenue and debt according to official returns were :—

| Year           | Revenue, £ | Debt, £     |
|----------------|------------|-------------|
| 1810 . . . . . | 15,600,000 | 31,900,000  |
| 1820 . . . . . | 19,500,000 | 39,800,000  |
| 1830 . . . . . | 19,600,000 | 36,400,000  |
| 1840 . . . . . | 19,400,000 | 32,500,000  |
| 1850 . . . . . | 27,600,000 | 53,900,000  |
| 1860 . . . . . | 39,700,000 | 98,100,000  |
| 1870 . . . . . | 50,900,000 | 108,200,000 |
| 1880 . . . . . | 69,700,000 | 160,400,000 |
| 1890 . . . . . | 82,900,000 | 191,900,000 |

Revenue and expenditure may be summed up approximately thus :—

| Period             | Millions £ Sterling |             |
|--------------------|---------------------|-------------|
|                    | Revenue             | Expenditure |
| 1810-40 . . . . .  | 565                 | 565         |
| 1841-60 . . . . .  | 572                 | 638         |
| 1861-70 . . . . .  | 473                 | 483         |
| 1871-80 . . . . .  | 564                 | 616         |
| 1881-87 . . . . .  | 514                 | 540         |
| 77 years . . . . . | 2,688               | 2,842       |

In the foregoing tables the rupee is taken at the official value of 2s. Revenue and expenditure in 1890 stood thus :—

|                       | Revenue, £ |                       | Expenditure, £ |
|-----------------------|------------|-----------------------|----------------|
| Land-tax . . . . .    | 23,400,000 | Army . . . . .        | 22,100,000     |
| Railways . . . . .    | 16,700,000 | Railways . . . . .    | 18,700,000     |
| Opium . . . . .       | 8,300,000  | Post-office . . . . . | 13,300,000     |
| Salt-tax . . . . .    | 8,000,000  | Roads . . . . .       | 5,500,000      |
| Post-office . . . . . | 2,300,000  | Irrigation . . . . .  | 2,600,000      |
| Irrigation . . . . .  | 1,900,000  | Debt . . . . .        | 4,400,000      |
| Sundries . . . . .    | 22,300,000 | Sundries . . . . .    | 16,200,000     |
| Total . . . . .       | 82,900,000 | Total . . . . .       | 82,800,000     |

## SOUTH AFRICA

Revenue and debt were as follows:—

| Year           | Revenue, £ | Debt, £    |
|----------------|------------|------------|
| 1840 . . . . . | 200,000    | ...        |
| 1860 . . . . . | 800,000    | 600,000    |
| 1870 . . . . . | 950,000    | 1,400,000  |
| 1880 . . . . . | 3,100,000  | 13,000,000 |
| 1887 . . . . . | 4,000,000  | 26,500,000 |

Revenue and expenditure are approximately summed up thus:—

| Period             | Millions £ |             |
|--------------------|------------|-------------|
|                    | Revenue    | Expenditure |
| 1841-60 . . . . .  | 10         | 11          |
| 1861-70 . . . . .  | 9          | 10          |
| 1871-80 . . . . .  | 19         | 31          |
| 1881-87 . . . . .  | 27         | 40          |
| 47 years . . . . . | 65         | 92          |

## WEST INDIES

Revenue and debt were as follows:—

| Year           | Revenue, £ | Debt, £   |
|----------------|------------|-----------|
| 1850 . . . . . | 700,000    | 900,000   |
| 1860 . . . . . | 1,000,000  | 1,000,000 |
| 1870 . . . . . | 1,400,000  | 1,600,000 |
| 1880 . . . . . | 1,900,000  | 1,800,000 |
| 1887 . . . . . | 2,100,000  | 3,100,000 |

## ARGENTINA

Official returns are to the following effect:—

| Year           | Revenue, £ | Debt, £    |
|----------------|------------|------------|
| 1864 . . . . . | 1,400,000  | 5,100,000  |
| 1870 . . . . . | 3,000,000  | 10,100,000 |
| 1880 . . . . . | 3,900,000  | 23,000,000 |
| 1888 . . . . . | 5,440,000  | 46,500,000 |

Revenue and expenditure seem therefore to have been as follows:—

| Period             | Millions £ Sterling |             |                     |
|--------------------|---------------------|-------------|---------------------|
|                    | Revenue             | Expenditure | Surplus Expenditure |
| 1864-70 . . . . .  | 15                  | 20          | 5                   |
| 1871-80 . . . . .  | 35                  | 48          | 13                  |
| 1881-88 . . . . .  | 38                  | 62          | 24                  |
| 25 years . . . . . | 88                  | 130         | 42                  |

The Budgets for 1884 and 1889 compared as follows:—

|                         | Revenue     |           |
|-------------------------|-------------|-----------|
|                         | 1884        | 1889      |
| Import dues . . . . .   | 4,230,000   | 3,880,000 |
| Railways . . . . .      | 410,000     | 80,000    |
| Stamps . . . . .        | 420,000     | 350,000   |
| Sundries . . . . .      | 1,440,000   | 1,130,000 |
| Total . . . . .         | 6,500,000   | 5,440,000 |
|                         | Expenditure |           |
|                         | 1884        | 1889      |
| Eschequer . . . . .     | 2,720,000   | 2,470,000 |
| Interior . . . . .      | 1,200,000   | 1,480,000 |
| Army and navy . . . . . | 1,680,000   | 1,090,000 |
| Schools, &c. . . . .    | 900,000     | 960,000   |
| Total . . . . .         | 6,500,000   | 6,000,000 |

Interest on debt takes £2,400,000, or 40 per cent. of the total revenue.

The statement of debt omits inconvertible paper-money issued by Government banks, and Cédulas or mortgage debentures guaranteed by Government (see *Banks*). On the other hand, the Government claims to have assets worth 71 millions sterling, viz:—

|                               |             |
|-------------------------------|-------------|
| Treasury department . . . . . | 27,200,000  |
| Interior . . . . .            | 37,560,000  |
| Schools . . . . .             | 2,920,000   |
| War and Marine . . . . .      | 2,850,000   |
| Sundries . . . . .            | 220,000     |
| Total . . . . .               | 70,810,000* |

Real estate consisting of lands and public buildings stands for 41 millions, bank and railway shares and Treasury balances for 26 millions, and sundries four millions.

Each of the fourteen Argentine provinces, as well as the capital, Buenos Ayres, has its own revenue and debt, distinct from those of the Federal Government. Latest returns were as follows:—

| Province               | Revenue   | Debt       |
|------------------------|-----------|------------|
| Capital . . . . .      | 1,500,000 | 2,400,000  |
| Buenos Ayres . . . . . | 2,400,000 | 17,400,000 |
| Santa Fé . . . . .     | 600,000   | 9,400,000  |
| Cordoba . . . . .      | 300,000   | 4,000,000  |
| Entre Rios . . . . .   | 300,000   | 4,000,000  |
| Corrientes . . . . .   | 160,000   | 1,100,000  |
| Santiago . . . . .     | 80,000    | 1,100,000  |
| Mendoza . . . . .      | 120,000   | 1,000,000  |
| Salta . . . . .        | 80,000    | 1,000,000  |
| Rioja . . . . .        | 40,000    | 1,000,000  |
| Tucuman . . . . .      | 100,000   | 600,000    |
| Catamarca . . . . .    | 40,000    | 600,000    |
| San Luis . . . . .     | 60,000    | 600,000    |
| San Juan . . . . .     | 50,000    | 400,000    |
| Jujuy . . . . .        | 20,000    | ...        |
| Total . . . . .        | 5,850,000 | 44,600,000 |

The consolidated debt, federal and provincial, may be summed up thus:—

|                      | Foreign    | Home Debt                | Total      |
|----------------------|------------|--------------------------|------------|
| Federal . . . . .    | 25,800,000 | 207,300,000 = 20,700,000 | 46,500,000 |
| Provincial . . . . . | 38,700,000 | 44,100,000 = 4,400,000   | 43,100,000 |
| Total . . . . .      | 64,500,000 | 251,400,000 = 25,100,000 | 89,600,000 |

If we add 20 millions sterling for 300 million dollars of forced issue, it makes the total debt 110 millions sterling, without counting 400 millions of Cédulas worth about 30 millions sterling (see *Banks*). Wealth and debt at various dates were approximately as follows:—

| Year           | Millions £ Sterling |      | Debt Ratio |
|----------------|---------------------|------|------------|
|                | Wealth              | Debt |            |
| 1857 . . . . . | 74                  | 2    | 2.7        |
| 1864 . . . . . | 139                 | 5    | 3.6        |
| 1884 . . . . . | 375                 | 43   | 11.4       |
| 1890 . . . . . | 509                 | 110  | 21.6       |

\* This valuation does not merit confidence, since it magnifies certain items exceedingly. No impartial person would put the total at more than 10 or 12 millions sterling.

## URUGUAY

Official records since 1831 show thus:—

| Period         | Millions £ Sterling |             |      |
|----------------|---------------------|-------------|------|
|                | Revenue             | Expenditure | Debt |
| 1831-50 . . .  | 4                   | 5           | 1    |
| 1851-60 . . .  | 4                   | 7           | 4    |
| 1861-70 . . .  | 6                   | 10          | 8    |
| 1871-80 . . .  | 13                  | 16          | 11   |
| 1881-88 . . .  | 20                  | 24          | 15   |
| 58 years . . . | 47                  | 62          | 15   |

The value of real estate and cattle in 1886 amounted to 282 million gold dollars, or 59 millions sterling. The total wealth of the Republic is approximately 100 millions. The debt is therefore 15 per cent. against 22 per cent. in Argentina.

## BRAZIL

Official returns give as follows:—

| Year           | Revenue, £ | Debt, £     |
|----------------|------------|-------------|
| 1864 . . . . . | 6,100,000  | 18,700,000  |
| 1874 . . . . . | 11,200,000 | 72,100,000  |
| 1888 . . . . . | 14,100,000 | 107,200,000 |

The finances since 1850 may be summed up approximately thus:—

| Period            | Millions £ |             |
|-------------------|------------|-------------|
|                   | Revenue    | Expenditure |
| 1851-60 . . . . . | 45         | 50          |
| 1861-70 . . . . . | 65         | 130         |
| 1871-80 . . . . . | 115        | 135         |
| 1881-88 . . . . . | 105        | 122         |
| Total . . . . .   | 330        | 437         |

The origin of the debt is shown thus:—

|                          |              |
|--------------------------|--------------|
| Paraguayan war . . . . . | £ 48,000,000 |
| Railways . . . . .       | 29,000,000   |
| Sundries . . . . .       | 30,200,000   |
| Total . . . . .          | 107,200,000  |

## MEXICO

Official returns give the following:—

| Debt, 1889 |            | Revenue |           | 1889     |           |
|------------|------------|---------|-----------|----------|-----------|
| Foreign    | £          | 1870    | £         | Customs  | £         |
| Home       | 18,500,000 | 1880    | 3,400,000 | Sundries | 2,000,000 |
|            |            | 1889    | 5,000,000 |          |           |
| Total      | 31,200,000 |         |           | Total    | 5,000,000 |

## CHINA

In 1889 the revenue was stated thus:—

|                    |             |
|--------------------|-------------|
| Land-tax . . . . . | £ 4,800,000 |
| Customs . . . . .  | 5,500,000   |
| Salt-tax . . . . . | 2,300,000   |
| Sundries . . . . . | 6,400,000   |
| Total . . . . .    | 19,000,000  |

## JAPAN

The revenue in 1889 was £13,400,000, and the debt stood thus:—

|                           |              |
|---------------------------|--------------|
| Funded . . . . .          | £ 41,100,000 |
| Forced currency . . . . . | 9,000,000    |
| Total . . . . .           | 50,100,000   |

## FINES

The following were in force in the Middle Ages in France and England:—

| Offence                                | £ | s  | d |
|----------------------------------------|---|----|---|
| Drawing a knife to any one . . . . .   | 0 | 10 | 0 |
| Wounding a person . . . . .            | 2 | 0  | 0 |
| Calling a woman a prostitute . . . . . | 2 | 0  | 0 |

## FIRE

The *Journal des Economistes* (1883) published the following table of property annually destroyed by fire, except the countries in italics, the figures for which are doubtful:—

|                          |             |                         |            |
|--------------------------|-------------|-------------------------|------------|
| United Kingdom . . . . . | £ 9,100,000 | Spain . . . . .         | £ 500,000  |
| France . . . . .         | 3,200,000   | Holland . . . . .       | 400,000    |
| Germany . . . . .        | 6,100,000   | Belgium . . . . .       | 500,000    |
| Russia . . . . .         | 21,000,000  | Scandinavia . . . . .   | 1,000,000  |
| Austria . . . . .        | 3,500,000   | United States . . . . . | 22,500,000 |
| Italy . . . . .          | 1,000,000   | Canada . . . . .        | 4,100,000  |

The total reaches 73 millions sterling. In twelve years ending 1883 the average for Austria proper was £1,800,000 per annum, exclusive of Hungary.

Losses in the principal cities are shown thus:—

|                         | Number of Fires | Number per 100,000 Inhab. | Loss, £   | Per Inhabitant, Pence |
|-------------------------|-----------------|---------------------------|-----------|-----------------------|
| London . . . . .        | 2,338           | 56                        | 1,100,000 | 66                    |
| Paris . . . . .         | ...             | ...                       | 270,000   | 34                    |
| New York . . . . .      | 1,783           | 144                       | 780,000   | 150                   |
| Manchester . . . . .    | 328             | 59                        | 120,000   | 55                    |
| San Francisco . . . . . | ...             | ...                       | 112,000   | 122                   |
| Philadelphia . . . . .  | 655             | 76                        | 460,000   | 130                   |
| Chicago . . . . .       | 490             | 98                        | 360,000   | 180                   |
| Boston . . . . .        | 389             | 117                       | 130,000   | 95                    |
| Baltimore . . . . .     | 172             | 52                        | 70,000    | 55                    |
| Cincinnati . . . . .    | 213             | 85                        | 144,000   | 144                   |
| St. Louis . . . . .     | 197             | 49                        | 160,000   | 98                    |
| Vienna . . . . .        | 365             | 36                        | 100,000   | 24                    |

The record of London fires since 1840 has been as follows:—

| Years             | Annual Average  |                  |                       |
|-------------------|-----------------|------------------|-----------------------|
|                   | Number of Fires | Houses to a Fire | Inhabitants to a Fire |
| 1840-49 . . . . . | 768             | 362              | 2,731                 |
| 1850-59 . . . . . | 977             | 331              | 2,570                 |
| 1860-69 . . . . . | 1,430           | 288              | 2,390                 |
| 1870-80 . . . . . | 1,795           | 264              | 2,150                 |
| 1881-89 . . . . . | 2,160           | 260              | 1,760                 |

Fires on Saturday are 5 per cent. more numerous than on any other day in London; but in Paris Friday has 20 per cent. over the average.

## FRANCE

Official returns for the whole of France show thus:—

| Years             | Annual Average  |                  |                       |
|-------------------|-----------------|------------------|-----------------------|
|                   | Number of Fires | Houses to a Fire | Inhabitants to a Fire |
| 1845-50 . . . . . | 8,260           | 873              | 4,120                 |
| 1851-60 . . . . . | 10,556          | 715              | 3,435                 |
| 1861-70 . . . . . | 13,865          | 562              | 2,720                 |

## RUSSIA

The number of houses burnt yearly from 1860 to 1864 was only 10,600, representing a value of barely two millions sterling. Police estimates seem to have a cipher too much.

## UNITED STATES.

Down to 1880 the annual losses from fire averaged only 17 millions sterling. Possibly the figure given above includes Canada, a large portion of Canadian property being insured at New York. The *Chronicle* (N.Y.) gives the losses in United States as follows:—

| Period            | £ Sterling per Annum |
|-------------------|----------------------|
| 1875-80 . . . . . | 14,800,000           |
| 1881-85 . . . . . | 19,900,000           |

This was only 1 per cent. of the property insured, which exceeded 2100 millions sterling, or one-fifth of the total wealth of the United States.

*Loss of Life.*—The following table shows the deaths by fire per million inhabitants in various cities:—

|                   |    |                   |    |
|-------------------|----|-------------------|----|
| Munich . . . . .  | 4  | Naples . . . . .  | 41 |
| Glasgow . . . . . | 17 | Hanover . . . . . | 57 |
| Berlin . . . . .  | 20 | Cologne . . . . . | 71 |
| Paris . . . . .   | 24 | London . . . . .  | 83 |

The loss of life in England and Wales from fire averages 1490 persons yearly, of whom 42 per cent. are males and 58 per cent. females. The London firemen save 110 lives yearly. Three persons in England per 1000 die by fire.

*Remarkable Fires.*—The worst recorded in history have been:—

| Year           | Place                    | Loss            |
|----------------|--------------------------|-----------------|
| 1570 . . . . . | Moscow . . . . .         | 200,000 victims |
| 1666 . . . . . | London . . . . .         | 13,200 houses   |
| 1812 . . . . . | Moscow . . . . .         | 15,500 houses   |
| 1824 . . . . . | Cairo . . . . .          | 4000 victims    |
| 1831 . . . . . | Constantinople . . . . . | 18,000 houses   |
| 1835 . . . . . | New York . . . . .       | £6,000,000      |
| 1842 . . . . . | Hamburg . . . . .        | £7,200,000      |
| 1851 . . . . . | San Francisco . . . . .  | 2500 blocks     |
| 1863 . . . . . | Santiago . . . . .       | 1800 victims    |
| 1871 . . . . . | Chicago . . . . .        | £33,000,000     |
| 1872 . . . . . | Boston . . . . .         | £15,000,000     |

See also *Theatres*, in which some fires caused great loss of life.

*Fire Brigades.*—The first in London was established in 1791. The various brigades in 1882 stood thus:—

|                          | Fire-Engines | Fire-men | Cost of Brigade. | Firemen per 100,000 Inhabitants | Cost of Brigade, Pence per Inhab. |
|--------------------------|--------------|----------|------------------|---------------------------------|-----------------------------------|
| London . . . . .         | 38           | 536      | £80,000          | 13                              | 5                                 |
| Paris . . . . .          | 203          | 1,500    | 98,000           | 68                              | 11                                |
| St. Petersburg . . . . . | 37           | 1,150    | ...              | 127                             | ...                               |
| Hamburg . . . . .        | 53           | 790      | ...              | 305                             | ...                               |
| New York . . . . .       | 38           | 690      | 250,000          | 55                              | 48                                |
| Philadelphia . . . . .   | 27           | 404      | 103,000          | 49                              | 29                                |
| Chicago . . . . .        | 27           | 200      | 94,000           | 40                              | 48                                |
| Boston . . . . .         | 26           | 472      | 110,000          | 138                             | 79                                |
| Cincinnati . . . . .     | 18           | 155      | 62,000           | 62                              | 64                                |
| St. Louis . . . . .      | 17           | 100      | 40,000           | 26                              | 24                                |
| Baltimore . . . . .      | 18           | 140      | 40,000           | 43                              | 30                                |
| San Francisco . . . . .  | 14           | 200      | ...              | 82                              | ...                               |
| Berlin . . . . .         | 50           | 1,000    | ...              | 96                              | ...                               |
| Lyons . . . . .          | 48           | 475      | ...              | 98                              | ...                               |

The expenditure on fire-brigades compared with the number of fires shows the following average per fire:—

|                    | £   | Philadelphia . | £   | Baltimore . | £ |
|--------------------|-----|----------------|-----|-------------|---|
| London . . . . .   | 40  | 153            | 188 | 230         |   |
| Sydney . . . . .   | 88  | 188            | 201 | 280         |   |
| New York . . . . . | 138 | 201            | 295 |             |   |

The London fire-brigade uses 17 million gallons water yearly, that is, 4½ gallons per inhabitant, or 8500 gallons for each fire. The New York brigade consumes 32 million gallons, that is, 25 gallons per inhabitant, or 18,000 gallons per fire.

## FISH

*Anchorvy.*—The fishermen of Finisterre, France, take 700 tons yearly, value £10,000.

*Cod.*—The average take is as follows:—

|                         | Million Fish | Tons    | Value, £  |
|-------------------------|--------------|---------|-----------|
| Great Britain . . . . . | 8            | 13,000  | 200,000   |
| France . . . . .        | 21           | 34,000  | 340,000   |
| Norway . . . . .        | 65           | 110,000 | 1,050,000 |
| Canada . . . . .        | 28           | 45,000  | 520,000   |
| Total . . . . .         | 122          | 202,000 | 2,110,000 |

The production of cod-liver oil averages 900,000 gallons yearly, chiefly in Norway and Canada, 100 livers yielding one gallon of oil.

## Herring

| Fishers             | Tons Herrings | Value, £  |
|---------------------|---------------|-----------|
| Scotch . . . . .    | 140,000       | 1,700,000 |
| English . . . . .   | 80,000        | 950,000   |
| Irish . . . . .     | 20,000        | 240,000   |
| French . . . . .    | 42,000        | 550,000   |
| Norwegian . . . . . | 60,000        | 700,000   |
| Canadian . . . . .  | 48,000        | 600,000   |
| Total . . . . .     | 390,000       | 4,740,000 |

About 10,000 herrings go to a ton, a British barrel containing 1000, a Norwegian 500 fish. The number of men engaged in herring-fishing is 180,000, who catch on an average 22,000 fish each.

*Mussels.*—In 1850 there were 300 mussel-beds, and now there are 3000, in the Bay of Aguilon, France, extending seven miles along the shore. The industry was introduced by an Irish settler, and these beds produce annually 350,000 bushels, valued at £55,000.

*Oysters.*—The ordinary production and consumption are:—

|                         | Per Annum         |                       |                |
|-------------------------|-------------------|-----------------------|----------------|
|                         | Product, Millions | Consumption, Millions | Per Inhabitant |
| U. Kingdom . . . . .    | 29                | London . . . . .      | 500            |
| France . . . . .        | 300               | Paris . . . . .       | 57             |
| United States . . . . . | 3,500             | New York . . . . .    | 810            |
| Portugal . . . . .      | 600               | France . . . . .      | 260            |
| Total . . . . .         | 4,429             | ...                   | ...            |

Baltimore packs seven million bushels per annum. An oyster three months old is the size of a shilling, six months half-a-crown, but is not fit to eat before four years old. The oyster-beds established by advice of Abbé Bonnetard in France produced 97 million oysters in 1881. According to Mayhew, the consumption in London in 1864 was 310,000 barrels, containing 496 million oysters, being 1600 to the barrel, and representing a value of £2,100,000; this, however, seems a retail value, as they were valued the same year in France at £2 per thousand, which would be only one million sterling. The American oyster-fishing is valued at five millions sterling per annum, that of Canada (60,000 barrels) at £40,000 yearly.

*Pilchards.*—The Cornishmen take 150 millions yearly; exportation, 12,000 hogsheds.

*Salmon.*—The annual fishery in the United Kingdom is as follows:—

|                    | Tons  | Value, £ |
|--------------------|-------|----------|
| England . . . . .  | 360   | 40,000   |
| Scotland . . . . . | 2,600 | 280,000  |
| Ireland . . . . .  | 2,900 | 320,000  |
| Total . . . . .    | 5,860 | 640,000  |

London consumes nearly one-third, namely, 1840 tons yearly. England imports 50 tons per annum from Norway. Salmon have been caught in the Tay weighing 70 lbs., but the average weight of this fish is only 8 lbs. The exportation of tinned salmon from California exceeds 10 million lbs. yearly, of which one-half goes to England, one-fourth to the Continent, and the rest to New York, &c. The quantity has doubled since 1875. This is irrespective of six million lbs. annually consumed in California. There is a royal salmon-fishery at Ulea, in Finland, where 60,000 are taken yearly. The largest salmon caught in the United Kingdom in 1889 was one of 61 lbs., in the Severn. The fishermen of Colombia River, Canada, exported 415,000 cases of tinned salmon to England in 1889, containing 21,000,000 tins. The total consumption of British and imported salmon in London in 1883 was 5000 tons, or nearly 3 lbs. per inhabitant.

#### *Sardines*

|                  | Annual Fishery |             |
|------------------|----------------|-------------|
|                  | Million Fish   | Tons Weight |
| Spain . . . . .  | 1,260          | 52,000      |
| France . . . . . | 980            | 41,000      |

The exportation from France averages 450 millions per annum, say 20,000 tons.

#### *Seals*

| Fishery                    | Annual Slaughter | Tons Oil |
|----------------------------|------------------|----------|
| Canadian . . . . .         | 460,000          | 9,200    |
| Norwegian . . . . .        | 80,000           | 1,600    |
| Falkland Islands . . . . . | 5,000            | 100      |
| Montevideo . . . . .       | 5,000            | 100      |
| Total . . . . .            | 550,000          | 11,000   |

The skins vary in value; the oil fetches £25 per ton. One fishing vessel sometimes kills as many as 50,000 in a season off Nova Scotia. The practice of slaughtering seals while suckling their young threatens to exterminate the breed. In 1889 the British seal-fishers of British Columbia killed 28,000, the American 7000, and the skins were valued at 35s. each.

### FISHERIES

#### UNITED KINGDOM

The Report for 1888 gave the following:—

|                    | Tons Fish | Value, £  |
|--------------------|-----------|-----------|
| England . . . . .  | 317,000   | 4,210,000 |
| Scotland . . . . . | 238,000   | 1,690,000 |
| Ireland . . . . .  | 20,000    | 510,000   |
| Total . . . . .    | 575,000   | 6,410,000 |

The above would seem to be the value of the fish when first caught. Some estimates place the value much higher: hence apparent discrepancies on this point.

According to a previous statement, the strength of the fishing marine and the take of herrings were:—

|                   | Vessels | Men     | Barrels Herrings |
|-------------------|---------|---------|------------------|
| English . . . . . | 14,420  | 44,200  | 845,000          |
| Scotch . . . . .  | 14,650  | 47,100  | 1,580,000        |
| Irish . . . . .   | 5,830   | 21,300  | 210,000          |
| Total . . . . .   | 34,900  | 112,600 | 2,635,000        |

The above vessels take other fish besides herrings, but the latter form 70 per cent. of the total value of our sea-fishing. Including fresh-water fish, the value in 1885 was estimated at £5,100,000, viz.:—

| Kind                  | Tons    | Value, £  |
|-----------------------|---------|-----------|
| Salmon . . . . .      | 3,600   | 390,000   |
| Cod . . . . .         | 13,000  | 200,000   |
| Whale . . . . .       | ...     | 700,000   |
| Herrings . . . . .    | 260,000 | 2,900,000 |
| Pilchards . . . . .   | 3,000   | 30,000    |
| Lobsters, &c. . . . . | ...     | 900,000   |
| Total . . . . .       | ...     | 5,120,000 |

The take of salmon is 45 per cent. Scotch, 50 per cent. Irish, and 6 per cent. English. A barrel of herrings contains 1000; of pilchards, 3000 fish. About half of the herrings and two-thirds of the pilchards are exported.

The railways in 1887 carried 341,000 tons of fish, against 278,000 in 1882, viz.:—

|                    | 1882    | 1887    |
|--------------------|---------|---------|
| England . . . . .  | 215,000 | 250,000 |
| Scotland . . . . . | 57,000  | 84,000  |
| Ireland . . . . .  | 6,000   | 7,000   |
| Total . . . . .    | 278,000 | 341,000 |

The value of fish taken in England and Wales in 1888 was:—

| Kind                              | Tons    | Value, £  | Value per Ton, £ |
|-----------------------------------|---------|-----------|------------------|
| Turbot . . . . .                  | 2,700   | 170,000   | 63               |
| Sole . . . . .                    | 3,600   | 380,000   | 106              |
| Haddock . . . . .                 | 77,000  | 600,000   | 8                |
| Herrings . . . . .                | 86,000  | 490,000   | 6                |
| Cod . . . . .                     | 12,000  | 160,000   | 13               |
| Mackerel . . . . .                | 16,000  | 250,000   | 15               |
| Pilchards . . . . .               | 8,000   | 40,000    | 5                |
| Plaice . . . . .                  | 35,000  | 610,000   | 18               |
| Salmon . . . . .                  | 360     | 40,000    | 110              |
| Various . . . . .                 | 76,340  | 1,200,000 | 16               |
| Total . . . . .                   | 317,000 | 3,940,000 | 12               |
| Oysters (million) . . . . .       | 29      | 100,000   | ...              |
| Lobsters, &c. (million) . . . . . | 5½      | 170,000   | ...              |
| Total . . . . .                   | ...     | 4,210,000 | ...              |

In 1888 there were 298 fishermen drowned at sea, equal to 9 per 1000 of those constantly engaged in English and Welsh waters in fishing, or 6 per 1000 if casuals be included. In that year London took 180,000 tons, or nearly 60 per cent. of all fish caught in England, equal to 100 lbs. of fish per inhabitant for yearly consumption. The Scotch fisheries have multi-

plied fourteen-fold since the time of the Napoleon wars, viz. :—

1805-10.—Cured . . . 90,000 barrels fish per annum  
1881-83.—Cured . . . 1,250,000 " "

The imports and exports of fish at various dates were :—

| Year       | Imports |           | Exports |           |
|------------|---------|-----------|---------|-----------|
|            | Tons    | Value, £  | Tons    | Value, £  |
| 1853 . . . | 10,000  | 170,000   | 43,000  | 450,000   |
| 1860 . . . | 22,000  | 370,000   | 42,000  | 580,000   |
| 1870 . . . | 38,000  | 770,000   | 75,000  | 910,000   |
| 1880 . . . | 67,000  | 1,670,000 | 134,000 | 1,780,000 |
| 1888 . . . | 95,000  | 2,320,000 | 136,000 | 1,570,000 |

The quantities exported can only be given approximately, the weight only of herrings, the value of other kinds being stated in the Customs. Herrings are about three-fourths of the total of fish exports.

## FRANCE

The product in 1880 was as follows :—

| Kind                       | Tons    | Value, £  |
|----------------------------|---------|-----------|
| Cod . . .                  | 34,000  | 310,000   |
| Herring and mackerel . . . | 48,000  | 680,000   |
| Sardines . . .             | 38,000  | 1,650,000 |
| Various . . .              | 10,000  | 840,000   |
| Total . . .                | 130,000 | 3,480,000 |

The difference between deep-sea and coast fishing was as follows :—

|                  | Deep-Sea | Coast     | Total     |
|------------------|----------|-----------|-----------|
| Men . . .        | 13,000   | 72,000    | 85,000    |
| Tons, fish . . . | 34,000   | 96,000    | 130,000   |
| Value, £ . . .   | 350,000  | 3,130,000 | 3,480,000 |

Being an average of £26 per deep-sea, and £44 per coast fisherman.

The following report was published in 1886 :—

| Class         | 1874      |           | 1885      |           |
|---------------|-----------|-----------|-----------|-----------|
|               | Fishermen | Tons Fish | Fishermen | Tons Fish |
| Cod . . .     | 11,700    | 31,000    | 12,300    | 40,000    |
| Various . . . | 101,300   | 71,000    | 131,700   | 113,000   |
| Total . . .   | 113,000   | 102,000   | 144,000   | 153,000   |

The take of oysters and sardines was as follows :—

| Year       | Oysters, Million | Sardines, Million |
|------------|------------------|-------------------|
| 1874 . . . | 52               | 611               |
| 1885 . . . | 127              | 494               |

The French oyster-beds showed the following product :—

| Year       | Millions      |                |       |                |              | Total |
|------------|---------------|----------------|-------|----------------|--------------|-------|
|            | Arca-<br>chon | Roche-<br>fort | Auray | Gran-<br>ville | Can-<br>cale |       |
| 1862 . . . | 8             | 1              | ...   | 13             | 18           | 40    |
| 1868 . . . | 8             | 3              | 3     | 0              | 1            | 15    |
| 1872 . . . | 10            | 1              | 7     | 1              | 4            | 23    |
| 1874 . . . | 42            | 2              | 10    | 1              | 9            | 64    |
| 1876 . . . | 197           | 30             | 22    | 1              | 9            | 259   |

The Cancale beds produced 70 millions in 1843, the Granville 46 millions in 1857. The total French product was valued at £34,000 in 1869, at £74,000 in 1874.

The value of all fish taken in 1885 was £3,700,000, against £2,900,000 in 1874. The exportation of sardines was as follows :—

| Year       | Tons   | Million Fish |
|------------|--------|--------------|
| 1880 . . . | 10,300 | 260          |
| 1889 . . . | 12,400 | 310          |

In 1888 France exported 19,000 tons of dried codfish; the fish bounty paid that year by Government was £160,000 sterling. Nevertheless, the deep-sea fishery is not progressing; the returns of sixty years ago (1830) showed 441 vessels of 67,000 tons burthen, manned by 12,100 fishermen, the same number at present.

## HOLLAND

Such was the importance of Dutch fisheries 300 years ago, that Amsterdam was said to be built of herring-bones. In the sixteenth century the Dutch had 1500 vessels in the Shetland herring-fisheries, and 260 Arctic whalers, manned by 14,000 seamen. Injudicious restrictions and heavy taxes brought down this industry, till, in 1854, Holland had only 80 busses.

The returns of herring-fishery in recent years show thus :—

| Year       | Busses       |       |       | Value Taken, £ |        |         |
|------------|--------------|-------|-------|----------------|--------|---------|
|            | Deep-<br>Sea | Coast | Total | Deep-<br>Sea   | Coast  | Total   |
| 1874 . . . | 114          | 218   | 332   | 110,000        | 40,000 | 150,000 |
| 1880 . . . | 133          | 284   | 417   | 150,000        | 60,000 | 210,000 |
| 1882 . . . | 145          | 261   | 416   | 190,000        | 80,000 | 270,000 |

Deep-sea fishing showed annual averages as follows :—

| Period        | Busses | Tons Fish | Value, £ |
|---------------|--------|-----------|----------|
| 1858-67 . . . | 86     | 4,000     | 50,000   |
| 1868-77 . . . | 110    | 7,200     | 100,000  |
| 1878-82 . . . | 134    | 15,000    | 150,000  |

Coast-fishing was as follows :—

| Year       | Busses | Barrels Fish | Value, £ |
|------------|--------|--------------|----------|
| 1874 . . . | 218    | 27,600       | 35,000   |
| 1880 . . . | 284    | 56,700       | 60,000   |
| 1882 . . . | 261    | 51,100       | 80,000   |

The oyster-fishery produced as follows :—

| Year       | Number     | Tons  |
|------------|------------|-------|
| 1876 . . . | 36,600,000 | 2,900 |
| 1880 . . . | 16,500,000 | 1,200 |
| 1882 . . . | 15,600,000 | 1,100 |

It appears that 14,000 oysters go to a ton. The consumption was as follows :—

|                  | Tons  |
|------------------|-------|
| Holland . . .    | 154   |
| Germany . . .    | 346   |
| England, &c. . . | 600   |
| Total . . .      | 1,100 |

## RUSSIA

In 1800 Hermann valued the fisheries at £1,500,000 per annum. In 1880 the take was estimated at 220,000 tons, worth £2,200,000.

## SWEDEN

In 1800 the annual take was 600 million fish, or 600,000 barrels, of which three-fourths were consumed at home. The exports have been as follows :—

| Year       | Tons   | Value, £ |
|------------|--------|----------|
| 1800 . . . | 15,000 | 150,000  |
| 1830 . . . | 30,000 | 300,000  |
| 1886 . . . | 25,000 | 280,000  |

In 1880 there were 29,000 fishermen; the annual take would probably exceed 60,000 tons.

## NORWAY

In 1883; the returns showed as follows:—

| Class             | Fishermen | Fish, Millions | Value, £  |
|-------------------|-----------|----------------|-----------|
| Cod . . . . .     | 58,000    | 65             | 920,000   |
| Herring . . . . . | 53,000    | 410            | 640,000   |
| Total . . . . .   | 111,000   | 475            | 1,560,000 |

Besides the above, the Norwegians take 350 whales, 80,000 seals, and in fresh waters a quantity of salmon.

## UNITED STATES

In 1880 there were 131,400 fishermen, with 51,400 boats of all sizes, and the annual take was valued at £8,610,000.

## CANADA

According to a statement in 1883 we find:—

| Fish                    | Value, £        |
|-------------------------|-----------------|
| Cod, tons . . . . .     | 45,000 520,000  |
| Herring, tons . . . . . | 48,000 580,000  |
| Seals, number . . . . . | 460,000 280,000 |
| Whales, &c. . . . .     | ... 1,070,000   |
| Total . . . . .         | 2,450,000       |

In 1889 there were 31,600 vessels, manned by 59,800 fishermen, whose take was valued at £3,800,000 yearly.

The fisheries of the principal nations may be summed up thus, approximately:—

|                      | Vessels | Men     | Tons Fish | Value, £   | Value per Man, £ |
|----------------------|---------|---------|-----------|------------|------------------|
| England . . . . .    | 14,400  | 47,300  | 320,000   | 4,200,000  | 95               |
| Scotland . . . . .   | 14,600  | 50,000  | 240,000   | 1,700,000  | 34               |
| Ireland . . . . .    | 5,800   | 21,800  | 25,000    | 500,000    | 23               |
| U. Kingdom . . . . . | 34,800  | 129,100 | 585,000   | 6,400,000  | 50               |
| France . . . . .     | 23,900  | 144,000 | 153,000   | 3,700,000  | 26               |
| Germany . . . . .    | 8,100   | 17,000  | 40,000    | 400,000    | 24               |
| Russia . . . . .     | 13,500  | 68,000  | 220,000   | 2,200,000  | 32               |
| Austria . . . . .    | 2,800   | 7,000   | 15,000    | 150,000    | 22               |
| Italy . . . . .      | 18,200  | 61,000  | 100,000   | 1,000,000  | 17               |
| Spain . . . . .      | 10,200  | 38,000  | 50,000    | 500,000    | 13               |
| Sweden . . . . .     | 7,000   | 29,000  | 60,000    | 600,000    | 21               |
| Norway . . . . .     | 31,600  | 111,000 | 160,000   | 1,600,000  | 15               |
| Holland . . . . .    | 500     | 8,000   | 20,000    | 270,000    | 34               |

## FLAX AND LINEN.

Flax-growing received an abnormal impulse by the American War of 1861-64 and ensuing cotton-famine, but has been on the decline in most countries, except Russia, during the last ten years. The production in the United Kingdom was as follows:—

| Year           | Tons   | Value of Crop, £ |
|----------------|--------|------------------|
| 1830 . . . . . | 15,500 | 1,240,000        |
| 1850 . . . . . | 21,000 | 760,000          |
| 1870 . . . . . | 32,500 | 1,700,000        |
| 1888 . . . . . | 20,000 | 680,000          |

Neumann-Spallart's table for 1885 and some late figures show flax-growing as follows:—

|                            | Acres     | Tons Flax | Lbs. per Acre |
|----------------------------|-----------|-----------|---------------|
| United Kingdom . . . . .   | 116,000   | 21,000    | 400           |
| France . . . . .           | 109,000   | 28,000    | 570           |
| Germany . . . . .          | 270,000   | 44,000    | 365           |
| Russia . . . . .           | 3,000,000 | 330,000   | 240           |
| Austria . . . . .          | 240,000   | 47,000    | 440           |
| Italy . . . . .            | 170,000   | 20,000    | 265           |
| Belgium . . . . .          | 98,000    | 21,000    | 470           |
| Holland . . . . .          | 38,000    | 8,000     | 460           |
| Sweden . . . . .           | 28,000    | 3,000     | 230           |
| Other countries* . . . . . | 46,000    | 4,000     | 200           |
| United States . . . . .    | 400,000   | 42,000    | 230           |
| Total . . . . .            | 4,515,000 | 568,000   | 320           |

*Linen Manufacture.*—The latest information may be summed up thus, the consumption of flax and value of product being given approximately:—

|                       | Number of Spindles | Power- Looms | Tons Flax Consumed | Value of Manufacture |
|-----------------------|--------------------|--------------|--------------------|----------------------|
| U. Kingdom . . . . .  | 1,160,000          | 47,600       | 85,000             | 8,500,000            |
| France . . . . .      | 500,000            | 23,000       | 90,000             | 9,000,000            |
| Germany . . . . .     | 318,000            | 8,000        | 64,000             | 7,000,000            |
| Russia . . . . .      | 150,000            | 2,500        | 120,000            | 9,000,000            |
| Austria . . . . .     | 399,000            | 500          | 57,000             | 5,700,000            |
| Italy . . . . .       | 59,000             | 800          | 27,000             | 2,700,000            |
| Spain . . . . .       | ...                | 1,000        | 10,000             | 1,000,000            |
| Sweden . . . . .      | 4,000              | 100          | 3,000              | 300,000              |
| Holland . . . . .     | 8,000              | 1,200        | 5,000              | 500,000              |
| Belgium . . . . .     | 289,000            | 4,800        | 50,000             | 5,000,000            |

| U. States . . . . .   | 13,000             | 7,000        | 42,000             | 4,200,000            |
| Total . . . . .       | 2,909,000          | 96,500       | 556,000            | 53,200,000           |

## UNITED KINGDOM.

The production of linen from 1700 to 1830 was recorded for the purpose of bounties; since the latter year it is estimated according to the consumption of flax. The production in the three kingdoms was approximately as follows:—

| Period            | Millions of Yards per Annum |          |          |       |
|-------------------|-----------------------------|----------|----------|-------|
|                   | England                     | Scotland | Ireland† | Total |
| 1701-50 . . . . . | ...                         | 5        | 8        | 13    |
| 1751-99 . . . . . | 8                           | 14       | 31       | 53    |
| 1800-10 . . . . . | 15                          | 25       | 46       | 86    |
| 1811-20 . . . . . | 20                          | 33       | 60       | 113   |
| 1821-30 . . . . . | 24                          | 60       | 90       | 174   |
| 1831-40 . . . . . | 35                          | 90       | 125      | 250   |
| 1841-50 . . . . . | 50                          | 100      | 160      | 310   |
| 1851-60 . . . . . | 50                          | 100      | 150      | 300   |
| 1861-70 . . . . . | 50                          | 110      | 190      | 350   |
| 1871-80 . . . . . | 50                          | 100      | 150      | 300   |
| 1881-90 . . . . . | 45                          | 95       | 140      | 280   |

\* New Zealand exports yearly 1500 tons of a fibre which yields 17 per cent. flax.

† The production and export of Irish linen in the 18th century were approximately as follows:—

| Year           | Yards Made | Yards Exported | Home Use  |
|----------------|------------|----------------|-----------|
| 1710 . . . . . | 4,500,000  | 2,000,000      | 2,500,000 |
| 1740 . . . . . | 12,000,000 | 7,000,000      | 5,000,000 |
| 1800 . . . . . | 44,000,000 | 36,000,000     | 8,000,000 |

The following table shows the consumption of flax and the domestic and foreign trade in linen since 1806 :—

| Year           | Flax, Tons | Millions of Yards Linen |          |          | Export Yarn,<br>Million Lbs. | Value of Manu-<br>facture, £ |
|----------------|------------|-------------------------|----------|----------|------------------------------|------------------------------|
|                |            | Made                    | Exported | Home Use |                              |                              |
| 1806 . . . . . | 22,000     | 86                      | 40       | 46       | ...                          | 3,800,000                    |
| 1820 . . . . . | 40,000     | 145                     | 50       | 95       | ...                          | 5,800,000                    |
| 1830 . . . . . | 62,000     | 223                     | 62       | 161      | ...                          | 7,600,000                    |
| 1840 . . . . . | 94,000     | 290                     | 87       | 203      | 16                           | 10,800,000                   |
| 1850 . . . . . | 110,000    | 340                     | 105      | 235      | 18                           | 12,600,000                   |
| 1860 . . . . . | 102,000    | 270                     | 144      | 126      | 31                           | 11,400,000                   |
| 1870 . . . . . | 130,000    | 360                     | 226      | 134      | 37                           | 13,500,000                   |
| 1881 . . . . . | 102,000    | 310                     | 174      | 136      | 18                           | 11,700,000                   |
| 1888 . . . . . | 85,000     | 260                     | 177      | 83       | 15                           | 8,500,000                    |

The total value represented by the linen industry since 1821 is approximately as follows :—

| Period             | Millions £ Sterling |                 |               |       |
|--------------------|---------------------|-----------------|---------------|-------|
|                    | Home Use            | Exported Linens | Exported Yarn | Total |
| 1821-30 . . . . .  | 52                  | 21              | ...           | 73    |
| 1831-40 . . . . .  | 60                  | 25              | 3             | 88    |
| 1841-50 . . . . .  | 63                  | 34              | 6             | 103   |
| 1851-60 . . . . .  | 56                  | 44              | 13            | 113   |
| 1861-70 . . . . .  | 52                  | 71              | 24            | 147   |
| 1871-80 . . . . .  | 50                  | 66              | 16            | 132   |
| 1881-88 . . . . .  | 36                  | 44              | 8             | 88    |
| 68 years . . . . . | 369                 | 305             | 70            | 744   |

The following table shows approximately the output of linen in English statute miles, the amount paid for flax in 68 years, and the product of this industry :—

| Period             | Miles of Linen | Amount in Millions £ |                   |             | Price of Linen per Mile, £ |
|--------------------|----------------|----------------------|-------------------|-------------|----------------------------|
|                    |                | Flax                 | Manu-<br>factures | Net Product |                            |
| 1821-30 . . . . .  | 990,000        | 41                   | 73                | 32          | 70                         |
| 1831-40 . . . . .  | 1,420,000      | 58                   | 88                | 30          | 60                         |
| 1841-50 . . . . .  | 1,760,000      | 54                   | 103               | 49          | 55                         |
| 1851-60 . . . . .  | 1,700,000      | 46                   | 113               | 67          | 52                         |
| 1861-70 . . . . .  | 2,000,000      | 59                   | 147               | 88          | 60                         |
| 1871-80 . . . . .  | 1,700,000      | 56                   | 132               | 76          | 55                         |
| 1881-88 . . . . .  | 1,300,000      | 29                   | 88                | 59          | 45                         |
| 68 years . . . . . | 10,870,000     | 343                  | 744               | 401         | 55                         |

The factory statistics of this industry are as follows :—

| Year           | Factories | Operatives | Spindles  |
|----------------|-----------|------------|-----------|
| 1840 . . . . . | 392       | 43,000     | ...       |
| 1870 . . . . . | 502       | 125,000    | 1,480,000 |
| 1885 . . . . . | 388       | 112,000    | 1,160,000 |

In 1879 the industry stood thus :—

|                      | No. of Factories | Spindles  | Power-Looms | Operatives |
|----------------------|------------------|-----------|-------------|------------|
| England . . . . .    | 101              | 191,000   | 4,100       | 15,000     |
| Scotland . . . . .   | 155              | 265,000   | 16,800      | 37,000     |
| Ireland . . . . .    | 144              | 809,000   | 19,600      | 56,000     |
| U. Kingdom . . . . . | 400              | 1,265,000 | 40,500      | 108,000    |

#### FRANCE

In 1839 the linen manufactures were estimated by Berghus at £10,400,000, which would be equivalent to 280 million yards, and indicate a consumption of 70,000 tons of flax. They were valued by Tolosan in the previous century, 1788, at about five millions sterling. France

consumes three times as much flax as she produces, the import of this fibre showing thus :—

| Year           | Tons   |
|----------------|--------|
| 1872 . . . . . | 56,000 |
| 1880 . . . . . | 67,000 |
| 1887 . . . . . | 60,000 |

In this branch of manufacture she is ahead of the United Kingdom, and turns out about 360 million yards per annum. In five years ending 1888 France exported £3,200,000 of linens yearly.

#### GERMANY

In 1805 Oddy valued the linen manufactures of Prussia at £1,800,000; and in 1843 the value had risen to £2,800,000. At the latter date Prussia stood for three-fourths of the linen manufactures of the Zollverein.

Germany in 1838 counted 13,000 spindles and 283,000 looms, showing an increase of 30 per cent. since 1822, but it was not until after the land-reform of 1848 and the introduction of railways that this industry notably expanded. In 1855 there were 74,000 flax-spindles, and 189,000 in 1865.

The home production of flax is 44,000 tons.

The net imports are as follows :—

| Year           | Tons   |
|----------------|--------|
| 1873 . . . . . | 24,000 |
| 1880 . . . . . | 13,000 |
| 1887 . . . . . | 20,000 |

The consumption, therefore, seems to average 64,000 tons yearly, which is equivalent to a make of 260 million yards of linen.

#### RUSSIA

In 1828 there were 214 linen-factories, which turned out 20 million yards, valued at £800,000; this was exclusive of Poland, which made two million yards yearly. In 1864 there were 599 factories, with 44,000 operatives, the production being estimated by Bushen at £5,300,000.

According to Mr. Spallart and the official report, an enormous increase took place recently in flax-growing, the area under this crop reaching 3,785,000 acres, and being supposed to yield 400,000 tons of flax; a pure delusion, for we see that the exports of flax have diminished. The area under flax in 1872 was 2,250,000 acres, the crop 242,000 tons; the real figures are probably still the same. During ten years ending 1887 Russia imported linen manufactures worth £400,000 a year. The exports of flax were :—

| Period            | Tons Yearly |
|-------------------|-------------|
| 1861-63 . . . . . | 65,000      |
| 1870-71 . . . . . | 162,000     |
| 1885-87 . . . . . | 140,000     |

#### AUSTRIA

An official return published in 1828 showed that the production of linen since 1824 averaged 92 million yards per annum. In 1840 there were 869 factories, with

280,000 hands. Most of the industry is situate in Bohemia, where it has flourished since the fourteenth century.

The production of flax averages 5000 tons in Hungary, 8000 in Bohemia, and amounts altogether to 47,000 tons, besides which the Empire imports 10,000 tons. The factories may, therefore, be estimated to produce 230 million yards linen per annum. In ten years ending 1887 Austria exported £600,000 per annum of linen goods.

#### ITALY

The official report of 1877 showed linen-factories with an aggregate of 13,000 operatives, and 59,000 spindles worked by 3000 horse-power, of which 2500 water and 500 steam. About 20,000 tons of flax are grown, and linen yarn is imported, the imports showing thus:—

| Period            | Tons Yarn<br>Yearly |
|-------------------|---------------------|
| 1862-64 . . . . . | 3000                |
| 1872-73 . . . . . | 4000                |
| 1885-87 . . . . . | 6600                |

The actual product of linen is about 120 million yards yearly.

#### SPAIN

A statement published about 1870 gives the linen-factories a total of 6000 operatives and 5000 looms, the annual product being valued at £1,100,000 sterling. This indicates a consumption of 10,000 tons flax and an output of 40 million yards. At that time the average importation of flax and linen yarn was 5000 tons yearly, from which it would appear that Spain produces 5000 tons of her own.

The import of linen yarn yearly was as follows:—

| Period            | Tons |
|-------------------|------|
| 1863-66 . . . . . | 7500 |
| 1873-76 . . . . . | 5500 |
| 1883-87 . . . . . | 3800 |

This shows a very steady decline of the industry, notwithstanding the enormous import dues on foreign linen goods. In ten years ending 1887 the import of linens averaged £400,000 yearly.

#### BELGIUM

The industry has been almost stationary for 50 years. Thus in 1835 there were 101,000 acres under flax, producing 21,000 tons, and the factories turned out 90 million yards linen, valued at four millions sterling. At present the flax area is 98,000 acres, and the mills turn out about 120 million yards linen. The output has always been, as in the United Kingdom, largely in excess of the requirements for home consumption. The export of linen fabrics and yarn has been:—

| Period            | Annual Average, £ |
|-------------------|-------------------|
| 1860-62 . . . . . | 1,700,000         |
| 1870-72 . . . . . | 2,600,000         |
| 1885-87 . . . . . | 4,100,000         |

This includes 13,000 tons of linen yarn. Belgium imports about 30,000 tons of flax, the mills consuming altogether about 50,000 tons. In ten years ending 1887 the export of linens averaged £800,000 yearly.

The following table shows approximately the quantities of food produced and the population subsisting thereon:—

| Period            | Tons Produced Yearly |            |           |                | Population  |
|-------------------|----------------------|------------|-----------|----------------|-------------|
|                   | Grain                | Meat       | Sugar     | Coffee and Tea |             |
| 1831-40 . . . . . | 101,000,000          | 8,700,000  | 530,000   | 210,000        | 251,000,000 |
| 1851-60 . . . . . | 139,000,000          | 10,490,000 | 1,100,000 | 390,000        | 300,000,000 |
| 1875-84 . . . . . | 204,000,000          | 13,260,000 | 3,670,000 | 745,000        | 370,000,000 |
| 1888 . . . . .    | 241,000,000          | 14,430,000 | 5,260,000 | 920,000        | 404,000,000 |

#### UNITED STATES

The industry is of no magnitude, counting only 13,000 spindles and 7000 looms, which appear to consume native flax only, the crop being estimated at 42,000 tons. The Americans, meantime, consume imported linens largely, the value averaging thus:—

| Period            | £         |
|-------------------|-----------|
| 1841-43 . . . . . | 800,000   |
| 1861-63 . . . . . | 1,400,000 |
| 1871-73 . . . . . | 3,800,000 |
| 1881-83 . . . . . | 3,700,000 |

The consumption of linen is about 300 million yards, of which one-half is made in the country.

#### APPROXIMATE PRODUCTION OF LINEN

| Million<br>Yards         | Million<br>Yards |
|--------------------------|------------------|
| United Kingdom . . . . . | 300              |
| France . . . . .         | 320              |
| Germany . . . . .        | 260              |
| Russia . . . . .         | 360              |
| Austria . . . . .        | 230              |
| Italy . . . . .          | 120              |
| Spain . . . . .          | 40               |
| Sweden . . . . .         | 10               |
| Holland . . . . .        | 20               |
| Belgium . . . . .        | 120              |
| United States . . . . .  | 160              |
| Switzerland . . . . .    | 10               |

The whole makes up nearly 2000 million yards, worth about 50 millions sterling.

#### FLOODS

| Date           | Place                  | Loss          |
|----------------|------------------------|---------------|
| 1642 . . . . . | China . . . . .        | 300,000 lives |
| 1646 . . . . . | Holland . . . . .      | 110,000 lives |
| 1875 . . . . . | Toulouse . . . . .     | £15,000,000   |
| 1876 . . . . . | Bengal . . . . .       | 200,000 lives |
| 1879 . . . . . | Zegedin . . . . .      | £8,500,000    |
| 1883 . . . . . | Rhine Valley . . . . . | £6,000,000    |

In the last-mentioned the area of country under water was 260 square miles, equal to the extent of the Lake of Constance.

#### FODDER

In feeding animals it is found that 10 lbs. hay are equivalent to:—

| Lbs.                    | Lbs. | Lbs. |
|-------------------------|------|------|
| Oil-cake . . . . .      | 3    | 6    |
| Beans . . . . .         | 4    | 22   |
| Oats . . . . .          | 5    | 25   |
| Maize . . . . .         | 6    | 30   |
| Wheat . . . . .         | 6    | 22   |
| Potatoes . . . . .      | 22   | 25   |
| Cabbage . . . . .       | 25   | 30   |
| Carrots . . . . .       | 30   | 30   |
| Mangel-wurzel . . . . . | 33   | 45   |
| Straw . . . . .         | 45   | 47   |
| Turnips . . . . .       | 47   | 50   |
| Clover . . . . .        | 50   | 50   |

A horse will eat in a year nine times his own weight, a cow nine times, an ox six times, a sheep six times.

#### FOOD

The food supply of the civilised nations, that is, Europe, United States, British Colonies, &c., has increased (except as regards meat) during the nineteenth century much faster than population, which shows that the material welfare of mankind has advanced in its most important particular.

In the above table grain includes what is used both for man and beast. The averages per head of population were :—

| Period            | Lbs. per Inhabitant |      |       |                |
|-------------------|---------------------|------|-------|----------------|
|                   | Grain               | Meat | Sugar | Coffee and Tea |
| 1831-40 . . . . . | 900                 | 79   | 5     | 2              |
| 1851-60 . . . . . | 1,040               | 79   | 8     | 3              |
| 1871-80 . . . . . | 1,240               | 72   | 22    | 4½             |
| 1887 . . . . .    | 1,330               | 79   | 29    | 5              |

The production of wheat, as shown already when treating of Agriculture, has averaged as follows :—

| Period  | Tons Yearly |               |               |            |
|---------|-------------|---------------|---------------|------------|
|         | Europe      | United States | Colonies, &c. | Total      |
| 1831-40 | 17,800,000  | 1,950,000     | 2,900,000     | 22,650,000 |
| 1851-60 | 21,420,000  | 3,430,000     | 5,120,000     | 29,970,000 |
| 1871-80 | 28,150,000  | 8,450,000     | 8,250,000     | 44,850,000 |
| 1881-87 | 30,770,000  | 11,000,000    | 11,230,000    | 53,000,000 |
| 1888    | 32,400,000  | 10,370,000    | 14,050,000    | 56,820,000 |

In the period ending 1840 Europe produced 80 per cent. of the wheat of the world, as compared with 56 per cent. at present. In the interval the production in the United States and in the Colonies has quintupled.

The weight and value of grain used for human food in 1887 are shown approximately in the following table :—

|                          | Tons       |            |            |            | Value, Millions £ |
|--------------------------|------------|------------|------------|------------|-------------------|
|                          | Wheat      | Rye        | Oats, &c.  | Total      |                   |
| United Kingdom . . . . . | 6,200,000  | ...        | 200,000    | 6,400,000  | 46                |
| France . . . . .         | 8,200,000  | 900,000    | ...        | 9,100,000  | 77                |
| Germany . . . . .        | 3,000,000  | 6,000,000  | 2,200,000  | 11,200,000 | 68                |
| Russia . . . . .         | 4,200,000  | 14,500,000 | 4,300,000  | 23,000,000 | 97                |
| Austria . . . . .        | 3,300,000  | 3,300,000  | 800,000    | 8,400,000  | 52                |
| Italy . . . . .          | 3,000,000  | 400,000    | 1,900,000  | 5,300,000  | 39                |
| Spain* . . . . .         | 3,000,000  | 400,000    | 400,000    | 3,800,000  | 28                |
| Portugal . . . . .       | 300,000    | 300,000    | 300,000    | 900,000    | 6                 |
| Sweden . . . . .         | 300,000    | 700,000    | 200,000    | 1,200,000  | 8                 |
| Norway . . . . .         | 100,000    | 200,000    | 100,000    | 400,000    | 3                 |
| Denmark . . . . .        | 200,000    | 300,000    | ...        | 500,000    | 4                 |
| Holland . . . . .        | 500,000    | 400,000    | 200,000    | 1,100,000  | 8                 |
| Belgium . . . . .        | 800,000    | 600,000    | 200,000    | 1,600,000  | 12                |
| Switzerland . . . . .    | 300,000    | 200,000    | 100,000    | 600,000    | 4                 |
| Roumania . . . . .       | 300,000    | 200,000    | 300,000    | 800,000    | 4                 |
| Servia . . . . .         | 100,000    | 100,000    | 100,000    | 300,000    | 2                 |
| Europe . . . . .         | 34,800,000 | 28,500,000 | 11,300,000 | 74,600,000 | 458               |
| United States . . . . .  | 7,300,000  | 600,000    | 2,100,000  | 10,000,000 | 48                |
| Canada . . . . .         | 800,000    | ...        | 100,000    | 900,000    | 6                 |
| Australia . . . . .      | 700,000    | ...        | ...        | 700,000    | 5                 |
| Total . . . . .          | 43,600,000 | 29,000,000 | 13,500,000 | 86,200,000 | 517               |

The different kinds of meat produced were as follows :—

| Period  | Tons Yearly |           |           |            |
|---------|-------------|-----------|-----------|------------|
|         | Beef        | Mutton    | Pork      | Total      |
| 1831-40 | 3,821,000   | 2,050,000 | 2,830,000 | 8,701,000  |
| 1851-60 | 4,950,000   | 2,203,000 | 3,340,000 | 10,493,000 |
| 1871-80 | 6,303,000   | 2,470,000 | 4,490,000 | 13,263,000 |
| 1887    | 7,205,000   | 2,709,000 | 4,479,000 | 14,393,000 |

\* Spanish statistics, as a rule, bear the impress of exaggeration, and hence the production and consumption of grain and the numbers of live-stock must be doubtful.

The production of other grain during the same period was approximately as follows :—

| Period  | Tons Yearly |               |               |             |
|---------|-------------|---------------|---------------|-------------|
|         | Europe      | United States | Colonies, &c. | Total       |
| 1831-40 | 62,500,000  | 11,550,000    | 4,300,000     | 78,350,000  |
| 1851-60 | 79,730,000  | 22,920,000    | 6,380,000     | 109,030,000 |
| 1871-80 | 86,850,000  | 49,500,000    | 7,150,000     | 143,500,000 |
| 1881-87 | 101,230,000 | 56,500,000    | 10,270,000    | 168,000,000 |
| 1888    | 105,800,000 | 68,710,000    | 9,450,000     | 183,960,000 |

The total grain production since 1830 has been approximately :—

| Period  | Tons Yearly |               |               |             |
|---------|-------------|---------------|---------------|-------------|
|         | Europe      | United States | Colonies, &c. | Total       |
| 1831-40 | 80,300,000  | 13,500,000    | 7,200,000     | 101,000,000 |
| 1851-60 | 101,150,000 | 26,350,000    | 11,500,000    | 139,000,000 |
| 1871-80 | 115,000,000 | 57,950,000    | 15,400,000    | 188,350,000 |
| 1881-87 | 132,000,000 | 67,500,000    | 21,500,000    | 221,000,000 |
| 1888    | 138,200,000 | 79,080,000    | 23,500,000    | 240,780,000 |

The ratio of increase in production of grain was thus :—

|                         | 1831-40 | 1851-60 | 1871-80 | 1888 |
|-------------------------|---------|---------|---------|------|
| Europe . . . . .        | 100     | 126     | 144     | 172  |
| United States . . . . . | 100     | 195     | 430     | 585  |
| Colonies, &c. . . . .   | 100     | 160     | 214     | 326  |
| Total . . . . .         | 100     | 138     | 186     | 238  |

The consumption of meat in Europe at present averages 61 lbs. yearly per inhabitant, against 64 lbs. in the decade ending 1840, viz. :—

|                          | Lbs. per Inhabitant |      |
|--------------------------|---------------------|------|
|                          | 1840                | 1888 |
| United Kingdom . . . . . | 87                  | 109  |
| France . . . . .         | 43                  | 77   |
| Germany . . . . .        | 60                  | 64   |
| Russia . . . . .         | 67                  | 51   |
| Austria . . . . .        | 76                  | 61   |
| Belgium . . . . .        | 50                  | 65   |

Meantime there has been an increased consumption per head in towns.

About 60,000 tons of frozen mutton are imported into Europe annually from Australia and the River Plate. An engine of 70-horse power serves to refrigerate a chamber containing 250 tons of meat, and consumes 50 tons of coal in a voyage of forty days.

The production of meat was approximately as follows:—

|                    | Tons Yearly |            |            |            |
|--------------------|-------------|------------|------------|------------|
|                    | 1831-40     | 1851-60    | 1874-84    | 1887       |
| U. Kingdom         | 980,000     | 1,047,000  | 1,100,000  | 1,105,000  |
| France             | 670,000     | 940,000    | 1,155,000  | 1,200,000  |
| Germany            | 900,000     | 1,246,000  | 1,300,000  | 1,375,000  |
| Russia             | 1,430,000   | 1,670,000  | 1,800,000  | 1,885,000  |

|---------|---------|-----------|-----------|--------|-----------|
| 1831-40 | 200,000 | 1,380,000 | 1,250,000 | ...    | 2,830,000 |
| 1851-60 | 210,000 | 1,600,000 | 1,510,000 | 20,000 | 3,340,000 |
| 1874-84 | 190,000 | 1,940,000 | 2,270,000 | 90,000 | 4,490,000 |
| 1887    | 195,000 | 2,019,000 | 2,170,000 | 95,000 | 4,479,000 |

| Total of Meat. |           |           |           |         |            |
|----------------|-----------|-----------|-----------|---------|------------|
| 1831-40        | 980,000   | 5,490,000 | 2,050,000 | 170,000 | 8,700,000  |
| 1851-60        | 1,050,000 | 6,410,000 | 2,650,000 | 340,000 | 10,493,000 |
| 1874-84        | 1,100,000 | 7,203,000 | 4,120,000 | 840,000 | 13,263,000 |
| 1887           | 1,105,000 | 7,528,000 | 4,750,000 | 920,000 | 14,393,000 |

The relative increase of each kind of meat since 1840 is shown in the following table:—

|          | 1831-40 | 1851-60 | 1887 |
|----------|---------|---------|------|
| Beef     | 100     | 130     | 188  |
| Mutton   | 100     | 108     | 132  |
| Pork     | 100     | 118     | 158  |
| All meat | 100     | 120     | 166  |

slaughter as usual in Europe, viz., 20 per cent. yearly of horned cattle, 40 per cent. of sheep, and 100 per cent. of pigs, and the average carcass at 500 lbs. of beef, 50 lbs. of mutton, and 100 lbs. pork, the annual production and the available surplus for exportation would be:—

FOOD-SUPPLY.

*Production of Meat, lbs. yearly per Inhabitant.*

*Consumption of Meat, lbs. yearly per Inhabitant.*

|                       | Tons Production |           |           |           | Tons Consumption | Tons for Export |
|-----------------------|-----------------|-----------|-----------|-----------|------------------|-----------------|
|                       | Beef            | Mutton    | Pork      | Total     |                  |                 |
| United States . . . . | 2,190,000       | 390,000   | 2,170,000 | 4,750,000 | 4,140,000        | 610,000         |
| Australia . . . . .   | 400,000         | 870,000   | 30,000    | 1,300,000 | 420,000          | 880,000         |
| River Plate . . . . . | 1,120,000       | 900,000   | 10,000    | 2,030,000 | 260,000          | 1,770,000       |
| Total . . . . .       | 3,710,000       | 2,160,000 | 2,210,000 | 8,080,000 | 4,820,000        | 3,260,000       |

The available surplus of the above three countries will be equal to 34 per cent. of the annual meat consumption of Europe, say four months' supply.

At present, however, the beef of the River Plate is out of the question, owing to the poor quality of the beasts. The importation of frozen mutton into England from the Southern Hemisphere has increased rapidly of late years. In 1889 the following quantities were received :—

| From                 | Tons   | Value, £  | Per Ton, £ |
|----------------------|--------|-----------|------------|
| Australia . . . . .  | 30,600 | 1,290,000 | 43         |
| Argentina . . . . .  | 19,700 | 750,000   | 38         |
| Falklands, &c. . . . | 7,100  | 360,000   | 50         |
| Total . . . . .      | 57,400 | 2,400,000 | 42         |

New Zealand sheep average 70 lbs., Argentine 40 lbs., and the approximate cost of the mutton delivered in London is as follows :—

|                             | Pence per Lb. | £ per Ton |
|-----------------------------|---------------|-----------|
| First cost of meat . . . .  | 2.5           | 23.3      |
| Freezing process . . . .    | 0.5           | 4.7       |
| Freight and charges . . . . | 1.0           | 9.4       |
| Total . . . . .             | 4.0           | 37.4      |

The production of beef-extract has also increased, as the slaughter at Liebig's factory at Fray Bentos, Uruguay, rose from 200,000 head of cattle in 1881 to 580,000 in 1884.

Block gave the average annual consumption of meat in the following cities in ten years down to 1877 as follows :—

| Pounds Meat per Inhabitant |     |                  |     |
|----------------------------|-----|------------------|-----|
| Paris . . . . .            | 207 | Milan . . . . .  | 106 |
| Vienna . . . . .           | 150 | Berlin . . . . . | 90  |
| Dresden . . . . .          | 140 | Naples . . . . . | 75  |
| Turin . . . . .            | 125 | Boston . . . . . | 306 |

In London the apparent consumption is only 230,000 tons, or 128 lbs. per inhabitant, but this does not include tinned meats, such as corned beef.

In 1861 the consumption per head was estimated at 172 lbs. in London, 138 in Paris, 119 in Berlin, and 103 in Madrid.

The consumption of food is approximately :—

|                       | Lbs. per Inhabitant |      |                   |       |          |      | Tea and Coffee, Oz. |
|-----------------------|---------------------|------|-------------------|-------|----------|------|---------------------|
|                       | Grain               | Meat | Butter and Cheese | Sugar | Potatoes | Salt |                     |
| U. Kingdom . . . .    | 378                 | 109  | 19                | 75    | 380      | 40   | 91                  |
| France . . . . .      | 540                 | 77   | 8                 | 20    | 570      | 20   | 66                  |
| Germany . . . . .     | 550                 | 64   | 8                 | 18    | 1,020    | 17   | 78                  |
| Russia . . . . .      | 635                 | 51   | 5                 | 11    | 180      | 19   | 6                   |
| Austria . . . . .     | 460                 | 61   | 7                 | 18    | 560      | 14   | 28                  |

The above represents the values in first hands, to which must be added 30 per cent. for distribution in retail. As regards liquor, the excise duties are not included, these being comprised under *Taxes*. Professor Keleti estimates the expenditure for food in Austria-Hungary at £9 per man, £7 per woman, and £5 per

child, or £7 per inhabitant, which would be 266 millions sterling, being 20 per cent. over the estimate in the above table: his calculation is probably at retail prices.

\* The blanks in the table stand for fractions, the amount of which is included at foot.

#### UNITED KINGDOM

The home production of wheat and meat is as follows :—

|                          | Wheat, Bushels | Beef, Tons | Mutton, Tons | Pork, Tons | Total Meat, Tons |
|--------------------------|----------------|------------|--------------|------------|------------------|
| England . . . . .        | 77,000,000     | 268,000    | 234,000      | 113,000    | 615,000          |
| Scotland . . . . .       | 2,000,000      | 58,000     | 88,000       | 8,000      | 154,000          |
| Ireland . . . . .        | 1,900,000      | 218,000    | 44,000       | 70,000     | 332,000          |
| United Kingdom . . . . . | 79,900,000     | 544,000    | 366,000      | 191,000    | 1,101,000        |

Food-supply has improved in late years, and the people of this country are the best fed in Europe. The consumption per inhabitant has been approximately as follows :—

|                   | Wheat | Meat | Sugar | Tea | Salt | Beer   | Rice | Eggs |
|-------------------|-------|------|-------|-----|------|--------|------|------|
|                   | Lbs.  | Lbs. | Lbs.  | Oz. | Lbs. | Galls. | Lbs. | No.  |
| 1811-30 . . . . . | 270   | 80   | 19    | 18  | 16   | 22     | 1    | 40   |
| 1831-50 . . . . . | 255   | 87   | 20    | 23  | 25   | 24     | 1    | 48   |
| 1851-70 . . . . . | 320   | 90   | 35    | 44  | 45   | 28     | 3    | 60   |
| 1871-80 . . . . . | 354   | 93   | 60    | 67  | 72   | 29     | 11   | 65   |
| 1881-88 . . . . . | 370   | 102  | 70    | 77  | 72   | 27     | 11   | 70   |
| 1889 . . . . .    | 354   | 109  | 75    | 78  | 72   | 27     | 11   | 76   |

The consumption of meat in Great Britain and Ireland differs considerably, viz. :—

|                   | Tons Consumed |         | Lbs. Meat per Inhab. |         |
|-------------------|---------------|---------|----------------------|---------|
|                   | Great Britain | Ireland | Great Britain        | Ireland |
| British . . . . . | 769,000       | ...     | 53                   | ...     |
| Irish . . . . .   | 237,000       | 95,000  | 16                   | 43      |
| Foreign . . . . . | 712,000       | 30,000  | 49                   | 13      |
| Total . . . . .   | 1,718,000     | 125,000 | 118                  | 56      |

The actual amount of salt consumed for food is probably no more than 36 lbs. per inhabitant, as one-half is supposed to be used in manufactures. The following table shows how our bread-supply and meat are provided :—

| Period            | Wheat, Million Bushels per Annum |          |       | Meat, Tons per Annum |          |           |
|-------------------|----------------------------------|----------|-------|----------------------|----------|-----------|
|                   | Native                           | Imported | Total | Native               | Imported | Total     |
| 1841-50 . . . . . | 108                              | 14       | 122   | 1,014,000            | ...      | 1,014,000 |
| 1851-60 . . . . . | 103                              | 47       | 150   | 1,047,000            | 44,000   | 1,091,000 |
| 1861-70 . . . . . | 102                              | 73       | 175   | 1,078,000            | 131,000  | 1,209,000 |
| 1871-80 . . . . . | 77                               | 114      | 191   | 1,091,000            | 288,000  | 1,379,000 |
| 1881-88 . . . . . | 72                               | 144      | 216   | 1,105,000            | 540,000  | 1,645,000 |
| 1889 . . . . .    | 70                               | 154      | 224   | 1,100,000            | 742,000  | 1,842,000 |

In 1889 Ireland exported to Great Britain the following cattle :—

|                 |                    |
|-----------------|--------------------|
| 717,000 cows =  | 193,000 tons meat. |
| 636,000 sheep = | 20,000 "           |
| 545,000 pigs =  | 24,000 "           |
| Total . . . . . | 237,000 "          |

The annual slaughter in the United Kingdom was approximately as follows :—

| Period            | Horned Cattle | Sheep      | Pigs      | Tons Meat |         |         |
|-------------------|---------------|------------|-----------|-----------|---------|---------|
|                   |               |            |           | Beef      | Mutton  | Pork    |
| 1831-40 . . . . . | 1,140,000     | 15,200,000 | 2,700,000 | 305,000   | 475,000 | 200,000 |
| 1841-50 . . . . . | 1,350,000     | 14,400,000 | 2,700,000 | 364,000   | 450,000 | 200,000 |
| 1851-60 . . . . . | 1,540,000     | 13,600,000 | 2,800,000 | 412,000   | 425,000 | 210,000 |
| 1861-70 . . . . . | 1,730,000     | 13,000,000 | 2,800,000 | 462,000   | 406,000 | 210,000 |
| 1871-80 . . . . . | 1,920,000     | 12,400,000 | 2,500,000 | 514,000   | 387,000 | 190,000 |
| 1881-88 . . . . . | 2,040,000     | 11,800,000 | 2,600,000 | 544,000   | 366,000 | 195,000 |

The weight and value of all kinds of meat imported in 1889 were as follows :—

|                       | Tons    | Value, £   | £ per Ton |
|-----------------------|---------|------------|-----------|
| Live cattle . . . . . | 300,000 | 10,400,000 | 35        |
| Bacon . . . . .       | 175,000 | 7,300,000  | 41        |
| Beef . . . . .        | 127,000 | 5,200,000  | 41        |
| Mutton . . . . .      | 61,000  | 2,600,000  | 42        |
| Hams . . . . .        | 50,000  | 2,500,000  | 50        |
| Pork . . . . .        | 19,000  | 700,000    | 36        |
| Lard . . . . .        | 60,000  | 2,200,000  | 36        |
| Poultry . . . . .     | 10,000  | 500,000    | 50        |
| Rabbits . . . . .     | 6,000   | 300,000    | 50        |
| Total . . . . .       | 808,000 | 31,700,000 | 39        |

As regards live cattle, the above is an estimate of their equivalent in dead meat, on the assumption that £35 sterling stands for a ton of meat. Deducting lard, poultry, and rabbits, the importation of meat was 742,000 tons.

Full-grown animals in England average as follows :—

|                  | Meat | Fat, &c. | Hide | Total, Lbs. |
|------------------|------|----------|------|-------------|
| Cattle . . . . . | 680  | 356      | 84   | 1,120       |
| Sheep . . . . .  | 91   | 43       | 18   | 152         |

Cows give from 70 to 160 lbs. tallow.

The importation of articles of food is shown in the following tables, that is, the quantities and values of what were retained for consumption.

|                         | 1860       | 1870       | 1880       | 1889       |
|-------------------------|------------|------------|------------|------------|
| Wheat, tons             | 1,270,000  | 1,550,000  | 2,760,000  | 3,850,000  |
| Sugar, ..               | 470,000    | 740,000    | 980,000    | 1,300,000  |
| Meat, ..                | 87,000     | 140,000    | 590,000    | 742,000    |
| Butter, ..              | 37,000     | 52,000     | 104,000    | 136,000    |
| Cheese, ..              | 26,000     | 46,000     | 79,000     | 82,000     |
| Rice, ..                | 18,000     | 90,000     | 290,000    | 180,000    |
| Tea & cof-<br>fee, tons | 63,000     | 73,000     | 90,000     | 96,000     |
| Potatoes, }<br>tons     | 28,000     | 39,000     | 490,000    | 90,000     |
| Eggs, mill.             | 168        | 431        | 747        | 1,130      |
| Fish, tons              | 22,000     | 38,000     | 67,000     | 95,000     |

| Spirits, gall.          | 7,000,000  | 13,800,000 | 7,000,000  | 9,600,000  |
| Wine, ..                | 10,200,000 | 16,100,000 | 16,000,000 | 14,200,000 |

#### VALUES OF FOOD IMPORTS.

|                                   | 1860       | 1870       | 1880        | 1889        |
|-----------------------------------|------------|------------|-------------|-------------|
|                                   | £          | £          | £           | £           |
| Wheat . . . . .                   | 20,900,000 | 19,700,000 | 39,300,000  | 31,100,000  |
| Sugar . . . . .                   | 12,400,000 | 17,600,000 | 22,200,000  | 22,600,000  |
| Meat . . . . .                    | 4,400,000  | 7,700,000  | 26,600,000  | 31,600,000  |
| Butter . . . . .                  | 4,100,000  | 6,800,000  | 12,100,000  | 13,900,000  |
| Cheese . . . . .                  | 1,600,000  | 3,300,000  | 5,100,000   | 4,500,000   |
| Tea . . . . .                     | 5,900,000  | 9,000,000  | 8,800,000   | 8,400,000   |
| Coffee . . . . .                  | 1,200,000  | 800,000    | 1,300,000   | 1,100,000   |
| Rice . . . . .                    | 400,000    | 900,000    | 2,100,000   | 1,500,000   |
| Eggs . . . . .                    | 500,000    | 1,100,000  | 2,200,000   | 3,100,000   |
| Potatoes . . . . .                | 140,000    | 250,000    | 2,800,000   | 700,000     |
| Fish . . . . .                    | 400,000    | 800,000    | 1,700,000   | 2,600,000   |
| Fruit . . . . .                   | 1,900,000  | 2,200,000  | 5,500,000   | 6,100,000   |
| Spirits . . . . .                 | 1,300,000  | 2,800,000  | 1,500,000   | 1,700,000   |
| Wine . . . . .                    | 3,400,000  | 4,300,000  | 5,900,000   | 5,000,000   |
| Human food }<br>Oats, barley, &c. | 58,540,000 | 77,250,000 | 137,100,000 | 133,900,000 |
|                                   | 10,800,000 | 14,500,000 | 23,600,000  | 19,700,000  |
| Total . . . . .                   | 69,340,000 | 91,750,000 | 160,700,000 | 153,600,000 |

The weight of all food imports at the above dates was :—

|                | Human Food |                 | All Food   |                 |
|----------------|------------|-----------------|------------|-----------------|
|                | Tons       | Lbs. per Inhab. | Tons       | Lbs. per Inhab. |
| 1860 . . . . . | 2,202,000  | 170             | 3,560,000  | 280             |
| 1870 . . . . . | 3,062,000  | 218             | 5,270,000  | 380             |
| 1880 . . . . . | 5,901,000  | 380             | 9,840,000  | 630             |
| 1889 . . . . . | 7,160,000  | 420             | 10,910,000 | 640             |

The number of days in each year in which the population subsisted on native and on imported food was as follows :—

|                    | Wheat |      |      |      | Meat |      |      |      |
|--------------------|-------|------|------|------|------|------|------|------|
|                    | 1860  | 1870 | 1880 | 1889 | 1860 | 1870 | 1880 | 1889 |
| Native . . . . .   | 244   | 210  | 142  | 114  | 340  | 323  | 236  | 223  |
| Imported . . . . . | 122   | 155  | 224  | 251  | 26   | 42   | 130  | 142  |
| Total . . . . .    | 366   | 365  | 366  | 365  | 366  | 365  | 366  | 365  |

The number of people fed in those years on native and on imported food were :—

| Year           | Wheat      |            | Meat       |            |            |
|----------------|------------|------------|------------|------------|------------|
|                | Native     | Imported   | Native     | Imported   | Total      |
| 1860 . . . . . | 19,000,000 | 9,500,000  | 26,500,000 | 2,000,000  | 28,500,000 |
| 1870 . . . . . | 17,900,000 | 13,300,000 | 27,600,000 | 3,600,000  | 31,200,000 |
| 1880 . . . . . | 13,500,000 | 21,000,000 | 22,100,000 | 12,400,000 | 34,500,000 |
| 1889 . . . . . | 11,800,000 | 26,000,000 | 23,100,000 | 14,700,000 | 37,800,000 |

The importation of food from foreign countries has greatly diminished the expenditure of the nation in this regard, and thus enabled the masses to procure more food than before. Hence we find that, while the people are better fed, the annual outlay for the principal articles of food, per inhabitant, is much less than it has been for 30 years back. The more largely we import food the cheaper and more abundant the supply, which, moreover, accounts partly for the increasing span of life.

The following table shows approximately the annual expenditure on certain articles of food since 1830 :—

|         | Millions £ Sterling |      |               |       | Per Inhabitant    |
|---------|---------------------|------|---------------|-------|-------------------|
|         | Wheat               | Meat | Tea and Sugar | Total |                   |
| 1831-40 | 41                  | 40   | 8             | 89    | £ s. d.<br>3 12 0 |
| 1841-50 | 40                  | 42   | 9             | 91    | 3 7 0             |
| 1851-60 | 51                  | 50   | 15            | 116   | 4 2 0             |
| 1861-70 | 57                  | 59   | 26            | 142   | 4 15 0            |
| 1871-80 | 58                  | 83   | 32            | 173   | 5 5 0             |
| 1881-85 | 55                  | 102  | 30            | 187   | 5 4 0             |
| 1888    | 46                  | 80   | 31            | 157   | 4 5 0             |

If we consider collectively all the food, of whatever kind, for man and beast (except wines, liquors, and tobacco), the annual outlay for ten years ending 1885 averaged thus :—

|                          | Millions £ Sterling |          |       |
|--------------------------|---------------------|----------|-------|
|                          | Home-Grown          | Imported | Total |
| Grain . . . . .          | 68                  | 59       | 127   |
| Meat . . . . .           | 79                  | 25       | 104   |
| Dairy products . . . . . | 39                  | 16       | 55    |
| Sundries . . . . .       | 69                  | 18       | 87    |
| Tea, sugar, &c. . . . .  | ...                 | 40       | 40    |
| Total . . . . .          | 255                 | 158      | 413   |

The following table shows the net imports of grain for 130 years :—

| Period    | Tons per Annum | Lbs. per Inhabitant | Period  | Tons per Annum | Lbs. per Inhabitant |
|-----------|----------------|---------------------|---------|----------------|---------------------|
| 1760-90   | 25,000         | 5                   | 1851-60 | 1,950,000      | 154                 |
| 1791-1810 | 110,000        | 16                  | 1861-70 | 3,200,000      | 238                 |
| 1811-30   | 115,000        | 12                  | 1871-80 | 5,720,000      | 374                 |
| 1831-50   | 480,000        | 45                  | 1881-89 | 6,800,000      | 420                 |

The meat consumption of London (exclusive of tinned meats) was estimated at 100,000 tons in 1842, and 210,000 tons in 1882, being as 112 and 128 lbs. respectively per inhabitant.

French economists seem to over-estimate the production of pork, which they put at 140 lbs. yearly per pig. Adopting their figures for the past, and putting pigs in 1888 at 112 lbs., the production of meat was as follows :—

|                  | Tons    |         |           |           | Per Inhabitant, Lbs. |      |      |      |
|------------------|---------|---------|-----------|-----------|----------------------|------|------|------|
|                  | 1840    | 1860    | 1880      | 1888      | 1840                 | 1860 | 1880 | 1888 |
| Beef . . . . .   | 299,000 | 450,000 | 640,000   | 660,000   | 19                   | 27   | 37   | 37   |
| Mutton . . . . . | 82,000  | 114,000 | 210,000   | 250,000   | 5                    | 7    | 12   | 14   |
| Pork . . . . .   | 290,000 | 378,000 | 305,000   | 290,000   | 19                   | 23   | 18   | 16   |
| Total . . . . .  | 671,000 | 942,000 | 1,155,000 | 1,200,000 | 43                   | 57   | 67   | 67   |

## FRANCE

The production of wheat and meat has been as follows :—

| Year           | Tons      |           | Lbs. per Inhabitant |      |
|----------------|-----------|-----------|---------------------|------|
|                | Wheat     | Meat      | Wheat               | Meat |
| 1840 . . . . . | 4,900,000 | 670,000   | 326                 | 45   |
| 1860 . . . . . | 5,200,000 | 942,000   | 314                 | 60   |
| 1880 . . . . . | 7,200,000 | 1,200,000 | 440                 | 73   |
| 1888 . . . . . | 7,200,000 | 1,200,000 | 417                 | 70   |

The percentage of people fed on wheat, comparing Moreau's tables with our own time, appears as follows :—

| Year | Percentage Fed on |          | Year | Percentage Fed on |          |
|------|-------------------|----------|------|-------------------|----------|
|      | Wheat             | Rye, &c. |      | Wheat             | Rye, &c. |
| 1700 | 33                | 67       | 1818 | 45                | 55       |
| 1764 | 36                | 64       | 1839 | 60                | 40       |
| 1791 | 39                | 61       | 1888 | 86                | 14       |

The net annual importations of grain averaged approximately as follows :—

| Period            | Tons per Annum | Lbs. per Inhabitant |
|-------------------|----------------|---------------------|
| 1801-40 . . . . . | 14,000         | 1                   |
| 1841-60 . . . . . | 35,000         | 2                   |
| 1861-70 . . . . . | 79,000         | 4                   |
| 1871-80 . . . . . | 260,000        | 15                  |
| 1881-87 . . . . . | 1,460,000      | 84                  |

The weight and value of grain used for food in 1887 were approximately as follows :—

|                 | Tons      | Value, £   |
|-----------------|-----------|------------|
| Wheat . . . . . | 8,200,000 | 71,000,000 |
| Rye . . . . .   | 900,000   | 6,000,000  |
| Total . . . . . | 9,100,000 | 77,000,000 |

Mr. Neumann-Spallart estimated the meat-supply as follows :—

| Year           | Tons      |          |           | Lbs. per Inhabitant |
|----------------|-----------|----------|-----------|---------------------|
|                | Native    | Imported | Total     |                     |
| 1856 . . . . . | 835,000   | 38,000   | 873,000   | 54                  |
| 1867 . . . . . | 1,053,000 | 85,000   | 1,138,000 | 67                  |
| 1877 . . . . . | 1,200,000 | 117,000  | 1,317,000 | 78                  |

The average weight of animals in 1885 was nearly 50 per cent. greater than in 1847, viz:—

|                 | Weight in Lbs. |       |
|-----------------|----------------|-------|
|                 | 1847           | 1885  |
| Oxen . . . . .  | 700            | 1,030 |
| Cows . . . . .  | 500            | 740   |
| Sheep . . . . . | 50             | 80    |
| Goats . . . . . | 50             | 70    |
| Pigs . . . . .  | 200            | 224   |

In 1859 M. Lavergne compared the food consumption with what it was in 1789 thus:—

|                  | Consumption Lbs. per Head |      |
|------------------|---------------------------|------|
|                  | 1789                      | 1859 |
| Meat . . . . .   | 39                        | 61   |
| Wheat . . . . .  | 210                       | 330  |
| Rye, &c. . . . . | 280                       | 160  |

The food consumption of Paris, according to a statement published in 1838, was as follows:—

| Year | Population | Per Inhabitant |               |               |                 |
|------|------------|----------------|---------------|---------------|-----------------|
|      |            | Meat, Lbs.     | Wine, Bottles | Beer, Bottles | Brandy, Bottles |
| 1789 | 600,000    | 179            | 120           | 9             | 4               |
| 1817 | 714,000    | 150            | 114           | 11            | 6               |
| 1827 | 808,000    | 146            | 126           | 20            | 5               |
| 1837 | 842,000    | 128            | 111           | 13            | 11              |

In 1885 the consumption of food in French cities was as follows:—

| Cities                | Population | Tons    |         | Gallons, Millions |      | Lbs. per Head |      | Gallons per Head |      |
|-----------------------|------------|---------|---------|-------------------|------|---------------|------|------------------|------|
|                       |            | Bread   | Meat    | Wine              | Beer | Bread         | Meat | Wine             | Beer |
| Paris . . . . .       | 2,260,000  | 355,000 | 171,000 | 97.0              | 6.0  | 343           | 167  | 43               | 2.4  |
| Lyon . . . . .        | 350,000    | 55,000  | 25,000  | 1.4               | 0.6  | 348           | 176  | 42               | 1.8  |
| Marseilles . . . . .  | 270,000    | 58,000  | 18,000  | 1.1               | 0.6  | 464           | 143  | 43               | 2.0  |
| Bordeaux . . . . .    | 220,000    | 38,000  | 17,000  | 1.0               | 0.4  | 380           | 170  | 46               | 1.5  |
| Lille . . . . .       | 150,000    | 32,000  | 7,100   | 0.9               | 0.0  | 480           | 106  | 6                | 60.0 |
| Toulouse . . . . .    | 130,000    | 28,000  | 7,700   | 5.0               | 0.2  | 498           | 132  | 38               | 2.2  |
| Nantes . . . . .      | 120,000    | 34,000  | 5,600   | 4.0               | ...  | 627           | 104  | 33               | 0.7  |
| St. Etienne . . . . . | 110,000    | 18,000  | 5,700   | 4.0               | 0.4  | 348           | 110  | 41               | 1.3  |
| Havre . . . . .       | 110,000    | 20,000  | 5,500   | 0.9               | 0.4  | 411           | 114  | 8                | 4.0  |
| Rouen . . . . .       | 110,000    | 19,000  | 6,600   | 1.1               | 0.3  | 400           | 136  | 10               | 2.6  |
| Nice . . . . .        | 50,000     | 12,000  | 3,600   | 3.0               | 0.3  | 480           | 145  | 58               | 2.4  |
| Total . . . . .       | 3,880,000  | 669,000 | 272,800 | 119.4             | 18.2 | 385           | 154  | 31               | 5.0  |

Meat in the above table does not include live cattle introduced for consumption. Thus Paris also consumed 300,000 horned cattle, 1,900,000 sheep, and 250,000 pigs, equal to 130,000 tons of meat, which would bring up the total to 301,000 tons, say 295 lbs. per head.

There was, moreover, the following consumption of cider in certain cities, per head:—

|                 | Galls. |                  | Galls. |
|-----------------|--------|------------------|--------|
| Rouen . . . . . | 33.0   | Havre . . . . .  | 21.0   |
| Paris . . . . . | 3.5    | Nantes . . . . . | 3.5    |

The aggregate of 25 French cities, including those in the above table, showed as follows (pop. 4,780,000):—

|                         |             |                                |     |
|-------------------------|-------------|--------------------------------|-----|
| Bread, tons . . . . .   | 839,000     | Bread, lbs. per head . . . . . | 387 |
| Meat, " . . . . .       | 331,400     | Meat, " . . . . .              | 154 |
| Wine, gallons . . . . . | 178,000,000 | Wine, gallons " . . . . .      | 38  |
| Beer, " . . . . .       | 26,400,000  | Beer, " . . . . .              | 58  |

The average in the same cities in 1880 was: bread 449 lbs., meat 127, wine 35, beer 5 gallons per head. There has been, therefore, a decrease in bread, but an increase of meat and wine.

The consumption in Paris in 1880 was as follows:—

|                | Per Inhab. Lbs. |                                | Per Inhab. Lbs. |
|----------------|-----------------|--------------------------------|-----------------|
| Meat . . . . . | 187             | Butter and cheese . . . . .    | 18              |
| Fish . . . . . | 29              | Vegetables and fruit . . . . . | 660             |
| Fowl . . . . . | 24              | Coal . . . . .                 | 960             |

Also 127 eggs, 48 gallons wine, and 1½ gallon spirits.

The consumption of bread per inhabitant in Paris has declined as follows:—

| Year              | Lbs. | Year              | Lbs. |
|-------------------|------|-------------------|------|
| 1833-35 . . . . . | 392  | 1860-69 . . . . . | 361  |
| 1856-59 . . . . . | 345  | 1879 . . . . .    | 331  |

The consumption of game in Paris in 1888 was as follows:—

|                      | Native  | Imported  | Total     |
|----------------------|---------|-----------|-----------|
| Partridges . . . . . | 160,000 | 421,000   | 581,000   |
| Pheasants . . . . .  | 8,000   | 85,000    | 93,000    |
| Larks . . . . .      | 153,000 | 110,000   | 263,000   |
| Wild ducks . . . . . | 10,000  | 40,000    | 50,000    |
| Pigeons, &c. . . . . | 375,100 | 626,700   | 1,001,800 |
| Deer . . . . .       | 2,800   | 10,500    | 13,300    |
| Wild boars . . . . . | 300     | 1,400     | 1,700     |
| Total . . . . .      | 709,200 | 1,294,600 | 2,003,800 |

The urban population is much better fed than the rural, notwithstanding the fact that food is dearest in towns. The consumption of meat in French cities averages three times as much per head as in the rural departments.

The quantity of horse-flesh used for human food at Paris was only 400 tons in 1867, rising to 994 in 1872. The slaughter of horses for the city market was 4680 animals in 1874, and 9830 in 1883. The principal food imports into France since 1860 have been as follows:—

|                           | Annual Average of Value |            |            |
|---------------------------|-------------------------|------------|------------|
|                           | 1861-70                 | 1871-80    | 1881-87    |
| Grain . . . . .           | 6,300,000               | 15,800,000 | 14,300,000 |
| Cattle and meat . . . . . | 3,800,000               | 6,600,000  | 7,300,000  |
| Sugar . . . . .           | 4,800,000               | 4,200,000  | 3,700,000  |
| Wine . . . . .            | ...                     | 2,600,000  | 15,700,000 |

The meat-supply since 1850 has been approximately thus :—

| Period      | Tons Yearly |          |           | Pounds Per Inhab. |
|-------------|-------------|----------|-----------|-------------------|
|             | Native      | Imported | Total     |                   |
| 1851-60 . . | 840,000     | 40,000   | 880,000   | 50                |
| 1861-70 . . | 1,020,000   | 76,000   | 1,096,000 | 65                |
| 1871-80 . . | 1,100,000   | 110,000  | 1,210,000 | 74                |
| 1881-87 . . | 1,200,000   | 120,000  | 1,320,000 | 80                |

The consumption of coffee, sugar, wine, and beer per inhabitant was as follows, per annum :—

|                 | 1860-64 | 1870-74 | 1880-84 | 1887 |
|-----------------|---------|---------|---------|------|
| Coffee, oz. . . | 37      | 40      | 62      | 64   |
| Sugar, lbs. . . | 12      | 15      | 23      | 20   |
| Wine, galls. .  | 18      | 25      | 21      | 19   |
| Beer „ . . .    | 4       | 4       | 5       | 5    |

Professor Boch makes the consumption of sugar in 1860-64 only 8 lbs. per inhabitant yearly, but the French estimates of production and consumption make it 12 lbs.

#### GERMANY

The production of grain and meat, the former including what was used both for man and beast, has been approximately as follows :—

| Year | Tons       |           | Lbs. per Inhabitant |      |
|------|------------|-----------|---------------------|------|
|      | Grain      | Meat      | Grain               | Meat |
| 1816 | 5,000,000  | 600,000   | 440                 | 54   |
| 1837 | 7,500,000  | 760,000   | 560                 | 60   |
| 1852 | 11,200,000 | 890,000   | 750                 | 60   |
| 1875 | 14,300,000 | 1,280,000 | 740                 | 67   |
| 1887 | 16,000,000 | 1,375,000 | 745                 | 64   |

A statement published in Saxony in 1876 gave the meat consumption per head as follows :—

| Period  | Beef and Mutton |    | Pork | Total, Lbs. |
|---------|-----------------|----|------|-------------|
|         |                 |    |      |             |
| 1836-55 | 14              | 18 | 32   |             |
| 1856-65 | 18              | 26 | 44   |             |
| 1866-75 | 21              | 30 | 51   |             |
| 1875    | 26              | 34 | 60   |             |

The average in 1875 for all the towns of Saxony collectively was 68 lbs., for rural districts 47 lbs. per inhabitant. In 1870 the consumption in various cities was as follows :—

| Pounds per Inhabitant |                  |                 |  |  |
|-----------------------|------------------|-----------------|--|--|
| Berlin . . . 99       | Cologne . . 104  | Hamburg . . 92  |  |  |
| Bremen . . 113        | Dresden . . 104  | Leipzig . . 164 |  |  |
| Breslau . . 94        | Dusseldorf . 104 | Magdeburg . 102 |  |  |
| Coblenz . . 104       | Frankfort . 171  | Munich . . 166  |  |  |

The net imports of grain and meat into Germany were :—

| Year | Tons      |        | Lbs. per Inhabitant |      |
|------|-----------|--------|---------------------|------|
|      | Grain     | Meat   | Grain               | Meat |
| 1873 | 800,000   | 30,000 | 40                  | 2    |
| 1880 | 700,000   | ...    | 35                  | ...  |
| 1887 | 1,900,000 | 10,000 | 90                  | 1    |

The weight and value of grain used for food were in 1887 approximately as follows :—

|               | Tons       | Value, £   |
|---------------|------------|------------|
| Wheat . . .   | 3,000,000  | 21,000,000 |
| Rye . . .     | 6,000,000  | 34,000,000 |
| Oats, &c. . . | 1,200,000  | 7,000,000  |
| Total . . .   | 10,200,000 | 62,000,000 |

The consumption of potatoes is large, averaging 1020 lbs. yearly per inhabitant.

The consumption of grain according to Spallart in the years 1881-84 averaged thus :—

|              | Millions of Bushels |          |       | Lbs. per Inhabitant |
|--------------|---------------------|----------|-------|---------------------|
|              | Native              | Imported | Total |                     |
| Wheat . . .  | 81                  | 21       | 102   | 132                 |
| Rye . . .    | 193                 | 29       | 222   | 290                 |
| Barley . . . | 76                  | 14       | 90    | 120                 |
| Oats . . .   | 138                 | 11       | 149   | 200                 |
| Total . . .  | 488                 | 75       | 563   | 742                 |

The consumption of secondary articles was as follows :—

| Year | Consumption per Inhabitant |              |                    |              |               |
|------|----------------------------|--------------|--------------------|--------------|---------------|
|      | Sugar, Lbs.                | Coffee, Lbs. | Foreign Fish, Lbs. | Tobacco, Oz. | Beer, Gallons |
| 1873 | 14                         | 5.0          | 4                  | 72           | 18            |
| 1880 | 14                         | 4.8          | 4                  | 35           | 18            |
| 1887 | 18                         | 4.6          | 7                  | 50           | 18            |

The only articles of which Germany has a surplus for exportation are sugar and butter, viz. :—

| Year       | Tons Exported |         | Value, £  |           |
|------------|---------------|---------|-----------|-----------|
|            | Butter        | Sugar   | Butter    | Sugar     |
| 1873 . . . | 12,000        | 13,000  | 1,200,000 | 440,000   |
| 1880 . . . | 12,000        | 250,000 | 1,050,000 | 5,500,000 |
| 1887 . . . | 15,000        | 620,000 | 1,100,000 | 9,050,000 |

The net importation of wine averages 10 million gallons, and the exportation of beer 30 million gallons yearly.

The following table shows the consumption of imported food since 1836 :—

| Period  | Tons Yearly |        | Barrels Fish | Lbs. per Inhabitant |      |      |
|---------|-------------|--------|--------------|---------------------|------|------|
|         | Coffee      | Rice   |              | Coffee              | Rice | Fish |
| 1836-40 | 27,000      | 5,000  | 190,000      | 2.2                 | 0.4  | 2.4  |
| 1841-50 | 37,000      | 11,000 | 265,000      | 2.8                 | 0.8  | 3.1  |
| 1851-60 | 54,000      | 30,000 | 295,000      | 3.7                 | 2.1  | 3.1  |
| 1861-70 | 74,000      | 36,000 | 460,000      | 4.4                 | 2.2  | 4.2  |
| 1871-80 | 97,000      | 68,000 | 690,000      | 5.0                 | 3.5  | 5.3  |
| 1881-85 | 111,000     | 83,000 | 915,000      | 5.4                 | 4.0  | 6.6  |
| 1887    | 102,000     | 83,000 | 1,095,000    | 5.3                 | 3.8  | 8.0  |

#### RUSSIA.

This is a great food-producing country, with a constant surplus for exportation. The production of all kinds of grain and of meat has been approximately as follows :—

| Year       | Tons       |           | Lbs. per Inhab. |      |
|------------|------------|-----------|-----------------|------|
|            | Grain      | Meat      | Grain           | Meat |
| 1835 . . . | 26,000,000 | 1,430,000 | 1,210           | 67   |
| 1850 . . . | 31,000,000 | 1,670,000 | 1,270           | 67   |
| 1870 . . . | 36,000,000 | 1,760,000 | 1,220           | 60   |
| 1887 . . . | 47,500,000 | 1,885,000 | 1,260           | 51   |

Exports of grain and meat have been as follows, per annum :—

| Period         | Tons      |        | Value, £   |
|----------------|-----------|--------|------------|
|                | Grain     | Meat   |            |
| 1830-13 . . .  | 250,000   | ...    | 2,000,000  |
| 1834-40 . . .  | 700,000   | ...    | 4,200,000  |
| 1841-47 . . .  | 800,000   | ...    | 4,800,000  |
| 1861 . . . . . | 1,400,000 | 4,000  | 9,200,000  |
| 1870 . . . . . | 3,050,000 | 16,000 | 20,800,000 |
| 1887 . . . . . | 6,100,000 | 31,000 | 31,700,000 |

The exports of grain, taken from official returns, were :—

| Period        | Millions of Bushels Yearly |     |        |           |       | Value, £   |
|---------------|----------------------------|-----|--------|-----------|-------|------------|
|               | Wheat                      | Rye | Barley | Oats, &c. | Total |            |
| 1851-60 . . . | 20                         | 7   | 3      | 6         | 36    | 5,500,000  |
| 1861-70 . . . | 36                         | 10  | 4      | 9         | 59    | 10,100,000 |
| 1871-80 . . . | 59                         | 43  | 12     | 43        | 157   | 27,700,000 |
| 1881-87 . . . | 70                         | 40  | 24     | 60        | 194   | 29,000,000 |

It would seem that the home consumption has only kept pace with population. For human food, wheat and rye are mainly used. The consumption per head was as follows :—

| Year           | Pounds per Head |          |       |
|----------------|-----------------|----------|-------|
|                | Wheat           | Rye, &c. | Total |
| 1861 . . . . . | 124             | 556      | 680   |
| 1870 . . . . . | 118             | 552      | 670   |
| 1880 . . . . . | 122             | 538      | 660   |
| 1887 . . . . . | 110             | 530      | 640   |

The consumption of secondary articles was as follows :—

| Year           | Tons    |        |        |                    | Per Inhabitant |             |          |                    |
|----------------|---------|--------|--------|--------------------|----------------|-------------|----------|--------------------|
|                | Sugar   | Coffee | Tea    | Foreign Salt, Lbs. | Sugar, Lbs.    | Coffee, Oz. | Tea, Oz. | Foreign Salt, Lbs. |
| 1860 . . . . . | 146,000 | 6,000  | 4,000  | 150,000            | 6              | 3           | 2        | 6                  |
| 1870 . . . . . | 200,000 | 7,000  | 9,000  | 170,000            | 7              | 4           | 5        | 6                  |
| 1880 . . . . . | 250,000 | 8,000  | 18,000 | 150,000            | 8              | 4           | 9        | 5                  |
| 1887 . . . . . | 410,000 | 5,000  | 10,000 | 150,000            | 11             | 2           | 4        | 4                  |

Russia produces more sugar than she needs, and exports 60,000 tons. Her consumption of wine averages 30 million gallons, of which 25 millions are grown at home. The quantity and value of grain used for food in 1887 were as follows :—

|                   | Tons       | Value, £   |
|-------------------|------------|------------|
|                   |            |            |
| Wheat . . . . .   | 4,200,000  | 21,000,000 |
| Rye . . . . .     | 14,500,000 | 61,000,000 |
| Oats, &c. . . . . | 4,300,000  | 15,000,000 |
| Total . . . . .   | 23,000,000 | 97,000,000 |

#### AUSTRIA-HUNGARY.

The production of grain and meat was as follows :—

|                | Million Tons |           | Lbs. per Inhab. |      |
|----------------|--------------|-----------|-----------------|------|
|                | Grain        | Meat      | Grain           | Meat |
| 1836 . . . . . | 9,100,000    | 990,000   | 750             | 79   |
| 1850 . . . . . | 13,700,000   | 980,000   | 840             | 73   |
| 1870 . . . . . | 12,500,000   | 1,080,000 | 780             | 68   |
| 1887 . . . . . | 18,000,000   | 1,080,000 | 1,040           | 63   |

The average consumption of grain and meat has steadily decreased per head, but that of potatoes has increased, the last crop reaching 7,500,000 tons, or 3½ bushels per inhabitant.

The production and consumption of grain has been as follows :—

| Year           | Millions of Bushels |      |          |      |             |       |
|----------------|---------------------|------|----------|------|-------------|-------|
|                | Crop                | Seed | Exported | Food | Cattle, &c. | Total |
| 1835 . . . . . | 1,040               | 160  | 28       | 670  | 182         | 1,040 |
| 1850 . . . . . | 1,240               | 190  | 32       | 750  | 268         | 1,240 |
| 1870 . . . . . | 1,450               | 220  | 122      | 800  | 308         | 1,450 |
| 1887 . . . . . | 1,900               | 290  | 244      | 926  | 440         | 1,900 |

The production and consumption of wheat are shown approximately thus :—

| Year           | Millions of Bushels |      |          |      |       |
|----------------|---------------------|------|----------|------|-------|
|                | Crop                | Seed | Exported | Food | Total |
| 1861 . . . . . | 180                 | 30   | 29       | 121  | 180   |
| 1870 . . . . . | 217                 | 36   | 55       | 126  | 217   |
| 1880 . . . . . | 220                 | 37   | 35       | 148  | 220   |
| 1887 . . . . . | 270                 | 45   | 75       | 150  | 270   |

The quantities of wheat, rye, oats, &c., retained for home consumption have been approximately as follows :—

| Year           | Millions of Bushels |     |      |            |       | Bushels per Inhabitant |
|----------------|---------------------|-----|------|------------|-------|------------------------|
|                | Wheat               | Rye | Oats | Maize, &c. | Total |                        |
| 1861 . . . . . | 121                 | 454 | 442  | 43         | 1,060 | 18                     |
| 1870 . . . . . | 126                 | 475 | 450  | 57         | 1,108 | 17                     |
| 1880 . . . . . | 148                 | 505 | 475  | 112        | 1,240 | 16½                    |
| 1887 . . . . . | 150                 | 550 | 460  | 206        | 1,366 | 16                     |

The exports of grain, meat, and sugar were as follows :—

| Year           | Tons    |        |         | Value, £   |
|----------------|---------|--------|---------|------------|
|                | Grain   | Meat   | Sugar   |            |
| 1860 . . . . . | 400,000 | 15,000 | ...     | 3,400,000  |
| 1870 . . . . . | 620,000 | 20,000 | 64,000  | 7,900,000  |
| 1880 . . . . . | 900,000 | 72,000 | 240,000 | 20,100,000 |
| 1887 . . . . . | 800,000 | 40,000 | 220,000 | 12,200,000 |

The disposal approximately of all grain was as follows :—

| Year           | Millions of Bushels |      |          |             |       |
|----------------|---------------------|------|----------|-------------|-------|
|                | Crop                | Seed | Exported | Consumption | Total |
| 1870 . . . . . | 500                 | 70   | 25       | 405         | 500   |
| 1880 . . . . . | 600                 | 85   | 36       | 479         | 600   |
| 1887 . . . . . | 717                 | 102  | 32       | 583         | 717   |

The weight and value of grain consumed for food in 1887 were approximately as follows :—

|                       | Tons      | Value, £   |
|-----------------------|-----------|------------|
| Wheat . . . . .       | 4,300,000 | 30,000,000 |
| Rye . . . . .         | 3,300,000 | 18,000,000 |
| Other grain . . . . . | 800,000   | 4,000,000  |
|                       | <hr/>     | <hr/>      |
| Total . . . . .       | 8,400,000 | 52,000,000 |

The production and consumption of wine were as follows :—

|             | Millions of Gallons Yearly |          |          | Gallons per Inhab. |
|-------------|----------------------------|----------|----------|--------------------|
|             | Vintage                    | Exported | Consumed |                    |
| 1876-85 . . | 198                        | 8        | 190      | 5                  |
| 1887 . . .  | 212                        | 14       | 198      | 5                  |

The consumption of sugar and coffee was approximately as follows :—

| Year       | Tons    |        | Per Inhab.  |             |
|------------|---------|--------|-------------|-------------|
|            | Sugar   | Coffee | Sugar, Lbs. | Coffee, Oz. |
| 1860 . . . | 60,000  | 20,000 | 4           | 20          |
| 1870 . . . | 100,000 | 27,000 | 6           | 26          |
| 1880 . . . | 230,000 | 31,000 | 14          | 29          |
| 1887 . . . | 305,000 | 32,000 | 18          | 28          |

Austria consumes only 60 per cent. of the sugar she produces, exporting over 200,000 tons yearly.

The exports of food from Italy were as follows :—

|                        | Per Annum |         |         | Value, £  |            |            |
|------------------------|-----------|---------|---------|-----------|------------|------------|
|                        | 1861-70   | 1871-80 | 1881-87 | 1861-70   | 1871-80    | 1881-87    |
| Meat, tons . . .       | 16,000    | 38,000  | 30,000  | 800,000   | 1,900,000  | 1,520,000  |
| Rice " . . .           | 61,000    | 68,000  | 73,000  | 960,000   | 840,000    | 1,020,000  |
| Fruit " . . .          | 75,000    | 96,000  | 105,000 | 1,500,000 | 1,400,000  | 1,800,000  |
| Eggs, millions . .     | 71        | 320     | 480     | 110,000   | 680,000    | 1,300,000  |
| Oil, million gallons . | 13        | 17      | 16      | 3,100,000 | 4,300,000  | 3,200,000  |
| Wine " . . .           | 6         | 14      | 48      | 480,000   | 900,000    | 2,800,000  |
| Total . . .            | ...       | ...     | ...     | 6,950,000 | 10,020,000 | 11,640,000 |

The consumption of wine, grain, and meat was :—

|                      | Yearly per Inhabitant |         |         |
|----------------------|-----------------------|---------|---------|
|                      | 1861-70               | 1871-80 | 1881-87 |
| Wine, gallons. . . . | 16                    | 20      | 18      |
| Grain, lbs. . . . .  | 420                   | 424     | 455     |
| Meat, " . . . . .    | 23                    | 24      | 26      |

The weight and value of grain consumed for food in 1887 were approximately as follows :—

|                    | Tons      | Value, £   |
|--------------------|-----------|------------|
| Wheat . . . . .    | 3,000,000 | 24,000,000 |
| Rye . . . . .      | 400,000   | 3,000,000  |
| Maize, &c. . . . . | 1,900,000 | 12,000,000 |
| Total . . . . .    | 5,300,000 | 39,000,000 |

#### SPAIN

The production of grain and meat was apparently thus :—

| Year | Tons      |         | Lbs. per Inhabitant |      |
|------|-----------|---------|---------------------|------|
|      | Grain     | Meat    | Grain               | Meat |
| 1826 | 3,400,000 | 405,000 | 560                 | 77   |
| 1886 | 7,500,000 | 525,000 | 1,050               | 71   |

This is supposing official figures to be correct, but it is remarkable that in recent years Spain has largely imported grain, which would be apparently unnecessary if

#### ITALY

Notwithstanding her fertile soil, Italy produces an insufficient food-supply, except as regards wine and fruit. The production of grain and meat was approximately as follows :—

| Year | Tons      |         | Lbs. per Inhabitant |      |
|------|-----------|---------|---------------------|------|
|      | Grain     | Meat    | Grain               | Meat |
| 1828 | 2,900,000 | 330,000 | 380                 | 44   |
| 1840 | 3,200,000 | 300,000 | 385                 | 35   |
| 1874 | 5,100,000 | 300,000 | 403                 | 24   |
| 1886 | 5,600,000 | 360,000 | 426                 | 28   |

The net imports of sundry articles of food was as follows :—

|        | Per Annum, Tons |         |         | Lbs. per Inhabitant |         |         |
|--------|-----------------|---------|---------|---------------------|---------|---------|
|        | 1861-70         | 1871-80 | 1881-87 | 1861-70             | 1871-80 | 1881-87 |
| Grain  | 252,000         | 160,000 | 390,000 | 22                  | 14      | 30      |
| Sugar  | 61,000          | 78,000  | 98,000  | 5                   | 7       | 8       |
| Fish . | 25,000          | 39,000  | 43,000  | 2                   | 3½      | 3½      |
| Cheese | 5,000           | 7,000   | 10,000  | 7 oz.               | 9 oz.   | 12 oz.  |
| Coffee | 11,000          | 13,000  | 16,000  | 15 oz.              | 17 oz.  | 20 oz.  |

each inhabitant produced half a ton, as above. The net imports of grain have averaged yearly as follows :—

| Period            | Tons    | Lbs. per Inhab. |
|-------------------|---------|-----------------|
| 1880-82 . . . . . | 73,000  | 10              |
| 1883-85 . . . . . | 122,000 | 16              |
| 1886-87 . . . . . | 208,000 | 28              |

Before 1880 there was always a surplus of grain for exportation, viz. :—

| Period            | Tons Yearly | Value, £  |
|-------------------|-------------|-----------|
| 1863-68 . . . . . | 72,000      | 900,000   |
| 1872-75 . . . . . | 144,000     | 1,550,000 |
| 1876-79 . . . . . | 26,000      | 300,000   |

The imports of minor articles were as follows :—

|             | 1860      | 1872      | 1880      | 1887      |
|-------------|-----------|-----------|-----------|-----------|
| Cocoa, tons | 4,000     | 6,000     | 8,000     | 7,000     |
| Sugar "     | 32,000    | 35,000    | 44,000    | 53,000    |
| Fish "      | 20,000    | 34,000    | 28,000    | 46,000    |
| Value, £ "  | 2,000,000 | 2,000,000 | 2,200,000 | 2,900,000 |

The imports and exports of live cattle in recent years were equal. The food exports were as follows :—

|                    | 1860      | 1872      | 1880       | 1887       |
|--------------------|-----------|-----------|------------|------------|
| Wine, mill. galls. | 22        | 44        | 138        | 183        |
| Oil "              | 1         | 5         | 4          | 3          |
| Fruit, tons . . .  | ...       | 120,000   | 150,000    | 160,000    |
| Salt "             | ...       | 220,000   | 320,000    | 220,000    |
| Aggreg. value, £   | 3,400,000 | 9,600,000 | 12,400,000 | 13,800,000 |

## PORTUGAL

The production of grain and meat was as follows :—

| Year | Tons      |        | Lbs. per Inhabitant |      |
|------|-----------|--------|---------------------|------|
|      | Grain     | Meat   | Grain               | Meat |
| 1828 | 520,000   | 70,000 | 340                 | 46   |
| 1868 | 770,000   | 77,000 | 410                 | 41   |
| 1886 | 1,000,000 | 95,000 | 510                 | 49   |

There is a constant deficit of grain, but a small surplus of meat for exportation. The imported food averaged thus :—

|            | Tons Yearly |         | Lbs. per Inhabitant |         |
|------------|-------------|---------|---------------------|---------|
|            | 1872-75     | 1884-87 | 1872-75             | 1884-87 |
| Grain . .  | 42,000      | 135,000 | 22                  | 69      |
| Rice . .   | 8,500       | 14,000  | 4                   | 7       |
| Sugar . .  | 16,000      | 24,000  | 8                   | 12      |
| Coffee . . | 2,000       | 2,500   | 15 oz.              | 18 oz.  |
| Fish . .   | 16,000      | 22,000  | 8 lbs.              | 11 lbs. |

Exports of food averaged as follows :—

|                     | Yearly     |            |
|---------------------|------------|------------|
|                     | 1872-75    | 1884-87    |
| Wine, gallons . . . | 11,200,000 | 31,400,000 |
| Oil . . .           | 900,000    | 230,000    |
| Fruit, tons . . .   | 440,000    | 130,000    |
| Meat . . .          | 4,000      | 1,300      |
| Salt . . .          | 230,000    | 120,000    |

The consumption of food per inhabitant is about 500 lbs. grain, 48 lbs. meat, 11 lbs. fish, 12 lbs. sugar, and 14 gallons of wine.

The weight and value of grain consumed for food in 1887 were :—

|                   | Tons    | Value, £  |
|-------------------|---------|-----------|
| Wheat . . .       | 300,000 | 2,400,000 |
| Rye . . .         | 300,000 | 1,800,000 |
| Other grain . . . | 300,000 | 1,700,000 |
| Total . . .       | 900,000 | 5,900,000 |

## SWEDEN

The production of grain and meat was as follows :—

| Year | Tons      |         | Lbs. per Inhabitant |      |
|------|-----------|---------|---------------------|------|
|      | Grain     | Meat    | Grain               | Meat |
| 1837 | 350,000   | 106,001 | 280                 | 78   |
| 1886 | 2,510,000 | 140,000 | 1,100               | 62   |

There is a surplus of grain, the net exports averaging as follows per annum :—

| Period        | Tons    |
|---------------|---------|
| 1860-64 . . . | 205,000 |
| 1876-80 . . . | 290,000 |
| 1882-86 . . . | 140,000 |

The meat-supply is sufficient and no more, the export of live cattle being equivalent to 10,000 tons of meat yearly, which is just the quantity of pork ordinarily imported. There is a constant surplus of butter, the export of which has increased of late years, the annual average showing :—

| Period        | Tons   |
|---------------|--------|
| 1876-80 . . . | 4,000  |
| 1883-86 . . . | 10,500 |

The consumption of imported articles shows thus :—

|            | Tons Yearly |         |         | Lbs. per Inhabitant |         |         |
|------------|-------------|---------|---------|---------------------|---------|---------|
|            | 1860-62     | 1870-72 | 1884-86 | 1860-62             | 1870-72 | 1884-86 |
| Coffee . . | 7,000       | 8,500   | 15,000  | 4                   | 4       | 7       |
| Rice . .   | 1,400       | 2,200   | 9,200   | 1                   | 1       | 4       |
| Sugar . .  | 18,000      | 21,000  | 47,000  | 10                  | 11      | 22      |
| Salt . .   | 40,000      | 55,000  | 64,000  | 22                  | 30      | 28      |

The weight and value of grain used for food in 1887 were approximately as follows :—

|                   | Tons      | Value, £  |
|-------------------|-----------|-----------|
| Wheat . . .       | 300,000   | 2,100,000 |
| Rye . . .         | 700,000   | 4,600,000 |
| Other grain . . . | 200,000   | 1,200,000 |
| Total . . .       | 1,200,000 | 7,900,000 |

## NORWAY

The production of grain and meat was as follows :—

| Year       | Tons    |        | Lbs. per Inhabitant |      |
|------------|---------|--------|---------------------|------|
|            | Grain   | Meat   | Grain               | Meat |
| 1835 . . . | 170,000 | 44,000 | 320                 | 80   |
| 1855 . . . | 370,000 | 64,000 | 540                 | 95   |
| 1875 . . . | 400,000 | 67,000 | 470                 | 78   |

The net importation of grain has been as follows :—

| Period        | Tons Yearly | Lbs. per Inhabitant |
|---------------|-------------|---------------------|
| 1861-70 . . . | 145,000     | 200                 |
| 1871-80 . . . | 205,000     | 245                 |
| 1881-87 . . . | 220,000     | 240                 |

The only food exported is fish, the average showing thus :—

| Period        | Tons Yearly | Value, £  |
|---------------|-------------|-----------|
| 1861-70 . . . | 124,000     | ...       |
| 1871-80 . . . | 123,000     | 1,900,000 |
| 1881-87 . . . | 135,000     | 1,950,000 |

The consumption of some articles of importation was :—

|            | Tons Yearly |         | Lbs. per Inhabitant |         |
|------------|-------------|---------|---------------------|---------|
|            | 1860-62     | 1885-87 | 1860-62             | 1885-87 |
| Coffee . . | 5,000       | 7,300   | 7                   | 9       |
| Sugar . .  | 5,500       | 11,000  | 7                   | 13      |
| Meat . .   | 400         | 6,000   | ...                 | 7       |
| Salt . .   | 69,000      | 80,000  | 84                  | 92      |

Potatoes are much used, the consumption averaging 500 lbs. per inhabitant, all home-grown.

The weight and value of grain consumed in 1887 were approximately :—

|                   | Tons    | Value, £  |
|-------------------|---------|-----------|
| Wheat . . .       | 100,000 | 800,000   |
| Rye . . .         | 200,000 | 1,300,000 |
| Other grain . . . | 100,000 | 600,000   |
| Total . . .       | 400,000 | 2,700,000 |

## DENMARK.

The production of grain and meat was as follows :—

| Year       | Tons      |         | Lbs. per Inhab. |      |
|------------|-----------|---------|-----------------|------|
|            | Grain     | Meat    | Grain           | Meat |
| 1866 . . . | 1,750,000 | 98,000  | 2,280           | 127  |
| 1886 . . . | 2,150,000 | 115,000 | 2,400           | 128  |

The net exports of grain and meat averaged thus :—

| Period            | Tons Yearly |        |
|-------------------|-------------|--------|
|                   | Grain       | Meat   |
| 1865-70 . . . . . | 263,000     | 17,000 |
| 1875-80 . . . . . | 185,000     | 38,000 |
| 1883-87 . . . . . | ...         | 58,000 |

In the last period of five years there was an average importation of 10,000 tons grain yearly over and above exports. Instead of growing more than her needs, Denmark has now to rely partly on imported grain. Butter is largely exported, viz. :—

| Year           | Tons   |
|----------------|--------|
| 1874 . . . . . | 13,000 |
| 1887 . . . . . | 24,000 |

So far back as 1830 Denmark exported 5000 tons of butter and 9000 tons of cheese.

The consumption of imported articles was as follows :—

|              | Tons Yearly |         | Lbs. per Inhab. |         |
|--------------|-------------|---------|-----------------|---------|
|              | 1865-67     | 1885-87 | 1865-67         | 1885-87 |
| Coffee . . . | 6,300       | 8,500   | 9               | 9       |
| Sugar . . .  | 16,400      | 21,000  | 22              | 22      |
| Rice . . .   | 4,000       | 14,000  | 5               | 14      |
| Salt . . .   | 14,500      | 25,000  | 19              | 25      |

The consumption of potatoes averages 410 lbs. per inhabitant.

The weight and value of grain used for food in 1887 were approximately thus :—

|                 | Tons    | Value, £  |
|-----------------|---------|-----------|
| Wheat . . . . . | 200,000 | 1,600,000 |
| Rye . . . . .   | 400,000 | 2,400,000 |

## HOLLAND

The production of grain and meat was approximately as follows :—

| Year       | Tons      |         | Lbs. per Inhabitant |      |
|------------|-----------|---------|---------------------|------|
|            | Grain     | Meat    | Grain               | Meat |
| 1828 . . . | 400,000   | 96,000  | 290                 | 70   |
| 1860 . . . | 600,000   | 104,000 | 360                 | 62   |
| 1884 . . . | 1,000,000 | 125,000 | 550                 | 69   |

Holland has never grown enough grain for her requirements, the net imports averaging yearly as follows :—

|                   | Tons    | Value, £  |
|-------------------|---------|-----------|
| 1861-70 . . . . . | 180,000 | 2,400,000 |
| 1871-80 . . . . . | 370,000 | 3,400,000 |
| 1881-87 . . . . . | 460,000 | 4,400,000 |

The other food imports show as follows, net, per annum :—

|              | Tons    |         | Lbs. per Inhabitant |         |
|--------------|---------|---------|---------------------|---------|
|              | 1861-63 | 1885-87 | 1861-63             | 1885-87 |
| Coffee . . . | 13,000  | 27,000  | 9                   | 15      |
| Sugar . . .  | 17,000  | 18,000  | 12                  | 10      |
| Rice . . .   | 24,000  | 75,000  | 17                  | 40      |
| Lard . . .   | ...     | 62,000  | ...                 | 34      |

Holland produces about 45,000 tons of beet-sugar per annum, so that the consumption of sugar is about 63,000 tons, or 35 lbs. per inhabitant. The consumption of lard is supposed to be in great measure for making better or oleo-margarine.

The exports of food are as follows :—

|              | Tons Yearly |         | Value, £  |           |
|--------------|-------------|---------|-----------|-----------|
|              | 1861-63     | 1885-87 | 1861-63   | 1885-87   |
| Meat . . .   | 14,000      | 20,000  | 700,000   | 1,050,000 |
| Butter . . . | 16,000      | 71,000  | 1,050,000 | 4,500,000 |
| Cheese . . . | 28,000      | 32,000  | 800,000   | 900,000   |

The consumption of potatoes is 820 lbs. per inhabitant yearly.

The weight and value of grain used for food in 1887 were approximately thus :—

|                       | Tons      | Value, £  |
|-----------------------|-----------|-----------|
| Wheat . . . . .       | 500,000   | 4,000,000 |
| Rye . . . . .         | 400,000   | 2,800,000 |
| Other grain . . . . . | 200,000   | 1,200,000 |
| Total . . . . .       | 1,100,000 | 8,000,000 |

## BELGIUM

The production of grain and meat was approximately thus :—

| Year       | Tons      |         | Lbs. per Inhabitant |      |
|------------|-----------|---------|---------------------|------|
|            | Grain     | Meat    | Grain               | Meat |
| 1828 . . . | 820,000   | 70,000  | 530                 | 45   |
| 1856 . . . | 1,720,000 | 90,000  | 970                 | 51   |
| 1866 . . . | 1,750,000 | 106,000 | 890                 | 54   |
| 1886 . . . | 1,850,000 | 110,000 | 750                 | 43   |

The net imports of grain have averaged thus :—

| Period            | Tons Yearly | Lbs. per Inhabitant |
|-------------------|-------------|---------------------|
| 1861-70 . . . . . | 270,000     | 140                 |
| 1871-80 . . . . . | 860,000     | 380                 |
| 1881-87 . . . . . | 1,230,000   | 505                 |

It appears that 40 per cent. of the grain consumed is imported from other countries.

The imports of meat averaged thus :—

| Period            | Tons Yearly | Lbs. per Inhabitant |
|-------------------|-------------|---------------------|
| 1861-70 . . . . . | 12,000      | 7                   |
| 1871-80 . . . . . | 61,000      | 27                  |
| 1881-87 . . . . . | 56,000      | 22                  |

Minor articles of import are as follows :—

|              | Quantity Yearly |           | Per Inhabitant |         |
|--------------|-----------------|-----------|----------------|---------|
|              | 1860-62         | 1885-87   | 1860-62        | 1885-87 |
| Coffee, tons | 20,000          | 24,000    | 12 lbs.        | 9 lbs.  |
| Wine, galls. | 2,600,000       | 8,700,000 | 0.6            | 1.5     |

Butter and sugar are exported, the averages showing thus :—

|                    | 1860-62 | 1870-72 | 1885-87 |
|--------------------|---------|---------|---------|
| Butter, tons . . . | ...     | 4,500   | 4,200   |
| Sugar „ . . .      | 1,700   | 56,000  | 62,000  |

The production of beet-sugar is 130,000 tons yearly, the consumption about 70,000 tons, or 27 lbs. per inhabitant. Potatoes are largely used, the average being 1050 lbs. yearly per inhabitant.

The weight and value of grain used for food in 1887 were approximately thus:—

|                     | Tons      | Value, £   |
|---------------------|-----------|------------|
| Wheat . . . .       | 800,000   | 6,800,000  |
| Rye . . . . .       | 600,000   | 4,200,000  |
| Other grain . . . . | 200,000   | 1,200,000  |
| Total . . . . .     | 1,600,000 | 12,200,000 |

## SWITZERLAND

The consumption of grain and meat in the years 1883-87 averaged as follows:—

|                 | Tons    |           |         | Lbs. per Inhabitant |           |       |
|-----------------|---------|-----------|---------|---------------------|-----------|-------|
|                 | Native  | Im-ported | Total   | Native              | Im-ported | Total |
| Grain . . . . . | 450,000 | 390,000   | 840,000 | 330                 | 300       | 630   |
| Meat . . . . .  | 68,000  | 15,000    | 83,000  | 51                  | 11        | 62    |

The importation of grain is more than treble what it was before 1855, viz. :—

| Period          | Tons per Annum | Lbs. per Inhabitant |
|-----------------|----------------|---------------------|
| 1851-55 . . . . | 120,000        | 103                 |
| 1876-80 . . . . | 320,000        | 231                 |
| 1883-87 . . . . | 390,000        | 300                 |

Three-fourths of the imported grain is wheat, the remainder maize and oats.

Other imported articles in the same years averaged:—

|                    | Quantity   | Lbs. per Inhab. |
|--------------------|------------|-----------------|
| Coffee, tons . . . | 9,200      | 7               |
| Sugar, „ . . . .   | 34,000     | 26              |
| Rice „ . . . . .   | 6,800      | 5               |
| Wine, gallons . .  | 12,000,000 | galls. 4        |

Cheese and condensed milk are exported, the average being:—

|                  | Tons Yearly | Value, £  |
|------------------|-------------|-----------|
| Cheese . . . . . | 26,000      | 1,600,000 |
| Milk . . . . .   | 13,000      | 480,000   |

The consumption of wine averaged 14 gallons yearly per inhabitant.

## GREECE

The consumption of grain and meat averaged thus:—

|                 | Tons    |           |         | Lbs. per Inhabitant |           |       |
|-----------------|---------|-----------|---------|---------------------|-----------|-------|
|                 | Native  | Im-ported | Total   | Native              | Im-ported | Total |
| Grain . . . . . | 450,000 | 130,000   | 580,000 | 560                 | 170       | 730   |
| Meat . . . . .  | 43,000  | 4,000     | 47,000  | 50                  | 5         | 55    |

## UNITED STATES

The production of the principal articles of food was:—

| Year           | Tons       |           |         |        |           |         |         |
|----------------|------------|-----------|---------|--------|-----------|---------|---------|
|                | Grain      | Meat      | Sugar   | Rice   | Potatoes  | Butter  | Cheese  |
| 1840 . . . . . | 15,400,000 | 2,050,000 | 70,000  | 36,000 | 2,700,000 | ...     | ...     |
| 1850 . . . . . | 21,700,000 | 2,390,000 | 110,000 | 96,000 | 2,600,000 | 140,000 | 74,000  |
| 1860 . . . . . | 31,000,000 | 2,890,000 | 120,000 | 83,000 | 2,800,000 | 205,000 | 47,000  |
| 1870 . . . . . | 34,700,000 | 2,480,000 | 74,000  | 33,000 | 3,600,000 | 230,000 | 68,000  |
| 1880 . . . . . | 67,500,000 | 4,120,000 | 110,000 | 50,000 | 4,200,000 | 350,000 | 120,000 |
| 1886 . . . . . | 71,100,000 | 4,750,000 | 110,000 | 50,000 | 4,200,000 | 430,000 | 170,000 |

The ordinary consumption of sugar is 4000 tons, and of coffee 800 tons yearly, being respectively as 5 lbs. and 1 lb. per inhabitant. The only food exports are:—

|                  | Quantity  | Value, £  |
|------------------|-----------|-----------|
| Fruit, tons. . . | 140,000   | 1,520,000 |
| Oil, gallons . . | 2,100,000 | 210,000   |
| Wine, „ . . . .  | 1,500,000 | 50,000    |

The consumption of wine averages 18 gallons per inhabitant.

## ROUMANIA

The production of grain and meat is approximately thus:—

|                 | Tons      | Lbs. per Inhabitant |
|-----------------|-----------|---------------------|
| Grain . . . . . | 3,000,000 | 1,250               |
| Meat . . . . .  | 280,000   | 110                 |

The average export of grain in the years 1882-86 was:—

|                  | Tons Yearly | Value, £  |
|------------------|-------------|-----------|
| Wheat . . . . .  | 360,000     | 2,500,000 |
| Barley . . . . . | 240,000     | 850,000   |
| Rye . . . . .    | 85,000      | 400,000   |
| Maize . . . . .  | 640,000     | 2,600,000 |
| Total . . . . .  | 1,325,000   | 6,350,000 |

The exportation of cattle is not known, but may be estimated as equal to one-fourth of the meat product, say 70,000 tons yearly. This would leave the consumption thus:—

|                 | Tons      | Lbs. per Inhabitant |
|-----------------|-----------|---------------------|
| Grain . . . . . | 1,680,000 | 650                 |
| Meat . . . . .  | 210,000   | 82                  |

These ratios seem very high, but they are based on the tables of the *Statistique Agricole*. The consumption of sugar is only 4 lbs., and of coffee 8 oz. yearly per inhabitant.

## SERVIA

The production of grain and meat is approximately thus:—

|                 | Tons    | Lbs. per Inhabitant |
|-----------------|---------|---------------------|
| Grain . . . . . | 370,000 | 420                 |
| Meat . . . . .  | 100,000 | 112                 |

The export of grain, says Spallart, averages 40,000 tons; the meat surplus is probably 25,000 tons per annum.

## EGYPT

The average food exports in the years 1883-87 were:—

|                 | Value, £  | Tons, Approximately |
|-----------------|-----------|---------------------|
| Grain . . . . . | 1,010,000 | 200,000             |
| Sugar . . . . . | 460,000   | 33,000              |

The imports and exports of rice are about equal.

Some of the above articles were produced in excess of requirements for home use, the quantities and values exported being thus :—

| Period            | Tons Yearly |         |                   | Value, £   |            |                   |
|-------------------|-------------|---------|-------------------|------------|------------|-------------------|
|                   | Grain       | Meat    | Butter and Cheese | Grain      | Meat       | Butter and Cheese |
| 1821-30 . . . . . | 150,000     | 10,000  | 1,000             | 1,200,000  | 300,000    | 40,000            |
| 1831-40 . . . . . | 160,000     | 14,000  | 1,000             | 1,060,000  | 420,000    | 40,000            |
| 1841-50 . . . . . | 370,000     | 40,000  | 6,000             | 3,120,000  | 1,040,000  | 210,000           |
| 1851-60 . . . . . | 710,000     | 60,000  | 8,000             | 6,100,000  | 1,800,000  | 300,000           |
| 1861-70 . . . . . | 1,200,000   | 100,000 | 40,000            | 9,400,000  | 3,300,000  | 1,550,000         |
| 1871-80 . . . . . | 3,700,000   | 390,000 | 60,000            | 27,100,000 | 12,600,000 | 2,800,000         |
| 1881-87 . . . . . | 5,020,000   | 510,000 | 72,000            | 38,100,000 | 20,200,000 | 3,900,000         |

The disposal of the grain crops since 1840 was approximately as follows :—

| Period            | Millions of Bushels Yearly |      |          |          |       |
|-------------------|----------------------------|------|----------|----------|-------|
|                   | Crop                       | Seed | Exported | Home Use | Total |
| 1841-50 . . . . . | 740                        | 74   | 15       | 652      | 740   |
| 1851-60 . . . . . | 1,050                      | 105  | 29       | 916      | 1,050 |
| 1861-70 . . . . . | 1,210                      | 121  | 48       | 1,041    | 1,210 |
| 1871-80 . . . . . | 1,980                      | 198  | 148      | 1,634    | 1,980 |
| 1881-87 . . . . . | 2,700                      | 270  | 200      | 2,230    | 2,700 |

The disposal of wheat crop was as follows approximately :—

| Period            | Millions of Bushels Yearly |      |          |          |       |
|-------------------|----------------------------|------|----------|----------|-------|
|                   | Crop                       | Seed | Exported | Home Use | Total |
| 1841-50 . . . . . | 93                         | 9    | 10       | 74       | 93    |
| 1851-60 . . . . . | 137                        | 14   | 24       | 99       | 137   |
| 1861-70 . . . . . | 194                        | 20   | 38       | 136      | 194   |
| 1871-80 . . . . . | 338                        | 34   | 85       | 219      | 338   |
| 1881-87 . . . . . | 440                        | 44   | 134      | 262      | 440   |

The disposal of the maize crop was approximately thus :—

| Period            | Millions of Bushels Yearly |      |          |          |       |
|-------------------|----------------------------|------|----------|----------|-------|
|                   | Crop                       | Seed | Exported | Home Use | Total |
| 1841-50 . . . . . | 485                        | 48   | 5        | 432      | 485   |
| 1851-60 . . . . . | 715                        | 72   | 5        | 638      | 715   |
| 1861-70 . . . . . | 965                        | 97   | 10       | 858      | 965   |
| 1871-80 . . . . . | 1,400                      | 140  | 54       | 1,206    | 1,400 |
| 1881-87 . . . . . | 1,602                      | 160  | 53       | 1,389    | 1,602 |

The disposal of oats, rye, barley, buckwheat, &c., was as follows :—

| Period            | Millions of Bushels Yearly |      |          |          |       |
|-------------------|----------------------------|------|----------|----------|-------|
|                   | Crop                       | Seed | Exported | Home Use | Total |
| 1841-50 . . . . . | 162                        | 16   | ...      | 146      | 162   |
| 1851-60 . . . . . | 198                        | 20   | ...      | 178      | 198   |
| 1861-70 . . . . . | 51                         | 5    | ...      | 46       | 51    |
| 1871-80 . . . . . | 242                        | 24   | 9        | 209      | 242   |
| 1881-87 . . . . . | 658                        | 66   | 13       | 579      | 658   |

The consumption of food compared with population was as follows :—

| Year           | Lbs. per Inhabitant |             |      |       |          |                   |
|----------------|---------------------|-------------|------|-------|----------|-------------------|
|                | Wheat               | Other Grain | Meat | Sugar | Potatoes | Butter and Cheese |
| 1840 . . . . . | 240                 | 1,400       | 260  | 19    | 360      | ...               |
| 1850 . . . . . | 220                 | 1,510       | 224  | 20    | 265      | 20                |
| 1860 . . . . . | 260                 | 1,540       | 202  | 34    | 200      | 18                |
| 1870 . . . . . | 244                 | 1,620       | 140  | 41    | 202      | 14                |
| 1880 . . . . . | 320                 | 1,870       | 157  | 40    | 190      | 18                |
| 1887 . . . . . | 250                 | 1,610       | 155  | 53    | 170      | 20                |

Native sugar only forms 7 per cent. of what is consumed. The importation of coffee and tea has been as follows :—

|                  | Tons Yearly |         |         | Lbs. per Inhabitant |         |         |
|------------------|-------------|---------|---------|---------------------|---------|---------|
|                  | 1861-63     | 1871-73 | 1885-87 | 1861-63             | 1871-73 | 1885-87 |
| Coffee . . . . . | 58,000      | 134,000 | 250,000 | 4.0                 | 7.4     | 9.3     |
| Tea . . . . .    | 11,000      | 27,000  | 36,000  | 0.8                 | 1.5     | 1.4     |

The meat product of the United States was approximately as follows :—

| Year           | Tons      |         |           |           | Lbs. per Inhabitant |
|----------------|-----------|---------|-----------|-----------|---------------------|
|                | Beef      | Mutton  | Pork      | Total     |                     |
| 1840 . . . . . | 662,000   | 172,000 | 1,286,000 | 2,120,000 | 280                 |
| 1850 . . . . . | 790,000   | 193,000 | 1,477,000 | 2,460,000 | 240                 |
| 1860 . . . . . | 1,140,000 | 200,000 | 1,630,000 | 2,970,000 | 215                 |
| 1870 . . . . . | 1,060,000 | 253,000 | 1,230,000 | 2,540,000 | 190                 |
| 1880 . . . . . | 1,590,000 | 312,000 | 2,338,000 | 4,240,000 | 190                 |
| 1888 . . . . . | 2,190,000 | 390,000 | 2,190,000 | 4,750,000 | 178                 |

It may be seen that the rapid increase of population causes the surplus of meat to diminish. As soon as the production falls to 120 lbs. per inhabitant, there will be no meat to export.

The Americans are the best fed people in the world, and contribute in a great measure to the abundance and cheapness of food in other countries, their share of production being shown thus :—

|                         | Tons Grain Grown Yearly |             |             | Tons of Meat Produced Yearly |            |            |
|-------------------------|-------------------------|-------------|-------------|------------------------------|------------|------------|
|                         | 1841-50                 | 1861-70     | 1881-87     | 1841-50                      | 1861-70    | 1881-87    |
| United States . . . . . | 18,500,000              | 30,300,000  | 67,700,000  | 2,200,000                    | 2,680,000  | 4,400,000  |
| Europe . . . . .        | 90,500,000              | 111,000,000 | 132,000,000 | 6,380,000                    | 6,950,000  | 7,740,000  |
| Colonies, &c. . . . .   | 9,200,000               | 15,700,000  | 22,500,000  | 220,000                      | 390,000    | 920,000    |
| Total . . . . .         | 117,200,000             | 157,000,000 | 222,200,000 | 8,800,000                    | 10,020,000 | 13,060,000 |

It appears, therefore, that the United States produce 30 per cent. of the grain, and 33 per cent. of the meat of the world.

## CANADA

The production of grain and meat was approximately as follows :—

| Year | Tons Yearly |         | Lbs. per Inhabitant |      |
|------|-------------|---------|---------------------|------|
|      | Grain       | Meat    | Grain               | Meat |
| 1852 | 1,120,000   | 140,000 | 1,020               | 128  |
| 1873 | 1,850,000   | 220,000 | 1,030               | 126  |
| 1887 | 3,720,000   | 260,000 | 1,680               | 116  |

There has been of late years a surplus of grain and other articles, the net exports averaging yearly as follows :—

|                  | 1875-78 | 1882-84 | 1885-87 |
|------------------|---------|---------|---------|
| Grain, tons . .  | 175,000 | 405,000 | 410,000 |
| Meat „ . .       | 21,000  | 42,000  | 57,000  |
| Butter „ . .     | 5,500   | 4,800   | 3,100   |
| Cheese „ . .     | 16,500  | 31,000  | 39,000  |
| Fish „ . .       | 64,000  | 77,000  | 71,000  |
| Potatoes „ . .   | 21,000  | 58,000  | 39,000  |
| Eggs, millions . | 53      | 142     | 152     |

The consumption of imported food was thus :—

|           | Tons Yearly |         | Lbs. per Inhabitant |         |
|-----------|-------------|---------|---------------------|---------|
|           | 1875-77     | 1885-87 | 1875-77             | 1885-87 |
| Sugar . . | 68,000      | 102,000 | 37.0                | 45.0    |
| Tea . .   | 6,000       | 9,000   | 3.4                 | 4.1     |
| Salt . .  | 72,000      | 87,000  | 39.0                | 38.0    |

The ordinary consumption of wheat is 350 lbs. per inhabitant, and of meat 90 lbs., per annum.

## AUSTRALIA

The production of grain and meat was approximately thus :—

| Period      | Tons Yearly |         | Lbs. per Inhabitant |      |
|-------------|-------------|---------|---------------------|------|
|             | Grain       | Meat    | Grain               | Meat |
| 1831-40 . . | 60,000      | 40,000  | 440                 | 300  |
| 1851-60 . . | 250,000     | 140,000 | 500                 | 300  |
| 1861-87 . . | 1,550,000   | 450,000 | 1,100               | 300  |

Food exports have averaged yearly as follows :—

|                 | 1875-77 | 1885-87 |
|-----------------|---------|---------|
| Grain, tons . . | 125,000 | 150,000 |
| Meat, „ . .     | 9,000   | 34,000  |

According to Mr. Coghlan, Government statist, the consumption of food averages as follows :—

|                     | Lbs. Yearly per Inhabitant |      |          |       |     |      |         |
|---------------------|----------------------------|------|----------|-------|-----|------|---------|
|                     | Wheat                      | Rice | Potatoes | Sugar | Tea | Meat | Tobacco |
| New South Wales . . | 405                        | 12   | 215      | 94    | 8.2 | 249  | 3.4     |
| Victoria . .        | 384                        | 15   | 232      | 100   | 7.2 | 265  | 2.7     |
| New Zealand . .     | ...                        | 9    | 412      | 78    | 6.7 | ...  | 2.0     |
| Tasmania . .        | 372                        | 9    | 389      | 86    | 6.4 | ...  | 1.8     |
| South Australia . . | ...                        | 5    | 195      | 87    | 6.4 | ...  | 2.1     |
| Queensland . .      | 366                        | 24   | 250      | 59    | 8.7 | 370  | 3.5     |
| Australasia . .     | 374                        | 13   | 279      | 89    | 7.5 | 276  | 2.8     |

## Gallons Yearly per 100 Inhabitants

|                     | Wine | Beer  | Spirits | Equivalent in Alcohol |
|---------------------|------|-------|---------|-----------------------|
| New South Wales . . | 80   | 1,170 | 110     | 290                   |
| Victoria . .        | 110  | 1,940 | 120     | 410                   |
| New Zealand . .     | 20   | 770   | 80      | 180                   |
| Tasmania . .        | 20   | 970   | 60      | 190                   |
| South Australia . . | 160  | 1,410 | 50      | 280                   |
| Queensland . .      | 60   | 980   | 180     | 320                   |
| Australasia . .     | 80   | 1,230 | 100     | 290                   |

The consumption of imported articles was as follows :—

|           | Tons Yearly |         | Lbs. per Inhabitant |         |
|-----------|-------------|---------|---------------------|---------|
|           | 1875-77     | 1885-87 | 1875-77             | 1885-87 |
| Tea . .   | 8,200       | 11,500  | 7.5                 | 8.1     |
| Sugar . . | 82,000      | 110,000 | 75.0                | 77.0    |

The sugar was not imported wholly from abroad, Queensland supplying 5 per cent. in the first, and 36 per cent. in the second period.

## ARGENTINA

The production of grain and meat was approximately thus :—

| Period      | Tons      |         | Lbs. per Inhabitant |      |
|-------------|-----------|---------|---------------------|------|
|             | Grain     | Meat    | Grain               | Meat |
| 1831-40 . . | 50,000    | 50,000  | 200                 | 200  |
| 1851-60 . . | 120,000   | 100,000 | 280                 | 220  |
| 1861-87 . . | 850,000   | 300,000 | 600                 | 220  |
| 1889 . .    | 1,510,000 | 320,000 | 910                 | 200  |

The surplus food for exportation was as follows :—

| Year     | Tons    |        |
|----------|---------|--------|
|          | Grain   | Meat   |
| 1873 . . | 2,300   | 35,000 |
| 1883 . . | 108,400 | 39,000 |
| 1889 . . | 350,000 | 60,000 |

The Republic grows 80,000 tons sugar and 6 million gallons of wine, which is about half the quantity consumed of the former and one-fifth of the latter.

## FORESTS

Forests cover about 10 per cent. of the earth's landed area, and 25 per cent. of Europe. The highest yield is in the United Kingdom, namely, 60 cubic feet of timber per acre, whereas in Brazil it is about one cubic foot. The terms used in measurement are :—

|                       |                                  |
|-----------------------|----------------------------------|
| Load, 50 cubic feet.  | Klafter, 2 tons or 200 fagots.   |
| Stere, 35 cubic feet. | Cord, 2½ tons or 125 cubic feet. |

The ordinary cutting in Europe (except Russia) is 5 acres per 100 of forest. An acre of forest, if cut down, would produce about 1000 cubic feet of timber.

The annual felling of timber is hardly half what it might be, without reducing the forest resources of the world. The average shown above is only 17 cubic feet per acre, the ordinary yield available being from 30 to 40 cubic feet. It appears, however, that forests within easy reach are sufficiently developed, while those more remote of Canada, Brazil, and Gran Chaco have not yet been brought into much use.

The forests of the world may be summed up approximately thus :—

|                             | Millions of Acres | Product, Million Cubic Feet | Cubic Feet per Acre | Value of Product, £ |
|-----------------------------|-------------------|-----------------------------|---------------------|---------------------|
| Russia . . . . .            | 426               | 6,200                       | 15                  | 40,800,000          |
| United States . . . . .     | 466               | 9,300                       | 20                  | 112,000,000         |
| Brazil . . . . .            | 135               | 150                         | 1                   | 1,000,000           |
| Canada . . . . .            | 64                | 650                         | 5                   | 8,200,000           |
| Sweden and Norway . . . . . | 61                | 900                         | 15                  | 12,000,000          |
| Austria-Hungary . . . . .   | 46                | 2,000                       | 45                  | 18,000,000          |
| Gran Chaco . . . . .        | 37                | 40                          | 1                   | 500,000             |
| Germany . . . . .           | 32                | 1,300                       | 40                  | 13,000,000          |
| France . . . . .            | 21                | 1,100                       | 50                  | 10,000,000          |
| Italy . . . . .             | 10                | 440                         | 44                  | 4,000,000           |
| Algeria . . . . .           | 6                 | 120                         | 20                  | 1,000,000           |
| Switzerland . . . . .       | 2                 | 140                         | 70                  | 1,200,000           |
| United Kingdom . . . . .    | 2                 | 120                         | 60                  | 2,000,000           |
| <b>Total . . . . .</b>      | <b>1,308</b>      | <b>22,460</b>               | <b>17</b>           | <b>223,700,000</b>  |

The following table shows the average yield of firewood per acre of forest, according to the age of the trees :—

| Age of Trees, Years | Cubic Feet | Age of Trees, Years | Cubic Feet | Age of Trees, Years | Cubic Feet |
|---------------------|------------|---------------------|------------|---------------------|------------|
| 10                  | 700        | 50                  | 6,200      | 150                 | 12,800     |
| 20                  | 1,800      | 60                  | 7,500      | 200                 | 13,400     |
| 30                  | 3,300      | 80                  | 9,200      | 250                 | 12,000     |
| 40                  | 4,900      | 100                 | 10,000     | 300                 | 11,000     |

The following tables refer to the principal kinds of forest trees :—

|                    | Density | Cohesion | Strength |
|--------------------|---------|----------|----------|
| Acacia . . . . .   | 0.717   | 7.93     | ...      |
| Alder . . . . .    | 0.601   | 4.54     | ...      |
| Ash . . . . .      | 0.697   | 6.78     | 983      |
| Aspen . . . . .    | 0.602   | 7.20     | ...      |
| Beech . . . . .    | 0.823   | 3.57     | ...      |
| Birch . . . . .    | 0.812   | 4.30     | 672      |
| Fir . . . . .      | 0.493   | 4.18     | 585      |
| Maple . . . . .    | 0.674   | 3.58     | ...      |
| Oak . . . . .      | 0.808   | 6.49     | 1,000    |
| Pine . . . . .     | 0.559   | 2.48     | 565      |
| Poplar . . . . .   | 0.477   | 1.97     | 538      |
| Sycamore . . . . . | 0.692   | 6.16     | 744      |

The following scale serves to ascertain the age of trees :—

| Age, Years    | Inches Diameter |       |     |        |     |
|---------------|-----------------|-------|-----|--------|-----|
|               | Oak             | Larch | Elm | Spruce | Yew |
| 10 . . . . .  | 5               | 4     | 1   | 4      | 1   |
| 20 . . . . .  | 10              | 9     | 5   | 8      | 2   |
| 30 . . . . .  | 14              | 14    | 10  | 12     | 3   |
| 50 . . . . .  | 23              | 24    | 23  | 19     | 4   |
| 70 . . . . .  | 32              | 33    | 36  | 24     | 6   |
| 100 . . . . . | 41              | 40    | 50  | 27     | 9   |
| 150 . . . . . | 54              | 50    | 61  | 36     | 14  |
| 200 . . . . . | 64              | 58    | 71  | 44     | 20  |
| 250 . . . . . | 74              | 67    | 83  | 52     | 25  |
| 300 . . . . . | 84              | 75    | 94  | 60     | 30  |

Eucalyptus or Australian gum-tree sometimes grows 24 feet in three months; bamboo, 2 feet in twenty-four hours.

The maximum age to which trees of different kinds arrive is shown as follows :—

|                   | Years |                    | Years |                  | Years |
|-------------------|-------|--------------------|-------|------------------|-------|
| Palm . . . . .    | 250   | Lemon . . . . .    | 640   | Spruce . . . . . | 1,200 |
| Elm . . . . .     | 355   | Plane . . . . .    | 720   | Oak . . . . .    | 1,600 |
| Cypress . . . . . | 388   | Cedar . . . . .    | 800   | Olive . . . . .  | 2,000 |
| Ivy . . . . .     | 448   | Chestnut . . . . . | 860   | Yew . . . . .    | 2,880 |
| Maple . . . . .   | 516   | Walnut . . . . .   | 900   | Baobab . . . . . | 5,100 |
| Larch . . . . .   | 576   | Lime . . . . .     | 1,076 | Dragon . . . . . | 5,900 |

The Crown forests of various countries are as follows :—

|                             | Area, Acres | Product, £ | Pence per Acre |
|-----------------------------|-------------|------------|----------------|
| Russia . . . . .            | 180,000,000 | 10,000,000 | 13             |
| India . . . . .             | 35,500,000  | ...        | ...            |
| Sweden and Norway . . . . . | 10,300,000  | 1,500,000  | 35             |
| Germany . . . . .           | 9,400,000   | 3,700,000  | 95             |
| Austria . . . . .           | 7,500,000   | 1,500,000  | 48             |
| France . . . . .            | 2,110,000   | 1,700,000  | 180            |
| Italy . . . . .             | 500,000     | 200,000    | 96             |
| Belgium . . . . .           | 100,000     | 40,000     | 96             |

Besides the foregoing, there are communal forests, the area of which is not easily ascertained.

The following table shows approximately the consumption of all kinds of timber and firewood in the various countries, and the quantities of timber imported or exported.

|                               | Millions of Cubic Ft. Consumed Yearly |               |               | Cubic Ft. Consumed per Inhab. | Millions of Cubic Ft. |            |
|-------------------------------|---------------------------------------|---------------|---------------|-------------------------------|-----------------------|------------|
|                               | Firewood                              | Building &c.  | Total         |                               | Imported              | Exported   |
| U. Kingdom . . . . .          | 60                                    | 470           | 530           | 14                            | 390                   | ...        |
| France . . . . .              | 800                                   | 500           | 1,300         | 35                            | 200                   | ...        |
| Germany . . . . .             | 700                                   | 600           | 1,300         | 28                            | ...                   | ...        |

#### UNITED KINGDOM

The consumption of timber has been as follows :—

| Year | Millions of Cubic Ft. |          |       | Cubic Ft. per Inhabitant | Per Load (50 Cubic Ft.) |       |
|------|-----------------------|----------|-------|--------------------------|-------------------------|-------|
|      | British               | Imported | Total |                          | Duty                    | Price |
| 1790 | 106                   | 11       | 117   | 8                        | 1                       | 1     |
| 1803 | 110                   | 12       | 122   | 8                        | 25                      | 70    |
| 1811 | 110                   | 14       | 124   | 7                        | 55                      | 90    |
| 1820 | 115                   | 22       | 137   | 7                        | 65                      | 185   |
| 1830 | 115                   | 28       | 143   | 6                        | 55                      | 160   |
| 1840 | 115                   | 41       | 156   | 6                        | 55                      | 150   |
| 1850 | 120                   | 85       | 205   | 8                        | 7                       | 150   |
| 1860 | 120                   | 145      | 265   | 9                        | 4                       | 70    |
| 1870 | 130                   | 252      | 382   | 12                       | ...                     | 68    |
| 1880 | 140                   | 290      | 430   | 12                       | ...                     | 65    |
| 1889 | 140                   | 392      | 532   | 14                       | ...                     | 50    |

The most remarkable planters in the United Kingdom are:—

| Planter          | Locality  | No. of Trees | Area, Acres |
|------------------|-----------|--------------|-------------|
| Duke of Athol    | Dunkeld   | 28,000,000   | 16,600      |
| Earl of Seafield | Inverness | 60,000,000   | 40,000      |
| Lord Powerscourt | Wicklow   | 3,000,000    | 1,000       |

The last-mentioned began in 1869, and his outlay has averaged 66s. per acre; he expects after 1894 to get a return of 8s. per acre, and that in 1915 the plantation will be worth £50 an acre.

The largest forests in England are New Forest, 67,000 acres, and Dean Forest, 23,000.

#### FRANCE

France has been steadily increasing her forests in the last forty years, their area being now 7 million acres more than in 1848. In that interval no less than 9 million acres of waste mountain lands have been planted, the increase of urban population causing a great demand for firewood, the consumption of which averages 23 cubic feet per inhabitant. In 1868 the area and product of forests was as follows:—

|         | Acres      | Product, £ |
|---------|------------|------------|
| State   | 2,110,000  | 1,720,000  |
| Private | 15,950,000 | 8,580,000  |
| Total   | 18,060,000 | 10,300,000 |

The product was made up approximately thus:—

|                                 |             |
|---------------------------------|-------------|
| 800 million cubic feet firewood | £ 4,000,000 |
| 300 „ „ „ timber                | 6,300,000   |

Paris requires one million acres for her supply of firewood, as she consumes the equivalent of 50,000 acres yearly, say 1000 acres each week. France is obliged to import 200 million cubic feet of timber yearly, her forests being insufficient for her requirements. The Government has planted largely in Algeria: at Lake Fetzara, on an area of 130,000 acres, 12,700,000 Australian gum-trees.

#### GERMANY

The forest area is as follows:—

|              | Acres      |
|--------------|------------|
| Prussia      | 17,800,000 |
| Bavaria      | 5,900,000  |
| Other States | 8,600,000  |
| Total        | 32,300,000 |

German forests produce 40 cubic feet per acre, those belonging to the Crown forming 30 per cent. of the total. In Prussia the average yield is only 30 cubic feet, but in Bavaria it rises to 45 feet per acre. The consumption of firewood for the whole of Germany averages 15 cubic feet per inhabitant. The value of product is:—

|                                 |             |
|---------------------------------|-------------|
| 700 million cubic feet firewood | £ 3,000,000 |
| 600 „ „ „ timber                | 10,000,000  |

The forest area has been reduced by two million acres in Prussia since the breaking up of the nobles' estates in 1850-59.

#### RUSSIA

Forests are steadily diminishing with the increase of population, and especially since the emancipation of the serfs. No less than 101 million acres of forest have been cleared since 1872 according to official returns, being at the rate of 7 million acres yearly. In 1860 the Crown forests covered 333 million acres, and in 1878 according to Strebinski they comprised only 180 million acres; but of course the emancipation transferred (see *Lands*) several millions to the serfs.

The Czar has 27,000 wood-police, who cut each 150 fagots, or  $1\frac{1}{2}$  ton of wood (mostly firewood) daily; say 450 tons per policeman yearly, the product per man being valued at £45 sterling. These men, for example, felled 670 million cubic feet in 1872, and 540 million in 1878; we have no later dates. The foregoing applies merely to 30 million acres of forest, the personal property of the Czar, besides which the Crown or Exchequer owns 150 million acres, the yield of which may be estimated at 2000 million cubic feet. The product of Crown forests averages only 1s. per acre yearly, that of private or communal forests 30d., viz.:—

|                      | Million Acres | Product, £. |
|----------------------|---------------|-------------|
| Crown forests        | 180           | 10,000,000  |
| Private and communal | 246           | 30,800,000  |
|                      | 426           | 40,800,000  |

Bushen estimated the product of Russian forests in 1864 at £24,000,000 sterling.

The consumption of firewood is estimated at one ton or 50 cubic feet per inhabitant, a ton being composed of 100 fagots, and worth about a silver rouble or 3s. per ton. At St. Petersburg, according to Simmonds, the consumption is much greater, reaching 3,000,000 tons yearly, or nearly 200 cubic feet per inhabitant. In 1882 the value of all wood and timber was approximately:—

|                            | Tons        | Value, £   |
|----------------------------|-------------|------------|
| Firewood                   | 90,000,000  | 13,600,000 |
| Exported by land and water |             | 5,600,000  |
| Used for building, &c.     | 34,000,000  | 21,600,000 |
| Total                      | 124,000,000 | 40,800,000 |

In 1878 the forests were held approximately thus:—

|             | Million Acres |
|-------------|---------------|
| Crown       | 180           |
| Nobles, &c. | 284           |
| Peasants    | 21            |
| Total       | 485           |

In 1881 the total area was estimated at 426 million acres.

#### AUSTRIA-HUNGARY

In Austria-Hungary nearly one-fourth of the forests belongs either to the Crown or the Church, the clergy of Hungary holding 1,500,000 acres.

The yield varies from one to two stères; average 45 cubic feet per acre. Value of product approximately as follows:—

|                                  |             |
|----------------------------------|-------------|
| 1200 million cubic feet firewood | £ 4,000,000 |
| 800 „ „ „ timber                 | 14,000,000  |

About one-eighth of the timber is exported.

The forest area of Austria is 46,100,000 acres, viz.:—

| Acres           | Acres      |
|-----------------|------------|
| Hungary         | 13,420,000 |
| Transylvania    | 6,550,000  |
| Galitzia        | 5,730,000  |
| Bohemia         | 3,240,000  |
| Tyrol           | 2,200,000  |
| Other provinces | 14,960,000 |

#### ITALY

Italian forests show an average product of 44 cubic feet per acre, more than half of which goes in firewood, the rest to the carpenters, viz.:—

|                                 |             |
|---------------------------------|-------------|
| 240 million cubic feet firewood | £ 1,000,000 |
| 200 „ „ „ timber                | 4,000,000   |

The price of forest land averages £13 per acre.

The consumption of firewood is 8 cubic feet per inhabitant. The supply of timber is short, Italy having to import 40 million cubic feet yearly.

## SWEDEN AND NORWAY

Sweden and Norway produce about 900 million cubic feet, the felling of which employs 40,000 woodcutters. One-third is used for firewood, the rest made into timber for building, &c., of which 200 million cubic feet are exported. Of the total production, two-thirds correspond to Sweden, one-third to Norway.

## BELGIUM

The total forest area is 1,220,000 acres, including 80,000 that belong to the State, and 340,000 to Communes, the rest being private estates. Annual product 70 millions cubic feet, which yields about 7s. an acre.

## UNITED STATES

The value of timber and firewood consumed yearly is shown approximately as follows:—

|                            | Value, £   |             |
|----------------------------|------------|-------------|
|                            | 1870       | 1880        |
| Firewood . . . .           | 15,000,000 | 20,000,000  |
| Fences . . . . .           | 30,000,000 | 40,000,000  |
| Sleepers, furniture, &c. . | 28,000,000 | 48,000,000  |
| Export . . . . .           | 4,000,000  | 4,000,000   |
| Total . . . . .            | 77,000,000 | 112,000,000 |

About 30,000 acres of timber are felled daily, the saw-mills of Maine consuming 50 million feet, those of Michigan 80 million feet monthly. In 1880 the Union counted 25,700 sawmills, with 141,600 hands, whose wages reached £6,700,000 yearly, turning out 18,000 million linear feet of boards, valued at £48,000,000 sterling. The consumption of wood for manufactures is enormous. Even trifling articles of use enter largely into the annual consumption. For example, the Harbour Springs factory turns out 8,000,000 wooden toothpicks daily. Minneapolis requires 2,000,000 barrels yearly for its flour-mills.

The forest area is distributed as follows:—

| States              | Acres      | States           | Acres       |
|---------------------|------------|------------------|-------------|
| New England . . . . | 19,000,000 | Southern . . . . | 233,000,000 |
| Middle . . . . .    | 18,000,000 | West . . . . .   | 196,000,000 |

Making up a total of 466 million acres.

## CANADA

The annual production averages 70 million logs, equal to 560 million cubic feet, and 190,000 masts. The total value is £8,200,000, home use £4,000,000, exportation £4,200,000.

## INDIA

Excluding Bengal and Upper Burmah, there are 45 million acres of forest (see p. 56).

## AUSTRALIA

According to Simmonds, the forest area is:—

|                           | Acres      |
|---------------------------|------------|
| New South Wales . . . .   | 3,760,000  |
| Tasmania . . . . .        | 4,000,000  |
| Western Australia . . . . | 19,200,000 |
| Victoria . . . . .        | 25,600,000 |
| New Zealand . . . . .     | 12,100,000 |

Total . . . . . 64,660,000

He adds that in New Zealand it is being rapidly diminished.

## FORTIFICATIONS

Louis Philippe spent 16 millions sterling on forts, especially the *enceinte* of Paris. Lord Palmerston spent 7½ millions on the coast fortifications begun by him in 1860. The German Government has spent 2½ millions in military works around Strasburg. The site occupied by

the Paris fortifications is 3900 acres, and was valued in 1840 at £140 an acre; it is now about to be sold for £700 an acre, on the levelling of the forts.

## FREIGHT

The carrying trade of the world has been prodigiously developed since the introduction of railways and steam-boats. Down to the year 1850, when the Continent of Europe had only 7600 miles of railway, the ordinary cost of land-carriage for goods was £3 a ton per 100 miles, or six times what it is at present. Freight by sea then averaged over 40s. a ton, or more than double what it is now. The following table shows approximately the tonnage borne by rail and shipping at various dates:—

| Year           | Millions of Tons |          |       |
|----------------|------------------|----------|-------|
|                | Rail             | Shipping | Total |
| 1830 . . . . . | 3                | 24       | 27    |
| 1840 . . . . . | 16               | 30       | 46    |
| 1850 . . . . . | 97               | 37       | 134   |
| 1860 . . . . . | 193              | 48       | 241   |
| 1870 . . . . . | 602              | 64       | 666   |
| 1875 . . . . . | 715              | 80       | 795   |
| 1880 . . . . . | 893              | 112      | 1,005 |
| 1887 . . . . . | 1,358            | 139      | 1,497 |

The saving to the people of Prussia alone, in having their merchandise carried by rail, was estimated in 1878 at 120 millions sterling per annum; this would imply that the saving in 1887 for all nations (per annum) was as follows:—

|                       | Tons  | Millions £ Saved |
|-----------------------|-------|------------------|
| Europe . . . . .      | 752   | 1,128            |
| United States . . . . | 552   | 828              |
| Colonies . . . . .    | 54    | 81               |
| Total . . . . .       | 1,358 | 2,037            |

This saving may be considered approximately correct, and is equal to 80 per cent. of the total annual expenditure for food (see *Food*) by the nations comprised above. Nevertheless, the cost of railway carriage for goods is by no means uniform; the averages in 1885 showed thus:—

## Cost per 100 Miles, Pence per Ton

|                     |    |                   |     |                    |     |
|---------------------|----|-------------------|-----|--------------------|-----|
| U. States . . . . . | 63 | Italy . . . . .   | 108 | G. Britain . . . . | 135 |
| Belgium . . . . .   | 70 | Austria . . . . . | 111 | France . . . . .   | 134 |
| Germany . . . . .   | 84 | Holland . . . . . | 118 | Sweden . . . . .   | 160 |

In 1888 the railways of the United Kingdom carried about 260 million tons of merchandise, the average haulage being supposed to be 30 miles: the freight charged was £38,800,000, equal to 120d. per 100 miles. This is precisely the rate charged on the London and North-Western line for carrying meat from Liverpool to London.

American railways have reduced their charges more than 50 per cent. in twenty years, viz.:—

## Railways of United States, Charge per Ton 100 Miles

| Year           | £ s. d. | Year           | £ s. d. |
|----------------|---------|----------------|---------|
| 1865 . . . . . | 0 17 2  | 1880 . . . . . | 0 7 4   |
| 1870 . . . . . | 0 11 9  | 1885 . . . . . | 0 5 4   |

The cost of sending a ton of grain from Chicago to Liverpool *via* New York was as follows:—

| Year           | Chicago to New York |                   | New York to Liverpool | Chicago to Liverpool, Water-Route |
|----------------|---------------------|-------------------|-----------------------|-----------------------------------|
|                | By Water            | By Rail           |                       |                                   |
| 1868 . . . . . | £ s. d.<br>2 2 0    | £ s. d.<br>3 10 0 | £ s. d.<br>1 3 0      | £ s. d.<br>3 5 0                  |
| 1873 . . . . . | 1 12 0              | 2 16 0            | 1 15 0                | 3 7 0                             |
| 1880 . . . . . | 1 1 0               | 1 12 0            | 1 0 0                 | 2 1 0                             |
| 1884 . . . . . | 0 12 0              | 1 1 0             | 0 12 0                | 1 4 0                             |

The above charge for 1884 was equal to 7d. per bushel, and even lower rates have prevailed since then. The charge from Chicago to Liverpool fell 63 per cent. in the above interval of sixteen years. In 1888 the charges from Chicago to European ports per ton were as follows :—

| Chicago to        | Shillings per Ton |       |
|-------------------|-------------------|-------|
|                   | Bacon             | Flour |
| Liverpool . . . . | 37                | 31    |
| London . . . . .  | 35                | 32    |
| Hamburg . . . . . | 44                | 37    |
| Antwerp . . . . . | 43                | 36    |

The freights current for ocean routes in 1888 were :—

| Route                     | Shillings per Ton | Miles  | Pence per 1000 Miles |
|---------------------------|-------------------|--------|----------------------|
| London to Singapore . .   | 25                | 8,400  | 36                   |
| London to Australia . .   | 27                | 11,000 | 32                   |
| London to San Francisco . | 30                | 14,000 | 26                   |
| London to Cape Town . .   | 40                | 6,000  | 80                   |
| Newcastle to Bombay . .   | 22                | 6,500  | 40                   |
| Antwerp to Rio Janeiro .  | 36                | 5,400  | 80                   |
| China to New York . . .   | 45                | 14,000 | 39                   |

This gives a general average of 37d. per thousand miles of ocean freight, against 90s. by railway; that is, the latter costs thirty times the former. The President of Civil Engineers in his inaugural speech for 1890 stated that in 1870 it cost £25 to send a ton of merchandise from London to Sydney, which now costs only 30s., a fall of 94 per cent. He added that in 1820 the conveyance of cotton bales from Liverpool to Manchester, thirty miles, cost 40s. a ton, which is now done at 7s., a fall of 82 per cent. With reference to the Manchester ship-canal, it was stated in 1889 that the railway charges between Manchester and Liverpool were still excessive, the freight on a ton of merchandise being as follows :—

|                             |              |
|-----------------------------|--------------|
| Liverpool to Bombay . . .   | 10 shillings |
| Liverpool to Manchester . . | 12 „         |

The countries which import fruit are the following :—

|                       | Tons   |         |         | Value, £  |           |           |
|-----------------------|--------|---------|---------|-----------|-----------|-----------|
|                       | 1860   | 1880    | 1887    | 1860      | 1880      | 1887      |
| United Kingdom . . .  | 79,000 | 107,000 | 320,000 | 1,800,000 | 3,300,000 | 6,200,000 |
| France . . . . .      | ...    | 32,000  | 195,000 | ...       | 3,900,000 | 3,000,000 |
| United States . . . . | 13,000 | 40,000  | 67,000  | 800,000   | 2,700,000 | 4,300,000 |

The countries which export fruit are the following :—

|                    | Tons   |        |         | Value, £  |           |           |
|--------------------|--------|--------|---------|-----------|-----------|-----------|
|                    | 1862   | 1875   | 1887    | 1862      | 1875      | 1887      |
| Italy . . . . .    | 48,000 | 99,000 | 240,000 | 1,200,000 | 1,600,000 | 2,200,000 |
| Spain . . . . .    | 34,000 | 72,000 | 160,000 | 700,000   | 1,500,000 | 2,200,000 |
| Portugal . . . . . | ...    | 24,000 | 17,000  | ...       | 160,000   | 140,000   |
| Greece . . . . .   | 42,000 | 87,000 | 107,000 | 540,000   | 1,470,000 | 1,900,000 |

The price of fruit in most countries has fallen notably in the last thirty years, which is due to the great increase of production, and to improved facilities for bringing fruit to ports for shipment.

Mr. Loring, ex-Commissioner of Agriculture, valued the fruit crop of the United States in 1880 at £42,000,000 sterling, and the annual consumption of fruit at 12s. English, per inhabitant of the Union, and 24s. in New York. The *Royal Agricultural Journal* of England states the acreage under fruit-trees in the United King-

The ordinary expense of carrying goods in 1884 in all countries was estimated thus :—

Shillings per Ton, 1000 Miles

|                   |    |                    |     |
|-------------------|----|--------------------|-----|
| By sea . . . . .  | 5  | By railway . . . . | 100 |
| „ canal . . . . . | 20 | „ highroad . . . . | 300 |

There is not much difference between the freight paid by waggon on highroads in France and that charged by caravans across Central Africa. Thus, a camel-load of 600 lbs. from Berber to Suakim (280 miles) costs 25s., which is equal to 33s. a ton per 100 miles, 10 per cent. over the ordinary charge by waggon in Europe. The effects of freight on prices are shown by the fact that Athens imports wheat from Odessa because land-carriage in the interior of Greece is £10 a ton per 100 miles, and consequently it is cheaper to consume Russian wheat.

Brazilian railways still charge enormous freights—coffee, for example, paying 550d. per 100 miles, or nine times as much as in the United States. Even freight by water in Brazil is dear, the Brazilian steamers charging £16 a ton from Montevideo to Matto Grosso, the distance being 2500 miles.

In Australia the construction of railways has been attended with the following reduction of freight charges :—

Haulage of One Ton Ten Miles

| Year           | Pence |
|----------------|-------|
| 1864 . . . . . | 75    |
| 1872 . . . . . | 36    |
| 1878 . . . . . | 24    |
| 1887 . . . . . | 18    |

During the gold fever extravagant sums were paid for freight, the ordinary charge in 1851 from Melbourne to Bendigo being £150 per ton.

## FRUIT

The degrees of sugar in various fruits are :—

|                      |     |                    |      |
|----------------------|-----|--------------------|------|
| Peach . . . . .      | 1.6 | Apple . . . . .    | 7.9  |
| Raspberry . . . . .  | 4.0 | Mulberry . . . . . | 9.2  |
| Strawberry . . . . . | 5.7 | Pear . . . . .     | 9.4  |
| Currant . . . . .    | 6.1 | Cherry . . . . .   | 10.8 |
| Gooseberry . . . . . | 7.2 | Grape . . . . .    | 14.9 |

dom, and the importation of apples from abroad, to be thus :—

| Fruit Acreage  |         | Apples Imported |        |
|----------------|---------|-----------------|--------|
| Year           | Acres   | Year            | Tons   |
| 1839 . . . . . | 90,000  | 1839 . . . . .  | 1,800  |
| 1872 . . . . . | 172,000 | 1869 . . . . .  | 12,300 |
| 1889 . . . . . | 214,000 | 1888 . . . . .  | 95,000 |

The annual consumption of fruit and vegetables in London and Paris is stated by the *Farming World* thus:—

|               | Fruit, Lbs. per Inhab. |       |             | Vegetables, Lbs. per Inhab. |       |
|---------------|------------------------|-------|-------------|-----------------------------|-------|
|               | London                 | Paris |             | London                      | Paris |
| Apples . .    | 65                     | 145   | Carrots . . | 7                           | 37    |
| Cherries . .  | 2                      | 20    | Celery . .  | 1                           | 6     |
| Pears . .     | 40                     | 170   | Onions . .  | 34                          | 5     |
| Plums . .     | 17                     | 183   | Peas . .    | 3                           | 7     |
| Raspberries . | 1                      | 2     | Potatoes .  | 173                         | 49    |
| Strawberries  | 4                      | 13    | Tomatoes .  | 57                          | 17    |

*Almonds.*—The exportation from Italy was as follows:—

| Year       | Tons   | Value, £ | Value per Ton, £ |
|------------|--------|----------|------------------|
| 1862 . . . | 2,500  | 190,000  | 76               |
| 1870 . . . | 3,100  | 240,000  | 78               |
| 1887 . . . | 11,100 | 600,000  | 54               |

And from Spain as follows:—

| Year       | Tons  | Value, £ | Value per Ton, £ |
|------------|-------|----------|------------------|
| 1872 . . . | 3,800 | 180,000  | 47               |
| 1882 . . . | 4,100 | 180,000  | 44               |
| 1887 . . . | 4,400 | 220,000  | 50               |

The almond flourishes between 27 and 45° N. lat., and requires a medium annual temperature of 58° F. In France the yield averages 12 lbs., in California 20 lbs. per tree. The fruit usually sells at £100 per ton. The crop in California averages a value of £100 sterling per acre.

*Apple.*—The apple crop in Great Britain averages 85,000 tons, valued at £10 per ton; about 12 million gallons of cider are made yearly. The production of cider in France averages 230 million gallons. Apples in France are worth £5 per ton, ordinary crop 1,600,000 tons. The orchards of Great Britain cover 180,000 acres: a ton of ordinary good apples will produce from 100 to 200 gallons of cider. Great Britain imports 900,000 barrels of apples yearly from the United States and Canada.

The imports show thus:—

|                | Tons   |
|----------------|--------|
| 1839 . . . . . | 1,800  |
| 1869 . . . . . | 12,300 |
| 1888 . . . . . | 95,000 |

The annual consumption in the United Kingdom averages 11 lbs. per inhabitant.

*Banana.*—The most prolific of all fruits of the earth, being 44 times more productive than potatoes, and 131 times more than wheat.

*Chestnuts* form an important item of food in France and Italy. Returns for 1886–88 were:—

|             | France     | Italy      |
|-------------|------------|------------|
| Acres . . . | 1,220,000  | 1,010,000  |
| Bushels . . | 19,000,000 | 14,000,000 |

The yield of a good tree averages two bushels. The French crop is valued at £1,600,000, the Italian at £1,200,000 sterling; the average yield in France is 15, in Italy 14 bushels per acre. Italy exports 500,000 bushels.

*Currents.*—The exportation from Greece shows:—

| Period        | Annual Average |           | Value per Ton, £ |
|---------------|----------------|-----------|------------------|
|               | Tons           | Value, £  |                  |
| 1867–70 . . . | 52,000         | 600,000   | 12               |
| 1871–75 . . . | 67,000         | 1,200,000 | 18               |
| 1880 . . . .  | 54,000         | 840,000   | 16               |
| 1889 . . . .  | 56,000         | 900,000   | 16               |

Greece produces annually 100,000 tons, the home consumption averaging 40,000 tons.

Imports into the United Kingdom were as follows:—

| Period        | Annual Average |           | Value per Ton, £ |
|---------------|----------------|-----------|------------------|
|               | Tons           | Value, £  |                  |
| 1866–70 . . . | 45,000         | 910,000   | 20               |
| 1871–80 . . . | 54,000         | 1,450,000 | 27               |
| 1881–88 . . . | 53,000         | 1,420,000 | 27               |

*Date-Palm*

|             | Number of Trees | Yield of Sugar, Tons |
|-------------|-----------------|----------------------|
| India . . . | 13,000,000      | 26,000               |
| Egypt . . . | 4,500,000       | ...                  |

*Figs.*—The exportation by Greece and Portugal is as follows:—

| Greece     |       |          | Portugal   |        |          |
|------------|-------|----------|------------|--------|----------|
| Year       | Tons  | Value, £ | Year       | Tons   | Value, £ |
| 1867 . . . | 7,000 | 65,000   | 1877 . . . | 5,000  | 52,000   |
| 1888 . . . | 8,000 | 90,000   | 1887 . . . | 13,000 | 110,000  |

*Oranges and Lemons* flourish in Italy, Spain, and Portugal. The orange was introduced into Europe by the Moors in the eleventh century, and first brought to England by Sir Walter Raleigh in the sixteenth. It was first planted in Australia, near Sydney, in 1788, and has thrived there. The cost of clearing and planting an orange-farm in New South Wales is £30 per acre, and the product begins in the fourth year, rising as follows:—

|                |              |                |              |
|----------------|--------------|----------------|--------------|
| 4th year . . . | £10 per acre | 6th year . . . | £25 per acre |
| 5th " . . .    | 15 " "       | 7th " . . .    | 40 " "       |

Sometimes the product reaches £100 per acre, a single tree often giving from 1500 to 2000 oranges, worth 4s. per hundred. In Italy the ordinary yield is 250 lemons and 300 oranges per tree, but a single tree will often give in Sicily as many as 3000. The average in Seville is 600, in Paraguay 700 oranges per tree.

The island of St. Michael, Azores, has 210 acres mostly under oranges, of which it exports 250 millions yearly.

The number of trees and fruit in Italy are:—

|              | Trees     | Millions Fruit Yearly |
|--------------|-----------|-----------------------|
| Orange . . . | 5,400,000 | 1,600                 |
| Lemon . . .  | 4,800,000 | 1,200                 |

Italy exports about 2500 millions oranges and lemons yearly, Spain 1400 millions, Portugal 80 millions, worth £40,000; Paraguay 60 millions, worth £20,000. The Argentine provinces also grow largely, and export 7 millions yearly to Bolivia, value £2000. Dundee consumes yearly 6000 chests of bitter oranges, and exports 1500 tons of marmalade. In Sicily it is found that 1000 lemons give 17 gallons of juice.

The number approximately of oranges imported into the United Kingdom has been:—

| Year         | Millions | Per Inhabitant | Price, Shillings per 1000 |
|--------------|----------|----------------|---------------------------|
| 1854 . . . . | 244      | 9              | 30                        |
| 1861 . . . . | 390      | 13             | 36                        |
| 1871 . . . . | 712      | 23             | 26                        |
| 1881 . . . . | 1,152    | 33             | 23                        |
| 1889 . . . . | 1,760    | 46             | 20                        |

The consumption of oranges per inhabitant represents 1s. yearly or about 2s. by retail.

The weight, value, and approximate number of oranges and lemons exported in 1888 by Italy and Spain were :—

|                 | Tons    | Millions of Fruit | Value, £  | £ per Ton |
|-----------------|---------|-------------------|-----------|-----------|
| Italy . . . . . | 165,000 | 2,470             | 1,200,000 | 7.3       |
| Spain . . . . . | 95,000  | 1,430             | 800,000   | 8.4       |

A box contains 226, a chest 340 oranges.

*Reisms.*—The exportation from Spain was as follows :—

| Period            | Tons   | Value, £ | Value per Ton, £ |
|-------------------|--------|----------|------------------|
| 1872-80 . . . . . | 37,000 | 100,000  | 30               |
| 1881-87 . . . . . | 36,500 | 900,000  | 25               |

Imports into the United Kingdom have been yearly thus :—

| Period            | Tons   | Value, £ | Value per Ton, £ |
|-------------------|--------|----------|------------------|
| 1866-70 . . . . . | 20,000 | 640,000  | 32               |
| 1871-80 . . . . . | 25,000 | 880,000  | 35               |

## FUEL

The annual consumption is approximately as follows :—

|                              | Millions   |                      | Per Inhabitant |                      |
|------------------------------|------------|----------------------|----------------|----------------------|
|                              | Coal, Tons | Firewood, Cubic Feet | Coal, Cwts.    | Firewood, Cubic Feet |
| United Kingdom . . . . .     | 140        | 60                   | 74             | 2                    |
| France . . . . .             | 27         | 800                  | 14             | 21                   |
| Germany . . . . .            | 55         | 700                  | 24             | 15                   |
| Russia . . . . .             | 9          | 4,000                | 2              | 45                   |
| Austria . . . . .            | 16         | 1,200                | 9              | 32                   |
| Italy . . . . .              | 3          | 240                  | 2              | 8                    |
| Spain and Portugal . . . . . | 2          | 110                  | 2              | 6                    |
| Belgium . . . . .            | 12         | ...                  | 44             | ...                  |
| Holland . . . . .            | 3          | 20                   | 14             | 5                    |
| Sweden and Norway . . . . .  | 2          | 320                  | 5              | 45                   |
| Europe . . . . .             | 269        | 7,450                | 17             | 20                   |
| United States . . . . .      | 155        | 3,000                | 28             | 50                   |
| Canada . . . . .             | 2          | 140                  | 9              | 28                   |
| Total . . . . .              | 426        | 10,590               | 18             | 24                   |

Pounds of water evaporated by 1 lb. of fuel as follows :—

|                 |     |                            |      |
|-----------------|-----|----------------------------|------|
| Straw . . . . . | 1.9 | Coke or charcoal . . . . . | 6.4  |
| Wood . . . . .  | 3.1 | Coal . . . . .             | 7.9  |
| Peat . . . . .  | 3.8 | Petroleum . . . . .        | 14.6 |

To make a ton of charcoal will be required of wood as follows :—

|                    | <i>Tons</i> |                 | <i>Tons</i> |                 | <i>Tons</i> |
|--------------------|-------------|-----------------|-------------|-----------------|-------------|
| Oak . . . . .      | 4.4         | Beech . . . . . | 5.1         | Birch . . . . . | 5.9         |
| Chestnut . . . . . | 4.5         | Elm . . . . .   | 5.2         | Pine . . . . .  | 6.0         |

For heating power 12 lbs. charcoal are equal to 10 lbs. coal or 13 lbs. coke. It is much used in America, France, and Italy. The ironworks of the United States consume 600,000 tons charcoal yearly, the yield of 50,000 acres, the average being 12 tons per acre. At Noirmoutiers, in France, 200 furnaces are constantly at work making charcoal from seaweed, 20 tons of fresh weed or 4 tons of dry producing 1 ton of charcoal, value 10s. In Ireland

it is often made from peat. The heating power of peat varies as follows :—

|                                |     |                         |    |
|--------------------------------|-----|-------------------------|----|
| Bog of Allen, Ireland. . . . . | 100 | Passy, France . . . . . | 52 |
| Hartz Mountains . . . . .      | 61  | Ham, „ . . . . .        | 49 |
| Königsbrunn . . . . .          | 57  | Troyes, „ . . . . .     | 32 |

The production in France is declining, not exceeding 300,000 tons per annum. Some years ago an estimate was made of the area and contents of peat bogs in the United Kingdom, and the value of the peat at 6d. per ton, viz. :—

|                          | Acres     | Millions of Tons | Value at 6d. per Ton, £ |
|--------------------------|-----------|------------------|-------------------------|
| Ireland . . . . .        | 2,831,000 | 33,972           | 850,000,000             |
| Great Britain . . . . .  | 3,505,000 | 42,060           | 1,050,000,000           |
| United Kingdom . . . . . | 6,336,000 | 76,032           | 1,900,000,000           |

The average depth of peat is 12 feet, equal to a yield per acre of 12,000 tons of dried turf.

## FURNITURE

Insurance agents say that furniture usually represents a value equal to half that of the house in which it is, including carriages, clothing, jewellery, and works of art. On this basis the value at various dates of furniture in the United Kingdom would be thus :—

| Year           | Millions £ | Per House, £ | Per Inhab., £ |
|----------------|------------|--------------|---------------|
| 1802 . . . . . | 190        | 70           | 12            |
| 1830 . . . . . | 270        | 75           | 13            |
| 1850 . . . . . | 440        | 95           | 16            |
| 1860 . . . . . | 580        | 118          | 20            |
| 1870 . . . . . | 740        | 131          | 24            |
| 1880 . . . . . | 1,030      | 158          | 29            |
| 1888 . . . . . | 1,320      | 186          | 34            |

In 1880 this value was approximately distributed among five classes of householders, as follows :—

| Class           | Houses, Thousands | Furniture, Millions £ | Average, £ |            |
|-----------------|-------------------|-----------------------|------------|------------|
|                 |                   |                       | Per House  | Per Inhab. |
| 1st . . . . .   | 23                | 136                   | 5,900      | 1,080      |
| 2nd . . . . .   | 261               | 274                   | 1,050      | 190        |
| 3rd . . . . .   | 563               | 172                   | 307        | 55         |
| 4th . . . . .   | 1,423             | 186                   | 130        | 23         |
| 5th . . . . .   | 4,175             | 262                   | ...        | 6,211      |
| Total . . . . . | 6,445             | 1,030                 | 158        | 29         |

The above does not include churches and other public buildings.

In 1883 Professor Leone Levi found 79,000 cabinet-makers in the United Kingdom, whose wages reached £4,600,000. The output of furniture represents a value of nearly 40 millions sterling per annum, almost wholly for home use. The export of furniture has been :—

|                |         |                |         |
|----------------|---------|----------------|---------|
| 1855 . . . . . | 180,000 | 1875 . . . . . | 390,000 |
| 1865 . . . . . | 290,000 | 1888 . . . . . | 750,000 |

The annual expenditure on furniture in the United Kingdom is about £1 sterling per inhabitant.

## G.

## GAMES

**Billiards.**—At billiards the greatest "break" on record is 2413, scored by W. J. Peall, November 5, 1886, at the Aquarium, London. The same player made the greatest number of spot hazards in succession, 633, in the year 1888.

**Bull-Fighting.**—In 1866 the balance-sheet of ninety-nine bull-rings then in Spain contained the following items:—

|                      | No.   | Cost, £ | Average, £ |
|----------------------|-------|---------|------------|
| Bulls killed . . .   | 2,375 | 61,000  | 26         |
| Horses killed . . .  | 3,561 | 70,000  | 20         |
| Bull-rings, rent . . | 99    | 130,000 | 1,310      |
| Total . . .          | ...   | 261,000 | ...        |

The number of bull-rings in 1878 was still the same. The above does not include the pay of Matadores, Bandilleros, &c.

## GAS

The following table shows the cost of street lighting in 1880 in various cities:—

|                   | Cost per Annum, £ | Price per 1000 Feet, Pence | Cost per Inhab., Pence | Candle-Power |
|-------------------|-------------------|----------------------------|------------------------|--------------|
| London . . .      | 460,000           | 45                         | 30                     | 12           |
| Paris . . .       | 620,000           | 68                         | 70                     | 13           |
| Rome . . .        | 24,000            | ...                        | 20                     | ...          |
| Vienna . . .      | 43,000            | 45                         | 10                     | 15           |
| Berlin . . .      | 53,000            | 51                         | 13                     | 16           |
| New York . . .    | ...               | 120                        | ...                    | 16           |
| San Francisco . . | 59,000            | ...                        | 67                     | ...          |
| Glasgow . . .     | ...               | 48                         | ...                    | 28           |
| Bucharest . . .   | 20,000            | ...                        | 24                     | ...          |
| Palermo . . .     | 20,000            | ...                        | 23                     | ...          |
| Liverpool . . .   | ...               | 42                         | ...                    | 22           |
| Turin . . .       | 18,000            | ...                        | 20                     | ...          |
| Florence . . .    | 14,000            | ...                        | 22                     | ...          |
| Manchester . . .  | ...               | 36                         | ...                    | 22           |
| Buda-Pesth . . .  | 16,000            | ...                        | 12                     | ...          |

The consumption in London and Paris was as follows:—

|                    | London |        |        | Paris |       |        |
|--------------------|--------|--------|--------|-------|-------|--------|
|                    | 1860   | 1880   | 1888   | 1860  | 1880  | 1889   |
| Millions cubic ft. | 8,200  | 18,100 | 24,700 | 2,660 | 8,470 | 11,010 |
| Per inhab. " "     | 2,930  | 4,750  | 5,400  | 1,610 | 3,940 | 4,800  |

Paris has 49,000 street lamps, the other French towns 190,000. London has 71,100.

The following table shows various analyses of gas:—

|                     | London | Paris | Bonn  | Gas from Wood | From Peat | From Rock-Oil | From Petroleum |
|---------------------|--------|-------|-------|---------------|-----------|---------------|----------------|
| Hydrogen . . .      | 46.0   | 50.2  | 39.8  | 31.8          | 27.5      | 3.1           | 32.7           |
| Gas de marais . .   | 39.5   | 32.8  | 43.1  | 35.3          | 42.7      | 64.8          | 45.7           |
| Oxide of carbon . . | 7.5    | 12.9  | 4.7   | 25.6          | 20.3      | 6.7           | ...            |
| Various . . .       | 7.0    | 4.1   | 12.4  | 7.3           | 9.5       | 25.4          | 21.6           |
| Total . . .         | 100.0  | 100.0 | 100.0 | 100.0         | 100.0     | 100.0         | 100.0          |

The consumption in the United Kingdom in 1880 was as follows:—

|                            | London | Other Towns | Total  |
|----------------------------|--------|-------------|--------|
| Millions cubic feet . . .  | 18,100 | 53,500      | 71,600 |
| Per inhabitant, cubic feet | 4.750  | 3.100       | 3.400  |

The average expenditure for gas is 21s. per inhabitant per annum in London, and 10s. in other towns. A ton of coal gives 9000 cubic feet of gas.

The London Gas Company showed in 1880 as follows:—Capital, £13,026,000; receipts, £3,993,000; expenses, £2,610,000; net earnings, £1,383,000.

In 1888 London consumed as follows:—

|                      | Millions of Cubic Feet |
|----------------------|------------------------|
| Private lights . . . | 23,300                 |
| Public lights . . .  | 1,400                  |
| Total . . .          | 24,700                 |

The paid-up capital of London gas companies in 1888 was £14,100,000, including £3,000,000 loan capital.

The statistics of gas companies in the United Kingdom, including those belonging to municipal bodies, are as follows:—

|                         | 1885       | 1888       |
|-------------------------|------------|------------|
| Capital, £ . . .        | 55,100,000 | 59,100,000 |
| Tons coal used . . .    | 8,400,000  | 9,300,000  |
| Millions cubic feet gas | 85,600     | 94,700     |
| Number of consumers     | 2,100,000  | 2,200,000  |

|                         | Joint-Stock | Municipal  | Total      |
|-------------------------|-------------|------------|------------|
| Capital, £ . . .        | 37,750,000  | 21,350,000 | 59,100,000 |
| Tons coal used . . .    | 6,100,000   | 3,200,000  | 9,300,000  |
| Millions cubic feet gas | 62,300,000  | 32,400,000 | 94,700,000 |
| Number of consumers     | 1,100,000   | 1,100,000  | 2,200,000  |
| Receipts, £ . . .       | 10,500,000  | 4,800,000  | 15,300,000 |
| Expenditure, £ . . .    | 7,100,000   | 3,400,000  | 10,500,000 |
| Net profit, £ . . .     | 3,400,000   | 1,400,000  | 4,800,000  |

The consumption in London on one day of thick fog, 14th January 1889, reached 105 million cubic feet, representing a cost of £18,000. The largest gasometer in England is that of Liverpool, which can hold 3,100,000 cubic feet.

The balance-sheet of the Paris Gas Company for 1889 showed thus:—

|                               |              |
|-------------------------------|--------------|
| Consumption, cubic feet . . . | 11,010,000   |
| Paid for coal, £ . . .        | 840,000      |
| Total expenditure, £ . . .    | 2,600,000    |
| Receipts, £ . . .             | 4,200,000    |
| Net profit, £ . . .           | 1,600,000    |
| Dividend . . .                | 31 per cent. |

## GEOLOGY

Professor Philips in 1836 published the following table of strata, and number of organic forms to each stratum :—

|                         | <i>Feet Thick</i> | <i>Organic Forms per 100 Feet</i> |
|-------------------------|-------------------|-----------------------------------|
| Tertiary . . . . .      | 2,000             | 141                               |
| Cretaceous . . . . .    | 1,100             | 71                                |
| Oolitic . . . . .       | 2,500             | 46                                |
| Saliferous . . . . .    | 2,000             | 8                                 |
| Carboniferous . . . . . | 10,000            | 5                                 |
| Primary . . . . .       | 20,000            | 2                                 |

## FOSSIL REMAINS

|                        |       |                              |       |
|------------------------|-------|------------------------------|-------|
| Mammals . . . . .      | 144   | Terrestrial plants . . . . . | 500   |
| Reptiles . . . . .     | 71    | animals . . . . .            | 330   |
| Fishes . . . . .       | 183   | Marine plants . . . . .      | 40    |
| Insects . . . . .      | 74    | animals . . . . .            | 6,065 |
| Cochifera . . . . .    | 2,026 | Fresh-water plants . . . . . | 40    |
| Gasteropoda . . . . .  | 880   | animals . . . . .            | 260   |
| Kephalopoda . . . . .  | 788   |                              |       |
| Crustacea, &c. . . . . | 1,970 | Total . . . . .              | 7,235 |

Total . . . 6,136

The distribution of France is as follows :—

|                             | <i>Acres</i> | <i>Ratio</i> |
|-----------------------------|--------------|--------------|
| Tertiary . . . . .          | 38,900,000   | 30           |
| Jurassic . . . . .          | 25,900,000   | 20           |
| Primitive . . . . .         | 24,000,000   | 18           |
| Cretaceous . . . . .        | 15,400,000   | 11           |
| Transitional . . . . .      | 13,000,000   | 10           |
| Triassic . . . . .          | 6,500,000    | 5            |
| Porphyry and coal . . . . . | 1,300,000    | 1            |
| Volcanic, &c. . . . .       | 4,600,000    | 5            |
| Total . . . . .             | 129,600,000  | 100          |

The experiments of Schubler and Schleiden give the power of absorbing water in an area of 50 square inches as follows, per 1000 grains of soil :—

|                           | Grains Absorbed in |          |          |          |
|---------------------------|--------------------|----------|----------|----------|
|                           | 12 Hours           | 24 Hours | 48 Hours | 72 Hours |
| Gypsum . . . . .          | 1                  | 1        | 1        | 1        |
| Limestone sand . . . . .  | 2                  | 3        | 3        | 3        |
| Loam clay . . . . .       | 21                 | 26       | 28       | 28       |
| Muddy . . . . .           | 25                 | 30       | 34       | 35       |
| Calcareous clay . . . . . | 26                 | 31       | 35       | 35       |
| Field . . . . .           | 16                 | 22       | 23       | 23       |
| Saty marl . . . . .       | 24                 | 29       | 32       | 33       |
| Garden mould . . . . .    | 35                 | 45       | 50       | 52       |
| Humus . . . . .           | 80                 | 97       | 110      | 120      |

## GEOLOGICAL SURVEYS

Various geological surveys of countries have been made, viz. :—

| Country                   | One in  | Inches to 100 Miles | Country            | One in  | Inches to 100 Miles |
|---------------------------|---------|---------------------|--------------------|---------|---------------------|
| U. Kingdom                | 63,000  | 100                 | Spain . . . . .    | 50,000  | 127                 |
| France . . . . .          | 80,000  | 79                  | Portugal . . . . . | 100,000 | 63                  |
| Prussia . . . . .         | 25,000  | 253                 | Sweden . . . . .   | 200,000 | 32                  |
| Austrian Empire . . . . . | 75,000  | 84                  | Holland . . . . .  | 200,000 | 32                  |
| Russia . . . . .          | 420,000 | 15                  | Belgium . . . . .  | 20,000  | 320                 |
| Italy . . . . .           | 100,000 | 63                  | Finland . . . . .  | 200,000 | 32                  |

## GIANTS

| Name                       | Place               | Height, Feet | Period          |
|----------------------------|---------------------|--------------|-----------------|
| Goliath . . . . .          | Palestine . . . . . | 11.0         | B.C. 1063       |
| Galbara . . . . .          | Rome . . . . .      | 10.0         | Claudius Caesar |
| Funnam . . . . .           | Scotland . . . . .  | 11.5         | Eugene II.      |
| De Vallemont . . . . .     | Rouen . . . . .     | 17.0         | 14th century    |
| Count Bucart . . . . .     | Dauphiny . . . . .  | 22.6         | 16th "          |

| Unknown . . . . .          | Palermo . . . . .   | 30.0         | 15th "          |
| John Middleton . . . . .   | England . . . . .   | 9.3          | A.D. 1578       |
| Frederic's Swede . . . . . | Sweden . . . . .    | 8.4          | ...             |
| Cujanus . . . . .          | Finland . . . . .   | 7.9          | ...             |
| Gilly . . . . .            | Tyrol . . . . .     | 8.1          | ...             |
| Patrick Cotter . . . . .   | Cork . . . . .      | 8.7          | 1806            |
| Chang Gow . . . . .        | Pekin . . . . .     | 7.8          | 1880            |

## GLASS

Consumption in United Kingdom as follows :—

|                | <i>Tons</i> |
|----------------|-------------|
| 1801 . . . . . | 16,300      |
| 1833 . . . . . | 18,200      |

In 1834 M'Culloch estimated that the glass factories of the United Kingdom employed 50,000 men, and produced thus :—

|                    |           |
|--------------------|-----------|
| England . . . . .  | 1,850,000 |
| Scotland . . . . . | 100,000   |
| Ireland . . . . .  | 50,000    |

Total . . . 2,000,000

In 1880 the consumption of plate glass in Great Britain amounted to six million square feet, of which one-sixth was imported, the rest native manufacture. The imports and exports of all kinds of glass showed thus :—

| Year           | Imports, £ | Exports, £ |
|----------------|------------|------------|
| 1874 . . . . . | 1,600,000  | 1,200,000  |
| 1880 . . . . . | 1,800,000  | 920,000    |
| 1888 . . . . . | 1,900,000  | 1,100,000  |

The total glass manufactures of the United Kingdom may be estimated at about three millions sterling per annum.

## GLOVES

Great Britain imports annually (1887-89) no less than 19 million pair, valued at £1,900,000. France makes 30 million, and exports about two-thirds, the industry representing a yearly value of £3,000,000. Austria exported 100 tons of gloves in 1885, being twenty times the quantity exported in 1860; there are numerous factories at Prague, which city turns out five million pair yearly, valued at £400,000. Italy exports approximately 20 million pair, the value being stated at £1,800,000; and, according to Mr. Simmonds, the factories in the United States produce gloves to the value of nearly £4,000,000 sterling, besides which the Americans in 1887 consumed £830,000 worth of European gloves.

## GOATS

The numbers in the various countries mentioned under *Cattle* will be found at p. 110. There are also 720,000 in Turkey, 2,790,000 in South Africa, and 19,000,000 in India.

An ordinary goat gives a quart of milk daily, and lives ten years. The Turkish breed known as Angora produces a fine hair worth 2s. per lb., say 2 lbs. per goat per annum. One-third of the goats in South Africa are of Angora or mixed breed, the first having been introduced from Smyrna in 1860.

## GOLD AND SILVER

The quantity of precious metals at remote dates of antiquity has been often discussed. The following facts are worthy of note:—

| Date      |                                                                                              | £          |
|-----------|----------------------------------------------------------------------------------------------|------------|
| B.C. 520. | Cyrus's booty from Asia                                                                      | 8,000,000  |
| B.C. 323. | Alexander's from Persia was 351,000 talents, equal to                                        | 81,000,000 |
| B.C. 44.  | Julius Caesar seized in the Roman treasury 500 tons gold and 700 tons silver, together worth | 75,000,000 |

According to Jacob, the Roman Empire in time of Augustus, A.D. 14, possessed 358 millions sterling of gold and silver. Jacob, Tooke, Newmarch, &c., estimated the stock of precious metals in the world at various dates, the result of their views being contained in the following table, with later information added:—

| A.D.       | Tons  |         | Millions £ |        |       |
|------------|-------|---------|------------|--------|-------|
|            | Gold  | Silver  | Gold       | Silver | Total |
| 1600 . . . | 830   | 23,000  | 116        | 276    | 392   |
| 1700 . . . | 1,310 | 45,000  | 183        | 450    | 633   |
| 1800 . . . | 2,730 | 88,000  | 382        | 760    | 1,142 |
| 1850 . . . | 3,620 | 113,000 | 507        | 976    | 1,483 |
| 1880 . . . | 7,800 | 145,000 | 1,092      | 1,090  | 2,182 |
| 1888 . . . | 8,600 | 160,000 | 1,204      | 1,010  | 2,214 |
| 1890 . . . | 8,820 | 165,000 | 1,235      | 1,213  | 2,448 |

But for the sudden rise of 15 per cent. in the price of silver in 1890, the stock of that metal, at prices of 1889, would stand for no more than 1040 millions sterling.

Several eminent statisticians have published estimates of the production of precious metals since Columbus discovered the New World.

Soetbeer's table of the production of gold and silver is as follows:—

| Period    | Tons   |         | Value, Million £ |        |       | Annual Average of Total, £ |
|-----------|--------|---------|------------------|--------|-------|----------------------------|
|           | Gold   | Silver  | Gold             | Silver | Total |                            |
| 1493-1520 | 162    | 1,316   | 23               | 14     | 37    | 1,300,000                  |
| 1521-1600 | 593    | 21,519  | 83               | 258    | 341   | 4,300,000                  |
| 1601-1700 | 911    | 37,234  | 128              | 372    | 500   | 5,000,000                  |
| 1701-40   | 638    | 15,736  | 90               | 140    | 230   | 5,700,000                  |
| 1741-80   | 906    | 23,718  | 127              | 213    | 340   | 8,500,000                  |
| 1781-1800 | 356    | 17,581  | 50               | 151    | 201   | 10,500,000                 |
| 1801-20   | 292    | 14,350  | 41               | 125    | 166   | 8,300,000                  |
| 1821-30   | 142    | 4,606   | 20               | 37     | 57    | 5,700,000                  |
| 1831-40   | 203    | 5,965   | 28               | 52     | 80    | 8,000,000                  |
| 1841-50   | 548    | 7,804   | 77               | 67     | 144   | 14,400,000                 |
| 1851-60   | 2,018  | 8,956   | 282              | 78     | 360   | 36,000,000                 |
| 1861-70   | 1,885  | 12,201  | 264              | 105    | 369   | 36,900,000                 |
| 1871-80   | 1,715  | 22,347  | 241              | 178    | 419   | 41,900,000                 |
| 1881-88   | 1,067  | 21,960  | 148              | 154    | 302   | 37,700,000                 |
| 396 years | 11,436 | 215,293 | 1,602            | 1,944  | 3,546 | 9,000,000                  |

He estimated the total stock of gold and silver in Europe in 1492 at no more than £33,400,000, and accounted for the stock and production down to 1829 as follows:—

| Period            | Production, £ | Consumption     |              |             | Balance     |
|-------------------|---------------|-----------------|--------------|-------------|-------------|
|                   |               | India and China | Manufactures | Mint        |             |
| 1492-1600 . . . . | 141,600,000   | 14,000,000      | 28,000,000   | 5,000,000   | 94,600,000  |
| 1601-1700 . . . . | 337,000,000   | 33,000,000      | 60,000,000   | 77,000,000  | 167,000,000 |
| 1701-1809 . . . . | 880,000,000   | 352,000,000     | 352,000,000  | 93,000,000  | 83,000,000  |
| 1810-29 . . . .   | 103,000,000   | 40,000,000      | 112,000,000  | 18,000,000  | ...         |
| Total . . . .     | 1,461,600,000 | 439,000,000     | 552,000,000  | 193,000,000 | ...         |

The consumption in 337 years amounted to 1184 millions sterling, being 277 millions less than the production.

The values were as follows:—

| Period    | Tons Gold     |                 |        |           |         |        |
|-----------|---------------|-----------------|--------|-----------|---------|--------|
|           | United States | Spanish America | Russia | Australia | Various | Total  |
| 1493-1850 | 30            | 3,045           | 310    | ...       | 1,366   | 4,751  |
| 1851-60   | 830           | 50              | 256    | 772       | 110     | 2,018  |

The value of gold is taken at £140,000 per ton, that of silver at the current market price.

Jacob estimated the production of precious metals from 1492 (date of the discovery of America) to 1829 as follows:—

| Period    | America       | Old World   | Total         | Annual Average |
|-----------|---------------|-------------|---------------|----------------|
| 1492-1545 | 17,200,000    | 5,400,000   | 22,600,000    | 420,000        |
| 1546-1600 | 111,400,000   | 7,600,000   | 119,000,000   | 2,200,000      |
| 1601-1700 | 307,000,000   | 30,000,000  | 337,000,000   | 3,370,000      |
| 1701-1809 | 786,000,000   | 94,000,000  | 880,000,000   | 8,150,000      |
| 1810-29   | 84,000,000    | 19,000,000  | 103,000,000   | 5,150,000      |
| 337 years | 1,395,600,000 | 156,000,000 | 1,451,600,000 | 4,400,000      |

Messedaglia's table of precious metals for 383 years is as follows from 1493 to 1875 :—

|                           | Tons Produced |         | Value, Mill. £ Stg. |        |       |
|---------------------------|---------------|---------|---------------------|--------|-------|
|                           | Gold          | Silver  | Gold                | Silver | Total |
| Russia . . . . .          | 1,033         | 2,400   | 142                 | 22     | 164   |
| Germany . . . . .         | ...           | 7,900   | ...                 | 70     | 70    |
| Austria . . . . .         | 460           | 7,800   | 64                  | 70     | 134   |
| Europe . . . . .          | 1,493         | 18,100  | 206                 | 162    | 368   |
| Africa . . . . .          | 732           | ...     | 101                 | ...    | 101   |

| Various . . . . .         | 392           | 9,400   | 52                  | 79     | 131   |
| Total . . . . .           | 9,453         | 180,500 | 1,302               | 1,604  | 2,906 |

Tooke's table comparing the production of precious metals in 1848 with 1800 was as follows :—

|                            | Gold      |            | Silver    |           |
|----------------------------|-----------|------------|-----------|-----------|
|                            | 1800      | 1848       | 1800      | 1848      |
| Russia . . . . .           | 100,000   | 4,100,000  | 200,000   | 200,000   |
| Rest of Europe } . . . . . | 150,000   | 360,000    | 1,320,000 | 560,000   |
| Africa . . . . .           | 280,000   | 550,000    | ...       | ...       |
| India, etc. . . . .        | 830,000   | 3,000,000  | 1,000,000 | 100,000   |
| Old World . . . . .        | 1,360,000 | 8,010,000  | 2,520,000 | 860,000   |
| Mexico . . . . .           | 220,000   | 500,000    | 4,080,000 | 4,800,000 |
| N. Grenada . . . . .       | 650,000   | 680,000    | 40,000    | ...       |
| Peru . . . . .             | 100,000   | 100,000    | 1,330,000 | 1,250,000 |
| Bolivia . . . . .          | 70,000    | 60,000     | 460,000   | 980,000   |
| Chile . . . . .            | 380,000   | 140,000    | 290,000   | 180,000   |
| Brazil . . . . .           | 510,000   | 340,000    | ...       | ...       |
| U. States . . . . .        | ...       | 240,000    | ...       | ...       |
| America . . . . .          | 1,930,000 | 2,060,000  | 6,200,000 | 7,210,000 |
| The world . . . . .        | 3,290,000 | 10,070,000 | 8,720,000 | 8,070,000 |

He estimated the production in Russia and Siberia as follows :—

| Period              | Gold       | Silver     | Total      | Annual Product |
|---------------------|------------|------------|------------|----------------|
| 1704-1809 . . . . . | 17,100,000 | 9,760,000  | 26,860,000 | 250,000        |
| 1810-24 . . . . .   | 2,200,000  | 1,680,000  | 3,880,000  | 260,000        |
| 1825-47 . . . . .   | 31,000,000 | 3,940,000  | 34,940,000 | 1,520,000      |
| 1848-50 . . . . .   | 10,100,000 | 480,000    | 10,580,000 | 3,530,000      |
| 1851-54 . . . . .   | 12,300,000 | 610,000    | 12,910,000 | 3,230,000      |
| 150 years . . . . . | 72,700,000 | 16,470,000 | 89,170,000 | 590,000        |

He estimated the production in the rest of Asia as follows :—

| Period              | Gold        | Silver     | Total       | Annual Average |
|---------------------|-------------|------------|-------------|----------------|
| 1492-1809 . . . . . | 127,000,000 | 16,900,000 | 143,900,000 | 460,000        |
| 1810-24 . . . . .   | 12,040,000  | 1,600,000  | 13,640,000  | 920,000        |
| 1825-47 . . . . .   | 37,000,000  | 8,200,000  | 45,200,000  | 1,970,000      |
| 1848-50 . . . . .   | 8,000,000   | 2,900,000  | 10,900,000  | 3,670,000      |
| 1851-54 . . . . .   | 14,400,000  | 3,920,000  | 18,320,000  | 4,580,000      |
| 362 years . . . . . | 198,440,000 | 33,520,000 | 231,960,000 | 640,000        |

It is worthy of remark, as shown in Soetbeer's table on the preceding page, that from 1851 to 1888 the annual production of precious metals averaged from 37 to 41 millions sterling. At present it is close on 40 millions, and there is no indication of any future decline.

The production of silver in the last ten years, according to the United States Mint Report, was as follows :—

| Year               | Ounces Fine Silver |                 |             | Price, Average Pence per Oz. |
|--------------------|--------------------|-----------------|-------------|------------------------------|
|                    | United States      | Other Countries | The World   |                              |
| 1880               | 30,300,000         | 44,500,000      | 74,800,000  | 52                           |
| 1881               | 33,300,000         | 45,600,000      | 78,900,000  | 52                           |
| 1882               | 36,200,000         | 50,300,000      | 86,500,000  | 54                           |
| 1883               | 35,700,000         | 53,400,000      | 89,100,000  | 51                           |
| 1884               | 37,800,000         | 43,800,000      | 81,600,000  | 50½                          |
| 1885               | 39,900,000         | 51,700,000      | 91,600,000  | 48½                          |
| 1886               | 39,400,000         | 53,800,000      | 93,200,000  | 45½                          |
| 1887               | 41,300,000         | 54,900,000      | 96,200,000  | 45                           |
| 1888               | 45,800,000         | 64,200,000      | 110,000,000 | 43                           |
| 1889               | 50,000,000         | 76,000,000      | 126,000,000 | 42½                          |
| 10 years . . . . . | 389,700,000        | 538,200,000     | 927,900,000 | 48½                          |

The production of gold in eight years ending December 1888 was as follows :—

| Year              | Ounces Fine Gold |           |            |            | Value of Product, £ |
|-------------------|------------------|-----------|------------|------------|---------------------|
|                   | United States    | Australia | Russia     | Total      |                     |
| 1881 . . . . .    | 1,880,000        | 1,250,000 | 2,030,000  | 5,160,000  | 21,000,000          |
| 1882 . . . . .    | 1,600,000        | 1,150,000 | 1,820,000  | 4,570,000  | 17,600,000          |
| 1883 . . . . .    | 1,450,000        | 1,050,000 | 1,900,000  | 4,400,000  | 16,900,000          |
| 1884 . . . . .    | 1,490,000        | 1,000,000 | 1,900,000  | 4,390,000  | 16,900,000          |
| 1885 . . . . .    | 1,540,000        | 1,100,000 | 1,850,000  | 4,490,000  | 17,300,000          |
| 1886 . . . . .    | 1,880,000        | 1,040,000 | 1,840,000  | 4,760,000  | 18,300,000          |
| 1887 . . . . .    | 1,600,000        | 1,150,000 | 1,860,000  | 4,610,000  | 17,800,000          |
| 1888 . . . . .    | 1,600,000        | 1,500,000 | 1,850,000  | 4,950,000  | 19,200,000          |
| 8 years . . . . . | 13,040,000       | 9,240,000 | 15,050,000 | 37,330,000 | 145,000,000         |

The production of precious metals in the United States is officially estimated as follows:—

| Period         | Gold, Oz.  | Silver, Oz. | Value, £    |
|----------------|------------|-------------|-------------|
| 1845-50 . . .  | 5,200,000  | 300,000     | 21,000,000  |
| 1851-60 . . .  | 28,500,000 | 500,000     | 114,000,000 |
| 1861-70 . . .  | 24,700,000 | 80,000,000  | 120,000,000 |
| 1871-80 . . .  | 20,500,000 | 310,000,000 | 163,000,000 |
| 1881-88 . . .  | 13,100,000 | 310,000,000 | 129,000,000 |
| 44 years . . . | 92,000,000 | 700,800,000 | 547,000,000 |

In the above table, however, silver is valued at 60d. per oz.—much above the market price. The gold produced from 1851 to 1888 amounts to 2486 tons, the silver to 20,300 tons, which latter is about 5 per cent. over Soetbeer's estimate. The relative quantities of the two metals, as shown above, and the price of silver per oz., as well as its value in exchange for gold, are given in the following table, which shows conclusively that it is a fallacy to suppose that the world is being flooded with silver. If the production were, as compared with gold,

to be of the same magnitude as in the eighteenth century, we should require double the present quantity to be produced yearly. It appears, meantime, that silver is relatively much less used in manufactures than gold, the annual consumption under this head being 45 per cent. of the gold produced, and 27 per cent. of silver:—

| Period        | Tons of Silver to 1 of Gold | Price of Silver, Pence per Oz. | Ounces of Silver for 1 of Gold |
|---------------|-----------------------------|--------------------------------|--------------------------------|
| 1600-20 . . . | 27.7                        | 77.0                           | 12.1                           |
| 1700-20 . . . | 34.3                        | 62.0                           | 15.1                           |
| 1800-20 . . . | 32.2                        | 61.0                           | 15.3                           |
| 1821-40 . . . | 33.1                        | 60.0                           | 15.6                           |
| 1841-60 . . . | 31.0                        | 60.0                           | 15.6                           |
| 1861-70 . . . | 22.6                        | 60.0                           | 15.6                           |
| 1871-80 . . . | 18.6                        | 56.0                           | 16.7                           |
| 1881-82 . . . | 18.4                        | 53.0                           | 17.6                           |
| 1883-84 . . . | 18.5                        | 50.7                           | 18.4                           |
| 1885-86 . . . | 18.6                        | 47.0                           | 19.9                           |
| 1887-88 . . . | 18.6                        | 44.0                           | 21.2                           |
| 1890 . . .    | 18.7                        | 51.0                           | 18.3                           |

The uses to which the precious metals were put in fifty years down to 1888 are stated by Soetbeer to be:—

| Period         | Gold, Tons |              |          |       | Silver, Tons |              |          |        |
|----------------|------------|--------------|----------|-------|--------------|--------------|----------|--------|
|                | Coinage    | Manufactures | The East | Total | Coinage      | Manufactures | The East | Total  |
| 1831-40 . . .  | 50         | 180          | 10       | 240   | 2,700        | 2,000        | 2,200    | 6,900  |
| 1841-50 . . .  | 350        | 200          | 28       | 578   | 4,800        | 2,200        | 2,400    | 9,400  |
| 1851-60 . . .  | 1,633      | 280          | 100      | 2,013 | ...          | 2,700        | 11,300   | 14,000 |
| 1861-70 . . .  | 1,008      | 570          | 300      | 1,878 | ...          | 3,100        | 12,300   | 15,400 |
| 1871-80 . . .  | 849        | 840          | 120      | 1,809 | 1,200        | 4,500        | 10,800   | 16,500 |
| 50 years . . . | 3,890      | 2,070        | 558      | 6,518 | 8,700        | 14,500       | 39,000   | 62,200 |

The stock of silver is relatively much lower now, as compared with gold, than in the early years of the present century, when there were 33 tons of silver in the world for 1 ton of gold. If the price of silver were ruled by ratio it would have been as follows:—

| Period        | Ratio of Silver to Stock of Gold | Pence per Oz. |
|---------------|----------------------------------|---------------|
| 1821-40 . . . | 33.1                             | 60            |
| 1881-88 . . . | 18.6                             | 107           |

If the foregoing estimates be correct, there has been a dearth of both gold and silver, the production falling short of the consumption, viz.:—

|                   | 1851-80    |              |
|-------------------|------------|--------------|
|                   | Gold, Tons | Silver, Tons |
| Production . . .  | 6,358      | 57,273       |
| Consumption . . . | 6,518      | 62,200       |
| Deficit . . .     | 160        | 4,927        |

The deficit was probably met by melting down old plate. The current of bullion (coined or uncoined) between nations since 1861 was as follows:—

| Period        | Gold, Millions £ Sterling Imported |        |               |         |       |
|---------------|------------------------------------|--------|---------------|---------|-------|
|               | Great Britain                      | France | United States | Various | Total |
| 1861-70 . . . | 171                                | 189    | 31            | 121     | 512   |
| 1871-80 . . . | 180                                | 151    | 42            | 131     | 504   |

The current of bullion in the last eight years is more clearly shown as follows :—

| 1881-88           | Imports, Millions £ |        |       | Exports, Millions £ |        |       |
|-------------------|---------------------|--------|-------|---------------------|--------|-------|
|                   | Gold                | Silver | Total | Gold                | Silver | Total |
| U. Kingdom . . .  | 96                  | 66     | 162   | 96                  | 68     | 164   |
| France . . . . .  | 63                  | 62     | 125   | 67                  | 49     | 116   |
| United States . . | 64                  | 23     | 87    | 35                  | 41     | 76    |
| Spanish America . | 20                  | ...    | 20    | 4                   | 37     | 41    |
| The East . . . .  | 12                  | 116    | 128   | 2                   | 19     | 21    |
| Australia . . . . | 2                   | ...    | 2     | 34                  | ...    | 34    |
| Various . . . . . | 110                 | 36     | 146   | 129                 | 89     | 218   |
| Total . . . . .   | 367                 | 303    | 670   | 367                 | 303    | 670   |

Since 1881 Great Britain appears to have neither increased nor diminished her stock of gold, but to have exported a small quantity of silver. France has lost gold and gained silver: the United States has done exactly the reverse. India has absorbed both gold and silver.

The total current to and from the United States for sixty-eight years is stated thus :—

| Period             | Millions £ Sterling |         |
|--------------------|---------------------|---------|
|                    | Imports             | Exports |
| 1861-70 . . . . .  | 36                  | 3       |
| 1871-80 . . . . .  | 34                  | 93      |
| 1881-88 . . . . .  | 190                 | 358     |
| 68 years . . . . . | 260                 | 454     |

According to Mr. O'Connor, India received in thirty years (1860-89) and retained no less than :—

|                  |               |
|------------------|---------------|
| Gold . . . . .   | £ 113,200,000 |
| Silver . . . . . | 227,000,000   |
| Total . . . . .  | 340,200,000   |

To which he adds 102 millions for the preceding twenty-five years, making altogether 442 millions sterling in fifty-five years. He considers that the gold has been practically withdrawn from circulation, to be hoarded or converted into ornaments. Another writer says that in 250 years ending 1830 India absorbed 55,000 tons of

silver, worth 490 millions sterling. Official tables give the net imports as follows :—

| Period           | Millions £ Sterling |        |       |
|------------------|---------------------|--------|-------|
|                  | Gold                | Silver | Total |
| 1850-59 . . . .  | 18                  | 52     | 70    |
| 1860-69 . . . .  | 59                  | 101    | 160   |
| 1870-79 . . . .  | 18                  | 50     | 68    |
| 1880-86 . . . .  | 28                  | 50     | 78    |
| 37 years . . . . | 123                 | 253    | 376   |

Mr. N. Spallart summed up the production and consumption of precious metals in fifty years down to 1880 as follows :—

|                   | Value, Millions £ Sterling |        |       |
|-------------------|----------------------------|--------|-------|
|                   | Gold                       | Silver | Total |
| Coinage . . . . . | 543                        | 38     | 581   |
| The East . . . .  | 78                         | 351    | 429   |
| Manufactures . .  | 294                        | 131    | 425   |
| Total . . . . .   | 915                        | 520    | 1,435 |
| Production . . .  | 915                        | 520    | 1,435 |

In the above, "coinage" does not include what was minted in the East.

The weight of precious metals used in forty years in the various mints (including re-coinage) from 1850 to December 1889 was :—

|                      | Tons  |        | Aggregate Value, Millions £ |
|----------------------|-------|--------|-----------------------------|
|                      | Gold  | Silver |                             |
| Great Britain . . .  | 1,301 | 2,620  | 207                         |
| France . . . . .     | 2,159 | 5,135  | 349                         |
| Germany . . . . .    | 894   | 6,420  | 183                         |
| Russia . . . . .     | 1,102 | 2,580  | 178                         |
| Austria . . . . .    | 137   | 5,360  | 67                          |
| Italy . . . . .      | 123   | 2,530  | 40                          |
| Spain and Portugal . | 220   | 1,480  | 43                          |
| Scandinavia . . . .  | 35    | 230    | 7                           |
| Holland . . . . .    | 48    | 3,290  | 37                          |
| Belgium . . . . .    | 170   | 2,060  | 42                          |
| Europe . . . . .     | 6,189 | 31,705 | 1,153                       |
| United States . . .  | 2,096 | 11,460 | 397                         |
| Australia . . . . .  | 644   | ...    | 90                          |
| India . . . . .      | 15    | 29,270 | 265                         |
| Japan . . . . .      | 110   | 1,100  | 25                          |
| Spanish America . .  | 140   | 7,700  | 90                          |
| Total . . . . .      | 9,194 | 81,235 | 2,020                       |

The total is made up of 1227 millions sterling of gold, and 793 millions of silver money. The stocks of coined and uncoined bullion appear to have been at various dates approximately as follows :—

| A.D.           | Gold, Millions £ |          |       | Silver, Millions £ |          |       |
|----------------|------------------|----------|-------|--------------------|----------|-------|
|                | Coined           | Uncoined | Total | Coined             | Uncoined | Total |
| 1600 . . . . . | 29               | 87       | 116   | 102                | 174      | 276   |
| 1700 . . . . . | 75               | 108      | 183   | 225                | 225      | 450   |
| 1800 . . . . . | 126              | 256      | 382   | 360                | 400      | 760   |
| 1848 . . . . . | 157              | 343      | 500   | 388                | 580      | 968   |

| 1890 . . . . . | 5,640      | 3,180    | 8,820 | 64                            | 88,100       | 76,900   | 165,000 | 53                            |

It appears that coinage now absorbs nearly two-thirds of the total stock of gold, and more than half the silver, whereas forty years ago it took only 32 per cent. of gold, and 40 per cent. of silver.

The actual bulk of gold and silver coin in various countries, according to Spallart, in 1885 was as follows :—

|                              | Tons      |                | Aggregate<br>Value,<br>Millions £<br>Sterling |
|------------------------------|-----------|----------------|-----------------------------------------------|
|                              | Gold Coin | Silver<br>Coin |                                               |
| Great Britain . . . . .      | 915       | 2,420          | 144                                           |
| France . . . . .             | 1,335     | 16,500         | 328                                           |

| Algeria . . . . .            | 15        | 330            | 5                                             |
| Spanish America, &c. . . . . | 232       | 2,070          | 50                                            |
| The world . . . . .          | 5,925     | 88,100         | 1,591                                         |

The total value is made up of 790 millions sterling in gold coin and silver money nominally representing 801 millions, but worth only 642 millions.

In 1886 Spallart estimated the annual consumption for manufactures as follows :—

|                             | Gold, Oz. | Silver, Oz. | Per 1000 Population |             |
|-----------------------------|-----------|-------------|---------------------|-------------|
|                             |           |             | Gold, Oz.           | Silver, Oz. |
| U. States . . . . .         | 683,000   | 4,020,000   | 12                  | 70          |
| G. Britain . . . . .        | 600,000   | 2,520,000   | 16                  | 66          |
| France . . . . .            | 595,000   | 2,600,000   | 15                  | 65          |
| Germany . . . . .           | 420,000   | 2,870,000   | 9                   | 60          |
| Switzerland . . . . .       | 370,000   | 840,000     | 125                 | 285         |
| Austria . . . . .           | 84,000    | 1,120,000   | 2                   | 28          |
| Italy . . . . .             | 155,000   | 665,000     | 5                   | 22          |
| Russia . . . . .            | 85,000    | 1,100,000   | 1                   | 12          |
| Holland & Belgium . . . . . | 102,000   | 840,000     | 10                  | 84          |
| Various . . . . .           | 56,000    | 1,445,000   | ...                 | ...         |
| Total . . . . .             | 3,150,000 | 18,020,000  | ...                 | ...         |

The total makes up 90 tons gold and 515 tons silver yearly, which is in harmony with Soetbeer's estimate.

Besides the consumption for manufactures, gold coin loses 1 per cent. of its weight in fifty years, silver 1 per cent. in ten years. This means a yearly loss of 1½ tons of gold, and 88 tons of silver.

The following table shows the amount of gold and silver plate stamped yearly in the United Kingdom and France :—

| Date              | United Kingdom,<br>Oz. Yearly |           | Date           | France, Oz.<br>Yearly |           |
|-------------------|-------------------------------|-----------|----------------|-----------------------|-----------|
|                   | Gold                          | Silver    |                | Gold                  | Silver    |
| 1801-20 . . . . . | 6,080                         | 1,072,000 | 1830 . . . . . | 101,000               | 1,740,000 |

| Argentina . . . . .     | 10    | ...    | ...  | ... | 20    | 15                 |

Tables showing the acreage and production of the various kinds of grain will be found under *Agriculture*, p. 8. For consumption, see *Food*.

In the manufacture of grain it is found that 100 lbs. of wheat produce 82 lbs. of flour, and 100 lbs. of barley 78 of malt.

**GRAVITY, SPECIFIC****A.—COMPARED WITH WATER**

| <i>Liquids</i>     | <i>Timber</i>  | <i>Metals</i>     |
|--------------------|----------------|-------------------|
| Water . . . 100    | Cork . . . 24  | Zinc . . . 719    |
| Sea-water . . 103  | Poplar . . 38  | Cast iron . . 721 |
| Dead Sea . . 124   | Fir . . . 55   | Tin . . . 729     |
| Alcohol . . . 84   | Cedar . . 61   | Bar iron . . 779  |
| Olive-oil . . 92   | Pear . . . 66  | Steel . . . 783   |
| Turpentine . . 99  | Walnut . . 67  | Copper . . . 869  |
| Wine . . . 100     | Cherry . . 72  | Brass . . . 840   |

| Clay . . . . .     | 72                  | 31.0               |
| Coal . . . . .     | 80                  | 28.0               |
| Peat . . . . .     | 80                  | 28.0               |
| Brick . . . . .    | 120                 | 19.0               |
| Stone . . . . .    | 150                 | 15.0               |
| Granite . . . . .  | 166                 | 13.5               |
| Glass . . . . .    | 172                 | 13.0               |
| Iron . . . . .     | 470                 | 4.8                |
| Copper . . . . .   | 520                 | 4.3                |
| Silver . . . . .   | 630                 | 3.6                |
| Lead . . . . .     | 680                 | 3.3                |
| Gold . . . . .     | 1,155               | 2.0                |

**GYPSES**

The number in Europe reaches 712,000, viz. :—

|                            |                         |
|----------------------------|-------------------------|
| Great Britain . . . 18,000 | Austria . . . 197,000   |
| Russia . . . 15,000        | Roumania . . . 193,000  |
| Scandinavia . . . 7,000    | Turkey . . . 200,000    |
| Spain . . . 40,000         | Germany, &c. . . 42,000 |

**H.****HATS**

In 1835 M'Culloch estimated the value of hats made yearly in the United Kingdom at £2,400,000. In 1882 there were 12,000,000 men's hats made, worth £4,000,000. The hat industry flourished in New England in the eighteenth century; more than 10,000 beaver hats were made in 1731, and some exported, but in 1732 Great Britain prohibited the exportation.

**HAY AND STRAW**

The production is approximately as follows :—

|                           | Hay, Tons   | Straw, Tons | Collective Value, £ |
|---------------------------|-------------|-------------|---------------------|
| Great Britain . . .       | 8,500,000   | 6,500,000   | 25,600,000          |
| Ireland . . . . .         | 4,000,000   | 1,500,000   | 9,000,000           |
| France . . . . .          | 25,000,000  | 17,000,000  | 74,000,000          |
| Germany . . . . .         | 16,000,000  | 15,000,000  | 47,000,000          |
| Russia . . . . .          | 60,000,000  | 45,000,000  | 82,000,000          |
| Austria . . . . .         | 14,000,000  | 17,000,000  | 33,800,000          |
| Italy . . . . .           | 12,000,000  | 5,000,000   | 22,000,000          |
| Spain and Portugal . . .  | 6,500,000   | 9,500,000   | 18,000,000          |
| Sweden and Norway . . .   | 2,000,000   | 3,000,000   | 5,400,000           |
| Denmark . . . . .         | 1,000,000   | 2,000,000   | 3,600,000           |
| Holland . . . . .         | 3,000,000   | 1,000,000   | 6,900,000           |
| Belgium . . . . .         | 5,000,000   | 1,600,000   | 11,600,000          |
| Roumania and Servia . . . | 2,000,000   | 3,400,000   | 4,800,000           |
| Europe . . . . .          | 159,000,000 | 127,500,000 | 343,700,000         |
| United States . . .       | 42,000,000  | 60,000,000  | 104,000,000         |
| Total . . . . .           | 201,000,000 | 187,500,000 | 447,700,000         |

The production in the United States has been as follows :—

| Year           | Hay, Tons  | Straw, Tons | Collective Value, £ |
|----------------|------------|-------------|---------------------|
| 1840 . . . . . | 10,000,000 | 12,000,000  | 26,000,000          |
| 1850 . . . . . | 14,000,000 | 17,000,000  | 37,000,000          |
| 1860 . . . . . | 19,000,000 | 25,000,000  | 45,000,000          |
| 1870 . . . . . | 27,000,000 | 28,000,000  | 54,000,000          |
| 1880 . . . . . | 35,000,000 | 54,000,000  | 89,000,000          |
| 1886 . . . . . | 42,000,000 | 60,000,000  | 104,000,000         |

Official returns give only the quantity of hay; that of straw is estimated above at 1 ton per 50 bushels of grain.

In the United Kingdom the hay crop averages 30 cwt. per acre, in Prussia 33, in France 30, in Italy 30 on irrigated and 16 on unirrigated land, in the United States 24. Italy has 3 millions irrigated and 10 millions unirrigated producing hay.

Three tons of grass usually give one ton of hay.

The weekly consumption of hay is—160 lbs. for a horse, 100 for a cow, 30 for a pig, 10 for a sheep, 8 for a goat.

**HEMP**

The world's crop is worth about 10 millions sterling, and the value of the manufactured goods is between 25 and 30 millions; the statistics are in many countries mixed with those of flax. The Factory Report for the United Kingdom gives the hemp industry thus :—

| Year           | Factories | Spindles | Hands |
|----------------|-----------|----------|-------|
| 1870 . . . . . | 35        | 32,000   | 3,100 |
| 1878 . . . . . | 58        | 25,000   | 4,800 |
| 1885 . . . . . | 107       | 39,000   | 9,900 |

The production and consumption of hemp, as given by N. Spallart in 1885 were :—

|                    | Tons Produced | Tons Consumed |
|--------------------|---------------|---------------|
| Russia . . . .     | 120,000       | 56,000        |
| Austria . . . .    | 90,000        | 90,000        |
| Italy . . . . .    | 96,000        | 56,000        |
| France . . . . .   | 50,000        | 68,000        |
| Germany . . . .    | 10,000        | 30,000        |
| United States . .  | 13,000        | 16,000        |
| Other countries* . | 16,000        | 79,000        |
| Total . . . . .    | 395,000       | 395,000       |

The imports of hemp into the United Kingdom are the only guide to extent of manufacture, the value of which is approximately as below :—

| Year         | Consumed, Tons | Price per Ton, £ | Value of Manufactures, £ |
|--------------|----------------|------------------|--------------------------|
| 1810 . . . . | 48,000         | 58               | 8,600,000                |
| 1830 . . . . | 26,000         | 25               | 2,000,000                |
| 1840 . . . . | 30,000         | 27               | 2,400,000                |
| 1850 . . . . | 54,000         | 30               | 4,900,000                |
| 1860 . . . . | 35,000         | 30               | 1,900,000                |
| 1870 . . . . | 71,000         | 38               | 7,100,000                |
| 1880 . . . . | 73,000         | 29               | 5,400,000                |
| 1888 . . . . | 58,000         | 31               | 4,500,000                |

### HOLIDAY

On Bank-holiday, 5th August 1889, in London the number of visitors to museums, &c., was as follows :—

|                          |        |                        |        |
|--------------------------|--------|------------------------|--------|
| British Museum . . . .   | 5,200  | Zoological Gardens . . | 21,000 |
| National Gallery . . . . | 8,400  | Crystal Palace . . . . | 40,000 |
| Kensington Museum . . .  | 18,100 | Kew Gardens . . . . .  | 64,000 |

besides 11,000 to Tussaud's waxworks and 7000 to Windsor Castle.

### HOPS

|                     | Acres  | Crop, Tons | Value, £  |
|---------------------|--------|------------|-----------|
| England . . . .     | 65,000 | 26,000     | 3,120,000 |
| Germany . . . .     | 62,000 | 19,000     | 2,340,000 |
| France . . . . .    | 9,000  | 4,500      | 550,000   |
| United States . . . | 10,000 | 5,000      | 600,000   |

Germany consumes only three-fourths of her crop, but England has to import annually 7000 tons, her consumption averaging 33,000 tons. Returns for the United Kingdom show thus :—

| Period  | Acres Under Crop | Crop, Tons | Import, Tons | Annual Consumption, Tons |
|---------|------------------|------------|--------------|--------------------------|
| 1869-75 | 63,000           | 24,600     | 8,400        | 33,000                   |
| 1888-89 | 65,000           | 25,400     | 8,400        | 33,800                   |

### HORIZON

Objects at sea are visible at the following distances :—

| Elevation, Feet | Miles | Elevation, Feet | Miles |
|-----------------|-------|-----------------|-------|
| 5 . . . . .     | 3     | 200 . . . . .   | 18    |
| 10 . . . . .    | 4     | 300 . . . . .   | 23    |
| 20 . . . . .    | 6     | 500 . . . . .   | 30    |
| 50 . . . . .    | 9     | 800 . . . . .   | 37    |
| 100 . . . . .   | 13    | 1,000 . . . . . | 42    |

\* This table seems to omit Manilla, where there were 260,000 acres under hemp in 1880.

### HORSES

The number in each country will be found under *Cattle*, p. 109. A horse lives 25 years, but a tramway horse lasts only five years: horse-flesh is eaten in France, the carcase yielding 450 lbs. meat. Napoleon in 1812 crossed the Niemen with 100,000 horses, of which 95,000 died before he reached Moscow.

### HOTELS

On a given day in each year the number of guests in hotels at Paris was as follows :—

| Year | Number of Hotels | French Guests | Foreign Guests | Total   |
|------|------------------|---------------|----------------|---------|
| 1875 | 9,207            | 114,000       | 19,000         | 133,000 |
| 1879 | 10,189           | 140,000       | 41,000         | 181,000 |
| 1883 | 11,753           | 196,000       | 44,000         | 240,000 |

The hotels at Vienna admitted 240,000 guests during the whole year 1888. The hotels of Switzerland in 1889 were 1000 in number, making up 58,000 beds, employing 16,000 servants; the invested capital was £1,600,000, receipts £1,680,000, expenditure £1,150,000, and profit £530,000.

### HOUSES

The number of houses, inhabitants per house, and approximate value may be set down thus. We have no value as regards Portugal, which is estimated at the same ratio per inhabitant as in Spain :—

|                        | Houses     | Value, Millions £ | Average per House, £ | Average per Inhab., £ | Inhab. per House |
|------------------------|------------|-------------------|----------------------|-----------------------|------------------|
| United Kingdom . . .   | 7,100,000  | 2,424             | 340                  | 63                    | 5.4              |
| France . . . . .       | 9,080,000  | 1,704             | 187                  | 45                    | 4.2              |
| Germany . . . . .      | 5,770,000  | 1,232             | 214                  | 26                    | 8.0              |
| Russia . . . . .       | 11,436,000 | 701               | 62                   | 8                     | 8.0              |
| Austria . . . . .      | 5,000,000  | 501               | 100                  | 13                    | 7.8              |
| Italy . . . . .        | 4,420,000  | 394               | 90                   | 13                    | 6.6              |

# HOUSES

The annual increase of house property in various countries and cities is approximately as follows:—

|                  |            |                     |            |
|------------------|------------|---------------------|------------|
| U. Kingdom . . . | 33,000,000 | Sydney . . .        | 6,700,000  |
| London . . .     | 10,100,000 | Buenos Ayres . . .  | 5,500,000  |
| Scotland . . .   | 2,400,000  | United States . . . | 69,000,000 |
| France . . .     | 26,000,000 | New York . . .      | 6,400,000  |
| Paris . . .      | 5,200,000  | Philadelphia . . .  | 6,200,000  |
| Hamburg . . .    | 840,000    | Toronto . . .       | 320,000    |

Notable improvements in Paris and London have cost as follows:—

|                                 |           |
|---------------------------------|-----------|
|                                 | Cost, £   |
| Rue Rivoli, Paris . . .         | 2,860,000 |
| Boulevard Sebastopol . . .      | 1,390,000 |
| New Cannon Street, London . . . | 590,000   |
| Victoria Street . . .           | 330,000   |

Baron Haussman rebuilt a great portion of Paris in the years 1853 to 1869, at an outlay of 85 millions sterling.

## UNITED KINGDOM

The number of houses, population per house, and approximate valuation for Great Britain down to 1811, and the United Kingdom afterwards, showed thus:—

| Year | Houses    | Pop. per House | Rental, £   | Value, Millions £ | Value per Inhab., £ |
|------|-----------|----------------|-------------|-------------------|---------------------|
| 1801 | 1,870,000 | 5.6            | 9,400,000   | 170               | 11                  |
| 1811 | 2,102,000 | 5.7            | 14,000,000  | 252               | 14                  |
| 1821 | 3,572,000 | 5.8            | 20,300,000  | 366               | 17                  |
| 1831 | 4,101,000 | 5.9            | 24,500,000  | 441               | 18                  |
| 1841 | 4,775,000 | 5.6            | 41,500,000  | 747               | 28                  |
| 1851 | 4,694,000 | 5.8            | 50,000,000  | 900               | 33                  |
| 1861 | 5,131,000 | 5.7            | 61,200,000  | 1,102             | 38                  |
| 1871 | 5,632,000 | 5.6            | 86,400,000  | 1,555             | 48                  |
| 1881 | 6,485,000 | 5.4            | 117,500,000 | 2,115             | 60                  |
| 1888 | 7,100,000 | 5.4            | 134,700,000 | 2,424             | 63                  |

In 1887 the valuation of houses in the principal cities was:—

|                  | Rental, £  | Value, Millions £ | Per Inhabitant, £ |
|------------------|------------|-------------------|-------------------|
| London . . .     | 37,400,000 | 673               | 153               |
| Liverpool . . .  | 3,300,000  | 60                | 100               |
| Manchester . . . | 3,200,000  | 58                | 100.              |
| Birmingham . . . | 1,800,000  | 32                | 80                |
| Leeds . . .      | 1,200,000  | 22                | 63                |
| Sheffield . . .  | 1,100,000  | 20                | 63                |
| Bristol . . .    | 990,000    | 18                | 80                |
| Bradford . . .   | 980,000    | 18                | 80                |
| Nottingham . . . | 920,000    | 16                | 70                |
| Newcastle . . .  | 860,000    | 15                | 105               |
| Brighton . . .   | 670,000    | 12                | 110               |

The highest prices paid in London for building sites have been:—

| Year | Street             | Feet    | Sq. Feet | Price, £ | £ per Sq. Foot | £ per Acre |
|------|--------------------|---------|----------|----------|----------------|------------|
| 1880 | Cannon . . .       | 12 x 50 | 600      | 4,500    | 7.5            | 330,000    |
| 1880 | Grace Church . . . | ...     | ...      | ...      | 18.9           | 820,000    |
| 1886 | Old Broad . . .    | 42 x 30 | 1,285    | 37,000   | 28.8           | 1,260,000  |

In 1888 there were let on lease for eighty years six lots at Piccadilly and Charing Cross Road covering 19,000 square feet for £3600 per annum, being at the rate of £8300 per acre, the tenant erecting buildings worth £27,000. This would represent a selling value of £300,000 per acre for the land. House property has risen in value faster in London than throughout England. There is a

house in Lombard Street, the rent of which was £25 a year in 1665, and the building on the same site is now rented for £2600 a year under lease from 1877. The value of land in the suburbs is also prodigious. An acre at Hampstead was recently leased for building at £1000 a year for eighty years.

The rental and value of London show as follows:—

| Year | Houses  | Rental, £  | Value Million £ | Miles of Streets | Value per Mile, £ |
|------|---------|------------|-----------------|------------------|-------------------|
| 1801 | 130,000 | 3,700,000  | 67              | 470              | 142,000           |
| 1811 | 155,000 | 4,500,000  | 82              | 560              | 146,000           |
| 1821 | 170,000 | 5,300,000  | 96              | 610              | 157,000           |
| 1831 | 197,000 | 6,900,000  | 124             | 700              | 177,000           |
| 1841 | 256,000 | 9,600,000  | 174             | 905              | 192,000           |
| 1851 | 301,000 | 12,600,000 | 229             | 1,050            | 218,000           |
| 1861 | 369,000 | 16,800,000 | 306             | 1,290            | 235,000           |
| 1871 | 445,000 | 23,900,000 | 434             | 1,550            | 280,000           |
| 1881 | 520,000 | 33,400,000 | 601             | 1,740            | 343,000           |
| 1888 | 600,000 | 37,400,000 | 673             | 2,010            | 335,000           |

Since 1861 the value of houses in London has risen 14 millions per annum, of which probably 30 per cent. was merely an enhancement of value, leaving about 10 millions a year as the cost of new buildings.

The number of new houses built within a radius of 15 miles from Charing Cross, London, and the length of new streets opened, were:—

| Period   | Houses Built | Streets, Miles Opened | Annual Average |              |
|----------|--------------|-----------------------|----------------|--------------|
|          |              |                       | Houses         | Miles Street |
| 1871-80  | 136,200      | 410                   | 13,600         | 41           |
| 1881-88  | 142,100      | 278                   | 17,800         | 35           |
| 18 years | 278,300      | 688                   | 15,400         | 38           |

Glasgow built £360,000 per annum in the years 1883-87, viz:—

|                            |         |
|----------------------------|---------|
|                            | £       |
| Dwelling-houses . . .      | 130,000 |
| Churches and schools . . . | 49,000  |
| Warehouses . . .           | 121,000 |
| Improvements, &c. . .      | 60,000  |
| Total . . .                | 360,000 |

The above, however, does not include the value of sites, but only the structures. The cost of public buildings varies. Churches and schools may be built at £10 per head of the intended number of occupants. Hospitals sometimes cost £300 per bed. Chelsea barracks cost £245 a man.

Dwellings for the working classes are an urgent necessity, and could easily be constructed in all large towns. Those built in London have cost from 6d. to 8d. per cubic foot, the sites costing from 2s. to 5s. per square foot, the whole outlay being £36 per occupant, which involves an average rent of 2s. a week per room. The Peabody Buildings in 1889 showed an outlay of £900,000, including £500,000 given by the founder and £400,000 borrowed from Government; they had 11,300 rooms, occupied by 20,400 persons, or 5070 families; each family had weekly earnings that averaged 24s., and the average rent was 4s. 9d., or 26d. per room; gross rental £60,000, expenses and interest on loan £30,000, net profit £30,000. In 1882 Messrs. Guinness built in Dublin a block holding 540 rooms, to accommodate 180 families at 4s. a week. Sir Edward Guinness in 1889 gave £200,000 for a similar purpose in London.

The Town Council of Dublin also built a block for 1200 persons, on land which was bought at £6600 per acre: cost, £40,000; average rent, 4s. a week.

In a paper read by Mr. Hoey at the British Association,

1889, he stated that the population of Glasgow was lodged thus :—

| Living in                     | Number of Souls | Death-rate per 1000 |
|-------------------------------|-----------------|---------------------|
| One room . . . . .            | 133,000         | 35.0                |
| Two rooms . . . . .           | 235,000         | 27.7                |
| Three to four rooms . . . . . | 158,000         | 19.5                |
| Five or more rooms . . . . .  |                 | 11.2                |
| Total . . . . .               | 526,000         | 25.0                |

He further showed that the rents paid by the poor in London were exorbitant, a room 10 x 7 and 13 feet high, say 910 cubic feet, on a fifth floor, costing 18d. a week or £4 a year : often a whole family in a room 15 x 12 x 13, say 2300 cubic feet, paying 3s. or 4s. a week.

In 1887 the house property of the United Kingdom was as follows :—

|                             | Rental, £   | Value, Millions £ | £ per Inhabitant |
|-----------------------------|-------------|-------------------|------------------|
| London . . . . .            | 37,400,000  | 673               | 153              |
| Ten large towns . . . . .   | 15,020,000  | 270               | 81               |
| Rest of England . . . . .   | 64,780,000  | 1,166             | 55               |
| England and Wales . . . . . | 117,200,000 | 2,109             | 73               |
| Scotland . . . . .          | 12,600,000  | 228               | 57               |
| Ireland . . . . .           | 3,500,000   | 63                | 13               |
| United Kingdom . . . . .    | 133,300,000 | 2,400             | 63               |

There is no house-duty in Ireland. The houses subject to duty in Great Britain showed as follows :—

|                           | 1851      | 1871      | 1881      |
|---------------------------|-----------|-----------|-----------|
| Subject to duty . . . . . | 434,000   | 797,000   | 1,002,000 |
| Exempt . . . . .          | 3,214,000 | 3,875,000 | 4,569,000 |
| Total . . . . .           | 3,648,000 | 4,672,000 | 5,571,000 |

This shows the great improvement in the class of houses ; in 1851 only 12 per cent. were subject to duty, the ratio being 18 per cent. in 1881. The average value of a house in the United Kingdom was as follows :—

| Year           | £   | Year           | £   | Year           | £   |
|----------------|-----|----------------|-----|----------------|-----|
| 1801 . . . . . | 90  | 1841 . . . . . | 156 | 1871 . . . . . | 278 |
| 1821 . . . . . | 103 | 1851 . . . . . | 190 | 1881 . . . . . | 325 |
| 1831 . . . . . | 108 | 1861 . . . . . | 214 | 1888 . . . . . | 340 |

The average value of a house is now more than double what it was in 1841.

#### ENGLAND AND WALES

In 1688 Gregory King estimated the house rental at two millions sterling. In 1798 it was put down at £6,500,000. The first official valuation was in 1812, viz., £8,490,000, and a later one in 1831 amounted to £12,350,000, but Porter showed that farmhouses and cottages were exempted. These would probably constitute one-third of the total. The rental would therefore be :—

| Year           | Rental, £   | Value, Million £ | £ per Inhabitant |
|----------------|-------------|------------------|------------------|
| 1688 . . . . . | 2,000,000   | 36               | 6                |
| 1798 . . . . . | 6,500,000   | 117              | 14               |
| 1812 . . . . . | 12,700,000  | 229              | 21               |
| 1831 . . . . . | 18,500,000  | 333              | 24               |
| 1850 . . . . . | 42,000,000  | 756              | 42               |
| 1860 . . . . . | 52,000,000  | 936              | 47               |
| 1870 . . . . . | 70,000,000  | 1,276            | 55               |
| 1880 . . . . . | 100,100,000 | 1,802            | 69               |
| 1888 . . . . . | 118,500,000 | 2,133            | 73               |

The number of houses and souls per house was as follows :—

| Census         | Houses.   | Population per House |
|----------------|-----------|----------------------|
| 1801 . . . . . | 1,576,000 | 5.6                  |
| 1811 . . . . . | 1,798,000 | 5.6                  |
| 1821 . . . . . | 2,088,000 | 5.8                  |
| 1831 . . . . . | 2,482,000 | 5.6                  |
| 1841 . . . . . | 2,944,000 | 5.4                  |
| 1851 . . . . . | 3,278,000 | 5.5                  |
| 1861 . . . . . | 3,740,000 | 5.4                  |
| 1871 . . . . . | 4,259,000 | 5.3                  |
| 1881 . . . . . | 4,832,000 | 5.4                  |

#### Houses in England and Wales in 1862 :—

| Annual Rental, £    | Number    | Aggregate Rental, £ | Value, Millions £ | Ratio |
|---------------------|-----------|---------------------|-------------------|-------|
| Over 1000 . . . . . | 233       | 440,000             | 8                 | 0.7   |
| 500-1000 . . . . .  | 924       | 650,000             | 12                | 1.1   |
| 200-500 . . . . .   | 8,633     | 2,860,000           | 51                | 4.5   |
| 100-200 . . . . .   | 32,806    | 4,830,000           | 86                | 7.6   |
| 50-100 . . . . .    | 101,948   | 7,120,000           | 128               | 11.3  |
| 30-50 . . . . .     | 169,920   | 6,880,000           | 124               | 11.0  |
| 20-30 . . . . .     | 205,528   | 5,110,000           | 92                | 8.3   |
| Under 20 . . . . .  | 3,624,608 | 34,700,000          | 626               | 55.5  |
| Total . . . . .     | 4,144,600 | 62,590,000          | 1,127             | 100.0 |

#### Official returns for 1875 and 1886 compare as follows :—

| Rental   | 1875      | 1886      | Increase per Cent. | Amount of Rent |            |
|----------|-----------|-----------|--------------------|----------------|------------|
|          |           |           |                    | 1875           | 1886       |
| Under 20 | 3,922,000 | 4,626,000 | 18                 | 28,600,000     | 38,000,000 |
| 20-50    | 394,000   | 595,000   | 51                 | 11,700,000     | 17,800,000 |
| 50-100   | 119,000   | 167,000   | 40                 | 7,700,000      | 10,800,000 |
| Over 100 | 56,000    | 77,000    | 37                 | 11,100,000     | 14,700,000 |
| Total    | 4,491,000 | 5,465,000 | 22                 | 59,100,000     | 81,300,000 |

The above is exclusive of shops, which were as follows :—

|                | Number  | Rental, £  |
|----------------|---------|------------|
| 1875 . . . . . | 295,000 | 14,300,000 |
| 1886 . . . . . | 366,000 | 18,900,000 |

The valuations for house-duty are about 10 per cent. lower than the income-tax assessments.

#### SCOTLAND.

The number and rental valuation showed thus :—

| Year           | Number  | Rental, £  | £ per House | Capital Value, Millions £ |
|----------------|---------|------------|-------------|---------------------------|
| 1801 . . . . . | 295,000 | ...        | ...         | ...                       |
| 1811 . . . . . | 304,000 | ...        | ...         | ...                       |
| 1821 . . . . . | 341,000 | ...        | ...         | ...                       |
| 1831 . . . . . | 369,000 | ...        | ...         | ...                       |
| 1841 . . . . . | 503,000 | ...        | ...         | ...                       |
| 1851 . . . . . | 370,000 | 5,000,000  | 14          | 90                        |
| 1861 . . . . . | 393,000 | 5,500,000  | 14          | 100                       |
| 1871 . . . . . | 412,000 | 7,300,000  | 18          | 131                       |
| 1881 . . . . . | 739,000 | 11,800,000 | 16          | 212                       |
| 1888 . . . . . | ...     | 12,700,000 | ...         | 229                       |

Before 1851 the Census collectors counted as houses each separate holding or flat.

# HOUSES

315

# HOUSES

## GREAT BRITAIN.

The following table shows the number of houses and approximate rental at each Census :—

| Census         | Number    | Rental, £   | Value, Millions £ |
|----------------|-----------|-------------|-------------------|
| 1801 . . . . . | 1,870,000 | 9,400,000   | 170               |
| 1811 . . . . . | 2,102,000 | 14,000,000  | 252               |
| 1821 . . . . . | 2,429,000 | 17,300,000  | 311               |
| 1831 . . . . . | 2,851,000 | 21,500,000  | 387               |
| 1841 . . . . . | 3,447,000 | 38,500,000  | 693               |
| 1851 . . . . . | 3,648,000 | 47,000,000  | 846               |
| 1861 . . . . . | 4,139,000 | 58,200,000  | 1,048             |
| 1871 . . . . . | 4,672,000 | 82,700,000  | 1,489             |
| 1881 . . . . . | 5,571,000 | 114,200,000 | 2,056             |

Colquhoun's classification of houses in Great Britain, excluding Ireland, in 1812 was as follows :—

| Rental, £      | Number  |           |           | Value, Millions £ |
|----------------|---------|-----------|-----------|-------------------|
|                | Urban   | Rural     | Total     |                   |
| Over 100 . . . | 6,500   | 500       | 7,000     | 18                |
| 40-100 . . .   | 30,000  | 6,000     | 36,000    | 41                |
| 20-40 . . .    | 100,000 | 20,000    | 120,000   | 72                |
| 10-20 . . .    | 200,000 | 100,000   | 300,000   | 89                |
| Under 10 . . . | 579,000 | 995,000   | 1,574,000 | 110               |
| Total . . .    | 915,500 | 1,121,500 | 2,037,000 | 330               |

A classification published in 1881 was as follows :—

| Class       | Houses    | Rental, £   | Average Rental, £ | Ratio of Houses |
|-------------|-----------|-------------|-------------------|-----------------|
| 1 . . .     | 21,000    | 14,000,000  | 665               | 0.4             |
| 2 . . .     | 238,000   | 28,500,000  | 120               | 4.3             |
| 3 . . .     | 512,000   | 17,900,000  | 35                | 9.3             |
| 4 . . .     | 1,294,000 | 19,400,000  | 15                | 23.4            |
| 5 . . .     | 3,410,000 | 34,400,000  | 10                | 62.6            |
| Total . . . | 5,475,000 | 114,200,000 | 21                | 100.0           |

The annual consumption of bricks was known down to 1850, when the tax was abolished. If the same ratio per house as in 1821-50 be supposed from 1850 to 1881, the consumption in sixty years will show thus :—

## Annual Average

| Period        | Million Bricks | Houses Built | Bricks per Inhabitant |
|---------------|----------------|--------------|-----------------------|
| 1821-30 . . . | 1,210          | 42,000       | 78                    |
| 1831-40 . . . | 1,530          | 59,600       | 90                    |
| 1841-50 . . . | 1,662          | 20,100       | 85                    |
| 1851-60 . . . | 1,884          | 49,100       | 86                    |
| 1861-70 . . . | 1,910          | 53,300       | 84                    |
| 1871-80 . . . | 3,240          | 89,900       | 120                   |

English bricks measure 9 × 4½ × 3 inches, and weigh 8 lbs., or 3 tons per 1000. An Adams or Liddell machine, 16-horse power, can make 30,000 daily, the average of hand-made bricks per moulder being 4000 a day. Fire-bricks will resist a crushing force varying from 600 up to 300 lbs. per square inch.

## IRELAND

The number of houses at each Census compared thus with population :—

| Census | Number    | Pop. per House | Census | Number  | Pop. per House |
|--------|-----------|----------------|--------|---------|----------------|
| 1821   | 1,143,000 | 6.0            | 1861   | 992,000 | 5.8            |
| 1831   | 1,250,000 | 6.2            | 1871   | 960,000 | 5.6            |
| 1841   | 1,328,000 | 6.2            | 1881   | 914,000 | 5.7            |
| 1851   | 1,046,000 | 6.3            | ...    | ...     | ...            |

The Census of 1871 classified the houses the same as in 1841 thus :—

| Houses of         | 1841      | 1871    | Decrease, per Cent. |
|-------------------|-----------|---------|---------------------|
| One room . . .    | 491,000   | 156,000 | 68                  |
| Two to four rooms | 533,000   | 357,000 | 33                  |
| Five or more . .  | 304,000   | 449,000 | ...                 |
| Total . . .       | 1,328,000 | 962,000 | 28                  |

## FRANCE

The number of houses and approximate value are shown thus :—

| Year | Houses    | Value, Millions £ | Pop. per House | Windows per House | Value per House, £ |
|------|-----------|-------------------|----------------|-------------------|--------------------|
| 1826 | 6,484,000 | 510               | 4.9            | 4.4               | 80                 |
| 1836 | 6,805,000 | 720               | 5.0            | 4.5               | 106                |
| 1846 | 7,146,000 | 850               | 5.5            | 4.9               | 120                |
| 1856 | 7,633,000 | 985               | 4.8            | 5.0               | 130                |
| 1866 | 7,811,000 | 1,150             | 4.9            | 5.5               | 148                |
| 1882 | 8,813,000 | 1,550             | 4.3            | 5.6               | 175                |
| 1888 | 9,081,000 | 1,704             | 4.2            | ...               | 187                |

Lavoisier valued the houses in 1789 at 280 millions sterling; Chaptal in 1815 at 462 millions. The next valuation was in 1835 by Moreau, only rural buildings, which he set down at 161 millions sterling, an advance of 19 millions in twenty years. In 1869 the Embassy Report gives a total of 1200 millions, and in 1884 the Minister of Finance makes it 1600 millions sterling. This gives an average building value increase of 26 millions per annum, say 1704 millions for 1888. If we compare the houses of 1835 with those of 1888 we find as follows :—

| Windows      | Houses    |           | Ratio |       |
|--------------|-----------|-----------|-------|-------|
|              | 1835      | 1888      | 1835  | 1888  |
| One . . .    | 2,164,000 | 2,047,000 | 32.2  | 22.4  |
| Two to four  | 2,747,000 | 3,658,000 | 40.8  | 40.2  |
| Five or more | 1,816,000 | 3,376,000 | 27.0  | 37.4  |
| Total . . .  | 6,727,000 | 9,081,000 | 100.0 | 100.0 |

Cabins of one window form a much smaller ratio, while houses of the best class have nearly doubled in number.

In eight years ending December 1887 the official returns showed as follows :—

|                    | Number    | Per Annum |
|--------------------|-----------|-----------|
| New houses . . .   | 1,048,000 | 131,000   |
| Pulled down . . .  | 703,000   | 88,000    |
| Net increase . . . | 345,000   | 43,000    |

The classification of houses in 1868 was as follows :—

| Class               | Houses    | Ratio |
|---------------------|-----------|-------|
| Gentry . . .        | 158,000   | 2.2   |
| Commercial, &c. . . | 583,000   | 7.9   |
| Tradesmen . . .     | 2,167,000 | 29.4  |
| Operatives, &c. . . | 4,453,000 | 60.5  |
| Total . . .         | 7,361,600 | 100.0 |

The growth of house property in Paris was as follows :—

| Year           | Millions £ | Per Inhabitant, £ |
|----------------|------------|-------------------|
| 1848 . . . . . | 81         | 82                |
| 1860 . . . . . | 188        | 109               |
| 1870 . . . . . | 223        | 122               |
| 1882 . . . . . | 286        | 128               |

The number of houses compared with population at two periods thus :—

| Year       | Houses | Population | Inhabitants per House |
|------------|--------|------------|-----------------------|
| 1817 . . . | 28,800 | 714,000    | 25                    |
| 1880 . . . | 76,100 | 2,240,000  | 30                    |

Each house represents nine *logements* or residences, owing to the custom of flats, and in 1882 these were 685,000 in number, and were let as follows :—

| Rent, £      | Number  | Rental, £  | Value, Millions £ | Ratio |
|--------------|---------|------------|-------------------|-------|
| Over 500 . . | 1,920   | 1,100,000  | 17                | 6.0   |
| 160 to 500 . | 13,100  | 4,200,000  | 63                | 22.0  |
| 40 to 160 .  | 65,250  | 6,300,000  | 94                | 32.7  |
| 15 to 40 . . | 135,400 | 2,800,000  | 42                | 14.8  |
| Under 15 . . | 469,000 | 4,700,000  | 70                | 24.5  |
| Total . . .  | 684,670 | 19,100,000 | 286               | 100.0 |

In 1882 a sum of £1,100,000 was expended in buildings for the working-classes, to accommodate 3000 families or 10,000 souls, say £110 per head, each *logement* being supplied with gas and water, the rent 8s. a week: total rent £60,000 a year, or 5½ per cent. on first outlay.

In 1879 the official estimated rental of all houses in France was 74 millions sterling, from which, for purposes of taxation, the Government allowed an abatement of 20 per cent. for repairs, &c., making the net rental 59 millions. In 1884 the Finance Minister estimated the gross rental at 88 millions sterling, which would represent a capital value of 1600 millions. The tax-collector's valuation the same year, after deducting one-fifth for repairs, was 1280 millions sterling, which confirms the Minister's estimate as above. Building sites in Paris, according to Yves Guyot, have quintupled in value in sixty years, the highest price in 1826 being £18 per square metre, and in 1883 ranging from £80 to £120: the maximum may therefore be taken as £10 per square foot, against £20 in London (even £30 having been paid in the latter city). In 1887 there were 250,000 persons in Paris living in furnished apartments, say 11 per cent. of the population :—

#### Ordinary Rent per Annum

| Unfurnished             | £  | Furnished (Boulevards)  | £   |
|-------------------------|----|-------------------------|-----|
| 1 room, suburbs . . .   | 8  | 3 rooms, 5th flat . . . | 160 |
| 2 rooms, suburbs . . .  | 12 | 3 rooms, 4th flat . . . | 200 |
| 2 rooms, Passy . . .    | 15 | 3 rooms, 3rd flat . . . | 250 |
| 3 rooms, Madeleine . .  | 20 | 3 rooms, and flat . . . | 300 |
| 3 rooms, Rue Rivoli . . | 30 | 4 rooms, Rue Rivoli . . | 400 |
| 3 rooms, Rue Rivoli . . | 50 | 5 rooms, Rue Rivoli . . | 600 |

#### GERMANY

An official report for Prussia in 1869 gave the number and rental of houses. In the following table the value is capitalised at 18 times the rental :—

|               | Number    | Rental, £  | Value, Millions £ |
|---------------|-----------|------------|-------------------|
| Urban . . . . | 467,000   | 8,400,000  | 151               |
| Rural . . . . | 1,701,000 | 5,100,000  | 92                |
| Total . . . . | 2,168,000 | 13,500,000 | 243               |

In the same year the urban house property of Saxony was valued at 70 millions sterling, that of rural being apparently no more than 10 millions. These two kingdoms form exactly two-thirds of the German Empire as regards population, and we may conclude that the total house property of Germany in 1869 was of the value of 485 millions sterling. Official returns for Berlin show as

follows (except that the capitalisation at 18 years' rent is mine) :—

| Year | Number of Houses | Rent, £   | Value, £    | Value per House, £ |
|------|------------------|-----------|-------------|--------------------|
| 1867 | 14,100           | 3,390,000 | 61,100,000  | 4,400              |
| 1872 | 15,050           | 5,370,000 | 96,700,000  | 6,500              |
| 1882 | 19,700           | 8,800,000 | 158,400,000 | 8,000              |

The total value of house property in 1888 may be estimated thus :—

|                   | Population | Houses, Millions £ | £ per Head |
|-------------------|------------|--------------------|------------|
| Berlin . . . .    | 1,460,000  | 158                | 108        |
| 114 cities . . .  | 6,900,000  | 310                | 45         |
| Rural districts . | 38,200,000 | 764                | 20         |
| Total . . . .     | 46,560,000 | 1,232              | 26         |

In four years ending 1886 Hamburg put up new suburbs and houses worth £3,350,000, say £840,000 per annum, the value of the sites being 60, and the buildings 40 per cent. of the total. Overcrowding in the large cities is as bad as in England, official returns showing the ratio of population living in one room as follows :—

| City       | Year | Per 1000 Inhab. | City    | Year | Per 1000 Inhab. |
|------------|------|-----------------|---------|------|-----------------|
| Königsberg | 1864 | 560             | Leipzig | 1871 | 471             |
| Chemnitz   | 1871 | 702             | Hamburg | 1875 | 356             |
| Frankfort  | 1871 | 225             | Leipzig | 1875 | 214             |

There was a marked improvement in Leipzig between 1871 and 1875; in the former year 108 per 1000 of the population lived in cellars.

In 1875 Leipzig had 3455 houses (comprising probably 18,000 flats or residences), which contained 140,000 souls, viz :—

| Class of House | Inhabitants per House | Number of Houses | Approximate Population |
|----------------|-----------------------|------------------|------------------------|
| 1st . . . .    | Up to 10              | 481              | 4,000                  |
| 2nd . . . .    | 11-20                 | 661              | 10,000                 |
| 3rd . . . .    | 21-40                 | 1,138            | 36,000                 |
| 4th . . . .    | Over 40               | 1,175            | 90,000                 |
| Total . . . .  | ...                   | 3,455            | 140,000                |

#### RUSSIA

There are 11,436,000 houses, but no returns of valuation. Strebinsky estimated the poorest kind of rural dwellings at £27 sterling, and a general average of £40 may be taken. As regards the 787,000 houses in cities, they may be estimated at 10 per cent. per inhabitant less than in Germany. The account will stand thus :—

|                 | Houses     | Population | Per Inhabitant, £ | Value, Mill. £ |
|-----------------|------------|------------|-------------------|----------------|
| St Petersburg   | 787,000    | 810,000    | 97                | 79             |
| 87 cities . . . | 4,900,000  | 40         | 196               |                |
| Rural . . . .   | 10,649,000 | 78,200,000 | 5½                | 426            |
| Total . . . .   | 11,436,000 | 83,910,000 | 7½                | 701            |

Of the houses in St. Petersburg and 87 other cities there were 127,000 of stone and 660,000 of wood; perhaps the term stone also includes brick.

In 1867 Buschen estimated the value of all buildings in Russia at 270 millions sterling, that is, dwelling-houses 150 millions, factories, &c., 120 millions.

AUSTRIA-HUNGARY

The last Census does not give the number of houses in Hungary, which may, however, be estimated at 2,000,000. The number in Austria has increased in the same ratio as population :—

|                   | 1840      | 1880      |
|-------------------|-----------|-----------|
| Austria . . . . . | 2,364,000 | 2,996,000 |
| Hungary . . . . . | 1,732,000 | 2,000,000 |
| Total . . . . .   | 4,096,000 | 4,996,000 |

In Austria the houses in 1880 were as follows :—

|                  | Number    | Approximate Value, £ | Per House, £ |
|------------------|-----------|----------------------|--------------|
| Vienna . . . . . | 183,900   | 102,000,000          | 545          |
| Towns . . . . .  | 388,100   | 77,600,000           | 200          |
| Rural . . . . .  | 2,424,000 | 121,200,000          | 50           |
| Total . . . . .  | 2,996,000 | 300,800,000          | 100          |

The house property of Hungary, at the same general ratio of £100 per house, would amount to 200 millions sterling, making a total of 501 millions for the whole Empire. In 1883 Roschmann valued the houses of Austria (without Hungary) at 256 millions sterling; but this seems 15 per cent. too low.

In 1886 the annual rental of Vienna showed as follows :—

| Rent                | Houses  | Gross Rental, £ | Ratio of Houses |
|---------------------|---------|-----------------|-----------------|
| Under £20 . . . . . | 89,192  | 1,200,000       | 48.5            |
| 20-50 . . . . .     | 68,993  | 2,200,000       | 37.5            |
| 50-100 . . . . .    | 17,736  | 1,200,000       | 9.7             |
| Over 100 . . . . .  | 7,985   | 1,100,000       | 4.3             |
| Total . . . . .     | 183,906 | 5,700,000       | 100.0           |

ITALY

Neumann Spallart estimates the house property of Italy at 360 millions sterling, although the official value in 1881 was only 240 millions, but the latter was confessedly one-third too low. The *Archivio* gives the value in 1880 as 380 millions sterling. Approximately the house property may be estimated thus :—

|                 | Houses    | Population | Rental, £  | Value, Millions £ | £ per Inhab. |
|-----------------|-----------|------------|------------|-------------------|--------------|
| Urban . . . . . | 650,000   | 5,100,000  | 8,400,000  | 153               | 30           |
| Rural . . . . . | 3,770,000 | 24,100,000 | 13,400,000 | 241               | 10           |
| Total . . . . . | 4,420,000 | 29,200,000 | 21,800,000 | 394               | 13           |

The house property of Rome is estimated at 14 millions sterling, or about £45 per inhabitant.

HOLLAND

The official returns of house property show number and rental :—

| Year           | Houses Taxed | Rental, £ | Value, £    |
|----------------|--------------|-----------|-------------|
| 1877 . . . . . | 372,400      | 6,060,000 | 109,000,000 |
| 1883 . . . . . | 398,900      | 6,660,000 | 120,000,000 |

This represents only the houses above a certain letting value, as the Census of 1879 showed 729,000 inhabited houses, of which 379,000 were subject to house-duty, and

350,000 were exempted. The assessment of 1880 showed as follows :—

|                           |         |
|---------------------------|---------|
| Over £80 rental . . . . . | 13,673  |
| £32 to £80 . . . . .      | 30,558  |
| Under £32 . . . . .       | 313,218 |

Total . . . . . 357,449

We may add 10 per cent. to the official valuation, say 12 millions sterling, as the value of the untaxed houses, which is equal to £34 per house. This makes the total house property of Holland worth 132 millions sterling.

SPAIN

In 1832 the *Junta de Medios* valued all buildings at 243 millions sterling, of which 68 millions were for public buildings and factories, the rest for dwelling-houses: the average was £20 per head of the population, and at the same rate Spain would now have 340 millions worth of house property distributed approximately as follows :—

|                     | Houses    | Population | Rental, £  | Value, Millions £ | £ per Inhab. |
|---------------------|-----------|------------|------------|-------------------|--------------|
| 28 cities . . . . . | 380,000   | 2,100,000  | 5,000,000  | 90                | 45           |
| Rural . . . . .     | 2,600,000 | 14,800,000 | 14,000,000 | 250               | 17           |
| Total . . . . .     | 2,980,000 | 16,900,000 | 19,000,000 | 340               | 20           |

SCANDINAVIA

Official valuations of house property in Sweden distinguish urban from rural; in Norway, give only urban, and in Denmark, confuse the same with landed property. The values are approximately as follows :—

|                   | House Property, Millions £ |       |       | £ per Inhabitant |       |       |
|-------------------|----------------------------|-------|-------|------------------|-------|-------|
|                   | Urban                      | Rural | Total | Urban            | Rural | Total |
| Sweden . . . . .  | 64                         | 16    | 80    | 72               | 4     | 17    |
| Norway . . . . .  | 10                         | 7     | 17    | 30               | 4     | 9     |
| Denmark . . . . . | 31                         | 9     | 40    | 60               | 6     | 20    |
| Total . . . . .   | 105                        | 32    | 137   | 63               | 5     | 16    |

In Sweden 9 per cent. of house property stood for schools, &c.

BELGIUM

The Census returns of Belgium show :—

| Year           | Number of Inhabited Houses | Population per House |
|----------------|----------------------------|----------------------|
| 1846 . . . . . | 799,000                    | 5.42                 |
| 1856 . . . . . | 834,000                    | 5.43                 |
| 1866 . . . . . | 930,000                    | 5.19                 |
| 1880 . . . . . | 1,061,000                  | 5.20                 |

The official rental valuation in 1884 was £5,900,000, equal to a capital value of 106 millions sterling.

UNITED STATES

The Census of 1880 showed 8,956,000 houses. Compared with the numbers at previous Censuses, the existing houses in 1880 would appear approximately as follows :—

|                             | Ratio |
|-----------------------------|-------|
| Built before 1840 . . . . . | 27.4  |
| 1840-1850 . . . . .         | 9.4   |
| 1850-1860 . . . . .         | 18.2  |
| 1860-1870 . . . . .         | 23.4  |
| 1870-1880 . . . . .         | 21.6  |
| Total . . . . .             | 100.0 |

The first settlers lived in wooden houses, the ordinary cost of which, in 1684, was estimated at £5 sterling, a clergyman's house costing £35. Fires were frequent. The first brick-kiln was at Salem, Massachusetts, in 1629, and Mr. Coddington built the first brick house at Boston in 1638, the number reaching 1000 by the year 1700. The house which W. Penn built at Philadelphia was of bricks brought from England, and cost £5000.

The earliest estimate of house property was in 1790, when there was found to be 277,000 houses, valued at £29,200,000 sterling, being £105 per house. The number of houses at the following dates was:—

| Year       | Houses    | Population | Inhabitant per House |
|------------|-----------|------------|----------------------|
| 1840 . . . | 2,430,000 | 17,069,000 | 7.1                  |
| 1850 . . . | 3,362,000 | 23,192,000 | 6.9                  |
| 1860 . . . | 4,970,000 | 31,443,000 | 6.3                  |
| 1870 . . . | 7,043,000 | 38,558,000 | 5.5                  |
| 1880 . . . | 8,956,000 | 50,410,000 | 5.5                  |

According to the Census of 1840, there were 54,100 houses built during the year, namely, 45,700 of wood, and 8400 of brick or stone, representing a total value of £8,800,000, say £160 per house, viz:—

| State               | Houses Built | Value, £  | Value per House, £ |
|---------------------|--------------|-----------|--------------------|
| New York . . .      | 6,400        | 1,520,000 | 240                |
| Pennsylvania . . .  | 4,400        | 1,100,000 | 250                |
| Illinois . . . . .  | 4,400        | 440,000   | 100                |
| Ohio . . . . .      | 3,800        | 790,000   | 210                |
| Massachusetts . . . | 1,600        | 580,000   | 360                |
| Other States . . .  | 33,500       | 4,370,000 | 130                |
| Total . . . . .     | 54,100       | 8,800,000 | 160                |

The number of new houses built yearly in the Union since 1840 is shown officially as follows:—

|                   |         |
|-------------------|---------|
| 1841-50 . . . . . | 93,200  |
| 1851-60 . . . . . | 161,000 |
| 1861-80 . . . . . | 199,000 |
| 1887 . . . . .    | 303,000 |

In 1880 the Census showed 156,000 men engaged in building, the annual value of new houses being put down at 35 millions sterling, but in 1887 it was estimated at 86 millions sterling; the average cost of city houses was estimated at £940, and of rural at £210 each. The following annual returns of city buildings are given:—

| City                  | New Houses | Value, £  | Value per House, £ | Years   |
|-----------------------|------------|-----------|--------------------|---------|
| New York . . . . .    | 1,950      | 6,400,000 | 3,240              | 1886-88 |
| Philadelphia . . . .  | 8,202      | 6,240,000 | 760                | 1888    |
| Kansas City . . . . . | 4,510      | 2,040,000 | 440                | 1886-88 |

The value of house property in some cities was as follows:—

| Year  | City                 | Value, Millions £ | Population | £ per Head |
|-------|----------------------|-------------------|------------|------------|
| 1888  | New York . . . . .   | 271               | 1,500,000  | 180        |
| 1888  | Boston . . . . .     | 117               | 500,000    | 234        |
| 1880  | Philadelphia . . . . | 119               | 850,000    | 140        |
| 1880  | Brooklyn . . . . .   | 45                | 570,000    | 80         |
| 1880  | St. Louis . . . . .  | 32                | 350,000    | 92         |
| Total | ...                  | 584               | 3,770,000  | 155        |

The increase of value in New York from 1880 to 1888 was 49 millions sterling, that is, 7 millions per annum. There is no city in England equal in valuation per inhabitant to Boston or New York, but the Australian cities are higher, Melbourne being £29 higher than New York, and Sydney £11 over Boston.

The average value of each house built in 1840 was £160, and in 1887 it was £285. The total value of house property in the Union may be estimated for various dates thus:—

| Year       | Houses     | Average Value, £ | Millions, £ | £ per Inhab. |
|------------|------------|------------------|-------------|--------------|
| 1870 . . . | 7,043,000  | 220              | 1,550       | 40           |
| 1880 . . . | 8,956,000  | 240              | 2,160       | 43           |
| 1890 . . . | 11,400,000 | 250              | 2,850       | 46           |

This shows an average value per head much below what it is in England, namely, £73.

CANADA

In Montreal the years 1837-88 averaged 1005 new houses, valued at £860,000, say £860 each, or £100 higher than in Philadelphia. The value of houses built at Toronto during the year 1880 was £320,000. In 1887 Upper Canada had, by official returns, a value of £38,500,000 in farm-buildings exclusive of towns. The total value of house property in the Dominion may be estimated thus:—

|                 | Population | House, Value £ per Head | Millions £ |
|-----------------|------------|-------------------------|------------|
| Urban . . . . . | 460,000    | 60                      | 27         |
| Rural . . . . . | 4,560,000  | 22                      | 100        |
| Total . . . . . | 5,020,000  | 25                      | 127        |

AUSTRALIA

House property is much more valuable compared with population than it is in Europe. In 1888, for example, Sydney and Melbourne showed thus:—

|                     | Population | Rental, £ | Value, £   | £ per Inhabitant |
|---------------------|------------|-----------|------------|------------------|
| Sydney . . . . .    | 367,000    | 5,220,000 | 78,300,000 | 211              |
| Melbourne . . . . . | 438,000    | 5,320,000 | 79,800,000 | 181              |

There is at Melbourne a block of houses valued at £494,000, the site of which was bought in 1838 for £45, and close to it is Menzies' Hotel, recently sold for £150,000, the site of which cost £10 in 1840.

The following table shows approximately the value of all house property in the seven colonies:—

|                        | Value, Millions £ |       |       | £ per Inhabitant |       |       |
|------------------------|-------------------|-------|-------|------------------|-------|-------|
|                        | Urban             | Rural | Total | Urban            | Rural | Total |
| N. S. Wales . . . . .  | 78                | 14    | 92    | 211              | 21    | 83    |
| Victoria . . . . .     | 80                | 11    | 91    | 181              | 18    | 83    |
| New Zealand . . . . .  | 20                | 5     | 25    | 100              | 10    | 40    |
| South Australia . . .  | 11                | 2     | 13    | 100              | 10    | 40    |
| Queensland . . . . .   | 9                 | 3     | 12    | 100              | 10    | 30    |
| Tasmania . . . . .     | 4                 | 1     | 5     | 100              | 10    | 33    |
| W. Australia . . . . . | 1                 | ...   | 1     | 100              | 10    | 25    |
| Total . . . . .        | 203               | 36    | 239   | 170              | 15    | 67    |

CAPE COLONY

In 1883 the house property of the principal towns was officially valued thus:—

|                        | Population | Value, £  | £ per Inhabitant |
|------------------------|------------|-----------|------------------|
| Cape Town . . . . .    | 45,000     | 4,980,000 | 110              |
| Port Elizabeth . . . . | 13,000     | 1,950,000 | 150              |
| Kimberley . . . . .    | 14,000     | 1,710,000 | 122              |
| Total . . . . .        | 72,000     | 8,640,000 | 120              |

## HONG-KONG

In 1889 the best building sites fetched £3 per square foot, or £130,000 per acre.

## ARGENTINE REPUBLIC

The classification of houses at Buenos Ayres in 1889 was as follows:—

| Yearly Rent       | Houses | Approximate Value, £ |
|-------------------|--------|----------------------|
| Under £50 . . . . | 3,067  | 1,600,000            |
| £50-£100 . . . .  | 10,320 | 9,500,000            |
| £100-£200 . . . . | 12,506 | 23,600,000           |
| £200-£300 . . . . | 6,512  | 21,100,000           |
| Over £300 . . . . | 4,835  | 28,700,000           |
| Total . . . .     | 37,248 | 84,500,000           |

The increase in eight years was exceedingly rapid, the official returns for 1881 having shown 22,700 houses valued at £39,800,000 and owned as follows:—

|                          | Value, £   |
|--------------------------|------------|
| By Argentines . . . .    | 22,800,000 |
| Italians . . . . .       | 6,800,000  |
| Other foreigners . . . . | 10,200,000 |
| Total . . . . .          | 39,800,000 |

In eight years there were built 14,500 new houses, and the average annual increase of house property was £5,500,000 sterling. The average value of each house was £1700 in 1881 and £2,300 in 1889. The province of Buenos Ayres, outside the city, had 106,000 houses in 1881, valued at £12,300,000, say £120 per house or £22 per inhabitant. The houses in the other 13 provinces were estimated at 35 millions sterling, or £17 per inhabitant. The total for the Republic, including public buildings, was £94,500,000.

## URUGUAY

In 1884 the value of house property was 28 millions sterling, about £45 per inhabitant. New houses at Monte-Video show an average of £230,000 per annum.

## HUNTING

## UNITED KINGDOM

The annual shooting is estimated thus:—

|                         | Number     | Value, £  |
|-------------------------|------------|-----------|
| Hares and rabbits . . . | 30,000,000 | 2,200,000 |
| Grouse . . . . .        | 500,000    | 50,000    |
| Partridges . . . . .    | 400,000    | 30,000    |
| Pheasants, &c. . . . .  | 900,000    | 90,000    |
| Deer . . . . .          | 10,500     | 50,000    |
| Total . . . . .         | ...        | 2,420,000 |

## BELGIUM

The number of shooting licenses issued was 12,900 in 1888, against 10,600 in 1860, and 6100 in 1840. The value of game killed yearly in the forests is 14 francs per hectare or 5s. an acre.

## FRANCE

The State pays £3 for each wolf killed. The numbers killed were:—

|                |       |                |     |
|----------------|-------|----------------|-----|
| 1882 . . . . . | 1,225 | 1886 . . . . . | 760 |
| 1885 . . . . . | 900   | 1887 . . . . . | 701 |

Game licenses average 350,000 yearly. French writers estimate the number of rabbits killed yearly in France at 70 millions.

## GERMANY

Game licenses, 146,000; slaughter, 20,000 foxes, 30,000 deer, 2,000,000 hares, 3,000,000 partridges. The

annual fair at Leipzig shows a sale of several million skins. In 1880 there were sold:—

|                    |         |                     |           |
|--------------------|---------|---------------------|-----------|
| Bear . . . . .     | 6,000   | Ermine . . . . .    | 160,000   |
| Sable . . . . .    | 54,000  | Fox . . . . .       | 180,000   |
| Otter . . . . .    | 66,000  | Skunk . . . . .     | 950,000   |
| Beaver . . . . .   | 80,000  | Squirrel, &c. . . . | 4,850,000 |
| Wild cat . . . . . | 125,000 |                     |           |

The forests of Prussia in 1869 contained 6000 wild boars and 151,000 deer.

## RUSSIA

In Russia and Siberia the annual slaughter of fur-bearing animals is as follows: 50,000 martens, 3 million ermines, 15 million marmots, 25 million squirrels. The Russian forests contained in 1880 over 170,000 wolves, which devoured 200 children or travellers per annum. In 1889 Russian peasants killed or captured 318 boars, 85 wolves, 503 foxes, 14,834 hares, 71,960 squirrels, 539 martens, &c. On the other hand, bears and wolves destroyed between them 500 horses, more than 1000 oxen, and over 4000 other domestic animals.

## AUSTRIA

The slaughter of large game in the whole Empire averages thus:—

|                  |     |                  |       |
|------------------|-----|------------------|-------|
| Bears . . . . .  | 160 | Wolves . . . . . | 1,200 |
| Lynxes . . . . . | 200 | Foxes . . . . .  | 8,000 |

Besides 3000 tiger-cats and various other kinds. The returns of game killed in Austria proper showed in 1885 thus:—

|                   |        |                     |           |
|-------------------|--------|---------------------|-----------|
| Bears . . . . .   | 22     | Wild boars . . . .  | 3,000     |
| Wolves . . . . .  | 113    | Hares . . . . .     | 1,430,000 |
| Lynxes . . . . .  | 24     | Woodcock . . . .    | 12,500    |
| Foxes . . . . .   | 26,400 | Pheasants . . . . . | 103,000   |
| Martens . . . . . | 9,700  | Partridges . . . .  | 1,336,000 |
| Deer . . . . .    | 72,500 | Snipe . . . . .     | 99,000    |
| Chamois . . . . . | 7,700  | Wild duck . . . .   | 50,300    |

## SWEDEN

The annual slaughter averaged as follows:—

|                  | 1827-36 | 1850-59 | 1867-76 |
|------------------|---------|---------|---------|
| Bears . . . . .  | 135     | 118     | 110     |
| Lynxes . . . . . | 243     | 140     | 91      |
| Wolves . . . . . | 542     | 162     | 53      |
| Foxes . . . . .  | 7,882   | 5,396   | ...     |

About 5000 eagles and vultures are shot yearly in Sweden: in 1868 the number killed was 27,000. Laplanders sometimes follow a wolf 200 miles to kill him. Of foxes about 10,000 are killed yearly, 5000 skins being annually exported: in 1867 there were 18,000 killed. The annual killing of martens reaches 1000, and of ermines and otters 3000.

## FINLAND

In Finland wolves destroy 5500 horned cattle yearly. The average of wild beasts killed in the decade ending 1870, per annum, was:—

|                  |     |                  |       |                  |    |
|------------------|-----|------------------|-------|------------------|----|
| Bears . . . . .  | 104 | Lynxes . . . . . | 42    | Gluttons . . . . | 35 |
| Wolves . . . . . | 393 | Foxes . . . . .  | 2,046 | Martens . . . .  | 5  |

## EAST INDIES

In Java there are 270 persons killed by tigers, and 180 by crocodiles, yearly. In India 23,000 persons and 68,000 cattle are killed yearly by tigers, snakes, &c. The Indian Government pays £16,000 per annum for killing 20,000 wild beasts and 560,000 snakes. In Cochin-China the French killed in 1882 no fewer than 109 tigers and 25 panthers.

## UNITED STATES

Between 1860 and 1882 more than 15 millions of bison were killed.

## I.

## ICE

The consumption in the United Kingdom exceeds 500,000 tons yearly, the quantity imported averaging 300,000 tons, mostly from Norway. The ice-crop of the United States, according to Simmonds, averages 12 million tons, of which the Hudson supplies 2,400,000. The capital employed in this trade in the United States has been estimated at 8 millions sterling: the ice, when cut, is valued at 4s. a ton, but is retailed at 12s. Some of the cities of the world consume as follows:—

|                    | Tons    | Lbs. per Inhab. |
|--------------------|---------|-----------------|
| London . . . . .   | 200,000 | 102             |
| Paris . . . . .    | 60,000  | 60              |
| New York . . . . . | 700,000 | 1,300           |
| Boston . . . . .   | 100,000 | 700             |

Russia consumes enormous quantities, St. Petersburg alone counting 10,000 ice-houses.

## INCOME

The subjoined table shows approximately the annual earnings or income of nations. It is compiled thus: 90 per cent. of agricultural values, 90 per cent. of mining, 60 per cent. of manufactures. Transport is computed at 10 per cent. on the gross value of agriculture, mining, and manufactures; house-rent, according to the assessed valuation or the nearest estimate; commerce, 10 per cent. on imports and exports; shipping, 30s. per ton yearly of carrying power; banking, 5 per cent. on banking power; and furthermore an allowance of 10 per cent. on the total of the preceding eight items, to cover the earnings of domestic servants, learned professions, army, police, civil service, &c. This is, of course, a conventional method for estimating the earnings of nations, but will answer fairly well for the sake of comparison.

NATIONAL EARNINGS FROM VARIOUS SOURCES

|                         | MILLIONS £ STERLING |        |              |                    |            |          |          |         |             |       | Per Inhab. £ |
|-------------------------|---------------------|--------|--------------|--------------------|------------|----------|----------|---------|-------------|-------|--------------|
|                         | Agriculture         | Mining | Manufactures | Internal Transport | House Rent | Commerce | Shipping | Banking | Professions | Total |              |
| U. Kingdom . . . . .    | 226                 | 53     | 492          | 113                | 135        | 74       | 30       | 45      | 117         | 1,285 | 33.7         |
| France . . . . .        | 474                 | 9      | 291          | 96                 | 93         | 31       | 4        | 13      | 95          | 1,046 | 27.8         |

| Total . . . . .         | 3,229               | 225    | 2,750        | 841                | 605        | 275      | 66       | 156     | 816         | 8,963 | 20.8         |

## UNITED KINGDOM

The income of the nation has been estimated thus:—

| Year | Millions £ | Per Inhabitant, £ | Kingdom           |
|------|------------|-------------------|-------------------|
| 1664 | 42         | 7.8               | England and Wales |
| 1688 | 45         | 8.2               | "                 |
| 1770 | 122        | 16.3              | "                 |
| 1800 | 230        | 26.0              | "                 |
| 1822 | 280        | 19.8              | Great Britain     |
| 1840 | 504        | 19.2              | United Kingdom    |
| 1860 | 760        | 26.2              | "                 |
| 1889 | 1,285      | 33.6              | "                 |

King's classification in 1688 compares with later dates:—

A.D. 1688

| Class             | Families  | Average Income, £ | Amount, £  |
|-------------------|-----------|-------------------|------------|
| Gentry . . . . .  | 16,500    | 360               | 6,000,000  |
| Middle . . . . .  | 114,000   | 105               | 12,000,000 |
| Trades . . . . .  | 310,000   | 50                | 15,500,000 |
| Working . . . . . | 759,500   | 15                | 11,500,000 |
| Total . . . . .   | 1,200,000 | 37                | 45,000,000 |

A.D. 1800

| Class             | Families  | Average Income, £ | Amount, £   |
|-------------------|-----------|-------------------|-------------|
| Gentry . . . . .  | 36,000    | 770               | 28,000,000  |
| Middle . . . . .  | 181,000   | 315               | 57,000,000  |
| Trades . . . . .  | 446,000   | 150               | 67,000,000  |
| Working . . . . . | 1,117,000 | 70                | 78,000,000  |
| Total . . . . .   | 1,780,000 | 127               | 230,000,000 |

A.D. 1889

| Class                    | Families  | Average Income, £ | Amount, £     |
|--------------------------|-----------|-------------------|---------------|
| Gentry . . . . .         | 222,000   | 1,500             | 333,000,000   |
| Middle . . . . .         | 604,000   | 400               | 241,000,000   |
| Trades . . . . .         | 1,220,000 | 200               | 244,000,000   |
| Working . . . . .        | 4,774,000 | 97                | 467,000,000   |
| Total . . . . .          | 6,820,000 | 188               | 1,285,000,000 |
| England . . . . .        | 5,200,000 | 208               | 1,084,000,000 |
| Scotland . . . . .       | 740,000   | 173               | 128,000,000   |
| Ireland . . . . .        | 880,000   | 84                | 73,000,000    |
| United Kingdom . . . . . | 6,820,000 | 188               | 1,285,000,000 |

Professor Leone Levi in 1884 estimated the earnings of the people as follows:—

|                   | Millions £ Sterling Yearly |          |         |            |
|-------------------|----------------------------|----------|---------|------------|
|                   | England                    | Scotland | Ireland | U. Kingdom |
| Upper class . .   | 477                        | 59       | 36      | 572        |
| Middle class . .  | 98                         | 14       | 8       | 120        |
| Working class . . | 401                        | 62       | 42      | 505        |
| Total . .         | 976                        | 135      | 86      | 1,197      |

He estimated the wage-earners in 1884 as follows:—

|                    | Number     | Millions £ | £ per Head |
|--------------------|------------|------------|------------|
| Professional . . . | 300,000    | 16         | 53         |
| Domestic . . .     | 2,400,000  | 86         | 36         |
| Commercial . . .   | 900,000    | 45         | 50         |
| Agricultural . . . | 1,900,000  | 67         | 35         |
| Industrial . . .   | 6,700,000  | 307        | 46         |
| Total . .          | 12,200,000 | 521        | 43         |

|                 | Workers    | Millions £ | £ per Head |
|-----------------|------------|------------|------------|
| England . . .   | 8,600,000  | 401        | 47         |
| Scotland . . .  | 1,500,000  | 62         | 41         |
| Ireland . . .   | 1,800,000  | 42         | 23         |
| Undefined . . . | 300,000    | 16         | 53         |
| Total . .       | 12,200,000 | 521        | 43         |

|                      | Number     | Millions £ | £ per Head |
|----------------------|------------|------------|------------|
| Males under 20 . .   | 1,650,000  | 29         | 18         |
| " 20-65 . .          | 6,530,000  | 363        | 56         |
| Females under 20 . . | 1,300,000  | 30         | 23         |
| " 20-65 . .          | 2,720,000  | 99         | 37         |
| Total . .            | 12,200,000 | 521        | 43         |

According to income-tax assessments, the number of persons in the United Kingdom since 1860, and Great Britain before that date, having an income of £200 or upwards yearly, was as follows:—

| Year       | Number  | Per Million Population |
|------------|---------|------------------------|
| 1812 . . . | 39,765  | 3,314                  |
| 1850 . . . | 65,389  | 3,115                  |
| 1860 . . . | 85,530  | 2,949                  |
| 1870 . . . | 130,375 | 4,206                  |
| 1880 . . . | 210,430 | 6,313                  |

The number of persons enjoying great wealth has by no means increased in the same ratio. Assessments over £5000 a year showed as follows:—

| Year       | Number | Per Million Population |
|------------|--------|------------------------|
| 1812 . . . | 409    | 34                     |
| 1850 . . . | 1,181  | 56                     |
| 1860 . . . | 1,558  | 53                     |
| 1870 . . . | 2,080  | 67                     |
| 1880 . . . | 2,954  | 88                     |

Taking the relative numbers of each class to the whole population, we find:—

| Persons of       | Per Million Inhabitants |       | Rate of Increase |
|------------------|-------------------------|-------|------------------|
|                  | 1860                    | 1880  |                  |
| Great wealth . . | 53                      | 88    | 66 per cent.     |
| Easy fortune . . | 2,949                   | 6,313 | 112 "            |

This shows a greater diffusion of wealth, contrary to

the common impression that "the rich are getting richer every day."

The classification of incomes in 1877 was as follows:—

|              | Over £10,000 | £1000 to £10,000 | £150 to £1000 | Total   |
|--------------|--------------|------------------|---------------|---------|
| England . .  | 975          | 18,622           | 275,733       | 295,330 |
| Scotland . . | 147          | 2,191            | 27,642        | 29,980  |
| Ireland . .  | 35           | 878              | 14,473        | 15,386  |
| U. Kingdom   | 1,157        | 21,691           | 317,848       | 340,696 |

The earnings of the classes which pay income-tax are supposed to reach just one-half those of the nation. Levi made the earnings of the working-classes in 1883 amount to 521 millions, and Jeans in 1884 to 535 millions sterling. The assessments to income-tax have more than doubled since 1850, the following table including an estimate of 18 millions for Ireland in 1850 (in which year that country was exempt from this tax):—

| Year       | Annual Income, Millions £ |       |                  |       |
|------------|---------------------------|-------|------------------|-------|
|            | Houses                    | Lands | Professions, &c. | Total |
| 1850 . . . | 47                        | 56    | 171              | 274   |
| 1860 . . . | 61                        | 58    | 216              | 335   |
| 1870 . . . | 77                        | 65    | 303              | 445   |
| 1880 . . . | 115                       | 70    | 392              | 577   |
| 1888 . . . | 135                       | 61    | 440              | 636   |

| Year       | England | Scotland | Ireland | United Kingdom |
|------------|---------|----------|---------|----------------|
| 1860 . . . | 282     | 30       | 23      | 335            |
| 1870 . . . | 379     | 40       | 26      | 445            |
| 1880 . . . | 486     | 56       | 36      | 578            |
| 1888 . . . | 543     | 57       | 36      | 636            |

The relative increase of the several items of income since 1850 showed thus:—

| Year       | Houses | Lands | Railways | Professions | Total |
|------------|--------|-------|----------|-------------|-------|
| 1850 . . . | 100    | 100   | 100      | 100         | 100   |
| 1860 . . . | 130    | 104   | 143      | 125         | 122   |
| 1870 . . . | 164    | 116   | 228      | 174         | 162   |
| 1880 . . . | 238    | 123   | 295      | 228         | 211   |
| 1888 . . . | 280    | 107   | 351      | 252         | 232   |

The relative increase of each of the three kingdoms since 1860 was:—

| Year       | England | Scotland | Ireland | United Kingdom |
|------------|---------|----------|---------|----------------|
| 1860 . . . | 100     | 100      | 100     | 100            |
| 1870 . . . | 134     | 133      | 113     | 133            |
| 1888 . . . | 193     | 190      | 156     | 191            |

#### FRANCE

The income has been estimated as follows:—

| Year       | Millions £ | £ per Inhab. | Population |
|------------|------------|--------------|------------|
| 1780 . . . | 160        | 6.1          | 26,300,000 |
| 1800 . . . | 216        | 7.7          | 27,400,000 |
| 1820 . . . | 315        | 10.4         | 30,300,000 |
| 1840 . . . | 480        | 14.1         | 34,000,000 |
| 1868 . . . | 806        | 21.6         | 37,500,000 |
| 1888 . . . | 1,046      | 27.8         | 38,500,000 |

The distribution of income, according to house valuation, seems to be approximately as follows:—

| Class         | Number of Families | Average Income, £ | Amount, Millions £ |
|---------------|--------------------|-------------------|--------------------|
| Rich . . .    | 160,000            | 800               | 128                |
| Middle . . .  | 1,700,000          | 260               | 442                |
| Working . . . | 6,000,000          | 79                | 476                |
| Total . . .   | 7,860,000          | 133               | 1,046              |

## GERMANY

In 1885 Soetbeer and others estimated the earnings of the people of Prussia, Saxony, and Baden at 517 millions sterling, to which adding *pro rata* for the rest of Germany, the table stands thus:—

|                  | Population | Earnings, £ | Per Head, £ |
|------------------|------------|-------------|-------------|
| Prussia . . .    | 28,300,000 | 438,000,000 | 15.5        |
| Saxony . . .     | 3,180,000  | 57,100,000  | 18.0        |
| Baden . . .      | 1,600,000  | 22,400,000  | 14.0        |
| Bavaria, &c. . . | 13,770,000 | 220,000,000 | 16.0        |
| Total . . .      | 46,850,000 | 737,500,000 | 15.8        |

The above, perhaps, has reference only to the classes liable to income-tax, the total being manifestly too low to include also the working-classes.

The income-tax assessments of Prussia in 1881 and 1886 were as follows:—

| Income,            | Families Assessed |         |
|--------------------|-------------------|---------|
|                    | 1881              | 1886    |
| £150 to £210 . . . | 79,000            | 89,600  |
| £210 to £480 . . . | 71,700            | 82,400  |
| Over £480 . . .    | 21,800            | 26,800  |
| Total . . .        | 172,500           | 198,800 |

The above comprises only families with incomes over £150 a year. In 1883 there were 7,800,000 persons paying a poll-tax whose incomes were under £150. In Saxony the income assessments were:—

| Year       | Number    | £          |
|------------|-----------|------------|
| 1875 . . . | 972,000   | 50,900,000 |
| 1884 . . . | 1,213,000 | 57,100,000 |

The annual earnings of the whole Empire would seem to be distributed approximately as follows:—

| Class         | Families  | Average, £ | Total, Millions £ |
|---------------|-----------|------------|-------------------|
| Rich . . .    | 150,000   | 1,230      | 185               |
| Middle . . .  | 1,200,000 | 240        | 288               |
| Working . . . | 8,050,000 | 75         | 603               |
| Total . . .   | 9,400,000 | 114        | 1,076             |

According to the scheme laid down in page 320, the

gross earnings of the German people in 1889 amounted to 1076 millions sterling, or £22 4s. per inhabitant, against £28 in France, and £34 in the United Kingdom.

## AUSTRIA

Neumann Spallart estimated the national earnings at 600 millions sterling in 1874, as compared with 430 millions in 1868, and 336 millions in 1859, this last being Czernig's estimate. If we take the florin at its nominal value of 24d., the estimate of Roschman for 1883 will be 650 millions sterling; but if we allow for the depreciation of the currency, it will not exceed 610 millions. My estimate for 1888 is 616 millions sterling, as shown in the table.

## ITALY

Official returns published in 1881 give a very inadequate idea of the earnings of the nation; the first two columns are official, the last is the apparent result:—

| Income,            | Number Assessed | Gross Result, £ |
|--------------------|-----------------|-----------------|
| Under £40 . . .    | 559,000         | 8,400,000       |
| £40 to £200 . . .  | 71,000          | 7,100,000       |
| £200 to £400 . . . | 5,300           | 1,600,000       |
| Over £400 . . .    | 3,200           | 11,300,000      |
| Total . . .        | 638,500         | 28,400,000      |

As already shown, the earnings of the Italian nation are about 364 millions sterling, or £12 per inhabitant, which is less than half the average per head in France.

## UNITED STATES

In 1840 Tucker's estimate of the earnings of the American people was 1066 millions dollars, or 221 millions £ sterling, made up thus:—

|                        |             |
|------------------------|-------------|
| Product of farms . . . | 137,200,000 |
| Manufactures, &c. . .  | 83,600,000  |
| Total . . .            | 220,800,000 |

The above estimate was too low, seeing that agricultural products were worth 184 millions sterling (as already shown).

The national earnings at various dates are shown approximately thus:—

|                    | Millions £ |       |         |
|--------------------|------------|-------|---------|
|                    | 1850       | 1870  | 1886-88 |
| Agriculture . . .  | 225        | 452   | 698     |
| Manufactures . . . | 127        | 444   | 866     |
| Mines . . .        | 40         | 60    | 96      |
| Transport . . .    | 50         | 130   | 231     |
| Commerce . . .     | 7          | 17    | 32      |
| Shipping . . .     | 7          | 10    | 12      |
| Banking . . .      | 5          | 19    | 52      |
| Sundries . . .     | 109        | 218   | 371     |
| Total . . .        | 570        | 1,350 | 2,358   |

## AUSTRALIA

Mr. Coghlan, Government statist, estimates the fruits of all industries as follows:—

|                         | Farming    | Mining     | Manufactures, &c. | Total      | Per Inhabitant |
|-------------------------|------------|------------|-------------------|------------|----------------|
|                         | £          | £          | £                 | £          | £              |
| New South Wales . . .   | 17,200,000 | 3,800,000  | 6,600,000         | 27,600,000 | 25.1           |
| Victoria . . .          | 13,600,000 | 2,700,000  | 7,100,000         | 23,400,000 | 21.3           |
| Queensland . . .        | 8,300,000  | 2,100,000  | 2,300,000         | 12,700,000 | 32.0           |
| South Australia . . .   | 7,700,000  | 400,000    | 1,600,000         | 9,700,000  | 31.0           |
| New Zealand . . .       | 12,600,000 | 1,200,000  | 2,300,000         | 17,100,000 | 28.5           |
| Tasmania . . .          | 1,900,000  | 500,000    | 900,000           | 3,300,000  | 22.0           |
| Western Australia . . . | 900,000    | 200,000    | 300,000           | 1,400,000  | 33.0           |
| Total . . .             | 62,200,000 | 10,900,000 | 22,100,000        | 95,200,000 | 26.4           |

The above takes no account of transport, shipping, banking, commerce, &c., which brings up the total earnings to 144 millions sterling.

### INDIANS

The number in the United States in 1830 and in 1880 was :—

|                         | 1830    | 1880    |
|-------------------------|---------|---------|
| East of Rocky Mountains | 213,100 | 188,400 |
| West .. .. .            | 100,000 | 143,700 |
|                         | 313,100 | 332,100 |

In 1830 some of the States had the following Indian population :—

|                       |        |                    |       |
|-----------------------|--------|--------------------|-------|
| Mississippi . . . . . | 23,400 | Missouri . . . . . | 5,600 |
| Alabama . . . . .     | 19,200 | New York . . . . . | 4,800 |
| Michigan . . . . .    | 9,400  | Indiana . . . . .  | 4,100 |
| Arkansas . . . . .    | 7,200  | Florida . . . . .  | 4,000 |
| Illinois . . . . .    | 5,900  |                    |       |

In 1837 the principal tribes were as follows :—

#### East of Mississippi

|                     |        |                      |        |
|---------------------|--------|----------------------|--------|
| Cherokees . . . . . | 22,000 | Winnebagos . . . . . | 4,500  |
| Chippewas . . . . . | 6,500  | Various . . . . .    | 11,365 |
| Seminoles . . . . . | 5,000  |                      |        |
|                     |        | Total . . . . .      | 49,365 |

#### West of Mississippi

|                     |        |                   |         |
|---------------------|--------|-------------------|---------|
| Blackfeet . . . . . | 30,000 | Pawnees . . . . . | 12,500  |
| Sioux . . . . .     | 21,600 | Eutaws . . . . .  | 19,200  |
| Creeks . . . . .    | 20,437 | Crows . . . . .   | 7,200   |
| Apaches . . . . .   | 20,280 | Various . . . . . | 117,710 |
| Comanches . . . . . | 19,200 |                   |         |
| Choctaws . . . . .  | 15,000 | Total . . . . .   | 283,127 |

In 1880 the principal tribes were :—

|                             |         |
|-----------------------------|---------|
| Cherokees, Choctaws         | 47,800  |
| Esquimaux, &c.              | 62,400  |
| Shoshones, Snakes . . . . . | 25,300  |
| Dacotah, Sioux              | 28,100  |
| Crow, Flathead              | 19,400  |
| Pawnee, Fox . . . . .       | 18,100  |
| Apaches, Navajas . . . . .  | 20,100  |
| Oregon, Arizona, &c.        | 111,000 |

Total . . . . . 332,100

|                            | Civilised | Half-Civilised | Savage | Total     |
|----------------------------|-----------|----------------|--------|-----------|
| Population . . . . .       | 104,800   | 144,300        | 83,000 | 332,100   |
| Acres tilled . . . . .     | 273,000   | 157,000        | ...    | 430,000   |
| Grain, bushels . . . . .   | 2,780,000 | 1,070,000      | ...    | 3,850,000 |
| Hay, tons . . . . .        | 177,000   | 48,000         | ...    | 225,000   |
| Vegetables, tons . . . . . | 8,500     | 9,800          | ...    | 18,300    |
| Churches . . . . .         | 117       | ...            | ...    | 117       |
| Schools . . . . .          | 344       | ...            | ...    | 344       |
| Pupils . . . . .           | 13,350    | ...            | ...    | 13,350    |
| Horses . . . . .           | 301,000   | ...            | ...    | 301,000   |
| Cows . . . . .             | 311,000   | ...            | ...    | 311,000   |
| Sheep . . . . .            | 447,000   | ...            | ...    | 447,000   |
| Pigs . . . . .             | 214,000   | ...            | ...    | 214,000   |

The number of Indians who vote as American citizens is 24,600. That of Indians paying tax was as follows :—

| State                          | 1870   | 1880   | Increase |
|--------------------------------|--------|--------|----------|
| California . . . . .           | 7,241  | 16,277 | 9,036    |
| New Mexico . . . . .           | 1,309  | 9,772  | 8,463    |
| Michigan . . . . .             | 4,926  | 7,249  | 2,323    |
| Washington Territory . . . . . | 1,319  | 4,405  | 3,086    |
| Arizona . . . . .              | 31     | 3,493  | 3,462    |
| Wisconsin . . . . .            | 1,206  | 3,161  | 1,955    |
| Various . . . . .              | 9,699  | 22,050 | 12,351   |
| Total . . . . .                | 25,731 | 66,407 | 40,676   |

In Canada a report on Indians in 1880 was as follows :—

|                       | Number  | Property, £ | £ per Head |
|-----------------------|---------|-------------|------------|
| Ontario . . . . .     | 16,000  | 1,968,000   | 123        |
| Quebec . . . . .      | 11,000  | 363,000     | 33         |
| Manitoba, &c. . . . . | 75,400  | ...         | ...        |
| Total . . . . .       | 102,400 | ...         | ...        |

### INDUSTRIES

The following table shows approximately the value yearly of the chief occupations of mankind :—

|                         | Millions £ Sterling * |              |        |           |          |        | £ per Inhabitant |
|-------------------------|-----------------------|--------------|--------|-----------|----------|--------|------------------|
|                         | Agriculture           | Manufactures | Mining | Transport | Commerce | Total  |                  |
| U. Kingdom . . . . .    | 251                   | 820          | 60     | 113       | 740      | 1,984  | 52               |
| France . . . . .        | 460                   | 485          | 10     | 96        | 310      | 1,361  | 36               |
| Germany . . . . .       | 424                   | 583          | 25     | 103       | 370      | 1,505  | 32               |
| Russia . . . . .        | 563                   | 363          | 15     | 94        | 120      | 1,155  | 13               |
| Austria . . . . .       | 331                   | 253          | 6      | 59        | 95       | 744    | 19               |
| Italy . . . . .         | 204                   | 121          | 2      | 33        | 95       | 455    | 15               |
| Spain . . . . .         | 173                   | 85           | 4      | 27        | 60       | 349    | 20               |
| Portugal . . . . .      | 31                    | 16           | 1      | 5         | 20       | 73     | 16               |
| Sweden . . . . .        | 49                    | 50           | 1      | 10        | 30       | 140    | 30               |
| Norway . . . . .        | 17                    | 19           | 1      | 4         | 10       | 51     | 25               |
| Denmark . . . . .       | 35                    | 26           | ...    | 6         | 25       | 92     | 46               |
| Holland . . . . .       | 39                    | 35           | ...    | 8         | 200      | 282    | 61               |
| Belgium . . . . .       | 55                    | 102          | 7      | 17        | 110      | 291    | 48               |
| Switzerland . . . . .   | 19                    | 32           | ...    | 5         | 60       | 116    | 39               |
| Various . . . . .       | 194                   | 40           | ...    | 23        | 72       | 329    | 22               |
| Europe . . . . .        | 2,845                 | 3,030        | 132    | 603       | 2,317    | 8,027  | 27               |
| United States . . . . . | 776                   | 1,443        | 107    | 231       | 320      | 2,877  | 46               |
| Canada . . . . .        | 56                    | 64           | 3      | 12        | 40       | 175    | 36               |
| Australia . . . . .     | 62                    | 41           | 8      | 10        | 120      | 241    | 66               |
| Argentina . . . . .     | 42                    | 40           | ...    | 8         | 30       | 120    | 32               |
| Total . . . . .         | 3,781                 | 4,618        | 250    | 864       | 2,827    | 12,340 | 30               |

The value of the above industries in the above countries at various dates was approximately as follows in millions £ sterling :—

| Year | Agriculture | Manufactures | Mining | Transport | Commerce | Total  |
|------|-------------|--------------|--------|-----------|----------|--------|
| 1820 | 1,405       | 865          | 19     | 229       | 287      | 2,805  |
| 1840 | 1,750       | 1,314        | 35     | 310       | 485      | 3,894  |
| 1860 | 2,380       | 2,404        | 108    | 490       | 1,305    | 6,687  |
| 1888 | 3,781       | 4,618        | 250    | 864       | 2,827    | 12,340 |

The relative increase of the principal industries is shown approximately as follows :—

|                        | 1820 | 1840 | 1860 | 1888  |
|------------------------|------|------|------|-------|
| Agriculture . . . . .  | 100  | 124  | 170  | 270   |
| Manufactures . . . . . | 100  | 153  | 280  | 536   |
| Mining . . . . .       | 100  | 183  | 567  | 1,320 |
| Transport . . . . .    | 100  | 135  | 213  | 376   |
| Commerce . . . . .     | 100  | 166  | 450  | 990   |
| Total . . . . .        | 100  | 152  | 336  | 440   |

\* The values here given represent the gross amounts without any deduction. For net values see *Income*, p. 320.

The ratios of the various industries in forming the aggregate were as follows:—

|                      | 1820  | 1840  | 1860  | 1888  |
|----------------------|-------|-------|-------|-------|
| Agriculture . . . .  | 50.1  | 44.8  | 35.6  | 30.5  |
| Manufactures . . . . | 30.8  | 33.8  | 36.0  | 37.6  |
| Mining . . . . .     | 0.7   | 0.9   | 1.6   | 2.1   |
| Transport . . . . .  | 8.2   | 8.0   | 7.3   | 7.0   |
| Commerce . . . . .   | 10.2  | 12.5  | 19.5  | 22.8  |
| Total . . . . .      | 100.0 | 100.0 | 100.0 | 100.0 |

If we take the first four items as the direct fruits of human industry in the aggregate, and compare with population, we find as follows:—

| Year           | Population  | Industries, Millions £ | £ per Head |
|----------------|-------------|------------------------|------------|
| 1820 . . . . . | 208,000,000 | 2,518                  | 12.1       |
| 1840 . . . . . | 256,000,000 | 3,409                  | 13.3       |
| 1860 . . . . . | 313,000,000 | 5,382                  | 17.2       |
| 1888 . . . . . | 416,000,000 | 9,513                  | 22.8       |

The population and industries are those of Europe, United States, Canada, Australia, and Argentina. It appears that, owing to improved machinery, the product of a man's labour represents at present double the value that it did in 1820. But as prices have fallen in the interval about 33 per cent., it follows that the average in 1888 was equal to £34 per head measured by prices of 1820. Thus one man now, in whatever industry, produces as much as 3 did in 1820, or 2½ in 1840, or 2 in 1860.

### INFIRM

The principal classes of infirm of body are blind and deaf-mutes, whose numbers by latest returns were as follows:—

|                               | Blind   | Deaf-Mutes | Total   | Per Million Population |
|-------------------------------|---------|------------|---------|------------------------|
| England . . . . .             | 22,800  | 13,300     | 36,100  | 1,390                  |
| Scotland . . . . .            | 3,200   | 2,200      | 5,400   | 1,455                  |
| Ireland . . . . .             | 6,700   | 4,000      | 10,700  | 1,940                  |
| United Kingdom . . . . .      | 32,100  | 19,500     | 51,600  | 1,475                  |
| France . . . . .              | 32,060  | 21,100     | 53,160  | 1,390                  |
| Germany . . . . .             | 39,000  | 45,000     | 84,000  | 1,830                  |
| Russia . . . . .              | 178,500 | 53,500     | 232,000 | 2,730                  |
| Austria proper . . . . .      | 15,800  | 26,800     | 42,600  | 1,940                  |
| Hungary . . . . .             | 20,600  | 15,000     | 35,600  | 2,350                  |
| Italy . . . . .               | 28,200  | 19,800     | 48,000  | 1,610                  |
| Spain . . . . .               | 20,300  | 10,700     | 31,000  | 1,700                  |
| Scandinavia . . . . .         | 7,900   | 7,800      | 15,700  | 1,840                  |
| Belgium and Holland . . . . . | 6,700   | 4,200      | 10,900  | 1,050                  |
| Switzerland . . . . .         | 2,100   | 6,800      | 8,900   | 3,200                  |
| Europe . . . . .              | 383,260 | 230,200    | 613,460 | 1,840                  |
| United States . . . . .       | 48,900  | 33,900     | 82,800  | 1,650                  |
| Total . . . . .               | 432,160 | 264,100    | 696,260 | 1,760                  |

In 1881 Professor Halkenhoff of Geneva said that there were 311,000 blind persons in Europe, mostly the result of fevers, and that 75 per cent. of them could have kept their sight if they had been properly treated.

The proportion of sexes shows thus:—

Females Blind to 100 Males

|                   |    |                   |     |                         |     |
|-------------------|----|-------------------|-----|-------------------------|-----|
| France . . . . .  | 76 | Prussia . . . . . | 88  | Sweden . . . . .        | 118 |
| Belgium . . . . . | 89 | Norway . . . . .  | 108 | United States . . . . . | 82  |

The following table is by Principal Campbell:—

|             | Blind per Million Persons of Each Sex |        |           |       |        |
|-------------|---------------------------------------|--------|-----------|-------|--------|
|             | Male                                  | Female |           | Male  | Female |
| England .   | 953                                   | 809    | Austria . | 1,280 | 1,183  |
| Scotland .  | 865                                   | 827    | Italy . . | 1,106 | 925    |
| Ireland . . | 1,141                                 | 1,219  | Spain . . | 1,242 | 1,011  |
| France . .  | 948                                   | 726    | Norway .  | 1,313 | 1,411  |
| Germany .   | 884                                   | 881    | Holland . | 499   | 394    |
| Sweden . .  | 767                                   | 843    | Belgium . | 982   | 641    |
| Denmark .   | 776                                   | 793    | Finland . | 1,514 | 2,938  |

The number of blind institutions and of pupils were:—

|                               | Institutions | Inmates |
|-------------------------------|--------------|---------|
| United Kingdom . . . . .      | 80           | 2,830   |
| France . . . . .              | 23           | 1,210   |
| Germany . . . . .             | 35           | 1,810   |
| Austria . . . . .             | 11           | 680     |
| Italy . . . . .               | 22           | 670     |
| Spain . . . . .               | 12           | 650     |
| Russia . . . . .              | 15           | 400     |
| Scandinavia . . . . .         | 10           | 330     |
| Belgium and Holland . . . . . | 14           | 500     |
| United States . . . . .       | 36           | 2,500   |
| Canada . . . . .              | 3            | 200     |
| Total . . . . .               | 261          | 11,780  |

The number of deaf-mutes in most countries increases faster than population, as the following table shows:—

|                             | Number |        | Per Million Inhab. |       |
|-----------------------------|--------|--------|--------------------|-------|
|                             | 1831   | 1871   | 1831               | 1871  |
| United Kingdom . . . . .    | 14,328 | 19,237 | 597                | 611   |
| France . . . . .            | 20,189 | 21,130 | 630                | 603   |
| Germany . . . . .           | 20,470 | 30,900 | 724                | 770   |
| Russia . . . . .            | 27,834 | ...    | 631                | ...   |
| Austria . . . . .           | 21,684 | 34,450 | 802                | 980   |
| Italy . . . . .             | 12,618 | 19,800 | 628                | 702   |
| Spain . . . . .             | 7,255  | 10,700 | 633                | 655   |
| Switzerland . . . . .       | 3,567  | 6,820  | 1,996              | 2,620 |
| Denmark . . . . .           | 1,260  | ...    | 1,114              | ...   |
| Sweden and Norway . . . . . | 2,397  | 5,540  | 605                | 920   |
| United States . . . . .     | 6,030  | 18,150 | 460                | 480   |

Sex ratio is in most countries 55 male deaf-mutes to 45 females, but in Italy 58 to 42.

Colour-blindness, which usually takes the form of inability to distinguish red from green, is found to prevail thus:—

|                         | Per 1000 Persons |        |                    |
|-------------------------|------------------|--------|--------------------|
|                         | Male             | Female | General Population |
| England . . . . .       | 47               | 40     | 44                 |
| Scotland . . . . .      | 30               | ...    | ...                |
| France . . . . .        | 70               | ...    | ...                |
| Sweden . . . . .        | 32               | 26     | 29                 |
| Switzerland . . . . .   | 47               | 9      | 28                 |
| United States . . . . . | 40               | 10     | 26                 |
| Boston . . . . .        | 40               | 17     | 30                 |
| Holland . . . . .       | ...              | ...    | 58                 |
| Belgium . . . . .       | ...              | ...    | 26                 |
| Russia . . . . .        | ...              | ...    | 80                 |
| London . . . . .        | 34               | ...    | ...                |

Of French marines 82 per 1000, of British sailors 45

## UNITED KINGDOM

The number and ratios of blind were as follows :—

| Year       | Number of Blind |          |         | U. Kingdom |
|------------|-----------------|----------|---------|------------|
|            | England         | Scotland | Ireland |            |
| 1851 . . . | 18,306          | 3,010    | 7,587   | 28,903     |
| 1861 . . . | 19,352          | 2,820    | 6,879   | 29,051     |
| 1871 . . . | 21,590          | 3,019    | 6,347   | 30,956     |
| 1881 . . . | 22,832          | 3,158    | 6,111   | 32,101     |

## Number of Population to one Blind Person

| Year       | England | Scotland | Ireland | U. Kingdom |
|------------|---------|----------|---------|------------|
| 1851 . . . | 979     | 1,065    | 864     | 948        |
| 1861 . . . | 1,037   | 1,090    | 843     | 1,002      |
| 1871 . . . | 1,052   | 1,112    | 852     | 1,022      |
| 1881 . . . | 1,138   | 1,182    | 847     | 1,094      |

The number of blind in England per million persons of each age was in 1881 as follows :—

| Years                 | Per Million |
|-----------------------|-------------|
| 0-5 . . .             | 166         |
| 5-15 . . .            | 288         |
| 15-20 . . .           | 388         |
| 20-25 . . .           | 422         |
| 25-45 . . .           | 641         |
| 45-65 . . .           | 1,625       |
| Over 65 . . .         | 6,915       |
| General average . . . | 877         |

The number of deaf-mutes in the United Kingdom rose from 14,328 in 1831 to 19,237 in 1871. The number per million inhabitants was as follows :—

|                      | 1831 | 1861 | 1871  |
|----------------------|------|------|-------|
| England . . .        | 545  | 581  | 504   |
| Scotland . . .       | 552  | 753  | 633   |
| Ireland . . .        | 664  | 975  | 1,028 |
| United Kingdom . . . | 597  | 701  | 611   |

The number of short-sighted people is not known, but Ware found at Oxford, in 1813, that 26 per cent. of those in the University used glasses.

## FRANCE

The returns for 1866 showed as follows :—

| Cause                     | Blind  | Deaf-Mutes | Total  |
|---------------------------|--------|------------|--------|
| From birth . . .          | 4,726  | 15,296     | 20,022 |
| Accident or illness . . . | 27,242 | 5,918      | 33,160 |
| Total . . .               | 31,968 | 21,214     | 53,182 |

The ratios of blind and deaf-mutes per million persons of each sex were :—

|                        | Blind |        | Deaf-Mutes |        | Total |        |
|------------------------|-------|--------|------------|--------|-------|--------|
|                        | Male  | Female | Male       | Female | Male  | Female |
| Under 15 . . .         | 270   | 210    | 470        | 380    | 740   | 590    |
| Unmarried adults . . . | 1,100 | 1,150  | 1,480      | 1,250  | 2,580 | 2,400  |
| Married . . .          | 900   | 520    | 185        | 120    | 1,085 | 640    |
| Widowed . . .          | 3,810 | 2,180  | 386        | 223    | 4,196 | 2,403  |

The number of persons born blind was 65 in a million of male population, 35 in a million of the female.

In 1876 the number of afflicted persons was :—

|               | Blind  | Deaf-Mutes | Total  |
|---------------|--------|------------|--------|
| Males . . .   | 15,526 | 11,460     | 26,986 |
| Females . . . | 12,965 | 9,935      | 22,900 |
| Total . . .   | 28,491 | 21,395     | 49,886 |

In 1883 there were 32,056 blind, of whom 2548 were under 21 years of age.

## GERMANY

In 1843 the kingdom of Prussia showed as follows :—

|                  | Male   | Female | Total  | Per Million Population |
|------------------|--------|--------|--------|------------------------|
| Blind . . .      | 5,222  | 4,930  | 10,152 | 680                    |
| Deaf-mutes . . . | 6,460  | 5,037  | 11,497 | 770                    |
| Total . . .      | 11,682 | 9,967  | 21,649 | 1,450                  |

In 1880 the German Empire had 37,800 blind, of whom 1810 were receiving instruction in Blind schools. In 1888 there were 28 Blind institutions, with 2139 pupils, the total number of blind in the Empire being estimated at 39,000. The numbers of deaf-mutes in Prussia in 1871 and 1880 were :—

|               | Number |        | Per Million Population |       |
|---------------|--------|--------|------------------------|-------|
|               | 1871   | 1880   | 1871                   | 1880  |
| Males . . .   | 13,118 | 15,168 | 1,080                  | 1,130 |
| Females . . . | 11,197 | 12,026 | 900                    | 910   |
| Total . . .   | 24,315 | 27,194 | 990                    | 1,020 |

The rate was 990 per million among Protestants, 1040 among Catholics, and 1440 among Jews. There are in Prussia 96 schools for deaf-mutes, with 331 teachers and 3991 pupils.

## RUSSIA

The total number of blind is estimated at about 180,000, the rate per million inhabitants varying in the different provinces for which there are returns, viz. :—

|               |       |                |       |
|---------------|-------|----------------|-------|
| Kieff . . .   | 1,960 | Livonia . . .  | 5,020 |
| Pultowa . . . | 1,780 | Esthonia . . . | 4,110 |
| Kazan . . .   | 5,700 | Finland . . .  | 2,140 |

In the city of St. Petersburg the rate is only 890 per million, the total number of blind being 771, namely, 320 males and 451 females; only 17 per cent. of the whole number were born blind. There are 21 Blind asylums in the Empire.

## FINLAND

The ratio of blind in 1875 was: 214 per 100,000 males, 438 for females, and 328 for the general population; this is nearly 2½ times as much as in Norway, four times as much as in France. Smoky huts are one of the causes. Finland has 233 deaf-mutes per million.

## ALGERIA

There are 6666 blind persons, of whom 5330 are adult. The above number compared with population shows 1750 per million, which is 50 per cent. over the European average.

## AUSTRIA

Official returns for 1886 showed as follows for Austria, without Hungary :—

|                  | Males  | Females | Total  | Per Million Population |
|------------------|--------|---------|--------|------------------------|
| Blind . . .      | 8,480  | 7,282   | 15,762 | 710                    |
| Deaf-mutes . . . | 15,041 | 11,752  | 26,793 | 1,220                  |
| Total . . .      | 23,521 | 19,034  | 42,555 | 1,930                  |

The institutions contained the following:—

|                | Males   | Females   | Total |
|----------------|---------|-----------|-------|
| Blind . . . .  | 403     | 281       | 684   |
| Deaf-mutes . . | 807     | 621       | 1,428 |
| Total . . . .  | 1,210   | 902       | 2,112 |
|                | Born so | Became so | Total |
| Blind . . . .  | 101     | 583       | 684   |
| Deaf-mutes . . | 469     | 959       | 1,428 |
| Total . . . .  | 570     | 1,542     | 2,112 |

In 1884 there were 26,245 deaf-mutes, of whom 22,319, say 92 per cent., were born so.

## HUNGARY

The number of blind was as follows:—

|                 | Number |        | Per Million Population |      |
|-----------------|--------|--------|------------------------|------|
|                 | 1870   | 1880   | 1870                   | 1880 |
| Males . . . .   | 9,800  | 10,242 | 127                    | 128  |
| Females . . . . | 8,723  | 10,597 | 113                    | 132  |
| Total . . . .   | 18,523 | 20,639 | 120                    | 130  |

The number of deaf-mutes in 1880 was 15,000, or 960 per million population.

## ITALY

The ratios of blind and of deaf-mutes in 1872 showed:—

|                   | Per Million Inhabitants |            |       |
|-------------------|-------------------------|------------|-------|
|                   | Blind                   | Deaf-Mutes | Total |
| Sicily . . . .    | 1,282                   | 687        | 1,969 |
| Central Italy . . | 1,000                   | 744        | 1,744 |
| Lombardy . . .    | 795                     | 1,153      | 1,948 |
| Sardinia, &c. . . | 1,929                   | 719        | 2,648 |
| Italy . . . .     | 1,050                   | 738        | 1,788 |

The distribution according to sexes was as follows:—

|                | Males  | Females | Total  |
|----------------|--------|---------|--------|
| Blind . . . .  | 15,946 | 12,181  | 28,127 |
| Deaf-mutes . . | 11,615 | 8,164   | 19,779 |
| Total . . . .  | 27,561 | 20,345  | 47,906 |

The Census of 1881 showed 21,718 blind and 15,300 deaf-mutes, but the authorities believe the real numbers to be much greater.

## BELGIUM AND HOLLAND

In Belgium the asylums for the blind and for deaf-mutes contained in 1885:—

|                 |       |
|-----------------|-------|
| Males . . . .   | 729   |
| Females . . . . | 540   |
| Total . . . .   | 1,269 |

The ratio of blind in Belgium was 874 per million inhabitants in 1860, and has now declined to 810. Deaf-mutes were 450 per million in 1835, and have declined to 404. As regards Holland, there are no returns since 1869, when there were 1593 blind, or 450 per million of population.

## NORWAY

The ratios of blind and of deaf-mutes at various dates were:—

| Year         | Blind per 100,000 Inhab. |       | Deaf-Mutes per 100,000 Inhabitants | Total |
|--------------|--------------------------|-------|------------------------------------|-------|
|              | Town                     | Rural |                                    |       |
| 1835 . . . . | 123                      | 183   | 177                                | 91    |
| 1845 . . . . | 127                      | 218   | 209                                | 83    |
| 1855 . . . . | 119                      | 195   | 186                                | 83    |
| 1865 . . . . | 90                       | 145   | 136                                | 92    |
| 1875 . . . . | 79                       | 148   | 136                                | 86    |

The actual numbers of deaf-mutes were as follows:—

| Year         | Males | Females | Total | Per 100,000 Population |
|--------------|-------|---------|-------|------------------------|
| 1835 . . . . | 598   | 493     | 1,091 | 91                     |
| 1855 . . . . | 650   | 592     | 1,242 | 83                     |
| 1875 . . . . | 819   | 752     | 1,571 | 86                     |

## SWEDEN AND DENMARK

The numbers in these countries are:—

|                 | Number |            | Per Million |            |
|-----------------|--------|------------|-------------|------------|
|                 | Blind  | Deaf-Mutes | Blind       | Deaf-Mutes |
| Sweden . . . .  | 3,723  | 4,834      | 810         | 1,050      |
| Denmark . . . . | 1,249  | ...        | 705         | ...        |

## UNITED STATES

The classification in 1880 was as follows:—

|                | Males    | Females  | Total  |
|----------------|----------|----------|--------|
| Blind . . . .  | 26,748   | 22,180   | 48,928 |
| Deaf-mutes . . | 18,567   | 15,311   | 33,878 |
| Total . . . .  | 45,315   | 37,491   | 82,806 |
|                | American | Foreign  | Total  |
| Blind . . . .  | 40,509   | 8,419    | 48,928 |
| Deaf-mutes . . | 30,507   | 3,371    | 33,878 |
| Total . . . .  | 71,016   | 11,790   | 82,806 |
|                | White    | Coloured | Total  |
| Blind . . . .  | 41,278   | 7,650    | 48,928 |
| Deaf-mutes . . | 30,661   | 3,217    | 33,878 |
| Total . . . .  | 71,939   | 10,867   | 82,806 |

The returns of deaf-mutes at various dates showed:—

| Year         | Number | Per Million Inhabitants | Ratio of Sex |         |
|--------------|--------|-------------------------|--------------|---------|
|              |        |                         | Males        | Females |
| 1830 . . . . | 6,106  | 470                     | ...          | ...     |
| 1840 . . . . | 7,706  | 453                     | ...          | ...     |
| 1850 . . . . | 9,803  | 427                     | 55           | 45      |
| 1860 . . . . | 12,820 | 413                     | 55           | 45      |
| 1870 . . . . | 16,205 | 422                     | 55           | 45      |
| 1880 . . . . | 33,880 | 678                     | 56           | 44      |

Deaf-mutes and blind have risen in numbers much faster than population. The ratio per million inhabitants rises at each successive census, perhaps because the ratio of urban population is at each period higher.

The number and ratio of blind at various dates were :—

| Year       | Number | Per Million Population | Ratio of Sex |         |
|------------|--------|------------------------|--------------|---------|
|            |        |                        | Males        | Females |
| 1830 . . . | 5,444  | 420                    | ...          | ...     |
| 1840 . . . | 6,916  | 407                    | ...          | ...     |
| 1850 . . . | 9,790  | 406                    | 55           | 45      |
| 1860 . . . | 12,660 | 410                    | 58           | 42      |
| 1870 . . . | 20,320 | 530                    | 56           | 44      |
| 1880 . . . | 48,928 | 970                    | 55           | 45      |

## CANADA

The general ratios are not published. In 1886 Manitoba had per million inhabitants 147 blind and 735 deaf-mutes, being a very low ratio for blindness.

## INQUESTS

In 1887 there were 30,030 held in England and Wales, viz. :—

## Cause of Death.

|                          |        |
|--------------------------|--------|
| Natural causes . . . . . | 11,231 |
| Suicide . . . . .        | 2,227  |
| Drink . . . . .          | 372    |
| Murder . . . . .         | 350    |
| Hunger . . . . .         | 250    |
| Various causes . . . . . | 15,600 |

Total . . . . . 30,030

## INSANE

The following table shows the number of insane, including idiots, in the various countries, about 1880-84 (except Italy, 1872) :—

|                               | Number  | Per 10,000 Inhab. | Ratio of Recovery | Annual Death-Rate | Asylums |
|-------------------------------|---------|-------------------|-------------------|-------------------|---------|
|                               |         |                   | Per Cent.         | Per Cent.         |         |
| England . . . . .             | 81,600  | 32                | 39                | 10                | 81      |
| Scotland . . . . .            | 11,600  | 32                | 42                | 8                 |         |
| Ireland . . . . .             | 19,500  | 37                | 48                | 8                 |         |
| France . . . . .              | 93,900  | 25                | 33                | 15                |         |
| Germany . . . . .             | 108,100 | 24                | 31                | 8                 | 110     |
| Russia . . . . .              | 80,000  | 11                | ...               | ...               | 74      |
| Austria . . . . .             | 44,000  | 20                | ...               | 12                | 28      |
| Italy . . . . .               | 44,100  | 17                | ...               | ...               | 33      |
| Spain and Portugal . . . . .  | 13,000  | 7                 | ...               | ...               | 11      |
| Belgium and Holland . . . . . | 10,400  | 12                | 32                | 14                | 68      |
| Switzerland . . . . .         | 3,100   | 11                | ...               | ...               | 42      |
| Scandinavia . . . . .         | 18,100  | 29                | ...               | ...               | 27      |
| Europe . . . . .              | 518,400 | 16                | 33                | 12                | 604     |
| United States . . . . .       | 168,900 | 33                | 47                | 10                | ...     |
| Canada . . . . .              | 7,300   | 18                | ...               | ...               | ...     |
| Australia . . . . .           | 4,900   | 17                | 45                | 7                 | ...     |
| Total . . . . .               | 695,500 | 19                | 36                | 11                | ...     |

As regards the causes of insanity, not including idiots, the average returns for England, France, Denmark, and United States combined give this result :—

|                      | Per Cent. |                           | Per Cent. |
|----------------------|-----------|---------------------------|-----------|
| Hereditary . . . . . | 24        | Loss of friends . . . . . | 11        |
| Drink . . . . .      | 24        | Sickness . . . . .        | 10        |
| Business . . . . .   | 12        | Various . . . . .         | 19        |

The ratios of sex in various countries show thus :—

|                         | Inmates of Asylums |         |       |
|-------------------------|--------------------|---------|-------|
|                         | Males              | Females | Total |
| England . . . . .       | 47                 | 53      | 100   |
| Scotland . . . . .      | 48                 | 52      | 100   |
| Ireland . . . . .       | 52                 | 48      | 100   |
| France . . . . .        | 48                 | 52      | 100   |
| Italy . . . . .         | 56                 | 44      | 100   |
| United States . . . . . | 51                 | 49      | 100   |

Even in countries where the number of insane females exceeds that of males, it is found that men are more liable than women to insanity, but die faster. Thus in France there are annually admitted 110 males to 100 females, though the existing number of the latter is greater.

The percentage of insanity caused by drink is stated thus :—Italy 2, Austria 15, France 20, England 32, Sweden 50.

The relative numbers of insane persons cured is :—

|                    | Per 100 of each Class |         |       |
|--------------------|-----------------------|---------|-------|
|                    | Males                 | Females | Total |
| France . . . . .   | 35                    | 32      | 33    |
| England . . . . .  | 36                    | 42      | 39    |
| Scotland . . . . . | 40                    | 44      | 42    |

Taking the existing numbers of mad people in the following countries, the sexes stood thus :—

|                             | Males to Females |     |
|-----------------------------|------------------|-----|
| England and Wales . . . . . | 100              | 118 |
| France . . . . .            | 100              | 110 |
| Italy . . . . .             | 100              | 73  |

## UNITED KINGDOM

The returns for 1883 showed as follows :—

|                          | England | Scotland | Ireland | United Kingdom |
|--------------------------|---------|----------|---------|----------------|
| Pauper insane . . . . .  | 65,400  | 8,000    | 12,200  | 85,600         |
| Private insane . . . . . | 16,200  | 3,600    | 7,300   | 27,100         |
| Total . . . . .          | 81,600  | 11,600   | 19,500  | 112,700        |
| Lunatics . . . . .       | 39,600  | 6,800    | 9,800   | 56,200         |
| Idiots . . . . .         | 29,500  | 4,600    | 6,700   | 40,800         |
| Unclassified . . . . .   | 12,500  | 200      | 3,000   | 15,700         |
| Total . . . . .          | 81,600  | 11,600   | 19,500  | 112,700        |

There has been a notable increase of insane paupers since 1861, viz. :—

| Period            | Paupers Insane per Million Inhab. |          |
|-------------------|-----------------------------------|----------|
|                   | England and Wales                 | Scotland |
| 1861-65 . . . . . | 2,080                             | 2,050    |
| 1871-75 . . . . . | 2,581                             | 2,290    |
| 1880 . . . . .    | 2,792                             | 2,580    |

Insanity varies with locality, as shown thus :—

## Pauper Insane per 100,000 Inhabitants

|                    |     |                     |     |                      |     |
|--------------------|-----|---------------------|-----|----------------------|-----|
| Shetland . . . . . | 96  | Edinburgh . . . . . | 172 | Argyll . . . . .     | 259 |
| Orkney . . . . .   | 107 | Sheffield . . . . . | 179 | Manchester . . . . . | 270 |
| Bradford . . . . . | 121 | Newcastle . . . . . | 191 | Birmingham . . . . . | 301 |
| Durham . . . . .   | 129 | Swansea . . . . .   | 202 | Oxford . . . . .     | 312 |
| Cornwall . . . . . | 158 | Liverpool . . . . . | 219 | Nottingham . . . . . | 342 |
| Leeds . . . . .    | 160 | Perth . . . . .     | 233 | London . . . . .     | 361 |

## FRANCE

| Year           | Number | Per 100,000 Inhabitants | Caused by Drink, per Cent. |
|----------------|--------|-------------------------|----------------------------|
| 1851 . . . . . | 46,400 | 129                     | 8                          |
| 1856 . . . . . | 59,800 | 166                     | 9                          |
| 1866 . . . . . | 90,100 | 238                     | 14                         |
| 1869 . . . . . | 94,800 | 247                     | 15                         |
| 1879 . . . . . | 93,970 | 252                     | 15                         |

The returns of lunatic asylums showed as follows :—

| Year           | Males  | Females | Total  |
|----------------|--------|---------|--------|
| 1871 . . . . . | 18,020 | 19,700  | 37,720 |
| 1880 . . . . . | 22,100 | 22,960  | 45,060 |
| 1886 . . . . . | 24,990 | 27,880  | 52,870 |

The returns for 1885 were as follows :—

|                        | Males  | Females | Total  |
|------------------------|--------|---------|--------|
| Old patients . . . . . | 24,400 | 27,400  | 51,800 |
| New patients . . . . . | 8,100  | 7,300   | 15,400 |
| Total . . . . .        | 32,500 | 34,700  | 67,200 |
| Cured . . . . .        | 1,655  | 1,519   | 3,174  |
| Died . . . . .         | 3,326  | 2,785   | 6,111  |

The death-rate was 10.2 for males, 8.2 for females, and 9.1 for all. The expenditure during the year was £780,000, of which the families defrayed only £56,000, the rest being borne by the State. The number of patients treated during the year was :—

| Asylums           | Males  | Females | Total  |
|-------------------|--------|---------|--------|
| Public . . . . .  | 20,100 | 21,400  | 41,500 |
| Private . . . . . | 12,400 | 13,300  | 25,700 |
| Total . . . . .   | 32,500 | 34,700  | 67,200 |

The death-rate was much lower in private than in public asylums, viz. :—

| Asylums           | Deaths |         |       | Per Cent. |
|-------------------|--------|---------|-------|-----------|
|                   | Males  | Females | Total |           |
| Public . . . . .  | 2,263  | 1,802   | 4,065 | 9.7       |
| Private . . . . . | 1,063  | 983     | 2,046 | 7.9       |
| Total . . . . .   | 3,326  | 2,785   | 6,111 | 9.1       |

The statistics published by the Prefecture of Police in Paris indicate a very rapid increase in the number of insane persons admitted into the special infirmary of the capital, viz. :—

| Year           | Males | Females | Total |
|----------------|-------|---------|-------|
| 1872 . . . . . | 1,695 | 1,389   | 3,084 |
| 1880 . . . . . | 1,932 | 1,552   | 3,484 |
| 1888 . . . . . | 2,549 | 1,900   | 4,449 |

The form of insanity known as *folie alcoolique* is twice as frequent now as it was fifteen years ago, and the number of persons placed under restraint on account of it has increased by 25 per cent. in the last three years. This is ascribed to the increased consumption of alcohol.

The returns for 1866 were as follows :—

|                       | Insane | Idiots | Total  |
|-----------------------|--------|--------|--------|
| In asylums . . . . .  | 31,992 | 3,980  | 35,972 |
| In families . . . . . | 18,734 | 35,973 | 54,707 |
| Total . . . . .       | 50,726 | 39,953 | 90,679 |

Of lunatics there were 91 males to 100 females, and of idiots 132 males to 100 females: taken collectively, the proportion was 107 males to 100 females. According to Lunier (1856) the number of persons who go mad yearly in a million of each class is as follows :—

|                       |     |                               |       |
|-----------------------|-----|-------------------------------|-------|
| Peasants . . . . .    | 52  | Learned professions . . . . . | 525   |
| Tradesmen . . . . .   | 180 | Soldiers . . . . .            | 590   |
| Capitalists . . . . . | 275 | Officers . . . . .            | 1,300 |

## GERMANY

The returns for Prussia showed as follows :—

| Year           | Males  | Females | Total  | Per 100,000 Inhabitants |
|----------------|--------|---------|--------|-------------------------|
| 1871 . . . . . | 28,002 | 27,041  | 55,043 | 221                     |
| 1880 . . . . . | 34,309 | 32,036  | 66,345 | 243                     |

Mayr's tables for Bavaria showed a stronger tendency to insanity among Jews than Christians, viz., 620 Protestants, 840 Catholics, and 1190 Jews per million. He also found that 30 per cent. of lunatics had hereditary taint, and that in 1877 there were 34 insane for every 1000 lawsuits.

## RUSSIA

In 1860 there were 41 asylums, containing 3100 insane. In 1882 the number of asylums had risen to 74; that of inmates was not stated. It was roughly supposed that the total number of insane and idiots in asylums and their own houses might reach 80,000, but nothing is really known. In Finland the ratio of insane persons is 170 per 100,000 inhabitants.

## AUSTRIA

The returns do not include Hungary, and show thus for 1886 :—

|                       | Males  | Females | Total  |
|-----------------------|--------|---------|--------|
| In asylums . . . . .  | 4,394  | 3,715   | 8,109  |
| In families . . . . . | 10,991 | 8,958   | 19,949 |
| Lunatics . . . . .    | 15,385 | 12,673  | 28,058 |
| Idiots . . . . .      | 9,507  | 6,913   | 16,420 |
| Total . . . . .       | 24,892 | 19,586  | 44,478 |

The average cost was 16d. daily, or £24 a year, for each inmate of asylums.

## BELGIUM

The number of insane at various dates was as follows :—

|                   | 1858  | 1868  | 1878   | 1888   |
|-------------------|-------|-------|--------|--------|
| Males . . . . .   | 3,481 | 4,287 | 5,288  | 5,200  |
| Females . . . . . | 2,994 | 3,953 | 4,732  | 5,080  |
| Total . . . . .   | 6,475 | 8,240 | 10,020 | 10,280 |

The returns for 1888 comprise only those in asylums; the statistics for previous dates showed thus:—

| In                   | 1888         | 1888         | 1878          |
|----------------------|--------------|--------------|---------------|
| Asylums . . . .      | 4,420        | 6,032        | 7,886         |
| Families . . . .     | 2,055        | 2,208        | 2,134         |
| <b>Total . . . .</b> | <b>6,475</b> | <b>8,240</b> | <b>10,020</b> |
| <b>Age</b>           |              |              |               |
| Under 30 . . . .     | 1,313        | 1,660        | 1,903         |
| 30-50 . . . . .      | 2,658        | 3,382        | 4,186         |
| Over 50 . . . . .    | 2,504        | 3,198        | 3,931         |
| <b>Total . . . .</b> | <b>6,475</b> | <b>8,240</b> | <b>10,020</b> |
| Married men . . .    | 499          | 639          | 821           |
| Married women . .    | 468          | 685          | 813           |
| Unmarried men . .    | 2,809        | 3,453        | 4,244         |
| Unmarried women .    | 2,184        | 2,806        | 3,394         |
| Widowers . . . . .   | 173          | 195          | 223           |
| Widows . . . . .     | 342          | 462          | 525           |
| <b>Total . . . .</b> | <b>6,475</b> | <b>8,240</b> | <b>10,020</b> |
| Deaths . . . . .     | 593          | 557          | 882           |
| Per cent. . . . .    | 7.7          | 6.7          | 8.8           |
| Cured . . . . .      | 590          | 626          | 617           |

Of 100 persons who become insane, 16 will be under 20 years of age, 24 between 20 and 30 years, 22 in the ensuing decade, 16 between 40 and 50, and 22 over 50 years.

## ITALY

Between 1872 and 1877 the number of pauper lunatics increased 24 per cent., namely, from 12,210 to 15,173, but the total number of insane in the latter year was unknown.

The returns for 1872 showed thus:—

|                      | Males         | Females       | Total         |
|----------------------|---------------|---------------|---------------|
| In asylums . . .     | 6,476         | 5,734         | 12,210        |
| In families . . .    | 19,140        | 12,752        | 31,892        |
| <b>Total . . . .</b> | <b>25,616</b> | <b>18,486</b> | <b>44,102</b> |

## Insane per 100,000 Inhabitants

|                  |     |                    |     |                    |     |
|------------------|-----|--------------------|-----|--------------------|-----|
| Naples . . . . . | 111 | Tuscany . . . . .  | 185 | Lombardy . . . . . | 230 |
| Rome . . . . .   | 157 | Piedmont . . . . . | 222 | Italy . . . . .    | 171 |
| Venice . . . . . | 174 | Liguria . . . . .  | 226 |                    |     |

The ratio of insanity according to condition, that is, married or unmarried, was as follows:—

100 unmarried males to 52 married  
100 " females to 58 married

The ratio of population is 100 unmarried to 60 married; it appears, therefore, that insanity is more prevalent among unmarried than married persons.

The returns for 1877 refer only to pauper lunatics, viz:—

|                        |               |
|------------------------|---------------|
| Males . . . . .        | 8,010         |
| Females . . . . .      | 7,163         |
| <b>Total . . . . .</b> | <b>15,173</b> |

Pauper lunatics compared with population thus:—

| Per 100,000 Inhabitants |    |                    |    |                    |    |
|-------------------------|----|--------------------|----|--------------------|----|
| Sardinia . . . . .      | 18 | Venice . . . . .   | 61 | Lombardy . . . . . | 76 |
| Naples . . . . .        | 19 | Piedmont . . . . . | 62 | Rome . . . . .     | 85 |
| Sicily . . . . .        | 23 | Genoa . . . . .    | 68 |                    |    |

Insanity was most prevalent between forty and sixty years of age, the number per million of each class showing thus:—

|                    |     |                    |       |
|--------------------|-----|--------------------|-------|
| Under 20 . . . . . | 93  | 41 to 60 . . . . . | 1,098 |
| 20-40 . . . . .    | 944 | Over 60 . . . . .  | 557   |

In 100,000 Christians there were 58 pauper lunatics; in 100,000 Jews there were 260. The prevalence of insanity among Jews has already been noted in Germany.

## NORWAY

The ratios of idiots and insane persons showed thus:—

| Year           | Per 100,000 Inhabitants |        |       |
|----------------|-------------------------|--------|-------|
|                | Idiots                  | Insane | Total |
| 1835 . . . . . | 142                     | 160    | 302   |
| 1845 . . . . . | 153                     | 168    | 321   |
| 1855 . . . . . | 160                     | 181    | 341   |
| 1865 . . . . . | 120                     | 185    | 305   |
| 1875 . . . . . | ...                     | ...    | 480   |

## HOLLAND

The number of insane paupers per million inhabitants rose from 594 in 1856 to 754 in 1863.

## UNITED STATES

| Year           | Lunatics | Idiots | Total   | Per 100,000 Inhabitants | Sex Ratio (Percentage of Males) |        |       |
|----------------|----------|--------|---------|-------------------------|---------------------------------|--------|-------|
|                |          |        |         |                         | Lunatics                        | Idiots | Total |
| 1840 . . . . . | ...      | ...    | 17,410  | 102                     | ...                             | ...    | ...   |
| 1850 . . . . . | 15,610   | 15,790 | 31,400  | 136                     | 51                              | 60     | 55    |
| 1860 . . . . . | 24,040   | 18,930 | 42,970  | 139                     | 49                              | 58     | 53    |
| 1870 . . . . . | 37,430   | 24,530 | 61,960  | 161                     | 47                              | 60     | 53    |
| 1880 . . . . . | 91,990   | 76,890 | 168,880 | 330                     | 46                              | 60     | 51    |

In 1880 the insane were classified thus:—

|                      | Males         | Females       | Total          |
|----------------------|---------------|---------------|----------------|
| Idiots . . . . .     | 45,309        | 31,586        | 76,895         |
| Insane . . . . .     | 44,388        | 47,571        | 91,959         |
| <b>Total . . . .</b> | <b>89,697</b> | <b>79,157</b> | <b>168,854</b> |

|                      | White          | Coloured      | Total          |
|----------------------|----------------|---------------|----------------|
| Idiots . . . . .     | 67,316         | 9,579         | 76,895         |
| Insane . . . . .     | 85,802         | 6,157         | 91,959         |
| <b>Total . . . .</b> | <b>153,118</b> | <b>15,736</b> | <b>168,854</b> |

|                      | Americans      | Foreigners    | Total          |
|----------------------|----------------|---------------|----------------|
| Idiots . . . . .     | 72,888         | 4,007         | 76,895         |
| Insane . . . . .     | 65,630         | 26,329        | 91,959         |
| <b>Total . . . .</b> | <b>138,518</b> | <b>30,331</b> | <b>168,854</b> |

## AUSTRALIA

In December 1887 the seven colonies counted 10,130 insane persons, being 286 per 100,000 inhabitants. The ratios were:—

|                      | Per 100,000 |                     | Per 100,000 |
|----------------------|-------------|---------------------|-------------|
| New South Wales . .  | 270         | South Australia . . | 240         |
| Victoria . . . . .   | 329         | Tasmania . . . . .  | 243         |
| New Zealand . . . .  | 281         | Western Australia . | 285         |
| Queensland . . . . . | 244         | General average . . | 286         |

## INSECTS

On an average, 15 tons of vegetable mould are annually thrown up by earth-worms on an acre of cultivable land, equal to a weight of 705 million tons in the United Kingdom. There are about 26,800 worms to each acre.

According to the *Edinburgh Review* (336), the annual value of agricultural products consumed by insects in the United States is 60 millions sterling. The value of 2,900,000 acres of vineyard devastated by phylloxera in France was 132 millions sterling.

Locusts inflict enormous damage in many countries. In Cyprus the peasants are paid £40 for every ton of locust eggs which they destroy, some years destroying 60 tons, which is equivalent to 680 million locusts. In Russia 600 soldiers can sweep a ton of locusts daily into ditches and destroy them.

### INSURANCE

The *Bulletin Statistique* of 1886 has the following tables:—

|                   | Amount of Life Insurances,<br>Millions £ Sterling |      |      |      |      |       |
|-------------------|---------------------------------------------------|------|------|------|------|-------|
|                   | 1850                                              | 1864 | 1869 | 1874 | 1879 | 1883  |
| Great Britain . . | 160                                               | 210  | 269  | 362  | 415  | 445   |
| Continent . . .   | 30                                                | 61   | 112  | 176  | 236  | 327   |

|                | Average Amount of Insurance, £ |        |         |         |               |
|----------------|--------------------------------|--------|---------|---------|---------------|
|                | Great Britain                  | France | Germany | Austria | United States |
| 1859 . . . . . | 580                            | 420    | 168     | 152     | 616           |
| 1869 . . . . . | 420                            | 400    | 136     | 136     | 604           |
| 1879 . . . . . | 460                            | 440    | 172     | 112     | 520           |
| 1883 . . . . . | 464                            | 448    | 184     | 128     | 544           |

Besso considers that 8,500,000 persons in Europe have their lives insured, say 2½ per cent. of the population.

The latest returns show as follows:—

| Year           | Country         | Amount, £   | Premiums, £ |
|----------------|-----------------|-------------|-------------|
| 1880 . . . . . | U. Kingdom      | 545,000,000 | 17,400,000  |
| 1888 . . . . . | Germany . . .   | 170,300,000 | 14,680,000  |
| 1885 . . . . . | Austria . . .   | 45,200,000  | 7,800,000   |
| 1885 . . . . . | Russia . . . .  | 10,000,000  | ...         |
| 1886 . . . . . | France . . . .  | 117,600,000 | 6,050,000   |
| 1885 . . . . . | Scandinavia .   | 11,200,000  | ...         |
| 1885 . . . . . | Switzerland .   | 8,100,000   | ...         |
| 1885 . . . . . | U. States . . . | 420,000,000 | 21,900,000  |
| 1880 . . . . . | Canada . . . .  | 17,000,000  | ...         |

The above does not include the Industrial Life Assurances of Great Britain, of which later on.

According to the *Archivio*, the aggregate insurance business of Germany, Austria and Switzerland multiplied 15-fold in the period of 25 years down to 1877, viz.:—

| Year           | Existing Policies | Amount, £   |
|----------------|-------------------|-------------|
| 1852 . . . . . | 46,980            | 8,600,000   |
| 1865 . . . . . | 280,500           | 41,600,000  |
| 1877 . . . . . | 753,400           | 116,900,000 |

The following table shows how the aggregate for 1877 was made up, and also the new business for that year:—

|                 | New Business, 1877 |            | Total on Books, 1877 |             |
|-----------------|--------------------|------------|----------------------|-------------|
|                 | Policies           | Amount, £  | Policies             | Amount, £   |
| Germany . . . . | 78,030             | 15,100,000 | 552,200              | 92,400,000  |
| Austria . . . . | 21,800             | 2,900,000  | 178,900              | 19,300,000  |
| Switzerland . . | 2,300              | 550,000    | 22,200               | 5,100,000   |
| Total . . . . . | 102,130            | 18,550,000 | 753,300              | 116,800,000 |

In 1880 the new business done in various countries was:—

|                   | New Policies | Amount, £  | Policies Paid, £ |
|-------------------|--------------|------------|------------------|
| Great Britain . . | 44,900       | 20,900,000 | 11,200,000       |
| United States . . | 123,000      | 37,500,000 | ...              |
| Germany . . . .   | 47,600       | 13,800,000 | 1,900,000        |
| France . . . . .  | 47,800       | 17,700,000 | 1,200,000        |

The life insurance of the principal countries in 1880 compared with the returns for 1870 as follows:—

|                  | Existing Policies |         | Amount       |              |
|------------------|-------------------|---------|--------------|--------------|
|                  | 1870              | 1880    | 1870         | 1880         |
| Great Britain    | 688,000           | 879,000 | £338,000,000 | £422,000,000 |
| U. States . . .  | 748,000           | 725,000 | 405,000,000  | 312,000,000  |
| Germany . . . .  | 456,000           | 797,000 | 64,000,000   | 127,000,000  |
| France . . . . . | 129,000           | 208,000 | 51,000,000   | 87,000,000   |
| Austria . . . .  | 90,000            | 170,000 | ...          | 20,000,000   |
| Canada . . . . . | 40,000            | 48,000  | 14,000,000   | 17,000,000   |

Besides the ordinary system in England of companies charging an annual premium for a policy payable only on death, there is another mode of insurance, whereby the insured person on reaching a certain age receives an annuity for life. In Denmark any person who pays in at the age of 21 a sum of £6 10s. will be entitled to an annuity of £13 on reaching the age of 65; if he die meantime, the sum is forfeit. In Germany, whoever pays 20d. a week during three years, beginning at the age of 18, will receive an annuity of £13 on arriving at that of 65. The German system of compulsory insurance divides the annual premium into three equal parts, one paid by the workman, one by his employer, one by the State. In England, by payment of £100 to any of the first-class insurance companies the following annuity may be secured, varying with the age of the person who buys the annuity:—

| Age          | Annuity for £100 |                   |
|--------------|------------------|-------------------|
|              | Man              | Woman             |
| 50 . . . . . | £ s. d.<br>7 7 0 | £ s. d.<br>6 13 0 |
| 60 . . . . . | 9 0 0            | 8 0 0             |

### UNITED KINGDOM

There are 95 principal companies, which showed the following aggregate of business for life insurance:—

|                   | 1877        | 1886        | 1889        |
|-------------------|-------------|-------------|-------------|
| Policies . . . .  | 779,000     | 902,000     | ...         |
| Amount, £ . . .   | 384,000,000 | 421,000,000 | 545,000,000 |
| Premiums, £ . .   | 11,700,000  | 12,800,000  | 13,930,000  |
| Assets, £ . . . . | 124,000,000 | 143,000,000 | 165,700,000 |

There are also industrial life insurances of the working classes, which showed thus:—

|                      | 1880       | 1886       |
|----------------------|------------|------------|
| Number of policies . | 5,440,000  | 9,132,000  |
| Amount, £ . . . .    | 49,000,000 | 83,000,000 |
| Annual premiums, £ . | 1,940,000  | 3,550,000  |

The average annual premium in British companies, per £100 of policy, varies with age thus:—

| Age          | £ s. d. | Age          | £ s. d. |
|--------------|---------|--------------|---------|
| 25 . . . . . | 2 2 0   | 40 . . . . . | 3 4 0   |
| 30 . . . . . | 2 8 0   | 45 . . . . . | 3 15 0  |
| 35 . . . . . | 2 15 0  | 55 . . . . . | 5 11 0  |

The business of 95 companies in 1889 compared with 1884 thus :—

|                          | 1884         | 1889       |
|--------------------------|--------------|------------|
| Premiums . . . . .       | £ 12,300,000 | 13,930,000 |
| Other receipts . . . . . | 6,600,000    | 7,710,000  |
| Total income . . . . .   | 18,900,000   | 21,640,000 |
| Paid claims . . . . .    | 10,600,000   | 11,000,000 |
| Expenses . . . . .       | 5,600,000    | 5,640,000  |
| Total payments . . . . . | 16,200,000   | 16,640,000 |

The assets amount to 166 millions sterling, and include £11,300,000 paid-up capital.

## FRANCE

In 1886 there were life policies running to the amount of £117,600,000, the premiums reaching £6,050,000 per annum; assets or reserve fund £35,800,000. The number and amount of policies for life insurance issued in twenty years down to 1880 were :—

| Period            | Number  | Amount, £   | Average, £ |
|-------------------|---------|-------------|------------|
| 1861-70 . . . . . | 128,700 | 51,000,000  | 396        |
| 1871-80 . . . . . | 250,400 | 104,500,000 | 418        |
|                   | 379,100 | 155,500,000 | 410        |

There were 26,600 new policies issued during the year 1885. The foregoing are payable at the death of the insured person. As regards the purchase of annuities, the annuity fund in 1881 amounted to 16 millions sterling, and the new annuities purchased yearly average a capital value of £900,000. The annuities now running average as follows :—

|                             | Per Annum |                      | Per Annum |
|-----------------------------|-----------|----------------------|-----------|
| Military officers . . . . . | 95        | Physicians . . . . . | 56        |
| Naval officers . . . . .    | 90        | Farmers . . . . .    | 40        |
| Men of property . . . . .   | 62        | Workmen . . . . .    | 36        |
| Civil service . . . . .     | 60        | Servants . . . . .   | 26        |

There is, moreover, a special life insurance against accidental deaths, which showed in 1886 premiums received £440,000, payments for persons killed £240,000.

## GERMANY

| Year           | Policies | Amount, £   | Policies Paid, £ |
|----------------|----------|-------------|------------------|
| 1850 . . . . . | 40,900   | 7,400,000   | 150,000          |
| 1860 . . . . . | 120,600  | 21,200,000  | 350,000          |
| 1870 . . . . . | 456,200  | 64,000,000  | 1,020,000        |
| 1880 . . . . . | 797,100  | 127,300,000 | 1,870,000        |
| 1888 . . . . . | 816,300  | 170,300,000 | ...              |

The above table shows the total number of existing policies and the aggregate amounts at the various dates. The increase of business in ten years appears on comparing the figures for 1888 with those of 1878 :—

|                              | 1878       | 1888        |
|------------------------------|------------|-------------|
| Amount of policies . . . . . | 97,700,000 | 170,300,000 |
| Amount of assets . . . . .   | 28,000,000 | 52,300,000  |

## AUSTRIA

The returns of 1885 compare with those of previous years thus :—

| Year           | Amount of Policies, £ | Amount of Premiums, £ |
|----------------|-----------------------|-----------------------|
| 1876 . . . . . | 25,500,000            | 3,000,000             |
| 1880 . . . . . | 31,200,000            | 6,500,000             |
| 1885 . . . . . | 45,200,000            | 7,800,000             |

## UNITED STATES

According to Bradstreet's, the income of American life companies rose from £1,300,000 in 1861 to £21,900,000 in 1885. The assets in 1880 amounted to 84 millions sterling. A statement in 1860 showed 47 life companies, 60,000 persons insured, aggregate amount 37 millions sterling.

## Fire Insurance

In 1887 a statement was published in London that the insurance companies of the United Kingdom covered properties to the amount of 5500 millions sterling, the annual premiums on the policies amounting to £14,500,000. The *Journal des Economists* published in 1883 a table of fire insurance for other countries. The result is as follows :—

| Country               | Property Insured, Millions £ | Annual Premium, £ | Rate per 1000 | Annual Loss by Fire, £ | Loss per Inhabitant, Pence |
|-----------------------|------------------------------|-------------------|---------------|------------------------|----------------------------|
| U. Kingdom            | 5,500                        | 14,500,000        | 2.5           | 9,100,000              | 60                         |
| France . . . . .      | 4,056                        | 3,760,000         | 1.0           | 3,200,000              | 20                         |
| Germany . . . . .     | 3,170                        | 6,500,000         | 2.0           | 6,100,000              | 32                         |
| Russia . . . . .      | 180                          | 900,000           | 5.0           | 9,000,000              | 26                         |
| Belgium . . . . .     | 400                          | 400,000           | 1.0           | 500,000                | 22                         |
| Scandinavia . . . . . | 115                          | 300,000           | 2.7           | 1,000,000              | 38                         |
| U. States . . . . .   | 2,180                        | 19,600,000        | 9.0           | 21,400,000             | 78                         |
| Canada . . . . .      | 140                          | 1,550,000         | 11.0          | 4,100,000              | 220                        |
| Total . . . . .       | 15,741                       | 47,510,000        | 3.0           | 54,400,000             | ...                        |

The figures for the United States are taken from the *Journal of Commerce*, 1887.

## UNITED KINGDOM

Official returns were published down to 1868, when the insurance duty was abolished; they showed thus :—

| Year | Amount, Millions £ |          |         |                | Per Inhabitant, £ |
|------|--------------------|----------|---------|----------------|-------------------|
|      | England            | Scotland | Ireland | United Kingdom |                   |
| 1801 | 220                | 4        | 9       | 233            | 15                |
| 1810 | 325                | 12       | 17      | 354            | 20                |
| 1830 | 482                | 34       | 19      | 535            | 22                |
| 1850 | 680                | 43       | 34      | 757            | 28                |
| 1868 | 921                | 99       | 52      | 1,072          | 36                |

The assets of fire companies in 1881 amounted to 24 millions sterling.

## FRANCE

The following table shows fire insurance :—

| Year           | Amount Insured |                  | Premium, £ | Losses Paid, £ |
|----------------|----------------|------------------|------------|----------------|
|                | Millions £     | £ per Inhabitant |            |                |
| 1851 . . . . . | 1,318          | 41               | 1,140,000  | 560,000        |
| 1856 . . . . . | 1,810          | 54               | 1,566,000  | 774,000        |
| 1868 . . . . . | 3,092          | 88               | 2,440,000  | 1,460,000      |
| 1875 . . . . . | 3,190          | 90               | 3,030,000  | 2,390,000      |
| 1881 . . . . . | 4,056          | 112              | 3,855,000  | 2,430,000      |

The balance-sheet for 1886 showed as follows :—

| Receipts, £             |           | Payments, £           |           |
|-------------------------|-----------|-----------------------|-----------|
| Fire premiums . . . . . | 3,650,000 | Fire losses . . . . . | 2,040,000 |
| Investments . . . . .   | 270,000   | Expenses . . . . .    | 1,360,000 |
| Total . . . . .         | 3,920,000 | Total . . . . .       | 3,400,000 |

This left a profit of £520,000, say about 6 per cent. on a capital of £8,500,000 sterling. The following is an official record of all payments by insurance companies for losses by fire or other calamity :—

|                         | 1871       | 1885       |
|-------------------------|------------|------------|
| Fire . . . . .          | 1,560,000  | 2,280,000  |
| Hail . . . . .          | 1,920,000  | 5,100,000  |
| Frost . . . . .         | 4,500,000  | 1,400,000  |
| Cattle-plague . . . . . | 1,800,000  | 1,500,000  |
| Phylloxera . . . . .    | ...        | 6,640,000  |
| Sundries . . . . .      | 220,000    | 880,000    |
| Total . . . . .         | 10,000,000 | 17,800,000 |

The total payments in 1881 were £16,000,000, including £5,700,000 for phylloxera.

#### GERMANY

The returns of fire insurance show as follows :—

| Year           | Amount Insured |                  | Premium, £ | Losses Paid, £ |
|----------------|----------------|------------------|------------|----------------|
|                | Millions £     | £ per Inhabitant |            |                |
| 1850 . . . . . | 815            | 27               | 1,650,000  | 1,200,000      |
| 1860 . . . . . | 1,450          | 40               | 3,000,000  | 2,000,000      |
| 1870 . . . . . | 2,030          | 50               | 4,160,000  | 2,900,000      |
| 1880 . . . . . | 3,125          | 67               | 6,370,000  | 4,400,000      |

#### RUSSIA

Official estimates for 1884-85 show an average loss of property yearly amounting to £9,100,000 sterling, of which £3,300,000 covered by insurance. The loss compared with population is estimated at 4s. per head in towns, and 2s. in the rural population yearly.

#### AUSTRIA

Policies paid on losses caused on farms in 1886 amounted in Austria to £2,900,000, of which £1,800,000 by fire, the rest by hail. Losses paid on farms in Hungary for fire were £1,100,000, being 20 per cent. over the average of six preceding years.

#### UNITED STATES

The *Journal of Commerce* (New York) gives the following :—

| Year           | Insurances in Force, £ | Loss by Fire, £ |
|----------------|------------------------|-----------------|
| 1875 . . . . . | 1,260,000,000          | 16,200,000      |
| 1880 . . . . . | 1,494,000,000          | 15,600,000      |
| 1885 . . . . . | 2,180,000,000          | 21,400,000      |

The above table shows the total loss by fire, insured and uninsured. The latter shows the amounts paid by the companies for losses :—

| Year | Amount Insured, £ | Premium, £ | Losses Paid, £ |
|------|-------------------|------------|----------------|
| 1856 | 175,000,000       | 1,440,000  | 880,000        |
| 1862 | 365,000,000       | 3,100,000  | 1,900,000      |
| 1876 | 1,310,000,000     | 11,800,000 | 8,800,000      |
| 1881 | 1,290,000,000     | 11,630,000 | 8,950,000      |

#### Marine Insurance

In 1880 the amount of marine insurance was estimated at 887 millions sterling, viz. :—

|                     | Millions £ |
|---------------------|------------|
| Lloyds . . . . .    | 480        |
| Hamburg . . . . .   | 105        |
| French, &c. . . . . | 302        |

In 1888 the aggregate returns of seven Liverpool companies showed an average premium on all insurances during three years of only 7 per 1000, viz.: Average annual insurances, 137 millions sterling; premium, £950,000; damages settled, £400,000; expenses of management, £100,000; annual dividend, 14 per cent. on a paid-up capital of £840,000. The losses, therefore, of ships and cargoes were only 3 per 1000 of value.

The Hamburg Company showed as follows :—

| Year           | Insured, £  | Rate per 1000 |
|----------------|-------------|---------------|
| 1803 . . . . . | 400,000     | ...           |
| 1820 . . . . . | 11,000,000  | 17            |
| 1840 . . . . . | 20,000,000  | 15            |
| 1860 . . . . . | 47,000,000  | 14            |
| 1878 . . . . . | 105,000,000 | 12            |

The French marine insurance returns were :—

|                           | 1884        | 1886        |
|---------------------------|-------------|-------------|
| Policies issued . . . . . | 200,100,000 | 175,100,000 |
| Premiums . . . . .        | 740,000     | 710,000     |
| Rate per £1000 . . . . .  | 3.7         | 4.1         |
| Losses paid . . . . .     | 530,000     | 460,000     |

The losses, therefore, averaged 53s. per £1000.

#### IRON

The production of pig iron, which amounted to 60,000 tons in the year 1500, advanced very slowly until the nineteenth century. The following table shows the quantities approximately :—

| Date           | Tons          |           |           |               |           |            |
|----------------|---------------|-----------|-----------|---------------|-----------|------------|
|                | Great Britain | France    | Germany   | United States | Various   | Total      |
| 1500 . . . . . | 6,000         | 12000     | 5,000     | ...           | 37,000    | 60,000     |
| 1700 . . . . . | 12,000        | 22,000    | 10,000    | ...           | 60,000    | 104,000    |
| 1740 . . . . . | 20,000        | 26,000    | 18,000    | 1,000         | 92,000    | 157,000    |
| 1790 . . . . . | 68,000        | 40,000    | 30,000    | 30,000        | 110,000   | 278,000    |
| 1800 . . . . . | 190,000       | 60,000    | 40,000    | 40,000        | 130,000   | 460,000    |
| 1810 . . . . . | 250,000       | 85,000    | 46,000    | 55,000        | 180,000   | 616,000    |
| 1820 . . . . . | 400,000       | 140,000   | 90,000    | 110,000       | 270,000   | 1,010,000  |
| 1830 . . . . . | 680,000       | 220,000   | 120,000   | 180,000       | 385,000   | 1,585,000  |
| 1840 . . . . . | 1,390,000     | 350,000   | 170,000   | 290,000       | 480,000   | 2,680,000  |
| 1850 . . . . . | 2,250,000     | 570,000   | 402,000   | 560,000       | 640,000   | 4,422,000  |
| 1860 . . . . . | 3,830,000     | 900,000   | 530,000   | 820,000       | 1,100,000 | 7,180,000  |
| 1870 . . . . . | 5,960,000     | 1,180,000 | 1,390,000 | 1,670,000     | 1,710,000 | 11,910,000 |
| 1880 . . . . . | 7,750,000     | 1,730,000 | 2,730,000 | 3,840,000     | 2,090,000 | 18,140,000 |
| 1885 . . . . . | 7,420,000     | 1,630,000 | 3,690,000 | 4,050,000     | 2,310,000 | 19,100,000 |
| 1889 . . . . . | 8,250,000     | 1,720,000 | 4,530,000 | 7,600,000     | 3,060,000 | 25,160,000 |

The figures from 1500 to 1740 are those given by Seaman

# IRON AND COAL.

*Consumption of Iron, lbs. per inhabitant.*

*In the year 1830.*

*In the year 1888.*

*Consumption of Coal (1888), cwt. per inhabitant.*

The production among minor countries since 1830 has been approximately thus :—

|                   | Tons    |         |           |           |           |           |
|-------------------|---------|---------|-----------|-----------|-----------|-----------|
|                   | 1830    | 1850    | 1860      | 1870      | 1880      | 1889      |
| Belgium . . . . . | 35,000  | 73,000  | 220,000   | 520,000   | 490,000   | 850,000   |
| Austria . . . . . | 80,000  | 140,000 | 310,000   | 400,000   | 470,000   | 760,000   |
| Russia . . . . .  | 120,000 | 220,000 | 290,000   | 350,000   | 450,000   | 600,000   |
| Sweden . . . . .  | 105,000 | 130,000 | 180,000   | 290,000   | 400,000   | 460,000   |
| Spain . . . . .   | 20,000  | 40,000  | 50,000    | 70,000    | 160,000   | 230,000   |
| Various . . . . . | 25,000  | 37,000  | 50,000    | 80,000    | 120,000   | 160,000   |
| Total . . . . .   | 385,000 | 640,000 | 1,100,000 | 1,710,000 | 2,090,000 | 3,060,000 |

The percentage of iron contained in ironstone is as follows :—

|                   |    |                         |    |                  |    |
|-------------------|----|-------------------------|----|------------------|----|
| France . . . . .  | 31 | United States . . . . . | 43 | Canada . . . . . | 60 |
| Germany . . . . . | 36 | Australia . . . . .     | 55 | Russia . . . . . | 44 |
| England . . . . . | 41 | Algeria . . . . .       | 58 | Sweden . . . . . | 52 |

capacity of 16,900,000 tons, the actual production having been only 7,510,000 : it would appear that the furnaces of Europe and America could produce at least 40 million tons of iron yearly.

The production in 1885 was as follows :—

|                          | Tons         |      |                 |                                       |
|--------------------------|--------------|------|-----------------|---------------------------------------|
|                          | Total Number |      | Working in 1885 | Average Product Tons Iron per Furnace |

The approximate value of goods manufactured from iron and steel in various countries is as follows :—

|                          | Iron, £     | Steel, £    | Total £     |
|--------------------------|-------------|-------------|-------------|
| United Kingdom . . . . . | 50,100,000  | 84,000,000  | 134,100,000 |
| France . . . . .         | 19,500,000  | 15,900,000  | 35,400,000  |
| Germany . . . . .        | 40,500,000  | 37,800,000  | 78,300,000  |
| Russia . . . . .         | 5,400,000   | 7,000,000   | 12,400,000  |
| Austria . . . . .        | 6,200,000   | 7,600,000   | 13,800,000  |
| Italy . . . . .          | 3,500,000   | 600,000     | 4,100,000   |
| Spain . . . . .          | 2,800,000   | 900,000     | 3,700,000   |
| Sweden . . . . .         | 4,100,000   | 2,200,000   | 6,300,000   |
| Belgium . . . . .        | 8,100,000   | 6,200,000   | 14,300,000  |
| Europe . . . . .         | 140,200,000 | 162,200,000 | 302,400,000 |
| United States . . . . .  | 72,000,000  | 94,500,000  | 166,500,000 |
| Total . . . . .          | 212,200,000 | 256,700,000 | 368,900,000 |

The cost of producing a ton of iron or of steel in various countries was stated in 1883 in a report drawn up by the French Government as follows :—

|                   | Shillings per Ton |              |       |
|-------------------|-------------------|--------------|-------|
|                   | Pig               | Wrought Iron | Steel |
| England . . . . . | 50                | 122          | 160   |
| France . . . . .  | 73                | 182          | 224   |
| Germany . . . . . | 59                | 144          | 192   |
| Belgium . . . . . | 47                | 130          | 131   |

A bar of iron, value 20s., may be manufactured into goods representing any of the following values :—

|                     |      |                         |         |
|---------------------|------|-------------------------|---------|
| Needles . . . . .   | £ 11 | Buttons . . . . .       | £ 6,100 |
| Penknives . . . . . | 650  | Watch-springs . . . . . | 51,000  |

The production of pig iron in ninety years from 1800 has been approximately as follows :—

| Period             | Tons           |               |            |                 |             |
|--------------------|----------------|---------------|------------|-----------------|-------------|
|                    | United Kingdom | United States | Germany    | Other Countries | Total       |
| 1800-20 . . . . .  | 5,700,000      | 1,400,000     | 1,300,000  | 4,800,000       | 13,200,000  |
| 1821-40 . . . . .  | 16,400,000     | 3,800,000     | 2,500,000  | 10,100,000      | 32,800,000  |

Visiting cards are now sometimes made of very thin sheet-iron, viz. :—

|                           | Per Inch Thick | Per Inch Thick       |
|---------------------------|----------------|----------------------|
| Belgian . . . . .         | 400            | Baron Krupp's 820    |
| Count Harrach's . . . . . | 640            | Count Renard's 1,000 |

The production of steel has been approximately as follows, in tons :—

|                         | 1880   | 1870    | 1881      | 1889       |
|-------------------------|--------|---------|-----------|------------|
| U. Kingdom . . . . .    | 49,000 | 215,000 | 1,440,000 | 3,670,000  |
| Continent . . . . .     | 17,000 | 255,000 | 1,565,000 | 3,195,000  |
| United States . . . . . | 5,000  | 70,000  | 1,250,000 | 3,385,000  |
| Total . . . . .         | 71,000 | 540,000 | 4,255,000 | 10,250,000 |

According to Mr. Chisholm's tables and others, the production of steel in all countries has been as follows since 1870 :—

The aggregate production of steel in forty years may be set down approximately as follows :—

| Period             | Tons          |               |            |           |           |            |
|--------------------|---------------|---------------|------------|-----------|-----------|------------|
|                    | Great Britain | United States | Germany    | France    | Various   | Total      |
| 1850-69 . . . . .  | 2,600,000     | 700,000       | 1,300,000  | 800,000   | 700,000   | 6,100,000  |
| 1870-79 . . . . .  | 8,300,000     | 3,800,000     | 3,100,000  | 2,200,000 | 2,100,000 | 19,500,000 |
| 1880-89 . . . . .  | 25,100,000    | 21,700,000    | 12,200,000 | 3,800,000 | 6,100,000 | 68,900,000 |
| 40 years . . . . . | 36,000,000    | 26,200,000    | 16,600,000 | 6,800,000 | 8,900,000 | 94,500,000 |

Steel rails were first used for railways at Chalk Farm, near London, in 1862. They bore an annual traffic of 96,000,000 tons, and after three years were found worn  $\frac{1}{4}$  inch. The consumption of steel for railways in 1882 was as follows :—

|                         | Consumption, Tons per Annum |           |           |
|-------------------------|-----------------------------|-----------|-----------|
|                         | New Lines                   | Renewal   | Total     |
| United States . . . . . | 1,200,000                   | 900,000   | 2,100,000 |
| Great Britain . . . . . | 60,000                      | 160,000   | 220,000   |
| Continent, &c. . . . .  | 680,000                     | 655,000   | 1,335,000 |
| Total . . . . .         | 1,940,000                   | 1,715,000 | 3,655,000 |

In twenty years ending 1889 it appears that railways have absorbed 43,500,000 tons of steel, or almost half the total product. The life of an iron rail is sixteen, that of a steel one forty, years.

Taking the strength of Swedish iron at 100, the tensile strength of steel compares thus :—

|              |     |              |     |
|--------------|-----|--------------|-----|
| Swedish iron | 100 | Cannon steel | 173 |
| Boiler steel | 118 | Spring steel | 202 |

A bar of chrome steel,  $\frac{1}{2}$  inch square and 5 inches long, gives a strength of 141,000 lbs. per square inch, being 37 per cent. more than carbon steel. The nominal strength of steel is 30 tons per square inch, but Professor Siemens shows that it is really 36 tons. The tests used by the French Admiralty as minimum breaking load are as follows :—

| Iron Plates | Lbs. | Steel Plates, Inch | Lbs. |
|-------------|------|--------------------|------|
| Common      | 52   | 0.16 to 0.24       | 101  |
| Better      | 62   | 0.24 „ 0.80        | 99   |
| Best        | 64   | 0.80 „ 1.20        | 97   |

The plates supplied by Messrs. Cammell of Sheffield for seven French ironclads were subjected to 36,000 foot-tons of energy, viz. :—Shot, 760 lbs.; charge, 150 lbs., fired from a 12-inch gun, with velocity 1425 feet per second; range, 264 feet.

The plates in question were 11 feet long and 7 feet wide by 18 inches thick.

In 1879 some vessels were built of steel on the Clyde, it being found that a steel ship could carry 20 per cent. more than one of iron. In 1882 the *Oregon*, 7400 tons, was built of steel; the construction in this metal being as follows :—

|                | Tons    |
|----------------|---------|
| 1879 . . . . . | 18,000  |
| 1883 . . . . . | 143,000 |

About three tons of steel are consumed daily in making pens, of which Birmingham consumes  $1\frac{1}{2}$  tons. The output of steel pens yearly in 1882 was as follows :—

|                          | Pens        | Per Inhab. |
|--------------------------|-------------|------------|
| United Kingdom . . . . . | 810,000,000 | 23         |
| France . . . . .         | 420,000,000 | 11         |
| United States . . . . .  | 105,000,000 | 2          |

There are fourteen steel-pen factories at Birmingham, three in France, two in Germany, and one in the United States. A ton of steel produces 1,500,000 pens. The price when first made by Gillott, sixty years ago, was 12s. a dozen, 150 times the present price.

#### UNITED KINGDOM

The following is a summary of iron and steel exports in thirty-five years, from Mr. Chisholm's tables :—

| Period   | Tons to    |           |            |           |           |           |           |           |           | Total      |
|----------|------------|-----------|------------|-----------|-----------|-----------|-----------|-----------|-----------|------------|
|          | U. States  | France    | Germany    | Belgium   | Italy     | Russia    | India     | Australia | Canada    |            |
| 1855-59  | 1,600,000  | 600,000   | 1,200,000  | 20,000    | ...       | 230,000   | 860,000   | 280,000   | ...       | 6,900,000  |
| 1860-69  | 3,300,000  | 1,400,000 | 2,400,000  | 310,000   | 220,000   | 1,020,000 | 2,010,000 | 800,000   | 170,000   | 18,100,000 |
| 1870-79  | 5,100,000  | 1,100,000 | 5,900,000  | 1,240,000 | 780,000   | 2,200,000 | 1,500,000 | 1,700,000 | 1,600,000 | 27,100,000 |
| 1880-89  | 8,600,000  | 1,200,000 | 5,300,000  | 800,000   | 1,600,000 | 1,520,000 | 3,900,000 | 3,700,000 | 2,400,000 | 38,300,000 |
| 35 years | 18,600,000 | 4,300,000 | 14,800,000 | 2,370,000 | 2,600,000 | 4,970,000 | 8,270,000 | 6,480,000 | 4,170,000 | 90,400,000 |

In the above table Germany also includes Holland. The total includes many countries not above stated. The production of iron compares with the exports from the United Kingdom thus :—

| Period             | Tons Iron Made | Tons Exported | Home Use    |
|--------------------|----------------|---------------|-------------|
| 1855-59 . . . . .  | 18,500,000     | 6,900,000     | 11,600,000  |
| 1860-69 . . . . .  | 46,000,000     | 18,100,000    | 27,900,000  |
| 1870-79 . . . . .  | 64,000,000     | 27,100,000    | 36,900,000  |
| 1880-89 . . . . .  | 74,200,000     | 38,300,000    | 35,900,000  |
| 35 years . . . . . | 202,700,000    | 90,400,000    | 112,300,000 |

The consumption of coal in making pig iron was as follows :—

| Year           | Tons      |            | Tons of Coal to One Ton of Iron |
|----------------|-----------|------------|---------------------------------|
|                | Iron      | Coal       |                                 |
| 1796 . . . . . | 125,000   | 750,000    | 6.0                             |
| 1806 . . . . . | 243,000   | 1,220,000  | 5.0                             |
| 1840 . . . . . | 1,396,000 | 4,877,000  | 3.5                             |
| 1870 . . . . . | 5,230,000 | 16,220,000 | 3.1                             |
| 1875 . . . . . | 6,365,000 | 15,700,000 | 2.5                             |
| 1881 . . . . . | 8,326,000 | 18,300,000 | 2.2                             |
| 1889 . . . . . | 8,200,000 | 17,400,000 | 2.1                             |

Nelson's invention in 1829 of the hot-blast, 600° Fahr., caused a saving of 33 per cent. in the quantity of coal required. Cowper's "Regenerator" of 1500° Fahr., in 1857, caused a further saving. Meantime the total con-

sumption of coal in British ironworks is about 35 million tons. The estimate in 1881 was as follows :—

|                                    | Tons Coal Used |
|------------------------------------|----------------|
| Making pig-iron . . . . .          | 18,300,000     |
| Finished iron . . . . .            | 8,040,000      |
| Steel . . . . .                    | 1,680,000      |
| Engines and shipbuilding . . . . . | 1,510,000      |
| Sundries . . . . .                 | 5,230,000      |

Total . . . . . 34,760,000

The furnaces of the United Kingdom in 1889 were :—

|                    | In Blast | Idle | Total |
|--------------------|----------|------|-------|
| England . . . . .  | 329      | 233  | 562   |
| Wales . . . . .    | 45       | 66   | 111   |
| Scotland . . . . . | 87       | 53   | 140   |
| Total . . . . .    | 461      | 352  | 813   |

#### FRANCE

In the eighteenth century, according to Seaman, France produced more iron than Great Britain until the French Revolution, when England took the foremost place. In that century France only doubled her output from 22,000 to 50,000 tons, while Great Britain increased hers tenfold. The wars of Bonaparte considerably retarded this industry, for we find that in 1814 the production did not exceed 100,000 tons, whereas in Great Britain it reached 300,000 tons. A table published in 1840 was as follows :—

| Year           | Blast Furnaces | Tons Pig Iron |
|----------------|----------------|---------------|
| 1825 . . . . . | ...            | 160,000       |
| 1828 . . . . . | 393            | 220,000       |
| 1839 . . . . . | 569            | 350,000       |

In this latter year the number of hands employed was 44,000, giving an average of eight tons per man. The production and consumption of iron and steel were approximately as follows:—

| Year       | Iron, Tons |             | Lbs. Consumed per Inhabitant | Production of Steel, Tons |
|------------|------------|-------------|------------------------------|---------------------------|
|            | Production | Consumption |                              |                           |
| 1700 . . . | 22,000     | 22,000      | 2                            | ...                       |
| 1800 . . . | 60,000     | 60,000      | 5                            | ...                       |
| 1850 . . . | 570,000    | 600,000     | 37                           | 8,000                     |
| 1870 . . . | 1,180,000  | 1,350,000   | 80                           | 94,000                    |
| 1889 . . . | 1,720,000  | 1,900,000   | 112                          | 530,000                   |

In 1880 there were 600 blast-furnaces and 500 others. In 1885 the foundries employed 55,000 workmen, who turned out 780,000 tons of iron bars, &c., and 550,000 tons of steel, representing a value of £10,200,000, say £184 per man.

## GERMANY

The production of iron has increased an hundred-fold since 1810, viz. :—

| Year           | Tons Iron | Tons Steel | Lbs. Iron per Inhabitant |
|----------------|-----------|------------|--------------------------|
| 1810 . . . . . | 46,000    | ...        | 4                        |
| 1850 . . . . . | 402,000   | 6,000      | 27                       |
| 1870 . . . . . | 1,390,000 | 170,000    | 74                       |
| 1889 . . . . . | 4,530,000 | 1,400,000  | 204                      |

In 1888 there were 1470 foundries, employing 170,000 men. The most remarkable in the world is that of Mr. Krupp, at Essen, Prussia, covering 1100 acres: the number of workmen never falls below 16,000, and there are 800 steam-engines, with an aggregate of 18,000 horse-power, and 82 steam-hammers, the heaviest weighing 50 tons: the daily consumption of iron and steel averages 500 tons. Down to 1876 Mr. Krupp had delivered 15,000 pieces of cannon to various nations.

Germany is now the third great producer of iron, her output being half that of Great Britain. In seven years ending 1887 the imports and exports of pig-iron were equal, but the exports of railway bars and other manufactured iron averaged 340,000 tons yearly.

## RUSSIA

In 1828 there were 900 furnaces at work at Perm, Vialka, and Nijni, and 600 workshops for cutlery at Tula, with 7000 operatives: the production of iron was then estimated at 115,000 tons, but it was so dear that horses were unshod and farm implements were entirely of wood. In 1866 Tegebol'ski's report showed 1732 foundries, with 137,000 operatives, who consumed 300,000 tons of iron yearly, turning out manufactures valued at 10 millions sterling; an excessive valuation, equal to £28 a ton, the real value being about 7 millions. The following table shows approximately the production and consumption:—

| Year       | Tons Iron  |             | Lbs. per Inhabitant | Steel, Tons |
|------------|------------|-------------|---------------------|-------------|
|            | Production | Consumption |                     |             |
| 1828 . . . | 115,000    | 120,000     | 6                   | ...         |
| 1850 . . . | 220,000    | 300,000     | 11                  | ...         |
| 1870 . . . | 350,000    | 655,000     | 20                  | 9,000       |
| 1888 . . . | 600,000    | 730,000     | 19                  | 260,000     |

There has been a remarkable increase in the manufacture of farming implements, namely, from £220,000 in 1867 to one million sterling in 1885.

## AUSTRIA

In sixty years the production of iron has grown nearly tenfold, and Austria now holds sixth place. The production and consumption were approximately:—

| Year       | Tons       |             | Lbs. per Inhabitant | Steel, Tons |
|------------|------------|-------------|---------------------|-------------|
|            | Production | Consumption |                     |             |
| 1830 . . . | 80,000     | 100,000     | 9                   | ...         |
| 1850 . . . | 140,000    | 160,000     | 12                  | ...         |
| 1870 . . . | 400,000    | 430,000     | 28                  | 22,000      |
| 1888 . . . | 760,000    | 770,000     | 45                  | 280,000     |

Austria proper in 1888 produced 565,000, and Hungary 195,000, tons pig-iron.

## ITALY

The production and consumption were approximately as follows:—

| Year       | Tons Iron  |             | Lbs. per Inhabitant | Steel, Tons |
|------------|------------|-------------|---------------------|-------------|
|            | Production | Consumption |                     |             |
| 1830 . . . | 10,000     | 20,000      | 3                   | ...         |
| 1860 . . . | 40,000     | 75,000      | 8                   | ...         |
| 1870 . . . | 50,000     | 100,000     | 9                   | ...         |
| 1887 . . . | 70,000     | 290,000     | 22                  | 20,000      |

A statement published in 1877 was as follows as to production:—

| Year       | Tons     |       | Value, £ |        |         |
|------------|----------|-------|----------|--------|---------|
|            | Bar Iron | Steel | Bar Iron | Steel  | Total   |
| 1860 . . . | 30,000   | ...   | 540,000  | ...    | 540,000 |
| 1870 . . . | 38,000   | 1,000 | 660,000  | 25,000 | 685,000 |
| 1876 . . . | 49,000   | 3,000 | 720,000  | 56,000 | 776,000 |

Italy pays £1,200,000 for imported pig and bar iron, which she converts into merchandise worth £3,200,000.

## SPAIN

Although Spain possesses some of the best iron-fields in the world, her production is small, and she is forced to import 30 per cent. of what is used in her foundries. Meantime she exports 5 million tons yearly of iron ores. The production and consumption approximately were:—

| Year       | Tons       |             | Lbs. per Inhabitant | Steel, Tons |
|------------|------------|-------------|---------------------|-------------|
|            | Production | Consumption |                     |             |
| 1830 . . . | 20,000     | 40,000      | 8                   | ...         |
| 1850 . . . | 40,000     | 80,000      | 13                  | ...         |
| 1870 . . . | 70,000     | 150,000     | 23                  | ...         |
| 1889 . . . | 230,000    | 300,000     | 37                  | 30,000      |

Spain pays £700,000 a year for imported pig and bar iron: her manufactures of iron and steel are approximately worth £2,700,000.

## SWEDEN

In the beginning of the nineteenth century Sweden produced as much iron as Germany, but her production now is only one-tenth of that of the latter country. She holds eighth rank, coming next after Russia. The production and consumption were approximately:—

| Year       | Tons Iron  |             | Lbs. per Inhabitant | Steel, Tons |
|------------|------------|-------------|---------------------|-------------|
|            | Production | Consumption |                     |             |
| 1812 . . . | 65,000     | 40,000      | 37                  | ...         |
| 1830 . . . | 105,000    | 80,000      | 60                  | ...         |
| 1850 . . . | 130,000    | 100,000     | 63                  | ...         |
| 1870 . . . | 290,000    | 210,000     | 105                 | 6,000       |
| 1889 . . . | 460,000    | 320,000     | 170                 | 80,000      |

Sweden exports yearly 200,000 tons bar iron and 60,000 tons pig-iron. Her manufactures of iron and steel are about £4,200,000.

#### BELGIUM

In 1816 Mr. John Cockerill, from England, introduced the method of smelting with coke, and established at Seraing one of the finest ironworks in Europe. The industry advanced greatly after the separation from Holland in 1830, but its most striking progress has been in the last thirty years. Official returns since 1845 show as follows:—

| Year       | Blast Furnaces | Operatives | Output, Tons |         |
|------------|----------------|------------|--------------|---------|
|            |                |            | Iron         | Steel   |
| 1845 . . . | 56             | 14,600     | 62,000       | ...     |
| 1850 . . . | 65             | 11,600     | 73,000       | ...     |
| 1860 . . . | 51             | 26,300     | 218,000      | ...     |
| 1870 . . . | 48             | 41,200     | 523,000      | 4,000   |
| 1880 . . . | 36             | 37,300     | 493,000      | 132,000 |
| 1887 . . . | 29             | 34,100     | 534,000      | 216,000 |

The exports of bar and wrought iron were as follows:—

| Year | Tons    | Value, £  | Year | Tons    | Value, £  |
|------|---------|-----------|------|---------|-----------|
| 1860 | 63,000  | 440,000   | 1875 | 183,000 | 2,000,000 |
| 1865 | 118,000 | 800,000   | 1880 | 228,000 | 1,600,000 |
| 1870 | 220,000 | 1,400,000 | 1887 | 335,000 | 1,600,000 |

The iron and steel manufactures are worth about £10,600,000.

#### UNITED STATES

In 1620 a group of forty ironworkers arrived from Sussex, England, and commenced to make iron, but in 1662 a decree was issued to prohibit the importation of this metal, with the view to promote iron manufactures in the Colony. This prohibition was removed in 1682. The first regular foundry in North America was that established by Joseph Jenks in 1663, at Lynn, Massachusetts. There were six existing in the Colonies in 1750, when the British Parliament passed a law to close all mills, forges, or furnaces in the Colonies, the better to protect British manufactures. After the Independence this branch of industry made progress, but soon collapsed, owing to the influx of British merchandise. In 1833 Frederick Gersenhamer obtained a patent for using hot-blast with anthracite coal, and in 1835 produced the first iron so made.

The total output of iron, which was only 40,000 tons in 1796, rose to 287,000 in 1840, viz.:—

|                        | Tons    |
|------------------------|---------|
| Pennsylvania . . . . . | 98,000  |
| Ohio . . . . .         | 35,000  |
| Other States . . . . . | 154,000 |
| Total . . . . .        | 287,000 |

A table published in the latter year compared the production and the number of operatives with 1830 as follows:—

| Year           | Operatives | Tons Iron | Tons per Man |
|----------------|------------|-----------|--------------|
| 1830 . . . . . | 20,000     | 184,000   | 6.3          |
| 1840 . . . . . | 56,000     | 287,000   | 5.1          |

From this time the construction of railways, especially after the war of 1861-65, gave a great impetus to this industry, the production being as follows:—

| Year           | Tons      |
|----------------|-----------|
| 1850 . . . . . | 564,000   |
| 1870 . . . . . | 1,580,000 |

In 1873 there were 719 furnaces at work. In 1889 the output of pig-iron reached 7,600,000 tons, being second only to Great Britain.

The Census returns of foundries and ironworks showed thus:—

|                           | 1870       | 1880       |
|---------------------------|------------|------------|
| Hands . . . . .           | 78,000     | 141,000    |
| Wages, £ . . . . .        | 7,500,000  | 11,600,000 |
| Manufactures, £ . . . . . | 37,400,000 | 62,000,000 |

The production of pig-iron in 1888 and 1889 was as follows:—

|                        | 1888<br>Tons | 1889<br>Tons |
|------------------------|--------------|--------------|
| Pennsylvania . . . . . | 3,200,000    | 3,730,000    |
| Ohio . . . . .         | 990,000      | 1,090,000    |
| Other States . . . . . | 2,300,000    | 2,780,000    |
| Total . . . . .        | 6,490,000    | 7,600,000    |

The manufacture of steel dates from 1808, as follows:—

| Year           | Tons      |
|----------------|-----------|
| 1808 . . . . . | 900       |
| 1850 . . . . . | 2,000     |
| 1860 . . . . . | 12,000    |
| 1870 . . . . . | 64,000    |
| 1876 . . . . . | 520,000   |
| 1889 . . . . . | 3,390,000 |

At present the United States produce one-third the steel of the world. The make of steel in 1889 included 1,510,000 tons of rails.

The rivalry between Great Britain and the United States in iron and steel production is thus indicated by Mr. Swank:—

|                        | Great Britain, Tons |           | United States, Tons |           |
|------------------------|---------------------|-----------|---------------------|-----------|
|                        | 1882                | 1889      | 1882                | 1889      |
| Pig-iron . . . . .     | 8,580,000           | 8,250,000 | 4,620,000           | 7,605,000 |
| Steel ingots . . . . . | 1,670,000           | 2,140,000 | 1,510,000           | 2,930,000 |
| Steel rails . . . . .  | 1,230,000           | 940,000   | 1,280,000           | 1,510,000 |

The production of steel of all descriptions in 1889 was 3,690,000 tons in Great Britain and 3,390,000 in the United States.

## IRRIGATION

### FRANCE

Only 260,000 acres irrigated, which yield crops worth £3 per acre more than ordinary.

### ITALY

The canals in the Po valley irrigate 1,370,000 acres, which receive every day in summer 45 million tons of water, measured through a great number of little sluice-gates: the permanent right to an inch of water is worth from £500 to £800. The usual rent of these lands is £6 per acre per annum.

### BELGIUM

Since 1859 an area of 160,000 acres of waste lands has been made valuable by irrigation, adjoining State canals.

### SPAIN

Land unwatered may be rented at 5s. an acre, but the irrigated lands of Valencia, where the old canals and works of the Moors remain, readily rent at £5 per acre. The total area of irrigated lands is 2½ million acres.

### ALGERIA

The most important work is the "barrage" at Habra, with a basin holding 30 million tons of water, the main wall being 110 feet high, 120 feet thick, and 1500 feet long. The distributory canals are 310 miles, irrigating 70,000 acres. It belongs to a French Company, and cost £160,000.

## EGYPT

During his reign of seventeen years, from 1863 to 1879, Ismael Pasha constructed 112 canals branching from the Nile, to irrigate 1,400,000 acres, with an aggregate length of 8400 miles, the cost amounting to about 12 millions sterling. The lands thus newly irrigated produce crops worth £10,600,000, or 22 per cent. of the total value of Egyptian crops. The actual length of Nile canals is 52,000 miles, the task of irrigation employing 476 steam-pumps, 107,000 Persian water-wheels, 150,000 men, and 60,000 animals, at an annual cost averaging 4s. per acre.

## INDIA

The Ganges Canal irrigates 400,000 acres, is 880 miles long, having 902 bridges and 297 aqueducts, and cost £2,400,000. In the Madras Presidency irrigation is also carefully studied: there are 53,000 tank-reservoirs, 30,000 miles of dykes, the whole having cost 16 millions sterling, and producing a revenue of £1,500,000 per annum. The largest reservoir or artificial lake in the world is the great tank of Dhebar, Rajputana, which covers an area of 21 square miles. The masonry dam is 1000 feet long by 95 feet high, 50 feet wide at the base, and 15 feet at the top.

## CYPRUS

The canals made by the Venetians had fallen to ruin under the Turks, but many of them have been restored by British engineer officers since 1878. Irrigated lands yield three times heavier crops than the rest of the island.

## CALIFORNIA

Since 1870 there have been constructed 2000 miles of canals, irrigating more than 10 millions of acres.

## SOUTH AMERICA

The Incas had a perfect network of canals irrigating the lands on the western slope of the Andes. Near Mendoza, at the eastern foot of the Andes, still exists the Zanjon or canal made by the Cacique Guaymallen, irrigating a tract of eighteen miles of country.

## AUSTRALIA

The Melbourne Government has already spent £470,000, and proposes to spend two millions more on works of irrigation.

## J.

## JEWELLERY

## Diamonds

## Weight in Carats of Six Largest

|                        |     |                       |     |
|------------------------|-----|-----------------------|-----|
| Kohinoor . . . . .     | 103 | Austrian Kaiser . . . | 139 |
| Star of Brazil . . . . | 125 | Russian Czar . . . .  | 193 |
| Regent of France . . . | 136 | Rajah of Borneo . . . | 367 |

The value of the above is not regulated by size, nor easy to estimate, but none of them is worth less than £100,000.

## Scale of Value for Small Stones

|                   |      |                    |       |
|-------------------|------|--------------------|-------|
| 1 carat . . . . . | £ 8  | 5 carat . . . . .  | £ 200 |
| 3 carat . . . . . | £ 72 | 10 carat . . . . . | £ 800 |

Cape diamonds are of inferior value; one of the largest, the Stewart, found in November 1872, sold for £11,000, weighing 288 carats uncut. The Kimberley field, covering nine acres, has produced diamonds to the value of 15 millions sterling since 1871, the diggings being from 100 to 170 feet deep. The annual export of diamonds from the Cape is about 1400 lbs., worth over four millions, and the fields employ 2000 white and 22,000 coloured diggers. In 1889 the value of diamonds extracted was £4,300,000 sterling. The total product in eighteen years was approximately 46,000,000 carats, worth £56,000,000 sterling.

*Emerald.*—The ordinary value is as follows:—

| Grains       | £  | Grains       | £   |
|--------------|----|--------------|-----|
| 5 . . . . .  | 5  | 15 . . . . . | 50  |
| 10 . . . . . | 20 | 24 . . . . . | 100 |

*Opal.*—The Emperor of Austria has one for which he refused £50,000: it weighs 17 oz.

*Pearls.*—The pearl-fishery of Ceylon in 1890 only lasted 22 days, and during that period 11,000,000 oysters were brought to the surface by fifty divers. They are paid by one-fourth of the number. This season the whole produce was sold at the rate of 24s. per 1000 shells. The Government received £20,000 as their share, and the divers £6400. The largest pearls are worth in Ceylon from £40 to £60, and in Europe they fetch three times the price or more.

## JEWS

|                     | 1860      | 1880      | Increase  |

| Total . . . . .   | 100.0 | 100.0   | 100.0                     |

The life-value of Prussian Jews compares with that of Christians as follows :—

## SURVIVAL OF 1000 PERSONS BORN

| Age          | Jews,<br>Prussia | Christians |         |
|--------------|------------------|------------|---------|
|              |                  | Prussia    | England |
| 5 . . . . .  | 593              | 639        | 751     |
| 10 . . . . . | 535              | 620        | 727     |
| 15 . . . . . | 514              | 610        | 714     |
| 20 . . . . . | 482              | 602        | 699     |
| 30 . . . . . | 432              | 562        | 650     |
| 40 . . . . . | 364              | 506        | 587     |
| 50 . . . . . | 305              | 438        | 506     |
| 60 . . . . . | 237              | 345        | 398     |
| 70 . . . . . | 153              | 206        | 253     |
| 80 . . . . . | 62               | 80         | 108     |

## JUTE

In 1828 India produced 18 tons of jute, valued at £62 sterling, say 70s. a ton; but it rapidly rose both in quality and price, the export from that country showing thus :—

| Year           | Tons    | Value, £   | Per Ton |
|----------------|---------|------------|---------|
| 1835 . . . . . | 600     | ...        | £ s. d. |
| 1850 . . . . . | 19,500  | 89,000     | 4 10 0  |
| 1860 . . . . . | 38,000  | 290,000    | 7 12 0  |
| 1870 . . . . . | 120,000 | 1,520,000  | 12 13 0 |
| 1880 . . . . . | 305,000 | 4,880,000  | 16 0 0  |
| 1890 . . . . . | 501,000 | 6,500,000* | 13 0 0  |

The cost of cultivation averages 16s. an acre, the yield half a ton per acre, worth £6.

There were in 1889 in India twenty-five factories, with 160,000 spindles, 8000 power-looms, and 61,000 operatives, consuming annually 190,000 tons of jute, and turning out 100 million sacks, of which California took 20 and China 15 millions.

Jute factories in the United Kingdom have increased as follows :—

|                       | 1870    | 1885    |
|-----------------------|---------|---------|
| Number . . . . .      | 63      | 120     |
| Spindles . . . . .    | 115,000 | 264,000 |
| Power-looms . . . . . | 4,300   | 12,000  |
| Operatives . . . . .  | 18,000  | 42,000  |

\* The nominal value was £8,600,000, taking the rupee at 24d.

The manufacture in the United Kingdom showed approximately thus :—

| Year | Con-<br>sumed,<br>Tons | Make,<br>Million<br>Yards | Export,<br>Million<br>Yards | Export<br>Yarn, Million<br>Lbs. | Manu-<br>factures,<br>Value, £ |
|------|------------------------|---------------------------|-----------------------------|---------------------------------|--------------------------------|
| 1850 | 19,000                 | 63                        | ...                         | ...                             | 900,000                        |
| 1860 | 38,000                 | 126                       | ...                         | ...                             | 1,900,000                      |
| 1870 | 98,000                 | 300                       | 52                          | 13                              | 4,700,000                      |
| 1880 | 178,000                | 560                       | 183                         | 17                              | 7,200,000                      |
| 1889 | 268,000                | 810                       | 265                         | 34                              | 9,100,000                      |

The output averages at present only £215 per operative yearly, against £260 in 1870, the price having fallen from 365d. to 216d. per 100 yards. The number of yards produced per operative is about 19,000 yards, or 11 miles yearly.

The jute manufacture since 1850 may be summed up approximately thus :—

| Period  | Great<br>Britain | Other<br>Coun-<br>tries | Total      | Value of<br>Manufac-<br>ture, Mil-<br>lions £ | Price of<br>Cloth, £<br>per<br>Mile |
|---------|------------------|-------------------------|------------|-----------------------------------------------|-------------------------------------|
| 1851-60 | 500,000          | 100,000                 | 600,000    | 17                                            | 29                                  |
| 1861-70 | 1,200,000        | 400,000                 | 1,600,000  | 43                                            | 27                                  |
| 1871-80 | 2,500,000        | 1,500,000               | 4,000,000  | 96                                            | 24                                  |
| 1881-88 | 2,700,000        | 3,200,000               | 5,900,000  | 118                                           | 20                                  |
| Total   | 6,900,000        | 5,200,000               | 12,100,000 | 274                                           | 23                                  |

The value of manufactured goods produced in thirty-eight years was shared approximately as follows :—

|                           | Million £ |
|---------------------------|-----------|
| Great Britain . . . . .   | 160       |
| India . . . . .           | 21        |
| Other countries . . . . . | 93        |
| Total . . . . .           | 274       |

The profit of this industry to Great Britain appears thus :—

| Period             | Millions £ Sterling |                   |                |
|--------------------|---------------------|-------------------|----------------|
|                    | Raw Jute            | Manu-<br>factured | Net<br>Product |
| 1851-60 . . . . .  | 2                   | 14                | 12             |
| 1861-70 . . . . .  | 7                   | 32                | 25             |
| 1871-80 . . . . .  | 20                  | 60                | 40             |
| 1881-88 . . . . .  | 24                  | 54                | 30             |
| 38 years . . . . . | 53                  | 160               | 107            |

This industry enriched the United Kingdom by over three millions sterling per annum in the last thirty years, of which apparently about £1,500,000 a year went in wages. The above, moreover, does not include exported yarn, the total value of which in thirty-eight years amounted to five millions sterling, thus bringing up the total net product to 112 millions sterling.

## K.

## KANGAROO

These animals will soon be extinct, as the squatters kill them wholesale. The export of kangaroo skins from Melbourne was as follows :—

| Year           | No.     | Value, £ |
|----------------|---------|----------|
| 1883 . . . . . | 20,000  | 1,500    |
| 1888 . . . . . | 260,000 | 54,000   |

Kangaroos can jump a fence 11 feet high.

## KOUMISS

Extracted by the Tartars from mares' milk, a gallon of milk giving three ounces of Koumiss brandy.

## KINGS

There are 22 kings or emperors. The number who have ruled in various countries since the battle of Hastings, A.D. 1066, has been as follows :—

| No.               | Average |       | No.               | Average |       |
|-------------------|---------|-------|-------------------|---------|-------|
|                   | Reign,  | Years |                   | Reign,  | Years |
| England . . . . . | 35      | 23    | Spain . . . . .   | 32      | 26    |
| France . . . . .  | 34      | 24    | Denmark . . . . . | 39      | 21    |
| Germany . . . . . | 39      | 21    | Sweden . . . . .  | 53      | 15    |
| Russia . . . . .  | 50      | 16    | Turkey . . . . .  | 35      | 17    |

The Turkish dynasty dates only from 1299. The average reign of the above 317 monarchs was just twenty years.

## L.

## LABOURER

Dr. Farr estimates the value of an agricultural labourer to the commonwealth as follows :—

| Age          | Value, £ | Age          | Value, £ | Age          | Value, £ |
|--------------|----------|--------------|----------|--------------|----------|
| 10 . . . . . | 117      | 30 . . . . . | 241      | 55 . . . . . | 138      |
| 15 . . . . . | 192      | 35 . . . . . | 228      | 60 . . . . . | 97       |
| 20 . . . . . | 234      | 40 . . . . . | 212      | 65 . . . . . | 46       |
| 25 . . . . . | 246      | 50 . . . . . | 168      | 70 . . . . . | 0        |

These figures of Dr. Farr have been often called in question as being too high, but the best authorities in the United States and Australia set even a higher value on able-bodied immigrants.

## LACE

This industry employs in Great Britain 9000 men and 41,000 women, who produce lace annually to the value of 6 millions sterling. It is stated that more than 500,000 women on the Continent make lace worth 30 millions yearly, or £60 each, but this seems a high average.

## LAKES

The following table is merely intended as a comparison of some of the most remarkable lakes in the world :—

|                           | Square Miles | Depth, Feet | Area Equal to   |
|---------------------------|--------------|-------------|-----------------|
| Superior . . . . .        | 32,100       | 688         | Ireland         |
| Victoria Nyanza . . . . . | 26,900       | ...         | ...             |
| Aral . . . . .            | 23,300       | 731*        | Holland         |
| Huron . . . . .           | 20,400       | 600         | Greece          |
| Baikal . . . . .          | 14,800       | 580         | Denmark         |
| Michigan . . . . .        | 12,900       | 600         | Belgium         |
| Erie . . . . .            | 9,600        | 84          | Sardinia Island |
| Ontario . . . . .         | 7,650        | 510         | ...             |
| Ladoga . . . . .          | 6,250        | ...         | Wurtemberg      |
| Onega . . . . .           | 3,350        | ...         | Corsica         |
| Wenner . . . . .          | 2,130        | 294*        | Devonshire      |
| Wetter . . . . .          | 733          | 410         | Oxfordshire     |
| Constance . . . . .       | 180          | 1,027*      | Isle of Man     |
| Neagh . . . . .           | 153          | 42          | Malta           |
| Maggiore . . . . .        | 130          | 700         | ...             |
| Zurich . . . . .          | 40           | 600         | St. Helena      |

\* Maximum depth ; the rest show the average depth.

## LAND

The following conspectus shows at a glance the distribution and tenure of land in various countries, the number of owners, the approximate value, the cultivated area, and other important features. The "data" do not correspond to any particular year, but represent the latest information :—

|                         | Area, Millions of Acres |              |       | Number of Owners | Average Acres per Estate | Value of Land, Million £ |
|-------------------------|-------------------------|--------------|-------|------------------|--------------------------|--------------------------|
|                         | Cultivated              | Uncultivated | Total |                  |                          |                          |
| U. Kingdom              | 48                      | 30           | 78    | 180,000          | 390                      | 1,544                    |
| France . . . . .        | 90                      | 41           | 131   | 3,226,000        | 32                       | 2,688                    |
| Germany . . . . .       | 65                      | 68           | 133   | 2,436,000        | 37                       | 1,815                    |
| Russia . . . . .        | 345                     | 899          | 1,244 | 11,336,000       | 31                       | 1,597                    |
| Austria . . . . .       | 73                      | 80           | 153   | 6,150,000        | 20                       | 1,371                    |
| Italy . . . . .         | 27                      | 44           | 71    | 1,265,000        | 36                       | 1,182                    |
| Spain . . . . .         | 22                      | 99           | 121   | 596,000          | 95                       | 984                      |
| Portugal . . . . .      | 5                       | 17           | 22    | 419,000          | 30                       | 132                      |
| Sweden . . . . .        | 12                      | 89           | 101   | 194,000          | 300                      | 240                      |
| Norway . . . . .        | 3                       | 74           | 77    | 75,000           | 200                      | 100                      |
| Denmark . . . . .       | 7                       | 2            | 9     | 71,000           | 115                      | 217                      |
| Holland . . . . .       | 5                       | 3            | 8     | 154,000          | 45                       | 314                      |
| Belgium . . . . .       | 5                       | 2            | 7     | 315,000          | 18                       | 377                      |
| Greece . . . . .        | 2                       | 9            | 11    | 163,000          | 30                       | 138                      |
| Europe . . . . .        | 709                     | 1,457        | 2,166 | 26,580,000       | 48                       | 12,609                   |
| United States . . . . . | 205                     | 2,086        | 2,291 | 4,005,000        | 134                      | 2,560                    |
| Canada . . . . .        | 16                      | 1,902        | 1,918 | 408,000          | 120                      | 282                      |
| Australia . . . . .     | 12                      | 1,846        | 1,858 | 168,000          | 380                      | 535                      |
| Argentina . . . . .     | 7                       | 770          | 777   | ...              | ...                      | 111                      |
| Total . . . . .         | 949                     | 8,061        | 9,010 | 31,161,000       | 70                       | 16,097                   |

Colbert in his letter to Louis XIV. estimated the value of land in France, England, and Holland in the seventeenth century (1660) as follows :—

|                   | Value        | Rental      | Per Acre |        |
|-------------------|--------------|-------------|----------|--------|
|                   |              |             | Value    | Rental |
| France . . . . .  | £122,000,000 | £15,000,000 | 2        | 3      |
| England . . . . . | £135,000,000 | £8,500,000  | 90       | 6      |
| Holland . . . . . | £46,000,000  | £4,000,000  | 180      | 15     |

## UNITED KINGDOM

The rental of the three kingdoms has been at various dates as follows :—

| A.D.           | England    | Scotland  | Ireland   | United Kingdom | Authority                |
|----------------|------------|-----------|-----------|----------------|--------------------------|
|                | £          | £         | £         | £              |                          |
| 1544 . . . . . | 1,500,000  | ...       | ...       | ...            | Haydn                    |
| 1600 . . . . . | 6,000,000  | ...       | ...       | ...            | "                        |
| 1660 . . . . . | 8,500,000  | ...       | ...       | ...            | Colbert                  |
| 1688 . . . . . | 10,000,000 | ...       | 900,000   | ...            | King, Petty              |
| 1729 . . . . . | ...        | ...       | 2,025,000 | ...            | Browne                   |
| 1750 . . . . . | 12,700,000 | 800,000   | 3,100,000 | 16,600,000     | ...                      |
| 1776 . . . . . | 16,000,000 | 1,100,000 | 5,340,000 | 22,440,000     | Young                    |
| 1800 . . . . . | 22,500,000 | 2,100,000 | 8,000,000 | 32,600,000     | { M'Culloch,<br>Newenham |
| 1815 . . . . . | 34,330,000 | 5,075,000 | 7,100,000 | 46,505,000     | M'Culloch                |
| 1843 . . . . . | 40,170,000 | 5,590,000 | 8,630,000 | 54,390,000     | Official                 |
| 1860 . . . . . | 42,990,000 | 6,280,000 | 8,990,000 | 58,260,000     | "                        |
| 1870 . . . . . | 47,800,000 | 7,190,000 | 9,140,000 | 64,130,000     | "                        |
| 1880 . . . . . | 51,800,000 | 7,770,000 | 9,930,000 | 69,550,000     | "                        |
| 1888 . . . . . | 44,470,000 | 6,820,000 | 9,560,000 | 61,250,000     | "                        |

Since 1880 the valuation of England has been reduced 14 per cent., that of Scotland 13 per cent., that of Ireland nothing. The Local Government Board estimated the real land rental of the three kingdoms in 1878 thus :—

|                          | Rental, £  | Extent, Acres | Number of Proprietors | Average Estate |           | Shillings per Acre |
|--------------------------|------------|---------------|-----------------------|----------------|-----------|--------------------|
|                          |            |               |                       | Acres          | Rental, £ |                    |
| England . . . . .        | 70,240,000 | 32,860,000    | 262,850               | 125            | 266       | 44                 |
| Scotland . . . . .       | 12,900,000 | 18,920,000    | 19,225                | 980            | 670       | 14                 |
| Ireland . . . . .        | 12,050,000 | 20,150,000    | 32,610                | 620            | 370       | 12                 |
| United Kingdom . . . . . | 95,190,000 | 71,930,000    | 314,685               | 230            | 310       | 26                 |

If we exclude owners of less than ten acres, we find the landed property of the three kingdoms, according to the Local Government Report, is held thus :—

|                      | 10 to 100 Acres | Over 100 | Total No. of Owners | Rental, £  | Average, £ |
|----------------------|-----------------|----------|---------------------|------------|------------|
| England . . . . .    | 99,000          | 42,100   | 141,100             | 63,800,000 | 450        |
| Scotland . . . . .   | 4,700           | 5,020    | 9,720               | 11,470,000 | 1,180      |
| Ireland . . . . .    | 11,900          | 14,500   | 26,400              | 11,550,000 | 450        |
| U. Kingdom . . . . . | 114,900         | 61,620   | 176,520             | 86,820,000 | 495        |

## ENGLAND

The estate-owners in England of more than one acre are as follows (Local Government Board Report) :—

| Holding Acres | Number of Owners | Acres Owned | Annual Rental, £ | Shillings per Acre | Percentage of Area |
|---------------|------------------|-------------|------------------|--------------------|--------------------|
| Under 50      | 194,620          | 2,230,000   | 12,950,000       | 116                | 7.0                |
| 50-100        | 25,840           | 1,790,000   | 4,300,000        | 48                 | 5.4                |
| 100-500       | 32,320           | 6,830,000   | 13,680,000       | 40                 | 20.8               |
| Over 500      | 10,070           | 22,010,000  | 39,310,000       | 36                 | 66.8               |
| Total         | 262,850          | 32,860,000  | 70,240,000       | 44                 | 100.0              |

## SCOTLAND

| Under 50 | 12,940 | 110,000    | 2,270,000  | 413 | 0.6   |
|----------|--------|------------|------------|-----|-------|
| 50-100   | 1,210  | 90,000     | 380,000    | 84  | 0.5   |
| 100-500  | 2,370  | 560,000    | 1,680,000  | 60  | 2.9   |
| Over 500 | 2,705  | 18,160,000 | 8,570,000  | 9   | 96.0  |
| Total    | 19,225 | 18,920,000 | 12,900,000 | 14  | 100.0 |

## IRELAND

| Holding  | Owners | Acres      | Rental, £ s. p. | Per Cent. |
|----------|--------|------------|-----------------|-----------|
| Under 50 | 14,600 | 224,000    | 980,000         | 88        |
| 50-100   | 3,500  | 250,000    | 310,000         | 25        |
| 100-500  | 8,010  | 1,956,000  | 1,770,000       | 18        |
| Over 500 | 6,500  | 17,720,000 | 8,990,000       | 10        |
| Total    | 32,610 | 20,150,000 | 12,050,000      | 12        |

## UNITED KINGDOM

| Under 50 | 222,160 | 2,564,000  | 16,200,000 | 122 | 3.6   |
|----------|---------|------------|------------|-----|-------|
| 50-100   | 30,550  | 2,130,000  | 4,990,000  | 47  | 3.0   |
| 100-500  | 42,700  | 9,346,000  | 17,130,000 | 38  | 13.1  |
| Over 500 | 19,275  | 57,890,000 | 56,870,000 | 20  | 80.3  |
| Total    | 314,685 | 71,930,000 | 95,190,000 | 26  | 100.0 |

The number of farmers in the United Kingdom was :—

| Holding Acres | England | Scotland | Ireland | United Kingdom | Percentage |
|---------------|---------|----------|---------|----------------|------------|
| Under 5       | 114,000 | 21,000   | 62,000  | 197,000        | 18.7       |
| 5-50          | 200,000 | 33,000   | 365,000 | 598,000        | 57.2       |
| 50-100        | 55,000  | 10,000   | 56,000  | 121,000        | 11.5       |
| 100-500       | 79,000  | 15,000   | 31,000  | 125,000        | 11.9       |
| Over 500      | 5,000   | 1,000    | 1,000   | 7,000          | 0.7        |
| Total         | 453,000 | 80,000   | 515,000 | 1,048,000      | 100.0      |

| Acres    | Area of Farms, Acres |           |            | Percentage |
|----------|----------------------|-----------|------------|------------|
| Under 50 | 4,100,000            | 700,000   | 7,800,000  | 26.5       |
| 50-100   | 3,900,000            | 700,000   | 4,400,000  | 18.8       |
| Over 100 | 19,600,000           | 3,400,000 | 3,100,000  | 54.7       |
| Total    | 27,600,000           | 4,800,000 | 15,300,000 | 47,700,000 |

The above refers only to the cultivated area. In all these tables properties or holdings of less than an acre are excluded.

In some parts of England rent has quadrupled in 120 years. For example, the farm of One Ash Grange, on the Duke of Devonshire's property, Derbyshire, has been let as follows:—

|         |      |         |      |
|---------|------|---------|------|
| 1769 at | £190 | 1855 at | £610 |
| 1788 „  | 242  | 1876 „  | 700  |
| 1810 „  | 440  | 1888 „  | 900  |

The average rental valuation of land in the three kingdoms was as follows:—

| A.D. | Shillings per Acre |          |         |                | Cultivated Area, Acres |
|------|--------------------|----------|---------|----------------|------------------------|
|      | England            | Scotland | Ireland | United Kingdom |                        |
| 1760 | 11                 | 6        | 5       | 10             | 37,100,000             |
| 1776 | 14                 | 8        | 9       | 11             | 38,600,000             |
| 1800 | 18                 | 12       | 13      | 16             | 40,320,000             |
| 1815 | 28                 | 25       | 15      | 24             | 42,500,000             |
| 1843 | 32                 | 28       | 12      | 24             | 43,800,000             |
| 1860 | 34                 | 30       | 12      | 25             | 44,000,000             |
| 1870 | 35                 | 33       | 13      | 28             | 46,000,000             |
| 1880 | 36                 | 34       | 14      | 28             | 47,600,000             |
| 1888 | 32                 | 29       | 14      | 26             | 47,880,000             |

The official rental valuation in England in 1810 for various counties was:—

|            |    | Shillings per Acre |    |
|------------|----|--------------------|----|
| Leicester  | 28 | Lincoln            | 18 |
| Somerset   | 27 | Surrey             | 17 |
| Worcester  | 24 | Devonshire         | 16 |
| Warwick    | 23 | Cornwall           | 15 |
| Lancashire | 22 | Monmouth           | 14 |
| Stafford   | 21 | Durham             | 9  |
| Kent       | 20 | Cardigan           | 6  |
| Bedford    | 19 |                    |    |

In 120 years more than 10 million acres of waste land in the United Kingdom have been enclosed, viz:—

| Period    | Acres      |           |
|-----------|------------|-----------|
|           | Quantity   | Per Annum |
| 1760-1800 | 3,221,000  | 81,000    |
| 1801-1829 | 3,380,000  | 116,000   |
| 1830-1869 | 2,217,000  | 55,000    |
| 1870-1879 | 1,687,000  | 169,000   |
| Total     | 10,505,000 | 88,000    |

It is doubtful whether the reclaimed lands are now worth what they have cost.

#### IRELAND

According to a report quoted by Mr. Molinari in 1880 the stated property of Ireland was held thus:—

| Proprietors        | Number | Acres Owned | Assessed Rental | Percentage of Area |
|--------------------|--------|-------------|-----------------|--------------------|
| Resident on estate | 3,966  | 9,733,000   | 5,090,000       | 52.4               |
| Resident in Dublin | 4,465  | 4,362,000   | 2,130,000       | 23.2               |
| Absentees          | 1,623  | 4,514,000   | 2,140,000       | 24.4               |
| Total              | 10,054 | 18,609,000  | 9,360,000       | 100.0              |

The above seems to exclude all estate-owners of less than 100 acres, the number of whom (as already shown) is 18,000. See preceding page.

As regards tenants, the number has been as follows:—

| Holding Acres | 1841    | 1851    | 1861    | 1871    | 1878    |
|---------------|---------|---------|---------|---------|---------|
| 1-5           | 310,000 | 88,000  | 86,000  | 75,000  | 66,000  |
| 5-15          | 253,000 | 192,000 | 184,000 | 171,000 | 163,000 |
| Over 15       | 128,000 | 290,000 | 299,000 | 298,000 | 298,000 |
| Total         | 691,000 | 570,000 | 569,000 | 544,000 | 527,000 |

The amount of rental drawn by absentee landlords has been:—

| Date | Rental of Ireland | Drawn by Absentees | Absentee Ratio | Authority     |
|------|-------------------|--------------------|----------------|---------------|
| 1729 | £2,025,000        | £627,000           | Per Cent. 31   | Browne, Prior |
| 1776 | 5,340,000         | 1,610,000          | 30             | Young         |
| 1880 | 9,360,000         | 2,140,000          | 23             | Molinari      |

The progressive rise of rent in Ireland is shown in Dr. Todd's evidence (July 1890) at the House of Commons respecting a certain estate in that country:—

| Year | Per Annum, £ |
|------|--------------|
| 1609 | 1,800        |
| 1635 | 2,200        |
| 1697 | 9,150        |
| 1758 | 20,000       |
| 1858 | 131,000      |
| 1882 | 160,000      |

The landed property of Ireland changed masters three times in 100 years,—first confiscation under Elizabeth, A.D. 1590-1600; second under Cromwell, 1650-52; third under William III., 1690-92. The following recent changes of tenure are remarkable:—

I. Encumbered Estates Court (established 1850).—Sold in thirty years down to 1880, estates covering 4,930,000 acres for £52,700,000, say £11 per acre, in 12,400 lots, averaging 400 acres each. The purchase-money represented 85 per cent. by Irish, 15 per cent. Scotch or English buyers.

II. Bright's Act.—From 1870 to 1880 the tenants bought 49,000 acres for £860,000, of which the Government advanced 60 per cent. (£516,000). Average price paid, £17 per acre.

III. Church Act.—From 1870 to 1885 about 6000 tenants bought their farms, covering — acres, for £1,674,000, the Government advancing £1,200,000, say 75 per cent. Price paid was 22½ years' rental. Of the sums advanced by Government, only £6000 was due by the purchasers in 1888 (Official Report, November 1888).

IV. Gladstone's Act, August 1881.—In seven years ending August 1888 the Land Court altered the rents of 243,490 farms, viz:—

|          |            |
|----------|------------|
| Old rent | £3,852,000 |
| New rent | 3,094,000  |

This was a reduction of 20 per cent. There were also 61,300 cases pending inquiry.

V. The Ashbourne Act, passed in 1885, regarding which an official report in 1890 was as follows:—

| Year    | Farms Bought | Price, £  | Sum Lent, £ | Years of Rental | Net Rental, £ |
|---------|--------------|-----------|-------------|-----------------|---------------|
| 1886    | 2,426        | 1,095,000 | 1,065,000   | 18.0            | 61,000        |
| 1887    | 4,636        | 1,925,000 | 1,903,000   | 17.6            | 110,000       |
| 1888    | 4,384        | 1,776,000 | 1,750,000   | 17.0            | 104,000       |
| 1889    | 2,574        | 1,170,000 | 1,155,000   | 16.4            | 71,000        |
| 4 years | 14,020       | 5,966,000 | 5,873,000   | 17.3            | 346,000       |

In four years the tenants were enabled to purchase nearly 3 per cent. of Ireland as measured by rental; thus

in 132 years the Ashbourne Act would settle the agrarian question.

## FRANCE

The official valuation of lands (which appears high) gave the following summary in 1881 :—

| Quality            | Acres       | Value per Acre, £ | Value, Millions £ |
|--------------------|-------------|-------------------|-------------------|
| Orchards . . . .   | 1,783,000   | 81                | 144               |
| Vineyards . . . .  | 5,445,000   | 44                | 239               |
| Meadows . . . .    | 6,170,000   | 55                | 340               |
| Arable . . . .     | 41,319,000  | 36                | 1,488             |
| Pasture, &c. . . . | 23,010,000  | 18                | 414               |
| Forest . . . .     | 21,288,000  | 12                | 256               |
| Waste . . . .      | 17,516,000  | 6                 | 105               |
| Total . . . .      | 116,531,000 | 26                | 2,986             |

The rise in the value of land from 1852 to 1881 appears in the official valuation thus :—

|                   | £ per Acre |      |
|-------------------|------------|------|
|                   | 1852       | 1881 |
| Arable . . . .    | 24         | 36   |
| Meadow . . . .    | 36         | 55   |
| Vineyards . . . . | 32         | 44   |

According to the Government inquiry of 1815, France comprised 1,851,000 farms (exclusive of 1,952,000 under five acres), classified as follows :—

| Average       | Number    | Area, Acres | Ratio of Area | Ratio of Holdings |
|---------------|-----------|-------------|---------------|-------------------|
| 10 . . . .    | 930,000   | 8,750,000   | 8.1           | 50.2              |
| 20 . . . .    | 259,000   | 5,900,000   | 5.5           | 14.1              |
| 30 . . . .    | 259,000   | 7,450,000   | 7.0           | 13.9              |
| 55 . . . .    | 218,000   | 11,920,000  | 11.1          | 11.7              |
| 150 . . . .   | 169,000   | 26,040,000  | 24.2          | 9.1               |
| 2200 . . . .  | 21,400    | 47,500,000  | 44.1          | 1.1               |
| Total . . . . | 1,854,400 | 107,560,000 | 100.0         | 100.0             |

The number of Côtes Foncières and the probable number of owners above five acres was :—

| Year         | Côtes      | Landowners |
|--------------|------------|------------|
| 1826 . . . . | 10,300,000 | 1,300,000  |
| 1835 . . . . | 10,900,000 | 1,400,000  |
| 1851 . . . . | 12,400,000 | 1,500,000  |
| 1861 . . . . | 13,700,000 | 1,700,000  |
| 1871 . . . . | 13,800,000 | 1,700,000  |
| 1885 . . . . | 14,075,000 | 1,825,000  |

The returns for 1885 showed the owners of less than five acres to be 10,426,000 in number. Of the remainder, it is believed by French economists that the number of côtes is double that of actual owners, by reason of

repetition, one person holding two or three properties. The real number of landowners, therefore, in 1885 was as follows :—

| Acres            | Côtes     | Land Owners | Acres       | Acres per Owner |
|------------------|-----------|-------------|-------------|-----------------|
| 5-15 . . . .     | 2,174,000 | 1,087,000   | 18,860,000  | 17              |
| 15-125 . . . .   | 1,352,000 | 676,000     | 48,040,000  | 72              |
| 125-500 . . . .  | 106,000   | 53,000      | 23,890,000  | 450             |
| Over 500 . . . . | 18,000    | 9,000       | 20,050,000  | 2,200           |
| Total . . . .    | 3,650,000 | 1,825,000   | 110,840,000 | 60              |

The number of Côtes Foncières over 12 acres in 1862 was 1,411,000 by the Government returns, whereas the number over 15 acres in 1885 was 1,476,000, which shows a marked increase.

The tenure of land in 1862 and in 1873 was as follows :—

|                   | Number    |           | Acres Held in 1873 | Ratio of Area in 1873 | Ratio of Cultivation in 1873 |
|-------------------|-----------|-----------|--------------------|-----------------------|------------------------------|
|                   | 1862      | 1873      |                    |                       |                              |
| Owners . . . .    | 1,813,000 | 2,826,000 | 42,530,000         | 50.1                  | 71.0                         |
| Tenants . . . .   | 1,035,000 | 832,000   | 29,900,000         | 35.2                  | 21.0                         |
| Metayers* . . . . | 405,000   | 319,000   | 11,920,000         | 14.7                  | 8.0                          |
| Total . . . .     | 3,253,000 | 3,977,000 | 84,350,000         | 100.0                 | 100.0                        |

The farms cultivated by owners averaged 15 acres in extent, those of tenants and metayers 35 acres. In 1882 the area cultivated by metayer had declined, viz. :—

|                           | Acres      |
|---------------------------|------------|
| Tilled by owner . . . .   | 50,500,000 |
| Tilled by tenant . . . .  | 22,800,000 |
| Tilled by metayer . . . . | 11,100,000 |
| Total . . . .             | 84,400,000 |

In eight years ending 1887 there were 39,300,000 acres sold in France, in lots averaging  $4\frac{1}{2}$  acres, that is, nearly five million acres yearly.

## GERMANY

The German Empire comprises 5,276,000 farms, viz. :—

|                                  |           |
|----------------------------------|-----------|
| Cultivated by owner . . . .      | 2,953,000 |
| Cultivated by tenants . . . .    | 829,000   |
| Farms of mixed character . . . . | 1,494,000 |
| Total . . . .                    | 5,276,000 |

It appears, therefore, that about 85 per cent. of the farms are cultivated wholly or in part by their owners, as compared with 71 per cent. in France.

\* System by which landlord receives share of the crops instead of a fixed rent.

If we exclude all farms under 2½ acres, we find the total in Germany reduced to 2,953,000, held as follows :—

| Size, Acres      | Number of Farms Held |           |           | Area, Acres |                  |            | Ratio of Area |
|------------------|----------------------|-----------|-----------|-------------|------------------|------------|---------------|
|                  | By Owner             | By Tenant | Total     | Cultivated  | Wood and Pasture | Total      |               |
| 2½-12 . . . .    | 1,613,000            | 107,000   | 1,720,000 | 10,600,000  | 2,100,000        | 12,700,000 | 12.9          |
| 12-50 . . . .    | 911,000              | 16,000    | 927,000   | 22,900,000  | 5,800,000        | 28,700,000 | 29.3          |
| 50-125 . . . .   | 234,000              | 6,000     | 240,000   | 17,900,000  | 4,800,000        | 22,700,000 | 23.2          |
| Over 125 . . . . | 58,000               | 8,000     | 66,000    | 26,300,000  | 7,800,000        | 34,100,000 | 34.6          |
| Total . . . .    | 2,816,000            | 137,000   | 2,953,000 | 77,700,000  | 20,500,000       | 98,200,000 | 100.0         |

The number of land-owners is of course less than that of farms, the returns for 1869 showing as follows :—

|                  | Owners    | Extent, Acres | Average, Acres |
|------------------|-----------|---------------|----------------|
| Prussia . . . .  | 1,033,000 | 49,000,000    | 48             |
| Bavaria . . . .  | 456,000   | 11,000,000    | 25             |
| Saxony . . . .   | 54,000    | 2,500,000     | 46             |
| Wurtemberg . .   | 152,000   | 2,500,000     | 17             |
| Baden . . . .    | 111,000   | 1,700,000     | 15             |
| Darmstadt . . .  | 140,000   | 1,400,000     | 10             |
| Small States . . | 490,000   | 19,500,000    | 40             |
| Total . . . .    | 2,436,000 | 87,600,000    | 36             |

#### PRUSSIA

The total area of Prussia is 86 million acres, but this includes 23 millions of mountain and forest. The tenure in 1869 was as follows :—

| Held by          | Number of Estates | Acres      | Average, Acres |
|------------------|-------------------|------------|----------------|
| Crown . . . .    | ...               | 11,200,000 | ...            |
| Nobles . . . .   | 22,470            | 21,200,000 | 950            |
| Farmers . . . .  | 1,503,000         | 44,800,000 | 30             |
| Cottiers . . . . | 1,087,000         | 3,100,000  | 3              |
| Total . . . .    | 2,612,470         | 80,300,000 | 26             |

In 1859 the nobles held 37,900,000 acres, but in the ensuing ten years their possessions were reduced by 16,700,000 acres, broken up into farms for the peasantry.

The farmers alluded to in the above table, excluding princes and cottiers, held their land thus :—

| Estate of, Acres | Number    | Acres      | Average |
|------------------|-----------|------------|---------|
| 5-20 . . . .     | 1,100,000 | 11,000,000 | 10      |
| 20-200 . . . .   | 390,000   | 28,000,000 | 72      |
| Over 200 . . . . | 13,000    | 6,000,000  | 460     |
| Total . . . .    | 1,503,000 | 45,000,000 | 30      |

The owners, as already shown, numbering 1,033,000, it appears that for two owners there are three estates.

In Saxony the Crown owns 1,077,000 acres, and the rest is held thus :—

| By               | Number | Acres     | Average |
|------------------|--------|-----------|---------|
| Nobles . . . .   | 440    | 490,000   | 1,100   |
| Farmers . . . .  | 53,000 | 1,440,000 | 27      |
| Cottiers . . . . | 33,000 | 160,000   | 5       |
| Total . . . .    | 86,440 | 2,090,000 | 24      |

In Bavaria the Crown owns 3,430,000 acres, and the rest is held thus :—

| By               | Number  | Acres      | Average |
|------------------|---------|------------|---------|
| Nobles . . . .   | 1,100   | 400,000    | 370     |
| Farmers . . . .  | 226,000 | 11,700,000 | 50      |
| Cottiers . . . . | 290,000 | 1,500,000  | 5       |
| Total . . . .    | 517,100 | 13,600,000 | 26      |

In Wurtemberg the Crown owns 1,100,000 acres, and the rest is held as follows :—

| By               | Number  | Acres     | Average |
|------------------|---------|-----------|---------|
| Nobles . . . .   | 718     | 650,000   | 840     |
| Farmers . . . .  | 85,000  | 1,900,000 | 22      |
| Cottiers . . . . | 246,000 | 750,000   | 3       |
| Total . . . .    | 331,718 | 3,300,000 | 10      |

The Stein law transferred nearly the half of Germany from the nobles to the peasantry. The nobles received Consols equal to eighteen years' rental of the lands taken from them. The peasants were compelled to pay a land-tax equal to 5 per cent. during forty-seven years, the land to be free to them after that period.

#### RUSSIA

Down to 1860 the land was almost equally held by the Crown and the nobles, the former possessing 26,200,000 serfs, the latter 21,800,000, by whom the soil was cultivated. Crown-serfs were in reality tenants, who paid 6d. an acre yearly rent, the farm of each family averaging 35 acres. They were emancipated in 1861, receiving their lands in fee on condition of paying 12s. a year for each male serf (three usually going to a family) during forty years. The other serfs were also tenants, although bought and sold like cattle, each family holding a farm of about 30 acres, subject to a rent of £6, or else the obligation to work two days each week for their masters. Lavish expenditure had so much encumbered the estates of nobles that in 1859 they had mortgaged 7,107,000 serfs and 102 million acres of land for sums in the aggregate reaching 60 millions sterling.

Between 1861 and 1870 the Government bought up from the nobles 40,954 estates, covering 35,000,000 acres, at an average cost of 35s. an acre, the Crown paying five-sixths, the serfs one-sixth of the amount, which was £61,100,000. The assessment, however, was made according to the number of serfs, the owners receiving £3 per head for 20,700,000; but the option was left to the serfs of receiving "beggar lots" of 10 acres free, in which case the noble received no indemnity. About 610,000 families preferred these lots, which they received free of conditions, the lands thus ceded to them covering 6,440,000 acres. The rest received farms of about 30 acres each, subject to a Crown-rent of 2s. an acre for forty-nine years.

In 1870 the arable land was held as follows :—

| Owners                      | Acres       |
|-----------------------------|-------------|
| Nobles . . . .              | 83,500,000  |
| Peasants . . . .            | 88,700,000  |
| Crown, merchants, &c. . . . | 133,000,000 |
| Total . . . .               | 305,000,000 |

Strebinsky's report in 1879 showed that 19,700,000 male serfs (6,600,000 families) possessed 68 million desiatines or 186 million acres, that is, an average of 27 acres per family. He made a catastral survey of eight provinces, viz., Koursk, Tula, Voroneja, Tambow, Penza, Oral, Riazan, and Kalonga, with an acreage of 142,600 square miles, say 91 million acres, and a population of 13 millions.

The tenure of the eight provinces was as follows :—

|                                    | Acres      | Value, £    | Average Farm, Acres |
|------------------------------------|------------|-------------|---------------------|
| 1,770,000 peasant families . . . . | 49,740,000 | 158,300,000 | 28                  |
| 24,740 nobles . . . .              | 25,100,000 | 59,200,000  | 1,020               |
| 10,870 citizens, &c. . . .         | 4,070,000  | 8,900,000   | 370                 |
| Crown-lands, &c. . . .             | 12,090,000 | ...         | ...                 |
| Total . . . .                      | 91,000,000 | 226,400,000 | 430                 |

The aggregate value of 78 million acres was 226½ millions sterling, a fraction under £3 per acre; the average was 45s. for lands held by citizens, 48s. for that of nobles, and 64s. an acre for what is held by peasants.

The proportions of land under crops in the estates of nobles and peasants were (1879) :—

| Owners                | Acres       |                    |            | Percentage under Crops |
|-----------------------|-------------|--------------------|------------|------------------------|
|                       | Under Crops | Pasture and Forest | Total      |                        |
| Peasants . . .        | 38,400,000  | 11,040,000         | 49,440,000 | 77                     |
| Nobles and citizens } | 21,200,000  | 7,970,000          | 29,170,000 | 73                     |
| Total . . .           | 59,600,000  | 19,010,000         | 78,610,000 | 75                     |

In the said eight provinces no less than 96 per cent. of the land held by peasants was in communes or villages. There were 26,456 villages, with 1,893,000 houses and 1,713,000 families, averaging 72 houses per village, with 447 inhabitants, the aggregate population being 11,840,000, of which 5,830,000 were males; the communal lands being

valued at 154 millions sterling, and covering an area of 47,800,000 acres, and the houses valued at £18,000,000, say £11 each. There were also 57,000 peasant proprietors, holding in their own right an aggregate area of 1,930,000 acres, an average of 35 acres each, valued at £4,300,000. Strebinsky also found that agriculture prevailed most where the population per square mile was highest, viz. :—

| Section      | Area, Square Miles | Population per Square Mile | Area under Crops, Acres | Cultivated Ratio |
|--------------|--------------------|----------------------------|-------------------------|------------------|
| First . . .  | 54,000             | 112                        | 27,600,000              | 80               |
| Second . . . | 65,000             | 81                         | 26,900,000              | 65               |
| Third . . .  | 23,000             | 63                         | 5,100,000               | 35               |
| Total . . .  | 142,000            | 90                         | 59,600,000              | 67               |

In 1878, according to Strebinsky, the tenure of all descriptions of land was as follows :—

|                     | Millions of Acres |                   |        |       | Ratio  |                   |        |       |
|---------------------|-------------------|-------------------|--------|-------|--------|-------------------|--------|-------|
|                     | Arable            | Pasture and Waste | Forest | Total | Arable | Pasture and Waste | Forest | Total |
| Crown . . . . .     | 5                 | 94                | 180    | 279   | 1.5    | 21.8              | 37.1   | 22.4  |
| Peasants . . . . .  | 115               | 50                | 21     | 186   | 35.2   | 11.6              | 4.3    | 15.0  |
| Nobles, &c. . . . . | 206               | 289               | 284    | 779   | 63.3   | 66.6              | 58.6   | 62.6  |
| Total . . . . .     | 326               | 433               | 485    | 1,244 | 100.0  | 100.0             | 100.0  | 100.0 |

The character of the land in possession of the three classes appears in the following table :—

|                      | Crown | Peasants | Nobles, &c. | Total |
|----------------------|-------|----------|-------------|-------|
| Arable . . . . .     | 1.7   | 61.5     | 26.4        | 26.3  |
| Pasture, &c. . . . . | 33.6  | 36.8     | 37.1        | 35.0  |
| Forest . . . . .     | 64.7  | 11.7     | 36.5        | 38.7  |
| Total . . . . .      | 100.0 | 100.0    | 100.0       | 100.0 |

Of the area comprised under the item "pasture and waste" 201 million acres are considered worthless.

#### AUSTRIA

Down to 1849 the tenure of land was similar to that in Russia, the nobles of Bohemia and Hungary holding vast estates, with sometimes as many as 10,000 serfs. Each serf had to work two days a week for his master, besides giving him 11 per cent. of all products in lieu of rent. In 1819 the number of serfs was 7,000,000, of whom 1,427,000 were male adults. In 1832 the Bohemian nobles resident at Vienna possessed lands valued at 45 millions sterling.

The largest estates in Austria proper are the following :—

| Of                             | Acres   |
|--------------------------------|---------|
| Prince Schwarzenburg . . . . . | 510,000 |
| Prince Lichtenstein . . . . .  | 460,000 |
| Archduke Albert . . . . .      | 305,000 |

There are in Bohemia 63 nobles holding estates, none of which is less than 12,000 acres. The Grand-Duchy of Austria counts 292 nobles and squires holding between them 2,900,000 acres. The proportions of land still held by this class in 1888 were :—

| In                         | Acres     | Of which under Forest |
|----------------------------|-----------|-----------------------|
| Bohemia . . . . .          | 4,300,000 | 2,800,000             |
| Duchy of Austria . . . . . | 1,600,000 | 1,100,000             |
| Styria . . . . .           | 1,100,000 | 900,000               |
| Galitzia . . . . .         | 7,500,000 | 4,200,000             |
| Tyrol . . . . .            | 700,000   | 600,000               |
| Moravia . . . . .          | 2,100,000 | 1,200,000             |
| Other provinces . . . . .  | 3,300,000 | 2,500,000             |

The emancipation law of 1849 changed the ownership of one-half the Empire. According to an official return in 1869, the peasant properties in Austria proper covered 25 million acres, in farms averaging 17 acres, viz. :—

| Province               | Peasant Properties | Area of Same, Acres | Average Estate, Acres | Total Area of Province, Acres | Ratio held by Peasants, per Cent. |
|------------------------|--------------------|---------------------|-----------------------|-------------------------------|-----------------------------------|
| Gd.-Duchy of Austria } | 189,000            | 3,020,000           | 16                    | 7,700,000                     | 40                                |
| Styria . . . . .       | 134,000            | 1,240,000           | 9                     | 5,600,000                     | 22                                |
| Bohemia . . . . .      | 199,000            | 5,470,000           | 27                    | 12,800,000                    | 43                                |
| Galitzia . . . . .     | 496,000            | 8,440,000           | 17                    | 19,200,000                    | 44                                |
| Tyrol . . . . .        | 113,000            | 890,000             | 8                     | 7,000,000                     | 12                                |
| Moravia . . . . .      | 98,000             | 2,720,000           | 28                    | 5,500,000                     | 49                                |
| Dalmatia . . . . .     | 47,000             | 1,450,000           | 31                    | 5,000,000                     | 29                                |
| Other provinces }      | 231,000            | 1,950,000           | 8                     | 13,200,000                    | 15                                |
| Total . . . . .        | 1,507,000          | 25,180,000          | 17                    | 76,000,000                    | 33                                |

The tenure of Hungary and Transylvania in 1880 was as follows :—

| Holding Acres       | Number of Owners |              |
|---------------------|------------------|--------------|
|                     | Hungary          | Transylvania |
| 7 to 42 . . . . .   | 1,815,700        | 532,900      |
| 42 to 280 . . . . . | 91,100           | 27,900       |
| Over 280 . . . . .  | 16,030           | 2,650        |
| Total . . . . .     | 1,922,830        | 563,450      |

The whole Empire counts 6,150,000 landowners, viz. :—

| Class              | Number    | Land-Tax   |
|--------------------|-----------|------------|
| Peasants . . . . . | 4,673,000 | Under £4   |
| Farmers . . . . .  | 1,259,000 | £4 to £20  |
| Gentry . . . . .   | 162,200   | £20 to £40 |
| Nobles . . . . .   | 56,500    | Over £40   |

## ITALY

The tenure of land in the whole kingdom is as follows (1870) :—

| Province               | Number of Farms held by |         |           |           | Average Size of Farms, Acres |
|------------------------|-------------------------|---------|-----------|-----------|------------------------------|
|                        | Proprietors             | Tenants | Metayer   | Total     |                              |
| Piedmont . .           | 608,000                 | 25,000  | 81,000    | 714,000   | 14                           |
| Lombardy . .           | 160,000                 | 53,000  | 236,000   | 449,000   | 11                           |
| Parma and Modena } . . | 69,000                  | 17,000  | 102,000   | 188,000   | 15                           |
| Tuscany . .            | 56,000                  | 10,000  | 227,000   | 293,000   | 17                           |
| Papal States . .       | 80,000                  | 3,000   | 573,000   | 656,000   | 8                            |
| Naples . .             | 224,000                 | 194,000 | 24,000    | 442,000   | 42                           |
| Sicily . .             | 52,000                  | 8,000   | 5,000     | 65,000    | 90                           |
| Island of Sardinia . . | 16,000                  | ...     | ...       | 16,000    | 360                          |
| Total . .              | 1,265,000               | 310,000 | 1,248,000 | 2,823,000 | 25                           |

The total is made up thus :—

| Class           | Number    | Farms, Acres | Average, Acres |
|-----------------|-----------|--------------|----------------|
| Proprietors . . | 1,265,000 | 33,000,000   | 26             |
| Metayers . .    | 1,248,000 | 18,000,000   | 15             |
| Tenants . .     | 310,000   | 20,000,000   | 66             |
| Total . .       | 2,823,000 | 71,000,000   | 25             |

The various quality and value of the land in different parts of Italy are shown in the following official table of 1882 :—

| Province         | Area, Acres | Rental Value, Shillings per Acre | Price per Acre, £ | Value, Millions £ |
|------------------|-------------|----------------------------------|-------------------|-------------------|
| Sardinia . .     | 9,840,000   | 15                               | 26.1              | 260               |
| Lombardy . .     | 4,800,000   | 22                               | 37.4              | 180               |
| Parma . .        | 1,280,000   | 13                               | 22.1              | 28                |
| Modena . .       | 1,580,000   | 15                               | 25.2              | 39                |
| Papal States . . | 10,840,000  | 7                                | 11.0              | 117               |
| Tuscany . .      | 5,020,000   | 10                               | 18.3              | 92                |
| Naples . .       | 18,740,000  | 11                               | 19.0              | 356               |
| Sicily . .       | 6,170,000   | 11                               | 18.8              | 116               |
| Total . .        | 58,270,000  | 13                               | 22.1              | 1,188             |

## SWITZERLAND

The land rental in 1880 was 191 million francs, or £7,600,000 sterling per annum. This would indicate a selling value of 228 millions sterling, or nearly double my estimate at page 37, which was evidently too low.

## SPAIN

The report of the Cortes in 1808 was as follows :—

| <i>Estates of</i>                  | <i>Acres</i> |
|------------------------------------|--------------|
| Crown, churches, and hospitals . . | 10,000,000   |
| Nobles and grandes . . . . .       | 30,500,000   |
| Citizens and peasants . . . . .    | 19,500,000   |
| Mountain and waste . . . . .       | 60,900,000   |

Total . . . 120,900,000

The *Registro Catastral* for 1877 gives the total number of landowners (exclusive of urban house-owners) as 596,000, whose estates covered 65 million acres, averaging 110 acres each. There were but 3900 whose rent-roll reached £400 a year.

## PORTUGAL

The kingdom comprises 559,000 farms by official report, viz. :—

| Class           | Number  | Area, Acres | Average Farm, Acres |
|-----------------|---------|-------------|---------------------|
| Nobles . .      | 62,000  | 12,450,000  | 200                 |
| Proprietors . . | 357,000 | 5,950,000   | 17                  |
| Tenants . .     | 140,000 | 2,800,000   | 20                  |
| Total . .       | 559,000 | 21,200,000  | 38                  |

## SWEDEN

In 1810 the kingdom was held by 1200 noblemen, who owned 65,300 farms let to tenants; each farm covered a quarter of a "mantal," or 400 acres. Between 1818 and 1840 the peasants bought from the nobles 16 million acres, at an average price of 1s. 5d. per acre. In 1876 the tenure was as follows :—

|             | Number  | Millions of Acres |                |       | Average<br>Farm,<br>Acres |
|-------------|---------|-------------------|----------------|-------|---------------------------|
|             |         | Culti-<br>vated   | Forest,<br>&c. | Total |                           |
| Landowners  | 194,000 | 10                | 60             | 70    | 360                       |
| Tenants . . | 40,000  | 2                 | 14             | 16    | 400                       |
| Crown . .   | ...     | ...               | 9              | 9     | ...                       |
| Total .     | 234,000 | 12                | 83             | 95    | 370                       |

Each farm averages 18 acres under crops, 32 meadow, and the remainder forest or waste. The uncultivated portion of the kingdom, as shown above, covers 83 million acres, of which (according to Government Report of 1885) the forests comprise 45 million acres, the remaining 38 millions being mountain waste. The landowners comprise two classes, viz. :—

| Class           | No.     | Area, Acres | Average Area |
|-----------------|---------|-------------|--------------|
| Nobles . . . .  | 2,650   | 38,000,000  | 14,000       |
| Freeholders . . | 191,000 | 48,000,000  | 250          |

The latter class includes 10,000 forest-owners, devoted to felling timber.

## NORWAY

The number of farms in 1870 was 110,000, of which 75,000 were cultivated by their owners, 35,000 by tenants. An ordinary farm of 300 acres may be rented at £50 a year, or purchased for £1000 sterling, comprising about 30 acres cultivated, 180 of forest, and 90 acres pasture.

## DENMARK

In 1801 the kingdom belonged to 614 nobles, who possessed until 1788 the right to buy and sell the tenantry the same as cattle. In 1840 the tenants had bought from the landlords 3,500,000 acres, that is, half the kingdom, at prices averaging £6 per acre, representing a gross value of 21 millions sterling.

The tenure of land in 1870 was as follows :—

|                 | Number  | Acres     | Average Farm, Acres |
|-----------------|---------|-----------|---------------------|
| Nobles . .      | 550     | 1,380,000 | 2,500               |
| Freeholders . . | 70,300  | 4,560,000 | 65                  |
| Huismen . .     | 137,000 | 570,000   | 4                   |
| Total . .       | 207,850 | 6,510,000 | 32                  |

## HOLLAND

There are 100,000 farms, of about 80 acres each, cultivated by their owners. The province of Groningen has some tenant-farmers called *meejers*. The landlord can never raise the rent nor disturb the tenant.

## BELGIUM

Excluding holdings of less than 2½ acres, the tenure of land has been :—

| Acres             | Number of Holdings |         |         | Holdings in 1880     |            |         |
|-------------------|--------------------|---------|---------|----------------------|------------|---------|
|                   | 1846               | 1866    | 1880    | Cultivated by Owners | By Tenants | Total   |
| 2½-12 . . . . .   | 166,000            | 220,000 | 226,000 | 152,000              | 74,000     | 226,000 |
| 12-50 . . . . .   | 69,000             | 82,000  | 74,000  | 51,000               | 23,000     | 74,000  |
| Over 50 . . . . . | 19,000             | 22,000  | 15,000  | 8,000                | 7,000      | 15,000  |
| Total . . . . .   | 254,000            | 324,000 | 315,000 | 211,000              | 104,000    | 315,000 |

In 1866, according to Consul Grattan's report, only 34 per cent. of the land was cultivated by proprietors; in 1880, by the official returns, the proportion was 60 per cent.

## GREECE

In 1836 the State sold farm-lots of 30 acres each to a large number of agricultural families at 47s. per acre, say £70 per farm. In 1862 there were 147,500 peasant proprietors, who held 5,600,000 acres, an average of 38 acres, one-third being under crops; also 16,100 landed gentry with large farms, who usually let their lands to tenants at 22s. per acre. The area of the kingdom was as follows :—

|                                  | Acres      |
|----------------------------------|------------|
| Under crops . . . . .            | 1,920,000  |
| Capable of cultivation . . . . . | 3,700,000  |
| Woods . . . . .                  | 1,440,000  |
| Mountain and pasture . . . . .   | 4,700,000  |
| Total . . . . .                  | 11,760,000 |

## ALGERIA

The land grants ceded to settlers were :—

|                   | Acres     |
|-------------------|-----------|
| 1840-70 . . . . . | 2,110,000 |
| 1871-80 . . . . . | 1,120,000 |
| Total . . . . .   | 3,230,000 |

The tenure is described at p. 40. Only 4 per cent. of the landed area is held by European settlers, the Arabs holding 52 per cent. in farms of 100 acres per family, and the remainder (44 per cent.) being under forest or Crown-lands.

## UNITED STATES

The area of the United States and the portion under cultivation appear as follows :—

| Date | Total Area, Millions of Acres | Under Farms, Millions Acres | Improved, Million Acres | Ratio under Farms, per Cent. | Ratio of Improved, per Cent. |
|------|-------------------------------|-----------------------------|-------------------------|------------------------------|------------------------------|
| 1776 | 269                           | 80                          | 30                      | 30                           | 11                           |
| 1810 | 1,018                         | 164                         | 64                      | 16                           | 6                            |
| 1850 | 1,902                         | 293                         | 113                     | 16                           | 6                            |
| 1860 | 2,291                         | 407                         | 163                     | 18                           | 7                            |
| 1870 | 2,291                         | 410                         | 190                     | 18                           | 8                            |
| 1880 | 2,291                         | 534                         | 285                     | 23                           | 12                           |
| 1888 | 2,291                         | ...                         | 356                     | ...                          | 15                           |

The above are official returns except for 1888 (see fourth paragraph on p. 43, *Agriculture*), and estimate of farms in 1776 based on Census of 1790.

Sales of public lands in United States were as follows :—

| Period                | Acres       | Amount Received, £ | Annual Average Acres Sold |
|-----------------------|-------------|--------------------|---------------------------|
| 1787-1810 . . . . .   | 4,700,000   | 1,800,000          | 200,000                   |
| 1811-20 . . . . .     | 15,300,000  | 8,600,000          | 1,530,000                 |
| 1821-30 . . . . .     | 10,100,000  | 2,800,000          | 1,010,000                 |
| 1831-40 . . . . .     | 62,300,000  | 14,100,000         | 6,230,000                 |
| 1841-60 . . . . .     | 68,500,000  | 12,700,000         | 3,430,000                 |
| 1861-80 . . . . .     | 94,100,000  | 9,500,000          | 4,710,000                 |
| Total . . . . .       | 255,000,000 | 49,500,000         | 2,700,000                 |
| 1881-88 . . . . .     | 99,400,000  | ...                | 12,400,000                |
| Grand total . . . . . | 354,400,000 | ...                | 3,500,000                 |

The sales of lands during ten years ending 1889 showed thus :—

| Acres                           | Acres                         |
|---------------------------------|-------------------------------|
| Dakota . . . . . 41,300,000     | Minnesota . . . . . 9,000,000 |
| Kansas . . . . . 23,200,000     | Florida . . . . . 7,300,000   |
| Nebraska . . . . . 21,000,000   | Montana . . . . . 6,700,000   |
| Washington . . . . . 12,900,000 | Louisiana . . . . . 4,300,000 |
| California . . . . . 11,400,000 | Various . . . . . 39,500,000  |
| Colorado . . . . . 10,900,000   |                               |
| Total . . . . .                 | 187,500,000                   |

The disposal of public lands in 102 years was approximately as follows :—

|                            | Millions of Acres |           |       |
|----------------------------|-------------------|-----------|-------|
|                            | 1787-1860         | 1861-1888 | Total |
| Sold . . . . .             | 154               | 68        | 222   |
| School grants . . . . .    | 68                | 9         | 77    |
| Railway grants . . . . .   | 26                | 166       | 192   |
| Military grants . . . . .  | 44                | 18        | 62    |
| Homestead grants . . . . . | ...               | 125       | 125   |
| Sundry grants . . . . .    | 45                | 18        | 63    |
| Total . . . . .            | 337               | 404       | 741   |

In this last table Homestead grants are distinguished, but in the preceding one they are included among lands sold. In eight years ending 1887 the lands taken up by settlers comprised 124 million acres of Government lands and 18 millions belonging to railway companies, in all averaging 18 million acres yearly, say 120,000 farms of 150 acres each. The Homestead Law of 1862 has had a powerful influence in promoting agriculture, the area of improved lands being now apparently 356 million acres against 163 millions in 1860, an increase of 118 per cent., the area newly improved each year averaging 7,100,000 acres. By this law any immigrant family can obtain a farm-lot of 160 acres, on condition of five years occupation, without other cost than £3 for the title-deeds. From 1862 to 1886 no fewer than 690,000 families received farm-lots of this kind, covering 111 million acres, or one-fifth of the total area under farms.

According to the agricultural product of 1886 for the Union, the average for these Homestead farms would be products of an annual value of 155 millions sterling, or £220 per family, and the farms would represent a capital value of 816 millions sterling, or nearly £1200 per farm. Compared with the total earnings of the nation, these

Homestead farmers appear to earn almost 8 per cent., and the value of their farms and stock stands for 7 per cent. of the aggregate wealth of the United States.

The number and area of farms in the great divisions of the country, according to Census reports, were as follows:—

| States              | Number of Farms |           |           |           | Millions of Acres |      |      |      |
|---------------------|-----------------|-----------|-----------|-----------|-------------------|------|------|------|
|                     | 1850            | 1860      | 1870      | 1880      | 1850              | 1860 | 1870 | 1880 |
| New England . . . . | 167,000         | 185,000   | 182,000   | 207,000   | 18                | 20   | 21   | 22   |
| Middle . . . . .    | 351,000         | 413,000   | 456,000   | 539,000   | 43                | 47   | 49   | 53   |
| Southern . . . . .  | 488,000         | 640,000   | 849,000   | 1,481,000 | 165               | 220  | 185  | 227  |
| Western . . . . .   | 444,000         | 716,000   | 1,167,000 | 1,778,000 | 67                | 120  | 155  | 232  |
| Total . . . . .     | 1,450,000       | 1,954,000 | 2,654,000 | 4,005,000 | 293               | 407  | 410  | 534  |

The proportion of farms over 100 acres is increasing:—

| Acres              | Number of Farms |           |           | Ratio |       |       |
|--------------------|-----------------|-----------|-----------|-------|-------|-------|
|                    | 1860            | 1870      | 1880      | 1860  | 1870  | 1880  |
| Under 20 . . . . . | 306,000         | 467,000   | 390,000   | 15.0  | 17.6  | 9.8   |
| 20-50 . . . . .    | 617,000         | 848,000   | 781,000   | 30.1  | 32.0  | 19.5  |
| 50-100 . . . . .   | 609,000         | 754,000   | 1,033,000 | 29.8  | 28.4  | 25.7  |
| 100-500 . . . . .  | 487,000         | 565,000   | 1,656,000 | 23.9  | 21.3  | 42.4  |
| Over 500 . . . . . | 25,000          | 20,000    | 105,000   | 1.2   | 0.7   | 2.6   |
| Total . . . . .    | 2,844,000       | 2,654,000 | 4,005,000 | 100.0 | 100.0 | 100.0 |

The size of farms in the Union is, however, diminishing, as appears from the following Census reports, viz.:—

| Census         | Number of Farms | Area, Acres | Average Acres per Farm |
|----------------|-----------------|-------------|------------------------|
| 1850 . . . . . | 1,450,000       | 293,000,000 | 202                    |
| 1860 . . . . . | 2,044,000       | 407,000,000 | 200                    |
| 1870 . . . . . | 2,654,000       | 410,000,000 | 154                    |
| 1880 . . . . . | 4,005,000       | 534,000,000 | 134                    |

It may be noted that farms over 100 acres constituted only 22 per cent. of the total in 1870, and rose to 45 per cent. in 1880.

Although most of the farms are cultivated by the owners, the three forms of tenure known in France and Italy exist in the United States, namely, owners, tenants, and "metayers," the last-mentioned giving the landlord half or other portion of the crops in lieu of rent.

The Census of 1880 showed as follows:—

| Farms Held by | New England | Middle States | Southern  | Western   | Total     |
|---------------|-------------|---------------|-----------|-----------|-----------|
| Proprietors   | 190,000     | 510,000       | 690,000   | 1,594,000 | 2,984,000 |
| Tenants       | 10,000      | 56,000        | 141,000   | 115,000   | 322,000   |
| Metayers      | 7,000       | 88,000        | 306,000   | 302,000   | 703,000   |
| Total         | 207,000     | 654,000       | 1,137,000 | 2,011,000 | 4,009,000 |

The proportion of these holdings is shown as follows:—

| Held by     | New England | Middle States | Southern | Western | Total |
|-------------|-------------|---------------|----------|---------|-------|
| Proprietors | 91.8        | 78.0          | 60.6     | 79.2    | 74.5  |
| Tenants     | 4.8         | 8.5           | 12.4     | 5.7     | 8.0   |
| Metayers    | 3.4         | 13.5          | 27.0     | 15.1    | 17.5  |
| Total       | 100.0       | 100.0         | 100.0    | 100.0   | 100.0 |

It will be observed that the metayer or share system is

twice as common as that of tenants paying rent in money. The above table refers merely to the number of farms.

The classification according to size of farms in 1880 was:—

| Acres              | Number of Farms held by |         |         | Total     |
|--------------------|-------------------------|---------|---------|-----------|
|                    | Owner                   | Tenant  | Metayer |           |
| Under 10 . . . . . | 88,000                  | 24,000  | 27,000  | 139,000   |
| 10-50 . . . . .    | 583,000                 | 138,000 | 314,000 | 1,035,000 |
| 50-100 . . . . .   | 805,000                 | 70,000  | 159,000 | 1,034,000 |
| 100-500 . . . . .  | 1,416,000               | 85,000  | 196,000 | 1,697,000 |
| Over 500 . . . . . | 92,000                  | 5,000   | 7,000   | 104,000   |
| Total              | 2,984,000               | 322,000 | 703,000 | 4,009,000 |

The value of land per acre is highest in New Jersey, the Agricultural Report for 1888 showing the following table of averages:—

| State               | Dollars per Acre | State               | Dollars per Acre |
|---------------------|------------------|---------------------|------------------|
| New Jersey . . . .  | 65               | Vermont . . . . .   | 36               |
| Massachusetts . . . | 50               | Maryland . . . . .  | 32               |
| Ohio . . . . .      | 46               | Illinois . . . . .  | 32               |
| New York . . . . .  | 44               | Wisconsin . . . . . | 23               |

In some of the Western States it is less than five dollars or £1 sterling per acre.

The following table shows the areas of lands improved and unimproved, the number of hands engaged in agriculture, and the value of the farms:—

| States              | Millions of Acres |      |      |      |            |      |      |      |
|---------------------|-------------------|------|------|------|------------|------|------|------|
|                     | Improved          |      |      |      | Unimproved |      |      |      |
|                     | 1850              | 1860 | 1870 | 1880 | 1850       | 1860 | 1870 | 1880 |
| New England . . . . | 11                | 12   | 12   | 13   | 7          | 8    | 8    | 8    |
| Middle . . . . .    | 26                | 30   | 33   | 37   | 16         | 16   | 16   | 15   |
| Southern . . . . .  | 49                | 65   | 58   | 82   | 117        | 155  | 126  | 147  |
| Western . . . . .   | 27                | 56   | 87   | 153  | 40         | 65   | 70   | 79   |
| Total . . . . .     | 113               | 163  | 190  | 285  | 180        | 244  | 220  | 249  |

| States              | Hands Employed |           |           | Value of Farms, Millions £ |       |       |       |
|---------------------|----------------|-----------|-----------|----------------------------|-------|-------|-------|
|                     | 1860           | 1870      | 1880      | 1860                       | 1870  | 1880  | 1880  |
| New England . . . . | 293,000        | 316,000   | 301,000   | 77                         | 99    | 107   | 121   |
| Middle . . . . .    | 721,000        | 793,000   | 847,000   | 248                        | 380   | 508   | 506   |
| Southern . . . . .  | 860,000        | 2,669,000 | 3,626,000 | 198                        | 445   | 253   | 347   |
| Western . . . . .   | 1,346,000      | 2,144,000 | 2,896,000 | 158                        | 458   | 818   | 1,148 |
| Total . . . . .     | 3,220,000      | 5,922,000 | 7,670,000 | 681                        | 1,382 | 1,686 | 2,122 |

In the above table of "hands employed" are omitted for 1860 the able-bodied slaves of the Southern States. Assuming that one-half of such slaves were engaged in agriculture (say 1,122,000), the number of persons so employed in 1860 would be 4,342,000 for the whole Union, and 1,982,000 for the Southern States. The value of farms (without live-stock, crops, or implements) was as follows to the number of hands engaged in agriculture :—

|                | Per Head |
|----------------|----------|
| 1860 . . . . . | £318     |
| 1870 . . . . . | 286      |
| 1880 . . . . . | 276      |

The ratio of improved acres to the number of hands engaged was :—

| States              | Acres Improved per Head |      |      |
|---------------------|-------------------------|------|------|
|                     | 1860                    | 1870 | 1880 |
| New England . . . . | 41                      | 38   | 43   |
| Middle . . . . .    | 41                      | 41   | 43   |
| Southern . . . . .  | 33                      | 22   | 23   |
| Western . . . . .   | 42                      | 41   | 53   |
| Average . . . . .   | 36                      | 32   | 39   |

It appears that agricultural skill has made most progress in the Western States, where three men in 1880 cultivated as much land as four in 1870.

#### CANADA

At the beginning of the present century agriculture was in the hands of the old French "*habitants*," who had a chain of farms 400 miles long on the banks of the St. Lawrence. These farms comprised, besides pastures, about 500,000 acres under crops, the quantity of grain produced being over 5 million bushels. According to a statement published in 1830, the average annual export of wheat to England since 1805 had been a trifle over one million bushels. Free grants of 200-acre farms were given by the British Government to military and other settlers down to 1826, on condition of building a hut and barn (cost £72) and getting four acres under crops. In 1826 these land grants were abolished, and farm lots were sold by auction at prices payable in four annual instalments without interest, the average for backwood lands being 5s. an acre.

A rush of settlers ensued. In 1834 the area covered by farms in the colony was 12,640,000 acres, of which 4,910,000 were cultivated. In 1842 Upper Canada, now called Ontario, counted 100,000 agricultural families, who had under tillage an area of 1,928,000 acres, and in 1852 there were 190,000 families, with 3,698,000 acres under plough. The grain crop of Ontario and Quebec in 1852 exceeded 45 million bushels.

In 1870 the Government of Canada passed a Homestead Law similar to that of the United States, granting farm lots of 200 acres to each head of a family and 100 to each male adult free, on condition of building a log-hut not less than 16 × 20 feet, cultivating 15 acres in

every 100, and residing six months in each year during five years on the farm: these grants to be limited to Manitoba. In all other parts of Canada public lands cost about 4s. an acre. The usual cost of felling timber to clear the land is £3 an acre.

In 1874 Canada proper, that is, Ontario and Quebec, had 368,000 farms covering an area of 34 million acres, the Government having still 167 million acres of public lands undisposed of. The tenure of the said farms was as follows :—

| Acres              | Number of Farms | Area, Acres |
|--------------------|-----------------|-------------|
| Under 10 . . . . . | 40,300          | 250,000     |
| 10-100 . . . . .   | 220,700         | 12,000,000  |
| Over 100 . . . . . | 107,400         | 22,000,000  |
| Total . . . . .    | 368,400         | 34,250,000  |

Of the above farms, 322,400 were cultivated by their owners, and 44,000 by tenants. The average size of each farm was 93 acres. The returns for 1881 showed 588,970 farms, against 57,890 in 1831; the area under farms in 1881 was 67,650,000 acres, that is, an average of 115 acres, against 134 in the United States. The increase of grain from 1874 to 1886 was 102 per cent.; of cattle, 35 per cent.

#### AUSTRALIA

Farming land first came into use near Sydney about 1790. It was not until 1813 that two farmers crossed the Blue Mountains, from which time squatters began to settle on Government lands. Some obtained free grants, others a squatter's privilege for lots of 6400 acres at a nominal rent of £10 a year. In 1831 free grants were abolished, the British Government fixing the price at 5s. an acre, which was raised to 12s. in 1838, and to 20s. in 1842. Between 1831 and 1842 the Government sold two million acres, the half of the money so obtained being given as a bonus to shipowners to bring out settlers from England. In 1850 Mr. Palmer wrote, "There are men who landed here without a guinea who have farms of 20,000 acres or more, stocked with 4000 cattle or 40,000 sheep."

In 1887 the lands sold and those unalienated in the seven colonies were :—

| Colony                    | Millions of Acres |               |            | Percentage of Lands Sold |
|---------------------------|-------------------|---------------|------------|--------------------------|
|                           | Sold              | Undisposed of | Total Area |                          |
| New South Wales . . . .   | 42                | 154           | 196        | 21                       |
| Victoria . . . . .        | 15                | 42            | 57         | 26                       |
| South Australia . . . .   | 9                 | 234           | 243        | 4                        |
| Western Australia . . . . | 2                 | 676           | 678        | ...                      |
| Queensland . . . . .      | 9                 | 419           | 428        | 2                        |
| Tasmania . . . . .        | 5                 | 11            | 16         | 30                       |
| New Zealand . . . . .     | 19                | 48            | 67         | 29                       |
| Total . . . . .           | 101               | 1,584         | 1,685      | 6                        |

The sales in the several colonies were as follows :—

|                             | Acres, Freehold |            |             | Price, £   | Shillings per Acre |
|-----------------------------|-----------------|------------|-------------|------------|--------------------|
|                             | 1831-75         | 1876-87    | Total       |            |                    |
| New South Wales . . . . .   | 13,600,000      | 28,500,000 | 42,100,000  | 42,000,000 | 20                 |
| Victoria . . . . .          | 10,400,000      | 4,800,000  | 15,200,000  | 23,300,000 | 31                 |
| South Australia . . . . .   | 5,600,000       | 3,800,000  | 9,400,000   | 10,000,000 | 23                 |
| Western Australia . . . . . | 1,500,000       | 400,000    | 1,900,000   | 1,000,000  | 10                 |
| Queensland . . . . .        | 1,800,000       | 7,200,000  | 9,000,000   | 5,800,000  | 13                 |
| Tasmania . . . . .          | 4,000,000       | 600,000    | 4,600,000   | 4,000,000  | 18                 |
| New Zealand . . . . .       | 13,600,000      | 5,300,000  | 18,900,000  | 12,000,000 | 12                 |
| Total . . . . .             | 50,500,000      | 50,600,000 | 101,100,000 | 98,100,000 | 19                 |

The sums received for lands in New South Wales, South Australia, Western Australia, Tasmania, and New Zealand are not known precisely. The above are estimates based on the ordinary prices.

The number of landowners and of squatters in 1880, and the lands held by them, were as follows :—

|                             | Number of  |           | Acres      |             | Acres to Average Farm |           |
|-----------------------------|------------|-----------|------------|-------------|-----------------------|-----------|
|                             | Landowners | Squatters | Freehold   | Sheep Runs  | Freehold              | Sheep Run |
| New South Wales . . . . .   | 39,900     | 4,330     | 25,500,000 | 133,200,000 | 634                   | 30,700    |
| Victoria . . . . .          | 49,600     | 612       | 14,800,000 | 14,300,000  | 321                   | 23,300    |
| South Australia . . . . .   | 31,000     | 1,472     | 9,200,000  | 115,000,000 | 296                   | 78,000    |
| Western Australia . . . . . | 1,800      | 4,500     | 1,700,000  | 24,000,000  | 950                   | 5,300     |
| Queensland . . . . .        | 9,500      | 6,600     | 4,600,000  | 239,000,000 | 478                   | 36,000    |
| Tasmania . . . . .          | 12,000     | 500       | 4,200,000  | 1,800,000   | 353                   | 3,500     |
| New Zealand . . . . .       | 24,100     | 997       | 4,100,000  | 12,100,000  | 167                   | 12,050    |
| Total . . . . .             | 167,900    | 19,011    | 64,100,000 | 539,400,000 | 384                   | 28,300    |

The average freehold farm in 1880 was 384 acres, against 93 in Canada and 134 in the United States. The area of freehold farms in 1887, as shown in preceding table, was 101 million acres.

The sales of land were as follows :—

| Period            | Acres Sold | Acres per Annum |
|-------------------|------------|-----------------|
| 1831-42 . . . . . | 2,100,000  | 200,000         |
| 1843-75 . . . . . | 48,400,000 | 1,450,000       |
| 1876-87 . . . . . | 50,600,000 | 4,220,000       |

The number of freehold landowners in 1880 was equal to 5 per cent. of the population, against 8 per cent. in the United States and 9 per cent. in Canada.

#### CAPE COLONY

When this colony was taken from the Dutch in 1806, it comprised 10,000 families, mostly following pastoral pursuits. In 1826 a small Scotch colony was sent out by the British Government.

The area is 212,000 square miles, or 135 million acres, viz. :—

|                                  | Acres       | Per Annum |
|----------------------------------|-------------|-----------|
| Sold from 1806 to 1875 . . . . . | 67,400,000  | 960,000   |
| " " 1876 to 1887 . . . . .       | 22,200,000  | 1,850,000 |
| Still unsold . . . . .           | 45,400,000  | ...       |
| Total . . . . .                  | 135,000,000 | ...       |

The nominal price was 1s. per acre, but the amount received has not averaged more than 6d. Sheep farms vary from 3000 to 10,000 acres, being much smaller than in Australia or the Argentine Republic. The number of farms is unknown, probably about 40,000, averaging 2200 acres each.

#### INDIA

The tenure of land is as follows :—

|                   | Number     | Annual Payment to Government, £ |
|-------------------|------------|---------------------------------|
| Nobles . . . . .  | 130,000    | 13,000,000                      |
| Farmers . . . . . | 724,000    | 7,300,000                       |
| Ryots . . . . .   | 9,750,000  | 970,000                         |
| Total . . . . .   | 10,604,000 | 21,270,000                      |

#### OTHER COLONIAL CROWN-LANDS

*Ceylon.*—This island has an area of 16 million acres. The Government has sold down to December 1887 only 1,150,000, the public lands still undisposed of reaching 12,040,000 acres. Usual price, 30s. per acre. The estates of English settlers, mostly under coffee, chin-chona, and tea, cover 300,000 acres, and were valued in 1880 at 9 millions sterling.

*Natal.*—This colony has an area of 12,100,000 acres, having been separated from Cape Colony in 1856 :—

|                                        | Acres     | Per Annum |
|----------------------------------------|-----------|-----------|
| Lands sold from 1856 to 1875 . . . . . | 8,000,000 | 400,000   |
| Lands sold from 1876 to 1887 . . . . . | 300,000   | 25,000    |
| Lands still undisposed of . . . . .    | 3,800,000 | ...       |

Total . . . . . 12,100,000

The usual price is 3s. per acre. The Kaffirs own nine-tenths of the total area.

*Jamaica.*—This island has an area of 2,600,000 acres, which have been sold to planters at prices varying from 4s. to 20s. per acre. The Government has still 100,000 acres unsold.

*Trinidad.*—Area 1,100,000 acres. It was taken from the Spaniards in 1797, but two-thirds of the island are still in the hands of the British Government.

Sales of Crown-lands show :—

|                                  | Acres   | Per Annum |
|----------------------------------|---------|-----------|
| Sold from 1797 to 1875 . . . . . | 290,000 | 3,500     |
| Sold from 1876 to 1887 . . . . . | 90,000  | 8,000     |
| Still undisposed of . . . . .    | 740,000 | ...       |

Total . . . . . 1,120,000

The average price is 25s. per acre. The farms are mostly under cocoa and sugar.

#### ARGENTINA

The tenure and value of land vary exceedingly. In such provinces as Buenos Ayres and Santa Fè, where great numbers of the inhabitants are landowners, and the

soil is subdivided, the prices are high; while in other provinces, where a few families possess great tracts of

land, the value is low. The following table is taken from the *River Plate Handbook* (1885):—

|                        | Acres              |                  |                    | Value per Square Mile (640 Acres) |              |
|------------------------|--------------------|------------------|--------------------|-----------------------------------|--------------|
|                        | Pasture            | Tillage          | Total              | Pasture, £                        | Tillage, £   |
| Buenos Ayres . . . . . | 53,800,000         | 2,300,000        | 56,100,000         | 600                               | 3,000        |
| Santa Fe . . . . .     | 20,100,000         | 1,500,000        | 21,600,000         | 300                               | 1,200        |
| Cordoba . . . . .      | 44,000,000         | 200,000          | 44,200,000         | 150                               | 1,000        |
| San Luis . . . . .     | 25,600,000         | 100,000          | 25,700,000         | 100                               | 1,000        |
| Mendoza . . . . .      | 32,000,000         | 500,000          | 32,500,000         | 80                                | 2,000        |
| San Juan . . . . .     | 28,800,000         | 300,000          | 29,100,000         | 80                                | 1,500        |
| Salta . . . . .        | 30,700,000         | 200,000          | 30,900,000         | 50                                | 1,000        |
| Tucuman . . . . .      | 10,200,000         | 200,000          | 10,400,000         | 150                               | 4,000        |
| Uruguay . . . . .      | 14,100,000         | 100,000          | 14,200,000         | 50                                | 1,000        |
| Rioja . . . . .        | 22,400,000         | 100,000          | 22,500,000         | 50                                | 1,000        |
| Catamarca . . . . .    | 49,600,000         | 100,000          | 49,700,000         | 50                                | 1,000        |
| Santiago . . . . .     | 22,300,000         | 100,000          | 22,400,000         | 50                                | 1,000        |
| Entre Rios . . . . .   | 23,000,000         | 200,000          | 23,200,000         | 300                               | 1,200        |
| Corrientes . . . . .   | 25,600,000         | 100,000          | 25,700,000         | 200                               | 1,000        |
| <b>Total . . . . .</b> | <b>402,200,000</b> | <b>6,000,000</b> | <b>408,200,000</b> | <b>130</b>                        | <b>1,800</b> |

The above refers merely to the inhabited portion of the Republic, besides which there are the following territories, for the most part public lands, with a scanty population, viz:—

|                        | Acres              |
|------------------------|--------------------|
| Gran Chaco . . . . .   | 102,400,000        |
| Misiones . . . . .     | 6,400,000          |
| Pampas . . . . .       | 96,000,000         |
| Patagonia . . . . .    | 192,000,000        |
| <b>Total . . . . .</b> | <b>396,800,000</b> |

The unsettled portion covers nearly as much area as that which is inhabited; the total is 805 million acres, or one-third of the extent of the United States.

The number of landowners is about 100,000, mostly Argentines. There are in Buenos Ayres 4000 Irish and Scotch sheep-farmers, whose land and stock in 1882 was worth 33 millions sterling.

In Santa Fe 16,000 grain-growers, Italians, Swiss, French, and Germans, possess farms worth 12 millions sterling. There are also 10,000 grain-growers, mostly Italians, in the province of Buenos Ayres. At least 70,000 Argentines have sheep and cattle farms in Buenos Ayres and the upper provinces. Land usually carries 200 sheep and 100 cattle to the square mile.

## LAND-TAXES

The total burthens on agriculture in various countries, by latest accounts, were approximately as follows:—

|                          | Taxes, £           | Agricultural Product, £ | Tax, Percentage |
|--------------------------|--------------------|-------------------------|-----------------|
| England . . . . .        | 16,200,000         | 157,000,000             | 10.3            |
| Scotland . . . . .       | 1,900,000          | 40,000,000              | 4.8             |
| Ireland . . . . .        | 2,700,000          | 54,000,000              | 5.0             |
| <b>United Kingdom</b>    | <b>20,800,000</b>  | <b>251,000,000</b>      | <b>8.3</b>      |
| France . . . . .         | 21,800,000         | 460,000,000             | 4.8             |
| Germany . . . . .        | 12,700,000         | 424,000,000             | 3.0             |
| Austria proper . . . . . | 8,600,000          | 175,000,000             | 4.9             |
| Italy . . . . .          | 14,200,000         | 204,000,000             | 7.0             |
| Belgium . . . . .        | 1,530,000          | 55,000,000              | 2.8             |
| Holland . . . . .        | 1,080,000          | 39,000,000              | 2.8             |
| Egypt . . . . .          | 4,890,090          | 35,000,000              | 14.0            |
| India . . . . .          | 23,400,000         | 400,000,000             | 5.8             |
| <b>Total . . . . .</b>   | <b>109,000,000</b> | <b>2,043,000,000</b>    | <b>5.4</b>      |

## UNITED KINGDOM

The taxes on agrarian industry in the United Kingdom may be set down approximately thus:—

|                             | England           | Scotland         | Ireland          | United Kingdom    |
|-----------------------------|-------------------|------------------|------------------|-------------------|
| Tithes . . . . .            | 4,050,000         | ...              | ...              | 4,050,000         |
| Rates . . . . .             | 8,300,000         | 1,400,000        | 2,100,000        | 11,800,000        |
| Income-tax . . . . .        | 1,200,000         | 200,000          | 250,000          | 1,650,000         |
| Land-tax . . . . .          | 1,050,000         | 50,000           | ...              | 1,100,000         |
| Duties and stamps . . . . . | 1,600,000         | 250,000          | 350,000          | 2,200,000         |
| <b>Total . . . . .</b>      | <b>16,200,000</b> | <b>1,900,000</b> | <b>2,700,000</b> | <b>20,800,000</b> |

## FRANCE

Councillor Tisserand enumerates the agrarian taxes as follows:—

|                        |                   |
|------------------------|-------------------|
| National . . . . .     | 4,800,000         |
| Departmental . . . . . | 4,800,000         |
| Indirect . . . . .     | 8,600,000         |
| Roads, &c. . . . .     | 3,600,000         |
| <b>Total . . . . .</b> | <b>21,800,000</b> |

Mr. Yves Guyot published the following table of rental and land-tax down to 1874:—

| Year           | Land Rental, £ | Land-Tax, £ | Per Cent. |
|----------------|----------------|-------------|-----------|
| 1791 . . . . . | 57,600,000     | 9,600,000   | 17        |
| 1821 . . . . . | 63,200,000     | 6,200,000   | 10        |
| 1862 . . . . . | 124,000,000    | 6,400,000   | 5         |
| 1874 . . . . . | 158,000,000    | 6,700,000   | 4         |

The ratios of properties according to tax assessment were:—

| Taxes                    | 1835         | 1858         |
|--------------------------|--------------|--------------|
| Under 5 francs . . . . . | 47.8         | 51.0         |
| 5-10 " . . . . .         | 16.1         | 15.4         |
| 10-20 " . . . . .        | 13.9         | 13.3         |
| 20-50 " . . . . .        | 13.1         | 12.1         |
| Over 50 " . . . . .      | 9.1          | 8.2          |
| <b>Total . . . . .</b>   | <b>100.0</b> | <b>100.0</b> |

Those under five francs may be considered pauper holdings, being mostly exempted from tax on the plea of extreme poverty.

## AUSTRIA

In Austria (without Hungary) the agricultural taxes in 1882 were :—

|                           |             |
|---------------------------|-------------|
| Land-tax . . . . .        | £ 2,600,000 |
| Local rates . . . . .     | 2,400,000   |
| Stamp-duties, &c. . . . . | 3,600,000   |
| Total . . . . .           | 8,600,000   |

## GERMANY

Professor Meitzen shows that the taxes on agriculture are as follows :—

| Taxes              | Per Cent.<br>on Rental<br>Valuation | Per Cent.<br>on Real<br>Rental |
|--------------------|-------------------------------------|--------------------------------|
| State . . . . .    | 17.4                                | 7.0                            |
| Communal . . . . . | 17.1                                | 6.8                            |
| Special . . . . .  | 9.3                                 | 3.7                            |
| Total . . . . .    | 43.8                                | 17.5                           |

## ITALY

The taxes levied on landed property in 1883 were as follows :—

|                      |             |
|----------------------|-------------|
| National . . . . .   | £ 5,020,000 |
| Provincial . . . . . | 2,060,000   |
| Communal . . . . .   | 3,130,000   |
| Total . . . . .      | 10,210,000  |

Farmers have also to pay a cattle-tax, legacy-duty, and other imposts, thus bringing up the total, as Professor Sbrojavacca shows, to £14,240,000 per annum. The land-tax proper was in 1882 as follows :—

|                        | £         | Pence per<br>Acre | Percentage<br>of Land<br>Product |
|------------------------|-----------|-------------------|----------------------------------|
| Sardinia . . . . .     | 820,000   | 20                | 11                               |
| Lombardy . . . . .     | 960,000   | 48                | 18                               |
| Parma . . . . .        | 150,000   | 28                | 18                               |
| Modena . . . . .       | 145,000   | 22                | 13                               |
| Papal States . . . . . | 480,000   | 22                | 14                               |
| Tuscany . . . . .      | 230,000   | 11                | 9                                |
| Naples . . . . .       | 1,420,000 | 18                | 13                               |
| Sicily . . . . .       | 360,000   | 14                | 11                               |
| Total . . . . .        | 4,565,000 | 20                | 13                               |

## HOLLAND

In 1884 the agrarian imposts were :—

|                           |           |
|---------------------------|-----------|
| Land-tax . . . . .        | £ 560,000 |
| Local rates . . . . .     | 140,000   |
| Stamp-duties, &c. . . . . | 380,000   |
| Total . . . . .           | 1,080,000 |

## BELGIUM

According to Professor Leemans the agricultural taxes in 1884 were :—

|                          |           |
|--------------------------|-----------|
| Land-tax . . . . .       | £ 790,000 |
| Indirect taxes . . . . . | 560,000   |
| Roads, &c. . . . .       | 180,000   |
| Total . . . . .          | 1,530,000 |

## EGYPT

The land-tax in 1833 was £1,120,000, and had risen in 1889 to £4,890,000 sterling.

## CHINA

In 1889 the land-tax was £4,800,000.

## LANGUAGE

The numbers of persons speaking the various languages in 1801 and in 1890 were as follows :—

|                      | 1801        | 1890        | Ratio |       |
|----------------------|-------------|-------------|-------|-------|
|                      |             |             | 1801  | 1890  |
| English . . . . .    | 20,520,000  | 111,100,000 | 12.7  | 27.7  |
| French . . . . .     | 31,450,000  | 51,200,000  | 19.4  | 12.7  |
| German . . . . .     | 30,320,000  | 75,200,000  | 18.7  | 13.7  |
| Russian . . . . .    | 30,770,000  | 75,000,000  | 19.0  | 18.7  |
| Spanish . . . . .    | 26,190,000  | 42,800,000  | 10.2  | 10.7  |
| Italian . . . . .    | 15,070,000  | 33,400,000  | 9.3   | 8.3   |
| Portuguese . . . . . | 7,480,000   | 13,000,000  | 4.7   | 3.2   |
| Total . . . . .      | 161,800,000 | 401,700,000 | 100.0 | 100.0 |

It will be observed what a wonderful advance the English language has made in ninety years. The following table shows in detail the distribution of the various principal languages in 1801 and in 1890. In the United States many speak both English and German.

## SPOKEN IN 1801

| In                      | English    | French     | Italian    | Spanish    | German     |
|-------------------------|------------|------------|------------|------------|------------|
| Europe . . . . .        | 14,540,000 | 30,155,000 | 14,840,000 | 10,265,000 | 30,005,000 |
| United States . . . . . | 5,250,000  | 230,000    | 5,000      | 5,000      | 280,000    |
| Other parts . . . . .   | 730,000    | 1,065,000  | 225,000    | 15,920,000 | 35,000     |
| Total . . . . .         | 20,520,000 | 31,450,000 | 15,070,000 | 26,190,000 | 30,320,000 |

## SPOKEN IN 1890

| In                      | English     | French     | Italian    | Spanish    | German     |
|-------------------------|-------------|------------|------------|------------|------------|
| Europe . . . . .        | 38,600,000  | 45,200,000 | 31,100,000 | 17,300,000 | 67,600,000 |
| United States . . . . . | 58,000,000  | 1,100,000  | 400,000    | 650,000    | 7,100,000  |
| Other parts . . . . .   | 14,500,000  | 4,900,000  | 1,900,000  | 24,850,000 | 500,000    |
| Total . . . . .         | 111,100,000 | 51,200,000 | 33,400,000 | 42,800,000 | 75,200,000 |

The number of persons speaking Gaelic in the United Kingdom is said to reach nearly 4 per cent. of the population, including 660,000 in Ireland, 350,000 in Wales, and 230,000 in Scotland.

The proportion of letters in the various languages in prose works is found to be as follows :—

|       | English | French | Italian | Spanish | Latin | German |
|-------|---------|--------|---------|---------|-------|--------|
| A     | 78      | 80     | 99      | 121     | 79    | 64     |
| B     | 23      | 8      | 2       | 11      | 14    | 20     |
| C     | 25      | 30     | 40      | 48      | 42    | 22     |
| D     | 39      | 35     | 42      | 55      | 29    | 71     |
| E     | 138     | 184    | 131     | 145     | 92    | 178    |
| F     | 18      | 8      | 12      | 6       | 13    | 14     |
| G     | 19      | 12     | 20      | 11      | 22    | 31     |
| H     | 46      | 2      | 11      | 20      | 2     | 40     |
| I     | 68      | 76     | 103     | 37      | 120   | 86     |
| J     | 2       | 2      | 4       | 8       | 4     | 6      |
| K     | 6       | ...    | ...     | ...     | ...   | 9      |
| L     | 47      | 47     | 71      | 61      | 29    | 29     |
| M     | 19      | 37     | 12      | 26      | 62    | 22     |
| N     | 78      | 73     | 71      | 55      | 44    | 110    |
| O     | 70      | 41     | 96      | 107     | 50    | 27     |
| P     | 21      | 33     | 28      | 24      | 32    | 11     |
| Q     | 3       | 8      | 9       | 15      | 11    | ...    |
| R     | 59      | 73     | 52      | 69      | 77    | 84     |
| S     | 64      | 99     | 74      | 69      | 79    | 55     |
| T     | 88      | 70     | 55      | 48      | 66    | 48     |
| U     | 37      | 58     | 47      | 46      | 106   | 40     |
| V     | 10      | 17     | 15      | 10      | 18    | 9      |
| W     | 19      | ...    | ...     | ...     | ...   | 20     |
| X     | 1       | 5      | ...     | ...     | 9     | ...    |
| Y     | 22      | 2      | ...     | 5       | ...   | ...    |
| Z     | ...     | ...    | 6       | 3       | ...   | 4      |
| Total | 1,000   | 1,000  | 1,000   | 1,000   | 1,000 | 1,000  |

Where blanks occur, it shows either that the letter is not used, or that the use does not reach 1 in 1000, such as "z" in English or "x" in Spanish. The Spanish N, of which 55 are used, includes three "ñ," equivalent to "gn" in Italian.

### LATITUDE AND LONGITUDE

|                  | Latitude | Longitude |
|------------------|----------|-----------|
| Algiers          | 36.46 N. | 3.6 E.    |
| Amsterdam        | 51.21    | 4.58      |
| Antwerp          | 51.13    | 4.25      |
| Archangel        | 65.40    | 43.0      |
| Azores           | 28.0     | 26.0 W.   |
| Bagdad           | 33.20    | 44.24 E.  |
| Baltimore        | 39.15    | 76.30 W.  |
| Belfast          | 54.36    | 5.55      |
| Berlin           | 52.33    | 13.25 E.  |
| Bombay           | 19.2     | 72.50     |
| Bordeaux         | 45.0     | 0.20 W.   |
| Boston           | 42.20    | 71.9      |
| Brussels         | 50.52    | 3.21 E.   |
| Bucharest        | 44.28    | 26.9      |
| Buda-Pesth       | 47.31    | 19.1      |
| Buenos Ayres     | 34.36 S. | 58.22 W.  |
| Cadiz            | 36.32 N. | 6.18      |
| Caro             | 30.5     | 31.45 E.  |
| Calcutta         | 22.40    | 88.25     |
| Canton           | 23.10    | 113.9     |
| Cape Town        | 34.30 S. | 18.0      |
| Caracas          | 10.30 N. | 67.10 W.  |
| Chicago          | 42.0     | 83.31     |
| Cincinnati       | 39.0     | 84.15     |
| Constantinople   | 41.1     | 28.58 E.  |
| Copenhagen       | 55.42    | 12.34     |
| Demerara         | 5.30     | 58.20 W.  |
| Dresden          | 51.6     | 13.36 E.  |
| Dublin           | 53.21    | 6.17 W.   |

| Quito          | 0.7 S.   | 78.49     |
| Rio Janeiro    | 23.0     | 43.20     |
| Rome           | 41.53 N. | 12.28 E.  |
| Rotterdam      | 51.55    | 4.29      |
| St. Louis      | 38.40    | 90.12 W.  |
| St. Petersburg | 59.40    | 31.0 E.   |
| San Francisco  | 37.59    | 121.59 W. |
| Sierra Leone   | 8.45     | 13.10     |
| Singapore      | 1.27     | 103.48 E. |
| Stockholm      | 59.20    | 18.0      |
| Sydney         | 34.0 S.  | 151.12    |
| Teneriffe      | 28.30 N. | 17.0 W.   |
| Toronto        | 43.47    | 79.25     |
| Trinidad       | 10.50    | 61.15     |
| Tunis          | 36.44    | 10.5 E.   |
| Turin          | 45.5     | 7.44      |
| Valparaiso     | 33.02 S. | 71.45 W.  |
| Venice         | 45.27 N. | 12.25 E.  |
| Vera Cruz      | 19.30    | 96.40 W.  |
| Vienna         | 48.9     | 16.24 E.  |
| Warsaw         | 52.15    | 21.0      |
| Washington     | 38.55    | 77.5 W.   |

The length of a degree of longitude varies with latitude as follows :—

| Latitude | Miles | Latitude | Miles |
|----------|-------|----------|-------|
| 10       | 68.4  | 40       | 54    |
| 15       | 67.7  | 45       | 50    |
| 20       | 65.9  | 50       | 45    |
| 25       | 63.7  | 60       | 35    |
| 30       | 59.7  | 70       | 24    |
| 35       | 57    | 80       | 12    |

### LAW

The ordinary number of civil lawsuits in a year is as follows :—

|          | Lawsuits  | Per 1000 Inhabitants |
|----------|-----------|----------------------|
| England  | 1,150,000 | 42                   |
| Scotland | 75,000    | 20                   |
| Germany  | 3,239,000 | 70                   |
| Italy    | 1,390,000 | 52                   |
| France   | 708,000   | 19                   |
| Belgium  | 94,000    | 18                   |

The Queen's Bench in England in 1887 disposed of 80,000 suits; the upper courts in Scotland, 11,000. There is an arbitration tribunal between employers and workmen called "Prudhommes," which settles 52,000 cases yearly in France and 4000 in Belgium.

There are 14,000 solicitors or attorneys in England, 17,000 in France, without counting barristers. In 1866 the English law reports comprised 1308 volumes, containing 60,000 law and 28,000 equity cases; about 30 volumes are added yearly. In 1873 statute law comprised 18,000 statutes. The Russian edicts down to Alexander I. were 31,900 in number.

When Tribonian compiled the Pandects, A.D. 530, he condensed 3,000,000 sentences and 2000 volumes into 150 volumes.

### LEAD

The production of metallic lead in tons has been approximately as follows:—

|                      | 1830    | 1850    | 1880    | 1888    |
|----------------------|---------|---------|---------|---------|
| Great Britain        | 48,000  | 55,000  | 51,000  | 36,000  |
| France               | 1,100   | 7,000   | 32,000  | 30,000  |
| Germany              | 9,500   | 16,000  | 58,600  | 92,000  |
| Italy                | 8,000   | 12,000  | 33,000  | 30,000  |
| Spain                | 23,000  | 27,000  | 92,300  | 84,000  |
| Austria              | 7,000   | 11,000  | 8,900   | 10,000  |
| Greece, Belgium, &c. | 4,000   | 6,500   | 14,400  | 15,000  |
| Europe               | 100,600 | 134,500 | 290,200 | 297,000 |
| United States        | 3,700   | 36,000  | 89,000  | 160,000 |
| Total                | 104,000 | 170,500 | 379,200 | 457,000 |

Good lead ore gives 70 per cent. of lead, and in smelting it takes two tons of coal to produce three tons of lead. The Cordoba mines in Spain are said to be the richest in the world. The Missouri lead-field, near Chicago, is 1½ miles in length, the ore giving 70 per cent. lead. The importation of lead into the United States fell from 42,000 tons in 1870 to 4000 in 1880.

The production in the United States has been as follows:—

|          | 1860   | 1889    |
|----------|--------|---------|
|          | Tons   | Tons    |
| Colorado | 36,000 | 70,000  |
| Missouri | 28,000 | 34,000  |
| Various  | 25,000 | 87,000  |
| Total    | 89,000 | 191,000 |

### LEATHER

The annual consumption in the United Kingdom, and the value of manufactured articles, were approximately:—

| Year | Millions Lbs. Leather |               |       | Manufactured Value |           |            |
|------|-----------------------|---------------|-------|--------------------|-----------|------------|
|      | British Hides         | Foreign Hides | Total | Home, £            | Export, £ | Total, £   |
| 1805 | 27                    | ...           | 27    | 8,000,000          | 15,000    | 8,015,000  |
| 1820 | 36                    | 12            | 48    | 10,000,000         | 40,000    | 10,040,000 |
| 1830 | 40                    | 30            | 70    | 12,600,000         | 80,000    | 12,680,000 |
| 1840 | 45                    | 37            | 82    | 14,200,000         | 170,000   | 14,370,000 |
| 1850 | 50                    | 70            | 120   | 19,700,000         | 610,000   | 20,310,000 |
| 1860 | 55                    | 87            | 142   | 22,300,000         | 2,130,000 | 24,430,000 |
| 1870 | 60                    | 132           | 192   | 28,600,000         | 2,640,000 | 31,240,000 |
| 1881 | 65                    | 144           | 209   | 30,100,000         | 3,930,000 | 34,030,000 |
| 1888 | 66                    | 164           | 230   | 38,000,000         | 4,100,000 | 42,100,000 |

In 1835 M'Culloch estimated the manufactures thus:—  
Boots and shoes . . . . . 7,500,000  
Saddlery, &c. . . . . 6,000,000

Total . . . . . 13,500,000

There was an estimate in the *Parliamentary Gasetteer* of 1806 which put down the leather manufactures at £10,000,000; this was less than Eden's valuation in 1803, namely, £12,000,000. That of M'Pherson in 1783 was £10,500,000 (see *Manufactures*).

### LEGACY AND PROBATE

The following table shows the amount of property changing hands by death, the amount under the head of Succession before 1870 being an estimate as one-third of the amount paying legacy-duty:—

| Period  | Annual Average, £ |            |             | Ratio to Pop. per Inhabitant |
|---------|-------------------|------------|-------------|------------------------------|
|         | Legacy            | Succession | Total       |                              |
| 1811-20 | 25,500,000        | 8,500,000  | 34,000,000  | £ s. d.<br>1 18 0            |
| 1841-50 | 43,900,000        | 14,600,000 | 58,500,000  | 2 4 0                        |
| 1861-70 | 73,600,000        | 24,500,000 | 98,100,000  | 3 6 0                        |
| 1876-80 | 113,000,000       | 41,000,000 | 154,000,000 | 4 10 0                       |
| 1885-89 | 143,200,000       | 44,800,000 | 188,000,000 | 5 2 0                        |

The exact amount of all property passing through the Probate Court in 1840 was ascertained by Porter to be £54,700,000, and if we compare his statement with those for subsequent years from the *Statistical Abstract*, we find:—

|                | Total Legacy and Succession Property |               |               | Ratio |       |
|----------------|--------------------------------------|---------------|---------------|-------|-------|
|                | 1840                                 | 1875          | 1889          | 1840  | 1889  |
| England        | £ 47,100,000                         | £ 119,900,000 | £ 161,700,000 | 86.0  | 85.8  |
| Scotland       | 3,100,000                            | 14,500,000    | 17,200,000    | 5.7   | 9.1   |
| Ireland        | 4,500,000                            | 10,000,000    | 10,900,000    | 8.3   | 5.7   |
| United Kingdom | 54,700,000                           | 144,400,000   | 189,800,000   | 100.0 | 100.0 |

The returns for Scotland in 1840 did not include mortgages, and if these were added, the amount, it is thought, would have reached £4,000,000, or about 7½ per cent. of the total. Even allowing for this, the increase of wealth in Scotland since 1840 has been prodigious, namely, 330 per cent. against 244 per cent. in England.

The estates proved in the United Kingdom for legacy-duty, exclusive of succession estates, were as follows:—

| Estates          | Number, Annual Average |         | Amount, Annual Average, £ |             |
|------------------|------------------------|---------|---------------------------|-------------|
|                  | 1883-84                | 1888-89 | 1883-84                   | 1888-89     |
| Over £100,000    | 149                    | 172     | 32,700,000                | 43,500,000  |
| £50,000-£100,000 | 242                    | 261     | 16,800,000                | 18,200,000  |
| £10,000-£50,000  | 2,019                  | 2,045   | 41,300,000                | 43,500,000  |
| £1,000-£10,000   | 10,771                 | 11,285  | 34,700,000                | 36,000,000  |
| Under £1,000     | 27,594                 | 31,047  | 8,800,000                 | 10,600,000  |
| Total            | 40,775                 | 44,810  | 134,300,000               | 151,800,000 |

#### Ratio as to Value

| Estates          | 1883-84 | 1888-89 |
|------------------|---------|---------|
| Over £100,000    | 24.0    | 28.6    |
| £10,000-£100,000 | 43.5    | 40.6    |
| £1,000-£10,000   | 26.0    | 23.8    |
| Under £1,000     | 6.5     | 7.0     |
| Total            | 100.0   | 100.0   |

The number of estates proved in the three kingdoms for legacy-duty only in 1877 was as follows :—

| Amount               | England | Scotland | Ireland | United Kingdom |
|----------------------|---------|----------|---------|----------------|
| Over £20,000 . . .   | 945     | 125      | 59      | 1,129          |
| £5,000-£20,000 . . . | 2,784   | 356      | 199     | 3,339          |
| £1,000-£5,000 . . .  | 7,625   | 1,262    | 800     | 9,687          |
| Under £1,000 . . .   | 21,913  | 2,567    | 2,271   | 26,751         |
| Total . . .          | 33,267  | 4,310    | 3,329   | 40,906         |

Further details on this subject as regards the United Kingdom, France, Italy, and Belgium will be found under the title *Wealth*.

#### HOLLAND

The legacy and succession returns for the years 1880-83 gave the following averages :—

|                      | Estates |
|----------------------|---------|
| Over £40,000 . . .   | 58      |
| £4,000-£40,000 . . . | 356     |
| £1,000-£4,000 . . .  | 2,722   |
| Under £1,000 . . .   | 6,280   |
| Total . . .          | 9,416   |

#### LIBRARIES

|                          | Libraries |       | Volumes    |            |
|--------------------------|-----------|-------|------------|------------|
|                          | 1848      | 1880  | 1848       | 1880       |
| United Kingdom . . .     | 28        | 202   | 1,542,000  | 3,770,000  |
| France . . . . .         | 107       | 505   | 3,975,000  | 7,298,000  |
| Germany . . . . .        | 80        | 594   | 3,053,000  | 4,070,000  |
| Russia . . . . .         | 12        | 145   | 451,000    | 950,000    |
| Austria . . . . .        | 41        | 577   | 2,193,000  | 5,476,000  |
| Italy . . . . .          | 45        | 493   | 2,274,000  | 4,349,000  |
| Spain and Portugal . . . | 24        | 90    | 963,000    | 1,200,000  |
| Switzerland . . . . .    | 13        | 1,654 | 465,000    | 1,819,000  |
| Belgium . . . . .        | 10        | 105   | 400,000    | 610,000    |
| Holland . . . . .        | 10        | 220   | 330,000    | 800,000    |
| Scandinavia . . . . .    | 13        | 94    | 968,000    | 1,250,000  |
| Europe . . . . .         | 383       | 4,679 | 16,614,000 | 31,592,000 |
| United States . . . . .  | 20        | 59    | 600,000    | 2,263,000  |
| Total . . . . .          | 403       | 4,738 | 17,214,000 | 33,855,000 |

The above does not include any libraries with less than 10,000 volumes (except possibly those of Switzerland).

The principal libraries of the world are :—

|                          | Volumes   | MSS.   |
|--------------------------|-----------|--------|
| British Museum . . .     | 1,120,000 | 41,000 |
| Imperial, Paris . . .    | 2,078,000 | 86,000 |
| St. Petersburg . . .     | 1,045,000 | 34,000 |
| Berlin . . . . .         | 740,000   | 15,000 |
| Munich . . . . .         | 810,000   | 24,000 |
| Vienna . . . . .         | 420,000   | 21,000 |
| Dresden . . . . .        | 500,000   | 4,000  |
| Vatican . . . . .        | 340,000   | 32,000 |
| Copenhagen . . . . .     | 410,000   | 5,000  |
| Göttingen . . . . .      | 400,000   | 5,000  |
| Oxford . . . . .         | 300,000   | 22,000 |
| Brussels . . . . .       | 210,000   | 20,000 |
| St. Genevieve, Paris . . | 250,000   | 30,000 |
| Washington . . . . .     | 230,000   | ...    |
| Boston . . . . .         | 202,000   | ...    |
| Astor, New York . . .    | 160,000   | ...    |

The library of the British Museum has 32 miles of shelves filled with books, and is visited by 91,000 readers yearly. The Bibliothèque Impériale of Paris has 18 miles of books and 37,000 readers yearly.

The libraries in the United States were as follows :—

| Year           | Number | Volumes    |
|----------------|--------|------------|
| 1850 . . . . . | 15,615 | 4,640,000  |
| 1860 . . . . . | 19,581 | 8,550,000  |
| 1870 . . . . . | 56,015 | 19,460,000 |

In 1880 there were 23,000 school libraries containing 45,000,000 volumes, and 314 large public libraries, exclusive of all containing less than 10,000 volumes.

#### LIFE

The following table shows the expectation of life in various countries at different ages :—

| Age          | Years to Live |               |         |         |        |        |
|--------------|---------------|---------------|---------|---------|--------|--------|
|              | Eng-land      | United States | Belgium | Holland | Saxony | Sweden |
| 10 . . . . . | 49.2          | 48.7          | 44.3    | 46.5    | 47.0   | 48.0   |
| 20 . . . . . | 41.0          | 42.2          | 37.1    | 38.9    | 39.3   | 40.1   |
| 30 . . . . . | 33.6          | 35.3          | 31.2    | 32.1    | 32.1   | 33.2   |
| 40 . . . . . | 26.7          | 28.2          | 25.5    | 26.2    | 25.0   | 25.9   |
| 50 . . . . . | 20.2          | 20.9          | 19.6    | 20.0    | 18.0   | 19.1   |
| 60 . . . . . | 13.9          | 14.1          | 13.2    | 13.3    | 11.7   | 12.9   |
| 70 . . . . . | 8.9           | 8.5           | 8.2     | 8.0     | 6.9    | 8.0    |
| 80 . . . . . | 5.5           | 4.4           | 5.3     | 4.6     | 3.9    | 4.1    |

The expectation of life is always longer with females than males, viz. :—

| Age               | Years to Live |        |         |        |        |        |         |        |
|-------------------|---------------|--------|---------|--------|--------|--------|---------|--------|
|                   | England       |        | Holland |        | Sweden |        | Belgium |        |
|                   | Male          | Female | Male    | Female | Male   | Female | Male    | Female |
| Birth . . . . .   | 41.9          | 45.2   | 34.1    | 36.4   | 41.3   | 45.6   | ...     | ...    |
| 5 years . . . . . | 51.5          | 53.6   | 48.7    | 49.2   | 49.4   | 53.0   | ...     | ...    |
| 10 " . . . . .    | 48.2          | 50.3   | 45.9    | 46.5   | 46.5   | 50.0   | 43.8    | 44.8   |
| 20 " . . . . .    | 39.9          | 42.1   | 38.3    | 39.2   | 38.6   | 42.1   | 36.4    | 37.7   |
| 30 " . . . . .    | 33.2          | 34.1   | 31.8    | 32.4   | 31.2   | 34.5   | 30.5    | 31.9   |
| 40 " . . . . .    | 26.5          | 27.5   | 25.0    | 26.4   | 24.3   | 27.2   | 24.8    | 26.1   |
| 50 " . . . . .    | 19.9          | 20.8   | 18.5    | 19.7   | 18.0   | 20.1   | 18.9    | 20.3   |
| 60 " . . . . .    | 13.6          | 14.5   | 12.8    | 13.3   | 12.3   | 13.5   | 12.4    | 13.9   |
| 70 " . . . . .    | 8.6           | 9.1    | 7.9     | 8.1    | 7.4    | 8.0    | 8.1     | 8.3    |
| 80 " . . . . .    | 5.2           | 5.6    | 4.4     | 4.5    | 3.9    | 4.3    | 5.2     | 5.4    |
| 90 " . . . . .    | 2.8           | 3.1    | 2.4     | 2.7    | 2.4    | 2.8    | 2.9     | 3.1    |

It will be observed that the mean expectation at five years of age is greater than at birth, but after five years it diminishes. Finlayson's table of expectation for English ladies of fortune coincides closely with the result of widows in France in receipt of pensions :—

| Age          | Years of Life  |               |             |
|--------------|----------------|---------------|-------------|
|              | English Ladies | French Widows | French Male |
| 40 . . . . . | 29.9           | 29.3          | ...         |
| 50 . . . . . | 23.0           | 22.8          | 18.7        |
| 60 . . . . . | 16.2           | 16.0          | 14.3        |
| 70 . . . . . | 10.1           | 10.1          | 8.7         |
| 80 . . . . . | 5.7            | 5.9           | 4.4         |

Kasper gives the percentage of persons of various professions who reach 70 years thus :—

|                      | Per Cent. |                    | Per Cent. |                     | Per Cent. |
|----------------------|-----------|--------------------|-----------|---------------------|-----------|
| Physicians . . . . . | 24        | Lawyers . . . . .  | 29        | Merchants . . . . . | 33        |
| Teachers . . . . .   | 27        | Clerks . . . . .   | 32        | Farmers . . . . .   | 40        |
| Artists . . . . .    | 28        | Soldiers . . . . . | 32        | Clergy . . . . .    | 42        |

Expectation of life varies as follows in England with condition :—

| Age      | Years to Live |                |       |             |
|----------|---------------|----------------|-------|-------------|
|          | Gentry        | Farm Labourers | Sober | Intemperate |
| 20 . . . | 38            | 48             | 40    | 14          |
| 30 . . . | 31            | 41             | 34    | 13          |
| 40 . . . | 24            | 33             | 27    | 10          |
| 50 . . . | 18            | 25             | 20    | 8           |
| 60 . . . | 12            | 18             | 14    | 6           |

In the United States the span of life for various professions is as follows :—

|                 | Years |                 | Years |
|-----------------|-------|-----------------|-------|
| Shopmen . . .   | 41.8  | Mechanics . . . | 47.3  |
| Waggoners . . . | 43.6  | Merchants . . . | 48.4  |
| Labourers . . . | 44.6  | Lawyers . . .   | 52.6  |
| Seamen . . .    | 46.1  | Farmers . . .   | 64.2  |

Madden's table of famous men, and Neuville's average for professions at Frankfort, give the following spans of life :—

| Madden's Famous Men |       | Neuville's Frankfort |       |
|---------------------|-------|----------------------|-------|
|                     | Years |                      | Years |
| Clergymen . . .     | 67    | Physicians . . .     | 52    |
| Physicians . . .    | 68    | Lawyers . . .        | 54    |
| Lawyers . . .       | 69    | Merchants . . .      | 57    |
| Artists . . .       | 70    | Teachers . . .       | 57    |
| Naturalists . . .   | 71    | Clergy . . .         | 66    |

Many remarkable cases of longevity are recorded in all countries and all ranks of life.

1. Countess of Desmond, killed by falling from a cherry-tree in her 146th year. 2. Thomas Parr, died after a dinner-party at Lord Arundel's, aged 152. 3. Cardinal de Salis, who recommended daily exercise in all weathers, aged 110. 4. John Riva, of Venice, who chewed citron bark daily, died aged 116, leaving a son of 14 years. 5. Henry Jenkins, died aged 116. at Bolton-on-Swale in 1670. 6. Mme. Rovi, aged 164, who died in 1741, leaving a son aged 116. 7. Peter Garden, died at Edinburgh in 1775, aged 131. Bertherand's death-roll of slaves at Carthage showed 5 per cent. over 80, and 1 per cent. over 100 years. The Third Legion of Augustus had a death-record which showed that 17 per cent. passed 70 years. Moreover, Pliny says—"The year of our Lord 76 is memorable, for in that year there was a Census from which it appears that in the part of Italy lying between the Apennines and the River Po, there were found fifty-four persons 103 years old; fifty-seven 110 years; two 120 years; four 130 years; four 135 years; and three 140 years each."

In the eighteenth century Sejoncourt published a list of 49 persons who had died between the ages of 130 and 175 years. Among centenarians of recent date were Mrs. Anne Butler, daughter of Admiral Winn, died at Portsmouth, January 1883, aged 103, and Mrs. Betty Lloyd, at Ruabon, Wales, March 1883, aged 107. According to Dr. Farr's tables, of one million male and female persons born, 77 males and 147 females will reach 100 years; but the newer tables of Dr. Ogle give only 41 males and 112 females.

A meeting of 2000 persons over 70 years of age is annually held at Leicester, and of these 400 die before the next anniversary.

| Age               | Table of Survivals of a Thousand Born |         |         |         |         |         |         |         |         |             |
|-------------------|---------------------------------------|---------|---------|---------|---------|---------|---------|---------|---------|-------------|
|                   | England                               | France  | Prussia | Austria | Italy   | Spain   | Sweden  | Norway  | Belgium | Switzerland |
|                   | 1881-82                               | 1880-82 | 1881-83 | 1880-82 | 1881-83 | 1880-84 | 1881-82 | 1881-82 | 1881-83 | 1881-83     |
| Number born . . . | 1,000                                 | 1,000   | 1,000   | 1,000   | 1,000   | 1,000   | 1,000   | 1,000   | 1,000   | 1,000       |
| 5 years . . .     | 762                                   | 751     | 684     | 614     | 632     | 571     | 783     | 838     | 756     | 747         |
| 10 " . . .        | 736                                   | 724     | 648     | 569     | 591     | 530     | 746     | 803     | 732     | 721         |
| 15 " . . .        | 723                                   | 706     | 632     | 551     | 572     | 514     | 727     | 783     | 718     | 707         |
| 20 " . . .        | 706                                   | 685     | 616     | 532     | 554     | 496     | 711     | 760     | 699     | 689         |
| 25 " . . .        | 685                                   | 657     | 596     | 506     | 531     | 476     | 691     | 733     | 675     | 665         |
| 30 " . . .        | 660                                   | 627     | 571     | 477     | 508     | 457     | 669     | 704     | 648     | 639         |
| 40 " . . .        | 597                                   | 566     | 514     | 423     | 462     | 412     | 621     | 644     | 589     | 578         |
| 50 " . . .        | 516                                   | 499     | 452     | 357     | 407     | 358     | 560     | 585     | 517     | 502         |
| 60 " . . .        | 405                                   | 408     | 351     | 267     | 328     | 292     | 473     | 494     | 419     | 393         |
| 70 " . . .        | 255                                   | 268     | 205     | 150     | 203     | 184     | 330     | 338     | 271     | 231         |
| 80 " . . .        | 96                                    | 104     | 65      | 44      | 65      | 69      | 139     | 161     | 101     | 69          |

The following table distinguishes the sexes in certain countries, but the figures are not so recent as those above :—

| Age               | France |         | Belgium |         | Italy |         | Denmark |         |
|-------------------|--------|---------|---------|---------|-------|---------|---------|---------|
|                   | Males  | Females | Males   | Females | Males | Females | Males   | Females |
| Number born . . . | 1,000  | 1,000   | 1,000   | 1,000   | 1,000 | 1,000   | 1,000   | 1,000   |
| 5 years . . .     | 716    | 744     | 720     | 741     | 590   | 608     | 741     | 769     |
| 10 " . . .        | 693    | 719     | 684     | 699     | 552   | 567     | 711     | 737     |
| 20 " . . .        | 660    | 680     | 640     | 650     | 518   | 528     | 676     | 698     |
| 30 " . . .        | 602    | 626     | 566     | 576     | 466   | 478     | 624     | 650     |
| 40 " . . .        | 543    | 567     | 484     | 499     | 418   | 424     | 569     | 590     |
| 50 " . . .        | 476    | 507     | 403     | 415     | 357   | 368     | 488     | 522     |
| 60 " . . .        | 383    | 425     | 319     | 337     | 279   | 294     | 376     | 429     |
| 70 " . . .        | 245    | 291     | 179     | 221     | 170   | 180     | 238     | 289     |
| 80 " . . .        | 86     | 113     | 60      | 76      | 58    | 62      | 84      | 114     |

Kasper's table of rich and poor shows survivals thus :—

| Age               | Rich  | Poor  |
|-------------------|-------|-------|
| Number born . . . | 1,000 | 1,000 |
| 5 years . . .     | 943   | 655   |
| 20 " . . .        | 886   | 566   |
| 40 " . . .        | 695   | 396   |
| 70 " . . .        | 235   | 65    |

Korösi shows that poverty and overcrowding shorten the span of life at Buda-Pesth : in healthy quarters it is 47 years, in the workmen's tenement dwellings only 32 to 37.

Evidence to the same effect will be found in other parts of this book; the reader has only to turn to the Index for the items *Infant-mortality* and *Overcrowding*.

## UNITED KINGDOM

The Registrar-General's returns show the expectation of life is now about three years longer than for the period of 17 years ending 1854, which is probably due to abolishing the duty on soap and the window-tax, as well as to water supply, drainage, &c.

| Ages      | Persons |         | Male    |         | Female  |         |
|-----------|---------|---------|---------|---------|---------|---------|
|           | 1838-54 | 1876-80 | 1838-54 | 1876-80 | 1838-54 | 1876-80 |
| 0 years . | 40.86   | 43.56   | 39.91   | 41.92   | 41.85   | 45.25   |
| 5 ..      | 50.02   | 52.56   | 49.71   | 51.47   | 50.33   | 53.65   |
| 10 ..     | 47.36   | 49.24   | 47.05   | 48.16   | 47.67   | 50.32   |

## FRANCE

There has been a steady improvement in the span of life, which Duvillard estimated in the last century at 26 years and 2 months, and Lombard at 40 years in 1868. The tables of survivals are as follows :—

| Age         | 1750     | 1789       | 1817-32      | 1856-65   | 1880-82    |
|-------------|----------|------------|--------------|-----------|------------|
|             | St. Maur | Duvil-lard | Mont-ferrand | Bertillon | Stat. Gen. |
| Number born | 1,000    | 1,000      | 1,000        | 1,000     | 1,000      |
| 5 years     | 540      | 583        | 707          | 710       | 751        |
| 10 ..       | 484      | 551        | 668          | 681       | 724        |
| 15 ..       | 472      | 529        | 647          | 664       | 706        |

| 25 ..       | 388      | 438        | 560          | 584       | 627        |
| 30 ..       | 314      | 369        | 510          | 533       | 566        |
| 35 ..       | 242      | 297        | 449          | 473       | 499        |
| 40 ..       | 168      | 213        | 365          | 389       | 408        |
| 45 ..       | 90       | 118        | 229          | 249       | 268        |
| 50 ..       | 23       | 35         | 76           | 89        | 104        |

Levasseur gives a table of 1474 centenarians in 20 years ending 1885, from which it appears that 28 men and 46 women die yearly over 100 years of age.

## RUSSIA

In 1867 the span of life was estimated thus :—

| Among       | Years |         | Among        | Years |         |
|-------------|-------|---------|--------------|-------|---------|
|             | Males | Females |              | Males | Females |
| Greeks      | 22.1  | 23.6    | Jews . . .   | 29.4  | 31.1    |
| Catholics   | 28.0  | 29.7    | Mussulmen.   | 26.5  | 27.1    |
| Protestants | 32.9  | 36.2    | General pop. | 23.0  | 24.6    |

## GERMANY

The German official returns for 11 years, 1871-81, give the following table of survivals :—

Of 1000 Born

| Age      | Males | Females | Age      | Males | Females |
|----------|-------|---------|----------|-------|---------|
| 1 . . .  | 747   | 783     | 30 . . . | 545   | 576     |
| 3 . . .  | 676   | 709     | 40 . . . | 488   | 516     |
| 5 . . .  | 649   | 681     | 50 . . . | 412   | 452     |
| 10 . . . | 621   | 652     | 60 . . . | 311   | 363     |
| 15 . . . | 609   | 639     | 70 . . . | 178   | 219     |
| 20 . . . | 593   | 623     | 80 . . . | 50    | 66      |

## HOLLAND AND SWEDEN

Tables of survivals show a great improvement in both these countries, as compared with former periods :—

| Age        | Holland    |           | Sweden     |         |            |
|------------|------------|-----------|------------|---------|------------|
|            | 1840-51    | 1870-80   | 1757-63    | 1861-70 | 1881-82    |
|            | Baum-hauer | Von Pesch | Var-gentin | Berg    | Stat. Gen. |
| No. born . | 1,000      | 1,000     | 1,000      | 1,000   | 1,000      |
| 10 years . | 644        | 654       | 611        | 737     | 746        |
| 20 ..      | 630        | 620       | 570        | 703     | 711        |
| 30 ..      | 568        | 566       | 519        | 656     | 669        |
| 40 ..      | 502        | 515       | 459        | 593     | 621        |
| 50 ..      | 434        | 494       | 385        | 511     | 560        |
| 60 ..      | 310        | 357       | 293        | 401     | 473        |
| 70 ..      | 182        | 224       | 175        | 246     | 330        |
| 80 ..      | 58         | 76        | 56         | 78      | 139        |

Persons dying over eighty years of age in Sweden formed the following ratio of all deaths :—

| Period            | Per 1000 |
|-------------------|----------|
| 1811-30 . . . . . | 47       |
| 1831-50 . . . . . | 53       |
| 1851-60 . . . . . | 46       |
| 1861-75 . . . . . | 58       |

## LIGHT

It requires 50 lbs. of tallow candles to produce as much light as 1000 cubic feet of gas. Dr. Frankland's table (1866) of the cost of light was as follows :—

|                                       | Cost for Ten Hours of Light |
|---------------------------------------|-----------------------------|
| One gallon paraffin oil . . . . .     | 6 pence                     |
| Equivalent amount of gas . . . . .    | 3 "                         |
| Thirty-three tallow candles . . . . . | 32 "                        |
| Sixteen paraffin " . . . . .          | 46 "                        |
| Twenty sperm " . . . . .              | 84 "                        |
| Twenty-four wax " . . . . .           | 87 "                        |

A light of 100 candle-power, says Mr. Fischer, throws out the following degrees of heat :—

|                            |       |                                 |        |
|----------------------------|-------|---------------------------------|--------|
| Electric, arc . . . . .    | 100   | Petroleum, flat . . . . .       | 7,200  |
| " incandescent . . . . .   | 410   | 100 wax candles . . . . .       | 7,960  |
| Gas, Siemens . . . . .     | 1,500 | 100 stearine candles . . . . .  | 8,940  |
| Petroleum, round . . . . . | 3,360 | Paraffin lamps . . . . .        | 9,200  |
| Gas, argand . . . . .      | 4,860 | 100 tallow candles . . . . .    | 9,700  |
| Colza . . . . .            | 6,800 | Manchester gas-burner . . . . . | 12,150 |

Light travels 185,000 miles per second.

**LIGHTHOUSES**

The number in various countries at different dates was approximately :—

|                             | 1830 | 1860  | 1885  |
|-----------------------------|------|-------|-------|
| England . . . . .           | ...  | 244   | 396   |
| Scotland . . . . .          | ...  | 130   | 193   |
| Ireland . . . . .           | ...  | 90    | 138   |
| United Kingdom . . . . .    | 260  | 464   | 727   |
| France . . . . .            | 63   | 228   | 422   |
| Germany . . . . .           | 20   | 40    | 183   |
| Russia . . . . .            | 18   | 77    | 194   |
| Austria . . . . .           | 5    | 10    | 63    |
| Italy . . . . .             | 10   | 91    | 263   |
| Spain . . . . .             | 11   | 50    | 178   |
| Portugal . . . . .          | 4    | 15    | 30    |
| Sweden and Norway . . . . . | 110  | 120   | 337   |
| Denmark . . . . .           | 70   | 77    | 63    |
| Holland . . . . .           | 10   | 58    | 102   |
| Belgium . . . . .           | 4    | 8     | 25    |
| Greece . . . . .            | ...  | ...   | 58    |
| Turkey . . . . .            | 10   | 15    | 134   |
| Europe . . . . .            | 595  | 1,253 | 2,779 |
| United States . . . . .     | 130  | 379   | 1,991 |
| Canada . . . . .            | 38   | 92    | 651   |
| Australia . . . . .         | 10   | 47    | 343   |
| India . . . . .             | 15   | 49    | 96    |
| China . . . . .             | 2    | 5     | 68    |
| Japan . . . . .             | ...  | ...   | 59    |
| Brazil . . . . .            | 5    | 16    | 57    |
| West Indies . . . . .       | 40   | 74    | 110   |
| Spanish America . . . . .   | 15   | 27    | 54    |
| Total . . . . .             | 850  | 1,942 | 6,208 |

See Sir James Douglas's report to the British Association in 1886. The cost of lighting Smeaton's Eddystone lighthouse in 1759, with a light of 67 candle-power, was

18d. per hour, a sum now sufficient to provide a light of 160,000 candle-power. Canada uses 100,000 gallons of petroleum for lighting yearly, at a cost of £4,000. Dungeness first adopted the electric light in 1862, and the French lighthouses followed in 1863.

**LIGHTNING**

According to Mr. Preece, there are 500,000 lightning conductors in the United Kingdom. The number of houses burnt yearly by lightning in Bavaria was :—

|                   |     |
|-------------------|-----|
| 1833-43 . . . . . | 32  |
| 1880-82 . . . . . | 134 |

The number of persons killed by lightning averages 23 in England, 92 in France, 165 in Germany, 908 in Russia.

**LIVING, COST OF**

The cost of a workman's food in various countries in 1880 was :—

|                         | Shillings per Week |       | Percentage of Food Cost |
|-------------------------|--------------------|-------|-------------------------|
|                         | Food               | Wages |                         |
| Great Britain . . . . . | 14                 | 31    | 45                      |
| France . . . . .        | 12                 | 21    | 57                      |
| Germany . . . . .       | 10                 | 16    | 62                      |
| Belgium . . . . .       | 12                 | 20    | 60                      |
| Italy . . . . .         | 9                  | 15    | 60                      |
| Spain . . . . .         | 10                 | 16    | 62                      |
| United States . . . . . | 16                 | 48    | 33                      |
| Australia . . . . .     | 11                 | 40    | 28                      |

The following table shows approximately the expenditure of the principal nations in the ordinary items that make up the cost of living. Food is at wholesale price in first hands (retail price being 30 per cent. higher), and taxes include all duties, tolls, and rates, direct or indirect, that go towards national or local revenues :—

|                          | Millions £ Yearly |          |            |       |           |             |          |       |
|--------------------------|-------------------|----------|------------|-------|-----------|-------------|----------|-------|
|                          | Food              | Clothing | House Rent | Taxes | Transport | Fodder, &c. | Sundries | Total |
| United Kingdom . . . . . | 372               | 66       | 135        | 119   | 113       | 89          | 242      | 1,136 |
| France . . . . .         | 361               | 64       | 93         | 144   | 96        | 74          | 98       | 930   |
| Germany . . . . .        | 400               | 53       | 68         | 109   | 103       | 87          | 160      | 980   |
| Russia . . . . .         | 360               | 51       | 34         | 72    | 94        | 128         | 190      | 929   |
| Austria . . . . .        | 235               | 30       | 27         | 55    | 59        | 44          | 121      | 571   |
| Italy . . . . .          | 144               | 24       | 22         | 81    | 33        | 22          | 24       | 350   |
| Spain . . . . .          | 112               | 16       | 18         | 37    | 27        | 15          | 50       | 275   |
| Portugal . . . . .       | 24                | 3        | 4          | 8     | 5         | 1           | 8        | 53    |
| Sweden . . . . .         | 37                | 6        | 4          | 7     | 10        | 4           | 30       | 98    |
| Norway . . . . .         | 15                | 2        | 1          | 3     | 4         | 1           | 12       | 38    |
| Denmark . . . . .        | 18                | 3        | 2          | 4     | 6         | 6           | 21       | 60    |
| Holland . . . . .        | 36                | 6        | 7          | 15    | 8         | 7           | 17       | 96    |
| Belgium . . . . .        | 56                | 12       | 6          | 11    | 17        | 12          | 41       | 155   |
| Switzerland . . . . .    | 20                | 3        | 2          | 3     | 5         | 2           | 19       | 54    |
| Europe . . . . .         | 2,190             | 339      | 423        | 668   | 580       | 492         | 1,033    | 5,725 |
| United States . . . . .  | 455               | 98       | 127        | 165   | 231       | 228         | 746      | 2,090 |
| Canada . . . . .         | 32                | 8        | 7          | 10    | 12        | 8           | 40       | 117   |
| Australia . . . . .      | 28                | 7        | 13         | 12    | 10        | 14          | 40       | 124   |
| Argentina . . . . .      | 25                | 6        | 5          | 14    | 8         | 7           | 20       | 85    |
| Total . . . . .          | 2,730             | 458      | 575        | 869   | 841       | 749         | 1,879    | 8,101 |

It is hardly necessary to say that the foregoing table is merely intended to shew comprehensively in round numbers the annual outlay of each nation under the principal headings and in the aggregate. Nothing like mathematical accuracy is to be expected, for it would be impossible. The figures, however, are not set down at random, but are estimates based on the observations of well-known writers and whatever is available in the way of official or semi-official statements. It is true that the cost of food, and indeed the outlay under any of the above heads, is likely to vary remarkably from one year to another, from which some persons may feel disposed to think that the table is of no value whatever. But this is an objection that might be made to many tables of a similar kind, whether in the present work or in those of other writers.

A statement was published in Paris in 1882 of the cost of maintenance of an artisan's family, and another by Miss Octavia Hill of a similar family in London in 1888, viz.:-

|                                | Weekly Expenditure, Pence |        |
|--------------------------------|---------------------------|--------|
|                                | Paris                     | London |
| Rent . . . . .                 | 30                        | 69     |
| Clothing . . . . .             | 24                        | 56     |
| Coal and light . . . . .       | 10                        | 16     |
| Bread . . . . .                | 90                        | 40     |
| Meat . . . . .                 | 63                        | 48     |
| Vegetables and fruit . . . . . | 21                        | 36     |
| Milk, butter, &c. . . . .      | 39                        | 23     |
| Tea and coffee . . . . .       | 14                        | 16     |
| Sugar . . . . .                | 7                         | 10     |
| Wine and liquor . . . . .      | 35                        | 10     |
| Total . . . . .                | £1 7 9                    | £1 7 0 |

The earnings in both cases are supposed to reach 30s. a week. The London artisan has to pay, moreover, 20d. a week to his insurance club: his surplus therefore is only 16d. a week.

The retail prices paid by workmen for food in 1880 were (pence):-

|                        | England | France | Germany | Italy | New York | Chicago |
|------------------------|---------|--------|---------|-------|----------|---------|
| Beef, lb. . . . .      | 10.0    | 9.5    | 9.0     | 8.0   | 6.0      | 4.0     |
| Bread, „ . . . .       | 2.0     | 1.6    | 2.0     | 3.0   | 2.0      | 2.0     |
| Butter, „ . . . .      | 17.0    | 13.0   | 11.0    | 14.0  | 14.0     | 12.0    |
| Eggs, dozen . . . . .  | 11.0    | 9.0    | 10.0    | 9.0   | 14.0     | 9.0     |
| Milk, quart . . . . .  | 4.0     | ...    | 2.0     | 4.0   | 5.0      | 3.0     |
| Sugar, lb. . . . .     | 4.0     | 5.0    | 5.0     | 4.0   | 5.0      | 5.0     |

### GREAT BRITAIN

The cost of living at various epochs, from estimates at the respective dates, is shown thus:-

#### Gentleman's Family in London

|                          | 1792 | 1823 | 1845 | 1883 |
|--------------------------|------|------|------|------|
| Rent . . . . .           | £60  | £90  | £100 | £120 |
| Taxes . . . . .          | 18   | 40   | 30   | 40   |
| Servants (2) . . . . .   | 18   | 24   | 30   | 40   |
| Clothing . . . . .       | 60   | 70   | 80   | 100  |
| Bread . . . . .          | 25   | 26   | 25   | 20   |
| Meat . . . . .           | 25   | 30   | 50   | 80   |
| Groceries . . . . .      | 22   | 35   | 40   | 60   |
| Wines . . . . .          | 23   | 39   | 40   | 40   |
| Dairy . . . . .          | 50   | 70   | 70   | 90   |
| Coal and light . . . . . | 30   | 38   | 30   | 25   |
| Washing . . . . .        | 16   | 22   | 30   | 40   |
| Sundries . . . . .       | 58   | 81   | 95   | 110  |
| Total . . . . .          | 405  | 565  | 620  | 765  |

Family of five persons, besides two servants.

The period between 1792 and 1823 shows a rise of 40 per cent. in 31 years; that from 1845 to 1883 one of 23 per cent. in 38 years.

### Tradesman's Family (Bristol)

|                     | 1792 | 1823 | 1845 | 1883 |
|---------------------|------|------|------|------|
| Rent . . . . .      | £10  | £15  | £18  | £20  |
| Clothing . . . . .  | 10   | 12   | 12   | 15   |
| Bread . . . . .     | 20   | 21   | 20   | 16   |
| Meat . . . . .      | 10   | 14   | 20   | 28   |
| Groceries . . . . . | 10   | 15   | 20   | 22   |
| Sundries . . . . .  | 10   | 13   | 15   | 19   |
| Total . . . . .     | 70   | 90   | 105  | 120  |

### English Labourer and Mechanic

|                          | Labourer |      |      | Mechanic |      |      |
|--------------------------|----------|------|------|----------|------|------|
|                          | 1792     | 1823 | 1883 | 1792     | 1823 | 1883 |
| Bread, meat, &c. . . . . | £16      | £17  | £20  | £18      | £20  | £22  |
| Groceries . . . . .      | 2        | 3    | 5    | 4        | 6    | 8    |
| Rent . . . . .           | 2        | 3    | 4    | 3        | 4    | 6    |
| Clothing, &c. . . . .    | 7        | 8    | 8    | 17       | 22   | 24   |
| Total . . . . .          | 27       | 31   | 37   | 42       | 52   | 60   |

In 1881 Professor Leone Levi estimated the annual expenditure of the people of the United Kingdom thus:-

|                                   | Quantity  | £           | Per Inhabitant |
|-----------------------------------|-----------|-------------|----------------|
| Meat, tons . . . . .              | 1,400,000 | 99,800,000  | £ 5 17 0       |
| Fish, „ . . . .                   | 300,000   | 14,500,000  | 0 8 2          |
| Sugar, „ . . . .                  | 1,000,000 | 27,000,000  | 0 15 4         |
| Potatoes, tons . . . . .          | 4,600,000 | 32,200,000  | 0 18 3         |
| Bread, „ . . . .                  | 6,300,000 | 77,500,000  | 2 4 0          |
| Butter and cheese, tons . . . . . | 350,000   | 36,000,000  | 1 0 6          |
| Milk and eggs . . . . .           | ...       | 42,000,000  | 1 4 0          |
| Fruit and vegetables . . . . .    | ...       | 28,100,000  | 0 16 0         |
| Tea and coffee . . . . .          | ...       | 18,300,000  | 0 10 0         |
| Wine and liquor . . . . .         | ...       | 124,000,000 | 3 11 0         |
| Food . . . . .                    | ...       | 499,400,000 | 14 4 9         |
| House-rent . . . . .              | ...       | 77,000,000  | 2 4 0          |
| Coal and light . . . . .          | ...       | 28,700,000  | 0 16 0         |
| Taxes . . . . .                   | ...       | 47,500,000  | 1 7 0          |
| Textiles and clothing . . . . .   | ...       | 142,800,000 | 4 2 0          |
| Science and books . . . . .       | ...       | 12,000,000  | 0 7 0          |
| Amusements . . . . .              | ...       | 12,600,000  | 0 7 4          |
| Education . . . . .               | ...       | 11,000,000  | 0 6 6          |
| Tobacco . . . . .                 | ...       | 13,100,000  | 0 7 8          |
| Furniture and plate . . . . .     | ...       | 16,000,000  | 0 9 0          |
| Churches . . . . .                | ...       | 12,000,000  | 0 7 0          |
| Water-supply . . . . .            | ...       | 5,900,000   | 0 3 6          |
| Total . . . . .                   | ...       | 878,000,000 | 25 1 9         |

### FRANCE

The cost of maintaining a small family of the middle class has been at various dates as follows:-

| Year           | Per Annum, £ |       |
|----------------|--------------|-------|
|                | France       | Paris |
| 1789 . . . . . | 15           | 29    |
| 1840 . . . . . | 19           | 48    |
| 1860 . . . . . | 44           | 114   |
| 1880 . . . . . | 51           | 135   |

In the seventeenth century the maintenance of a noble family cost £600 per annum, but 10 francs at that time contained as much silver as 19 at present, and £600 was therefore in reality £1100, irrespective of the superior purchasing power at that period. In 1679 Madame de Maintenon writes to her sister, whose family consisted of

her husband, herself, seven male and three female servants, "You can live like a princess on £600 a year," viz.:-

|                    | House Expenses |                    | Per Annum |
|--------------------|----------------|--------------------|-----------|
| Meat . . . . .     | £44            | Food, &c. . . . .  | £240      |
| Bread . . . . .    | 20             | Rent . . . . .     | 40        |
| Wine . . . . .     | 20             | Wages . . . . .    | 40        |
| Butter . . . . .   | 36             | Opera, &c. . . . . | 120       |
| Sundries . . . . . | 120            | Dress, &c. . . . . | 160       |
| Total . . . . .    | 240            | Total . . . . .    | 600       |

The expenditure of the population of Paris in 1826 was:-

|                           | Per Inhabitant | Amount     |
|---------------------------|----------------|------------|
|                           | £ s. d.        | £          |
| Food . . . . .            | 14 2 0         | 12,350,000 |
| Taxes . . . . .           | 5 9 0          | 4,760,000  |
| Rent . . . . .            | 4 11 3         | 4,000,000  |
| Clothing . . . . .        | 2 16 5         | 2,470,000  |
| Furniture . . . . .       | 2 14 6         | 2,400,000  |
| Fuel and light . . . . .  | 2 14 0         | 2,380,000  |
| Servants . . . . .        | 1 16 8         | 1,610,000  |
| Cabs and horses . . . . . | 1 15 6         | 1,540,000  |
| Instruction . . . . .     | 1 11 3         | 1,370,000  |
| Washing . . . . .         | 1 8 9          | 1,260,000  |
| Sundries . . . . .        | 1 9 5          | 1,290,000  |
| Total . . . . .           | 40 8 9         | 35,430,000 |

The chief items of food were:-

|                         | Per Inhabitant | £ s. d. |
|-------------------------|----------------|---------|
| Bread, lbs. . . . .     | 400            | 2 12 5  |
| Wine, gallons . . . . . | 25             | 3 2 0   |
| Meat, lbs. . . . .      | 165            | 3 19 0  |
| Dairy . . . . .         | ...            | 1 0 6   |
| Sugar, lbs. . . . .     | 26             | 1 0 0   |
| Sundries . . . . .      | ...            | 2 8 0   |
| Total . . . . .         | ...            | 14 2 0  |

The Industrial Committee of Mulhouse reported that of every 100 francs earned by a workman, 20 went for bread, 15 for groceries, 18 for milk, &c., 8 for meat, 15 for rent, and 16 for clothes, leaving 8 francs for sundries.

#### GERMANY

In 1850 the annual maintenance of a peasant family of five persons in Prussia cost as follows:-

|                          | £ s. d. |
|--------------------------|---------|
| Food . . . . .           | 16 0 0  |
| Clothing . . . . .       | 5 8 0   |
| Rent . . . . .           | 2 14 0  |
| Coal and light . . . . . | 2 14 0  |
| Taxes . . . . .          | 1 5 0   |
| Sundries . . . . .       | 3 9 0   |
| Total . . . . .          | 31 10 0 |

Engel estimates the annual cost of maintenance for a peasant family in Germany thus:-

|                                  | £  |
|----------------------------------|----|
| Man . . . . .                    | 19 |
| Wife . . . . .                   | 16 |
| Three children . . . . .         | 21 |
| Family of five persons . . . . . | 56 |

He considers that a child of 10 years represents an outlay of £80, a youth of 15 one of £140.

Roth estimates that a child of 10 has cost £132, and one of 13 no less than £186.

Engel's figures are preferable.

The students of Heidelberg University in 1871 were able to maintain themselves at an average outlay of £31

per annum, but this rose to £58 in 1875, and to £69 in 1878.

#### RUSSIA

The income and expenditure of a fisherman's family yearly is as follows:-

| Income                   | £ s. d. | Expenditure          | £ s. d. |
|--------------------------|---------|----------------------|---------|
| Game, 200 lbs. . . . .   | 2 10 0  | Rye, 1 ton . . . . . | 7 0 0   |
| Caviar, 200 lbs. . . . . | 2 10 0  | Taxes . . . . .      | 2 6 0   |
| Fish . . . . .           | 5 0 0   | Clothing . . . . .   | 2 10 0  |
| Woodcutting . . . . .    | 2 10 0  | Sundries . . . . .   | 0 14 0  |
| Total . . . . .          | 12 10 0 | Total . . . . .      | 12 10 0 |

As regards the income and expenditure of the ordinary Moujik or peasant, Strebinski writes as follows: "The surplus grain which he has for sale brings him in £10 sterling, which goes thus:-

|                    | £ s. d. |
|--------------------|---------|
| Rent . . . . .     | 3 12 0  |
| Taxes . . . . .    | 0 16 0  |
| Clothing . . . . . | 2 10 0  |
| Sundries . . . . . | 3 2 0   |
| Total . . . . .    | 10 0 0  |

"His agricultural capital is (exclusive of cattle) about £33 sterling, viz.:-

|                             | £ s. d. |
|-----------------------------|---------|
| House . . . . .             | 18 0 0  |
| Barn . . . . .              | 7 0 0   |
| Carts and harness . . . . . | 3 0 0   |
| Implements, &c. . . . .     | 5 8 0   |
| Total . . . . .             | 33 8 0  |

#### ITALY

The Piedmontese peasant, who earns 18s. a week, spends 13s. on food; the labourer of the island of Sardinia earns only 9s., and spends 7s. on food, viz.:-

|                    | Piedmont, Pence Weekly | Island of Sardinia, Pence Weekly |
|--------------------|------------------------|----------------------------------|
| Bread . . . . .    | 16                     | 20                               |
| Meat . . . . .     | 42                     | 5                                |
| Wine . . . . .     | 40                     | 6                                |
| Sundries . . . . . | 58                     | 47                               |
| Total . . . . .    | 156                    | 84                               |

#### LOCAL TAXATION

The amount annually levied by local authorities in taxes, tolls, &c., was approximately in the various countries as follows, 1886-87:-

|                          | £          |                         | £          |
|--------------------------|------------|-------------------------|------------|
| England . . . . .        | 38,010,000 | Russia . . . . .        | 11,200,000 |
| Scotland . . . . .       | 4,440,000  | Austria . . . . .       | 5,300,000  |
| Ireland . . . . .        | 3,330,000  | Italy . . . . .         | 27,200,000 |
| United Kingdom . . . . . | 45,780,000 | Holland . . . . .       | 2,100,000  |
| France . . . . .         | 40,800,000 | Belgium . . . . .       | 2,250,000  |
| Germany . . . . .        | 44,000,000 | United States . . . . . | 84,200,000 |

Local taxation of the United Kingdom and France compare as follows:-

| Year           | United Kingdom, £ | France, £  | Shillings per Inhab. |        |
|----------------|-------------------|------------|----------------------|--------|
|                |                   |            | United Kingdom       | France |

Schools and police in Ireland, as well as other items, are defrayed out of the Imperial Treasury at a cost of £3,015,000, of which £1,600,000 are for police and £900,000 for schools, bringing up all local expenditure in Ireland to £7,100,000.

Local taxation in England and Wales was as follows :—

| Year       | £         | Year       | £          |
|------------|-----------|------------|------------|
| 1688 . . . | 780,000   | 1840 . . . | 8,020,000  |
| 1730 . . . | 1,380,000 | 1850 . . . | 8,910,000  |
| 1770 . . . | 1,690,000 | 1862 . . . | 12,210,000 |
| 1790 . . . | 2,420,000 | 1868 . . . | 16,100,000 |
| 1803 . . . | 5,350,000 | 1880 . . . | 31,060,000 |
| 1813 . . . | 8,650,000 | 1886 . . . | 37,300,000 |

The expenditure in England and Wales for support of the poor was as follows:—

| Period            | Annual Average, £ | Rental Valuation, £* | Poor-Rate per £, Pence | Poor-Rate per Inhab., Pence |
|-------------------|-------------------|----------------------|------------------------|-----------------------------|
| 1702-14 . . . . . | 910,000           | 14,200,000           | 16                     | 41                          |
| 1760-75 . . . . . | 1,520,000         | 24,900,000           | 15                     | 58                          |
| 1783-93 . . . . . | 2,050,000         | 30,300,000           | 16                     | 66                          |
| 1803 . . . . .    | 4,080,000         | 35,100,000           | 27                     | 107                         |
| 1815 . . . . .    | 6,100,000         | 53,800,000           | 27                     | 133                         |
| 1816-20 . . . . . | 7,310,000         | 58,200,000           | 30                     | 152                         |
| 1830-35 . . . . . | 6,742,000         | 75,900,000           | 22                     | 116                         |
| 1842-50 . . . . . | 5,290,000         | 90,400,000           | 14                     | 74                          |
| 1851-60 . . . . . | 5,510,000         | 109,600,000          | 12                     | 69                          |
| 1861-70 . . . . . | 6,740,000         | 134,300,000          | 12                     | 77                          |
| 1871-80 . . . . . | 7,710,000         | 167,200,000          | 11                     | 75                          |
| 1880 . . . . .    | 8,015,000         | 191,150,000          | 10                     | 74                          |

The above shows only the rates expended on the poor, but the poor-rate often rose 50 per cent. higher, as it

\* This table must not be confused with poor-law assessment, which was always less; for instance, in 1880 the assessed gross rental was only £158,000,000, and the taxable rental £134,000,000.

included police and other items. The valuation included many items of real estate not liable to poor-rate, and in 1880 was made up thus:—

|                       |              |
|-----------------------|--------------|
| Houses . . . . .      | £ 96,500,000 |
| Lands . . . . .       | 51,700,000   |
| Railways . . . . .    | 24,500,000   |
| Mines . . . . .       | 10,300,000   |
| Gasworks, &c. . . . . | 8,150,000    |

Total . . . . . £ 191,150,000

Local debts in Great Britain in 1880 were as follows:—

|                    |              |
|--------------------|--------------|
| Sanitary . . . . . | £ 56,700,000 |
| Docks . . . . .    | 23,200,000   |
| Sundry . . . . .   | 57,000,000   |
| Scotch . . . . .   | 16,300,000   |

Total . . . . . £ 153,200,000

In 1888 the local debts were known to exceed 200 millions sterling. Those of England and Wales rose as follows:—

| Year           | London, £  | Provinces, £ | Total, £    |
|----------------|------------|--------------|-------------|
| 1882 . . . . . | 32,200,000 | 119,500,000  | 151,700,000 |
| 1885 . . . . . | 35,900,000 | 137,300,000  | 173,200,000 |
| 1888 . . . . . | 39,700,000 | 152,500,000  | 192,200,000 |

## FRANCE

The local taxes at various dates stood thus:—

|                         | 1806      | 1837      | 1864       | 1882       | 1888       |
|-------------------------|-----------|-----------|------------|------------|------------|
| Paris . . . . .         | £ 736,000 | 2,760,000 | 5,370,000  | 9,805,000  | 10,200,000 |
| Thirty cities . . . . . | 490,000   | 1,490,000 | 2,460,000  | 4,230,000  | 30,600,000 |
| Communes . . . . .      | 800,000   | 4,030,000 | 12,300,000 | 18,405,000 |            |
| Total . . . . .         | 2,026,000 | 8,290,000 | 20,130,000 | 32,440,000 | 40,800,000 |

The following statement of Octroi for all France was published in 1886:—

| Year           | Towns Taxed | Amount, £ |           |           |         |           |            |
|----------------|-------------|-----------|-----------|-----------|---------|-----------|------------|
|                |             | Liquor    | Food      | Fuel      | Fodder  | Sundries  | Total      |
| 1831 . . . . . | 1,467       | 880,000   | 700,000   | 300,000   | 120,000 | 200,000   | 2,200,000  |
| 1840 . . . . . | 1,435       | 1,280,000 | 880,000   | 400,000   | 160,000 | 380,000   | 3,100,000  |
| 1850 . . . . . | 1,436       | 1,680,000 | 1,150,000 | 450,000   | 200,000 | 320,000   | 3,800,000  |
| 1860 . . . . . | 1,460       | 2,300,000 | 1,640,000 | 700,000   | 300,000 | 860,000   | 5,800,000  |
| 1870 . . . . . | 1,516       | 3,200,000 | 1,800,000 | 650,000   | 300,000 | 750,000   | 6,700,000  |
| 1880 . . . . . | 1,541       | 4,900,000 | 3,000,000 | 1,200,000 | 600,000 | 1,340,000 | 11,040,000 |
| 1885 . . . . . | 1,529       | 4,900,000 | 3,100,000 | 1,300,000 | 600,000 | 1,150,000 | 11,050,000 |

Octroi is the principal municipal tax, and presses most heavily on the working-classes, as it augments the cost of food, fuel, and other necessities. In sixty years this tax increased five-fold, while the population of the cities so taxed had only doubled, the ratio per inhabitant being now 20 shillings yearly as compared with 8 shillings in 1823. The following table shows the aggregate amount collected for Octroi in French towns at various dates:—

| Year           | Amount, £  | Population Taxed | Per Inhab., Shillings |
|----------------|------------|------------------|-----------------------|
| 1823 . . . . . | 2,470,000  | 5,998,000        | 8                     |
| 1833 . . . . . | 2,640,000  | 6,306,000        | 8                     |
| 1843 . . . . . | 3,302,000  | 7,297,000        | 9                     |
| 1853 . . . . . | 3,617,000  | 7,330,000        | 10                    |
| 1863 . . . . . | 6,298,000  | 9,582,000        | 13                    |
| 1873 . . . . . | 8,451,000  | 10,517,000       | 16                    |
| 1880 . . . . . | 11,040,000 | 11,255,000       | 20                    |

The Octroi of Paris contributes one-half of the total, that is, it is equal to the aggregate of all other French

cities. It was at various dates as follows:—

| Year           | Amount, £ | Population | Per Head, Shillings |
|----------------|-----------|------------|---------------------|
| 1801 . . . . . | 441,000   | 553,000    | 16                  |
| 1821 . . . . . | 1,040,000 | 724,000    | 29                  |
| 1845 . . . . . | 1,370,000 | 986,000    | 28                  |
| 1867 . . . . . | 4,030,000 | 1,732,000  | 46                  |
| 1880 . . . . . | 5,640,000 | 2,180,000  | 52                  |
| 1889 . . . . . | 6,030,000 | 2,400,000  | 50                  |

In all French cities this tax has grown faster than population. The figures of all four cities in 1880 compare with 1867 thus:—

|                      | Octroi, £ |           | Shillings per Inhab. |      |
|----------------------|-----------|-----------|----------------------|------|
|                      | 1867      | 1880      | 1867                 | 1880 |
| Paris . . . . .      | 4,030,000 | 5,640,000 | 46                   | 52   |
| Marseilles . . . . . | 307,000   | 490,000   | 21                   | 28   |
| Lyons . . . . .      | 244,000   | 480,000   | 16                   | 25   |
| Rouen . . . . .      | 102,000   | 155,000   | 21                   | 29   |

The aggregate population of the 1529 towns and cities is 12,000,000, and the amount paid in Octroi in 1885 showed thus :—

|                        | Amount, £         | Pence per Head |
|------------------------|-------------------|----------------|
| Fine . . . . .         | 2,840,000         | 57             |
| Leibol, &c. . . . .    | 1,000,000         | 20             |
| Al . . . . .           | 240,000           | 5              |
| Food . . . . .         | 3,100,000         | 62             |
| Fuel . . . . .         | 1,300,000         | 26             |
| Odder . . . . .        | 600,000           | 12             |
| Tricks, &c. . . . .    | 1,000,000         | 20             |
| Sundries . . . . .     | 970,000           | 20             |
| <b>Total . . . . .</b> | <b>11,050,000</b> | <b>212</b>     |

The above is for all, including Paris; but the Octroi of Paris was much above the average, namely, 60 francs or 18s. per head, the average for the other 1528 towns being 14 francs or 11s. per head.

## GERMANY

Local expenditure in Prussia was as follows :—

|                            | 1869              | 1876              |
|----------------------------|-------------------|-------------------|
| Schools . . . . .          | £ 1,900,000       | £ 3,500,000       |
| Streets . . . . .          | 1,700,000         | 3,000,000         |
| Interest on debt . . . . . | 2,500,000         | 4,800,000         |
| Poor . . . . .             | 2,300,000         | 2,700,000         |
| Police, &c. . . . .        | 3,400,000         | 5,900,000         |
| <b>Total . . . . .</b>     | <b>11,800,000</b> | <b>19,900,000</b> |

Municipal expenditure in 1876 at Berlin, Breslau, and Cologne was as follows :—

|                            | Berlin           | Breslau        | Cologne        |
|----------------------------|------------------|----------------|----------------|
| Schools . . . . .          | £ 230,000        | £ 55,000       | £ 32,000       |
| Streets . . . . .          | 400,000          | 27,000         | 10,000         |
| Interest on debt . . . . . | 300,000          | 80,000         | 70,000         |
| Poor . . . . .             | 270,000          | 13,000         | 25,000         |
| Police, &c. . . . .        | 420,000          | 65,000         | 23,000         |
| <b>Total . . . . .</b>     | <b>1,620,000</b> | <b>240,000</b> | <b>160,000</b> |

The average municipal expenditure was as follows :—

| Year           | Shillings per Inhabitant |         |         |           |
|----------------|--------------------------|---------|---------|-----------|
|                | Berlin                   | Breslau | Cologne | Frankfort |
| 1869 . . . . . | 15                       | 11      | 12      | 18        |
| 1876 . . . . . | 27                       | 18      | 21      | 20        |

All local taxation in Germany may be estimated at 18s. per inhabitant, say 44 millions sterling.

## AUSTRIA-HUNGARY

The municipal finances of Prague in 1884 showed :—

| Receipts, £            | Expenses, £                     |
|------------------------|---------------------------------|
| House-tax . . . . .    | Water supply . . . . .          |
| Tolls . . . . .        | Schools and hospitals . . . . . |
| Sundries . . . . .     | Sundries . . . . .              |
| <b>Total . . . . .</b> | <b>Total . . . . .</b>          |

## BELGIUM

The district finances in 1887 showed thus :—

| Receipts, £             | Expenditure, £         |
|-------------------------|------------------------|
| Tobacco, &c. . . . .    | Schools . . . . .      |
| Dog-tax . . . . .       | Roads . . . . .        |
| Sundries . . . . .      | Sundries . . . . .     |
| State subsidy . . . . . |                        |
| <b>Total . . . . .</b>  | <b>Total . . . . .</b> |

The above does not include city finances. Those of Brussels in 1884 showed :—

| Receipts, £                    | Expenses, £            |
|--------------------------------|------------------------|
| Gas and water rates . . . . .  | Schools . . . . .      |
| Municipal properties . . . . . | Debt . . . . .         |
| Tolls . . . . .                | Police, &c. . . . .    |
| Sundries . . . . .             | Sundries . . . . .     |
| <b>Total . . . . .</b>         | <b>Total . . . . .</b> |

## ITALY

Local taxation, according to official returns, showed thus :—

| Year           | £          | Shillings per Inhabitant |
|----------------|------------|--------------------------|
| 1867 . . . . . | 12,900,000 | 10.0                     |
| 1877 . . . . . | 20,100,000 | 15.0                     |
| 1885 . . . . . | 27,200,000 | 18.0                     |

The average per inhabitant, distinguishing urban from rural communes, was as follows :—

| Year           | Shillings per Inhabitant |       |
|----------------|--------------------------|-------|
|                | Urban                    | Rural |
| 1867 . . . . . | 18                       | 6     |
| 1877 . . . . . | 27                       | 9     |

Urban taxes in 1877 comprised: Octroi, £5,100,000; legacy dues, £1,700,000; sundries, £5,200,000; making a total of £12,000,000.

The average Octroi per head in 1877 was :—

## Shillings per Inhabitant

|                  |    |                   |    |                    |    |
|------------------|----|-------------------|----|--------------------|----|
| Naples . . . . . | 12 | Milan . . . . .   | 14 | Rome . . . . .     | 22 |
| Turin . . . . .  | 12 | Palermo . . . . . | 16 | Florence . . . . . | 24 |
| Venice . . . . . | 14 | Leghorn . . . . . | 16 | Genoa . . . . .    | 26 |

Local debts in 1885 amounted to £41,500,000 sterling.

## UNITED STATES

The taxes in the several States for local purposes (not municipal) were in 1889 as follows :—

|                           | Tax, £            | Population in 1890 | Shillings per Head |
|---------------------------|-------------------|--------------------|--------------------|
| New England . . . . .     | 1,660,000         | 4,690,000          | 7.0                |
| Middle States . . . . .   | 4,060,000         | 14,110,000         | 5.9                |
| Southern States . . . . . | 3,640,000         | 18,280,000         | 4.0                |
| Western States . . . . .  | 5,740,000         | 25,400,000         | 4.5                |
| <b>Total . . . . .</b>    | <b>15,200,000</b> | <b>62,480,000</b>  | <b>4.9</b>         |

In some of the principal States the taxes were in 1889 thus :—

|                         | Tax, £            | Population        | Shillings per Head |
|-------------------------|-------------------|-------------------|--------------------|
| New York . . . . .      | 1,900,000         | 5,980,000         | 6.2                |
| Pennsylvania . . . . .  | 1,740,000         | 5,250,000         | 6.7                |
| Massachusetts . . . . . | 1,050,000         | 2,230,000         | 9.6                |
| Ohio . . . . .          | 1,040,000         | 3,670,000         | 5.7                |
| Illinois . . . . .      | 780,000           | 3,820,000         | 4.1                |
| Kentucky . . . . .      | 780,000           | 1,850,000         | 8.4                |
| Various . . . . .       | 7,910,000         | 39,680,000        | 4.0                |
| <b>Total . . . . .</b>  | <b>15,200,000</b> | <b>62,480,000</b> | <b>4.9</b>         |

Municipal taxes ranged ordinarily from 2 to 3 per cent. on all assessed properties, making up a total of about 37 millions sterling, or £3 per inhabitant yearly. These added to state taxes made up altogether £52,200,000 of local taxation, or 17s. per head of the total population. Compared with 1860 we find :—

| Year           | Local Taxes, £ | Population | Shillings per Head |
|----------------|----------------|------------|--------------------|
| 1860 . . . . . | 19,600,000     | 31,400,000 | 13                 |
| 1889 . . . . . | 52,200,000     | 62,480,000 | 17                 |

The aggregate of state and municipal debts at various dates was as follows :—

|                       | 1850       | 1870        | 1880        | £ per Inhabitant |      |      |
|-----------------------|------------|-------------|-------------|------------------|------|------|
|                       |            |             |             | 1850             | 1870 | 1880 |
| New York . . . .      | 4,800,000  | 29,100,000  | 45,500,000  | 1.6              | 6.5  | 9.0  |
| Pennsylvania . . . .  | 8,800,000  | 16,900,000  | 22,100,000  | 3.9              | 4.5  | 5.1  |
| Massachusetts . . . . | 1,200,000  | 12,700,000  | 19,000,000  | 1.2              | 8.0  | 10.5 |
| Maryland . . . . .    | 3,100,000  | 5,400,000   | 2,300,000   | 5.3              | 7.0  | 2.4  |
| Virginia . . . . .    | 2,900,000  | 10,200,000  | 9,000,000   | 2.1              | 6.0  | 4.3  |
| Ohio . . . . .        | 3,300,000  | 4,000,000   | 10,200,000  | 1.7              | 1.5  | 3.3  |
| Various . . . . .     | 15,800,000 | 80,600,000  | 109,500,000 | 1.3              | 3.3  | 3.3  |
| Total . . . . .       | 39,900,000 | 158,200,000 | 217,600,000 | 1.8              | 4.1  | 4.3  |

The local debts of 1880 were made up thus :—

|                       | State      | City, &c.   | Total       |
|-----------------------|------------|-------------|-------------|
|                       | £          | £           | £           |
| New York . . . .      | 1,600,000  | 43,900,000  | 45,500,000  |
| Pennsylvania . . . .  | 2,600,000  | 19,500,000  | 22,100,000  |
| Massachusetts . . . . | 4,200,000  | 14,800,000  | 19,000,000  |
| Maryland . . . . .    | 1,600,000  | 700,000     | 2,300,000   |
| Virginia . . . . .    | 6,100,000  | 2,900,000   | 9,000,000   |
| Ohio . . . . .        | 1,200,000  | 9,000,000   | 10,200,000  |
| Missouri . . . . .    | 3,400,000  | 8,400,000   | 11,800,000  |
| New Jersey . . . . .  | 100,000    | 10,200,000  | 10,300,000  |
| Louisiana . . . . .   | 4,900,000  | 4,100,000   | 9,000,000   |
| Illinois . . . . .    | ...        | 9,400,000   | 9,400,000   |
| Tennessee . . . . .   | 5,700,000  | 2,100,000   | 7,800,000   |
| Various . . . . .     | 15,700,000 | 45,500,000  | 61,200,000  |
| Total . . . . .       | 47,100,000 | 170,500,000 | 217,600,000 |

The amount of state debt, exclusive of city and county debts, in 1888 was as follows :—

|                        | Debt, £    | Shillings per Inhabitant |
|------------------------|------------|--------------------------|
| New York . . . . .     | 1,400,000  | 5.0                      |
| Pennsylvania . . . .   | 3,100,000  | 12.0                     |
| Massachusetts . . . .  | 6,500,000  | 3.1                      |
| Virginia . . . . .     | 6,400,000  | 3.0                      |
| Tennessee . . . . .    | 3,600,000  | 2.0                      |
| Louisiana . . . . .    | 2,500,000  | 2.1                      |
| North Carolina . . . . | 3,000,000  | 1.8                      |
| Various . . . . .      | 19,700,000 | 10.0                     |
| Total . . . . .        | 46,200,000 | 15.0                     |

In 1883 the public debt of 138 cities and towns summed up 99 millions sterling.

## LONDON

In 1885 London had 555,000 houses, with 4,120,000 inhabitants, covering an area of 117 square miles or 75,000 acres, that is 56 persons per acre. There were 400,000 foot-passengers and 80,000 vehicles passing daily over the bridges, and 370,000 passengers in the Underground Railway. There were 1830 miles of streets, and 2300 miles of sewers, the latter ranging from 1 foot to 12 feet in diameter. The sewage reservoirs (12 miles below London) discharged 150 million gallons daily into the Thames at ebb-tide. Water supply was 140 million gallons daily, or 34 per inhabitant, for which the companies charged £1,500,000, or 1½d. (1.60) per ton. Gas consumption amounted to 20 milliards of cubic feet, at 3s. per 1000 feet, say £3,000,000 per annum, consuming

2 millions tons coal, and conveyed by 2500 miles of pipes some 4 feet in diameter. Fire-brigade had 58 engines, 124 escapes, 580 firemen, costing £100,000 per annum, and using 17 million gallons water. Police, 13,000 men, or 1 in 316 inhabitants. Parks, 42, covering 4490 acres. Markets, 14, covering 15 acres; the meat consumption including 330,000 oxen, 2,100,000 sheep, and amounting altogether to 210,000 tons per annum. There are 220 deaths and 360 births daily, being a natural increase of 140 persons, but the increase of population averages 200 daily, the difference being caused by immigration. Of all deaths, 21 per cent. occur in hospital, and almost 4 per cent. (3.7) are violent deaths, say ten daily. There are 5550 coroners' inquests yearly, and 3580 persons killed or wounded by cabs. About 120 adults are missing every year, and 50 dead bodies are not identified. The number of stray dogs taken up is 29,500 per annum. The foreign trade of London, that is, imports and exports, exceeds 200 millions sterling per annum. There are 11,000 cabs and 2000 omnibuses, which carry 78 million passengers yearly. The growth of the Metropolis has been as follows :—

| Year         | Population | Houses  | Miles of Streets | Valuation, £ |
|--------------|------------|---------|------------------|--------------|
| 1801 . . . . | 959,000    | 130,000 | 470              | 3,700,000    |
| 1821 . . . . | 1,379,000  | 170,000 | 610              | 5,300,000    |
| 1841 . . . . | 1,948,000  | 256,000 | 905              | 9,600,000    |
| 1861 . . . . | 2,804,000  | 369,000 | 1,290            | 16,800,000   |
| 1885 . . . . | 4,120,000  | 555,000 | 1,830            | 35,600,000   |

Municipal expenditure in 1881 was £11,000,000, and debt £21,000,000. Paris, with half the population, spends the same amount yearly, and has a debt of £90,000,000 sterling. The rental valuation of London in 1888 was £38,100,000.

## LOTTERIES

The Spanish lottery gave a net profit of £403,000 in 1882.

The Italian and Austrian lotteries produced as follows :—

|                  | Italy      |            | Austria    |            |
|------------------|------------|------------|------------|------------|
|                  | 1868       | 1877       | 1868       | 1877       |
| Receipts . . . . | £2,420,000 | £2,705,000 | £1,380,000 | £2,172,000 |
| Expenses . . . . | 1,670,000  | 1,713,000  | 850,000    | 1,100,000  |
| Profit . . . . . | 750,000    | 992,000    | 530,000    | 1,072,000  |

## M.

## MACHINERY

The following examples show the economy of labour resulting from machinery:—

1. Arkwright's spinning-jenny enabled one operative in 1815 to produce as much yarn as 200 could a few years before.

2. The crane of Cologne Cathedral in 1870, with two men, did the same work in one hour, in lifting stone, as required 60 men to work 12 hours in the Middle Ages; that is, one man now is equal to 180 of the olden time.

3. The American boot-making machine enables one man to turn out 300 pair of boots daily; one factory near Boston makes as many boots as 32,000 bootmakers in Paris. In 1880 there were 3100 of these machines at work, producing 150 million pair of boots yearly.

4. Altmann's American reaper cuts and binds grain at 45 minutes per acre. D. Glynn of California cuts, threshes, winnows, and bags with each of his machines 60 acres of grain daily.

5. The United States in 1888 produced 600,000 sewing-machines, which could do the work of 7,200,000 women.

6. In the Western States of America one man can raise as much wheat as will feed 1000 persons for 12 months; a second can thresh, winnow, and bag it, and a third convey it to market.

7. A girl 12 years of age in a Lancashire mill can turn out 35 yards of printed calico daily, her work in one year sufficing to clothe yearly 1200 persons in the East.

The export of machinery from Great Britain is large. In 1888 Russia took 300 steam-threshers and 250 portable steam-engines.

The Trade Returns show the value of British machinery exported thus:—

|                |             |                |             |
|----------------|-------------|----------------|-------------|
| 1853 . . . . . | £ 2,000,000 | 1870 . . . . . | £ 5,300,000 |
| 1860 . . . . . | 3,800,000   | 1888 . . . . . | 13,000,000  |

## MAIZE

The crop of 1887 was stated thus:—

|                         | Acres       | Bushels       |
|-------------------------|-------------|---------------|
| France . . . . .        | 1,480,000   | 26,000,000    |
| Russia . . . . .        | 1,360,000   | 13,000,000    |
| Austria . . . . .       | 5,410,000   | 90,000,000    |
| Italy . . . . .         | 4,680,000   | 75,000,000    |
| Spain . . . . .         | 2,000,000   | 40,000,000    |
| Portugal . . . . .      | 200,000     | 4,000,000     |
| Roumania, &c. . . . .   | 2,000,000   | 40,000,000    |
| Europe . . . . .        | 27,130,000  | 288,000,000   |
| United States . . . . . | 72,390,000  | 1,412,000,000 |
| Canada . . . . .        | 180,000     | 9,000,000     |
| Australia . . . . .     | 250,000     | 7,000,000     |
| Egypt . . . . .         | 680,000     | 10,000,000    |
| Algeria . . . . .       | 400,000     | 10,000,000    |
| Argentina . . . . .     | 1,700,000   | 17,000,000    |
| Total . . . . .         | 102,730,000 | 1,753,000,000 |

The United States crop in 1888 reached 1988 million bushels, or 49,700,000 tons. Spallart estimated the crop for the whole world thus:—

| Year              | Millions of Bushels |
|-------------------|---------------------|
| 1871-80 . . . . . | 1,528               |
| 1883-84 . . . . . | 2,035               |
| 1887 . . . . .    | 1,479               |

## MANUFACTURES

The following table shows approximately the value of all manufactures in 1888:—

|                       | Million £ Sterling Yearly |           |          |                  |         |          |       | Per Inhabitant, £ |
|-----------------------|---------------------------|-----------|----------|------------------|---------|----------|-------|-------------------|
|                       | Textiles                  | Hard-ware | Clothing | Beer and Spirits | Leather | Sundries | Total |                   |
| U. Kingdom            | 170                       | 155       | 66       | 75               | 42      | 312      | 820   | 21.5              |
| France . . . . .      | 108                       | 42        | 64       | 21               | 52      | 198      | 485   | 12.7              |
| Germany . . . . .     | 82                        | 91        | 53       | 71               | 53      | 233      | 583   | 12.3              |
| Russia . . . . .      | 52                        | 14        | 51       | 20               | 51      | 175      | 363   | 4.3               |
| Austria . . . . .     | 36                        | 15        | 30       | 23               | 39      | 110      | 253   | 5.1               |
| Italy . . . . .       | 21                        | 4         | 24       | 4                | 17      | 51       | 121   | 4.1               |
| Spain . . . . .       | 16                        | 4         | 16       | 1                | 12      | 36       | 85    | 5.0               |
| Portugal . . . . .    | 2                         | 1         | 3        | ...              | 3       | 7        | 16    | 3.6               |
| Sweden . . . . .      | 2                         | 6         | 6        | 6                | 8       | 22       | 50    | 10.5              |

| Total . . . . .     | 480                 | 650  | 865  | 1,314 | 2,404 | 4,618 |

**Hardware.**—The hardware manufactures of the world may be approximately summed up thus:—

|                   | Millions £ Sterling |       |        |      |     |      |       |
|-------------------|---------------------|-------|--------|------|-----|------|-------|
|                   | Iron                | Steel | Copper | Lead | Tin | Zinc | Total |
| U. Kingdom        | 50                  | 84    | 10     | 3    | 5   | 3    | 155   |
| France . . . . .  | 20                  | 16    | 3      | 1    | 1   | 1    | 42    |
| Germany . . . . . | 40                  | 38    | 3      | 3    | 1   | 6    | 91    |
| Russia . . . . .  | 5                   | 7     | 1      | 1    | ... | ...  | 14    |
| Austria . . . . . | 6                   | 8     | ...    | 1    | ... | ...  | 15    |
| Italy . . . . .   | 3                   | 1     | ...    | ...  | ... | ...  | 4     |
| Spain . . . . .   | 3                   | 1     | ...    | ...  | ... | ...  | 4     |
| Sweden . . . . .  | 4                   | 2     | ...    | ...  | ... | ...  | 6     |
| Belgium . . . . . | 8                   | 6     | 1      | 1    | 1   | 1    | 17    |
| United States     | 72                  | 95    | 14     | 7    | 4   | 2    | 194   |
| Various . . . . . | 17                  | 20    | 3      | 1    | 1   | 1    | 43    |
| Total . . . . .   | 228                 | 278   | 35     | 18   | 13  | 13   | 585   |

For details regarding the above metals, see each under its own title. The total value of hardware manufactures at various dates was approximately as follows:—

| Year       | Millions £ Sterling |        |         |        |         |       |       |        |         |           |         | Total |
|------------|---------------------|--------|---------|--------|---------|-------|-------|--------|---------|-----------|---------|-------|
|            | U. Kingdom          | France | Germany | Russia | Austria | Italy | Spain | Sweden | Belgium | U. States | Various |       |
| 1780 . . . | 15                  | 8      | 3       | 2      | 2       | 1     | 1     | 1      | ...     | 2         | 2       | 37    |
| 1800 . . . | 20                  | 9      | 4       | 3      | 3       | 1     | 1     | 1      | ...     | 3         | 3       | 48    |
| 1820 . . . | 30                  | 10     | 6       | 4      | 4       | 2     | 2     | 2      | ...     | 7         | 5       | 72    |
| 1840 . . . | 40                  | 12     | 7       | 5      | 5       | 2     | 2     | 3      | 2       | 10        | 7       | 95    |
| 1860 . . . | 85                  | 30     | 40      | 11     | 12      | 3     | 3     | 4      | 9       | 29        | 17      | 245   |
| 1888 . . . | 155                 | 42     | 91      | 14     | 15      | 4     | 4     | 6      | 17      | 194       | 43      | 585   |

The production of the principal metals at various dates was approximately as follows:—

| Year       | Tons       |         |         |        |         |            |
|------------|------------|---------|---------|--------|---------|------------|
|            | Iron       | Copper  | Lead    | Tin    | Zinc    | Total      |
| 1780 . . . | 270,000    | 6,000   | 50,000  | 2,000  | 2,000   | 330,000    |
| 1800 . . . | 460,000    | 8,000   | 60,000  | 3,000  | 3,000   | 534,000    |
| 1820 . . . | 1,010,000  | 10,000  | 70,000  | 4,000  | 3,000   | 1,097,000  |
| 1840 . . . | 2,680,000  | 25,000  | 120,000 | 6,000  | 12,000  | 2,843,000  |
| 1860 . . . | 7,180,000  | 70,000  | 220,000 | 8,000  | 65,000  | 7,543,000  |
| 1888 . . . | 24,800,000 | 190,000 | 410,000 | 35,000 | 240,000 | 25,675,000 |

It appears that the production of metals has multiplied fifty-fold since 1800.

*Textile Manufactures.*—The consumption of fibre by all nations has been approximately as follows:—

| Year   | Millions of Lbs. |       |       |      |       |      |        |
|--------|------------------|-------|-------|------|-------|------|--------|
|        | Cotton           | Wool  | Flax  | Hemp | Jute  | Silk | Total  |
| 1780 . | 220              | 440   | 500   | 350  | ...   | 30   | 1,540  |
| 1800 . | 303              | 460   | 600   | 400  | ...   | 30   | 1,793  |
| 1820 . | 402              | 520   | 700   | 450  | ...   | 33   | 2,105  |
| 1840 . | 1,210            | 604   | 800   | 500  | ...   | 35   | 3,239  |
| 1850 . | 1,335            | 886   | 900   | 600  | 60    | 37   | 3,818  |
| 1860 . | 2,451            | 1,074 | 925   | 700  | 130   | 40   | 5,320  |
| 1870 . | 2,675            | 1,579 | 1,200 | 750  | 410   | 42   | 6,655  |
| 1880 . | 3,501            | 1,915 | 1,120 | 820  | 900   | 45   | 8,301  |
| 1887 . | 4,433            | 2,242 | 1,230 | 880  | 1,310 | 50   | 10,145 |

Reducing to tons the total weight of fibre consumed in 100 years down to 1880, we find it was approximately as follows:—

|           |       | Tons Aggregate |            |            |            |           |           |             |
|-----------|-------|----------------|------------|------------|------------|-----------|-----------|-------------|
|           |       | Cotton         | Wool       | Flax       | Hemp       | Jute      | Silk      | Total       |
| 1781-1800 | . . . | 2,200,000      | 4,100,000  | 4,900,000  | 3,400,000  | ...       | 270,000   | 14,870,000  |
| 1801-20   | . . . | 2,500,000      | 4,400,000  | 5,800,000  | 3,800,000  | ...       | 270,000   | 16,770,000  |
| 1821-40   | . . . | 4,560,000      | 5,500,000  | 6,700,000  | 4,200,000  | ...       | 300,000   | 21,260,000  |
| 1841-50   | . . . | 5,220,000      | 3,600,000  | 3,700,000  | 2,500,000  | 200,000   | 160,000   | 15,380,000  |
| 1851-60   | . . . | 8,260,000      | 4,400,000  | 4,100,000  | 2,900,000  | 600,000   | 170,000   | 20,430,000  |
| 1861-70   | . . . | 8,190,000      | 5,900,000  | 4,800,000  | 3,200,000  | 2,000,000 | 170,000   | 24,260,000  |
| 1871-80   | . . . | 12,860,000     | 7,700,000  | 5,200,000  | 3,400,000  | 3,500,000 | 180,000   | 32,840,000  |
| 100 years | . . . | 43,790,000     | 35,600,000 | 35,200,000 | 23,400,000 | 6,300,000 | 1,520,000 | 145,810,000 |

The total output of textile manufactures in 107 years was approximately as follows:—

| Period          | Millions £ Sterling |         |         |         |         |         |         |         |         |           |        |
|-----------------|---------------------|---------|---------|---------|---------|---------|---------|---------|---------|-----------|--------|
|                 | U. Kingdom          | France  | Germany | Russia  | Austria | Italy   | Spain   | Belgium | Various | U. States | Total  |
| 1781-1800 . . . | 620                 | 480     | 160     | 70      | 100     | 50      | 90      | ...     | 110     | 50        | 1,730  |
| 1801-20 . . .   | 980                 | 680     | 210     | 90      | 140     | 70      | 120     | ...     | 160     | 80        | 2,530  |

| Other countries . . . . . | 73                  | 26       | 25    | 6      | 6             | 136   |
| Total . . . . .           | 279                 | 207      | 96    | 53     | 43            | 678   |

#### UNITED KINGDOM

The value of British manufactures, that is, of the gross annual product, without deducting raw material or anything else, has been estimated as follows at various epochs:—

| Year              | Millions £ | Writers              |
|-------------------|------------|----------------------|
| 1783 . . . . .    | 57         | M'Pherson            |
| 1803-10 . . . . . | 105        | Eden, Stevenson, &c. |
| 1835 . . . . .    | 149        | Lavergne             |
| 1850 . . . . .    | 180        | Poole                |
| 1888 . . . . .    | 820        | Mulhall              |

The earlier estimates were too low, as they omitted beer, flour, clothing, and other large items.

If we study the consumption of raw material, and the prices current at the several periods, we may construct the following approximate table:—

|                           | Millions £ Sterling |      |      |      |      |
|---------------------------|---------------------|------|------|------|------|
|                           | 1780                | 1810 | 1840 | 1860 | 1888 |
| Woollens . . . . .        | 17                  | 18   | 22   | 34   | 43   |
| Cottons . . . . .         | 2                   | 20   | 48   | 81   | 101  |
| Linens, jute, &c. . . . . | 4                   | 13   | 13   | 16   | 20   |
| Silks . . . . .           | 3                   | 5    | 9    | 12   | 6    |
| Leather . . . . .         | 11                  | 14   | 18   | 30   | 42   |
| Clothing . . . . .        | 20                  | 30   | 40   | 55   | 66   |
| Liquor and food . . . . . | 55                  | 60   | 87   | 94   | 116  |
| Hardware . . . . .        | 15                  | 25   | 40   | 85   | 155  |
| Furniture . . . . .       | 5                   | 7    | 10   | 15   | 20   |
| Printing . . . . .        | 1                   | 2    | 3    | 9    | 16   |
| Sundries . . . . .        | 44                  | 66   | 97   | 146  | 235  |
| Total . . . . .           | 177                 | 260  | 387  | 577  | 820  |

The textile manufactures have been greatly developed in the present century, the consumption of fibre in the United Kingdom showing thus:—

| Year           | Millions of Lbs. Weight |      |      |      |      | Total |
|----------------|-------------------------|------|------|------|------|-------|
|                | Cotton                  | Wool | Flax | Hemp | Jute |       |
| 1801 . . . . . | 54                      | 117  | 48   | 82   | ...  | 301   |
| 1810 . . . . . | 114                     | 123  | 60   | 107  | ...  | 404   |
| 1820 . . . . . | 123                     | 125  | 87   | 95   | ...  | 430   |
| 1830 . . . . . | 246                     | 150  | 138  | 59   | ...  | 593   |
| 1840 . . . . . | 448                     | 173  | 210  | 67   | ...  | 898   |
| 1850 . . . . . | 565                     | 185  | 240  | 122  | 42   | 1,163 |
| 1860 . . . . . | 1,140                   | 234  | 228  | 78   | 86   | 1,766 |
| 1870 . . . . . | 1,101                   | 309  | 291  | 160  | 324  | 2,185 |
| 1880 . . . . . | 1,404                   | 338  | 227  | 165  | 404  | 2,538 |
| 1887 . . . . . | 1,499                   | 378  | 190  | 196  | 494  | 2,757 |

The following table shows the approximate value of all British and Irish textile industries during the past 100 years at various dates :—

| Year | Millions £ Sterling |          |        |       |           |       |
|------|---------------------|----------|--------|-------|-----------|-------|
|      | Cottons             | Woollens | Linens | Silks | Jute, &c. | Total |
| 1780 | 2                   | 17       | 2      | 3     | 2         | 26    |
| 1800 | 8                   | 18       | 4      | 4     | 2         | 36    |
| 1810 | 20                  | 18       | 5      | 5     | 8         | 56    |
| 1820 | 33                  | 19       | 6      | 7     | 2         | 67    |
| 1830 | 39                  | 20       | 8      | 8     | 2         | 77    |
| 1840 | 48                  | 22       | 11     | 9     | 2         | 92    |
| 1850 | 49                  | 28       | 13     | 12    | 6         | 108   |
| 1860 | 81                  | 34       | 12     | 12    | 4         | 143   |
| 1870 | 91                  | 48       | 14     | 9     | 12        | 174   |
| 1880 | 105                 | 48       | 12     | 7     | 12        | 184   |
| 1887 | 101                 | 43       | 9      | 6     | 11        | 170   |

The total consumption of fibre, excluding silk, in the factories during forty-five years, down to 1885, was as follows :—

|                 | Tons       |            |            |
|-----------------|------------|------------|------------|
|                 | 1841-70    | 1871-85    | Total      |
| Cotton . . . .  | 9,650,000  | 8,950,000  | 18,600,000 |
| Wool . . . .    | 3,150,000  | 2,430,000  | 5,580,000  |
| Flax and hemp . | 4,600,000  | 2,700,000  | 7,300,000  |
| Jute . . . .    | 1,300,000  | 2,700,000  | 4,000,000  |
| Total . . . .   | 18,700,000 | 16,780,000 | 35,480,000 |

The output of stuffs and cloths in English statute miles was approximately as follows :—

|                  | 1841-70           | 1871-85           | Total             |
|------------------|-------------------|-------------------|-------------------|
|                  | Millions of Yards | Millions of Yards | Millions of Yards |
| Cottons . . . .  | 43,750,000        | 45,620,000        | 89,370,000        |
| Woollens . . . . | 3,420,000         | 2,860,000         | 6,280,000         |
| Linens . . . .   | 5,460,000         | 2,500,000         | 7,960,000         |
| Jute . . . .     | 1,700,000         | 2,100,000         | 3,800,000         |
| Total . . . .    | 54,330,000        | 53,080,000        | 107,410,000       |

The output of fifteen years ending 1885 was almost equal to that of thirty years ending 1870.

In the following table are shown the cost of fibre, and value of the manufactures :—

| Period           | Millions £ Sterling |              |            |
|------------------|---------------------|--------------|------------|
|                  | Raw Fibre           | Manufactures | Net Result |
| 1841-50 . . . .  | 341                 | 970          | 629        |
| 1851-60 . . . .  | 494                 | 1,265        | 771        |
| 1861-70 . . . .  | 716                 | 1,546        | 830        |
| 1871-80 . . . .  | 686                 | 1,872        | 1,186      |
| 1881-87 . . . .  | 425                 | 1,218        | 793        |
| 47 years . . . . | 2,662               | 6,871        | 4,209      |

|                | Millions £ Sterling |              |            |
|----------------|---------------------|--------------|------------|
|                | Raw fibre           | Manufactures | Net Result |
| Cotton . . . . | 1,425               | 3,726        | 2,301      |
| Wool . . . .   | 603                 | 1,768        | 1,165      |
| Silk . . . .   | 236                 | 435          | 199        |
| Flax . . . .   | 240                 | 572          | 332        |
| Hemp, jute . . | 158                 | 370          | 212        |
| Total . . . .  | 2,662               | 6,871        | 4,209      |

The annual product of each operative, as well in the

gross as the net result, after deducting cost of raw material, are shown as follows :—

|                 | Gross, £ | Net, £ |
|-----------------|----------|--------|
| Cotton . . . .  | 178      | 101    |
| Woollen . . . . | 155      | 108    |
| Linens . . . .  | 95       | 60     |
| Jute . . . .    | 230      | 154    |
| Silk . . . .    | 161      | 99     |

In the preceding tables, the value of manufactures includes not only stuffs, but also yarns exported to other countries.

The export of yarn showed thus :—

| Year         | Millions of Lbs. Yarn |         |        |      |       |
|--------------|-----------------------|---------|--------|------|-------|
|              | Cotton                | Woollen | Linens | Jute | Total |
| 1841 . . . . | 119                   | 4       | 18     | ...  | 141   |
| 1851 . . . . | 144                   | 14      | 19     | ...  | 177   |
| 1861 . . . . | 178                   | 28      | 26     | 2    | 234   |
| 1871 . . . . | 194                   | 44      | 36     | 14   | 288   |
| 1885 . . . . | 246                   | 44      | 17     | 31   | 338   |
| 1889 . . . . | 252                   | 45      | 14     | 34   | 345   |

|          | Aggregate in Tons Yarn |         |         |         |           |
|----------|------------------------|---------|---------|---------|-----------|
|          | Cotton                 | Woollen | Linens  | Jute    | Total     |
| 1841-50  | 580,000                | 40,000  | 80,000  | ...     | 700,000   |
| 1851-60  | 710,000                | 90,000  | 100,000 | ...     | 900,000   |
| 1861-70  | 830,000                | 160,000 | 135,000 | 40,000  | 1,165,000 |
| 1871-80  | 990,000                | 180,000 | 120,000 | 70,000  | 1,360,000 |
| 1881-89  | 1,010,000              | 175,000 | 70,000  | 105,000 | 1,360,000 |
| 49 years | 4,120,000              | 645,000 | 505,000 | 215,000 | 5,485,000 |

The following table shows the consumption of fibre in the United Kingdom, and in the whole world in 1840 and 1887.

|                | 1840             |           | 1887             |           |
|----------------|------------------|-----------|------------------|-----------|
|                | Millions of Lbs. |           | Millions of Lbs. |           |
|                | United Kingdom   | The World | United Kingdom   | The World |
| Cotton . . . . | 448              | 1,210     | 1,499            | 4,433     |
| Wool . . . .   | 173              | 694       | 378              | 2,242     |
| Flax . . . .   | 210              | 800       | 190              | 1,230     |
| Hemp . . . .   | 67               | 500       | 196              | 880       |
| Jute . . . .   | ...              | ...       | 494              | 1,310     |
| Total . . . .  | 898              | 3,204     | 2,757            | 10,095    |

In 1840 the United Kingdom consumed 28 per cent., and in 1887 27½ per cent. of all the fibre in the world. As regards iron, leather, timber, &c., details of these industries will be found under their respective titles.

The gross value of British manufactures has increased in far greater ratio than the number of hands employed, as we see by comparing the Factory Returns, and Booth's Digest of the Censuses, with the approximate values already stated, viz. :—

| Year         | Engaged in Manufactures |           |           | Manu-<br>factures,<br>Millions £ | Value<br>per Oper-<br>ative, £ |
|--------------|-------------------------|-----------|-----------|----------------------------------|--------------------------------|
|              | In Mills                | Artisans  | Total     |                                  |                                |
| 1840 . . . . | 424,000                 | 2,713,000 | 3,137,000 | 400                              | 127                            |
| 1860 . . . . | 776,000                 | 3,388,000 | 4,164,000 | 583                              | 140                            |
| 1888 . . . . | 1,034,000               | 3,501,000 | 4,535,000 | 820                              | 181                            |

Owing to machinery, two workpeople can now produce manufactures to the same value as three could in 1841; but if the volume, instead of the value of merchandise were considered, we should find that two now produce more than five did fifty years ago.

In 1835 the textile factories had 355,000 hands :—

|                | Cotton  | Woollen | Silk   | Flax, &c. | Total   |
|----------------|---------|---------|--------|-----------|---------|
| England . . .  | 183,000 | 66,000  | 30,000 | 16,000    | 295,000 |
| Scotland . . . | 33,000  | 3,000   | 1,000  | 13,000    | 50,000  |
| Ireland . . .  | 4,000   | 2,000   | ...    | 4,000     | 10,000  |
| U. Kingdom     | 220,000 | 71,000  | 31,000 | 33,000    | 355,000 |
| Males . . .    | 101,000 | 37,000  | 10,000 | 10,000    | 158,000 |
| Females . . .  | 119,000 | 34,000  | 21,000 | 23,000    | 197,000 |
| Total . . .    | 220,000 | 71,000  | 31,000 | 33,000    | 355,000 |

In 1885 the factories had 1,034,000 hands, as follows :—

|                     | Men     | Women   | Children | Total     |
|---------------------|---------|---------|----------|-----------|
| England . . .       | 301,000 | 437,000 | 76,000   | 814,000   |
| Scotland . . .      | 41,000  | 101,000 | 10,000   | 152,000   |
| Ireland . . .       | 19,000  | 44,000  | 5,000    | 68,000    |
| United Kingdom      | 361,000 | 582,000 | 91,000   | 1,034,000 |
| Cotton . . .        | 172,000 | 282,000 | 50,000   | 504,000   |
| Woollen . . .       | 113,000 | 146,000 | 23,000   | 282,000   |
| Flax and hemp . . . | 33,000  | 80,000  | 9,000    | 122,000   |
| Jute . . .          | 11,000  | 26,000  | 5,000    | 42,000    |
| Silk . . .          | 12,000  | 28,000  | 3,000    | 43,000    |
| Hosiery, &c. . .    | 20,000  | 20,000  | 1,000    | 41,000    |
| Total . . .         | 361,000 | 582,000 | 91,000   | 1,034,000 |

The value of hardware manufactures may be estimated approximately as follows :—

|                                | Tons      | Value, £    |
|--------------------------------|-----------|-------------|
| Pig iron exported . . .        | 1,200,000 | 3,000,000   |
| Iron wares, home use . . .     | 1,800,000 | 27,000,000  |
| Steel exported . . .           | 300,000   | 3,000,000   |
| Steel, home manufactures . . . | 2,700,000 | 81,000,000  |
| Iron wares exported . . .      | 2,000,000 | 20,000,000  |
| Lead manufactures . . .        | 100,000   | 3,000,000   |
| Copper . . .                   | 100,000   | 10,000,000  |
| Tin . . .                      | 20,000    | 5,000,000   |
| Zinc . . .                     | 70,000    | 2,800,000   |
| Total . . .                    | ...       | 154,800,000 |

#### FRANCE

The value of manufactures produced annually has been preceding years thus :—

| Year           | Millions £ Sterling | Writer  |
|----------------|---------------------|---------|
| 1788 . . . . . | 37                  | Tolosan |
| 1819 . . . . . | 73                  | Chaptal |
| 1835 . . . . . | 158                 | ...     |
| 1878 . . . . . | 390                 | Kolb    |
| 1888 . . . . . | 485                 | Mulhall |

Several items seem to have been omitted in the early estimates. The following is an approximate table :—

|                    | Millions £ Sterling |      |      |      |
|--------------------|---------------------|------|------|------|
|                    | 1788                | 1835 | 1888 | 1888 |
| Textiles . . . . . | 21                  | 47   | 96   | 108  |
| Hardware . . . . . | 8                   | 10   | 31   | 42   |
| Food . . . . .     | 52                  | 82   | 112  | 114  |
| Clothing . . . . . | 22                  | 44   | 56   | 64   |
| Leather . . . . .  | 20                  | 24   | 40   | 52   |
| Sundries . . . . . | 24                  | 57   | 92   | 105  |
| Total . . . . .    | 147                 | 264  | 427  | 485  |

The tables of Tolosan and Chaptal showed as follows :—

|                     | 1788       | 1819       |
|---------------------|------------|------------|
| Textiles . . . . .  | 17,400,000 | 27,000,000 |
| Hardware . . . . .  | 1,400,000  | 8,400,000  |
| Jewellery . . . . . | 4,500,000  | 5,000,000  |
| Skins . . . . .     | 2,600,000  | 5,700,000  |
| Sundries . . . . .  | 11,300,000 | 26,700,000 |
| Total . . . . .     | 37,200,000 | 72,800,000 |

The following estimate of French manufactures was published in 1835 :—

|                                 | Number | Value, £    |
|---------------------------------|--------|-------------|
| Mills . . . . .                 | 82,900 | 49,800,000  |
| Factories . . . . .             | 38,300 | 76,600,000  |
| Foundries . . . . .             | 4,425  | 10,600,000  |
| Steam-engines . . . . .         | 1,448  | 2,900,000   |
| Workshops and waggons . . . . . | ...    | 17,700,000  |
| Total . . . . .                 | ...    | 157,600,000 |

| Product, £         | Balance-sheet, £                         |
|--------------------|------------------------------------------|
| Silks . . . . .    | Raw material . . . . . 56,100,000        |
| Woollens . . . . . | Wages . . . . . 60,800,000               |
| Cottons . . . . .  | Wear and tear . . . . . 20,900,000       |
| Linens . . . . .   | Interest on capital . . . . . 13,100,000 |
| Iron . . . . .     | Net profit . . . . . 6,700,000           |
| Sundries . . . . . |                                          |
| Total . . . . .    | 157,600,000                              |

An incomplete official report in 1854 showed the following averages for seven previous years :—

|                    | Factories | Engines | Operatives | Manufactures, £ |
|--------------------|-----------|---------|------------|-----------------|
| Textiles . . . . . | 12,858    | 934     | 695,000    | 65,600,000      |
| Food . . . . .     | 41,762    | 429     | 136,000    | 62,800,000      |
| Sundries . . . . . | 4,687     | 426     | 118,000    | 9,800,000       |
| Total . . . . .    | 59,307    | 1,789   | 949,000    | 138,200,000     |

Another report in 1866 gave the average for five preceding years thus :—

|                    | Factories | Engines | Operatives | Manufactures, £ |
|--------------------|-----------|---------|------------|-----------------|
| Textiles . . . . . | 12,480    | 777     | 685,000    | 93,300,000      |
| Food . . . . .     | 52,845    | 2,131   | 174,000    | 112,100,000     |
| Sundries . . . . . | 8,553     | 1,369   | 179,000    | 22,200,000      |
| Total . . . . .    | 73,878    | 4,277   | 1,038,000  | 227,600,000     |

Kolb mentions a report in 1878 showing 123,000 factories employing 1,783,000 operatives, turning out products to the value of 390 millions sterling per annum, of which textiles stood for 105 millions sterling.

Respecting these factories we find :—

| Worked by       | Number | Horse-Power |
|-----------------|--------|-------------|
| Steam . . . . . | 16,500 | 220,000     |
| Water . . . . . | 52,700 | 298,000     |
| Wind . . . . .  | 11,300 | 40,000      |
| Total . . . . . | 80,500 | 558,000     |

The *Statesman's Year-Book* for 1890 gives the following :—

|                  | Factories | Operatives | Horse-Power | Spindles  | Power-Looms | Hand-Looms |
|------------------|-----------|------------|-------------|-----------|-------------|------------|
| Cotton . . . . . | 1,000     | 119,000    | 62,400      | 5,100,000 | 72,000      | 30,000     |
| Wool . . . . .   | 1,926     | 115,000    | 42,800      | 3,300,000 | 46,000      | 28,000     |
| Silk . . . . .   | 1,172     | 110,000    | ...         | 1,100,000 | 51,000      | 56,000     |
| Total . . . . .  | 4,098     | 344,000    | 105,200     | 9,500,000 | 169,000     | 114,000    |

There are also 365 flax, hemp, and jute factories, consuming 310,000 tons fibre yearly.

In 1875 an estimate of French manufactures was published, differing but slightly from the figures given by Kolb; it was as follows :—

|                               | Hands     | Product, £  |
|-------------------------------|-----------|-------------|
| Textiles . . . . .            | 770,000   | 137,000,000 |
| Flour-mills . . . . .         | 120,000   | 80,000,000  |
| Clothing . . . . .            | 156,000   | 52,000,000  |
| Leather . . . . .             | 300,000   | 36,000,000  |
| Metals and minerals . . . . . | 330,000   | 36,000,000  |
| Soap, candles, &c. . . . .    | 100,000   | 30,000,000  |
| Sugar, beer, &c. . . . .      | 70,000    | 26,000,000  |
| Fancy goods . . . . .         | 90,000    | 19,000,000  |
| Total . . . . .               | 1,936,000 | 416,000,000 |

The value of textile manufactures was approximately as follows, in millions £ sterling :—

|                     | 1810 | 1840 | 1860 | 1880 |
|---------------------|------|------|------|------|
| Woollens . . . . .  | 16   | 17   | 31   | 45   |
| Cottons . . . . .   | 4    | 12   | 16   | 16   |
| Silks . . . . .     | 5    | 9    | 24   | 29   |
| Linens, &c. . . . . | 7    | 12   | 14   | 17   |
| Total . . . . .     | 32   | 50   | 85   | 107  |

The balance-sheet of textile industries for forty-seven years, ending 1887, may be summed up thus :—

|                    | Millions £ |              |             |
|--------------------|------------|--------------|-------------|
|                    | Fibre      | Manufactures | Net Product |
| Silk . . . . .     | 569        | 1,132        | 563         |
| Cotton . . . . .   | 305        | 771          | 466         |
| Wool . . . . .     | 478        | 1,368        | 890         |
| Flax, &c. . . . .  | 288        | 678          | 390         |
| Total . . . . .    | 1,640      | 3,949        | 2,309       |
| 1841-50 . . . . .  | 268        | 634          | 366         |
| 1851-60 . . . . .  | 319        | 740          | 421         |
| 1861-70 . . . . .  | 434        | 958          | 524         |
| 1871-80 . . . . .  | 379        | 945          | 566         |
| 1881-87 . . . . .  | 240        | 672          | 432         |
| 47 years . . . . . | 1,640      | 3,949        | 2,309       |

Production and consumption in 1887 compared thus :—

|                    | Millions £ |             |
|--------------------|------------|-------------|
|                    | Production | Consumption |
| Cottons . . . . .  | 19         | 18          |
| Woollens . . . . . | 46         | 31          |
| Silks . . . . .    | 29         | 22          |
| Linens . . . . .   | 9          | 6           |
| Sundries . . . . . | 5          | 4           |
| Total . . . . .    | 108        | 81          |

The metallic industries may be estimated approximately thus :—

|                   | Tons Consumed | Value of Product, £ |
|-------------------|---------------|---------------------|
| Steel . . . . .   | 530,000       | 15,900,000          |
| Iron . . . . .    | 1,300,000     | 19,500,000          |
| Copper . . . . .  | 35,000        | 3,500,000           |
| Lead, &c. . . . . | ...           | 3,100,000           |
| Total . . . . .   | ...           | 42,000,000          |

#### GERMANY

In 1805 the manufactures of Prussia were estimated by Oddy as follows :—

|                        |           |                         |           |
|------------------------|-----------|-------------------------|-----------|
| Woollens . . . . .     | 1,700,000 | Hardware . . . . .      | 1,300,000 |
| Linens . . . . .       | 1,800,000 | Furniture . . . . .     | 1,000,000 |
| Silks . . . . .        | 700,000   | Leather . . . . .       | 400,000   |
| Cottons . . . . .      | 500,000   | Sundry . . . . .        | 300,000   |
| All textiles . . . . . | 4,700,000 | Miscellaneous . . . . . | 2,900,000 |

This made a grand total of only £7,600,000, but it omitted beer, food, clothing, and other large items. In 1843 the following estimate, likewise for Prussia, was published :—

|                    |            |                   |           |
|--------------------|------------|-------------------|-----------|
| Cottons . . . . .  | 5,000,000  | Linens . . . . .  | 2,800,000 |
| Woollens . . . . . | 17,400,000 | Tobacco . . . . . | 2,400,000 |
| Silks . . . . .    | 3,600,000  | Beer, &c. . . . . | 4,800,000 |

This summed up 36 millions sterling, but was also very defective.

The Census returns show the number of hands employed in manufactures in 1846 was 842,000, and in 1861 amounted to 1,093,000. That of 1869 for all Germany was as follows :—

|                        | Factory Hands | Artisans  | Total     | Number of Factories |
|------------------------|---------------|-----------|-----------|---------------------|
| Prussia . . . . .      | 680,000       | 1,794,000 | 2,474,000 | 79,529              |
| Hanover . . . . .      | 46,000        | 170,000   | 216,000   | 6,949               |
| Bavaria . . . . .      | 164,000       | 512,000   | 676,000   | 37,997              |
| Saxony . . . . .       | 214,000       | 413,000   | 627,000   | 11,357              |
| Wurtemberg . . . . .   | 86,000        | 235,000   | 321,000   | 19,231              |
| Baden . . . . .        | 63,000        | 156,000   | 219,000   | 6,764               |
| Small States . . . . . | 168,000       | 500,000   | 668,000   | 28,803              |
| Total . . . . .        | 1,421,000     | 3,780,000 | 5,201,000 | 190,600             |

The hands and horse-power in 1880 were as follows :—

|                     | Hands     | Horse-Power |
|---------------------|-----------|-------------|
| Textiles . . . . .  | 910,000   | 391,000     |
| Clothing . . . . .  | 1,260,000 | 21,000      |
| Food . . . . .      | 744,000   | 176,000     |
| Wood . . . . .      | 470,000   | 52,000      |
| Machinery . . . . . | 356,000   | 195,000     |
| Metals . . . . .    | 460,000   | 106,000     |
| Building . . . . .  | 534,000   | 22,000      |
| Sundries . . . . .  | 983,000   | 320,000     |
| Total . . . . .     | 5,717,000 | 1,283,000   |

The Census of 1880 gave the following tables :—

|                    | Hands Engaged in Factories |         |           | Manufacturing Population         |
|--------------------|----------------------------|---------|-----------|----------------------------------|
|                    | Males                      | Females | Total     |                                  |
| Textiles . . . . . | 195,000                    | 190,000 | 385,000   | Prussia . . . . . 9,394,000      |
| Hardware . . . . . | 312,000                    | 15,000  | 327,000   | Bavaria . . . . . 1,492,000      |
| Food . . . . .     | 219,000                    | 46,000  | 265,000   | Saxony . . . . . 1,696,000       |
| Printing . . . . . | 29,000                     | 7,000   | 36,000    | Wurtemberg . . . . . 674,000     |
| Various . . . . .  | 444,000                    | 70,000  | 514,000   | Small States . . . . . 2,802,000 |
| Total . . . . .    | 1,199,000                  | 328,000 | 1,527,000 | Total . . . . . 16,058,000       |

In 1876 Engel found 28,985 factories had steam-power with an aggregate of 888,000 horse-power.

The number of persons engaged in certain industries in 1880 was as follows :—

|                        | Textiles | Iron    | Machinery | Leather | Wood    | Paper   |
|------------------------|----------|---------|-----------|---------|---------|---------|
| Prussia . . . . .      | 452,000  | 201,000 | 194,000   | 67,000  | 243,000 | 49,000  |
| Bavaria . . . . .      | 65,000   | 37,000  | 18,000    | 11,000  | 57,000  | 8,000   |
| Saxony . . . . .       | 166,000  | 27,000  | 42,000    | 9,000   | 41,000  | 18,000  |
| Wurtemberg . . . . .   | 36,000   | 18,000  | 17,000    | 7,000   | 26,000  | 6,000   |
| Small States . . . . . | 191,000  | 101,000 | 83,000    | 28,000  | 103,000 | 20,000  |
| Total . . . . .        | 910,000  | 384,000 | 354,000   | 122,000 | 470,000 | 101,000 |

The production and consumption of textile goods in Germany in 1887 represented approximately the following values :—

|                    | Millions £ Sterling |             | Spindles in Factories |
|--------------------|---------------------|-------------|-----------------------|
|                    | Manufacture         | Consumption |                       |
| Cottons . . . . .  | 23                  | 20          | 4,900,000             |
| Woolens . . . . .  | 35                  | 25          | 2,000,000             |
| Linsens . . . . .  | 7                   |             | 300,000               |
| Silks . . . . .    | 15                  | 7           | 900,000               |
| Sundries . . . . . | 2                   | 2           | 100,000               |
| Total . . . . .    | 82                  | 60          | 8,200,000             |

The following table gives approximately the value of all textiles manufactured at various dates, in millions £ sterling :—

|                      | 1810 | 1840 | 1860 | 1880 | 1887 |
|----------------------|------|------|------|------|------|
| Woolens . . . . .    | 3    | 8    | 16   | 28   | 35   |
| Cottons . . . . .    | 1    | 5    | 9    | 20   | 23   |
| Silks . . . . .      | 1    | 2    | 4    | 11   | 15   |
| Linsens, &c. . . . . | 4    | 6    | 8    | 9    | 9    |
| Total . . . . .      | 9    | 21   | 37   | 68   | 82   |

The balance-sheet of textile industries for 47 years to 1887 may be summed up thus :—

|                    | Millions £ Sterling |              |             |
|--------------------|---------------------|--------------|-------------|
|                    | Fibre               | Manufactures | Net Product |
| Cotton . . . . .   | 303                 | 727          | 424         |
| Wool . . . . .     | 329                 | 948          | 619         |
| Silk . . . . .     | 132                 | 280          | 148         |
| Flax, &c. . . . .  | 158                 | 372          | 214         |
| Total . . . . .    | 922                 | 2,327        | 1,405       |
| 1841-50 . . . . .  | 120                 | 318          | 198         |
| 1851-60 . . . . .  | 152                 | 396          | 244         |
| 1861-70 . . . . .  | 210                 | 486          | 276         |
| 1871-80 . . . . .  | 247                 | 607          | 360         |
| 1881-87 . . . . .  | 193                 | 520          | 327         |
| 47 years . . . . . | 922                 | 2,327        | 1,405       |

Hardware manufactures in 1888 were estimated thus :—

|                         | Tons      | Manufactures, Value, £ |
|-------------------------|-----------|------------------------|
| Steel . . . . .         | 1,400,000 | 37,800,000             |
| Iron . . . . .          | 3,000,000 | 40,500,000             |
| Copper . . . . .        | 32,000    | 3,200,000              |
| Lead, zinc, &c. . . . . | 250,000   | 9,500,000              |
| Total . . . . .         | 3,682,000 | 91,000,000             |

#### RUSSIA

The number of factories at various dates was :—

|                     | 1812  | 1824  | 1839  | 1864   |
|---------------------|-------|-------|-------|--------|
| Tanneries . . . . . | 1,150 | 1,784 | 1,918 | ...    |
| Tallow . . . . .    | 181   | 1,023 | 998   | 1,254  |
| Cotton . . . . .    | 129   | 484   | 467   | 423    |
| Woollen . . . . .   | 136   | 324   | 616   | 536    |
| Linen . . . . .     | 170   | 214   | 267   | 599    |
| Silk . . . . .      | 105   | 184   | 227   | 326    |
| Iron . . . . .      | 33    | 170   | 486   | ...    |
| Sundries . . . . .  | 423   | 1,103 | 1,876 | 12,315 |
| Total . . . . .     | 2,327 | 5,286 | 6,855 | 15,453 |

| Year           | Number of Factories | Operatives | Product, £  |
|----------------|---------------------|------------|-------------|
| 1812 . . . . . | 2,327               | 69,000     | ...         |
| 1824 . . . . . | 5,286               | 250,000    | 5,100,000   |
| 1839 . . . . . | 6,855               | 413,000    | 12,400,000  |
| 1851 . . . . . | 9,256               | 457,000    | 15,700,000  |
| 1864 . . . . . | 15,453              | 465,000    | 52,000,000  |
| 1879 . . . . . | 27,927              | 685,000    | 90,900,000  |
| 1882 . . . . . | 56,905              | 955,000    | 112,600,000 |
| 1888 . . . . . | 83,182              | 1,134,000  | 136,000,000 |

|                        | 1824        | 1835        |
|------------------------|-------------|-------------|
| Woolens . . . . .      | £ 2,600,000 | £ 3,800,000 |
| Cottons . . . . .      | 1,600,000   | 2,500,000   |
| Linsens . . . . .      | 500,000     | 700,000     |
| Silks . . . . .        | 400,000     | 700,000     |
| All textiles . . . . . | 5,100,000   | 7,700,000   |

Schubert's tables for 1828 give the output of the factories thus:—

|              | Yards      |                 | Tons   |
|--------------|------------|-----------------|--------|
| Cottons . .  | 60,000,000 | Tobacco . . .   | 28,000 |
| Linens . .   | 20,000,000 | Sugar . . . .   | 17,000 |
| Woollens . . | 16,000,000 | Soap and potash | 22,000 |
| Total . .    | 96,000,000 | Total . .       | 67,000 |

Moreover, the tanneries turned out 3,500,000 tanned hides. There were 100 steam-engines at work in the Empire.

In 1835 it was estimated that the factories contained 280,000 hands, and that 800,000 artisans worked on their own account, making a total manufacturing strength of 1,080,000 persons.

In 1839 the seats of factories were:—

|                    | Factories | Operatives |
|--------------------|-----------|------------|
| Moscow . . . . .   | 1,058     | 83,000     |
| Vladimir . . . . . | 315       | 84,000     |
| Perm . . . . .     | 352       | 37,000     |
| Kaluga . . . . .   | 164       | 20,000     |
| Tula . . . . .     | 124       | 17,000     |
| Various . . . . .  | 4,842     | 172,000    |
| Total . . . . .    | 6,855     | 413,000    |

In 1864 the following table was published:—

|                  | Factories | Operatives | Output, £  |
|------------------|-----------|------------|------------|
| Woollens . .     | 536       | 92,000     | 5,900,000  |
| Cottons . .      | 423       | 58,000     | 6,100,000  |
| Linens . .       | 599       | 44,000     | 5,300,000  |
| Silks . .        | 326       | 9,000      | 900,000    |
| All textiles . . | 1,884     | 203,000    | 18,200,000 |
| Sugar . .        | 432       | 55,000     | 4,900,000  |
| Tallow . .       | 1,254     | 7,000      | 2,100,000  |
| Liquor . .       | 1,446     | 31,000     | 8,300,000  |
| Sawmills . .     | 2,508     | 12,000     | 2,600,000  |
| Sundries . .     | 7,929     | 157,000    | 15,900,000 |
| Total . .        | 15,453    | 465,000    | 52,000,000 |

At the same time Buschen valued all the manufactures of Russia at 136 millions sterling, viz:—

| Textiles         | £          | Miscellaneous    | £          |
|------------------|------------|------------------|------------|
| Linens . . . .   | 18,200,000 | Hardware . . .   | 10,800,000 |
| Cottons . . . .  | 15,800,000 | Liquor . . . . . | 52,000,000 |
| Woollens . . . . | 7,100,000  | Leather . . . .  | 8,900,000  |
| Hemp . . . . .   | 6,300,000  | Tallow . . . . . | 3,200,000  |
| Silks . . . . .  | 2,300,000  | Sundries . . . . | 11,600,000 |
| Total . .        | 49,700,000 | Total . .        | 86,500,000 |

The above of course includes not only factories but also the product of the labours of artisans.

An official statement in 1882 shows that the output of the mills had more than doubled since 1864, viz:—

|                    | 1864       | 1882        |
|--------------------|------------|-------------|
|                    | £          | £           |
| Textiles . . . . . | 18,200,000 | 31,300,000  |
| Sugar . . . . .    | 4,900,000  | 14,100,000  |
| Liquor . . . . .   | 8,300,000  | 19,500,000  |
| Sundries . . . . . | 20,600,000 | 47,700,000  |
| Total . . . . .    | 52,000,000 | 112,600,000 |

The manufacture of liquor stands officially thus:—

|                 | Factories | Gallons     | Value, £   |
|-----------------|-----------|-------------|------------|
| Whisky . . . .  | 2,377     | 91,000,000  | 13,800,000 |
| Beer . . . . .  | 1,870     | 75,500,000  | 5,700,000  |
| Total . . . . . | 4,247     | 166,500,000 | 19,500,000 |

It is believed that the illicit distillation of whisky is large, and that in reality Russians consume 160 million gallons of whisky yearly. The above is irrespective of Poland, whose manufactures in 1882 reached £14,700,000, and Finland £1,500,000. If these were added, the grand total of factory products would be £128,800,000. The following table shows approximately the value of textile manufactures at stated periods, in millions sterling:—

|                  | 1830 | 1840 | 1860 | 1870 | 1880 |
|------------------|------|------|------|------|------|
| Woollens . . . . | 3    | 5    | 8    | 10   | 14   |
| Cottons . . . .  | 1    | 4    | 7    | 12   | 14   |
| Linens . . . . . | 1    | 2    | 5    | 7    | 8    |
| Silks, &c. . . . | ...  | 4    | 5    | 6    | 6    |
| Total . . . . .  | 5    | 15   | 25   | 35   | 42   |

The balance-sheet of textile industries for 47 years may be summed up thus:—

|                   | Millions £ Sterling |              |       |
|-------------------|---------------------|--------------|-------|
|                   | Fibre               | Manufactures | Net   |
| Cotton . . . . .  | 192                 | 461          | 269   |
| Wool . . . . .    | 272                 | 780          | 508   |
| Silk . . . . .    | 18                  | 37           | 19    |
| Flax, &c. . . . . | 195                 | 465          | 270   |
| Total . . . . .   | 677                 | 1,743        | 1,066 |
| 1841-50 . . . .   | 94                  | 250          | 156   |
| 1851-60 . . . .   | 111                 | 294          | 183   |
| 1861-70 . . . .   | 142                 | 352          | 210   |
| 1871-80 . . . .   | 193                 | 486          | 293   |
| 1881-87 . . . .   | 137                 | 361          | 224   |
| 47 years . . . .  | 677                 | 1,743        | 1,066 |

The production and consumption of textiles in 1887 was approximately as follows, in millions sterling:—

|                  | Production | Consumption |
|------------------|------------|-------------|
| Cottons . . . .  | 22         | 28          |
| Woollens . . . . | 14         | 14          |
| Linens . . . . . | 9          | 9           |
| Silks, &c. . . . | 7          | 6           |
| Total . . . . .  | 52         | 57          |

The hardware industry may be estimated thus:—

|                     | Tons    | Manufactures, Value, £ |
|---------------------|---------|------------------------|
| Iron . . . . .      | 400,000 | 5,400,000              |
| Steel . . . . .     | 260,000 | 7,000,000              |
| Copper, lead, &c. . | 26,000  | 1,100,000              |
| Total . . . . .     | 686,000 | 13,500,000             |

The above is 50 per cent. over the Government valuation for metallic manufactures in 1886, namely, 86 millions roubles; these industries employ 85,400 hands.

## AUSTRIA

In 1805 the textile factories employed 170,000 hands. Becher's table in 1834 was as follows:—

| Factories     | No. | Factories     | No. | Factories    | No.   |
|---------------|-----|---------------|-----|--------------|-------|
| Leather . . . | 580 | Chemicals . . | 82  | Iron . . .   | 700   |
| Flax and hemp | 869 | Spirits . . . | 250 | Steel . . .  | 210   |
| Cotton . . .  | 298 | Glass . . .   | 210 | Copper . . . | 185   |
| Wool . . .    | 165 | Pottery . . . | 165 | Sundry . . . | 8,432 |

He summed up the whole manufacturing industry thus:—

|                               |             |
|-------------------------------|-------------|
| Number of factories . . . . . | 11,064      |
| Operatives . . . . .          | 2,330,000   |
| Product, £ . . . . .          | 142,000,000 |

There was a rapid increase of textile industry after Becher's time, as shown by the number of looms in factories:—

| Year           | Steam-Looms | Hand-Looms |
|----------------|-------------|------------|
| 1850 . . . . . | 1,140       | 100,000    |
| 1860 . . . . . | 10,360      | 80,000     |
| 1870 . . . . . | 16,650      | 70,000     |
| 1875 . . . . . | 23,000      | 55,000     |

In the last-mentioned year there were in Austria proper, without Hungary, 6400 factories, using 11,400 steam-engines.

In 1887 the principal manufacturing companies in Vienna had the following capital:—

|                    |           |                   |           |
|--------------------|-----------|-------------------|-----------|
| Mining . . . . .   | 7,200,000 | Paper-mills . . . | 1,500,000 |
| Textiles . . . . . | 2,300,000 | Breweries . . .   | 1,400,000 |
| Sugar . . . . .    | 2,300,000 | Ironworks . . .   | 1,200,000 |

In 1888 the principal textile industries showed thus:—

|                  | Factories | Operatives | Spindles  | Power-Looms |
|------------------|-----------|------------|-----------|-------------|
| Cotton . . . . . | 1,900     | 96,000     | 2,350,000 | 42,000      |
| Wool . . . . .   | 2,707     | 59,000     | 650,000   | 17,500      |
| Linen . . . . .  | 348       | 60,000     | 400,000   | 5,000       |
| Total . . . . .  | 4,955     | 215,000    | 3,400,000 | 64,500      |

At the same time Hungary had 988 mills, with 90,000 operatives and 63,000 horse-power. The following table shows the production of textiles (excluding Lombardy) in the Empire at various dates, in millions £ sterling:—

|                    | 1830 | 1850 | 1860 | 1870 | 1880 |
|--------------------|------|------|------|------|------|
| Woollens . . . . . | 4    | 6    | 7    | 8    | 9    |
| Cottons . . . . .  | 3    | 5    | 6    | 8    | 10   |
| Linens . . . . .   | 3    | 4    | 4    | 5    | 6    |
| Silks, &c. . . . . | 3    | 3    | 5    | 5    | 6    |
| Total . . . . .    | 13   | 18   | 22   | 26   | 31   |

The balance-sheet of textile industries for 47 years may be summed up thus:—

|                    | Millions £ Sterling |              |     |
|--------------------|---------------------|--------------|-----|
|                    | Fibre               | Manufactures | Net |
| Cotton . . . . .   | 161                 | 382          | 221 |
| Wool . . . . .     | 163                 | 484          | 321 |
| Silk . . . . .     | 49                  | 99           | 50  |
| Flax, &c. . . . .  | 144                 | 342          | 198 |
| Total . . . . .    | 517                 | 1,307        | 790 |
| 1841-50 . . . . .  | 78                  | 199          | 121 |
| 1851-60 . . . . .  | 91                  | 242          | 151 |
| 1861-70 . . . . .  | 116                 | 279          | 163 |
| 1871-80 . . . . .  | 135                 | 331          | 196 |
| 1881-87 . . . . .  | 97                  | 256          | 159 |
| 47 years . . . . . | 517                 | 1,307        | 790 |

The production and consumption in 1887 were approximately as follows:—

|                    | Millions £ Sterling |             |
|--------------------|---------------------|-------------|
|                    | Production          | Consumption |
| Cottons . . . . .  | 14                  | 14          |
| Woollens . . . . . | 9                   | 9           |
| Linens . . . . .   | 6                   | 5           |
| Silks, &c. . . . . | 7                   | 6           |
| Total . . . . .    | 36                  | 34          |

The number of hands engaged in manufactures in 1880, and that of the manufacturing population, are shown thus:—

|                   | Principals | Dependents | Total     |
|-------------------|------------|------------|-----------|
| Austria . . . . . | 576,000    | 4,134,000  | 4,710,000 |
| Hungary . . . . . | 381,000    | 408,000    | 789,000   |
| Total . . . . .   | 957,000    | 4,542,000  | 5,499,000 |

Hardware manufactures may be estimated thus:—

|                     | Tons Consumed | Manufactures, Value £ |
|---------------------|---------------|-----------------------|
| Iron . . . . .      | 460,000       | 6,200,000             |
| Steel . . . . .     | 280,000       | 7,600,000             |
| Copper, &c. . . . . | ...           | 1,200,000             |
| Total . . . . .     | ...           | 15,000,000            |

## ITALY

In the 18th century the woollen factories of Florence had 30,000 operatives. After a long period of depression, industry began to revive, and in 1840 the kingdom of Sardinia had:—

|                    | Factories | Workmen | Women  | Total  |
|--------------------|-----------|---------|--------|--------|
| Cottons . . . . .  | 312       | 7,900   | 9,000  | 16,900 |
| Silks . . . . .    | 590       | 4,900   | 10,000 | 14,900 |
| Woollens . . . . . | 62        | 3,400   | 2,000  | 5,400  |
| Total . . . . .    | 964       | 16,200  | 21,000 | 37,200 |

In 1877 the official report was as follows:—

|                      | Men     | Women and Children | All Hands | Spindles  |
|----------------------|---------|--------------------|-----------|-----------|
| Silk . . . . .       | 16,000  | 184,000            | 200,000   | 2,083,000 |
| Cotton . . . . .     | 16,000  | 38,000             | 54,000    | 880,000   |
| Woollen . . . . .    | 12,000  | 13,000             | 25,000    | 305,000   |
| Linen and hemp . . . | 11,000  | 11,000             | 22,000    | 60,000    |
| Paper . . . . .      | 7,000   | 10,000             | 17,000    | ...       |
| Leather . . . . .    | 10,000  | 1,000              | 11,000    | ...       |
| Sundries . . . . .   | 32,000  | 21,000             | 53,000    | ...       |
| Total . . . . .      | 104,000 | 278,000            | 382,000   | ...       |

|                       | Number of Spindles |           |         |        |           |
|-----------------------|--------------------|-----------|---------|--------|-----------|
|                       | Cotton             | Silk      | Wool    | Linen  | Total     |
| Piedmont . . . . .    | 312,000            | 357,000   | 135,000 | 2,000  | 806,000   |
| Lombardy . . . . .    | 220,000            | 1,638,000 | 10,000  | 32,000 | 1,900,000 |
| Liguria . . . . .     | 104,000            | 13,000    | 12,000  | 3,000  | 132,000   |
| Venice . . . . .      | 39,000             | 54,000    | 69,000  | 4,000  | 166,000   |
| Other provinces . . . | 205,000            | 21,000    | 79,000  | 18,000 | 323,000   |
| Total . . . . .       | 880,000            | 2,083,000 | 305,000 | 59,000 | 3,327,000 |

The distribution of power was as follows :—

|               | Horse-Power |        |        | Number of Power-Looms |
|---------------|-------------|--------|--------|-----------------------|
|               | Steam       | Water  | Total  |                       |
| Cotton . . .  | 3,000       | 10,000 | 13,000 | 42,000                |
| Wool . . .    | 1,100       | 6,200  | 7,300  | 6,600                 |
| Linen . . .   | 500         | 2,500  | 3,000  | 800                   |
| Paper . . .   | 300         | 13,700 | 14,000 | ...                   |
| Silk, &c. . . | 10,000      | 7,000  | 17,000 | 1,500                 |
| Total . . .   | 14,900      | 39,400 | 54,300 | 50,900                |

The increase of steam-power since 1878 has been remarkable, the consumption of coal having trebled in nine years, viz. :—

| Year           | Tons      |
|----------------|-----------|
| 1862 . . . . . | 446,000   |
| 1878 . . . . . | 1,325,000 |
| 1887 . . . . . | 3,580,000 |

The following table shows approximately the production of textile industries in millions £ sterling :—

|                | 1850 | 1860 | 1870 | 1880 |
|----------------|------|------|------|------|
| Woollens . . . | 3    | 4    | 4    | 5    |
| Cottons . . .  | 2    | 3    | 4    | 6    |
| Silks, &c. . . | 3    | 5    | 6    | 7    |
| Total . . .    | 8    | 12   | 14   | 18   |

The production and consumption in 1887 were approximately :—

|                    | Millions £ Sterling |             |
|--------------------|---------------------|-------------|
|                    | Production          | Consumption |
| Cottons . . . . .  | 9                   | 11          |
| Woollens . . . . . | 5                   | 7           |
| Linens . . . . .   | 3                   | 3           |
| Silks, &c. . . . . | 4                   | 4           |
| Total . . . . .    | 21                  | 25          |

The balance-sheet of textile industries for 47 years may be summed up thus :—

|                | Millions £ Sterling |              |     |
|----------------|---------------------|--------------|-----|
|                | Fibre               | Manufactures | Net |
| Cotton . . .   | 72                  | 163          | 91  |
| Wool . . .     | 77                  | 195          | 118 |
| Silk . . .     | 38                  | 72           | 34  |
| Flax, &c. . .  | 64                  | 153          | 89  |
| Total . . .    | 251                 | 583          | 332 |
| 1841-50 . . .  | 32                  | 74           | 42  |
| 1851-60 . . .  | 39                  | 94           | 55  |
| 1861-70 . . .  | 57                  | 128          | 71  |
| 1871-80 . . .  | 69                  | 156          | 87  |
| 1881-87 . . .  | 54                  | 131          | 77  |
| 47 years . . . | 251                 | 583          | 332 |

Hardware manufactures may be summed up thus :—

|                   | Tons Consumed | Manufactures, Value, £ |
|-------------------|---------------|------------------------|
| Iron . . . . .    | 260,000       | 3,500,000              |
| Steel . . . . .   | 20,000        | 600,000                |
| Lead, &c. . . . . | ...           | 200,000                |
| Total . . . . .   | ...           | 4,300,000              |

Italy has a manufacturing population of 4,494,000 souls, the number of operatives and artisans being approximately 2,281,000.

#### SPAIN

Manufacturing industry has progressed but little, if it has not positively declined. Seville had 16,000 silk-loom in the sixteenth century; at present there are only 3000 in all Spain. Toledo, so famous for its swords, has still one small factory with 300 workmen. Cotton-mills were introduced so far back as 1769, yet the whole number of operatives in this industry does not exceed 53,000. According to a Government report, in 1826 the value of textile and other manufactures produced yearly was £14,700,000 sterling; much too low an estimate. A semi-official statement published in 1873 showed 563 textile factories in the kingdom, with an aggregate capital of £21,000,000 sterling, counting 48,000 looms, 1,220,000 spindles, 93,000 operatives, and 17,000 horse-power. By placing a fictitious value on the articles manufactured, the output of the mills was raised to £21,000,000 sterling, which was 50 per cent. over the reality.

The statement was as follows :—

|                | Operatives | Looms  | Output, £  |
|----------------|------------|--------|------------|
| Cottons . . .  | 53,000     | 33,000 | 12,400,000 |
| Woollens . . . | 25,000     | 7,000  | 4,300,000  |
| Silks . . .    | 9,000      | 3,000  | 2,800,000  |
| Linens . . .   | 6,000      | 5,000  | 1,100,000  |
| Total . . .    | 93,000     | 48,000 | 20,600,000 |

The production and consumption of textiles in 1887 were approximately as follows :—

|                            | Millions £ |             |
|----------------------------|------------|-------------|
|                            | Production | Consumption |
| Cottons . . . . .          | 7          | 7           |
| Woollens . . . . .         | 6          | 7           |
| Linens, silks, &c. . . . . | 3          | 4           |
| Total . . . . .            | 16         | 18          |

The balance-sheet of textile industries for 47 years may be summed up thus :—

|                | Millions £ Sterling |              |     |
|----------------|---------------------|--------------|-----|
|                | Fibre               | Manufactures | Net |
| Cotton . . .   | 86                  | 202          | 116 |
| Wool . . .     | 103                 | 293          | 190 |
| Silk . . .     | 15                  | 32           | 17  |
| Flax, &c. . .  | 35                  | 84           | 49  |
| Total . . .    | 239                 | 611          | 372 |
| 1841-50 . . .  | 34                  | 94           | 60  |
| 1851-60 . . .  | 44                  | 115          | 71  |
| 1861-70 . . .  | 55                  | 134          | 79  |
| 1871-80 . . .  | 63                  | 158          | 95  |
| 1881-87 . . .  | 43                  | 110          | 67  |
| 47 years . . . | 239                 | 611          | 372 |

Hardware manufacture may be estimated thus :—

|                     | Tons Consumed | Manufactures, Value, £ |
|---------------------|---------------|------------------------|
| Iron . . . . .      | 210,000       | 2,800,000              |
| Steel . . . . .     | 30,000        | 900,000                |
| Copper, &c. . . . . | ...           | 300,000                |
| Total . . . . .     | ...           | 4,000,000              |

In 1873 the Government estimated all Spanish manufactures at £60,000,000 sterling: much too low a figure.

## SCANDINAVIA

In 1765 the Government of Sweden, finding the nobles unable to keep up agriculture, passed a law to close most of the factories, which caused the skilled workmen in steel-works and silk-mills to migrate into Russia. The law was repealed in 1785, but the mischief was done.

The factory statistics show thus:—

| Year       | Factories | Product, £ |
|------------|-----------|------------|
| 1772 . . . | 886       | ..         |
| 1830 . . . | 1,857     | 700,000    |
| 1840 . . . | 2,176     | 1,200,000  |
| 1850 . . . | 2,513     | 2,100,000  |
| 1865 . . . | 2,315     | 4,200,000  |
| 1876 . . . | 2,825     | 9,600,000  |

A statement published in 1837 was as follows:—

|                  | Woollens | Cottons, &c. | All Textiles |
|------------------|----------|--------------|--------------|
| Factories . . .  | 109      | 1,940        | 2,049        |
| Operatives . . . | 3,000    | 10,300       | 13,300       |
| Output, £ . . .  | 300,000  | 760,000      | 1,060,000    |

The statement for 1865 was as follows:—

| Textiles           | £         | Miscellaneous | £         |
|--------------------|-----------|---------------|-----------|
| Cottons . . .      | 490,000   | Sugar . . .   | 730,000   |
| Woollens . . .     | 480,000   | Tobacco . . . | 360,000   |
| Silks, linens, &c. | 470,000   | Hardware, &c. | 1,680,000 |
| All textiles . . . | 1,440,000 | Total . . .   | 2,770,000 |

According to Knut Bonde, the factories represented about half the manufactures produced, the total value having been £1,400,000 in 1824, and £4,800,000 in 1850. The hands employed in factories were 13,300 in 1837, and 53,000 in 1876.

In the latter year the factories were as follows:—

| Worked by     | Number | Horse-Power |
|---------------|--------|-------------|
| Steam . . .   | 684    | 28,000      |
| Water . . .   | 637    | ...         |
| Animals . . . | 1,504  | ...         |
| Total . . .   | 2,825  | ...         |

In later years a valuable industry has sprung up at Jönköping in the manufacture of wooden matches, of which 450 millions are exported yearly, weighing 15,000 tons.

In 1880 Denmark had 720 factories, with 25,000 operatives and 10,000 horse-power. The textile products of all Scandinavia hardly reach four millions sterling per annum.

Hardware manufactures in Sweden may be estimated thus:—

|             | Tons Consumed | Manufactures, Value £ |
|-------------|---------------|-----------------------|
| Iron . . .  | 300,000       | 4,100,000             |
| Steel . . . | 80,000        | 2,200,000             |
| Total . . . | 380,000       | 6,300,000             |

Those of Norway are about £400,000, and of Denmark £600,000.

## BELGIUM

In 1830, when Belgium threw off the Dutch yoke, her factories were already flourishing, for they counted 12,000 steam-engines, with an aggregate of 20,000 horse-power. Since then her steam-power in fixed engines for factories and mines has grown prodigiously, viz:—

| Year       | Horse-Power |
|------------|-------------|
| 1830 . . . | 20,000      |
| 1838 . . . | 25,300      |
| 1860 . . . | 162,000     |
| 1880 . . . | 209,000     |

In 1838 the following table was published:—

|               | Textile Factories |            |            |
|---------------|-------------------|------------|------------|
|               | Capital, £        | Operatives | Product, £ |
| Cotton . . .  | 2,400,000         | 122,000    | 3,400,000  |
| Woollen . . . | 3,000,000         | 40,000     | 1,000,000  |
| Hosiery . . . | ...               | 50,000     | ...        |

Besides the foregoing, the linen factories turned out 750,000 pieces yearly, and the production of lace was valued at £350,000.

There were also 175 foundries, with 14,000 operatives, turning out 150,000 tons pig iron.

The production of textiles was approximately as follows:—

| Year       | Millions £ |         |             |       |
|------------|------------|---------|-------------|-------|
|            | Woollens   | Cottons | Linens, &c. | Total |
| 1840 . . . | 2          | 3       | 1           | 6     |
| 1860 . . . | 3          | 3       | 2           | 8     |
| 1880 . . . | 6          | 3       | 8           | 17    |

Production and consumption in 1887 were approximately:—

|                | Millions £ |             |
|----------------|------------|-------------|
|                | Production | Consumption |
| Cottons . . .  | 3          | 3           |
| Woollens . . . | 6          | 6           |
| Linens . . .   | 5          | 1           |
| Silks, &c. . . | 2          | 1           |
| Total . . .    | 16         | 11          |

The following table combines the official reports of 1846 and 1880:—

|                        | 1846       |             | 1880       |             |                   |
|------------------------|------------|-------------|------------|-------------|-------------------|
|                        | Operatives | Horse-Power | Operatives | Horse-Power | Product, Value, £ |
| Coal-mines . . .       | 46,200     | 22,500      | 97,700     | 87,400      | 6,200,000         |
| Ironworks . . .        | 42,300     | 5,700       | 70,000     | 38,500      | 14,100,000        |
| Potteries . . .        | 35,800     | 1,200       | 51,500     | 7,700       | 3,800,000         |
| Cotton-mills . . .     | 14,700     | 1,600       | 17,500     | 9,900       | 2,700,000         |
| Woollen-mills . . .    | 18,200     | 1,600       | 25,000     | 13,100      | 6,000,000         |
| Flax, &c., mills . . . | 60,700     | 1,100       | 50,900     | 9,800       | 5,400,000         |
| Food . . .             | 29,900     | 2,000       | 57,600     | 54,700      | 31,600,000        |
| Sundries . . .         | 67,000     | 1,300       | 58,600     | 21,300      | 17,200,000        |
| Total . . .            | 314,800    | 37,000      | 428,800    | 242,400     | 87,000,000        |

Motive power in 1880 was as follows:—

| By          | Factories | Horse-Power |
|-------------|-----------|-------------|
| Steam . . . | 8,433     | 209,500     |
| Water . . . | 2,436     | 19,600      |
| Wind . . .  | 2,158     | 13,300      |
| Total . . . | 13,027    | 242,400     |

In 1880 the ratio of horse-power was 56 to every 100 operatives, whereas in 1846 it was less than 12. Horse-power grew seven-fold in thirty-four years.

The balance-sheet of textile industries for 47 years may be summed up thus :—

|                    | Millions £ Sterling |              |     |
|--------------------|---------------------|--------------|-----|
|                    | Fibre               | Manufactures | Net |
| Cotton . . . . .   | 58                  | 141          | 83  |
| Wool . . . . .     | 73                  | 190          | 117 |
| Silk . . . . .     | 7                   | 17           | 10  |
| Flax, &c. . . . .  | 53                  | 130          | 77  |
| Total . . . . .    | 191                 | 478          | 287 |
| 1841-50 . . . . .  | 18                  | 54           | 36  |
| 1851-60 . . . . .  | 22                  | 59           | 37  |
| 1861-70 . . . . .  | 45                  | 108          | 63  |
| 1871-80 . . . . .  | 63                  | 151          | 88  |
| 1881-87 . . . . .  | 43                  | 106          | 63  |
| 47 years . . . . . | 191                 | 478          | 287 |

The hardware industries may be estimated thus :—

|                           | Tons Consumed | Manufactures, Value, £ |
|---------------------------|---------------|------------------------|
| Iron . . . . .            | 600,000       | 8,100,000              |
| Steel . . . . .           | 230,000       | 6,200,000              |
| Zinc, copper, &c. . . . . | ...           | 2,200,000              |
| Total . . . . .           | ...           | 16,500,000             |

According to the Census of 1880 there were 953,000 persons engaged in manufactures, and the gross value of their products was 87 millions sterling. The statement at page 365 gives 102 millions for 1888.

#### SWITZERLAND

In 1887 the Factory Report showed thus :—

|                         | Factories | Operatives |
|-------------------------|-----------|------------|
| Cotton . . . . .        | 398       | 36,400     |
| Silk . . . . .          | 246       | 26,500     |
| Wool, flax, &c. . . . . | 77        | 4,200      |
| Lace . . . . .          | 1,240     | 23,300     |
| Watches . . . . .       | 201       | 11,100     |
| Sundries . . . . .      | 925       | 49,200     |

The total was 3087 factories with 151,000 operatives.

The manufactures, between the above factories and the work done outside, represented approximately the following values :—

| Textiles             | £          | Miscellaneous      | £          |
|----------------------|------------|--------------------|------------|
| Silks . . . . .      | 5,800,000  | Hardware . . . . . | 1,600,000  |
| Cottons . . . . .    | 3,100,000  | Watches . . . . .  | 3,800,000  |
| Woolens, &c. . . . . | 1,400,000  | Lace . . . . .     | 4,200,000  |
|                      |            | Sundries . . . . . | 15,400,000 |
| Total . . . . .      | 10,300,000 | Total . . . . .    | 25,000,000 |

#### UNITED STATES

Reduced to English money, the principal manufactures may be summed up thus :—

|                    | Census Values, Millions of £ Sterling |      |      |      |       | Approximate Value in 1888 |
|--------------------|---------------------------------------|------|------|------|-------|---------------------------|
|                    | 1810                                  | 1840 | 1860 | 1870 | 1880  |                           |
| Textiles . . . . . | 10                                    | 14   | 38   | 55   | 80    | 112                       |
| Hardware . . . . . | 4                                     | 10   | 29   | 92   | 129   | 194                       |
| Food . . . . .     | 8                                     | 18   | 64   | 110  | 168   | 202                       |
| Clothing . . . . . | 3                                     | 8    | 15   | 27   | 50    | 98                        |
| Leather . . . . .  | 4                                     | 7    | 34   | 56   | 83    | 104                       |
| Lumber . . . . .   | 1                                     | 3    | 20   | 42   | 49    | 63                        |
| Sundries . . . . . | 1                                     | 36   | 192  | 323  | 558   | 670                       |
| Total . . . . .    | 31                                    | 96   | 392  | 705  | 1,117 | 1,443                     |

The principal manufactures were as follows, in millions of dollars. The paper value of 1870 is reduced to its proper equivalent in gold :—

|                            | Millions of Dollars |      |       |       |       |       |
|----------------------------|---------------------|------|-------|-------|-------|-------|
|                            | 1810                | 1840 | 1860  | 1870  | 1880  |       |
| Flour . . . . .            | 21                  | 71   | 136   | 224   | 356   | 595   |
| Iron . . . . .             | 17                  | 37   | 49    | 71    | 287   | 336   |
| Leather . . . . .          | 18                  | 33   | 92    | 162   | 271   | 397   |
| Lumber . . . . .           | 6                   | 15   | 59    | 96    | 202   | 233   |
| Cottons . . . . .          | 30                  | 46   | 66    | 115   | 142   | 211   |
| Machinery . . . . .        | ...                 | 11   | 28    | 47    | 111   | 214   |
| Clothing . . . . .         | ...                 | 36   | 48    | 70    | 130   | 242   |
| Sugar . . . . .            | ...                 | ...  | 10    | 38    | 96    | 155   |
| Woolens . . . . .          | 17                  | 21   | 48    | 69    | 121   | 161   |
| Liquor . . . . .           | 16                  | 15   | 22    | 43    | 75    | 144   |
| Cabinet-work . . . . .     | ...                 | 18   | 18    | 24    | 55    | 83    |
| Printing . . . . .         | ...                 | ...  | 12    | 42    | 46    | 91    |
| Implements . . . . .       | ...                 | ...  | 7     | 18    | 42    | 69    |
| Paper . . . . .            | ...                 | ...  | 10    | 18    | 39    | 55    |
| Soap and candles . . . . . | ...                 | ...  | 10    | 17    | 18    | 27    |
| Sundries . . . . .         | 27                  | 155  | 404   | 832   | 1,395 | 2,447 |
| Total . . . . .            | 152                 | 458  | 1,019 | 1,886 | 3,386 | 5,370 |

There was no Census of manufactures in 1820; that of 1830 took only the number of hands engaged. The Census of 1810 gave the following; the values being reduced to English money :—

| States                | Textile Goods | Sundries    | Total       | Ratio |
|-----------------------|---------------|-------------|-------------|-------|
| New England . . . . . | £ 2,600,000   | £ 4,900,000 | £ 7,500,000 | 23.8  |
| Middle . . . . .      | 3,500,000     | 12,300,000  | 15,800,000  | 50.0  |
| South . . . . .       | 3,560,000     | 4,640,000   | 8,200,000   | 25.9  |
| West . . . . .        | 40,000        | 60,000      | 100,000     | 3     |
| Total . . . . .       | 9,700,000     | 21,900,000  | 31,600,000  | 100.0 |

The Census of 1840 gave the following :—

|                     | Hands   | Value, £   | Product per Hand, £ |
|---------------------|---------|------------|---------------------|
| Cottons . . . . .   | 72,100  | 9,700,000  | 136                 |
| Woolens . . . . .   | 21,300  | 4,300,000  | 206                 |
| Mixed . . . . .     | 38,400  | 9,700,000  | 247                 |
| Hardware . . . . .  | 44,100  | 7,700,000  | 175                 |
| Machinery . . . . . | 13,000  | 2,300,000  | 177                 |
| Flour . . . . .     | 60,800  | 14,800,000 | 244                 |
| Houses . . . . .    | 85,500  | 8,700,000  | 102                 |
| Carpentry . . . . . | 39,900  | 3,900,000  | 98                  |
| Timber . . . . .    | 22,100  | 3,200,000  | 145                 |
| Liquor . . . . .    | 12,200  | 3,100,000  | 245                 |
| Leather . . . . .   | 26,100  | 6,900,000  | 263                 |
| Sundries . . . . .  | 160,000 | 20,900,000 | 130                 |
| Total . . . . .     | 595,500 | 95,200,000 | 160                 |

| States                | Manufactures | Capital      |
|-----------------------|--------------|--------------|
| New England . . . . . | £ 31,800,000 | £ 18,000,000 |
| Middle . . . . .      | 41,600,000   | 22,400,000   |
| South . . . . .       | 11,900,000   | 8,600,000    |
| West . . . . .        | 9,900,000    | 6,600,000    |
| Total . . . . .       | 95,200,000   | 55,600,000   |

Since 1840 there has been a steady increase in the average product per operative, which was then only £160, and in 1880 exceeded £400. This is mainly due to improved machinery, enabling two men now to produce as much as five did in 1840.

The Census of 1850 showed as follows :—

| States     | Operatives | Millions £ Sterling |       |         | Product per Hand, £ |
|------------|------------|---------------------|-------|---------|---------------------|
|            |            | Capital             | Wages | Product |                     |
| N. England | 313,000    | 34                  | 16    | 59      | 186                 |
| Middle . . | 418,000    | 49                  | 21    | 98      | 233                 |
| South . .  | 104,000    | 13                  | 4     | 20      | 192                 |
| West . .   | 122,000    | 14                  | 8     | 35      | 288                 |
| Total .    | 957,000    | 110                 | 49    | 212     | 220                 |

The Census of 1860 showed as follows :—

| States                 | Operatives | Millions £ Sterling |       |         | Product per Hand, £ |
|------------------------|------------|---------------------|-------|---------|---------------------|
|                        |            | Capital             | Wages | Product |                     |
| N. Eng. and Middle . . | 399,000    | 54                  | 22    | 98      | 250                 |
| South . .              | 542,000    | 89                  | 31    | 166     | 306                 |
| West . .               | 126,000    | 23                  | 7     | 39      | 310                 |
| Total .                | 1,311,000  | 208                 | 80    | 394     | 301                 |

That of 1870, reduced to gold values, showed :—

| States     | Operatives | Millions £ Sterling |       |         | Product per Hand, £ |
|------------|------------|---------------------|-------|---------|---------------------|
|            |            | Capital             | Wages | Product |                     |
| N. England | 526,000    | 85                  | 37    | 167     | 317                 |
| Middle . . | 801,000    | 156                 | 56    | 295     | 370                 |
| South . .  | 187,000    | 24                  | 8     | 47      | 250                 |
| West . .   | 540,000    | 102                 | 34    | 196     | 363                 |
| Total .    | 2,054,000  | 367                 | 135   | 705     | 344                 |

That of 1880 showed as follows :—

| States     | Operatives | Millions £ Sterling |       |         | Product per Hand, £ |
|------------|------------|---------------------|-------|---------|---------------------|
|            |            | Capital             | Wages | Product |                     |
| N. England | 645,000    | 130                 | 48    | 231     | 358                 |
| Middle . . | 1,102,000  | 243                 | 83    | 462     | 420                 |
| South . .  | 228,000    | 40                  | 11    | 70      | 307                 |
| West . .   | 758,000    | 168                 | 56    | 354     | 470                 |
| Total .    | 2,733,000  | 581                 | 198   | 1,117   | 408                 |

The value of manufactures was artificially heightened by protective customs duties. My estimate for 1888, at page 378, is 1443 millions sterling. The results of the last five Censuses may be summed up thus :—

| Year     | Operatives | Millions £ Sterling |       |         | Product per Hand, £ |
|----------|------------|---------------------|-------|---------|---------------------|
|          |            | Capital             | Wages | Product |                     |
| 1840 . . | 596,000    | ...                 | ...   | 95      | 160                 |
| 1850 . . | 957,000    | 110                 | 49    | 212     | 220                 |
| 1860 . . | 1,311,000  | 208                 | 80    | 394     | 301                 |
| 1870 . . | 2,054,000  | 367                 | 135   | 705     | 344                 |
| 1880 . . | 2,733,000  | 581                 | 198   | 1,117   | 408                 |

The numbers for 1870 and 1880 seem to include only factory hands, as the Censuses for those years give the

The principal manufacturing States have been as follows :—

| States               | Operatives |           |           |           | Product, Millions £ |      |      |       |
|----------------------|------------|-----------|-----------|-----------|---------------------|------|------|-------|
|                      | 1850       | 1860      | 1870      | 1880      | 1850                | 1860 | 1870 | 1880  |
| New York . . . .     | 199,000    | 230,000   | 351,000   | 501,000   | 50                  | 79   | 131  | 224   |
| Pennsylvania . . .   | 147,000    | 222,000   | 319,000   | 387,000   | 32                  | 60   | 119  | 155   |
| Massachusetts . . .  | 178,000    | 217,000   | 279,000   | 352,000   | 33                  | 53   | 93   | 131   |
| Other States . . . . | 433,000    | 642,000   | 1,105,000 | 1,493,000 | 97                  | 202  | 362  | 607   |
| Total . . . .        | 957,000    | 1,311,000 | 2,054,000 | 2,733,000 | 212                 | 394  | 705  | 1,117 |

numbers employed in manufactures throughout the Union as 2,707,000 and 3,837,000 respectively. See *Occupation*.

The production and consumption of textile goods in 1888 were approximately as follows :—

|                   | Millions £ Sterling |             |
|-------------------|---------------------|-------------|
|                   | Production          | Consumption |
| Cottons . . . .   | 60                  | 63          |
| Woollens . . . .  | 39                  | 44          |
| Silks . . . .     | 7                   | 14          |
| Linens, &c. . . . | 6                   | 13          |
| Total . . . .     | 112                 | 134         |

The value of all textile manufactures at various dates, was approximately :—

| Year         | Millions £ Sterling |         |       |             |       |
|--------------|---------------------|---------|-------|-------------|-------|
|              | Woollens            | Cottons | Silks | Linens, &c. | Total |
| 1810 . . . . | 4                   | 6       | ...   | ...         | 10    |
| 1840 . . . . | 4                   | 9       | ...   | 1           | 14    |
| 1850 . . . . | 10                  | 13      | ...   | 1           | 24    |
| 1860 . . . . | 13                  | 22      | 1     | 2           | 38    |
| 1870 . . . . | 23                  | 26      | 2     | 4           | 55    |
| 1880 . . . . | 30                  | 38      | 7     | 5           | 80    |
| 1888 . . . . | 39                  | 60      | 8     | 5           | 112   |

The balance-sheet of textile industries for 47 years was approximately as follows :—

|                  | Millions £ Sterling |              |             |
|------------------|---------------------|--------------|-------------|
|                  | Fibre               | Manufactures | Net Product |
| Cotton . . . .   | 663                 | 1,411        | 748         |
| Wool . . . .     | 314                 | 911          | 597         |
| Silk . . . .     | 55                  | 115          | 60          |
| Flax, &c. . . .  | 76                  | 184          | 108         |
| Total . . . .    | 1,108               | 2,621        | 1,513       |
| 1841-50 . . . .  | 88                  | 261          | 173         |
| 1851-60 . . . .  | 138                 | 375          | 237         |
| 1861-70 . . . .  | 316                 | 628          | 312         |
| 1871-80 . . . .  | 297                 | 706          | 409         |
| 1881-87 . . . .  | 269                 | 651          | 382         |
| 47 years . . . . | 1,108               | 2,621        | 1,513       |

The value of hardware manufactures may be estimated for 1888 as follows :—

|                      | Tons Consumed | Manufactures, Value, £ |
|----------------------|---------------|------------------------|
| Iron . . . .         | 4,800,000     | 72,000,000             |
| Steel . . . .        | 3,150,000     | 94,500,000             |
| Copper . . . .       | 110,000       | 14,000,000             |
| Lead . . . .         | 180,000       | 6,700,000              |
| Tin, zinc, &c. . . . | 70,000        | 6,300,000              |
| Total . . . .        | 8,310,000     | 193,500,000            |

| States              | Ratio per Operative |      |      |      |            |      |      |      |
|---------------------|---------------------|------|------|------|------------|------|------|------|
|                     | Wages, £            |      |      |      | Product, £ |      |      |      |
|                     | 1850                | 1860 | 1870 | 1880 | 1850       | 1860 | 1870 | 1880 |
| New York . . .      | 51                  | 59   | 68   | 83   | 250        | 340  | 373  | 448  |
| Pennsylvania . .    | 52                  | 56   | 69   | 72   | 220        | 267  | 372  | 400  |
| Massachusetts . .   | 49                  | 54   | 73   | 76   | 180        | 240  | 332  | 370  |
| Ohio . . .          | 54                  | 61   | 62   | 70   | 255        | 334  | 330  | 395  |
| Illinois . . .      | 50                  | 70   | 64   | 80   | 250        | 500  | 409  | 593  |
| New Jersey . . .    | 50                  | 59   | 75   | 76   | 210        | 270  | 373  | 420  |
| Connecticut . . .   | 49                  | 61   | 75   | 81   | 196        | 270  | 300  | 344  |
| Other States . . .  | 52                  | 68   | 57   | 63   | 225        | 316  | 317  | 384  |
| General average . . | 51                  | 61   | 66   | 72   | 220        | 300  | 344  | 408  |

The motive-power in 1880 compared with 1870 thus :—

| Year | Factories |        |         | Horse-Power |           |           |
|------|-----------|--------|---------|-------------|-----------|-----------|
|      | Steam     | Water  | Total   | Steam       | Water     | Total     |
| 1870 | 40,191    | 51,018 | 91,209  | 1,216,000   | 1,130,000 | 2,346,000 |
| 1880 | 56,483    | 55,400 | 111,883 | 2,186,000   | 1,225,000 | 3,411,000 |

The distribution of motive-power and that of operatives were as follows :—

| Factories       | Horse-Power |           | Hands     |           |
|-----------------|-------------|-----------|-----------|-----------|
|                 | 1870        | 1880      | 1870      | 1880      |
| Cotton . . .    | 146,000     | 276,000   | 136,000   | 186,000   |
| Woollen . . .   | 93,000      | 123,000   | 90,000    | 105,000   |
| Flour . . .     | 577,000     | 771,000   | 58,000    | 58,000    |
| Lumber . . .    | 642,000     | 822,000   | 150,000   | 148,000   |
| Iron . . .      | 171,000     | 397,000   | 78,000    | 141,000   |
| Paper . . .     | 53,000      | 124,000   | 18,000    | 24,000    |
| Implements, &c. | 664,000     | 898,000   | 2,177,000 | 2,175,000 |
| Sundries . . .  | 2,346,000   | 3,411,000 | 2,707,000 | 3,837,000 |

|                   | Ratio of Power in 1880 |                 | Hands |
|-------------------|------------------------|-----------------|-------|
|                   | Steam                  | Steam and Water |       |
| Pennsylvania . .  | 18.4                   | 15.0            | 13.8  |
| New York . . .    | 10.7                   | 13.3            | 16.4  |
| Ohio . . .        | 10.2                   | 7.7             | 6.3   |
| Massachusetts . . | 7.8                    | 9.1             | 9.6   |
| Michigan . . .    | 6.0                    | 4.8             | 3.4   |
| Illinois . . .    | 5.8                    | 4.2             | 5.4   |
| Other States . .  | 41.1                   | 45.9            | 45.1  |
| Total . . .       | 100.0                  | 100.0           | 100.0 |

The principal industries of Australia as regards number of hands employed were :—

|                       | Textiles | Hardware | Food   | Sundries | Total   |
|-----------------------|----------|----------|--------|----------|---------|
| New South Wales . . . | 5,700    | 16,700   | 7,400  | 15,800   | 45,600  |
| Victoria . . .        | 9,600    | 20,600   | 5,800  | 18,500   | 54,500  |
| New Zealand . . .     | 4,100    | 8,100    | 3,200  | 6,700    | 22,100  |
| Total . . .           | 19,400   | 45,400   | 16,400 | 41,000   | 122,200 |

The average product per operative being £253 in Canada and £297 in the United States, we may fairly suppose £250 for Australia, in which case the result would be :—

|                         | Value Produced, £ |                | Value Produced, £ |
|-------------------------|-------------------|----------------|-------------------|
| New South Wales . . .   | 11,400,000        | Textiles . . . | 6,500,000         |
| Victoria . . .          | 13,600,000        | Hardware . . . | 15,100,000        |
| New Zealand . . .       | 5,500,000         | Food . . .     | 5,500,000         |
| Four other Colonies . . | 10,200,000        | Sundries . . . | 13,600,000        |
| Total . . .             | 40,700,000        | Total . . .    | 40,700,000        |

The above is the output of factories, the total value of

## CANADA

The earliest record of manufactures was published in 1830, as follows :—Domestic looms 1300, turning out 4,000,000 yards of woollens and linens yearly; saw-mills 1580, with an aggregate capital of £1,250,000; export of timber £1,000,000 sterling. There were also 1086 mills of various other kinds, and seven foundries.

The industrial Census of 1881 compared with 1871 as follows :—

| Year       | Capital, £ | Product, £ | Operatives | Average Wages, £ |
|------------|------------|------------|------------|------------------|
| 1871 . . . | 16,200,000 | 46,000,000 | 188,000    | 45.2             |
| 1881 . . . | 34,400,000 | 64,400,000 | 255,000    | 48.4             |

The average product per operative was £244 in 1871, and £253 in 1881.

## AUSTRALIA

Only three of the Australian colonies publish detailed statistics of manufactures, which are given for 1886-89 in Mr. Coghlan's Official Report for New South Wales. These three Colonies, however, comprise three-fourths of the population, and if we suppose the others have manufactures in the same ratio, the account will stand thus :—

|                         | Factories | Hands   | Value of Machinery, £ |
|-------------------------|-----------|---------|-----------------------|
| New South Wales . .     | 3,106     | 45,600  | 5,740,000             |
| Victoria . . .          | 2,974     | 54,500  | 5,490,000             |
| New Zealand . . .       | 1,946     | 22,100  | 2,110,000             |
| Four other Colonies . . | 2,680     | 40,700  | 4,450,000             |
| Total . . .             | 10,706    | 162,900 | 17,790,000            |

In New South Wales the value of land and buildings occupied by factories in 1888 was £9,350,000, making a total of £15,100,000 invested in this branch of industry. Supposing the ratio to be the same in the other Colonies as compared with value of machinery, the result is :—

|                         | Manufactures, Capital, £ | £ per Inhabitant |
|-------------------------|--------------------------|------------------|
| New South Wales . .     | 15,100,000               | 13.6             |
| Victoria . . .          | 14,400,000               | 13.0             |
| New Zealand . . .       | 5,500,000                | 9.0              |
| Four other Colonies . . | 11,500,000               | 12.7             |
| Total . . .             | 46,500,000               | 12.8             |

manufactures being probably about 64 millions sterling, as already stated.

The growth of manufactures has been very rapid, the number of hands in New South Wales, for example, having risen thus :—

|               | 1878   | 1888   |
|---------------|--------|--------|
| Males . . .   | 21,500 | 41,300 |
| Females . . . | 3,200  | 4,300  |
| Total . . .   | 24,700 | 45,600 |

This shows a rise of 80 per cent. in ten years.

**MANURE**

The following table gives the annual yield of animal manure according to the scale of French official estimates and its value approximately :—

|                         | Tons          | Value, £    |
|-------------------------|---------------|-------------|
| United Kingdom . . .    | 79,000,000    | 31,600,000  |
| France . . . . .        | 84,000,000    | 33,600,000  |
| Germany . . . . .       | 113,000,000   | 45,200,000  |
| Russia . . . . .        | 213,000,000   | 85,200,000  |
| Austria . . . . .       | 100,000,000   | 40,000,000  |
| Italy . . . . .         | 25,000,000    | 10,000,000  |
| Spain and Portugal . .  | 39,000,000    | 15,600,000  |
| Belgium and Holland . . | 17,000,000    | 6,800,000   |
| Scandinavia . . . . .   | 30,000,000    | 12,000,000  |
| Turkey, &c. . . . .     | 32,000,000    | 12,800,000  |
| Europe . . . . .        | 732,000,000   | 292,800,000 |
| United States . . . . . | 385,000,000   | 154,000,000 |
| Total . . . . .         | 1,117,000,000 | 446,800,000 |

Animal manure forms the chief ingredient of farm-yard dung, mixed with straw, &c. In England about 13 tons of dung go to the acre; in Belgium 45; in Russia 7 on the Moujiks' farms, and 14 on those of the nobility. In France fish is often used, as also in Norfolk; it costs 16s. a ton, and is mixed with mould as 1 to 40, producing heavy turnip crops. Nitrate potash and bone-ash are also much used in England. The results obtained on a farm in Oxfordshire in 1888 were :—

|                     | Tons per Acre |     |
|---------------------|---------------|-----|
|                     | Grass         | Hay |
| Unmanured . . . . . | 5.0           | 1.3 |
| Manured . . . . .   | 12.0          | 2.5 |

The manure consisted of 6 cwt. of nitrate and potash per acre. The production of animal manure yearly is 10 cwt. for a goat, 14 a sheep, 30 a pig, 5 tons for a horse, and 6 tons a cow; but a portion of this is lost.

Artificial manures imported into Great Britain were :—

| Year           | Tons    |         | Value, £  |           |
|----------------|---------|---------|-----------|-----------|
|                | Guano   | Nitrate | Guano     | Nitrate   |
| 1860 . . . . . | 140,000 | 37,000  | 1,560,000 | 500,000   |
| 1870 . . . . . | 280,000 | 56,000  | 3,480,000 | 880,000   |
| 1880 . . . . . | 80,000  | 46,000  | 810,000   | 700,000   |
| 1889 . . . . . | 28,000  | 118,000 | 200,000   | 1,100,000 |

Great Britain also imported in 1889 the following :—

|                      | Tons    | Value, £  |
|----------------------|---------|-----------|
| Phosphates . . . . . | 305,000 | 700,000   |
| Bones . . . . .      | 62,000  | 310,000   |
| Various . . . . .    | 90,000  | 125,000   |
| Total . . . . .      | 457,000 | 1,135,000 |

Making a total of 603,000 tons of artificial manure, worth £2,500,000.

In the United States the production of phosphates is 430,000 tons, of which 270,000 for home-use, 160,000 tons being exported. Canada exported 22,000 tons in 1887, against 3000 in 1877.

**MARBLE**

Is worth about £4 per ton, Italy exporting annually 105,000 tons, valued at £400,000. It is 7 per cent. heavier than stone, and 5 per cent. lighter than granite. One cubic foot weighs 160 lbs., that is, 14 cubic feet per ton.

**MARRIAGE**

The proper age for marriage, as laid down by the ancients, was as follows :—

| According to        | Years   |      |
|---------------------|---------|------|
|                     | Husband | Wife |
| Hesiod . . . . .    | 30      | 15   |
| Plato . . . . .     | 30      | 20   |
| Aristotle . . . . . | 37      | 18   |

The minimum age fixed by law was as follows :—

| Law of               | Years   |      |
|----------------------|---------|------|
|                      | Husband | Wife |
| Sparta . . . . .     | 30      | 20   |
| Roman Empire . . . . | 25      | 20   |
| Canon Law . . . . .  | 14      | 12   |
| England . . . . .    | 16      | 15   |
| France . . . . .     | 18      | 15   |
| Saxony . . . . .     | 21      | 18   |
| Prussia . . . . .    | 18      | 14   |
| Austria . . . . .    | 14      | 14   |

The Emperor Tiberius made an edict against marriage by women over fifty or men over sixty, but it was soon repealed.

The medium marrying age in various nations is as follows :—

|                    | Years |       |                   | Years |       |
|--------------------|-------|-------|-------------------|-------|-------|
|                    | Man   | Woman |                   | Man   | Woman |
| England . . . . .  | 27.7  | 25.5  | Sweden . . . . .  | 31.1  | 28.3  |
| Scotland . . . . . | 28.6  | 25.7  | Norway . . . . .  | 31.1  | 27.1  |
| Ireland . . . . .  | 29.9  | 25.2  | Belgium . . . . . | 31.3  | 28.5  |
| France . . . . .   | 30.2  | 24.9  | Holland . . . . . | 30.9  | 28.0  |
| Prussia . . . . .  | 29.7  | 27.1  | Jews . . . . .    | 30.1  | 26.2  |
| Russia . . . . .   | 25.2  | 21.5  | Vienna . . . . .  | 32.0  | 27.0  |
| Italy . . . . .    | 30.2  | 25.4  | Leipzig . . . . . | 28.9  | 26.2  |

The relative numbers in 1000 persons of either sex marrying at different ages are shown thus :—

|                    | Men      |       |       |       |         | Total |
|--------------------|----------|-------|-------|-------|---------|-------|
|                    | Under 20 | 20-30 | 30-40 | 40-50 | Over 50 |       |
| England . . . . .  | 35       | 731   | 144   | 52    | 38      | 1,000 |
| Scotland . . . . . | 32       | 684   | 189   | 62    | 33      | 1,000 |
| Ireland . . . . .  | 26       | 600   | 269   | 67    | 38      | 1,000 |
| France . . . . .   | 23       | 607   | 262   | 65    | 43      | 1,000 |
| Italy . . . . .    | 11       | 623   | 259   | 68    | 39      | 1,000 |
| Prussia . . . . .  | 8        | 663   | 231   | 64    | 34      | 1,000 |
| Russia . . . . .   | 373      | 428   | 122   | 56    | 21      | 1,000 |
| Norway . . . . .   | 8        | 572   | 291   | 83    | 46      | 1,000 |
| Sweden . . . . .   | 1        | 574   | 299   | 81    | 45      | 1,000 |
| Belgium . . . . .  | 9        | 548   | 307   | 91    | 45      | 1,000 |
| Holland . . . . .  | 23       | 562   | 281   | 87    | 47      | 1,000 |
| Jews . . . . .     | 22       | 664   | 174   | 74    | 66      | 1,000 |

|                    | Women    |       |       |       |         | Total |
|--------------------|----------|-------|-------|-------|---------|-------|
|                    | Under 20 | 20-30 | 30-40 | 40-50 | Over 50 |       |
| England . . . . .  | 149      | 680   | 111   | 41    | 19      | 1,000 |
| Scotland . . . . . | 134      | 686   | 134   | 37    | 9       | 1,000 |
| Ireland . . . . .  | 137      | 713   | 111   | 27    | 12      | 1,000 |
| France . . . . .   | 204      | 593   | 145   | 40    | 18      | 1,000 |
| Italy . . . . .    | 171      | 657   | 125   | 34    | 13      | 1,000 |
| Prussia . . . . .  | 111      | 686   | 152   | 41    | 10      | 1,000 |

| December . . .  | 139      | 75     | 9      | 33      | 53      | 106   | 59      | 156         | 64     | 13     | 93     | 30      |
| Year . . .      | 1,200    | 1,200  | 1,200  | 1,200   | 1,200   | 1,200 | 1,200   | 1,200       | 1,200  | 1,200  | 1,200  | 1,200   |

From observations made in England and France (1858-67) and in Prussia (1844-61) the relation between the ages of husband and wife was ascertained to be as follows :—

| When the Age of Husband is | That of the Wife will be |           |            |
|----------------------------|--------------------------|-----------|------------|
|                            | In England               | In France | In Prussia |
| Under 20 . . .             | 20.0                     | 22.7      | 24.4       |
| 20-30 . . .                | 23.2                     | 23.3      | 25.4       |
| 30-40 . . .                | 28.9                     | 27.8      | 28.0       |
| 40-50 . . .                | 36.8                     | 35.5      | 33.6       |
| Over 50 . . .              | 44.3                     | 39.8      | 42.3       |

The condition of persons marrying in the various countries is shown as follows :—

|                | Husband  |         |       | Wife |       |       |
|----------------|----------|---------|-------|------|-------|-------|
|                | Bachelor | Widower | Total | Maid | Widow | Total |
| England . . .  | 861      | 139     | 1,000 | 902  | 98    | 1,000 |
| France . . .   | 881      | 119     | 1,000 | 922  | 78    | 1,000 |
| Prussia . . .  | 847      | 153     | 1,000 | 902  | 98    | 1,000 |

| Holland . . .     | 1850-59               | 786           | 49    | 120          | 43    | 1,000 |
| Italy . . .       | 1863-66               | 799           | 44    | 111          | 46    | 1,000 |
| Norway . . .      | 1846-55               | 834           | 51    | 90           | 25    | 1,000 |
| Sweden . . .      | 1861-65               | 847           | 41    | 90           | 22    | 1,000 |
| Switzerland . . . | 1856-60               | 834           | 46    | 96           | 24    | 1,000 |
| Austria . . .     | 1855-63               | 728           | 58    | 132          | 82    | 1,000 |
| Hungary . . .     | 1852-59               | 665           | 56    | 140          | 139   | 1,000 |

The ratios of married, unmarried, and widowed persons in the various countries, as derived from Census returns, show :—

|                   | Unmarried | Married | Widowed | Total |
|-------------------|-----------|---------|---------|-------|
| England . . .     | 602       | 345     | 53      | 1,000 |
| France . . .      | 518       | 402     | 80      | 1,000 |
| Prussia . . .     | 600       | 340     | 60      | 1,000 |
| Wurtemberg . . .  | 623       | 319     | 58      | 1,000 |
| Austria . . .     | 596       | 348     | 56      | 1,000 |
| Hungary . . .     | 532       | 407     | 61      | 1,000 |
| Italy . . .       | 582       | 352     | 66      | 1,000 |
| Switzerland . . . | 609       | 319     | 72      | 1,000 |
| Spain . . .       | 572       | 360     | 68      | 1,000 |
| Portugal . . .    | 626       | 308     | 66      | 1,000 |
| Holland . . .     | 611       | 328     | 61      | 1,000 |
| Belgium . . .     | 624       | 317     | 59      | 1,000 |
| Scandinavia . . . | 618       | 330     | 52      | 1,000 |
| Chile . . .       | 688       | 260     | 52      | 1,000 |

The above comprises the whole population.

Considering only the women of child-bearing age, which is usually counted from 15 to 45 years, the married ratio (per 1000) will be found as follows :—

|                    |                   |                       |
|--------------------|-------------------|-----------------------|
| England . . . 496  | Germany . . . 463 | Denmark . . . 450     |
| Scotland . . . 444 | Italy . . . 520   | Belgium . . . 409     |
| Ireland . . . 401  | Sweden . . . 420  | Holland . . . 439     |
| France . . . 531   | Norway . . . 437  | Switzerland . . . 421 |

The lowest ratio is in Ireland; this is the strongest proof of the wretched condition of the Irish people, and offers no hope of improvement.

The following table from the *Demografia* gives the distribution of adults (1879):—

|                   | Males over 18 Years |         |          |       | Females over 15 Years |         |        |       |
|-------------------|---------------------|---------|----------|-------|-----------------------|---------|--------|-------|
|                   | Unmarried           | Married | Widowers | Total | Unmarried             | Married | Widows | Total |
| France . . .      | 322                 | 603     | 75       | 1,000 | 326                   | 542     | 132    | 1,000 |
| England . . .     | 319                 | 617     | 64       | 1,000 | 361                   | 522     | 117    | 1,000 |
| Bavaria . . .     | 440                 | 502     | 58       | 1,000 | 440                   | 457     | 103    | 1,000 |
| Belgium . . .     | 426                 | 503     | 71       | 1,000 | 427                   | 463     | 110    | 1,000 |
| Denmark . . .     | 356                 | 585     | 59       | 1,000 | 375                   | 507     | 118    | 1,000 |
| Scotland . . .    | 355                 | 582     | 63       | 1,000 | 414                   | 453     | 133    | 1,000 |
| Norway . . .      | 358                 | 581     | 61       | 1,000 | 400                   | 488     | 112    | 1,000 |
| Holland . . .     | 378                 | 556     | 66       | 1,000 | 405                   | 476     | 119    | 1,000 |
| Portugal . . .    | 440                 | 502     | 58       | 1,000 | 437                   | 435     | 128    | 1,000 |
| Prussia . . .     | 361                 | 583     | 56       | 1,000 | 368                   | 512     | 120    | 1,000 |
| Sweden . . .      | 365                 | 573     | 62       | 1,000 | 403                   | 472     | 125    | 1,000 |
| Switzerland . . . | 413                 | 512     | 75       | 1,000 | 426                   | 449     | 125    | 1,000 |

The married population in various countries has been found to be made up as follows:—

|               | Not before Married |      | Was Married before |      | Total |
|---------------|--------------------|------|--------------------|------|-------|
|               | Husband            | Wife | Husband            | Wife |       |
| England . . . | 432                | 452  | 68                 | 48   | 1,000 |
| France . . .  | 440                | 461  | 60                 | 39   | 1,000 |
| Prussia . . . | 421                | 451  | 79                 | 49   | 1,000 |
| Austria . . . | 411                | 442  | 89                 | 58   | 1,000 |
| Italy . . .   | 430                | 461  | 70                 | 39   | 1,000 |
| Holland . . . | 419                | 451  | 81                 | 49   | 1,000 |
| Sweden . . .  | 443                | 472  | 57                 | 28   | 1,000 |

The average age at which widowers and widows re-enter matrimony, and the ratio of second marriages, are as follows:—

|               | Marrying Age of |        | Second Marriages in 1000 |      |
|---------------|-----------------|--------|--------------------------|------|
|               | Widowers        | Widows | Husband                  | Wife |
| England . . . | 42.2            | 39.0   | 139                      | 98   |
| France . . .  | 42.4            | 38.0   | 119                      | 78   |
| Belgium . . . | 42.5            | 40.0   | 122                      | 87   |
| Holland . . . | 41.6            | 40.3   | 152                      | 102  |

The average duration of marriages is as follows:—

|               | Years |              | Years |               | Years |
|---------------|-------|--------------|-------|---------------|-------|
| England . . . | 27    | Russia . . . | 30    | Holland . . . | 23    |
| France . . .  | 26    | Norway . . . | 24    | Belgium . . . | 23    |
| Germany . . . | 26    | Sweden . . . | 23    | Jews . . .    | 25    |

In England, if the mother die first, the father survives 9½ years, but if the father die first, the mother survives 11½ years. In the English Census of 1871, the married people living had an average age of 42 years, and had been married 15 years. An enumeration of the inhabitants of Aggerhus, Norway, in 1763, showed that 150 couples had been over eighty years married. There are at least two cases on record of persons married over a dozen times; James Gay, who died at Bordeaux in 1772, aged 101, was married 16 times, having no children by any of his wives; Margaret M'Dowal, Scotland, died in 1768, having survived 13 husbands, aged 106.

Consanguineous marriages, that is, of uncles, nieces, aunts, nephews, and cousins, appear to be of a deteriorat-

ing tendency. Bertillon, indeed, says that they do not originate any new infirmity, while they multiply any hereditary defect, but most other writers show that they are a fertile source of new ills. Bemiss says 27 per cent. of such marriages prove barren; Lent, that 35 per cent. of the children are deaf mutes; Boudin, that 28 per cent. of deaf mutes in France are children of marriages within the fourth degree; Darwin, that 35 per 1000 of blind deaf mutes and lunatics in England are children of cousins-german; and Poucet, that 20 per cent. of such marriages in Mexico are childless. Boudin says that for one deaf mute of ordinary marriages there will be 18 if the parents are cousins, 37 if uncle and niece, and 70 if nephew and aunt. Marriages of cousins are commoner among Protestants than Catholics, and still more so among Jews: hence it is found at Berlin that there are—

|    |                                   |
|----|-----------------------------------|
| 3  | deaf mutes among 10,000 Catholics |
| 6  | " " 10,000 Protestants            |
| 27 | " " 10,000 Jews                   |

Of 1549 marriages contracted in Prussia in 1889 between blood relations, 1422 were between cousins, 110 between uncles and nieces, and 16 between aunts and nephews.

The ratio of consanguineous among 10,000 marriages, in the various countries, is as follows:—

|               |    |               |     |              |     |
|---------------|----|---------------|-----|--------------|-----|
| Prussia . . . | 67 | England . . . | 75  | France . . . | 126 |
| Italy . . .   | 69 | Alsace . . .  | 107 | Jews . . .   | 230 |

These marriages are increasing in France, but diminish- ing in Alsace and Italy, viz. :—

|              | Date    | No. per 10,000 | Date    | No. per 10,000 |
|--------------|---------|----------------|---------|----------------|
| France . . . | 1853-60 | 97             | 1861-71 | 126            |
| Alsace . . . | 1858-65 | 143            | 1872-75 | 107            |
| Italy . . .  | 1868-71 | 84             | 1872-75 | 69             |

They are always more frequent in rural districts than in towns:—

|               | Per 10,000 Marriages |       |         |
|---------------|----------------------|-------|---------|
|               | Rural                | Urban | General |
| England . . . | 79                   | 71    | 75      |
| France . . .  | 130                  | 115   | 126     |
| Alsace . . .  | 121                  | 41    | 107     |

Darwin says that 450 per 10,000 marriages among the nobility of England are consanguineous, being six times the average of such marriages in England; and it appears that 19 per cent. of the English nobility are childless, which is more than three times the averages for England. It appears, however, that in France the ratio of children to a marriage is highest where consanguineous marriages are most frequent; and that the blind, deaf mutes, and insane are decidedly increased by such marriages. The returns of all France for five years ending 1865 show the eighty-nine departments thus:—

| Depart-ments | Consanguineous per 10,000 Marriages | Children to 100 Marriages | Blind, Insane, &c., per 100,000 Population |
|--------------|-------------------------------------|---------------------------|--------------------------------------------|
| 20           | 69                                  | 303                       | 254                                        |
| 20           | 103                                 | 300                       | 275                                        |
| 20           | 124                                 | 320                       | 282                                        |
| 20           | 153                                 | 312                       | 348                                        |
| 9            | 195                                 | 329                       | 345                                        |
| 89           | 119                                 | 308                       | 290                                        |

Furthermore, the increase in France of blind, deaf

mutes, and insane has been simultaneous with a rise in this kind of marriages :—

| Period          | Consanguineous<br>per 10,000<br>Marriages | Blind, Insane, &c.,<br>per 100,000<br>Population |
|-----------------|-------------------------------------------|--------------------------------------------------|
| 1853-55 . . . . | 93                                        | 224                                              |
| 1856-60 . . . . | 100                                       | 279                                              |
| 1861-65 . . . . | 119                                       | 290                                              |
| 1866-71 . . . . | 126                                       | 292                                              |

The above table seems to show that consanguineous marriages increase the number of blind, insane, &c.

The ratio of these marriages of 100,000 in France, during fifteen years ending 1875, was as follows :—

|                     | Towns | Rural | All France |
|---------------------|-------|-------|------------|
| Nephew and aunt . . | 16    | 24    | 21         |
| Uncle and niece . . | 60    | 56    | 58         |
| Cousins . . . .     | 960   | 1,190 | 1,131      |
| Total . . . .       | 1,036 | 1,270 | 1,212      |

The marriages with deceased wife's sister or husband's brother averaged 355 per 100,000 marriages.

In Italy in 1872-75 the ratio of consanguineous in 10,000 marriages was as follows :—

|                   |                      |                      |
|-------------------|----------------------|----------------------|
| Venice . . . . 24 | Lombardy . . . . 100 | Piedmont . . . . 131 |
| Naples . . . . 30 | Sicily . . . . 117   | Liguria . . . . 183  |

The ratio of the whole kingdom was 69, as already shown. In seven years ending 1874, of all consanguineous marriages 92 per cent. were of cousins, and 8 per cent. of uncles or aunts with nieces or nephews.

Regarding barrenness in marriages, it is commonly believed that 5 per cent. of marriages in Great Britain are sterile, and that sterility among women is half again more frequent than among men. A census taken in Prussia on this subject in 1842 showed 11 per 1000 males, 29 per 1000 females, and 34 per 1000 marriages were sterile.

The marriage-rate per 1000 inhabitants yearly in various countries was as follows :—

Persons Married Yearly per 1000

|           | 1841-50 | 1871-80 |             | 1841-50 | 1871-80 |
|-----------|---------|---------|-------------|---------|---------|
| England   | 16.1    | 16.3    | Sweden .    | 15.0    | 13.6    |
| France .  | 15.8    | 15.9    | Holland .   | 14.4    | 16.1    |
| Germany   | 17.4    | 17.7    | Belgium .   | 13.8    | 14.6    |
| Austria . | ...     | 17.1    | Denmark .   | 15.8    | 15.6    |
| Hungary   | ...     | 20.6    | Spain . .   | ...     | 15.1    |
| Italy . . | ...     | 15.3    | Switzerland | ...     | 15.3    |

From the above it appears that notwithstanding the improved condition of the working-classes, and the reduced price of food in all countries since 1850, the marriage-rate has not risen perceptibly. In Sweden and Denmark it has fallen. The following table, from observations in 1857-66, shows the marriage-rate among adults at various ages :—

| Age   | Married Yearly among 1000 of Each Class |       |        |       |         |       |
|-------|-----------------------------------------|-------|--------|-------|---------|-------|
|       | England                                 |       | France |       | Belgium |       |
|       | Men                                     | Women | Men    | Women | Men     | Women |
| 20-25 | 121                                     | 131   | 58     | 108   | 34      | 63    |
| 25-30 | 143                                     | 104   | 114    | 110   | 83      | 89    |
| 30-35 | 104                                     | 64    | 114    | 80    | 84      | 78    |
| 35-40 | 81                                      | 45    | 88     | 49    | 71      | 59    |
| 40-45 | 55                                      | 27    | 47     | 21    | 46      | 31    |
| 45-50 | 32                                      | 3     | 25     | 2     | 19      | 2     |

The marriage-rate yearly per 1000 persons of either sex between the ages of 15 and 60 was as follows :—

|                 | Men Women |    |                 | Men Women |    |
|-----------------|-----------|----|-----------------|-----------|----|
| England . . . . | 69        | 62 | Belgium . . . . | 41        | 44 |
| France . . . .  | 55        | 59 | Denmark . . . . | 60        | 61 |
| Holland . . . . | 54        | 51 | Norway . . . .  | 56        | 52 |

Observations in 1866-72 showed that the annual marriage-rate of 1000 unmarried persons, male and female, between 15 and 60 years of age was as follows :—

|                    |                    |                    |
|--------------------|--------------------|--------------------|
| England . . . . 65 | Prussia . . . . 71 | Belgium . . . . 51 |
| France . . . . 64  | Italy . . . . 58   | Switzerland . . 59 |

#### UNITED KINGDOM

In 1871 the married and unmarried of the three kingdoms stood in the following ratios :—

|                 | England |        | Scotland |        | Ireland |        | United Kingdom |        |
|-----------------|---------|--------|----------|--------|---------|--------|----------------|--------|
|                 | Male    | Female | Male     | Female | Male    | Female | Male           | Female |
| Married . . . . | 35.1    | 33.9   | 30.7     | 28.8   | 29.5    | 28.4   | 33.6           | 32.6   |
| Unmarried . . . | 61.3    | 58.6   | 66.0     | 62.8   | 66.8    | 62.1   | 62.8           | 59.4   |
| Widowed . . . . | 3.6     | 7.5    | 3.3      | 8.4    | 3.7     | 9.5    | 3.6            | 8.0    |
| Total . . . .   | 100.0   | 100.0  | 100.0    | 100.0  | 100.0   | 100.0  | 100.0          | 100.0  |

The married ratio in Ireland is remarkably low. The variations of condition in England since 1851 have been as follows :—

|                 | Males |       |       | Females |       |       |
|-----------------|-------|-------|-------|---------|-------|-------|
|                 | 1851  | 1861  | 1871  | 1851    | 1861  | 1871  |
| Married . . . . | 33.7  | 35.0  | 35.1  | 32.9    | 33.9  | 33.9  |
| Unmarried . . . | 62.6  | 61.3  | 61.3  | 59.8    | 58.8  | 58.6  |
| Widowed . . . . | 3.7   | 3.7   | 3.6   | 7.3     | 7.3   | 7.5   |
| Total . . . .   | 100.0 | 100.0 | 100.0 | 100.0   | 100.0 | 100.0 |

The variations in Scotland showed an increase of married people from 1851 to 1871, viz. :—

|                 | Males |       |       | Females |       |       |
|-----------------|-------|-------|-------|---------|-------|-------|
|                 | 1851  | 1861  | 1871  | 1851    | 1861  | 1871  |
| Married . . . . | 29.9  | 30.9  | 30.7  | 27.8    | 28.6  | 28.8  |
| Unmarried . . . | 66.8  | 65.8  | 66.0  | 63.8    | 63.0  | 62.8  |
| Widowed . . . . | 3.3   | 3.3   | 3.3   | 8.4     | 8.4   | 8.4   |
| Total . . . .   | 100.0 | 100.0 | 100.0 | 100.0   | 100.0 | 100.0 |

## MARRIAGE

385

## MARRIAGE

The figures for Ireland in 1881 show a rapid decline of the married ratio since 1871, viz. :—

|             | Males |       | Females |       |
|-------------|-------|-------|---------|-------|
|             | 1871  | 1881  | 1871    | 1881  |
| Married . . | 29.5  | 27.6  | 28.4    | 27.0  |
| Unmarried . | 66.8  | 68.5  | 62.1    | 63.4  |
| Widowed . . | 3.7   | 3.9   | 9.5     | 9.6   |
| Total . . . | 100.0 | 100.0 | 100.0   | 100.0 |

The marriage rate per 1000 population in the three kingdoms showed thus :—

| England     |          | Scotland    |          | Ireland     |          | U. Kingdom  |          |
|-------------|----------|-------------|----------|-------------|----------|-------------|----------|
| Year        | Per 1000 | Year        | Per 1000 | Year        | Per 1000 | Year        | Per 1000 |
| 1841-50 . . | 16.1     | ...         | ...      | ...         | ...      | ...         | ...      |
| 1851-60 . . | 16.9     | 1855-60 . . | 13.7     | ...         | ...      | ...         | ...      |
| 1861-70 . . | 16.7     | 1861-70 . . | 14.1     | 1864-70 . . | 10.5     | 1861-70 . . | 15.3     |
| 1871-80 . . | 16.3     | 1871-80 . . | 14.5     | 1871-80 . . | 9.3      | 1871-80 . . | 15.2     |
| 1881-89 . . | 14.8     | 1881-89 . . | 13.2     | 1881-89 . . | 8.7      | 1881-89 . . | 13.8     |

The ratios of marrying age in England in 1871-80 compare with those of 1838 as follows :—

| Age          | 1838  |       | 1871-80 |       |
|--------------|-------|-------|---------|-------|
|              | Men   | Women | Men     | Women |
| Under 20 . . | 33    | 142   | 35      | 149   |
| 20-30 . . .  | 758   | 697   | 731     | 680   |
| 30-40 . . .  | 127   | 105   | 144     | 111   |
| Over 40 . .  | 82    | 56    | 90      | 60    |
| Total . . .  | 1,000 | 1,000 | 1,000   | 1,000 |

### FRANCE

The ratios of married and unmarried in the whole population were at various dates as follows :—

| Year         | Males     |         |         |       | Females   |         |         |       |
|--------------|-----------|---------|---------|-------|-----------|---------|---------|-------|
|              | Unmarried | Married | Widowed | Total | Unmarried | Married | Widowed | Total |
| 1806 . . . . | 588       | 366     | 46      | 1,000 | 560       | 364     | 86      | 1,000 |
| 1836 . . . . | 578       | 377     | 45      | 1,000 | 542       | 363     | 95      | 1,000 |
| 1856 . . . . | 555       | 396     | 49      | 1,000 | 519       | 386     | 95      | 1,000 |
| 1866 . . . . | 545       | 403     | 52      | 1,000 | 498       | 404     | 98      | 1,000 |
| 1876 . . . . | 533       | 413     | 54      | 1,000 | 482       | 409     | 109     | 1,000 |

The marriage rate per 1000 population was as follows :—

| Period           | Period           | Period            |
|------------------|------------------|-------------------|
| 1801-10 . . 15.6 | 1831-40 . . 15.9 | 1861-70 . . 15.8  |
| 1811-20 . . 15.8 | 1841-50 . . 15.9 | 1871-80 . . 15.9  |
| 1821-30 . . 15.5 | 1851-60 . . 15.8 | 80 years . . 15.8 |

The *Demografia* of 1880 gives a table of the ages in France at which men or women become widowed, in ratios thus :—

| Age at Loss of Spouse | Town  |       | Rural |       |
|-----------------------|-------|-------|-------|-------|
|                       | Men   | Women | Men   | Women |
| Under 25 . .          | 22    | 35    | 14    | 22    |
| 25-30 . . .           | 91    | 78    | 56    | 46    |
| 30-40 . . .           | 231   | 198   | 178   | 158   |
| 40-50 . . .           | 206   | 220   | 171   | 190   |
| Over 50 . .           | 450   | 469   | 581   | 584   |
| Total . . .           | 1,000 | 1,000 | 1,000 | 1,000 |

There is a notable difference between town and country population as to the distribution of marriages in months. Taking the year's total as 1200, we find thus for the years 1861-65 :—

|               | Town | Rural | France |               | Town | Rural | France |
|---------------|------|-------|--------|---------------|------|-------|--------|
| January . .   | 114  | 135   | 128    | July . . . .  | 99   | 91    | 94     |
| February . .  | 135  | 164   | 152    | August . . .  | 88   | 63    | 72     |
| March . . .   | 54   | 49    | 52     | September .   | 99   | 85    | 90     |
| April . . . . | 115  | 109   | 111    | October . . . | 107  | 98    | 101    |
| May . . . .   | 99   | 95    | 97     | November . .  | 120  | 139   | 131    |
| June . . . .  | 110  | 120   | 116    | December . .  | 60   | 52    | 56     |
| Half year . . | 627  | 672   | 656    | Half year . . | 573  | 528   | 544    |

### GERMANY

The marriage rate of Prussia for sixty years down to 1876 averaged 18.1 per thousand. After the wars of 1815 and 1871 it rose 10 per cent. in the following year, and after the cholera visitations of 1831, 1848, 1856, 1866, and 1873, there was a rise of 1 per cent. Observations for eighteen years ending 1861 showed the marriage rate among the population over fourteen years of age was as follows :—

| Among          | Per 1000 Yearly |         |
|----------------|-----------------|---------|
|                | Males           | Females |
| Christians . . | 54.0            | 52.5    |
| Jews . . . .   | 49.0            | 44.9    |

In the same period it was found that the adult male and female population of Prussia showed thus :—

| Marrying Age  | Men   | Women |
|---------------|-------|-------|
| Under 20 . .  | 8     | 87    |
| 20-30 . . .   | 487   | 556   |
| 30-40 . . .   | 178   | 128   |
| 40-50 . . .   | 51    | 34    |
| Over 50 . .   | 24    | 8     |
| Never marry . | 252   | 187   |
| Total . . .   | 1,000 | 1,000 |

Of 1000 men who marry, it is found that—

332 marry younger women  
579 " women of same age  
89 " older women

Of 1000 Catholics who marry, the ratios show—

| In            | Married to |             |       |
|---------------|------------|-------------|-------|
|               | Catholics  | Protestants | Total |
| Towns . . .   | 863        | 137         | 1,000 |
| Rural parts . | 965        | 35          | 1,000 |
| All Prussia . | 935        | 65          | 1,000 |

In Bavaria, it appears that of 1000 marriages 681 are Roman Catholics, 254 Protestants, and 65 mixed. The duration of marriage in Leipzig, until death of husband and wife, shows the following ratios :—

| Years           | Ratio |
|-----------------|-------|
| Less than 5 . . | 186   |
| 5-10 . . . .    | 163   |
| 10-20 . . . .   | 243   |
| 20-30 . . . .   | 198   |
| 30-40 . . . .   | 143   |
| Over 40 . . .   | 67    |
| Total . . . .   | 1,000 |

The Census of 1885 gave the numbers of married and unmarried as follows :—

|                 | Prussia    |            |            | Germany    |            |            |
|-----------------|------------|------------|------------|------------|------------|------------|
|                 | Males      | Females    | Total      | Males      | Females    | Total      |
| Unmarried . . . | 8,670,000  | 8,355,000  | 17,025,000 | 14,250,000 | 13,895,000 | 28,145,000 |
| Married . . . . | 4,775,000  | 4,795,000  | 9,570,000  | 7,910,000  | 7,945,000  | 15,855,000 |
| Widowed . . . . | 450,000    | 1,270,000  | 1,720,000  | 775,000    | 2,080,000  | 2,855,000  |
| Total . . . . . | 13,895,000 | 14,420,000 | 28,315,000 | 22,935,000 | 23,920,000 | 46,855,000 |

## AUSTRIA-HUNGARY

In Vienna the observations for 1872-76 showed :—

|                     |       |                   |       |
|---------------------|-------|-------------------|-------|
| Husband older . . . | 503   | Catholics . . . . | 873   |
| Wife older . . . .  | 120   | Jews . . . . .    | 77    |
| Both same age . . . | 368   | Protestants . . . | 50    |
| Total . . . . .     | 1,000 | Total . . . . .   | 1,000 |

The marrying age for men averaged 32, women 27 years; and the mean duration of marriage was 16 years.

In Hungary, in 1874, the conditions of the people were :—

|                   | Males | Females |
|-------------------|-------|---------|
| Unmarried . . . . | 556   | 503     |
| Married . . . . . | 412   | 407     |
| Widowed . . . . . | 32    | 90      |
| Total . . . . .   | 1,000 | 1,000   |

The marrying age in Sweden was as follows :—

| Years            | Men   |       |       | Women |       |       | Men and Women |          |          |
|------------------|-------|-------|-------|-------|-------|-------|---------------|----------|----------|
|                  | Urban | Rural | Total | Urban | Rural | Total | Nobles        | Citizens | Peasants |
| Under 26 . . . . | 169   | 216   | 208   | 289   | 385   | 370   | 95            | 143      | 289      |
| 26-35 . . . . .  | 601   | 564   | 570   | 529   | 471   | 480   | 529           | 599      | 596      |
| 36-50 . . . . .  | 199   | 173   | 177   | 171   | 129   | 136   | 308           | 220      | 126      |
| Over 50 . . . .  | 31    | 47    | 45    | 11    | 15    | 14    | 68            | 38       | 29       |
| Total . . . . .  | 1,000 | 1,000 | 1,000 | 1,000 | 1,000 | 1,000 | 1,000         | 1,000    | 1,000    |

## NORWAY

The marriage-rate was per 1000 inhabitants as follows :—

| Period           | Period           | Period           |
|------------------|------------------|------------------|
| 1801-25 . . 16.2 | 1836-45 . . 14.5 | 1856-65 . . 14.4 |
| 1826-35 . . 15.0 | 1846-55 . . 15.5 | 1866-75 . . 13.7 |

The condition of the adult population, men and women, between the ages of 15 and 60 was in 1875 as follows :—

|                 | Men   |       |       | Women |       |       |
|-----------------|-------|-------|-------|-------|-------|-------|
|                 | Town  | Rural | Total | Town  | Rural | Total |
| Unmarried . . . | 480   | 470   | 472   | 474   | 446   | 451   |
| Married . . . . | 492   | 506   | 504   | 456   | 507   | 498   |
| Widowed . . . . | 28    | 24    | 24    | 70    | 47    | 51    |
| Total . . . . . | 1,000 | 1,000 | 1,000 | 1,000 | 1,000 | 1,000 |

The marrying age for men is rising, for women falling :—

| Period          | Average Age at Marriage |       |
|-----------------|-------------------------|-------|
|                 | Men                     | Women |
| 1841-50 . . . . | 30.4                    | 28.1  |
| 1861-70 . . . . | 30.9                    | 27.9  |

## ITALY

Observations for 1875-77 showed the marriage rate as follows :—

|                  |      |                  |      |                   |      |
|------------------|------|------------------|------|-------------------|------|
| Naples . . . . . | 18.4 | Lombardy . . . . | 17.0 | Tuscany . . . . . | 15.8 |
| Sicily . . . . . | 17.4 | Piedmont . . . . | 16.6 | Venice . . . . .  | 15.4 |

The general rate for the kingdom was 16.2.

## SWEDEN

In 1870 the male and female population over 15 years of age showed thus :—

|                   | Men   | Women |
|-------------------|-------|-------|
| Unmarried . . . . | 422   | 403   |
| Married . . . . . | 521   | 472   |
| Widowed . . . . . | 57    | 125   |
| Total . . . . .   | 1,000 | 1,000 |

Taking the year as 1200, the marriages according to months were :—

|                 |     |                |     |                 |     |
|-----------------|-----|----------------|-----|-----------------|-----|
| January . . . . | 50  | May . . . . .  | 84  | September . . . | 66  |
| February . . .  | 59  | June . . . . . | 102 | October . . . . | 158 |
| March . . . . . | 80  | July . . . . . | 66  | November . . .  | 173 |
| April . . . . . | 102 | August . . . . | 47  | December . . .  | 213 |

Taking the year as 1200, the marriages according to months stood thus :—

|                 |     |                |     |                 |     |
|-----------------|-----|----------------|-----|-----------------|-----|
| January . . . . | 75  | May . . . . .  | 77  | September . . . | 72  |
| February . . .  | 48  | June . . . . . | 158 | October . . . . | 132 |
| March . . . . . | 65  | July . . . . . | 146 | November . . .  | 144 |
| April . . . . . | 110 | August . . . . | 54  | December . . .  | 118 |

## BELGIUM

In Belgium the different Censuses showed as follows :—

## Males

|                 | 1846      | 1866      | 1880      |
|-----------------|-----------|-----------|-----------|
| Unmarried . . . | 1,417,000 | 1,546,000 | 1,761,000 |
| Married . . . . | 662,000   | 766,000   | 879,000   |
| Widowed . . . . | 85,000    | 108,000   | 118,000   |
| Total . . . . . | 2,164,000 | 2,420,000 | 2,758,000 |

## Females

|                 |           |           |           |
|-----------------|-----------|-----------|-----------|
| Unmarried . . . | 1,355,000 | 1,466,000 | 1,681,000 |
| Married . . . . | 661,000   | 763,000   | 876,000   |
| Widowed . . . . | 158,000   | 180,000   | 205,000   |
| Total . . . . . | 2,174,000 | 2,409,000 | 2,762,000 |

|                 | 1846       | 1866      | 1880      |
| Unmarried . . . | 2,772,000  | 3,012,000 | 3,442,000 |
| Married . . . . | 1,323,000  | 1,529,000 | 1,755,000 |
| Widowed . . . . | 243,000    | 288,000   | 323,000   |
| Total . . . . . | 4,338,000  | 4,829,000 | 5,520,000 |

Of males over 18 years of age the conditions were :—

|                 | 1846      | 1866      | 1880      |
|-----------------|-----------|-----------|-----------|
| Unmarried . . . | 582,000   | 646,000   | 672,000   |
| Married . . . . | 662,000   | 766,000   | 879,000   |
| Widowed . . . . | 85,000    | 108,000   | 118,000   |
| Total . . . . . | 1,329,000 | 1,520,000 | 1,669,000 |

Of females over 18 the returns showed thus :—

|                 | 1846      | 1866      | 1880      |
|-----------------|-----------|-----------|-----------|
| Unmarried . . . | 545,000   | 576,000   | 611,000   |
| Married . . . . | 660,000   | 761,000   | 874,000   |
| Widowed . . . . | 158,000   | 180,000   | 205,000   |
| Total . . . . . | 1,363,000 | 1,517,000 | 1,690,000 |

The condition of persons marrying showed these ratios :—

|                      | 1841-50 | 1851-60 | 1861-70 | 1871-80 |
|----------------------|---------|---------|---------|---------|
| Bachelor and maid .  | 80.8    | 82.1    | 82.6    | 83.7    |
| Bachelor and widow . | 5.0     | 4.9     | 4.9     | 5.1     |
| Widower and maid . . | 11.5    | 10.1    | 9.1     | 7.8     |
| Widower and widow .  | 2.7     | 2.9     | 3.4     | 3.4     |
| Total . . . . .      | 100.0   | 100.0   | 100.0   | 100.0   |

The ages of the parties marrying showed as follows :—

|                  | Men     |         | Women   |         |
|------------------|---------|---------|---------|---------|
|                  | 1841-50 | 1871-80 | 1841-50 | 1871-80 |
| Under 25 . . . . | 19.3    | 21.6    | 35.6    | 41.1    |
| 25-30 . . . . .  | 33.5    | 34.3    | 29.6    | 28.0    |
| 30-40 . . . . .  | 32.9    | 30.4    | 25.2    | 21.8    |
| 40-50 . . . . .  | 10.3    | 9.1     | 7.6     | 6.8     |
| 50-60 . . . . .  | 2.8     | 3.4     | 1.7     | 1.8     |
| 60-70 . . . . .  | 1.0     | 1.0     | 0.3     | 0.5     |
| Over 70 . . . .  | 0.2     | 0.2     | 0.0     | 0.0     |
| Total . . . . .  | 100.0   | 100.0   | 100.0   | 100.0   |

## SWITZERLAND

Of 1000 men married at Geneva there were :—

|                  | 1847-51 | 1872-76 |
|------------------|---------|---------|
| Genevans . . . . | 641     | 305     |
| Foreigners . . . | 359     | 695     |
| Total . . . . .  | 1,000   | 1,000   |

The children to 100 foreign fathers were 263 ; to Genevans, 242.

## RUSSIA

The marrying rate per 1000 inhabitants in 1875 was 20.2 among Greeks, 16.2 among Roman Catholics, 18.0 among Armenians, and 14.6 among Protestants.

## PORTUGAL

In 1860 the marriage rate was 12.2 per 1000, and in 1864 the population was composed thus :—

|                   | Male  | Female | Total |
|-------------------|-------|--------|-------|
| Unmarried . . . . | 635   | 617    | 626   |
| Married . . . . . | 321   | 296    | 308   |
| Widowed . . . . . | 44    | 87     | 66    |
| Total . . . . .   | 1,000 | 1,000  | 1,000 |

## ALGERIA

In 1872 the European population of the colony was :—

|                   | Male  | Female |
|-------------------|-------|--------|
| Unmarried . . . . | 621   | 504    |
| Married . . . . . | 342   | 384    |
| Widowed . . . . . | 37    | 112    |
| Total . . . . .   | 1,000 | 1,000  |

## FINLAND

The marriage rate averaged 16.0 from 1812 to 1840, and only 15.5 from 1851 to 1865.

## MATCHES

Sweden and Norway export 20,000 tons of wooden matches yearly, being nearly one-third of the quantity consumed in Europe per annum. The tax on matches in France averages 4d. per inhabitant.

## MEDICINE

The number of physicians and surgeons in various countries is stated as follows :—

|                    | Number | Per Million Population |
|--------------------|--------|------------------------|
| England . . . . .  | 15,090 | 550                    |
| Scotland . . . . . | 3,455  | 850                    |
| Ireland . . . . .  | 3,500  | 630                    |
| United Kingdom . . | 22,105 | 578                    |
| Russia . . . . .   | 13,475 | 155                    |
| Spain . . . . .    | 5,200  | 305                    |
| France . . . . .   | 14,380 | 380                    |
| Germany . . . . .  | 16,270 | 355                    |
| Austria . . . . .  | 10,690 | 275                    |
| Italy . . . . .    | 8,580  | 280                    |
| Holland . . . . .  | 1,860  | 410                    |
| Belgium . . . . .  | 2,160  | 390                    |
| Norway . . . . .   | 502    | 275                    |

The above is exclusive of army and navy doctors, of which there are these returns :—

|                      |     |
|----------------------|-----|
| French navy . . . .  | 666 |
| Russian navy . . . . | 413 |
| German navy . . . .  | 50  |
| United States navy . | 221 |

Dispensaries are maintained in the United Kingdom to give relief gratis to the poor. In England 972,000 persons received medical attendance and medicines gratis. In Ireland the cost of these institutions is £150,000 a year. In France 230,000 persons annually receive medicine free at a cost of £58,000. The number of medical students in London in October 1882 was 949. The Italian Universities turn out 630 physicians and surgeons yearly. The French Universities made 33,000 M.D.'s in eighty-two years, viz. :—

| Years           | No.   | Years            | No.    |
|-----------------|-------|------------------|--------|
| 1801-14 . . . . | 3,178 | 1849-69 . . . .  | 9,145  |
| 1815-30 . . . . | 6,423 | 1870-82 . . . .  | 5,901  |
| 1831-48 . . . . | 8,468 | 82 years . . . . | 33,115 |

The ratio of physicians in France is declining : in 1847 it was 510 per million, the progress of sanitary science

causing this decline, or perhaps the heavy tax on doctors, which Leroy-Beaulieu says produces £500,000 a year.

The progress of medicine in Austria proper is shown thus:—

|                         | 1840   | 1886   |
|-------------------------|--------|--------|
| Physicians, &c. . . . . | 9,440  | 13,228 |
| Midwives . . . . .      | 14,100 | 16,940 |
| Total . . . . .         | 23,540 | 30,168 |

The returns for Belgium show thus:—

|                         | 1850  | 1880  |
|-------------------------|-------|-------|
| Physicians, &c. . . . . | 2,786 | 3,189 |
| Midwives . . . . .      | 1,128 | 2,176 |
| Total . . . . .         | 3,914 | 5,365 |

In the above returns apothecaries are counted with physicians.

In Holland there are 803 graduated M.D.'s, 950 surgeons, 106 pensioned army doctors, 66 dentists, 750 midwives, and 752 apothecaries.

The death-rate of physicians is very high. The French army in the Crimea lost 7 per cent. of officers and 18 per cent. of surgeons.

The death-rate in England of physicians and civilians differs as follows:—

|                             | Age 20-54   |
|-----------------------------|-------------|
| Civilians . . . . .         | 12 per 1000 |
| Married doctors . . . . .   | 19 „        |
| Unmarried doctors . . . . . | 26 „        |

During the typhus plague in Ireland in 1843-47, no fewer than 66 per thousand of physicians died. Among the people 9 per cent. of deaths were from typhus, but among physicians 32 per cent.

## MENSTRUATION

The medium age at which it commences is stated in the *Dic. des Sciences Médicales* as follows:—

|                      | Years |                      | Years |
|----------------------|-------|----------------------|-------|
| Marseilles . . . . . | 13.9  | Manchester . . . . . | 15.3  |
| Corfu . . . . .      | 14.0  | Lyons . . . . .      | 15.5  |
| Hungary . . . . .    | 14.1  | Vienna . . . . .     | 15.7  |
| London . . . . .     | 15.1  | Halle . . . . .      | 16.0  |
| Paris . . . . .      | 15.2  | Copenhagen . . . . . | 16.8  |

Despine and Boismont give the following results respecting 8600 girls in France as the average ages at which it begins:—

|                        | Years | Months | Days |
|------------------------|-------|--------|------|
| Under 5 feet . . . . . | 14    | 7      | 14   |
| Over 5 „ . . . . .     | 14    | 9      | 21   |
| Dark eyes . . . . .    | 14    | 5      | 8    |
| Blue „ . . . . .       | 14    | 11     | 24   |

According to Guy and Murphy the average ages in England are:—

|                            | Years | Months | Days |
|----------------------------|-------|--------|------|
| London . . . . .           | 14    | 11     | 6    |
| Manchester . . . . .       | 14    | 10     | 9    |
| Rural population . . . . . | 16    | 1      | 24   |
| Urban . . . . .            | 15    | 4      | 9    |

In Calcutta and Bombay the averages are as follow:—

| Years              | Calcutta | Bombay |
|--------------------|----------|--------|
| Under 12 . . . . . | 29.4     | 15.2   |
| 12-14 . . . . .    | 47.8     | 48.2   |
| 14-16 . . . . .    | 18.9     | 24.9   |
| Over 16 . . . . .  | 3.9      | 11.7   |
| Total . . . . .    | 100.0    | 100.0  |

Dubois gives the age at which it stops as follows:—

|                  | Years |                    | Years |
|------------------|-------|--------------------|-------|
| Java . . . . .   | 30.0  | Poland . . . . .   | 47.1  |
| India . . . . .  | 32.5  | Norway . . . . .   | 48.1  |
| France . . . . . | 45.5  | Portugal . . . . . | 50.0  |

## METALS

The production is stated under *Mining*.

|                    | Conductors of |             |
|--------------------|---------------|-------------|
|                    | Heat          | Electricity |
| Gold . . . . .     | 100           | 94          |
| Platinum . . . . . | 98            | 16          |
| Silver . . . . .   | 97            | 74          |
| Copper . . . . .   | 90            | 100         |
| Iron . . . . .     | 37            | 16          |
| Zinc . . . . .     | 36            | 29          |
| Tin . . . . .      | 30            | 15          |
| Lead . . . . .     | 18            | 8           |

A wire 0.84 of a line in diameter will sustain the following weights:—

|                |         |                    |          |
|----------------|---------|--------------------|----------|
| Lead . . . . . | 28 lbs. | Silver . . . . .   | 187 lbs. |
| Tin . . . . .  | 35 „    | Platinum . . . . . | 274 „    |
| Zinc . . . . . | 110 „   | Copper . . . . .   | 302 „    |
| Gold . . . . . | 150 „   | Iron . . . . .     | 549 „    |

The fluid density is as follows:—

|                |      |                  |       |
|----------------|------|------------------|-------|
| Zinc . . . . . | 6.48 | Copper . . . . . | 8.22  |
| Iron . . . . . | 6.88 | Silver . . . . . | 9.51  |
| Tin . . . . .  | 7.03 | Lead . . . . .   | 10.37 |

## METEOROLOGY

*Air*.—In its pure state it is composed thus:—

|                           |    |
|---------------------------|----|
| Nitrogen . . . . .        | 77 |
| Oxygen . . . . .          | 21 |
| Other compounds . . . . . | 2  |

100

The percentage of oxygen varies as follows:—

| Locality                  | Percentage | Locality            | Percentage |
|---------------------------|------------|---------------------|------------|
| Sea-shore . . . . .       | 21.00      | Mines . . . . .     | 20.50      |
| Confined houses . . . . . | 20.75      | When candles go out | 18.50      |

The following table shows how oxygen varies with climate:—

|                         |        |                  |        |
|-------------------------|--------|------------------|--------|
| Ben Lomond . . . . .    | 20.940 | Berlin . . . . . | 20.953 |
| Atlantic . . . . .      | 20.942 | Paris . . . . .  | 20.956 |
| Lyons . . . . .         | 20.942 | Geneva . . . . . | 20.956 |
| Mediterranean . . . . . | 20.947 | Andes . . . . .  | 20.963 |
| Madrid . . . . .        | 20.949 |                  |        |

Air travels in England in healthy years about 4½ miles an hour, and 3½ in unhealthy. The percentage of carbonic acid ranges thus:—

|                       |     |                           |     |
|-----------------------|-----|---------------------------|-----|
| In country . . . . .  | .03 | In fogs . . . . .         | .07 |
| „ town . . . . .      | .04 | „ crowded lanes . . . . . | .13 |
| „ hospitals . . . . . | .05 | „ theatres . . . . .      | .30 |

Each adult inhales a gallon of air per minute, and consumes daily 30 oz. of oxygen. For the conversion of this oxygen a certain amount of food is required—say 13 oz. of carbon for a male, and 11 oz. for a female, equivalent to 3 lbs. bread and 2½ lbs. respectively. The proper allowance of air in barracks is 600 cubic feet per man in Europe, and 1000 in India: for hospitals, 1200 cubic feet per bed in Europe, and 1800 in India. Horses require in England 1600 cubic feet each, or nearly as much as three men.

The Scottish Meteorological Society report on the presence of ozone as follows:—May, 6.2; November, 5.3; annual average, 6.0.

The atmosphere of Paris shows the prevalence of ozone and bacteria in the various months as follows :—

|                 | Ozone at Mont<br>Souris per 1000<br>Cubic Metres<br>Air | Bacteria per Cubic<br>Metre Air |            |
|-----------------|---------------------------------------------------------|---------------------------------|------------|
|                 |                                                         | Mont Souris                     | Rue Rivoli |
| January . . .   | 3                                                       | 380                             | 2,200      |
| February . . .  | 9                                                       | 255                             | 1,850      |
| March . . .     | 8                                                       | 380                             | 4,600      |
| April . . .     | 7                                                       | 380                             | 6,400      |
| May . . .       | 7                                                       | 420                             | 6,900      |
| June . . .      | 9                                                       | 400                             | 6,450      |
| July . . .      | 12                                                      | 815                             | 6,370      |
| August . . .    | 8                                                       | 670                             | 6,350      |
| September . . . | 8                                                       | 630                             | 6,400      |
| October . . .   | 8                                                       | 480                             | 5,100      |
| November . . .  | 12                                                      | 290                             | 3,800      |
| December . . .  | 6                                                       | 230                             | 2,520      |
| Average . . .   | 8                                                       | 444                             | 4,910      |

The foregoing is taken from the *Dic. des Sciences Medicales*, but M. Miguel gives other results for 1882-83 as follows :—

|                      | Microbes per Cubic Metre |            |
|----------------------|--------------------------|------------|
|                      | Mont Souris              | Rue Rivoli |
| Spring . . .         | 550                      | 1,900      |
| Summer . . .         | ?                        | 3,900      |
| Autumn . . .         | 115                      | 2,060      |
| Winter . . .         | 115                      | 2,040      |
| Yearly average . . . | ...                      | 2,490      |

He adds that at a height of 6000 feet in the Swiss mountains no bacteria were found, and gives this table :—

*Bacteria in Ten Cubic Metres of Air.*

|                                           |        |
|-------------------------------------------|--------|
| 1. At a height of 2000 metres . . .       | 0      |
| 2. On the Lake of Thun (560 metres) . . . | 8      |
| 3. Near the Hotel Bellevue, Thun . . .    | 25     |
| 4. In a room of the hotel . . .           | 600    |
| 5. In the park at Mont Souris . . .       | 7,600  |
| 6. In the Rue de Rivoli, Paris . . .      | 55,000 |

M. Miguel's researches on the air of the wards of hospitals were carried out at the Hotel Dieu and the Hospital Notre Dame, and with the result that for the whole year the hospital air contained on an average 11,000 bacteria per cubic metre, as against 850 bacteria per cubic metre of the air of the Rue de Rivoli. The hospital bacteria reached their minimum at the time when the windows could be kept open, in June, July, and August—average, 5500—at a time when the bacteria in the street had attained a maximum of about 13,000, or 50 per cent. in excess of the average. The maximum of the hospital (28,000) was reached in January, when the weather was cold and the windows shut, and the average in the street had fallen to 160. Microbes multiply so fast that one may become 16 millions in twenty-four hours.

*Barometer.*—In London it usually ranges between 28.700 and 30.700, but it has exceeded the latter figure three times on record :—

|                         |        |
|-------------------------|--------|
| In 1778 . . .           | 30.935 |
| February 11, 1849 . . . | 30.895 |
| January 18, 1882 . . .  | 30.983 |

The lowest reading in London was on Christmas Day, 1821, namely, 28.016. The lowest reading known in the British Islands was at Ochertyre, near Crieff, Jan. 26, 1834: 27.332. The highest reading known also occurred in Scotland, Jan. 8-9, 1820, near Leith, when the reading was 31.065. The highest reading recorded in England was at St. Leonards, Hastings, Jan. 18, 1882: 30.990.

Mr. Glaisher's barometer in his various balloon ascents marked as follows :—

| Miles High | Inches | Miles High | Inches |
|------------|--------|------------|--------|
| 1 . . .    | 24.7   | 4 . . .    | 13.7   |
| 2 . . .    | 20.3   | 5 . . .    | 11.8   |
| 3 . . .    | 16.7   |            |        |

He therefore estimates for 10 miles 4.2 and for 15 miles 1.6 inches.

The mean height of barometer varies according to latitude, and in the northern hemisphere averages as follows :—

| Degree of<br>Latitude | Barometer | Degree of<br>Latitude | Barometer |
|-----------------------|-----------|-----------------------|-----------|
| 10 . . .              | 29.98     | 45 . . .              | 30.00     |
| 20 . . .              | 30.06     | 50 . . .              | 29.81     |
| 30 . . .              | 30.11     | 60 . . .              | 29.80     |
| 40 . . .              | 30.02     | 67 . . .              | 29.67     |

But in latitudes south of 25° S. the decrease is very much more rapid, the mean elevation in 55° S. being about 29.30. It also varies according to elevation, the reading diminishing approximately at the rate of 1 inch for 1000 feet. The actual mean readings at different places are as follows :—

| Place             | Feet over<br>Sea | Mean Height<br>of Barometer | Boiling-point<br>(Fahrenheit). |
|-------------------|------------------|-----------------------------|--------------------------------|
| Sea-level . . .   | 0                | 30.00                       | 212.0                          |
| Rome . . .        | 151              | 29.76                       | 211.6                          |
| Milan . . .       | 420              | 29.45                       | 211.1                          |
| Moscow . . .      | 984              | 28.82                       | 210.2                          |
| Geneva . . .      | 1,221            | 28.54                       | 209.5                          |
| Munich . . .      | 1,765            | 27.95                       | 208.6                          |
| Madrid . . .      | 1,995            | 27.72                       | 208.0                          |
| Briançon . . .    | 4,285            | 25.39                       | 203.9                          |
| St. Remo . . .    | 5,265            | 24.45                       | 202.1                          |
| St. Gothard . . . | 6,808            | 23.07                       | 199.2                          |
| Mexico . . .      | 7,471            | 22.52                       | 198.1                          |
| Bogota . . .      | 8,731            | 21.42                       | 195.6                          |
| Quito . . .       | 9,541            | 20.75                       | 194.2                          |
| Antisana . . .    | 13,455           | 17.87                       | 187.4                          |

Atmospheric pressure, moreover, varies at the same place with the season. For example, at Ben Nevis, height 4300 feet, the mean pressure marks thus :—

|                |       |                 |       |
|----------------|-------|-----------------|-------|
| January . . .  | 25.16 | July . . .      | 25.43 |
| February . . . | 25.49 | August . . .    | 25.42 |
| March . . .    | 25.39 | September . . . | 25.36 |
| April . . .    | 25.38 | October . . .   | 25.45 |
| May . . .      | 25.47 | November . . .  | 25.09 |
| June . . .     | 25.68 | December . . .  | 25.09 |

The mean pressure for the year was 25.37, or nearly the same as that of Briançon, which is 4300 feet over sea-level.

Martin publishes the following table of the average number of monthly oscillations of the barometer at various towns in France :—

|                   | Summer | Winter | Year |
|-------------------|--------|--------|------|
| Bordeaux . . .    | 14     | 29     | 22   |
| Dijon . . .       | 11     | 26     | 19   |
| Marseilles . . .  | 17     | 23     | 20   |
| Metz . . .        | 14     | 26     | 20   |
| Montpellier . . . | 13     | 23     | 18   |
| Mulhouse . . .    | 13     | 27     | 20   |
| Nantes . . .      | 15     | 29     | 22   |
| Paris . . .       | 17     | 31     | 24   |
| Rochelle . . .    | 16     | 32     | 24   |
| Strasbourg . . .  | 15     | 29     | 22   |

*Clouds.*—The University of Upsala has (1884-85) determined the average height of clouds thus :—

|               | Yards |                      | Yards |
|---------------|-------|----------------------|-------|
| Stratus . . . | 685   | Strato-cumulus . . . | 2,560 |
| Nimbus . . .  | 1,680 | Cirro-cumulus . . .  | 7,110 |
| Cumulus . . . | 2,040 | Cirrus . . .         | 9,760 |

**Evaporation.**—Gasparim's table estimates 25 inches for the level parts of France, 27 for the western coast, 35 for the hilly country, and 40 for the Southern Departments. He also gives twelve cities thus:—

| Inches          | Inches            | Inches          |
|-----------------|-------------------|-----------------|
| Arles . . . 90  | Marseilles . . 96 | Rome . . . 98   |
| Bordeaux . . 82 | Paris . . . 24    | Rotterdam . 27  |
| Geneva . . . 48 | Poitiers . . . 32 | Toulouse . . 26 |
| Lille . . . 36  | Rochelle . . 25   | Troyes . . . 33 |

**Hail.**—1656, July 20th, Norwich, wrecked houses and killed many persons.

1697, May 4th, killed sheep in many parts of England.

1775, May 13th, Murcia, Spain, hailstones like oranges, weighing 20 oz.

1844, in Languedoc, pieces of ice fell weighing 11 lbs.

1874, New Jersey, U.S., hailstones like turkey eggs.

Damage to crops in France by hail since 1850 has averaged £1,420,000 per annum.

**Magnetic Observations.**—At Paris the magnetic declension was recorded thus:—

| Year             | Year           | Year           |
|------------------|----------------|----------------|
| 1580. . 11.30 E. | 1700 . 8.10 W. | 1835 . 22.4 W. |
| 1618. . 8.0 .    | 1780 . 19.55 . | 1851 . 20.25 . |
| 1663. . 0 .      | 1805 . 25.5 .  | 1861 . 19.6 .  |

The variations of the needle at Paris showed the following angle of inclination:—

| Year           | Year           | Year           |
|----------------|----------------|----------------|
| 1671 . . 75.0  | 1798 . . 69.51 | 1831 . . 67.40 |
| 1754 . . 72.15 | 1806 . . 69.12 | 1851 . . 66.35 |
| 1780 . . 71.48 | 1820 . . 68.20 | 1861 . . 66.7  |

The following table of magnetic intensity is chiefly from Humboldt:—

|                      | North Latitude | Magnetic Intensity |
|----------------------|----------------|--------------------|
| Peruvian Andes . . . | ...            | 1.087              |
| Carthegena . . .     | 10.25          | 1.294              |
| Naples . . .         | 40.50          | 1.274              |
| Lyons . . .          | 45.46          | 1.333              |
| Paris . . .          | 48.52          | 1.348              |
| St. Petersburg . . . | 59.46          | 1.410              |
| Berlin . . .         | 52.51          | 1.366              |
| Christiania . . .    | 59.55          | 1.419              |
| Brussels . . .       | 50.52          | 1.374              |
| Baffin's Bay . . .   | 12.43          | 1.590              |
| Spitzbergen . . .    | 79.40          | 1.562              |
| New York . . .       | 40.43          | 1.803              |

**Meteors.**—November 27, 1885, the Greenwich Observatory counted 3000 between 6 and 11 P.M.: first hour at intervals 40 per minute; at 9 P.M. about 20.

On November 14, 1868, the Observatory at Philadelphia counted 4800 between 12.20 and 5 A.M.

**Mineral Heat.**—The temperature of water being taken as 100, that of the various minerals is as follows:—

|                      |                       |
|----------------------|-----------------------|
| Lead . . . . . 29    | Copper . . . . . 95   |
| Mercury . . . . . 33 | Iron . . . . . 110    |
| Silver . . . . . 56  | Glass . . . . . 117   |
| Zinc . . . . . 93    | Sulphur . . . . . 188 |

The average rainfall is heaviest near the Equator, and diminishes as the latitude rises, viz:—

| Latitude     | Inches Rainfall |
|--------------|-----------------|
| 0 . . . . .  | 100             |
| 20 . . . . . | 80              |
| 30 . . . . . | 60              |
| 40 . . . . . | 40              |
| 50 . . . . . | 30              |
| 60 . . . . . | 20              |
| 70 . . . . . | 10              |
| 80 . . . . . | 5               |

**Rainfall.**—The rainfall according to seasons (Gasparim) is as follows, in inches:—

|                     | Spring | Summer | Autumn | Winter | Year |
|---------------------|--------|--------|--------|--------|------|
| England . . .       | 6      | 8      | 10     | 8      | 32   |
| Scandinavia . .     | 3      | 7      | 6      | 3      | 19   |
| Russia . . .        | 2      | 7      | 4      | 4      | 17   |
| France . . .        | 6      | 9      | 7      | 5      | 27   |
| Germany . . .       | 5      | 8      | 6      | 5      | 24   |
| Italy . . .         | 5      | 5      | 7      | 20     | 37   |
| Europe . . .        | 4      | 7      | 7      | 5      | 23   |
| United States . .   | 11     | 11     | 12     | 11     | 45   |
| Atlantic States . . | 11     | 11     | 11     | 3      | 36   |
| Southern . . .      | 13     | 17     | 11     | 14     | 55   |
| Western . . .       | 6      | 11     | 6      | 3      | 26   |
| Pacific . . .       | 12     | 7      | 18     | 25     | 62   |
| Australia . . .     | 8      | 9      | 12     | 6      | 35   |
| West Indies . . .   | 31     | 22     | 27     | 8      | 88   |
| Sierra Leone . .    | 12     | 65     | 46     | 2      | 125  |
| Patagonia . . .     | 3      | 3      | 6      | 3      | 15   |

The heaviest rainfalls recorded in the United Kingdom have been:—

7 inches at Ardrishaig, Argyle, on 7th Dec. 1863.  
4½ inches at London on 13th April 1878.

It is stated that 24 inches have fallen at Bombay in 24 hours, also 30 inches at the Khasi Hills, India, 30 at Genoa, and 33 at Gibraltar.

The wettest place in England is Seathwaite, 145 inches; and in the world Cherrapunji, in South-Western Assam, where the average for 15 years is 493 inches, reaching in 1861 up to 905 inches.

The rainfall of the United Kingdom (54 stations), European Continent (45 stations), and the United States (34 stations), from 1824 to 1867, was:—

| Period        | Inches per Annum |                    |               |
|---------------|------------------|--------------------|---------------|
|               | United Kingdom   | European Continent | United States |
| 1824-30 . . . | 29               | 25                 | 44            |
| 1831-40 . . . | 29               | 29                 | 40            |
| 1841-50 . . . | 31               | 29                 | 48            |
| 1851-60 . . . | 33               | 26                 | 40            |
| 1861-67 . . . | 38               | 25                 | ...           |

The rainfall of various countries reduced to horse-power is valued as follows:—

|                    | Horse-power |                   | Horse-power |
|--------------------|-------------|-------------------|-------------|
| United Kingdom . . | 9,300,000   | Russia . . .      | 77,700,000  |
| France . . .       | 12,000,000  | Italy . . .       | 8,500,000   |
| Germany . . .      | 11,800,000  | United States . . | 430,200,000 |

The average in inches is as follows, yearly:—

| Inches            | Inches           | Inches            |
|-------------------|------------------|-------------------|

#### RAINFALL OF UNITED KINGDOM

The average annual rainfall of Great Britain since 1815 has been as follows:—

| Years             | Inches | Years             | Inches |
|-------------------|--------|-------------------|--------|
| 1815-24 . . . . . | 29.0   | 1845-54 . . . . . | 28.6   |
| 1825-34 . . . . . | 28.5   | 1855-64 . . . . . | 26.6   |
| 1835-44 . . . . . | 28.3   | 1865-72 . . . . . | 29.3   |

The average rainfall is equal to 630,000 gallons (almost 3000 tons) per acre per annum, of which 2000 tons are required to feed the rivers and crops, and 1000 tons per acre are lost, being allowed to run off. The above does not include Ireland, where the rainfall averages 35 inches. Scotland appears to have less rainfall than England or Ireland.

The rainfall of the United Kingdom is shown in months thus :—

|                 | England<br>(1815-48) | U. Kingdom<br>(1850-59) | Scotland | Ireland |
|-----------------|----------------------|-------------------------|----------|---------|
|                 | Inches               | Inches                  | Inches   | Inches  |
| January . . .   | 1.7                  | 3.4                     | 3.3      | 4.0     |
| February . . .  | 1.6                  | 2.2                     | 2.2      | 2.8     |
| March . . .     | 1.6                  | 2.0                     | 2.1      | 2.3     |
| April . . .     | 1.7                  | 2.1                     | 1.9      | 2.8     |
| May . . .       | 2.0                  | 1.8                     | 1.6      | 2.1     |
| June . . .      | 1.8                  | 2.5                     | 2.2      | 2.7     |
| July . . .      | 2.4                  | 2.9                     | 2.6      | 3.0     |
| August . . .    | 2.4                  | 3.0                     | 2.6      | 3.2     |
| September . . . | 2.4                  | 2.7                     | 2.5      | 2.5     |
| October . . .   | 2.7                  | 3.5                     | 3.1      | 3.0     |
| November . . .  | 2.5                  | 3.0                     | 2.9      | 3.0     |
| December . . .  | 2.0                  | 3.0                     | 3.0      | 3.6     |
| Year . . .      | 24.8                 | 32.1                    | 30.0     | 35.0    |

The quantity of ammonia in rain differs greatly with locality, viz :—

|                            |       |                  |       |
|----------------------------|-------|------------------|-------|
| Valentia, Kerry . . .      | 1.00  | Germany . . .    | 10.61 |
| Scotland, West Coast . . . | 2.69  | London . . .     | 19.17 |
| " mountains . . .          | 2.96  | Scotland . . .   | 21.22 |
| " East Coast . . .         | 5.51  | Liverpool . . .  | 29.89 |
| England, East Coast . . .  | 5.94  | Manchester . . . | 36.54 |
| " West Coast . . .         | 10.55 | Glasgow . . .    | 50.58 |

The average rainfall in London for seventy years has been :—

|                         |       |
|-------------------------|-------|
| Summer, half-year . . . | 12.87 |
| Winter " . . .          | 12.03 |

Annual rainfall . . . 24.90

Taking the above figures as par, the variations of seventy years have been as follows :—

|         | Summer | Winter | Year |         | Summer | Winter | Year |
|---------|--------|--------|------|---------|--------|--------|------|
| 1813-22 | 97     | 110    | 103  | 1853-62 | 105    | 85     | 95   |
| 1823-32 | 108    | 93     | 101  | 1863-72 | 93     | 107    | 100  |
| 1833-42 | 92     | 99     | 95   | 1873-82 | 110    | 106    | 108  |
| 1843-52 | 95     | 101    | 98   |         |        |        |      |

#### RAINFALL OF FRANCE.

Raulins states the rainfall according to seasons in France and Geneva thus :—

|                      | Inches |        |        |        |      |
|----------------------|--------|--------|--------|--------|------|
|                      | Spring | Summer | Autumn | Winter | Year |
| Agen . . .           | 7.6    | 6.4    | 7.4    | 6.2    | 27.6 |
| Arles . . .          | 5.4    | 3.2    | 8.0    | 5.5    | 22.1 |
| Auxerre . . .        | 5.8    | 8.7    | 6.2    | 5.0    | 25.7 |
| B. Bigorre . . .     | 18.6   | 10.2   | 13.2   | 11.7   | 53.7 |
| Bayonne . . .        | 12.5   | 10.4   | 16.1   | 12.7   | 51.7 |
| Beauvais . . .       | 5.1    | 6.1    | 6.3    | 4.8    | 22.3 |
| Besançon . . .       | 5.8    | 10.1   | 6.8    | 2.6    | 25.3 |
| Blois . . .          | 7.1    | 5.9    | 7.1    | 5.3    | 25.4 |
| Bordeaux . . .       | 6.8    | 7.0    | 9.1    | 8.8    | 31.7 |
| Calais . . .         | 6.5    | 5.0    | 9.3    | 8.6    | 29.4 |
| Cambray . . .        | 3.2    | 6.7    | 4.7    | 1.9    | 16.5 |
| Carcassonne . . .    | 9.2    | 5.2    | 7.6    | 7.4    | 29.4 |
| Chalons, Saone . . . | 5.1    | 7.4    | 7.8    | 4.6    | 24.9 |
| Clermont . . .       | 5.2    | 6.5    | 5.9    | 3.6    | 21.2 |
| Dijon . . .          | 6.3    | 7.1    | 8.7    | 5.8    | 27.9 |
| Geneva . . .         | 7.4    | 9.2    | 10.5   | 6.5    | 33.6 |
| Grenoble . . .       | 9.2    | 9.7    | 11.8   | 8.2    | 38.9 |
| Lille . . .          | 5.6    | 7.5    | 7.6    | 6.0    | 26.7 |
| Limoges . . .        | 8.2    | 8.7    | 10.0   | 8.4    | 35.3 |
| Lyon . . .           | 6.9    | 7.8    | 8.5    | 4.1    | 27.3 |
| Marseilles . . .     | 4.2    | 2.0    | 8.2    | 4.7    | 19.1 |
| Metz . . .           | 6.1    | 8.2    | 7.0    | 5.6    | 26.9 |
| Montpellier . . .    | 8.0    | 4.3    | 13.2   | 9.3    | 34.8 |
| Nancy . . .          | 6.7    | 8.2    | 7.4    | 6.2    | 28.5 |
| Nice . . .           | 7.2    | 3.2    | 12.4   | 8.8    | 31.6 |

|                  | Inches |        |        |        |      |
|------------------|--------|--------|--------|--------|------|
|                  | Spring | Summer | Autumn | Winter | Year |
| Nismes . . .     | 6.2    | 4.0    | 9.1    | 5.5    | 24.8 |
| Orleans . . .    | 6.4    | 6.9    | 7.0    | 5.1    | 25.4 |
| Pau . . .        | 16.2   | 9.0    | 12.0   | 10.4   | 47.6 |
| Poitiers . . .   | 5.3    | 5.0    | 7.0    | 5.8    | 23.1 |
| Rheims . . .     | 4.0    | 5.9    | 5.4    | 3.5    | 18.8 |
| Rochelle . . .   | 4.6    | 3.7    | 8.5    | 6.9    | 23.7 |
| Rouen . . .      | 6.0    | 7.5    | 7.7    | 6.2    | 27.4 |
| Strasbourg . . . | 7.0    | 9.5    | 6.7    | 4.3    | 27.5 |
| Toulon . . .     | 6.4    | 1.8    | 12.2   | 8.5    | 28.9 |
| Toulouse . . .   | 6.9    | 5.9    | 5.9    | 4.7    | 23.4 |
| Tours . . .      | 5.2    | 5.6    | 7.0    | 4.6    | 22.4 |
| Valence . . .    | 8.7    | 7.4    | 14.9   | 6.0    | 37.0 |
| Average . . .    | 7.0    | 6.6    | 8.7    | 6.4    | 28.7 |

The annual rainfall of Paris has been as follows :—

| Period          | Ins. | Period          | Ins. | Period          | Ins. |
|-----------------|------|-----------------|------|-----------------|------|
| 1689-1747 . . . | 18   | 1789-1818 . . . | 18   | 1849-1872 . . . | 21   |
| 1748-1788 . . . | 21   | 1819-1848 . . . | 21   | 1873-1882 . . . | 23   |

The total rainfall of France is as follows :—

|                             | Million Tons<br>per Annum | Tons per<br>Second |
|-----------------------------|---------------------------|--------------------|
| Outflow by Rhone . . .      | 54,000                    | 1,718              |
| " Gironde . . .             | 37,000                    | 1,178              |
| " Loire . . .               | 31,000                    | 985                |
| " Seine . . .               | 22,000                    | 694                |
| Other rivers . . .          | 36,000                    | 1,146              |
| Absorbed for crops, &c. . . | 195,000                   | 6,180              |
| Total . . .                 | 375,000                   | 11,501             |

France loses nearly half her rainfall, England more than one-third.

Snow.—The average number of days on which snow falls in a year is as follows :—

|                  |    |                    |     |                      |    |
|------------------|----|--------------------|-----|----------------------|----|
| Aberdeen . . .   | 42 | Macon . . .        | 21  | St. Petersburg . . . | 62 |
| Brussels . . .   | 24 | Madrid . . .       | 3   | Saragossa . . .      | 5  |
| Charleston . . . | 2  | Milan . . .        | 11  | Sebastopol . . .     | 12 |
| Copenhagen . . . | 23 | Moscow . . .       | 71  | Sienna . . .         | 6  |
| Dublin . . .     | 15 | Newfoundland . . . | 78  | Strasbourg . . .     | 16 |
| Florence . . .   | 2  | Odessa . . .       | 19  | Trieste . . .        | 6  |
| Geneva . . .     | 20 | Ostend . . .       | 15  | Turin . . .          | 9  |
| Greenland . . .  | 80 | Oxford . . .       | 18  | Upsal . . .          | 61 |
| Grenoble . . .   | 18 | Paris . . .        | 13  | Vancouver . . .      | 7  |
| Halifax . . .    | 64 | Quebec . . .       | 66  | Vienna . . .         | 33 |
| Hamburg . . .    | 18 | Rome . . .         | 2   | Warsaw . . .         | 45 |
| Iceland . . .    | 46 | St. Gothard . . .  | 116 | Winnipeg . . .       | 54 |
| Lisbon . . .     | 1  | St. Louis . . .    | 11  | Yakutsk . . .        | 55 |

The most remarkable snowfalls in England have been in the following years :—

|      |      |      |      |
|------|------|------|------|
| 1141 | 1683 | 1784 | 1814 |
| 1606 | 1709 | 1799 | 1820 |
| 1674 | 1762 | 1812 | 1836 |

The earliest snow of the season was that of October 7th, 1829, in the present century. There was no snow from November 1862 till February 1864.

The line of perpetual snow varies with latitude, and is as follows in feet above sea-level :—

| Lat.                      | Feet   | Lat.              | Feet   |
|---------------------------|--------|-------------------|--------|
| 0 . . .                   | 15,260 | 40 . . .          | 9,000  |
| 10 . . .                  | 14,764 | 50 . . .          | 6,334  |
| 20 . . .                  | 13,478 | 60 . . .          | 3,818  |
| 30 . . .                  | 11,484 | 70 . . .          | 1,278  |
|                           | Feet   |                   | Feet   |
| Norway . . .              | 2,400  | Himalayas, S. . . | 13,100 |
| Iceland . . .             | 3,090  | Abyssinia . . .   | 14,200 |
| Straits of Magellan . . . | 4,700  | Ararat . . .      | 14,300 |
| Siberia . . .             | 4,800  | Mexico . . .      | 14,800 |
| Alps . . .                | 8,940  | Andes, E. . .     | 15,800 |
| Pyrenees . . .            | 9,000  | Chilian do. . .   | 15,000 |
| Caucasus . . .            | 11,100 | Himalayas, N. . . | 16,700 |
| S. Nevada . . .           | 11,200 | Andes, W. . .     | 18,600 |

**Storms.**—The most destructive in the United Kingdom have been :—

1703, November 27th.—Damage in London, £2,000,000. On the coast twelve war-ships sunk and 1800 men lost.

1775, October 29th.—Almost equal to the above. Houses blown down and ships sunk.

1839, January 6th.—Many houses blown down at Liverpool and Dublin, and 200 persons killed at Liverpool.

1859, October 25th.—Great loss of shipping, including the "Royal Charter" near Holyhead.

1879, December 28th.—Tay Bridge blown down; loss of 90 lives. See *Wind-pressure*.

**Submarine Temperature.**—The decrease of temperature with depth varies according to latitude: thus 500 fathoms at the Equator make a difference of 39 degrees Fahr. from the surface, while abreast of Lisbon it would be only 23 degrees, and at the Farol Islands little over 10 degrees.

The following table shows the variations thus :—

|                       | Degrees Fahrenheit |            |
|-----------------------|--------------------|------------|
|                       | Equator            | Off Lisbon |
| Surface . . . . .     | 78                 | 70         |
| 100 fathoms . . . . . | 56                 | 64         |
| 500 . . . . .         | 39                 | 47         |
| 1,000 . . . . .       | 37                 | 38         |
| 1,500 . . . . .       | 36                 | 37         |
| 2,700 . . . . .       | 35                 | 35         |

The average depth of the Mediterranean is 800 fathoms, and the temperature at the bottom is found to average 54° Fahr. The Red Sea, with surface temperature of 90°, was found to have 70° Fahr. at the bottom—a depth of 400 fathoms—which is rather more than the difference quoted above at the Equator.

**Subterranean Temperature.**—Subterranean temperature seems the same in the southern as in the northern hemisphere, a well at Buenos Ayres showing (in winter) 97° Fahr. at a depth of 2000 ft.

The variations of a well in Yorkshire, 350 ft. deep, according to season, have been recorded thus :—

|                    | At 100 Feet | At 350 Feet |
|--------------------|-------------|-------------|
| April . . . . .    | 45          | 42          |
| June . . . . .     | 65          | 46          |
| December . . . . . | 41          | 43          |

The following table shows a variety of mines and borings, and the average increase of temperature per 1000 feet :—

|                         | Depth, Feet | Increase, Fahr. per 1000 Feet |
|-------------------------|-------------|-------------------------------|
| Flint . . . . .         | 1,041       | 12.5                          |
| Kentish Town . . . . .  | 1,100       | 18.0                          |
| Whitehaven . . . . .    | 1,250       | 22.0                          |
| Grenelle . . . . .      | 1,312       | 17.3                          |
| Schemnitz . . . . .     | 1,368       | 13.3                          |
| Bootle . . . . .        | 1,392       | 7.7                           |
| Monkwearmouth . . . . . | 1,584       | 14.3                          |
| Seraing . . . . .       | 1,657       | 20.0                          |
| Praibrau . . . . .      | 1,900       | 8.0                           |
| Lincoln . . . . .       | 2,000       | 14.5                          |
| Rosebridge . . . . .    | 2,443       | 18.4                          |
| Ashton Moss . . . . .   | 2,790       | 13.0                          |
| Speremberg . . . . .    | 3,500       | 19.4                          |
| Bohemian Mine . . . . . | 4,600       | 16.5                          |
| Mont Cenis . . . . .    | 5,280       | 12.6                          |
| St. Gothard . . . . .   | 5,578       | 12.2                          |

The temperature at various depths in the Rosebridge, Speremberg, and the Bohemian mine above mentioned was as follows :—

| Bohemian   |       | Speremberg |       | Rosebridge |       |
|------------|-------|------------|-------|------------|-------|
| Depth, Ft. | Fahr. | Depth, Ft. | Fahr. | Depth, Ft. | Fahr. |
| 300        | 49    | 720        | 71    | 480        | 65    |
| 600        | 51    | 1,130      | 80    | 600        | 66    |
| 1,200      | 58    | 1,550      | 84    | 1,800      | 80    |
| 1,650      | 61    | 2,160      | 97    | 2,200      | 89    |
| 4,600      | 120   | 3,500      | 116   | 2,450      | 94    |

**Sun Spots.**—Wolf's table for sixty-six years showed as follows :—

| Period            | Maximum Year | Number of Spots | Minimum Year | Number of Spots |
|-------------------|--------------|-----------------|--------------|-----------------|
| 1811-20 . . . . . | 1816         | 47              | 1811         | 2               |
| 1821-30 . . . . . | 1829         | 67              | 1823         | 3               |
| 1831-40 . . . . . | 1837         | 136             | 1833         | 9               |
| 1841-50 . . . . . | 1848         | 125             | 1843         | 13              |
| 1851-60 . . . . . | 1860         | 95              | 1856         | 5               |
| 1861-70 . . . . . | 1870         | 132             | 1867         | 9               |
| 1871-77 . . . . . | 1871         | 114             | 1877         | 7               |

**Thunder.**—The average number of days of thunder yearly in France is :—

|                      |    |                      |    |                    |    |
|----------------------|----|----------------------|----|--------------------|----|
| Marseilles . . . . . | 11 | Toulouse . . . . .   | 16 | Poitiers . . . . . | 20 |
| Paris . . . . .      | 14 | Strasbourg . . . . . | 17 | Nancy . . . . .    | 20 |
| Rouen . . . . .      | 15 | Metz . . . . .       | 18 | Mulhouse . . . . . | 26 |

**Thermometer.**—The mean temperature of the various cities of the world in degrees Fahrenheit is :—

|                      | January | February | March | April | May | June | July | August | September | October | November | December | Year | Range |
|----------------------|---------|----------|-------|-------|-----|------|------|--------|-----------|---------|----------|----------|------|-------|
| Aberdeen . . . . .   | 37      | 38       | 41    | 45    | 52  | 56   | 59   | 58     | 55        | 48      | 42       | 40       | 48   | 12    |
| Adelaide . . . . .   | 74      | 74       | 70    | 65    | 58  | 54   | 52   | 54     | 57        | 63      | 67       | 71       | 63   | 22    |
| Agra . . . . .       | 60      | 65       | 76    | 88    | 94  | 95   | 87   | 86     | 84        | 80      | 70       | 62       | 79   | 35    |
| Ajaccio . . . . .    | 50      | 52       | 54    | 58    | 62  | 70   | 76   | 78     | 72        | 64      | 56       | 51       | 62   | 28    |
| Albany . . . . .     | 24      | 25       | 35    | 47    | 59  | 68   | 72   | 70     | 61        | 49      | 39       | 28       | 48   | 48    |

The States of highest and lowest mean annual temperature are:—

| Highest             | Fahr. | Lowest             | Fahr. |
|---------------------|-------|--------------------|-------|
| Texas . . . . .     | 74    | Vermont . . . . .  | 42    |
| Florida . . . . .   | 72    | Maine . . . . .    | 43    |
| Louisiana . . . . . | 68    | Michigan . . . . . | 43    |

The following table shows the greatest degrees of cold on record :—

| Place                 | Year | Latitude | Degrees Fahr. | Maximum Recorded |
|-----------------------|------|----------|---------------|------------------|
| Turin . . .           | 1864 | 45.50    | 0             | In Italy         |
| London . . .          | 1796 | 51.31    | 16            | In England       |
| Paris . . .           | 1879 | 48.52    | 13            | At Paris         |
| Frankfort . . .       | 1789 | 50.10    | 23            | In Germany       |
| Pontarlier . . .      | 1846 | ...      | 25            | In France        |
| Stockholm . . .       | ...  | 59.20    | 27            | By Nicander      |
| Prague . . .          | ...  | 50.50    | 28            | By Strandt       |
| St. Petersburg . . .  | 1733 | 59.56    | 34            | ...              |
| Basle . . .           | 1789 | ...      | 36            | In Switzerland   |
| Sweden . . .          | 1781 | ...      | 40            | In Sweden        |
| Moscow . . .          | 1809 | 55.45    | 48            | In Russia        |
| Fort Enterprise . . . | ...  | 64.30    | 50            | By Franklin *    |
| Fort Elizabeth . . .  | ...  | 70.00    | 51            | By Ross          |
| Fort Reliance . . .   | 1835 | 62.46    | 57            | By Back          |
| Yakutsk . . .         | 1829 | ...      | 73            | In the World     |

Besides the foregoing we find 27° below zero at Washington, 37° at Montreal, and 51° by Captain Parry in his Arctic voyage.

Among the highest readings recorded are :—

|                                               | Degrees Fahrenheit in the Shade |
|-----------------------------------------------|---------------------------------|
| London, July 15, 1881 . . .                   | 95.5                            |
| Naples, July 25, 1881 . . .                   | 96.2                            |
| Paris, August 26, 1765 . . .                  | 104.0                           |
| Orange, July 1830 . . .                       | 104.0                           |
| Rio Janeiro, December 1880 . . .              | 103.0                           |
| Adelaide, South Australia, January 1881 . . . | 114.0                           |
| Mourmuk, India . . .                          | 133.0                           |

The mean temperature of Great Britain, as registered for each month at Greenwich during 107 years, seems to have risen very notably since 1841, viz. :—

| Months            | Greenwich |         |      | Scotland, 1855-64 |
|-------------------|-----------|---------|------|-------------------|
|                   | 1771-1841 | 1842-79 | Rise |                   |
| January . . .     | 35.5      | 38.7    | 3.2  | 37.2              |
| February . . .    | 38.3      | 39.4    | 1.1  | 37.4              |
| March . . .       | 40.8      | 41.6    | 0.8  | 39.8              |
| April . . .       | 45.5      | 47.2    | 1.7  | 44.1              |
| May . . .         | 52.4      | 52.7    | 0.3  | 49.5              |
| June . . .        | 57.8      | 59.0    | 1.2  | 55.6              |
| July . . .        | 61.3      | 62.2    | 0.9  | 57.6              |
| August . . .      | 60.6      | 61.5    | 0.9  | 57.3              |
| September . . .   | 56.2      | 57.1    | 0.9  | 52.8              |
| October . . .     | 49.3      | 50.2    | 0.9  | 47.2              |
| November . . .    | 41.6      | 43.5    | 1.9  | 40.2              |
| December . . .    | 38.6      | 40.0    | 1.4  | 38.6              |
| Annual mean . . . | 48.1      | 49.4    | 1.3  | 46.7              |

This rise of temperature in England has been coincident with a diminution of frost in Canada and Labrador.

The mean temperature of France is stated as follows :—

| Authority    | Spring | Summer | Autumn | Winter | Year |
|--------------|--------|--------|--------|--------|------|
| Cotte . . .  | 52     | 68     | 54     | 39     | 53   |
| Fuster . . . | 51     | 67     | 53     | 38     | 52   |

The mean temperature of Paris has risen since the last century, viz. :—

| Quarter Ending       | 1734-40 | 1806-70 |
|----------------------|---------|---------|
| March 31 . . .       | 40      | 40      |
| June 30 . . .        | 56      | 57      |
| September 30 . . .   | 65      | 64      |
| December 31 . . .    | 43      | 45      |
| Yearly average . . . | 51      | 51½     |

\* Cold appears to diminish in Canada with the increase of population, the average number of days in each year that Hudson's Bay is closed by frost showing thus :—

1828-37 . . . 184 days | 1871-80 . . . 179 days

The greatest variations observed between days in the same month in 1866 were :—

|                 | Paris | Lille | Bordeaux | Toulouse | Lyons | Perpignan | Marseilles | Nice |
|-----------------|-------|-------|----------|----------|-------|-----------|------------|------|
| January . . .   | 12    | 10    | 11       | 13       | 7     | 10        | 3          | 2    |
| February . . .  | 12    | 12    | 7        | 12       | 11    | 12        | 4          | 16   |
| March . . .     | 12    | 9     | 5        | 17       | 12    | 15        | 4          | 4    |
| April . . .     | 16    | 18    | 16       | 21       | 14    | 13        | 4          | 6    |
| May . . .       | 14    | 11    | 16       | 19       | 14    | 15        | 15         | 19   |
| June . . .      | 15    | 14    | 18       | 18       | 17    | 15        | 14         | 17   |
| July . . .      | 14    | 13    | 17       | 18       | 17    | 13        | 20         | 9    |
| August . . .    | 14    | 13    | 14       | 14       | 16    | 15        | 13         | 23   |
| September . . . | 12    | 11    | 8        | 9        | 13    | 12        | 10         | 18   |
| October . . .   | 10    | 13    | 14       | 14       | 10    | 11        | 13         | 17   |
| November . . .  | 11    | 11    | 15       | 16       | 11    | 16        | 12         | 9    |
| December . . .  | 16    | 11    | 6        | 7        | 8     | 14        | 10         | 7    |
| Maximum . . .   | 16    | 18    | 18       | 21       | 17    | 16        | 29         | 23   |

### Thermometer

| Centi-grade | Reaumur | Fahrenheit | Centi-grade | Reaumur | Fahrenheit |
|-------------|---------|------------|-------------|---------|------------|
| 100         | 80      | 212        | 40          | 32.0    | 104.0      |
| 98          | 78.4    | 208.4      | 38          | 30.4    | 100.4      |
| 96          | 76.8    | 204.8      | 36          | 28.8    | 96.8       |
| 94          | 75.2    | 201.2      | 34          | 27.2    | 93.2       |
| 92          | 73.6    | 197.6      | 32          | 25.6    | 89.6       |
| 90          | 72.0    | 194.0      | 30          | 24.0    | 86.0       |
| 88          | 70.4    | 190.4      | 28          | 22.4    | 82.4       |
| 86          | 68.8    | 186.8      | 26          | 20.8    | 78.8       |
| 84          | 67.2    | 183.2      | 24          | 19.2    | 75.2       |
| 82          | 65.6    | 179.6      | 22          | 17.6    | 71.6       |
| 80          | 64.0    | 176.0      | 20          | 16.0    | 68.0       |
| 78          | 62.4    | 172.4      | 18          | 14.4    | 64.4       |
| 76          | 60.8    | 168.8      | 16          | 12.8    | 60.8       |
| 74          | 59.2    | 165.2      | 14          | 11.2    | 57.2       |
| 72          | 57.6    | 161.6      | 12          | 9.6     | 53.6       |
| 70          | 56.0    | 158.0      | 10          | 8.0     | 50.0       |

| 44          | 35.2    | 111.2      | 16          | 12.8    | 3.2        |
| 42          | 33.6    | 107.6      | 18          | 14.4    | 0.0        |

### Range in Degrees Fahrenheit

| Degrees                       | Degrees                         |
|-------------------------------|---------------------------------|
| Ice melts . . . 32            | Lead melts . . . 594            |
| Temperature of globe . . . 50 | Heat of common fire . . . 1,140 |
| Blood-heat . . . 98           | Brass melts . . . 2,233         |
| Alcohol boils . . . 174       | Iron melts . . . 3,479          |
| Water boils . . . 212         |                                 |

Wind.—Velocity and pressure are shown as follows :—

| Feet per Second | Miles per Hour | Pressure, Lbs. per Sq. Foot | Feet per Second | Miles per Hour | Pressure, Lbs. per Sq. Foot |
|-----------------|----------------|-----------------------------|-----------------|----------------|-----------------------------|
| 10              | 7              | 4 oz.                       | 80              | 54             | 16 lbs.                     |
| 20              | 14             | 1 lb                        | 100             | 68             | 25 ..                       |
| 40              | 27             | 4 lbs.                      | 120             | 82             | 36 ..                       |
| 60              | 41             | 9 ..                        | 150             | 102            | 56 ..                       |

According to a register kept in London for 18 years, down to 1830, the prevalent winds were westerly, viz. :—

|                   | Days     |          |          |          |
|-------------------|----------|----------|----------|----------|
|                   | N. to E. | E. to S. | S. to W. | W. to N. |
| January . . . .   | 6.0      | 5.6      | 7.1      | 10.0     |
| February . . . .  | 4.2      | 5.0      | 7.8      | 9.5      |
| March . . . . .   | 5.8      | 4.9      | 8.3      | 10.5     |
| April . . . . .   | 6.5      | 6.5      | 6.4      | 9.2      |
| May . . . . .     | 7.9      | 6.8      | 6.8      | 7.9      |
| June . . . . .    | 7.2      | 4.3      | 6.7      | 10.5     |
| July . . . . .    | 4.4      | 3.6      | 8.8      | 12.6     |
| August . . . . .  | 5.2      | 3.5      | 8.6      | 13.0     |
| September . . . . | 6.3      | 5.5      | 8.8      | 8.3      |
| October . . . . . | 5.5      | 6.6      | 8.4      | 9.5      |
| November . . . .  | 4.5      | 4.4      | 9.3      | 10.7     |
| December . . . .  | 5.4      | 5.5      | 9.5      | 9.3      |
| Total . . . . .   | 68.9     | 62.2     | 106.5    | 121.0    |

At Plymouth in the years 1841-42, the mean velocity of wind in the several months, that is, feet per second, was as follows :—

| Feet per Second       |                       |                   |  |
|-----------------------|-----------------------|-------------------|--|
| January . . 12.76     | May . . . 11.60       | September . 15.42 |  |
| February . 13.97      | June . . . 10.90      | October . . 15.29 |  |
| March . . . 14.63     | July . . . . 9.00     | November . 14.96  |  |
| April . . . 13.00     | August . . 12.87      | December . 12.54  |  |
| 1st Quarter . . 13.80 | 3rd Quarter . . 12.40 |                   |  |
| and " . . . . 11.80   | 4th " . . . . 14.30   |                   |  |

The mean amount of wind at Plymouth was :—

| Wind          | Spring | Summer | Autumn | Winter | Total |
|---------------|--------|--------|--------|--------|-------|
| N.E. . . . .  | 143    | 2      | ...    | 133    | 278   |

|                 |               | 988             |  |       |  |

This gives an average of 66 gales a year.

The mining products of the nineteenth century may be summed up approximately thus :—

|                | Tons  |        |            |            |            |           |               |                |
|----------------|-------|--------|------------|------------|------------|-----------|---------------|----------------|
|                | Gold  | Silver | Copper Ore | Lead Ore   | Zinc Ore   | Tin Ore   | Iron Ore      | Coal           |
| 1801-20 . . .  | 292   | 14,359 | 2,100,000  | 2,000,000  | 240,000    | 90,000    | 35,000,000    | 277,000,000    |
| 1821-40 . . .  | 345   | 10,571 | 4,100,000  | 3,100,000  | 400,000    | 130,000   | 82,000,000    | 566,000,000    |
| 1841-50 . . .  | 548   | 7,804  | 4,300,000  | 2,700,000  | 1,300,000  | 90,000    | 96,000,000    | 637,000,000    |
| 1851-60 . . .  | 2,018 | 8,956  | 9,100,000  | 5,100,000  | 2,400,000  | 100,000   | 150,000,000   | 1,093,000,000  |
| 1861-70 . . .  | 1,886 | 12,201 | 13,500,000 | 7,000,000  | 5,200,000  | 150,000   | 205,000,000   | 1,873,000,000  |
| 1871-80 . . .  | 1,703 | 22,347 | 19,400,000 | 7,600,000  | 9,600,000  | 450,000   | 338,000,000   | 2,855,000,000  |
| 1881-88 . . .  | 1,150 | 19,330 | 32,400,000 | 7,100,000  | 12,360,000 | 420,000   | 367,000,000   | 3,300,000,000  |
| 88 years . . . | 7,942 | 95,559 | 84,900,000 | 34,600,000 | 31,500,000 | 1,430,000 | 1,273,000,000 | 10,601,000,000 |

The record at Athens for twelve years to 1870 showed as follows :—

|                 | Spring | Summer | Autumn | Winter | Year  |
|-----------------|--------|--------|--------|--------|-------|
| N. and N.E. . . | 28.3   | 42.5   | 41.0   | 40.2   | 38.0  |
| E. and S.E. . . | 4.8    | 3.9    | 4.7    | 6.4    | 4.9   |
| S. and S.W. . . | 48.8   | 39.3   | 41.5   | 34.7   | 41.1  |
| W. and N.W. . . | 18.1   | 14.3   | 12.8   | 18.7   | 16.0  |
| Total . . . . . | 100.0  | 100.0  | 100.0  | 100.0  | 100.0 |

Observations in the Crimea gave this result in quarters of the year :—

|                 | N.-E. | E.-S. | S.-W. | W.-N. | Year  |
|-----------------|-------|-------|-------|-------|-------|
| March 31 . . .  | 62    | 76    | 62    | 58    | 258   |
| June 30 . . .   | 70    | 42    | 101   | 56    | 269   |
| September 30 .  | 86    | 15    | 74    | 66    | 241   |
| December 31 .   | 62    | 52    | 62    | 56    | 232   |
| Total . . . . . | 280   | 185   | 299   | 236   | 1,000 |

### MILK

The analysis shows as follows :—

|                 | Woman | Cow   | Ass   | Goat  | Ewe   |
|-----------------|-------|-------|-------|-------|-------|
| Fat . . . . .   | 2.5   | 4.0   | 1.1   | 3.3   | 4.2   |

### MINING

In the early years of the present century the total output of the mines of the world was barely a million tons daily, and in the eight years ending 1888 it averaged over 12 million tons daily. In the former period minerals extracted stood for a value of 9 millions sterling per annum; at present the value at the pit's mouth is £210,000,000 yearly.

**MINING.**

*Millions of tons raised yearly.*

*Total, 540 million tons.*

| 1851-60  | 282                       | 78     | 18     | 25   | 2    | 8   | 48   | 385   |
| 1861-70  | 264                       | 105    | 25     | 29   | 4    | 8   | 70   | 681   |
| 1871-80  | 241                       | 178    | 35     | 30   | 11   | 23  | 110  | 1,104 |
| 1881-88  | 148                       | 154    | 50     | 28   | 14   | 21  | 115  | 1,050 |
| 88 years | 1,101                     | 796    | 149    | 151  | 32   | 71  | 412  | 3,859 |
|          |                           |        |        |      |      |     |      | 6,571 |

The foregoing table of tonnage gives only the metal of gold and silver, the quantities of ore being unknown. It has been, however, stated that the average was in California 70,000 tons for one ton of gold, and in Australia 94,000 tons for one.\* As regards silver, the ordinary yield in Spanish America is 80 oz. to the ton. At these rates we can estimate the amount of ore raised. The account of all mining will then stand thus:—

|          | Millions of Tons Raised |            |          |           |        |        |
|----------|-------------------------|------------|----------|-----------|--------|--------|
|          | Gold Quartz             | Silver Ore | Iron Ore | Lead, &c. | Coal   | Total  |
| 1801-20  | 23                      | 7          | 35       | 4         | 277    | 346    |
| 1821-40  | 28                      | 5          | 82       | 8         | 566    | 689    |
| 1841-50  | 44                      | 4          | 96       | 8         | 637    | 789    |
| 1851-60  | 162                     | 5          | 150      | 17        | 1,093  | 1,427  |
| 1861-70  | 142                     | 7          | 205      | 26        | 1,873  | 2,253  |
| 1871-80  | 127                     | 12         | 338      | 37        | 2,855  | 3,369  |
| 1881-88  | 86                      | 9          | 367      | 52        | 3,300  | 3,814  |
| 88 years | 612                     | 49         | 1,273    | 152       | 10,601 | 12,687 |

As regards quantity, coal stood for nearly 85 per cent. of all minerals extracted.

The total mining product may be summed up thus:—

|                 | Millions £ Sterling |
|-----------------|---------------------|
| Precious metals | 1,897               |
| Metallic ores   | 815                 |
| Coal            | 3,859               |
| Total           | 6,571               |

The shares corresponding to the several countries were:—

|                | Millions £ Sterling |          |          |            |              |       |       |
|----------------|---------------------|----------|----------|------------|--------------|-------|-------|
|                | Precious Metals     | Iron Ore | Lead Ore | Copper Ore | Zinc and Tin | Coal  | Total |

\* The quartz raised by the gold mines of California and Australia would suffice to build 150 pyramids like that of Cheops. The gold extracted would fit in a room 40 by 20 feet, and 15 high.

Excluding precious metals, the values of mining products were, in order of time, as follows:—

| Period   | Millions £ Sterling |        |         |         |         |           |         |
|----------|---------------------|--------|---------|---------|---------|-----------|---------|
|          | U. Kingdom          | France | Germany | Austria | Belgium | U. States | Various |
| 1801-20  | 123                 | 13     | 12      | 1       | 4       | 4         | 10      |
| 1821-40  | 204                 | 27     | 23      | 4       | 19      | 7         | 28      |
| 1841-50  | 194                 | 26     | 22      | 6       | 19      | 25        | 26      |
| 1851-60  | 267                 | 37     | 45      | 8       | 36      | 54        | 36      |
| 1861-70  | 416                 | 61     | 96      | 20      | 56      | 113       | 55      |
| 1871-80  | 658                 | 101    | 151     | 31      | 68      | 205       | 99      |
| 1881-88  | 471                 | 86     | 178     | 33      | 56      | 357       | 97      |
| 88 years | 2,333               | 351    | 527     | 103     | 258     | 765       | 337     |
|          |                     |        |         |         |         |           | 4,674   |

Iron-mining may be summed up approximately as follows:—

| Period   | Million Tons Ore |               |         |        |       |         |       |
|----------|------------------|---------------|---------|--------|-------|---------|-------|
|          | Great Britain    | United States | Germany | France | Spain | Various | Total |
| 1801-20  | 17               | 3             | 4       | 6      | ...   | 5       | 35    |
| 1821-40  | 44               | 9             | 6       | 12     | 1     | 10      | 82    |
| 1841-50  | 49               | 10            | 7       | 14     | 1     | 15      | 96    |
| 1851-60  | 90               | 15            | 11      | 12     | 2     | 20      | 150   |
| 1861-70  | 101              | 27            | 31      | 17     | 4     | 25      | 205   |
| 1871-80  | 160              | 58            | 54      | 26     | 10    | 30      | 338   |
| 1881-88  | 116              | 90            | 72      | 22     | 37    | 30      | 367   |
| 88 years | 577              | 212           | 185     | 109    | 55    | 135     | 1,273 |

The extraction of other minerals in 88 years was approximately as follows:—

|               | Tons       |            |           |
|---------------|------------|------------|-----------|
|               | Lead       | Copper     | Tin       |
| Great Britain | 6,800,000  | 11,200,000 | 800,000   |
| France        | 1,600,000  | 1,600,000  | ...       |
| Germany       | 6,000,000  | 9,700,000  | ...       |
| Russia        | ...        | 5,100,000  | ...       |
| Austria       | 1,400,000  | 600,000    | ...       |
| Italy         | 1,300,000  | ...        | ...       |
| Spain         | 7,500,000  | 11,400,000 | ...       |
| United States | 9,600,000  | 29,300,000 | ...       |
| Australia     | ...        | 4,500,000  | 360,000   |
| Various       | 400,000    | 11,500,000 | 270,000   |
| Total         | 34,600,000 | 84,900,000 | 1,430,000 |

The number of persons employed in mining at various dates was approximately as follows:—

| Year | Great Britain | United States | France  | Germany | Various | Total     |
|------|---------------|---------------|---------|---------|---------|-----------|
| 1820 | 165,000       | 10,000        | 20,000  | 30,000  | 25,000  | 250,000   |
| 1840 | 245,000       | 15,000        | 40,000  | 50,000  | 92,000  | 442,000   |
| 1860 | 497,000       | 70,000        | 70,000  | 159,000 | 220,000 | 1,016,000 |
| 1870 | 561,000       | 152,000       | 100,000 | 217,000 | 275,000 | 1,305,000 |
| 1880 | 654,000       | 234,000       | 120,000 | 300,000 | 450,000 | 1,758,000 |
| 1888 | 593,000       | 350,000       | 112,000 | 337,000 | 440,000 | 2,032,000 |

The weight of minerals raised compares with miners approximately, thus :—

| Year       | No. of Miners | Tons Raised | Tons per Man |
|------------|---------------|-------------|--------------|
| 1820 . . . | 250,000       | 27,000,000  | 108          |
| 1840 . . . | 442,000       | 71,000,000  | 160          |
| 1860 . . . | 1,016,000     | 198,000,000 | 194          |
| 1870 . . . | 1,305,000     | 290,000,000 | 222          |
| 1888 . . . | 2,032,000     | 565,000,000 | 270          |

The ratio for British miners in 1889 was 330 tons per man.

The superiority of English miners is stated by the Iron and Steel Institute to be shown in the proportion of iron ore extracted by each miner yearly as follows :—

|               | Tons |               | Tons |
|---------------|------|---------------|------|
| England . . . | 923  | Spain . . .   | 292  |
| France . . .  | 393  | Germany . . . | 283  |
| Algeria . . . | 323  | Belgium . . . | 127  |

This, however, appears to be exaggerated as regards English miners, for we find (see p. 401) that the annual product of all minerals in Great Britain in 1888 did not exceed 301 tons per miner.

In 1884 the deepest mines in the world were :—

| Mine        | Country   | Mineral | Depth, Feet |
|-------------|-----------|---------|-------------|
| Lambert     | Belgium   | Coal    | 3,490       |
| Birkenberg  | Austria   | Silver  | 3,980       |
| Zwickau     | Saxony    | Coal    | 2,637       |
| St. Andre   | Prussia   | Silver  | 2,532       |
| Rosebridge  | England   | Coal    | 2,510       |
| Duckinfield | "         | "       | 2,448       |
| Magdala     | Australia | Gold    | 1,990       |
| Chaumont    | France    | Coal    | 1,876       |
| Kongsberg   | Norway    | Silver  | 1,869       |
| Schemnitz   | Hungary   | "       | 1,771       |
| La Huerta   | Spain     | "       | 1,548       |

The production of metals in the present century has been approximately as follows :—

|                | Tons        |           |            |         |           |             |
|----------------|-------------|-----------|------------|---------|-----------|-------------|
|                | Pig Iron    | Copper    | Lead       | Tin     | Zinc      | Total       |
| 1801-20 . . .  | 13,200,000  | 170,000   | 1,400,000  | 60,000  | 40,000    | 14,870,000  |
| 1821-40 . . .  | 32,800,000  | 370,000   | 1,900,000  | 90,000  | 70,000    | 35,230,000  |
| 1841-50 . . .  | 33,500,000  | 335,000   | 1,600,000  | 60,000  | 210,000   | 35,555,000  |
| 1851-60 . . .  | 57,100,000  | 585,000   | 3,000,000  | 70,000  | 370,000   | 60,125,000  |
| 1861-70 . . .  | 93,600,000  | 780,000   | 4,000,000  | 100,000 | 950,000   | 97,880,000  |
| 1871-80 . . .  | 142,100,000 | 1,200,000 | 4,400,000  | 300,000 | 1,470,000 | 148,170,000 |
| 1881-88 . . .  | 176,000,000 | 1,540,000 | 4,100,000  | 280,000 | 1,910,000 | 183,030,000 |
| 88 years . . . | 548,300,000 | 4,980,000 | 20,400,000 | 960,000 | 5,020,000 | 574,860,000 |

|                | Value, Millions £ Sterling |        |      |     |      |       |                 | Value, Millions £ Sterling |        |      |     |      |       |
|----------------|----------------------------|--------|------|-----|------|-------|-----------------|----------------------------|--------|------|-----|------|-------|
|                | Pig Iron                   | Copper | Lead | Tin | Zinc | Total |                 | Pig Iron                   | Copper | Lead | Tin | Zinc | Total |
| 1801-20 . . .  | 97                         | 17     | 42   | 5   | 1    | 162   | Great Britain   | 723                        | 162    | 82   | 61  | 29   | 1,057 |

#### UNITED KINGDOM

The progress of British mining may be approximately shown thus :—

|            | Tons Raised |            |            |          |          |         |             |
|------------|-------------|------------|------------|----------|----------|---------|-------------|
|            | Coal        | Iron Ore   | Copper Ore | Lead Ore | Zinc Ore | Tin Ore | Total       |
| 1780 . . . | 8,500,000   | 200,000    | 30,000     | 40,000   | 5,000    | 5,000   | 8,780,000   |
| 1800 . . . | 10,100,000  | 500,000    | 50,000     | 50,000   | 5,000    | 5,000   | 10,710,000  |
| 1820 . . . | 14,000,000  | 1,000,000  | 100,000    | 60,000   | 5,000    | 5,000   | 15,170,000  |
| 1830 . . . | 16,100,000  | 1,700,000  | 150,000    | 70,000   | 5,000    | 5,000   | 18,080,000  |
| 1840 . . . | 35,000,000  | 3,500,000  | 150,000    | 80,000   | 10,000   | 5,000   | 38,795,000  |
| 1850 . . . | 49,000,000  | 5,500,000  | 180,000    | 80,000   | 15,000   | 10,000  | 54,785,000  |
| 1860 . . . | 80,000,000  | 8,000,000  | 240,000    | 100,000  | 15,000   | 10,000  | 88,285,000  |
| 1870 . . . | 110,000,000 | 14,400,000 | 110,000    | 110,000  | 15,000   | 15,000  | 124,650,000 |
| 1880 . . . | 147,000,000 | 18,000,000 | 55,000     | 90,000   | 30,000   | 15,000  | 165,190,000 |
| 1888 . . . | 170,000,000 | 14,600,000 | 20,000     | 60,000   | 40,000   | 15,000  | 184,735,000 |

About 100 years ago the weight of minerals raised daily in Great Britain was 25,000 tons, and in 1888 it rose to 600,000. Improved machinery has effected a great economy of labour, one man in 1888 raising as much as four could do in 1800. This has caused a notable fall in the price of minerals. Thus it happens that although the weight of minerals raised has increased twenty-one-fold since 1780, the value of same has only risen ten-fold.

The total value of British mining in 88 years was approximately as follows :—

| Period         | Millions £ Sterling |           |      |        |          |       |
|----------------|---------------------|-----------|------|--------|----------|-------|
|                | Coal                | Ironstone | Lead | Copper | Tin, &c. | Total |
| 1801-20 . . .  | 105                 | 6         | 5    | 3      | 4        | 123   |
| 1821-40 . . .  | 175                 | 13        | 6    | 6      | 4        | 204   |
| 1841-50 . . .  | 168                 | 14        | 4    | 4      | 4        | 194   |
| 1851-60 . . .  | 228                 | 25        | 5    | 4      | 5        | 267   |
| 1861-70 . . .  | 370                 | 31        | 5    | 4      | 6        | 416   |
| 1871-80 . . .  | 600                 | 44        | 5    | 2      | 7        | 658   |
| 1881-88 . . .  | 426                 | 35        | 3    | 1      | 6        | 471   |
| 88 years . . . | 2,072               | 168       | 33   | 24     | 36       | 2,333 |

The weight of mineral raised compares with the number of miners approximately as follows :—

| Year       | Miners  | Tons Raised | Tons per Man |
|------------|---------|-------------|--------------|
| 1820 . . . | 165,000 | 15,200,000  | 92           |
| 1840 . . . | 245,000 | 38,800,000  | 160          |
| 1860 . . . | 497,000 | 88,300,000  | 180          |
| 1870 . . . | 561,000 | 122,300,000 | 218          |
| 1880 . . . | 654,000 | 161,200,000 | 247          |
| 1888 . . . | 593,000 | 184,600,000 | 301          |

The value of British mining per head of the population is shown in the following table :—

|            | Coal       | Metallic Ores | Total      | Per Inhabitant |
|------------|------------|---------------|------------|----------------|
|            | £          | £             | £          | £ s. d.        |
| 1780 . . . | 4,600,000  | 1,010,000     | 5,610,000  | 0 11 0         |
| 1800 . . . | 5,500,000  | 1,210,000     | 6,710,000  | 0 9 0          |
| 1820 . . . | 7,000,000  | 1,510,000     | 8,510,000  | 0 8 6          |
| 1830 . . . | 6,500,000  | 2,010,000     | 8,510,000  | 0 7 6          |
| 1840 . . . | 12,200,000 | 2,720,000     | 14,920,000 | 0 11 6         |
| 1850 . . . | 16,500,000 | 3,430,000     | 19,930,000 | 0 15 0         |
| 1860 . . . | 26,600,000 | 4,230,000     | 30,830,000 | 1 2 0          |
| 1870 . . . | 45,000,000 | 6,630,000     | 51,630,000 | 1 14 0         |
| 1880 . . . | 49,000,000 | 6,560,000     | 55,560,000 | 1 13 0         |
| 1888 . . . | 53,600,000 | 5,180,000     | 58,780,000 | 1 10 6         |

In the above estimate of value, coal is taken at 25 per cent. under the price at port of shipment.

The value of metals produced from British ores at various dates was approximately as follows :—

|                   | 1780      | 1800      | 1820      | 1840      | 1860       | 1889       |
|-------------------|-----------|-----------|-----------|-----------|------------|------------|
|                   | £         | £         | £         | £         | £          | £          |
| Iron . . . . .    | 400,000   | 700,000   | 1,000,000 | 3,500,000 | 7,500,000  | 12,700,000 |
| Tin . . . . .     | 500,000   | 400,000   | 400,000   | 400,000   | 700,000    | 900,000    |
| Lead, &c. . . . . | 800,000   | 1,200,000 | 2,000,000 | 3,100,000 | 3,000,000  | 800,000    |
| Total . . . . .   | 1,700,000 | 2,300,000 | 3,400,000 | 7,000,000 | 11,200,000 | 14,400,000 |

#### FRANCE

The products of mines may be approximately summed up thus :—

|                | Tons       |           | Value, £  |
|----------------|------------|-----------|-----------|
|                | Coal       | Iron Ore  |           |
| 1800 . . . . . | 800,000    | 200,000   | 600,000   |
| 1830 . . . . . | 1,800,000  | 700,000   | 1,000,000 |
| 1850 . . . . . | 5,000,000  | 900,000   | 2,800,000 |
| 1870 . . . . . | 13,300,000 | 2,600,000 | 6,600,000 |
| 1888 . . . . . | 23,000,000 | 2,600,000 | 9,600,000 |

The official valuation for 1889 is as follows :—

|                      | Tons        | Value, £   |
|----------------------|-------------|------------|
| Coal . . . . .       | 176,900,000 | 56,200,000 |
| Iron ore . . . . .   | 14,550,000  | 3,850,000  |
| Tin ore . . . . .    | 14,000      | 730,000    |
| Lead ore . . . . .   | 50,000      | 430,000    |
| Copper ore . . . . . | 15,000      | 60,000     |
| Zinc ore . . . . .   | 25,000      | 100,000    |
| Salt . . . . .       | 1,950,000   | 890,000    |
| Oil shale . . . . .  | 2,010,000   | 500,000    |
| Clays . . . . .      | 3,040,000   | 830,000    |
| Slate . . . . .      | 460,000     | 1,050,000  |
| Total . . . . .      | 199,014,000 | 64,640,000 |

The above is exclusive of stone, to the value of £8,700,000, say 11,000,000 tons, which brings up the total to 210 million tons, representing an aggregate value of 73½ millions sterling.

The quantity and value of metals extracted from the foregoing minerals may be summed up as follows :—

|                  | Tons      | Value, £   |
|------------------|-----------|------------|
| Iron . . . . .   | 5,180,000 | 12,700,000 |
| Lead . . . . .   | 36,000    | 460,000    |
| Tin . . . . .    | 9,000     | 860,000    |
| Copper . . . . . | 1,500     | 120,000    |
| Zinc . . . . .   | 10,000    | 190,000    |
| Silver . . . . . | 10        | 70,000     |
| Total . . . . .  | 5,236,510 | 14,400,000 |

The number of persons employed in mines in 1888 was as follows :—

|                       |         |
|-----------------------|---------|
| Underground . . . . . | 465,000 |
| Overground . . . . .  | 127,700 |
| Total . . . . .       | 592,700 |

Among those overground were 5700 women. The number of miners killed was as follows :—

| Year              | Killed | Per 10,000 Miners | One Killed in | Tons Raised per Miner Killed |
|-------------------|--------|-------------------|---------------|------------------------------|
| 1851-60 . . . . . | 10,018 | 41                | 245           | 57,000                       |
| 1861-70 . . . . . | 10,626 | 33                | 300           | 104,000                      |
| 1871-80 . . . . . | 11,349 | 23                | 425           | 140,000                      |
| 1888 . . . . .    | 960    | 21                | 484           | 198,000                      |

The above is irrespective of salt and some minor items. An official return in 1883 of the coal-mines showed thus :—

| Year           | Miners  | Tons Raised | Value, £   |
|----------------|---------|-------------|------------|
| 1860 . . . . . | 59,000  | 8,300,000   | 2,400,000  |
| 1870 . . . . . | 83,000  | 13,300,000  | 6,200,000  |
| 1880 . . . . . | 107,000 | 19,400,000  | 9,900,000  |
| 1883 . . . . . | 113,000 | 21,300,000  | 10,700,000 |

Detailed statistics of coal-mining in France will be found at pages 121 and 122.

The statement for all mining in 1886 showed thus :

|                | Miners  | Tons Raised | Value, £   |
|----------------|---------|-------------|------------|
| Coal . . . .   | 102,000 | 19,500,000  | 9,200,000  |
| Iron ore . . . | 6,000   | 2,300,000   | 400,000    |
| Salt . . . . . | 4,000   | 640,000     | 500,000    |
| Total . . . .  | 112,000 | 22,440,000  | 10,100,000 |

The quarries, moreover, employed 111,000 men, and their annual yield was about 8 million tons, valued at £6,600,000. The slate quarries of Ardenne, Bretagne, yield 120 million slates yearly. The total value of French mining in 88 years was approximately as follows :—

| Period         | Millions £ Sterling |            |                 |       |
|----------------|---------------------|------------|-----------------|-------|
|                | Coal                | Iron-stone | Lead and Copper | Total |
| 1801-20 . . .  | 11                  | 2          | ...             | 13    |
| 1821-40 . . .  | 23                  | 4          | ...             | 27    |
| 1841-50 . . .  | 21                  | 4          | 1               | 26    |
| 1851-60 . . .  | 31                  | 5          | 1               | 37    |
| 1861-70 . . .  | 53                  | 6          | 2               | 61    |
| 1871-80 . . .  | 89                  | 9          | 3               | 101   |
| 1881-88 . . .  | 75                  | 7          | 4               | 86    |
| 88 years . . . | 303                 | 37         | 11              | 351   |

The production of metals was approximately as follows :—

| Year         | Tons      |        |        | Total Value, £ |
|--------------|-----------|--------|--------|----------------|
|              | Iron      | Lead   | Copper |                |
| 1830 . . . . | 220,000   | 1,000  | 1,000  | 1,600,000      |
| 1850 . . . . | 570,000   | 7,000  | 2,000  | 3,700,000      |
| 1880 . . . . | 1,720,000 | 32,000 | 5,000  | 6,200,000      |

#### GERMANY

The mining industry is shown approximately thus :—

| Year         | Tons       |            |           |            | Value, £   |
|--------------|------------|------------|-----------|------------|------------|
|              | Coal       | Iron Ore   | Sundries  | Total      |            |
| 1800 . . . . | 300,000    | 100,000    | 200,000   | 600,000    | 200,000    |
| 1830 . . . . | 2,000,000  | 300,000    | 500,000   | 2,800,000  | 900,000    |
| 1850 . . . . | 6,600,000  | 800,000    | 800,000   | 8,100,000  | 2,600,000  |
| 1870 . . . . | 33,600,000 | 3,800,000  | 1,400,000 | 38,800,000 | 12,400,000 |
| 1888 . . . . | 82,000,000 | 10,700,000 | 3,100,000 | 95,800,000 | 24,700,000 |

At the beginning of the 19th century the quantity of minerals raised averaged only 2000 tons daily, but in 1888 it rose to 300,000 daily.

Von Decken's and official tables of mining in Germany show as follows :—

| Year         | Tons       |            |            |          |          |            |         | Total      |
|--------------|------------|------------|------------|----------|----------|------------|---------|------------|
|              | Coal       | Lignite    | Iron Ore   | Lead Ore | Zinc Ore | Copper Ore | Salt    |            |
| 1850 . . . . | 5,100,000  | 1,500,000  | 800,000    | 170,000  | 150,000  | 50,000     | 300,000 | 8,070,000  |
| 1860 . . . . | 12,300,000 | 4,400,000  | 1,400,000  | 150,000  | 310,000  | 90,000     | 400,000 | 19,050,000 |
| 1870 . . . . | 26,400,000 | 7,600,000  | 3,800,000  | 100,000  | 370,000  | 200,000    | 500,000 | 38,970,000 |
| 1880 . . . . | 47,000,000 | 12,100,000 | 7,200,000  | 130,000  | 500,000  | 380,000    | 670,000 | 67,980,000 |
| 1888 . . . . | 65,400,000 | 16,600,000 | 10,700,000 | 160,000  | 670,000  | 530,000    | 950,000 | 95,010,000 |

Value, £

|              |            |           |           |         |         |         |         |            |
|--------------|------------|-----------|-----------|---------|---------|---------|---------|------------|
| 1850 . . . . | 1,500,000  | 200,000   | 200,000   | 300,000 | 100,000 | 50,000  | 300,000 | 2,650,000  |
| 1860 . . . . | 4,000,000  | 700,000   | 400,000   | 600,000 | 200,000 | 150,000 | 400,000 | 6,350,000  |
| 1870 . . . . | 8,200,000  | 1,100,000 | 1,200,000 | 800,000 | 300,000 | 250,000 | 500,000 | 12,350,000 |
| 1880 . . . . | 12,100,000 | 2,000,000 | 1,700,000 | 600,000 | 400,000 | 300,000 | 600,000 | 17,700,000 |
| 1888 . . . . | 16,500,000 | 2,500,000 | 2,000,000 | 800,000 | 700,000 | 800,000 | 500,000 | 23,800,000 |

| Year         | Number of Miners |        |           |         | Tons Raised | Tons per Miner |
|--------------|------------------|--------|-----------|---------|-------------|----------------|
|              | Coal             | Iron   | Lead, &c. | Total   |             |                |
| 1850 . . . . | 47,300           | 16,000 | 25,500    | 88,800  | 8,100,000   | 91             |
| 1860 . . . . | 102,100          | 18,500 | 38,500    | 159,100 | 19,100,000  | 119            |
| 1870 . . . . | 145,800          | 27,300 | 44,200    | 217,300 | 39,000,000  | 180            |
| 1875 . . . . | 209,000          | 26,400 | 41,800    | 277,300 | 52,600,000  | 190            |
| 1886 . . . . | 247,000          | 32,000 | 58,000    | 337,000 | 85,200,000  | 253            |

The total value of German mining in 88 years was approximately as follows :—

| Period         | Millions £ Sterling |           |      |        |      |       |
|----------------|---------------------|-----------|------|--------|------|-------|
|                | Coal                | Ironstone | Lead | Copper | Zinc | Total |
| 1801-20 . . .  | 10                  | 1         | 1    | ...    | ...  | 12    |
| 1821-40 . . .  | 18                  | 2         | 2    | ...    | 1    | 23    |
| 1841-50 . . .  | 16                  | 2         | 3    | ...    | 1    | 22    |
| 1851-60 . . .  | 34                  | 3         | 5    | 1      | 2    | 45    |
| 1861-70 . . .  | 75                  | 9         | 7    | 2      | 3    | 96    |
| 1871-80 . . .  | 121                 | 16        | 7    | 3      | 4    | 151   |
| 1881-88 . . .  | 145                 | 18        | 6    | 5      | 4    | 178   |
| 88 years . . . | 419                 | 51        | 31   | 11     | 15   | 527   |

Prussia has the lion's share of the mining industry, as appears from the returns for 1888, viz. :—

|               | Coal Raised, Tons | Value of all Minerals, £ | Ratio | Pig Iron, Tons |
|---------------|-------------------|--------------------------|-------|----------------|
| Prussia . . . | 72,700,000        | 20,600,000               | 83.0  | 3,100,000      |
| Saxony . . .  | 5,200,000         | 2,200,000                | 9.0   | 300,000        |
| Other States  | 4,100,000         | 1,900,000                | 8.0   | 940,000        |
| Total . . .   | 82,000,000        | 24,700,000               | 100.0 | 4,340,000      |

There are 77 zinc mines in Prussia, which produce half the zinc of the world.

The production of metals was approximately as follows :—

| Year         | Tons      |        |        |         | Total Value, £ |
|--------------|-----------|--------|--------|---------|----------------|
|              | Iron      | Lead   | Copper | Zinc    |                |
| 1850 . . . . | 400,000   | 16,000 | 2,000  | 30,000  | 4,400,000      |
| 1860 . . . . | 900,000   | 30,000 | 3,000  | 59,000  | 7,500,000      |
| 1870 . . . . | 1,340,000 | 54,000 | 5,000  | 65,000  | 12,000,000     |
| 1880 . . . . | 2,800,000 | 86,000 | 14,000 | 100,000 | 14,400,000     |
| 1888 . . . . | 4,400,000 | 92,000 | 18,000 | 130,000 | 18,500,000     |

Official statements of the production and consumption of the following metals show thus :—

|              | Production, Tons |         | Consumption, Tons |         |
|--------------|------------------|---------|-------------------|---------|
|              | 1871             | 1886    | 1871              | 1886    |
| Lead . . .   | 54,000           | 92,000  | 39,000            | 56,000  |
| Copper . . . | 4,600            | 18,200  | 15,500            | 23,500  |
| Zinc . . .   | 65,000           | 130,000 | 29,000            | 70,000  |
| Tin . . .    | 100              | 100     | 2,500             | 6,500   |
| Total . . .  | 123,700          | 240,300 | 86,000            | 156,000 |

## RUSSIA

The mining product is shown approximately thus :—

| Year | Tons      |          |            |           |           |
|------|-----------|----------|------------|-----------|-----------|
|      | Coal      | Iron Ore | Copper Ore | Salt      | Naphtha   |
| 1840 | 10,000    | 110,000  | 60,000     | 440,000   | ...       |
| 1850 | 50,000    | 160,000  | 80,000     | 400,000   | ...       |
| 1860 | 130,000   | 180,000  | 90,000     | 420,000   | ...       |
| 1870 | 700,000   | 250,000  | 100,000    | 450,000   | ...       |
| 1880 | 4,100,000 | 650,000  | 100,000    | 780,000   | 350,000   |
| 1888 | 5,000,000 | 800,000  | 100,000    | 1,200,000 | 2,000,000 |

All the above are, however, of minor value compared with the gold-fields, which are mostly situated in Siberia, the product of precious metals showing as follows :—

| Period   | Tons  |        | Value, £    |            |             |
|----------|-------|--------|-------------|------------|-------------|
|          | Gold  | Silver | Gold        | Silver     | Total       |
| 1821-30  | 33    | 200    | 4,600,000   | 1,600,000  | 6,200,000   |
| 1831-40  | 69    | 250    | 9,800,000   | 2,200,000  | 12,000,000  |
| 1841-50  | 217   | 230    | 30,400,000  | 2,500,000  | 32,900,000  |
| 1851-60  | 256   | 170    | 35,800,000  | 1,500,000  | 37,300,000  |
| 1861-70  | 271   | 150    | 38,000,000  | 1,300,000  | 39,300,000  |
| 1871-80  | 380   | 130    | 53,200,000  | 1,000,000  | 54,200,000  |
| 1881-88  | 280   | 90     | 39,200,000  | 600,000    | 39,800,000  |
| 68 years | 1,506 | 1,220  | 211,000,000 | 10,700,000 | 221,700,000 |

The regular mining of precious metals began in Siberia in 1704, silver being the first metal found. Gold was discovered in the Ural Mountains in 1745, near Ekaterinenberg, and in 1810 these mines were producing 10,000 oz., worth £40,000 per annum. From 1814 to 1880 the yield of the various gold mines was :—

|                    | Tons  | Value, £    |
|--------------------|-------|-------------|
| Ural . . .         | 330   | 46,200,000  |
| East Siberia . . . | 790   | 110,600,000 |
| West Siberia . . . | 80    | 11,200,000  |
| Total . . .        | 1,200 | 168,000,000 |

An official report of mining for Austria proper in 1887 showed :—

|                | Tons       |                 |            | Value, £  |                 |           |
|----------------|------------|-----------------|------------|-----------|-----------------|-----------|
|                | Bohemia    | Other Provinces | Total      | Bohemia   | Other Provinces | Total     |
| Coal . . .     | 3,500,000  | 4,300,000       | 7,800,000  | 800,000   | 1,000,000       | 1,800,000 |
| Lignite . . .  | 8,900,000  | 2,700,000       | 11,600,000 | 900,000   | 600,000         | 1,500,000 |
| Iron ore . . . | 300,000    | 540,000         | 840,000    | 120,000   | 160,000         | 280,000   |
| Salt . . .     | ...        | 280,000         | 280,000    | ...       | 280,000         | 280,000   |
| Lead, &c. . .  | 200,000    | 120,000         | 320,000    | 300,000   | 500,000         | 800,000   |
| Total . . .    | 12,900,000 | 7,940,000       | 20,840,000 | 2,040,000 | 2,500,000       | 4,540,000 |

The total mining product of Russia in the nineteenth century may be summed up approximately thus :—

| Period         | Millions Sterling |                   |       |
|----------------|-------------------|-------------------|-------|
|                | Gold and Silver   | Copper, Coal, &c. | Total |
| 1801-20 . . .  | 3                 | 1                 | 4     |
| 1821-40 . . .  | 18                | 2                 | 20    |
| 1841-50 . . .  | 33                | 3                 | 36    |
| 1851-60 . . .  | 37                | 3                 | 40    |
| 1861-70 . . .  | 39                | 5                 | 44    |
| 1871-80 . . .  | 54                | 12                | 66    |
| 1881-88 . . .  | 40                | 16                | 56    |
| 88 years . . . | 224               | 42                | 266   |

The production of base metals in 1886 was as follows :—

|              | Tons    | Approximate Value, £ |
|--------------|---------|----------------------|
| Iron . . .   | 530,000 | 1,600,000            |
| Copper . . . | 4,500   | 400,000              |
| Zinc . . .   | 4,100   | 60,000               |
| Total . . .  | 538,600 | 2,060,000            |

The annual value of all mining and metallic industries is about 15 millions sterling. They occupy 250,000 persons and 3450 steam-engines, with an aggregate of 100,000 horse-power.

## AUSTRIA

Mining industry is summed up approximately thus :—

| Year       | Tons       |           |            |          |
|------------|------------|-----------|------------|----------|
|            | Coal       | Iron Ore  | Copper Ore | Lead Ore |
| 1840 . . . | 400,000    | 180,000   | 5,000      | 10,000   |
| 1860 . . . | 3,500,000  | 500,000   | 10,000     | 15,000   |
| 1880 . . . | 16,100,000 | 1,100,000 | 15,000     | 15,000   |
| 1888 . . . | 20,000,000 | 1,800,000 | 15,000     | 15,000   |

In 1834 the following report was published :—

|                  | Mining Output, Tons |         |         |
|------------------|---------------------|---------|---------|
|                  | Austria             | Hungary | Total   |
| Coal . . .       | 170,000             | 20,000  | 190,000 |
| Iron, pig . . .  | 70,000              | 15,000  | 85,000  |
| Salt . . .       | 160,000             | 100,000 | 260,000 |
| Lead ore . . .   | 4,000               | 1,000   | 5,000   |
| Copper ore . . . | 200                 | 2,000   | 2,200   |
| Total . . .      | 404,200             | 138,000 | 542,200 |

In 1850 the mines of the Empire were estimated to yield as follows :—

|                | Tons      |
|----------------|-----------|
| Coal . . .     | 2,000,000 |
| Iron ore . . . | 280,000   |
| Salt . . .     | 600,000   |
| Lead, &c. . .  | 24,000    |
|                | 2,904,000 |

The hands employed in the above mines in 1887 were:—

|                      | Men           | Women         | Total          |
|----------------------|---------------|---------------|----------------|
| Coal . . . .         | 36,600        | 6,000         | 42,600         |
| Lignite . . . .      | 30,000        | 2,500         | 32,500         |
| Iron . . . .         | 4,000         | 100           | 4,100          |
| Salt, &c. . . .      | 22,200        | 3,300         | 25,500         |
| <b>Total . . . .</b> | <b>92,800</b> | <b>11,900</b> | <b>104,700</b> |
| Bohemia . . . .      | 42,000        | 4,500         | 46,500         |
| Silesia . . . .      | 13,600        | 2,800         | 16,400         |
| Galitzia . . . .     | 12,200        | 1,000         | 13,200         |
| Styria, &c. . . .    | 25,000        | 3,600         | 28,600         |
| <b>Total . . . .</b> | <b>92,800</b> | <b>11,900</b> | <b>104,700</b> |

A report on the production of minerals and metals in Hungary showed thus:—

|                      | 1864           | 1874             | 1883             |
|----------------------|----------------|------------------|------------------|
|                      | Tons           | Tons             | Tons             |
| Coal . . . .         | 350,000        | 620,000          | 900,000          |
| Lignite . . . .      | 250,000        | 780,000          | 1,500,000        |
| Pig iron . . . .     | 120,000        | 170,000          | 180,000          |
| Copper . . . .       | 2,200          | 1,000            | 1,000            |
| Lead . . . .         | 1,500          | 1,500            | 2,000            |
| <b>Total . . . .</b> | <b>723,700</b> | <b>1,572,500</b> | <b>2,583,000</b> |

There was also a yield of £200,000 worth of gold and £100,000 of silver.

The mining values in 1886 were stated thus:—

|                      | Austria          | Hungary          | Total            |
|----------------------|------------------|------------------|------------------|
|                      | £                | £                | £                |
| Coal . . . .         | 1,800,000        | 400,000          | 2,200,000        |
| Lignite . . . .      | 1,800,000        | 400,000          | 2,200,000        |
| Pig iron . . . .     | 1,800,000        | 800,000          | 2,600,000        |
| Lead, &c. . . .      | 1,400,000        | 600,000          | 2,000,000        |
| <b>Total . . . .</b> | <b>6,800,000</b> | <b>2,200,000</b> | <b>9,000,000</b> |

This table confuses the values of minerals and metals; the actual value was—minerals £5,400,000, metals £3,600,000.

#### ITALY

The production of iron ore is recorded as follows:—

| Year         | Tons    | Value, £ |
|--------------|---------|----------|
| 1850 . . . . | 64,000  | 36,000   |
| 1860 . . . . | 71,000  | 40,000   |
| 1870 . . . . | 74,000  | 42,000   |
| 1887 . . . . | 230,000 | 100,000  |

The mining industry of Spain in the last 28 years may be summed up approximately as follows:—

| Period                  | Coal              | Ironstone         | Copper Ore        | Lead Ore          | Zinc Ore         | Quicksilver      | Total             |
|-------------------------|-------------------|-------------------|-------------------|-------------------|------------------|------------------|-------------------|
| 1861-70 . . . .         | 3,000,000         | 2,000,000         | 1,500,000         | 2,500,000         | 1,000,000        | 10,000           | 10,010,000        |
| 1871-80 . . . .         | 6,000,000         | 10,400,000        | 3,800,000         | 2,000,000         | 1,000,000        | 10,000           | 23,210,000        |
| 1881-88 . . . .         | 8,600,000         | 37,100,000        | 5,300,000         | 1,500,000         | 800,000          | 10,000           | 53,310,000        |
| <b>28 years . . . .</b> | <b>17,600,000</b> | <b>49,500,000</b> | <b>10,600,000</b> | <b>6,000,000</b>  | <b>2,800,000</b> | <b>30,000</b>    | <b>86,530,000</b> |
| <b>Value, £</b>         |                   |                   |                   |                   |                  |                  |                   |
| 1861-70 . . . .         | 1,000,000         | 800,000           | 2,400,000         | 7,500,000         | 2,000,000        | 2,000,000        | 15,700,000        |
| 1871-80 . . . .         | 2,000,000         | 4,200,000         | 6,000,000         | 6,000,000         | 2,000,000        | 2,000,000        | 22,200,000        |
| 1881-88 . . . .         | 2,800,000         | 13,000,000        | 8,400,000         | 4,500,000         | 1,600,000        | 2,000,000        | 32,300,000        |
| <b>28 years . . . .</b> | <b>5,800,000</b>  | <b>18,000,000</b> | <b>16,800,000</b> | <b>18,000,000</b> | <b>5,600,000</b> | <b>6,000,000</b> | <b>70,200,000</b> |

The returns for 1877 and 1887 compare as follows:—

|                      | Tons           |                  | Value, £         |                  |
|----------------------|----------------|------------------|------------------|------------------|
|                      | 1877           | 1887             | 1877             | 1887             |
| Sulphur . . . .      | 130,000        | 340,000          | 1,050,000        | 950,000          |
| Iron ore . . . .     | 110,000        | 230,000          | 110,000          | 100,000          |
| Zinc ore . . . .     | 45,000         | 90,000           | 180,000          | 250,000          |
| Lead ore . . . .     | 18,000         | 40,000           | 440,000          | 280,000          |
| Sundries . . . .     | 21,000         | 470,000          | 260,000          | 420,000          |
| <b>Total . . . .</b> | <b>324,000</b> | <b>1,170,000</b> | <b>2,040,000</b> | <b>2,000,000</b> |

In 1877 the number of miners was 41,000, and in 1887 it was 47,000. This is exclusive of marble quarries which employ 20,000 men, and have an annual output of a million sterling.

#### SPAIN

An official report of mining products in 1780 was as follows:—

|                      | Tons          | Value, £       |
|----------------------|---------------|----------------|
| Iron . . . .         | 9,000         | 70,000         |
| Lead . . . .         | 1,600         | 30,000         |
| Quicksilver . . . .  | 900           | 180,000        |
| Antimony, &c. . . .  | 500           | 30,000         |
| <b>Total . . . .</b> | <b>12,000</b> | <b>310,000</b> |

A report published in 1863 was as follows:—

|                    | <i>Tons</i> |                     | <i>Tons</i> |
|--------------------|-------------|---------------------|-------------|
| Coal . . . .       | 320,000     | Ironstone . . . .   | 170,000     |
| Salt . . . .       | 3,800,000   | Zinc ore . . . .    | 110,000     |
| Copper ore . . . . | 140,000     | Sulphur . . . .     | 23,000      |
| Lead ore . . . .   | 310,000     | Quicksilver . . . . | 1,000       |

In 1887 the export of minerals showed:—

|                      | Tons             | Value, £         |
|----------------------|------------------|------------------|
| Iron Ore . . . .     | 5,200,000        | 1,800,000        |
| Copper Ore . . . .   | 800,000          | 1,200,000        |
| Lead . . . .         | 63,000           | 900,000          |
| Quicksilver . . . .  | 1,300            | 300,000          |
| Sundries . . . .     | 300,000          | 500,000          |
| <b>Total . . . .</b> | <b>6,364,000</b> | <b>4,700,000</b> |

The mines employed 57,000 hands in 1887.

There has been of late years a great increase in the production of coal, ironstone and copper, but a decline in lead.

## BELGIUM

The official records for 48 years show as follows:—

| Year       | Tons Raised |         |            | Value, £  |         |           | Miners | Tons Coal per Collier |
|------------|-------------|---------|------------|-----------|---------|-----------|--------|-----------------------|
|            | Coal        | Iron    | Total      | Coal      | Iron    | Total     |        |                       |
| 1840 . . . | 3,900,000   | 200,000 | 4,100,000  | 1,800,000 | 100,000 | 1,900,000 | ...    | ...                   |
| 1850 . . . | 5,800,000   | 300,000 | 6,100,000  | 1,800,000 | 100,000 | 1,900,000 | 42,100 | 121                   |
| 1860 . . . | 9,600,000   | 800,000 | 10,400,000 | 4,300,000 | 300,000 | 4,600,000 | 71,100 | 123                   |
| 1870 . . . | 13,700,000  | 700,000 | 14,400,000 | 6,000,000 | 200,000 | 6,200,000 | 79,800 | 149                   |
| 1880 . . . | 16,900,000  | 300,000 | 17,200,000 | 6,800,000 | 100,000 | 6,900,000 | 81,400 | 164                   |
| 1887 . . . | 18,400,000  | 200,000 | 18,600,000 | 5,950,000 | 50,000  | 6,000,000 | 77,000 | 182                   |

There are, moreover, stone quarries, whose product is valued at £1,300,000 per annum.

## SWEDEN AND NORWAY

The mining products of Sweden may be summed up as 900,000 tons of iron ore and 300,000 tons of coal; the mines employ 29,000 persons. The production of iron ore has trebled since 1850. Norway has 28 mines, employing 2000 hands, the output averaging £180,000 per annum. The mining returns of Sweden for 1870 and 1887 compare thus:—

|                  | Tons Ore |         |
|------------------|----------|---------|
|                  | 1870     | 1887    |
| Iron . . . . .   | 700,000  | 900,000 |
| Copper . . . . . | 2,000    | 1,000   |
| Zinc . . . . .   | 33,000   | 50,000  |

Of precious metals Sweden raised in 1870 gold to the value of £150,000 and silver worth £10,000; in 1887 silver represented £40,000 sterling.

## GREECE

The lead mines of Laurium have been worked for many years by a French company, producing 1,200,000 tons ore in twelve years ending 1888, one half of which was smelted near the mines. Small quantities of zinc ore are also raised in Greece. The total value of mineral products is about £600,000 yearly.

## UNITED STATES

The following table shows the date of discovery and the commencement of mining of certain minerals:—

|                       | Place         | Discovered | Began Mining |
|-----------------------|---------------|------------|--------------|
| Iron . . . . .        | Virginia      | 1610       | 1663         |
| Copper . . . . .      | Massachusetts | 1632       | 1648         |
| Coal . . . . .        | Pennsylvania  | 1768       | 1784         |
| Lead . . . . .        | ...           | 1823       | 1829         |
| Petroleum . . . . .   | Pennsylvania  | 1826       | 1845         |
| Gold . . . . .        | California    | 1849       | 1849         |
| Silver . . . . .      | Nevada        | 1858       | 1859         |
| Quicksilver . . . . . | California    | 1860       | 1860         |

The first iron-foundry was at Lynn, Massachusetts, the first copper smelting-works at Salem in the same State. In 1660 the Dutch worked copper mines in New Jersey, and about the same time the French Jesuits at Lake Superior. A cargo of ninety tons of copper was shipped from New York in 1766, but little progress was made until 1843, when the United States Government bought the Lake Superior copper-fields from the Chippeway Indians. The production of lead in 1829 was 7200 tons. The first regular oil-wells were found near Pittsburg, Pennsylvania, in 1845 (see *Oil*). Gold was discovered at Sutor's Mill, California, in 1849, silver by J. H. Comstock and James Phinney at Storey Co., Nevada, in 1858; small quantities of gold had been found in the Southern States previously.

The following table shows approximately the principal

mining products (except gold and silver) at various dates:—

| Year | Tons        |            |            |          |             |
|------|-------------|------------|------------|----------|-------------|
|      | Coal        | Iron Ore   | Copper Ore | Lead Ore | Total       |
| 1830 | 1,300,000   | 400,000    | ...        | 7,000    | 1,707,000   |
| 1840 | 1,800,000   | 600,000    | ...        | 10,000   | 2,410,000   |
| 1850 | 8,000,000   | 1,200,000  | 5,000      | 50,000   | 9,255,000   |
| 1860 | 15,000,000  | 1,600,000  | 40,000     | 80,000   | 16,720,000  |
| 1870 | 33,000,000  | 3,200,000  | 80,000     | 100,000  | 36,380,000  |
| 1880 | 70,500,000  | 8,000,000  | 120,000    | 150,000  | 78,770,000  |
| 1889 | 142,000,000 | 13,300,000 | 600,000    | 250,000  | 156,150,000 |

The production of precious metals is shown as follows:—

| Period         | Tons  |        | Value, Millions £ Sterling |        |       |
|----------------|-------|--------|----------------------------|--------|-------|
|                | Gold  | Silver | Gold                       | Silver | Total |
| 1851-60 . . .  | 830   | 7      | 116                        | ...    | 116   |
| 1861-70 . . .  | 713   | 2,375  | 100                        | 20     | 120   |
| 1871-80 . . .  | 620   | 7,750  | 87                         | 62     | 149   |
| 1881-88 . . .  | 373   | 8,860  | 52                         | 62     | 114   |
| 38 years . . . | 2,536 | 18,992 | 355                        | 144    | 502   |

The total value of mining products in 88 years was approximately as follows:—

| Period         | Millions £ Sterling |        |           |        |      |           |       |
|----------------|---------------------|--------|-----------|--------|------|-----------|-------|
|                | Gold                | Silver | Ironstone | Copper | Lead | Petroleum | Total |
| 1801-40 . . .  | 1                   | ...    | 3         | ...    | 1    | ...       | 12    |
| 1841-50 . . .  | 8                   | ...    | 3         | 1      | 3    | ...       | 33    |
| 1851-60 . . .  | 116                 | ...    | 5         | 3      | 6    | 3         | 173   |
| 1861-70 . . .  | 100                 | 20     | 9         | 5      | 8    | 17        | 252   |
| 1871-80 . . .  | 87                  | 62     | 18        | 9      | 11   | 33        | 391   |
| 1881-88 . . .  | 52                  | 62     | 29        | 26     | 13   | 37        | 513   |
| 88 years . . . | 364                 | 144    | 67        | 44     | 42   | 90        | 1,374 |

The production of metallic copper and lead, according to Keller, was as follows:—

| Year           | Copper |                | Lead    |      |
|----------------|--------|----------------|---------|------|
|                | Tons   | Year           | Tons    | Year |
| 1845 . . . . . | 100    | 1852 . . . . . | 9,100   |      |
| 1850 . . . . . | 650    | 1862 . . . . . | 21,800  |      |
| 1855 . . . . . | 3,000  | 1872 . . . . . | 14,300  |      |
| 1860 . . . . . | 7,300  | 1882 . . . . . | 12,900  |      |
| 1865 . . . . . | 8,600  |                | 23,500  |      |
| 1870 . . . . . | 12,800 |                | 54,100  |      |
| 1875 . . . . . | 18,300 |                | 82,600  |      |
| 1880 . . . . . | 27,400 |                | 88,700  |      |
| 1882 . . . . . | 41,600 |                | 120,000 |      |

About 60 per cent. of the copper comes from the Lake Superior fields above mentioned, which produced 190,000 tons of metallic copper in the ten years ending 1887

Official returns for 1888 are as follows :—

|                     | Metallic Products |            |                     | Non-Metallic |            |
|---------------------|-------------------|------------|---------------------|--------------|------------|
|                     | Tons              | Value, £   |                     | Tons         | Value, £   |
| Pig iron . . . . .  | 6,500,000         | 22,200,000 | Coal . . . . .      | 142,040,000  | 47,100,000 |
| Copper . . . . .    | 105,000           | 7,100,000  | Stone . . . . .     | ...          | 5,300,000  |
| Lead . . . . .      | 160,000           | 3,300,000  | Lime . . . . .      | 4,500,000    | 5,100,000  |
| Zinc . . . . .      | 50,000            | 1,100,000  | Cement . . . . .    | 900,000      | 900,000    |
| Gold, oz. . . . .   | 1,600,000         | 6,800,000  | Salt . . . . .      | 1,050,000    | 900,000    |
| Silver, oz. . . . . | 45,800,000        | 12,300,000 | Petroleum . . . . . | 5,500,000    | 5,100,000  |
| Sundries . . . . .  | ...               | 300,000    | Sundries . . . . .  | ...          | 7,000,000  |
| Total . . . . .     | ...               | 53,100,000 | Total . . . . .     | ...          | 71,400,000 |

Mining and metallic industries together represent 125 millions sterling, but this allows an excessive value for silver, from which a deduction of £2,000,000 should be made.

#### AUSTRALIA

The official report by Mr. Coghlan shows the total value of minerals extracted in thirty-eight years down to 1888 was as follows :—

|                             | £ Sterling  |           |            |            |            |             |
|-----------------------------|-------------|-----------|------------|------------|------------|-------------|
|                             | Gold        | Silver    | Copper     | Tin        | Coal       | Total       |
| New South Wales . . . . .   | 37,200,000  | 2,900,000 | 5,400,000  | 8,500,000  | 22,300,000 | 76,300,000  |
| Victoria . . . . .          | 222,500,000 | 100,000   | 200,000    | 700,000    | ...        | 223,500,000 |
| Queensland . . . . .        | 21,300,000  | 400,000   | 1,700,000  | 5,100,000  | 900,000    | 29,400,000  |
| South Australia . . . . .   | 900,000     | ...       | 19,200,000 | ...        | ...        | 20,100,000  |
| New Zealand . . . . .       | 44,800,000  | 100,000   | ...        | ...        | 2,700,000  | 47,600,000  |
| Tasmania . . . . .          | 2,000,000   | ...       | ...        | 4,400,000  | 200,000    | 6,600,000   |
| Western Australia . . . . . | 200,000     | 300,000   | 500,000    | ...        | ...        | 1,000,000   |
| Total . . . . .             | 328,900,000 | 3,800,000 | 26,000,000 | 18,700,000 | 26,100,000 | 404,500,000 |

The quantities of gold extracted were as follows :—

| Colony                      | Gold Found | Ounces Extracted | Value, £    |
|-----------------------------|------------|------------------|-------------|
| New South Wales . . . . .   | 1851       | 9,973,000        | 37,200,000  |
| Victoria . . . . .          | 1851       | 55,636,000       | 222,500,000 |
| South Australia . . . . .   | 1852       | 248,000          | 900,000     |
| Tasmania . . . . .          | 1852       | 533,000          | 2,000,000   |
| Queensland . . . . .        | 1858       | 6,089,000        | 21,300,000  |
| New Zealand . . . . .       | 1858       | 11,422,000       | 44,800,000  |
| Western Australia . . . . . | 1886       | 55,000           | 200,000     |
| Total . . . . .             | ...        | 83,955,000       | 328,900,000 |

The values of gold produced and exported were as follows :—

| Period             | Produced, £  | Exported, £ |
|--------------------|--------------|-------------|
| 1851-60 . . . . .  | 118,000,000  | 97,500,000  |
| 1861-70 . . . . .  | 95,000,000   | 97,900,000  |
| 1871-80 . . . . .  | 81,000,000   | 65,200,000  |
| 1881-88 . . . . .  | 35,000,000   | 33,200,000  |
| 38 years . . . . . | 329,000,000* | 293,800,000 |

Copper was first found in South Australia in 1843, tin in New South Wales in 1872, and silver in the latter colony in 1881. The first coal was raised in New South Wales in 1847, namely, 40,000 tons, the product now reaching 4,200,000 tons.

\* In the article on gold and silver (p. 306), it will be seen that the gold yield of Australia for the said thirty-eight years is put down at 322 millions sterling. Liversidge makes the yield of coal 44 million tons to 1888.

The yield of gold-fields in 1888 was as follows :—

|                             | Gold, Oz. | Value, £  | No. of Miners | Oz. per Man |
|-----------------------------|-----------|-----------|---------------|-------------|
| New South Wales . . . . .   | 88,000    | 320,000   | 8,300         | 10.6        |
| Victoria . . . . .          | 625,000   | 2,500,000 | 25,100        | 25.0        |
| Queensland . . . . .        | 482,000   | 1,700,000 | 9,300         | 52.0        |
| South Australia . . . . .   | 17,000    | 70,000    | 400           | 39.0        |
| Tasmania . . . . .          | 40,000    | 150,000   | 900           | 44.0        |
| New Zealand . . . . .       | 201,000   | 800,000   | 9,400         | 21.5        |
| Western Australia . . . . . | 50,000    | 200,000   | 800           | 62.0        |
| Total . . . . .             | 1,502,000 | 5,740,000 | 54,200        | 27.5        |

The largest nuggets on record are :—

| Name             | Locality | Oz.   | Value, £ | Date          |
|------------------|----------|-------|----------|---------------|
| Welcome Stranger | Ballarat | 2,020 | 8,380    | 9th June 1858 |
|                  | ...      | 2,280 | 9,460    | 9th Feb. 1869 |

The deepest mines are Magdala, Stawell, 2409 feet, and Lansell's, Sandhurst, 2640 feet.

#### SOUTH AFRICA

The Transvaal gold-fields, recently discovered, promise to be very productive, the value extracted in 1889 reaching £1,300,000 sterling.

#### BOLIVIA

In 1883 the extraction of silver was as follows :—

|                        | Oz.        | Value, £  |
|------------------------|------------|-----------|
| Huanchaca . . . . .    | 5,600,000  | 900,000   |
| Potosi . . . . .       | 1,200,000  | 200,000   |
| Oruro . . . . .        | 1,200,000  | 200,000   |
| Aullagas . . . . .     | 3,200,000  | 500,000   |
| Guadalupe, &c. . . . . | 4,800,000  | 800,000   |
| Total . . . . .        | 16,000,000 | 2,600,000 |

## MINING

407

## MONEY

The Potosi mines yielded 600 millions sterling in 320 years.

### CANADA

The mining products in 1887 were :—

|                    | Tons      | Value, £  |
|--------------------|-----------|-----------|
| Coal . . . . .     | 2,100,000 | 1,000,000 |
| Gold . . . . .     | ...       | 200,000   |
| Sandries . . . . . | ...       | 1,800,000 |
| Total . . . . .    | ...       | 3,000,000 |

### MEXICO

There are 350 mines, which are said to occupy 100,000 men. In sixty years ending 1880 were raised 180 millions sterling worth of silver, and nearly one million sterling of gold. The mines are supposed at present to stand for a capital of 6 millions sterling. According to Messdaglia, the mines yielded in 383 years, to 1875, as follows :—

|                  | Tons   | Value, £    |
|------------------|--------|-------------|
| Gold . . . . .   | 265    | 36,000,000  |
| Silver . . . . . | 76,200 | 677,000,000 |
| Total . . . . .  | 76,465 | 713,000,000 |

### ARGENTINA

Rickard's report in 1869 showed 2700 men employed in various mines. The product was 3000 oz. gold, 44,000 oz. silver, 700 tons copper, and 1000 tons lead; total value £70,000 per annum, the capital employed being £300,000.

In 1885 the yield of the mines was estimated thus :—

|                             |        | £       |
|-----------------------------|--------|---------|
| Catamarca . . . . .         | Copper | 70,000  |
| San Juan . . . . .          | Silver | 40,000  |
| Mendoza . . . . .           | "      | 40,000  |
| Cordoba and Rioja . . . . . | "      | 64,000  |
| Total . . . . .             |        | 214,000 |

The actual yield is supposed at present to barely reach £150,000.

### CHILE

Copper is the most important mineral, and the ores extracted since 1850 are supposed to be equivalent to the following quantities of fine copper :—

| Period             | Tons      | Value, £   |
|--------------------|-----------|------------|
| 1851-60 . . . . .  | 190,000   | 15,200,000 |
| 1861-70 . . . . .  | 270,000   | 20,500,000 |
| 1871-80 . . . . .  | 330,000   | 20,300,000 |
| 1881-88 . . . . .  | 300,000   | 18,000,000 |
| 38 years . . . . . | 1,090,000 | 74,000,000 |

In late years nitrate has obtained importance, shipments rising from 350,000 tons in 1885 to 800,000 in 1888. The coal-fields are supposed to yield 10 million tons yearly; and the silver mines 5 million oz. of that metal, worth £800,000.

### VENEZUELA

The latest reports show as follows :—

|                  | Oz.     | Value, £  |
|------------------|---------|-----------|
| Gold . . . . .   | 250,000 | 900,000   |
| Copper . . . . . | ...     | 150,000   |
| Total . . . . .  | ...     | 1,050,000 |

## MONEY

The amount of money in use among nations at various dates was (excluding copper and nickel, which are of trifling value) approximately as follows :—

|                | Millions £ Sterling |        |       |       |
|----------------|---------------------|--------|-------|-------|
|                | Gold                | Silver | Paper | Total |
| 1600 . . . . . | 29                  | 102    | ...   | 131   |
| 1700 . . . . . | 75                  | 225    | 1     | 301   |
| 1800 . . . . . | 126                 | 360    | 82    | 568   |
| 1848 . . . . . | 157                 | 388    | 260   | 805   |
| 1860 . . . . . | 340                 | 480    | 360   | 1,180 |
| 1890 . . . . . | 830                 | 801    | 771   | 2,402 |

The above includes the paper-money only of Europe, United States, the British Colonies, and the Colonies of France and Spain. No account is taken of the depreciated currency of South America, the value of which is merely conventional, and for the most part ideal.

The money now in use is approximately as follows :—

|                         | Millions £ Sterling |        |       |       |                  |
|-------------------------|---------------------|--------|-------|-------|------------------|
|                         | Gold                | Silver | Paper | Total | £ per Inhabitant |
| Great Britain . . . . . | 102                 | 22     | 39    | 163   | 4.4              |
| France . . . . .        | 178                 | 150    | 115   | 443   | 11.8             |
| Germany . . . . .       | 122                 | 45     | 71    | 238   | 5.0              |
| Russia . . . . .        | 39                  | 14     | 123   | 176   | 2.1              |
| Austria . . . . .       | 8                   | 19     | 76    | 103   | 2.6              |
| Italy . . . . .         | 22                  | 11     | 57    | 90    | 3.0              |
| Spain . . . . .         | 19                  | 24     | 30    | 73    | 4.2              |
| Portugal . . . . .      | 9                   | 2      | 1     | 12    | 2.7              |

| Colonies, &c. . . .  | 1                   | 15   | 66   | 69   |
| Total . . . . .      | 206                 | 360  | 711  | 771  |

The above is exclusive of the paper-money of South America, which has a very doubtful value.

Money was first coined by King Pheidon of Argos, 800 B.C., of silver only. Croesus was the first, says Herodotus, to coin gold. Darius coined gold and silver at 13½ units of silver to one of gold.

The principal coins at present in use are:—

#### Gold

| Country       | Name           | Weight | Fineness | Value   |
|---------------|----------------|--------|----------|---------|

Some African tribes use cowrie-shells, 200 being value for 1d.

#### UNITED KINGDOM

According to the best economists, the amount of money at various dates was approximately as follows:—

|                | Millions £ Sterling |        |       |       | £ per inhabitant |
|----------------|---------------------|--------|-------|-------|------------------|
|                | Gold                | Silver | Paper | Total |                  |
| 1600 . . . . . | 1                   | 2      | ...   | 3     | 0.6              |
| 1700 . . . . . | 12                  | 4      | 1     | 17    | 3.0              |
| 1800 . . . . . | 37                  | 8      | 25    | 70    | 4.4              |
| 1848 . . . . . | 55                  | 11     | 34    | 100   | 3.7              |
| 1890 . . . . . | 102                 | 22     | 39    | 163   | 4.4              |

The following table shows the principal gold coins in use from the fourteenth century to date:—

| Name              | Date | Nominal Value | In Present Money |
|-------------------|------|---------------|------------------|
|                   |      | £ s. d.       | £ s. d.          |
| Noble . . . . .   | 1345 | 0 6 8         | 1 1 10           |
| Angel . . . . .   | 1465 | 0 6 8         | 0 11 9           |
| Crown . . . . .   | 1530 | 0 5 0         | 0 7 6            |
| Sovereign . . . . | 1551 | 1 10 0        | 1 8 0            |
| Noble . . . . .   | 1600 | 0 15 0        | 0 16 0           |
| Sovereign . . . . | 1626 | 1 0 0         | 1 1 4            |

The amount of gold and silver coined from Henry III. to December 1889 was as follows:—

| Reign           | Gold        | Silver      | Total       | Per Annum  |
|-----------------|-------------|-------------|-------------|------------|
|                 | £           | £           | £           | £          |
| Henry III. . .  | ...         | 3,898       | 3,898       | ...        |
| Edward I. . .   | ...         | 38,603      | 38,603      | 1,100      |
| Edward II. . .  | ...         | 45,751      | 45,751      | 2,300      |
| Edward III. .   | 11,344      | 85,703      | 97,047      | 1,600      |
| Richard II. .   | 3,988       | 2,228       | 6,216       | 300        |

| William IV. .   | 10,920,035  | 1,122,100   | 12,042,135  | 1,720,000  |
| Victoria . . .  | 312,300,000 | 231,800,000 | 544,100,000 | 10,300,000 |
| Total . . . . . | 476,390,489 | 274,040,085 | 750,430,574 | ...        |

Henry III. coined at Canterbury, Edward III. at York and Calais, Edward IV. at Bristol, the rest mostly at London. The coinage, however, of the present reign has been as follows:—

| At              | Gold, £     | Silver, £   | Total, £    |
|-----------------|-------------|-------------|-------------|
| London . . .    | 207,000,000 | 25,800,000  | 232,800,000 |
| Sydney . . .    | 61,300,000  | ...         | 61,300,000  |
| Melbourne . .   | 42,000,000  | ...         | 42,000,000  |
| India . . . . . | 2,000,000   | 206,000,000 | 208,000,000 |
| Total . . . . . | 312,300,000 | 231,800,000 | 544,100,000 |

It appears that Queen Victoria has coined 65 per cent. of the gold and 84 per cent. of the silver struck by British monarchs in 600 years. Shillings were first coined by Henry VIII. in 1544; crowns, half-crowns, sixpences, and threepennies by Edward VI. The percentage of alloy in British coins was as follows:—

| Reigns                   | Per Cent. |
|--------------------------|-----------|
| Henry III. to Henry VII. | 8         |
| Henry VIII.              | 33        |
| Edward VI.               | 25        |

Queen Elizabeth improved the character of the coinage, but reduced the size of all coins: thus 3s. of her money had only the same quality of silver as 1s. of Edward I. The following table shows how much money was coined out of 12 oz. troy weight of either metal in successive reigns:—

| Date | Gold, 12 oz.<br>(24 carats) | Silver, 12 oz.   | Reign       |
|------|-----------------------------|------------------|-------------|
| 1280 | £ s. d.<br>12 10 0          | £ s. d.<br>1 0 3 | Edward I.   |
| 1370 | 15 0 0                      | 1 5 0            | Edward III. |
| 1420 | 16 13 4                     | 1 10 0           | Henry V.    |
| 1470 | 22 10 0                     | 1 17 6           | Edward IV.  |
| 1540 | 30 0 0                      | 2 8 0            | Henry VIII. |
| 1550 | 36 0 0                      | 3 12 0           | Edward VI.  |
| 1590 | 33 0 0                      | 3 12 0           | Elizabeth   |
| 1640 | 44 10 0                     | 3 2 0            | Charles I.  |

The total amount of currency called in by Queen Elizabeth and re-minted was:—

|        | Oz.       | Value, £  |
|--------|-----------|-----------|
| Gold   | 360,000   | 1,080,000 |
| Silver | 4,800,000 | 1,200,000 |

No change was made in the weight or value of coins from 1640 until 1816, in which latter year the pound of silver (12 oz. troy) was ordered to be made into 66s. instead of 62s. as before. The Mint thus established a seignorage or profit of 4s. an ounce on silver, but no charge is made on gold; the expense of coining gold is 10s. per £100. Silver money is legal tender only up to 40s.; gold to any amount.

The paper-money of the United Kingdom has been stationary since 1830, viz.:—

|                      | 1830       | 1890       |
|----------------------|------------|------------|
|                      | £          | £          |
| Bank of England      | 20,100,000 | 24,600,000 |
| Other English banks. | 10,100,000 | 3,000,000  |
| Scotch banks         | 4,000,000  | 5,700,000  |
| Irish banks          | 4,200,000  | 5,800,000  |
| Total                | 38,400,000 | 39,100,000 |

For details of the Bank of England see *Banks*.

The suspension of specie payments caused by the war against Bonaparte began in 1797 and lasted till 1821, the value of a £5 Bank of England note varying as follows:—

#### Gold Value of Bank of England £5 Note

| Years   | Shillings | Years   | Shillings |
|---------|-----------|---------|-----------|
| 1797-99 | 100       | 1813    | 73        |
| 1800-1  | 92        | 1814    | 80        |
| 1802-3  | 96        | 1815    | 84        |
| 1804-8  | 97        | 1816    | 96        |
| 1809    | 91        | 1817    | 98        |
| 1810    | 87        | 1818-19 | 97        |
| 1811    | 83        | 1820    | 100       |
| 1812    | 79        |         |           |

In 1878 the currency of the Bank of England was found to be composed as follows:—

| Value of Note | Number    | Amount      | Ratio per Cent. |
|---------------|-----------|-------------|-----------------|
| £5            | 2,208,000 | £11,040,000 | 39              |
| £10           | 507,000   | 5,070,000   | 18              |
| £20-50-100    | 160,000   | 8,030,000   | 28              |
| £200-300-500  | 7,000     | 2,120,000   | 8               |
| £1000         | 2,000     | 2,000,000   | 7               |
| Total         | 2,884,000 | £28,260,000 | 100             |

The notes cost one halfpenny each. The life of a bank-note in 1880 was under seventy days, the number issued during the year having been 15,260,000 for an aggregate amount of 338 millions, say £22 each. The average in the above table for 1878 is only £10 each.

According to the Mint report for 1890, the gold currency of the United Kingdom consists of about 80 million sovereigns and 45 million half-sovereigns, together £102,500,000.

#### FRANCE

The following is a table of old French coins:—

| Date | Name     | Value             | Date | Name       | Value            |
|------|----------|-------------------|------|------------|------------------|
| 1226 | Angel    | £ s. d.<br>0 11 3 | 1507 | Porcupine  | £ s. d.<br>0 9 0 |
| 1258 | Tournois | 0 0 9             | 1539 | Salamander | 0 9 0            |
| 1289 | Esterlin | 0 0 3             | 1550 | Henri      | 0 9 5            |
| 1294 | Royal    | 0 19 0            | 1575 | Franc      | 0 2 3            |
| 1346 | Couronne | 0 15 0            | 1640 | Louis      | 0 16 8           |
| 1428 | Mouton   | 0 5 6             | 1652 | „ silver   | 0 4 8            |
| 1430 | Royal    | 0 10 4            | 1655 | Lily, gold | 0 10 6           |
| 1435 | Ecu      | 0 8 4             | 1656 | „ silver   | 0 1 5            |

The average value of the mark of silver and that of the livre are shown as follows from the thirteenth century:—

| Date      | Livres in One Mark of Silver | Francs in One Livre |
|-----------|------------------------------|---------------------|
| 1280-1300 | 3                            | 19.00               |
| 1301-50   | 4                            | 14.00               |
| 1351-1400 | 6                            | 9.50                |
| 1401-50   | 8                            | 7.00                |
| 1451-1500 | 11                           | 5.20                |
| 1501-50   | 13                           | 4.50                |
| 1551-1600 | 18                           | 3.20                |
| 1601-50   | 28                           | 2.00                |
| 1651-1700 | 33                           | 1.70                |
| 1701-20   | 40                           | 1.50                |
| 1726-89   | 55                           | 1.00                |

The output of the French Mint in ninety-five years has been as follows:—

| Date      | Gold, £     | Silver, £   | Total, £    | Government    |
|-----------|-------------|-------------|-------------|---------------|
| 1795-1815 | 21,200,000  | 39,800,000  | 61,000,000  | Bonaparte     |
| 1816-30   | 17,600,000  | 49,900,000  | 67,500,000  | Bourbons      |
| 1831-48   | 8,600,000   | 70,300,000  | 78,900,000  | LouisPhilippe |
| 1849-52   | 17,000,000  | 18,400,000  | 35,400,000  | Republic      |
| 1853-70   | 246,000,000 | 25,200,000  | 271,200,000 | Napoleon III. |
| 1871-89   | 40,100,000  | 17,200,000  | 57,300,000  | Republic      |
| 95 years  | 350,500,000 | 220,800,000 | 571,300,000 | ...           |

The amount of currency at various dates was estimated as follows:—

| Year | Gold, £     | Silver, £   | Paper, £    | Total, £    |
|------|-------------|-------------|-------------|-------------|
| 1805 | 3,000,000   | 99,000,000  | 2,000,000   | 104,000,000 |
| 1840 | 4,000,000   | 111,000,000 | 9,000,000   | 124,000,000 |
| 1889 | 178,000,000 | 150,000,000 | 115,000,000 | 443,000,000 |

Paper-money was first issued by John Law: the amount of his notes in 1719 reached 3000 million livres, or about 120 millions sterling.

The issue of assignats under the first Republic reached its maximum in 1790, namely, 9000 millions, or about 360 millions sterling. They fell to less than one-hundredth part of their nominal value: thus, a pair of boots cost 7500, and a pound of butter 750 of these notes.

The currency of the Bank of France in 1883 was as follows:—

| Notes, Francs | Number     | Amount, £   |
|---------------|------------|-------------|
| 5             | 175,000    | 35,000      |
| 20            | 198,000    | 158,000     |
| 25            | 28,000     | 28,000      |
| 50            | 4,725,000  | 9,450,000   |
| 100           | 10,812,000 | 43,248,000  |
| 200           | 3,000      | 24,000      |
| 500           | 625,000    | 12,496,000  |
| 1,000         | 1,263,300  | 50,532,000  |
| 5,000         | 5          | 1,000       |
| Total         | 17,829,305 | 115,972,000 |

## GERMANY

On the reconstitution of the German Empire the currency was remodelled, and the following amounts of coin issued from the Mint:—

| Period   | Gold        | Silver     | Nickel, &c. | Total       |
|----------|-------------|------------|-------------|-------------|
|          | £           | £          | £           | £           |
| 1872-80  | 87,400,000  | 21,600,000 | 2,300,000   | 111,300,000 |
| 1881-89  | 34,100,000  | 1,600,000  | ...         | 35,700,000  |
| 18 years | 121,500,000 | 23,200,000 | 2,300,000   | 147,000,000 |

The total currency in 1889 was approximately thus:—

|                |             |
|----------------|-------------|
| Gold           | 122,000,000 |
| Silver         | 45,000,000  |
| Bank-notes     | 64,300,000  |
| Treasury notes | 6,500,000   |
| Total          | 237,800,000 |

The above, however, includes 22 millions sterling of old silver money no longer in circulation.

## SCANDINAVIA

The total currency may be summed up thus:—

|            | Sweden    | Norway    | Denmark   | Total      |
|------------|-----------|-----------|-----------|------------|
|            | £         | £         | £         | £          |
| Gold       | 2,800,000 | 900,000   | 1,900,000 | 5,600,000  |
| Silver     | 900,000   | 300,000   | 1,000,000 | 2,200,000  |
| Bank-notes | 6,200,000 | 2,400,000 | 4,400,000 | 13,000,000 |
| Total      | 9,900,000 | 3,600,000 | 7,300,000 | 20,800,000 |

## RUSSIA

The Mint issued in forty years down to 1890 as follows:—

|        | Tons  | Value, £    |
|--------|-------|-------------|
| Gold   | 1,102 | 154,100,000 |
| Silver | 2,580 | 23,500,000  |
| Total  | 3,682 | 177,600,000 |

Notwithstanding the Siberian gold mines, which have produced 1500 tons of gold, worth 210 millions sterling, since 1820, Russia has been a prey to inconvertible notes.

These are the result of unscrupulous finances, the Government printing millions of roubles at will. The following table shows the issue:—

| Year | Issue, Millions | Value, Pence | Year | Issue, Millions | Value, Pence |
|------|-----------------|--------------|------|-----------------|--------------|
| 1774 | 20              | 38           | 1843 | 600             | 12           |
| 1786 | 100             | 36           | 1844 | 180             | 35           |
| 1796 | 160             | 24           | 1850 | 310             | 33           |
| 1800 | 210             | 18           | 1860 | 690             | 30           |
| 1810 | 580             | 12           | 1870 | 720             | 28           |
| 1817 | 870             | 9            | 1880 | 1,180           | 24           |
| 1823 | 605             | 10           | 1888 | 1,046           | 22           |

The conversion of 1843 consisted in calling in the old notes, and giving 30 new roubles for 100 old ones. The currency rose in 1890 to 26d. the paper rouble.

## AUSTRIA

This country, like Russia, although producing gold, has been afflicted with inconvertible currency owing to reckless issues of paper-money. The amounts and the rate of exchange were approximately as follows:—

| Date | Currency, Million Florins | Exchange, Pence | Gold Premium per Cent. |
|------|---------------------------|-----------------|------------------------|
| 1788 | 20                        | 24              | ...                    |
| 1802 | 237                       | 10              | 140                    |
| 1811 | 1,060                     | 4               | 500                    |
| 1812 | 212                       | 24              | ...                    |
| 1816 | 639                       | 6               | 300                    |
| 1838 | 200                       | 10              | 140                    |
| 1876 | 635                       | 20              | 20                     |
| 1889 | 762                       | 20              | 20                     |

In 1811, the Empire being bankrupt, the notes were "converted," the holders getting one new note for five old ones, that is, losing 80 per cent. In 1816 the new notes had fallen to 25 per cent. of their nominal value, and a second conversion was made, holders getting two new notes for seven old ones. Thus the holders of 100 florins of currency in 1810 found themselves with six florins in 1817.

The value of the currency in the last twenty-two years has been as follows:—

| Period  | Florin, Pence | Gold Premium per Cent. |
|---------|---------------|------------------------|
| 1867-70 | 19.7          | 22                     |
| 1871-75 | 21.2          | 13                     |
| 1876-80 | 20.2          | 19                     |
| 1881-89 | 19.5          | 23                     |

The paper-money in 1889 was as follows:—

|                | Florins     | £ Nominal  |
|----------------|-------------|------------|
| Bank issue     | 435,000,000 | 43,500,000 |
| Treasury notes | 327,000,000 | 32,700,000 |
| Total          | 762,000,000 | 76,200,000 |

The current of bullion during twenty-five years was as follows:—

| Period   | Imported, £ | Exported, £ |
|----------|-------------|-------------|
| 1863-70  | 23,500,000  | 27,000,000  |
| 1871-80  | 35,300,000  | 26,200,000  |
| 1881-87  | 10,300,000  | 6,500,000   |
| 25 years | 69,100,000  | 59,700,000  |

# MONEY

411

# MONEY

The Hungarian Mint turned out in twenty years as follows :—

| Period         | Gold, £   | Silver, £ | Total, £   |
|----------------|-----------|-----------|------------|
| 1867-80 . . .  | 3,100,000 | 7,000,000 | 10,100,000 |
| 1881-86 . . .  | 1,500,000 | 2,900,000 | 4,400,000  |
| 20 years . . . | 4,600,000 | 9,900,000 | 14,500,000 |

The total coinage of the Empire from 1850 to 1890 was as follows :—

|                  | Tons  | Value, £   |
|------------------|-------|------------|
| Gold . . . . .   | 137   | 19,200,000 |
| Silver . . . . . | 5,360 | 48,200,000 |
| Total . . . . .  | ...   | 67,400,000 |

## ITALY

In consequence of the war with Austria in 1866, forced currency was given by the Government to Treasury notes and those of six chartered banks, with the following results :—

| Year           | Aggregate Issue, £ | Specie Reserve, £ | Gold, Premium per Cent. |
|----------------|--------------------|-------------------|-------------------------|
| 1870 . . . . . | 22,000,000         | ...               | ...                     |
| 1874 . . . . . | 35,000,000         | ...               | 13                      |
| 1877 . . . . . | 37,600,000         | 3,000,000         | 10                      |
| 1880 . . . . . | 65,000,000         | ...               | 10                      |
| 1883 . . . . . | 51,000,000         | 25,000,000        | 0                       |
| 1888 . . . . . | 56,800,000         | 11,100,000        | 0                       |

The currency in December 1884 was composed thus :—

| Note, Lire      | Number      | Value, Lire | £ Sterling |
|-----------------|-------------|-------------|------------|
| 1/2 . . . . .   | 7,600,000   | 3,800,000   | 152,000    |
| 1 . . . . .     | 33,300,000  | 33,300,000  | 1,332,000  |
| 2 . . . . .     | 27,300,000  | 54,600,000  | 2,184,000  |
| 5 . . . . .     | 35,400,000  | 177,000,000 | 7,080,000  |
| 10 . . . . .    | 23,500,000  | 235,000,000 | 9,400,000  |
| 20 . . . . .    | 2,160,000   | 43,200,000  | 1,700,000  |
| 100 . . . . .   | 525,000     | 52,500,000  | 2,100,000  |
| 250 . . . . .   | 266,000     | 66,500,000  | 2,660,000  |
| 1,000 . . . . . | 127,000     | 127,000,000 | 5,080,000  |
| Total . . . . . | 130,178,000 | 792,900,000 | 31,688,000 |

In 1888 the total paper issue was :—

|                          |              |
|--------------------------|--------------|
| Treasury notes . . . . . | £ 13,800,000 |
| Bank-notes . . . . .     | 43,000,000   |
| Total . . . . .          | 56,800,000   |

Italy resumed specie payments on April 12, 1883, after a suspension of sixteen years. The total of gold and silver minted in forty years to 1890 was as follows :—

|                  | Tons  | Value, £   |
|------------------|-------|------------|
| Gold . . . . .   | 123   | 17,200,000 |
| Silver . . . . . | 2,530 | 22,800,000 |
| Total . . . . .  | ...   | 40,000,000 |

## BELGIUM

The Mint returns for fifty-eight years show as follows :—

| Period         | Gold, £    | Silver, £  | Total, £   |
|----------------|------------|------------|------------|
| 1832-60 . . .  | 600,000    | 6,400,000  | 7,000,000  |
| 1861-70 . . .  | 7,000,000  | 8,100,000  | 15,100,000 |
| 1871-80 . . .  | 16,000,000 | 7,400,000  | 23,400,000 |
| 1881-89 . . .  | 400,000    | 300,000    | 700,000    |
| 58 years . . . | 24,000,000 | 22,200,000 | 46,200,000 |

Copper and nickel money were also issued to £640,000 worth.

## HOLLAND

The total currency in 1889 was as follows :—

|                          | £          | In Bank, £ |
|--------------------------|------------|------------|
| Gold . . . . .           | 5,000,000  | 2,000,000  |
| Silver . . . . .         | 13,000,000 | 5,000,000  |
| Bank-notes . . . . .     | 17,300,000 | ...        |
| Treasury notes . . . . . | 1,000,000  | ...        |
| Total . . . . .          | 36,300,000 | ...        |

The coinage of forty years down to 1890 was as follows :—

|                  | Tons  | Value, £   |
|------------------|-------|------------|
| Gold . . . . .   | 48    | 6,700,000  |
| Silver . . . . . | 3,290 | 29,700,000 |
| Total . . . . .  | ...   | 36,400,000 |

## SPAIN AND PORTUGAL

In 1888 the currency of these kingdoms was estimated thus :—

|                      | Spain, £   | Portugal, £ | Total, £   |
|----------------------|------------|-------------|------------|
| Gold . . . . .       | 19,000,000 | 9,000,000   | 28,000,000 |
| Silver . . . . .     | 24,000,000 | 2,000,000   | 26,000,000 |
| Bank-notes . . . . . | 29,000,000 | 1,300,000   | 30,300,000 |
| Total . . . . .      | 72,000,000 | 12,300,000  | 84,300,000 |

The total coinage from 1850 to 1881 was :—

|                    | Gold, £    | Silver, £  | Total, £   |
|--------------------|------------|------------|------------|
| Spain . . . . .    | 17,000,000 | 10,000,000 | 27,000,000 |
| Portugal . . . . . | 13,000,000 | 2,000,000  | 15,000,000 |
| Total . . . . .    | 30,000,000 | 12,000,000 | 42,000,000 |

## UNITED STATES

The currency, according to American writers, was estimated at various dates thus :—

| Year           | Coin, £     | Paper, £    | Total, £    |
|----------------|-------------|-------------|-------------|
| 1820 . . . . . | 7,400,000   | 9,400,000   | 16,800,000  |
| 1849 . . . . . | 29,300,000  | 25,000,000  | 54,300,000  |
| 1854 . . . . . | 50,900,000  | 37,500,000  | 88,400,000  |
| 1880 . . . . . | 104,000,000 | 153,000,000 | 257,000,000 |
| 1889 . . . . . | 228,000,000 | 208,000,000 | 436,000,000 |

The components in 1880 and 1889 were as follows in American currency :—

|                          | Millions of Dollars |      |                  |       |       |       |
|--------------------------|---------------------|------|------------------|-------|-------|-------|
|                          | Treasury            |      | Banks and Public |       | Total |       |
|                          | 1880                | 1889 | 1880             | 1889  | 1880  | 1889  |
| Gold . . . . .           | 126                 | 304  | 226              | 376   | 352   | 680   |
| Silver . . . . .         | 74                  | 315  | 75               | 106   | 149   | 421   |
| Bank-notes . . . . .     | 7                   | 4    | 338              | 207   | 345   | 211   |
| Treasury notes . . . . . | 40                  | 89   | 349              | 699   | 389   | 788   |
| Total . . . . .          | 247                 | 712  | 988              | 1,388 | 1,235 | 2,100 |

The above may be converted into English money at \$4.80 per £. The output of the Mint, computed in £ sterling, was as follows:—

| Period    | Gold, £     | Silver, £   | Total, £    |
|-----------|-------------|-------------|-------------|
| 1792-1820 | 1,300,000   | 2,200,000   | 3,500,000   |
| 1821-40   | 1,900,000   | 8,900,000   | 10,800,000  |
| 1841-50   | 19,800,000  | 4,500,000   | 24,300,000  |
| 1851-60   | 66,000,000  | 9,300,000   | 75,300,000  |
| 1861-70   | 60,400,000  | 4,600,000   | 65,000,000  |
| 1871-80   | 85,200,000  | 35,600,000  | 120,800,000 |
| 1881-89   | 73,200,000  | 58,900,000  | 132,100,000 |
| 98 years  | 307,800,000 | 124,000,000 | 431,800,000 |

The Silver Law, passed by Congress in July 1890, obliges Government to coin \$4,500,000 of silver monthly, equal to £11,300,000 sterling per annum.

The war for the Union in 1861 caused a suspension of specie payments, which lasted nineteen years. The quotations of paper-money were as follows:—

| Year | Value compared with Gold |         |         | Value of \$100 |
|------|--------------------------|---------|---------|----------------|
|      | Maximum                  | Minimum | Average |                |
| 1862 | 98                       | 75      | 88      | £ 5. 6. 0      |
| 1863 | 79                       | 62      | 69      | 14 6 6         |
| 1864 | 64                       | 39      | 49      | 10 4 0         |
| 1865 | 74                       | 46      | 64      | 13 6 4         |
| 1866 | 79                       | 66      | 71      | 14 15 0        |
| 1867 | 74                       | 70      | 72      | 14 19 0        |
| 1868 | 74                       | 69      | 72      | 14 19 0        |
| 1869 | 82                       | 72      | 75      | 15 12 0        |
| 1870 | 90                       | 82      | 87      | 18 2 0         |
| 1871 | 92                       | 87      | 90      | 18 14 0        |
| 1872 | 92                       | 87      | 89      | 18 10 0        |
| 1873 | 92                       | 85      | 88      | 18 6 0         |
| 1874 | 91                       | 88      | 90      | 18 14 0        |
| 1875 | 89                       | 85      | 87      | 18 2 0         |
| 1876 | 93                       | 87      | 90      | 18 14 0        |
| 1877 | 97                       | 94      | 96      | 19 19 0        |
| 1878 | ...                      | ...     | 98      | 20 7 0         |
| 1879 | 100                      | 100     | 100     | 20 16 0        |

The average for ten years ending 1870 was 75, and for the following decade 93.

## PERSIA

The currency has been depreciated since 1875 by increasing the alloy in gold and silver coins. The kran has now but 71 grains of silver, against 83 in the year 1875, and the alloy of gold has been raised from 109 to 115 per 1000. The kran has fallen from a value of 10d. to 6½d., and the gold is at 45 per cent. premium. Baron Reuter has a concession to issue bank-notes up to £800,000, with bullion reserve 50 per cent.

## JAPAN

In 1888 the currency was as follows:—

|                |            |
|----------------|------------|
| Gold           | 19,000,000 |
| Silver         | 9,000,000  |
| Bank-notes     | 15,500,000 |
| Treasury notes | 10,500,000 |
| Total          | 54,000,000 |

Paper-money is at a discount, gold being 25 per cent. premium.

## ARGENTINA

The currency consists wholly of paper-money notes, ranging from one halfpenny up to £20 sterling. The halfpenny notes are nominally for 5 cents, the dollar being worth about 12d. In December 1884 the paper dollar

was worth 48d., but specie payments were suspended in January 1885, and the quotations since then have been:—

|           | Value of Dollar, Pence |      |      |      |      |      |
|-----------|------------------------|------|------|------|------|------|
|           | 1885                   | 1886 | 1887 | 1888 | 1889 | 1890 |
| January   | 39.5                   | 33.2 | 38.5 | 33.0 | 31.8 | 21.3 |
| February  | 37.5                   | 32.6 | 37.2 | 32.2 | 31.0 | 21.3 |
| March     | 36.2                   | 31.5 | 36.3 | 31.8 | 30.2 | 19.0 |
| April     | 32.8                   | 31.0 | 35.6 | 33.0 | 30.2 | 17.8 |
| May       | 35.8                   | 31.0 | 35.0 | 32.8 | 30.4 | 20.4 |
| June      | 36.8                   | 32.2 | 36.1 | 32.0 | 29.2 | 17.0 |
| July      | 36.5                   | 35.0 | 36.5 | 31.1 | 28.1 | 16.5 |
| August    | 33.5                   | 36.8 | 37.2 | 32.0 | 27.4 | 19.2 |
| September | 34.0                   | 40.1 | 36.0 | 32.5 | 23.7 | 19.0 |
| October   | 33.2                   | 41.0 | 33.6 | 32.3 | 22.7 | 18.0 |
| November  | 32.4                   | 37.5 | 33.0 | 33.2 | 21.8 | 17.0 |
| December  | 33.5                   | 37.0 | 32.9 | 33.6 | 20.4 | 15.5 |
| Average   | 35.0                   | 34.2 | 36.0 | 32.5 | 27.0 | 18.5 |

## MONUMENTS

According to Strabo, the Tower of Babel was 600 feet high. The following are remarkable monuments and obelisks:—

| Name                | Locality       | Height, Feet | Weight, Tons |
|---------------------|----------------|--------------|--------------|
| Wellington Monument | Dublin         | 205          | 1,000        |
| Nelson              | London         | 202          | 1,800        |
| Nelson              | London         | 177          | 1,500        |
| Nelson              | Dublin         | 125          | 1,000        |
| *Lateran            | Rome           | 105          | 445          |
| Alexander           | St. Petersburg | 84           | 200          |
| *Vatican            | Rome           | 83           | 220          |
| *Luxor              | Paris          | 76           | 240          |
| *Cleopatra          | London         | 68           | 140          |
| *Meidan             | Constantinople | 50           | 60           |
| *Quirinal           | Rome           | 48           | 60           |

In the foregoing table those marked with an asterisk are Egyptian monoliths, or real obelisks, of extreme antiquity. There is also a fine obelisk at Heliopolis, still standing. The second of Cleopatra's Needles has been removed to the United States, for erection in New York.

The height of certain edifices is as follows:—

|                       | Feet |                     | Feet |
|-----------------------|------|---------------------|------|
| Eiffel Tower, Paris   | 990  | Freyburg Cathedral  | 412  |
| Cologne Cathedral     | 528  | Salisbury Cathedral | 406  |
| St. Nicholas, Hamburg | 475  | Florence Cathedral  | 393  |
| St. Peter's, Rome     | 472  | St. Paul's, London  | 366  |
| Strasbourg Cathedral  | 468  | Milan Cathedral     | 360  |
| Pyramid of Cheops     | 452  | Brussels Townhall   | 355  |
| St. Stephen's, Vienna | 445  | Invalides, Paris    | 346  |
| Amiens Cathedral      | 440  |                     |      |

The diameter of the following domes and arches is:—

|                  | Feet |                      | Feet |
|------------------|------|----------------------|------|
| Milan Cathedral  | 55   | St. Paul's, London   | 112  |
| Pantheon, Paris  | 67   | St. Sophia           | 115  |
| Invalides, Paris | 80   | Sta. Maria, Florence | 139  |
| Achmet's Mosque  | 92   | St. Peter's, Rome    | 139  |

The cost of certain buildings is stated to have been:—

|                         |            |
|-------------------------|------------|
| Opera House, Paris      | £1,600,000 |
| Law Courts, Brussels    | 1,200,000  |
| Cathedral, Cologne      | 2,100,000  |
| Parliament, Westminster | 3,500,000  |
| St. Peter's, Rome       | 3,500,000  |

The Great Pyramid of Cheops has 85 million cubic feet of material, the Wall of China 6350 millions. The Pyramids are supposed to have been built 1500 B.C., the Wall of China 202 B.C. Next in antiquity are the Round Towers of Ireland, probably of the 6th century or earlier: there are 45, the highest at Kilmacduagh, Galway, 108 ft. diameter 18½ ft.

## MOORS

The Moors built in Cordoba 4437 mosques, 4300 towers, 900 public baths, 28 squares, 80,400 shops, 60,000 palaces and hotels, and 213,000 houses. At Granada they built 1030 towers and 70,000 houses.

## MORTGAGES

*United Kingdom.*—Lord Reay estimates the mortgages at 58 per cent. in England of the value of real estate. In Ireland, according to Commissioner Greene, they amount to 40 per cent., say 120 millions sterling.

*France.*—New mortgages average 30 millions sterling per annum: on December 31, 1876, all existing mortgages were officially estimated at 575 millions sterling.

*Germany.*—In 1870 the mortgages in Prussia reached 190, and in all Germany 273, millions sterling. Professor Meitzen, however, considers that 41 per cent. of all real estate in the Empire is mortgaged. An official return for 1883 shows that the houses of Berlin were mortgaged for 105 millions sterling, being 67 per cent. of their assessed value.

*Russia.*—Mortgages on land are known to reach 148 millions sterling, but probably amount to much more.

*Austria.*—In 1860 the amount on mortgage was 165 millions sterling, average interest 5 per cent.: in 1884 the amount was 320 millions sterling. The new mortgages registered in the years 1876 and 1884 were:—

|               | 1876       | 1884      |
|---------------|------------|-----------|
|               | £          | £         |
| Austria . . . | 4,400,000  | 2,400,000 |
| Hungary . . . | 5,600,000  | 6,400,000 |
| Total . . .   | 10,000,000 | 8,800,000 |

*Belgium.*—The registration of mortgages was as follows:—

| Year           | Amount, £ |
|----------------|-----------|
| 1860 . . . . . | 3,400,000 |
| 1870 . . . . . | 4,400,000 |
| 1886 . . . . . | 8,200,000 |

*Holland.*—In 1883 the existing mortgages were 77 millions sterling, as against £37,500,000 in 1869.

*Spain.*—Estimated amount, 172 millions sterling; annual average of new mortgages, £8,500,000.

*Italy.*—The total reaches 580 millions sterling, but of this sum only 288 millions bear interest.

*Norway.*—The amount of mortgage bonds is £4,600,000 sterling.

*New Zealand.*—New mortgages average £9,000,000 per annum; releases, one-third of that amount.

*Australia.*—The colony of New South Wales had new mortgages for 113 millions sterling between 1876 and 1888.

*Argentina.*—Cedulas or mortgage-bonds in 1890 amounted to 450 million dollars, nominally 90 millions sterling.

*Egypt.*—New mortgages average £1,300,000 per annum.

*Canada.*—Sir R. Cartwright ascertained in 1889 that Ontario had mortgages to the amount of 42 millions sterling.

*United States.*—Commissioner Loring summed up the mortgages during thirty-eight years in one of the Western States, and found:—

|                            |             |
|----------------------------|-------------|
| No. of mortgages . . . . . | 200,000     |
| Amount . . . . .           | £36,000,000 |
| Paid off . . . . .         | 20,400,000  |
| Still due . . . . .        | 15,600,000  |

The name of the State is not given.

## MOUNTAINS

Some of the most remarkable are:—

|                       | Feet   |                        | Feet   |
|-----------------------|--------|------------------------|--------|
| Gibraltar . . . . .   | 1,432  | Morrison . . . . .     | 12,847 |
| Snowdon . . . . .     | 3,571  | Fuziyama . . . . .     | 14,180 |
| Vesuvius . . . . .    | 3,978  | Big Horn . . . . .     | 14,430 |
| Ben Nevis . . . . .   | 4,358  | Blanc . . . . .        | 15,781 |
| Puy-Dome . . . . .    | 4,750  | Ararat . . . . .       | 17,266 |
| Olympus . . . . .     | 6,500  | Orizaba . . . . .      | 17,371 |
| Sinai . . . . .       | 7,500  | Kaa Mowna . . . . .    | 18,400 |
| Kosciusko . . . . .   | 7,176  | Elburz . . . . .       | 18,514 |
| Ankaratra . . . . .   | 8,887  | Kilimanjaro . . . . .  | 18,800 |
| Lebanon . . . . .     | 9,520  | Cotopaxi . . . . .     | 19,620 |
| Etna . . . . .        | 10,963 | Wrangel . . . . .      | 20,000 |
| St. Bernard . . . . . | 11,006 | Schopenhauer . . . . . | 20,073 |
| Petermann . . . . .   | 11,400 | Chimborazo . . . . .   | 21,440 |
| Egmont . . . . .      | 11,433 | Illimani . . . . .     | 24,450 |
| Teneriffe . . . . .   | 12,036 | Sorata . . . . .       | 25,250 |
| Cook . . . . .        | 12,400 | Everest . . . . .      | 29,002 |

Everest is the highest of the Himalayas, Schopenhauer is in New Guinea, Wrangel in North America, Morrison in Formosa, Petermann in Greenland, Ankaratra in Madagascar, and Kosciusko in Australia. The greatest height attained by Humboldt was 19,510 feet, in the Andes, but Mr. Whymper, in 1880, ascended Cotopaxi to 19,620 feet, and Chimborazo to 20,545 feet, and W. Graham in 1883 the Kabru peak of the Himalayas to 23,500 feet, the greatest height yet attained by any individual. The passes of the Alps and the Andes are:—

| Alps                         | Feet over Sea | Andes               | Feet over Sea |
|------------------------------|---------------|---------------------|---------------|
| St. Gothard . . . . .        | 6,848         | Bariloche . . . . . | 2,770         |
| Simplon . . . . .            | 6,616         | Antuco . . . . .    | 6,930         |
| St. Bernard . . . . .        | 8,158         | Planchon . . . . .  | 8,225         |
| Little St. Bernard . . . . . | 6,576         | Uspallata . . . . . | 12,870        |
| Mont Cenis . . . . .         | 6,818         | Patos . . . . .     | 13,200        |
| Madelaide . . . . .          | 6,584         | Humahuaca . . . . . | 14,060        |
| Col di Tenda . . . . .       | 5,925         | Portillo . . . . .  | 13,860        |

There are carriage-roads over all the above Alpine passes except the St. Gothard and St. Bernard. There are none over the Andes, but a railway is in construction over the Uspallata Pass.

## MUNIFICENCE

| Donor                | £       | Locality   | Object        |
|----------------------|---------|------------|---------------|
| Astor . . . . .      | 100,000 | New York   | Library       |

| Rowe . . . . .       | 120,000 | Dublin     | Church        |
| Rylands . . . . .    | 200,000 | Birmingham | Asylum        |
| Salt . . . . .       | 100,000 | Yorkshire  | Hospital      |
| Stewart . . . . .    | 150,000 | New York   | Hospital      |
| Sturge . . . . .     | 300,000 | London     | Asylum        |
| Urquijo . . . . .    | 180,000 | Madrid     | Orphanage     |
| Vanderbilt . . . . . | 200,000 | New York   | Asylum        |
| Whitworth . . . . .  | 100,000 | Manchester | Schools       |

**MURDER**

According to Professor Bodio (see p. 162), the number of criminals tried for murder in the years 1876-84 averaged as follows :—

|                          | Number Yearly | Per Million Population |
|--------------------------|---------------|------------------------|
| United Kingdom . . . . . | 450           | 12                     |
| France . . . . .         | 816           | 23                     |
| Germany . . . . .        | 602           | 14                     |
| Hungary . . . . .        | 1,682         | 107                    |
| Italy . . . . .          | 3,712         | 134                    |
| Spain . . . . .          | 1,807         | 105                    |

**MUSIC**

In 1890, at an auction in London, the following prices were obtained for copyrights of songs :—

| Song                          | Composer  | Price, £ |
|-------------------------------|-----------|----------|
| Wild Winds . . . . .          | Mattei    | 611      |
| In the Gloaming . . . . .     | Lady Hill | 286      |
| The Old Way . . . . .         | Roedel    | 253      |
| Jolly Smiths . . . . .        | Leslie    | 265      |
| Kathleen Mavourneen . . . . . | Crouch    | 400      |

The price of "Wild Winds" (Odi tu) is the highest on record.

**N.****NAMES**

The ratio in England per 1000 shows :—

|                      |                     |                      |                     |
|----------------------|---------------------|----------------------|---------------------|
| Mary . . . . . 68    | Thomas . . . . . 39 | James . . . . . 31   | Joseph . . . . . 18 |
| William . . . . . 66 | George . . . . . 36 | Charles . . . . . 23 | Jane . . . . . 17   |
| John . . . . . 62    | Sarah . . . . . 36  | Henry . . . . . 21   | Ellen . . . . . 16  |
| Eliza . . . . . 61   | Anne . . . . . 33   | Alice . . . . . 19   |                     |

**NATIONS**

|                           | Square Miles | Population    | Steam-Power | Millions £ Sterling |          |        |

| Total . . . . .           | 34,341,000   | 1,085,700,000 | 50,150,000  | 1,018               | 3,249    | ...    |

## NAVY

The following is a table of the principal navies:—

|                  | 1810  |        | 1840  |        | 1880  |       |
|------------------|-------|--------|-------|--------|-------|-------|
|                  | Ships | Guns   | Ships | Guns   | Ships | Guns  |
| G. Britain . . . | 450   | 24,800 | 392   | 16,310 | 373   | 1,460 |
| France . . .     | 212   | 6,000  | 146   | 7,600  | 348   | 1,450 |
| Germany . . .    | ...   | ...    | ...   | ...    | 101   | 519   |
| Russia . . .     | 346   | 4,450  | 83    | 5,460  | 391   | 942   |
| Austria . . .    | ...   | ...    | ...   | ...    | 106   | 295   |
| Italy . . .      | 36    | 200    | ...   | ...    | 140   | 318   |
| Spain . . .      | 301   | 8,000  | 57    | 1,200  | 135   | 492   |
| Holland . . .    | 76    | 1,600  | 30    | 1,640  | 147   | 560   |
| Turkey . . .     | 42    | 1,700  | 33    | 2,440  | 90    | 200   |
| U. States . . .  | 158   | 526    | 60    | 3,250  | 75    | 542   |
| Various . . .    | 60    | 1,300  | 57    | 2,779  | 385   | 1,605 |
| Total . . .      | 1,681 | 48,576 | 858   | 40,679 | 2,291 | 8,383 |

The average of guns to a vessel was 29 in 1810, rising to 46 in 1840, and declining to less than 4 in 1889. Modern naval warfare has been changed by the invention of armour-plated ships, the first of which were built for the Crimean war, 4-inch plates perfectly shot-proof, in 1853. The *Merrimacs* and *Monitors* of the United States in 1862 marked a great advance. Finally, the Italians used plates 36 inches thick for the *Lepanto*. The ironclad fleets of the world stand at present approximately as follows:—

| Vessels             | Tons | Max. Plating, Inches | Guns | Tonnage of Guns |
|---------------------|------|----------------------|------|-----------------|
| Great Britain . . . | 66   | 460,000              | 24   | 610             |
| France . . .        | 52   | 310,000              | 22   | 470             |
| Germany . . .       | 27   | 104,000              | 12   | 160             |
| Russia . . .        | 40   | 160,000              | 16   | 421             |
| Austria . . .       | 10   | 55,000               | 14   | 137             |
| Italy . . .         | 14   | 82,000               | 36   | 110             |
| Spain . . .         | 13   | 35,000               | 20   | 254             |
| Portugal . . .      | 1    | 2,000                | 8    | 3               |
| Sweden . . .        | 15   | 8,000                | 12   | 24              |
| Norway . . .        | 4    | 2,000                | ...  | 12              |
| Denmark . . .       | 8    | 25,000               | 12   | 107             |
| Holland . . .       | 24   | 45,000               | 8    | 72              |
| Greece . . .        | 4    | 7,000                | ...  | 24              |
| Turkey . . .        | 15   | 61,000               | 12   | 134             |
| United States . . . | 13   | 40,000               | 12   | 74              |
| Brazil . . .        | 12   | 15,000               | 12   | 60              |
| Argentina . . .     | 3    | 8,000                | 9    | 15              |
| Chili . . .         | 3    | 9,000                | 9    | 22              |
| China . . .         | 9    | 38,000               | 14   | 50              |
| Japan . . .         | 1    | 4,000                | 9    | 6               |
| Total . . .         | 334  | 1,470,000            | 36   | 2,765           |

The average cost of building ironclads has been, per ton: British £48, French £55, Italian £57, German £60. Including guns and equipment, an ordinary ironclad now costs £80 per ton. The largest war-vessels now are:—

| Name             | Flag                | Tons   | Horse-Power |
|------------------|---------------------|--------|-------------|
| Italia . . .     | Italian . . .       | 13,900 | 18,000      |
| Trafalgar . . .  | British . . .       | 12,000 | 12,000      |
| Formidable . . . | French . . .        | 11,400 | 8,300       |
| Catherine . . .  | Russian . . .       | 10,200 | 9,000       |
| Peiayo . . .     | Spanish . . .       | 10,000 | 8,000       |
| Wilhelm . . .    | German . . .        | 9,800  | 8,000       |
| Mesoudiyé . . .  | Turkish . . .       | 8,800  | 6,800       |
| Tegethoff . . .  | Austrian . . .      | 7,400  | 5,000       |
| Ting . . .       | Chinese . . .       | 7,300  | 6,000       |
| Maine . . .      | United States . . . | 6,600  | 8,600       |
| Heigloland . . . | Danish . . .        | 5,400  | 4,000       |
| Koenig . . .     | Holland . . .       | 5,400  | 4,500       |

The following comparison of navies was published in the *Daily News*, 1890:—

|                           | Great Britain | France | Germany | Russia | Italy |
|---------------------------|---------------|--------|---------|--------|-------|
| Sea-going ironclads . . . | 56            | 33     | 13      | 22     | 21    |
| Cruisers (16 knots) . . . | 28            | 17     | 7       | 2      | 3     |
| Coast ironclads . . .     | 6             | 21     | 12      | 13     | ...   |
| Gunboats . . .            | 95            | 45     | 12      | 36     | 15    |
| Various . . .             | 185           | 190    | 131     | 188    | 124   |
| Total . . .               | 370           | 306    | 175     | 261    | 163   |

The same paper says: "In ships we are well ahead of any competitor. It is in the matter of guns that our weakness lies. We have afloat or ready to go afloat 1065 modern heavy guns; France has 1447, Russia has 423, Italy has 180, and Germany has 508. When all our war-ships are armed, we shall have afloat of guns that can pierce 15 in. of armour and upwards 104, while France will have 124, Russia 38, Italy 40, and Germany 61."

The torpedo fleets of the various flags are as follows:—

|                     |     |                 |    |
|---------------------|-----|-----------------|----|
| Great Britain . . . | 165 | Austria . . .   | 42 |
| France . . .        | 175 | Holland . . .   | 31 |
| Germany . . .       | 135 | Brazil . . .    | 18 |
| Russia . . .        | 185 | Chili . . .     | 25 |
| Italy . . .         | 116 | Turkey . . .    | 52 |
| Spain . . .         | 26  | China . . .     | 31 |
| Sweden . . .        | 19  | Portugal . . .  | 6  |
| Denmark . . .       | 42  | Argentina . . . | 9  |

The number of seamen and annual cost of the navies are:—

|                     | Men     | Annual Expenditure, £ | Per Man, £ |
|---------------------|---------|-----------------------|------------|
| Great Britain . . . | 65,000  | 13,700,000            | 211        |
| France . . .        | 54,000  | 9,000,000             | 165        |
| Germany . . .       | 16,600  | 2,000,000             | 120        |
| Russia . . .        | 29,000  | 4,000,000             | 140        |
| Austria . . .       | 8,500   | 900,000               | 106        |
| Italy . . .         | 13,000  | 5,000,000             | 386        |
| Spain . . .         | 14,000  | 1,600,000             | 114        |
| Holland . . .       | 8,000   | 1,100,000             | 138        |
| Turkey . . .        | 39,500  | 800,000               | 20         |
| United States . . . | 10,000  | 3,000,000             | 300        |
| Total . . .         | 257,600 | 41,100,000            | 160        |

## GREAT BRITAIN

The statistics of the Royal Navy may be summed up as follows:—

| Year       | Vessels | Tons    | Guns   | Men     | Cost per Annum, £ |
|------------|---------|---------|--------|---------|-------------------|
| 1603 . . . | 42      | 17,000  | ...    | ...     | 180,000           |
| 1685 . . . | 179     | 104,000 | 6,930  | 10,000  | 390,000           |
| 1760 . . . | 325     | 321,000 | 10,600 | 51,000  | 5,611,000         |
| 1803 . . . | 450     | 461,000 | 24,800 | 180,000 | 12,037,000        |
| 1850 . . . | 585     | 570,000 | 17,200 | 48,000  | 6,438,000         |
| 1890 . . . | 373     | 680,000 | 1,460  | 65,000  | 13,700,000        |

When Philip II. sent the Armada in 1588 for the conquest of England it comprised:—

|              |       |                |        |
|--------------|-------|----------------|--------|
| Ships . . .  | 132   | Seamen . . .   | 10,854 |
| Cannon . . . | 3,165 | Soldiers . . . | 23,200 |

The British fleet under Lord Howard, supported by Drake and Hawkins, consisted of:—

|               | Royal Navy | Vessels Hired | Total  |
|---------------|------------|---------------|--------|
| Ships . . .   | 41         | 135           | 176    |
| Tonnage . . . | 16,000     | 18,500        | 34,500 |
| Seamen . . .  | 8,200      | 6,600         | 14,800 |

The Spaniards lost 35 ships and 13,600 men. During the wars with Bonaparte, according to Hawkin the British navy captured or destroyed the following:—

|                         |       |               |       |
|-------------------------|-------|---------------|-------|
| Ships of the line . . . | 207   | French . . .  | 683   |
| Frigates . . .          | 351   | Spanish . . . | 213   |
| Corvettes . . .         | 552   | Various . . . | 214   |
| Total . . .             | 1,110 | Total . . .   | 1,110 |

The above is exclusive of 1396 brigs and small vessels.

In 1888 the Channel Fleet consisted as follows:—

|                      | Tons    | Guns | Broadsides, Lbs. | Men    |
|----------------------|---------|------|------------------|--------|
| Inflexible . . .     | 11,880  | 4    | 3,400            | 460    |
| Northumberland . . . | 10,780  | 27   | 2,630            | 710    |
| Agincourt . . .      | 10,690  | 17   | 2,150            | 710    |
| Benbow . . .         | 10,600  | 12   | 2,300            | 500    |
| Rodney . . .         | 10,300  | 10   | 2,300            | 500    |
| 64 others . . .      | 185,750 | 354  | 32,720           | 12,120 |
| Total . . .          | 240,000 | 424  | 45,500           | 15,100 |

The Channel Fleet represents nearly one-third of the strength of the British navy.

The strength of the navy in 1889 was as follows:—

|                     | Number | In Commission |       |
|---------------------|--------|---------------|-------|
|                     |        | Number        | Guns  |
| Ironclads . . .     | 66     | 32            | 310   |
| Steamers . . .      | 292    | 172           | 790   |
| Sailing . . .       | 212    | 63            | 380   |
| Torpedo-boats . . . | 146    | 13            | ...   |
| Total . . .         | 716    | 280           | 1,480 |

The navy counts 65,000 seamen, including 14,000 marines and 5300 coastguards. In fifteen years ending 1880 the cost of vessels built was as follows:—

| Built by          | Tons    |         |         | Cost, £   |           |            |
|-------------------|---------|---------|---------|-----------|-----------|------------|
|                   | Iron    | Wooden  | Total   | Iron      | Wooden    | Total      |
| Government . . .  | 123,000 | 85,000  | 208,000 | 5,466,000 | 3,964,000 | 9,430,000  |
| Contractors . . . | 55,000  | 41,000  | 96,000  | 2,709,000 | 2,321,000 | 5,030,000  |
| Total . . .       | 178,000 | 126,000 | 304,000 | 8,175,000 | 6,285,000 | 14,460,000 |

The cost of construction per ton of displacement was less in Government yards, but less per ton of hull in contractors' yards, viz:—

|                            | Dockyard |    |    | Contractors' |    |    |
|----------------------------|----------|----|----|--------------|----|----|
|                            | £        | s. | d. | £            | s. | d. |
| Per ton displacement . . . | 45       | 7  | 0  | 52           | 8  | 0  |
| Per ton of hull . . .      | 43       | 8  | 0  | 41           | 12 | 0  |

The cost of French ironclads built in State dockyards has been 30 per cent. more than those built by contractors. Lord Brassey gives the cost of vessels built for the British and French fighting navies since 1864 thus:—

| Period         | England, £ | France, £  |
|----------------|------------|------------|
| 1864-70 . . .  | 9,900,000  | 5,700,000  |
| 1871-80 . . .  | 15,700,000 | 9,900,000  |
| 1881-90 . . .  | 24,200,000 | 16,100,000 |
| 27 years . . . | 49,800,000 | 31,700,000 |

The cost of the effective ships afloat has been as follows:—

|                     | Number | £          |
|---------------------|--------|------------|
| Ironclads . . .     | 66     | 24,000,000 |
| Torpedo-boats . . . | 146    | 1,500,000  |
| Steamers, &c. . .   | 161    | 11,100,000 |
| Total . . .         | 373    | 36,600,000 |

There are in construction 11 ironclads and 128 other vessels, to be completed before 1894, at a cost of 22 millions sterling. In 1889 there were 26 war-vessels launched, besides 23 new torpedo-boats, and the most remarkable were:—

| Name          | Tons  | Horse-Power | Cost, £ | Speed, Knots per Hour |
|---------------|-------|-------------|---------|-----------------------|
| Blake . . .   | 9,000 | 20,000      | 440,000 | 22                    |
| Vulcan . . .  | 6,600 | 12,000      | 300,000 | 20                    |
| Barham . . .  | 1,800 | 6,000       | 100,000 | 19                    |
| Blanche . . . | 1,600 | 3,000       | 100,000 | 16                    |

The *Blake* is 400 ft. long, 65 ft. beam, and carries two 24-ton guns and 10 smaller: the hull cost £213,000, the engines £134,000, the guns £25,000 (£310 per ton), and the fittings £68,000. Lord Armstrong, comparing the new ship *Victoria* with Nelson's ship *Victory*, says:—"Nelson's heaviest shot was 68 lbs., but the *Victoria* weighs 1800 lbs.; his broadside consumed 325 lbs. of powder, that of the *Victoria* 3000 lbs. He required one man to every 4 tons, but now we can do with one man for 17 tons." A first-class ironclad, built of steel, has this weight:—

|                 | Tons   |
|-----------------|--------|
| Hull . . .      | 3,400  |
| Plating . . .   | 2,800  |
| Machinery . . . | 1,400  |
| Guns, &c. . .   | 1,100  |
| Coal, &c. . .   | 1,370  |
| Total . . .     | 10,070 |

## FRANCE

The strength at various dates has been as follows:—

| Year       | Vessels | Guns   | Men    |
|------------|---------|--------|--------|
| 1780 . . . | 266     | 13,300 | 78,000 |
| 1810 . . . | 212     | 6,000  | 94,000 |
| 1840 . . . | 146     | 7,600  | 24,500 |
| 1868 . . . | 480     | 2,750  | 43,100 |
| 1889 . . . | 348     | 1,450  | 54,000 |

The expenditure has averaged yearly approximately thus:—

| Period        | £         |
|---------------|-----------|
| 1831-50 . . . | 3,400,000 |
| 1851-70 . . . | 5,700,000 |
| 1871-88 . . . | 9,400,000 |

In 1889 the navy comprised 52 ironclads and 296 smaller vessels, the total valued at £20,100,000, and

carrying 29,000 blue-jackets, 25,000 marines, and 1450 guns. Some of the heaviest vessels are:—

|                | Tons   | Armour,<br>Inches | Guns | Horse-<br>Power | Knots<br>per Hour |
|----------------|--------|-------------------|------|-----------------|-------------------|
| Formidable . . | 11,400 | 22                | 15   | 8,300           | 15                |
| Duperré . . .  | 10,500 | 22                | 19   | 8,000           | 15                |
| Bandin . . .   | 11,200 | 22                | 15   | 8,000           | 15                |
| Duquesne . .   | 5,700  | ...               | 21   | 8,000           | 17                |
| Courbet . . .  | 9,500  | 15                | 14   | 8,000           | 15                |

In 1882 the following comparative table of the French and British ironclad fleets was published:—

|               | Vessels | Tonnage of Guns | Per Ship |
|---------------|---------|-----------------|----------|
| British . . . | 51      | 7,030           | 138      |
| French . . .  | 59      | 5,960           | 101      |

In 1869 the largest vessel in the French navy was the *Magenta*, 1000 horse-power, being one-eighth of that of the present first-class ironclads.

#### GERMANY

In 1888 the fleet was composed thus:—

|                | Num-<br>ber | Guns | Tons    | Horse-<br>Power | Men    |
|----------------|-------------|------|---------|-----------------|--------|
| Ironclads . .  | 27          | 160  | 104,000 | 84,000          | 7,300  |
| Frigates . .   | 9           | 122  | 28,000  | 28,000          | 3,700  |
| Corvettes, &c. | 65          | 237  | 50,000  | 56,000          | 5,600  |
| Total . . .    | 101         | 519  | 182,000 | 168,000         | 16,600 |

The heaviest ships are the following:—

|               | Tons  | Horse-<br>Power | Guns | Armour,<br>Inches |
|---------------|-------|-----------------|------|-------------------|
| Wilhelm . . . | 9,800 | 8,000           | 29   | 12                |
| Kaiser . . .  | 7,700 | 8,000           | 15   | 10                |

The navy costs £2,000,000 per annum.

#### RUSSIA

The strength of the Russian navy at various dates was:—

| Year       | Ships | Guns  |
|------------|-------|-------|
| 1779 . . . | 56    | 3,400 |
| 1791 . . . | 94    | 5,200 |
| 1810 . . . | 346   | 4,450 |
| 1840 . . . | 83    | 5,460 |
| 1868 . . . | 292   | 3,690 |
| 1889 . . . | 391   | 942   |

The navy in 1889 was as follows:—

| Fleets          | Ironclads | Other Vessels | Total |
|-----------------|-----------|---------------|-------|
| Baltic . . .    | 26        | 209           | 235   |
| Black Sea . .   | 5         | 67            | 72    |
| Caspian . . .   | 9         | 14            | 23    |
| Siberian, &c. . | ...       | 61            | 61    |
| Total . . .     | 40        | 351           | 391   |

|               | Guns | Tons    | Horse-Power |
|---------------|------|---------|-------------|
| Ironclads . . | 421  | 160,000 | 17,000      |
| Steamers, &c. | 521  | 126,000 | 32,000      |
| Total . . .   | 942  | 286,000 | 49,000      |

The whole manned by 29,000 officers and men.

The heaviest ships are:—

| Name          | Tons   | Horse-<br>Power | Guns | Armour,<br>Inches | Knots<br>per Hour |
|---------------|--------|-----------------|------|-------------------|-------------------|
| Sinope . . .  | 10,200 | 9,000           | 13   | 16                | 16                |
| Catherine . . | 10,200 | 9,000           | 13   | 16                | 16                |

The navy costs £4,000,000 per annum.

#### HOLLAND

In 1888 the navy comprised 24 ironclads and 123 corvettes and smaller vessels, carrying 560 guns and 8000 men, the heaviest ship being the *King of Holland*, 5400 tons, 4500 horse-power, 8 guns, 8-inch armour, speed 12 knots. The navy costs £1,100,000 a year.

#### AUSTRIA

The actual strength is as follows:—

|                  | Num-<br>ber | Tons    | Horse-<br>Power | Guns | Men    |
|------------------|-------------|---------|-----------------|------|--------|
| Ironclads . .    | 10          | 55,000  | 11,000          | 137  | 4,000  |
| Corvettes, &c. . | 96          | 69,000  | 13,000          | 158  | 7,000  |
| Total . . .      | 106         | 124,000 | 24,000          | 295  | 11,000 |

The heaviest vessels are:—

|               | Tons  | Horse-<br>Power | Guns | Armour,<br>Inches | Knots<br>per Hour |
|---------------|-------|-----------------|------|-------------------|-------------------|
| Tegethoff . . | 7,400 | 5,000           | 6    | 14                | 14                |
| Custoza . . . | 7,000 | 4,500           | 8    | 9                 | 14                |

The navy costs £900,000 per annum, and is manned by 8500 men.

#### ITALY

The navy is composed as follows:—

|                  | Vessels | Guns | Tons    | Horse-<br>Power | Men    |
|------------------|---------|------|---------|-----------------|--------|
| Ironclads . .    | 14      | 110  | 82,000  | 64,000          | 6,000  |
| Corvettes, &c. . | 23      | 117  | 34,000  | 41,000          | 4,000  |
| Small vessels .  | 103     | 91   | 34,000  | 35,000          | 3,000  |
| Total . . .      | 140     | 318  | 150,000 | 140,000         | 13,000 |

The heaviest ships are:—

|              | Tons   | Horse-<br>Power | Guns | Armour,<br>Inches | Knots per<br>Hour |
|--------------|--------|-----------------|------|-------------------|-------------------|
| Italia . . . | 13,900 | 18,000          | 12   | 36                | 18                |
| Lepanto . .  | 13,600 | 18,000          | 12   | 36                | 18                |
| Humberto . . | 13,300 | 15,200          | 12   | 36                | 18                |

There are 17,000 officers and seamen, the navy costing £5,000,000 sterling per annum.

#### SPAIN

In 1889 the naval strength was as follows:—

|                 | Number | Guns | Horse-Power |
|-----------------|--------|------|-------------|
| Ironclads . .   | 13     | 254  | 19,000      |
| Other vessels . | 122    | 238  | 46,000      |
| Total . . .     | 135    | 492  | 65,000      |

The fleet is manned by 14,000 men. The largest ship is the *Pelayo*, 10,000 tons, 8000 horse-power, armour 20 inches, carrying 17 guns. The navy in 1708 was one of the greatest in Europe, manned by 16,400 seamen.

## PORTUGAL

The actual strength is as follows :—

|                | Number | Guns | Horse-Power |
|----------------|--------|------|-------------|
| Steam . . . .  | 38     | 139  | 20,000      |
| Sail . . . . . | 15     | 42   | ...         |
| Total . . . .  | 53     | 181  | 20,000      |

There are 3000 seamen. The only ironclad is the *Vasco da Gama*, 2400 tons, 3200 horse-power, 8-inch armour, speed 13 knots. The navy costs £250,000 a year.

## SWEDEN

The navy is composed thus :—

|                  | Number | Horse-Power | Guns |
|------------------|--------|-------------|------|
| Ironclads . . .  | 15     | 6,000       | 24   |
| Corvettes, &c. . | 53     | 22,000      | 127  |
| Total . . . .    | 68     | 28,000      | 151  |

The heaviest ship is the *Scor*, 12-inch armour, 2900 tons, 6 guns, and 3100 horse-power. The fleet has 4000 seamen, and costs £350,000 a year.

## NORWAY

The fleet counts as follows :—

|                  | Number | Horse-Power | Guns |
|------------------|--------|-------------|------|
| Ironclads . . .  | 4      | 1,800       | 12   |
| Corvettes, &c. . | 17     | 8,000       | 157  |
| Small boats . .  | 27     | 4,200       | 23   |
| Total . . . .    | 48     | 14,000      | 192  |

They are manned by 1100 men; naval reserve, 27,000. The cost of the navy is £110,000 a year.

## DENMARK

The navy before its destruction by Nelson consisted in 1805 of 35 vessels, carrying 2350 guns. In 1850 it counted 25 vessels with 940 guns. The present strength is :—

|                  | Number | Horse-Power | Guns |
|------------------|--------|-------------|------|
| Ironclads . . .  | 8      | 19,000      | 107  |
| Corvettes, &c. . | 31     | 18,000      | 122  |
| Total . . . .    | 39     | 37,000      | 229  |

The heaviest vessel is the *Heligoland*, 12-inch armour, 5400 tons, 4000 horse-power, 5 guns, speed 14 knots. The navy costs £600,000 a year.

## GREECE

The actual strength is :—

|                  | Number | Tons  | Guns |
|------------------|--------|-------|------|
| Ironclads . . .  | 4      | 7,000 | 24   |
| Brigs, &c. . . . | 31     | ...   | 176  |
| Total . . . .    | 35     | ...   | 200  |

The whole is manned by 2900 men. The heaviest ship is the *Olga*, 2000 tons, 6 guns, 10 knots. The navy costs £160,000 a year.

## TURKEY

The navy comprises 15 ironclads, 15 corvettes, 60 gunboats, &c., the whole carrying 200 guns, and supposed

to be manned by 30,000 blue-jackets, and 9500 marines. The Turkish navy has been repeatedly almost annihilated. At Lepanto in 1571, Ali Pacha's fleet counted 372 vessels, manned by 120,000 men; that of Don John of Austria, 208 vessels with 80,000 men. The Turks lost 175 captured and 129 sunk or burnt, only 68 escaping. Again, at Navarino in 1827, the English and French destroyed 30 Turkish war-vessels, and in 1853 the Russians at Sinope destroyed an Ottoman fleet of 11 vessels with 4000 men.

At present the heaviest ships are :—

|                | Tons  | Horse-Power | Guns | Armour, Inches | Knots per Hour |
|----------------|-------|-------------|------|----------------|----------------|
| Mesoudiyeh . . | 8,800 | 6,800       | 12   | 12             | 14             |
| Hamidieh . . . | 6,500 | 4,500       | 9    | 9              | 13             |

The navy costs £800,000 a year.

## BRAZIL

The fleet comprises 12 ironclads and 30 war-steamers, carrying 222 guns and 6000 men. The heaviest vessel is the *Jacaré*, 3500 tons, 2200 horse-power, 4 guns, 12-inch armour. The navy costs £1,100,000 a year.

## ARGENTINA

The actual strength is 3 ironclads and 16 gunboats, carrying 58 guns and 1500 men. The *Admiral Brown* is 4200 tons, 5400 horse-power, 8 guns, 9-inch armour. The navy costs £300,000 a year.

## CHILI

There are 3 ironclads and 18 smaller vessels, carrying 55 guns and 2000 men. The *Cochrane* is 3500 tons, 2900 horse-power, 9-inch armour, 3 guns, speed 12 knots. A steel ironclad of 6000 tons is in construction.

## UNITED STATES

The strength of the navy at various dates was :—

|                | Vessels | Guns  |
|----------------|---------|-------|
| 1812 . . . . . | 158     | 526   |
| 1815 . . . . . | 276     | 1,636 |
| 1840 . . . . . | 60      | 3,250 |
| 1865 . . . . . | 684     | 4,477 |
| 1888 . . . . . | 75      | 542   |

Americans are fairly entitled to claim the invention of ironclad war-vessels. In 1811 Robert Stevens of New Jersey, a youth of twenty-two years, proposed iron-plating for ships, and in 1842 made a contract with the Navy Department for ironclad floating batteries. Ericsson invented turret-ships in 1860 with plates 8-inch thick, carrying a pair of 15-inch guns.

The actual fleet comprises 13 ironclads, 37 corvettes, and 25 small vessels, manned by 8000 blue-jackets, and 2000 marines. The sums spent on the navy have averaged yearly thus :—

| Period            | £         |
|-------------------|-----------|
| 1801-40 . . . . . | 700,000   |
| 1841-50 . . . . . | 1,900,000 |
| 1851-70 . . . . . | 7,500,000 |
| 1871-80 . . . . . | 4,000,000 |
| 1881-88 . . . . . | 3,100,000 |

Congress has recently ordered the construction of 10 ironclads and 18 other vessels. The *Puritan*, *Maine*, and *Texas* will be each over 6000 tons, 8000 horse-power, 12-inch armour, speed 17 knots. The new corvette *Baltimore*, 10,000 horse-power, goes 20 knots.

## JAPAN.

The navy is as follows :—

|                  | Num-ber | Guns | Tons   | Horse-Power | Knots |
|------------------|---------|------|--------|-------------|-------|
| Ironclads . . .  | 1       | 6    | 3,700  | 3,500       | 13    |
| Corvettes, &c. . | 24      | 169  | 35,400 | 31,000      | ...   |
| Total . . .      | 25      | 175  | 39,100 | 34,500      | ...   |

The vessels are manned by 5000 blue-jackets, and at £800,000 a year.

## CHINA

In 1888 the navy comprised 9 ironclads and 121 small vessels. The heaviest vessels were the *Ting* and *Chen*, each 7300 tons, 6000 horse-power, 14-inch plating, with Krupp guns of 12-inch bore.

## NIGHT

The following table shows the longest and shortest nights, according to latitude :—

| Latitude | Longest |         | Shortest |         |
|----------|---------|---------|----------|---------|
|          | Hours   | Minutes | Hours    | Minutes |
| 5 . . .  | 12      | 17      | 11       | 43      |
| 15 . . . | 12      | 53      | 11       | 7       |
| 25 . . . | 13      | 34      | 10       | 26      |
| 35 . . . | 14      | 22      | 9        | 38      |
| 45 . . . | 15      | 26      | 8        | 34      |
| 50 . . . | 16      | 9       | 7        | 51      |
| 55 . . . | 17      | 7       | 6        | 53      |
| 60 . . . | 18      | 30      | 5        | 30      |
| 65 . . . | 21      | 10      | 2        | 50      |

At 66½ north or south the midnight sun is visible in summer. The above table is equally true of the length of days.

## NOBLES

In Austria-Hungary the number declines, viz. :—

|                 | 1840    | 1865    |
|-----------------|---------|---------|
| Austria . . . . | 140,000 | 87,000  |
| Hungary . . . . | 260,000 | 163,400 |
| Total . . . .   | 400,000 | 250,400 |

In Spain they are as follows :—

|                 | Grandeess | Only Titular | Total |
|-----------------|-----------|--------------|-------|
| Dukes . . . .   | 79        | 2            | 81    |
| Marquises . . . | 60        | 615          | 675   |
| Counts . . . .  | 60        | 480          | 540   |
| Barons . . . .  | 4         | 156          | 160   |
| Total . . . .   | 203       | 1,253        | 1,456 |

The British House of Lords comprises 4 princes, 23 dukes, 19 marquises, 139 earls, 32 viscounts, 26 bishops, and 272 barons; in all, 515 members.

The total nobility of the United Kingdom is as follows :—

|                | Dukes | Marquises | Earls | Viscounts | Barons | Total |
|----------------|-------|-----------|-------|-----------|--------|-------|
| England . . .  | 27    | 21        | 120   | 28        | 294    | 490   |
| Scotland . . . | 8     | 4         | 43    | 5         | 25     | 85    |
| Ireland . . .  | 2     | 11        | 64    | 36        | 64     | 177   |
| Total . . .    | 37    | 36        | 227   | 69        | 383    | 752   |

There are also 26 English bishops who rank as peers.

## O.

## OCCUPATION

The following table shows approximately the number of persons supported by the principal industries in the several countries :—

|                 | Agriculture | Manu-factures | Commerce, &c. | Total       |
|-----------------|-------------|---------------|---------------|-------------|
| England . . .   | 3,435,000   | 7,313,000     | 15,226,000    | 25,974,000  |
| Scotland . . .  | 523,000     | 1,155,000     | 2,058,000     | 3,736,000   |
| Ireland . . .   | 2,562,000   | 640,000       | 1,898,000     | 5,100,000   |
| U. Kingdom . .  | 6,520,000   | 9,108,000     | 19,182,000    | 34,810,000  |
| France . . .    | 18,249,000  | 8,194,000     | 10,035,000    | 36,478,000  |
| Germany . . .   | 18,841,000  | 16,058,000    | 10,323,000    | 45,222,000  |
| Russia . . .    | 56,815,000  | 10,520,000    | 8,965,000     | 76,300,000  |
| Austria . . .   | 16,710,000  | 5,499,000     | 12,252,000    | 34,461,000  |
| Italy . . .     | 9,169,000   | 4,494,000     | 12,007,000    | 25,670,000  |
| Spain . . .     | 8,170,000   | 3,490,000     | 5,040,000     | 16,700,000  |
| Portugal . . .  | 3,200,000   | 700,000       | 300,000       | 4,200,000   |
| Sweden . . .    | 2,130,000   | 850,000       | 1,520,000     | 4,500,000   |
| Norway . . .    | 903,000     | 300,000       | 598,000       | 1,807,000   |
| Denmark . . .   | 940,000     | 560,000       | 450,000       | 1,950,000   |
| Belgium . . .   | 1,200,000   | 1,910,000     | 2,300,000     | 5,500,000   |
| Holland . . .   | 2,600,000   | 900,000       | 800,000       | 4,300,000   |
| Switzerland . . | 1,140,000   | 970,000       | 730,000       | 2,840,000   |
| Greece . . .    | 940,000     | 260,000       | 440,000       | 1,640,000   |
| Europe . . .    | 147,527,000 | 63,819,000    | 85,032,000    | 296,378,000 |
| U. States . . . | 23,010,000  | 11,520,000    | 15,620,000    | 50,150,000  |
| Australia . . . | 1,200,000   | 950,000       | 1,450,000     | 3,600,000   |
| Total . . .     | 171,737,000 | 76,289,000    | 102,102,000   | 350,128,000 |

As the Census returns of different countries adopt no uniform classification, some including children and dependents, the tables cannot be followed unreservedly. The actual number of persons engaged in the various industries is approximately as follows :—

|                 | Agri-culture | Manu-factures | Commerce, &c. | Total       |
|-----------------|--------------|---------------|---------------|-------------|
| England . . .   | 1,341,000    | 4,161,000     | 6,210,000     | 11,712,000  |
| Scotland . . .  | 234,000      | 641,000       | 773,000       | 1,648,000   |
| Ireland . . .   | 986,000      | 387,000       | 1,002,000     | 2,375,000   |
| U. Kingdom . .  | 2,561,000    | 5,189,000     | 7,985,000     | 15,735,000  |
| France . . .    | 6,455,000    | 4,443,000     | 5,210,000     | 16,108,000  |
| Germany . . .   | 8,120,000    | 5,350,000     | 5,910,000     | 19,380,000  |
| Russia . . .    | 22,700,000   | 4,760,000     | 3,600,000     | 31,060,000  |
| Austria . . .   | 10,682,000   | 3,090,000     | 2,438,000     | 16,210,000  |
| Italy . . .     | 5,397,000    | 2,281,000     | 2,200,000     | 9,878,000   |
| Spain . . .     | 2,723,000    | 1,167,000     | 1,200,000     | 5,090,000   |
| Portugal . . .  | 873,000      | 300,000       | 100,000       | 1,273,000   |

| United States . . . . . | 153                    | 77          | 117           | 347   |
| Australia . . . . .     | 110                    | 88          | 154           | 352   |

The number of persons occupied is no test of industry or the reverse. In some countries women and children are engaged in manufacture, which swells the ratio of workers ; in others, the children are at school, the women prudently employed at home.

The number of persons occupied is no test of industry or the reverse. In some countries women and children are engaged in manufacture, which swells the ratio of workers; in others, the children are at school, the women prudently employed at home.

## UNITED KINGDOM

In his *Resources of Nations* (1835) M'Gregor gives the following:—

|                                  | England, Families | Great Britain, Families |           |           | Ireland, Adults |
|----------------------------------|-------------------|-------------------------|-----------|-----------|-----------------|
|                                  | 1811              | 1811                    | 1821      | 1831      | 1833            |
| Agriculture . . . . .            | 697,000           | 896,000                 | 979,000   | 961,000   | 1,138,000       |
| Trade, manufactures, &c. . . . . | 1,315,000         | 1,648,000               | 1,963,000 | 2,453,000 | 1,699,000       |
| Total . . . . .                  | 2,012,000         | 2,544,000               | 2,942,000 | 3,414,000 | 2,837,000       |

Booth's digest of the Census returns 1841-81 shows the principal occupations of the United Kingdom as follows:—

|                        | 1841       | 1851       | 1861       | 1871       | 1881       |
|------------------------|------------|------------|------------|------------|------------|
| Agriculture . . . . .  | 3,401,000  | 3,519,000  | 3,149,000  | 2,808,000  | 2,561,000  |
| Manufactures . . . . . | 3,137,000  | 3,922,000  | 4,164,000  | 4,377,000  | 4,535,000  |
| Commerce . . . . .     | 684,000    | 1,165,000  | 1,418,000  | 1,712,000  | 1,946,000  |
| Mines . . . . .        | 245,000    | 299,000    | 497,000    | 561,000    | 654,000    |
| Building . . . . .     | 485,000    | 588,000    | 687,000    | 817,000    | 964,000    |
| Professions . . . . .  | 223,000    | 320,000    | 363,000    | 422,000    | 524,000    |
| Domestics . . . . .    | 1,555,000  | 1,542,000  | 1,914,000  | 2,233,000  | 2,448,000  |
| Various . . . . .      | 1,632,000  | 1,406,000  | 1,368,000  | 1,754,000  | 2,103,000  |

It appears that the number of males employed in 1881 was greater than that of male adults in the population. Males are classified thus according to age :—

## OCCUPATION

423

## OCCUPATION

| Agriculture |           |           |           |           |
|-------------|-----------|-----------|-----------|-----------|
|             | 1851      | 1861      | 1871      | 1881      |

| Manufactures |           |           |           |           |
|--------------|-----------|-----------|-----------|-----------|
|              | 1851      | 1861      | 1871      | 1881      |
| Men . . .    | 2,083,000 | 2,249,000 | 2,417,000 | 2,614,000 |
| Women . .    | 1,660,000 | 1,737,000 | 1,794,000 | 1,795,000 |
| Boys . . .   | 179,000   | 178,000   | 166,000   | 126,000   |
| Total . .    | 3,922,000 | 4,164,000 | 4,377,000 | 4,535,000 |

| All Occupations |            |            |            |            |
|-----------------|------------|------------|------------|------------|
|                 | 1851       | 1861       | 1871       | 1881       |
| Men . . .       | 8,331,000  | 8,785,000  | 9,431,000  | 10,426,000 |
| Women . .       | 3,909,000  | 4,236,000  | 4,720,000  | 4,915,000  |
| Boys . . .      | 521,000    | 539,000    | 533,000    | 394,000    |
| Total . .       | 12,761,000 | 13,560,000 | 14,684,000 | 15,735,000 |

If we compare the total number of persons of all occupations in 1881 with that in 1851, we find an increase of 25 per cent. in the men and 57 per cent. in the women, but a decrease of 25 per cent. in boys, which latter is doubtless due to the Board Schools.

The number of persons supported or making a living out of the several occupations is shown by Booth as follows :—

## ENGLAND

## GERMANY

The Census of 1882 gave the following results :—

|                        | Agriculture | Manufactures | Commerce  | Sundry    | Total      |
|------------------------|-------------|--------------|-----------|-----------|------------|
| Prussia . . . . .      | 11,678,000  | 9,394,000    | 2,725,000 | 3,491,000 | 27,288,000 |
| Bavaria . . . . .      | 2,644,000   | 1,492,000    | 436,000   | 697,000   | 5,269,000  |
| Saxony . . . . .       | 579,000     | 1,696,000    | 361,000   | 379,000   | 3,015,000  |
| Wurtemberg . . . . .   | 927,000     | 674,000      | 143,000   | 213,000   | 1,957,000  |
| Baden . . . . .        | 752,000     | 492,000      | 141,000   | 174,000   | 1,559,000  |
| Small states . . . . . | 2,261,000   | 2,310,000    | 725,000   | 838,000   | 6,134,000  |
| Total . . . . .        | 18,841,000  | 16,058,000   | 4,531,000 | 5,792,000 | 45,222,000 |

The item of "Sundry" comprises 3,546,000 persons of various occupations, and 2,246,000 who have none.

The Prussian Census of 1867 was as follows :—

|                        | 1867       |            |            |            |            |
|------------------------|------------|------------|------------|------------|------------|
|                        | Principals | Dependents | Males      | Females    | Total      |
| Agriculture . . . . .  | 4,105,000  | 7,422,000  | 5,612,000  | 5,915,000  | 11,527,000 |
| Manufactures . . . . . | 1,990,000  | 3,448,000  | 2,965,000  | 2,473,000  | 5,438,000  |
| Mines . . . . .        | 202,000    | 426,000    | 344,000    | 284,000    | 628,000    |
| Commerce . . . . .     | 290,000    | 540,000    | 430,000    | 400,000    | 830,000    |
| Various . . . . .      | 2,539,000  | 3,009,000  | 2,519,000  | 3,029,000  | 5,548,000  |
| Total . . . . .        | 9,126,000  | 14,845,000 | 11,870,000 | 12,101,000 | 23,971,000 |

The occupations of the people of Saxony were in the following ratio :—

|                        | 1849  |         | 1871  |         | 1882  |
|------------------------|-------|---------|-------|---------|-------|
|                        | Males | Females | Males | Females | All   |
| Agriculture . . . . .  | 209   | 228     | 158   | 166     | 193   |
| Manufactures . . . . . | 486   | 443     | 532   | 506     | 563   |
| Commerce . . . . .     | 61    | 55      | 99    | 103     | 120   |
| Sundry . . . . .       | 244   | 274     | 211   | 225     | 124   |
| Total . . . . .        | 1,000 | 1,000   | 1,000 | 1,000   | 1,000 |

#### RUSSIA

The Census of 1872 gave approximately as follows for Russia and Poland :—

|                       | Males      | Females    | Total      | Ratio |
|-----------------------|------------|------------|------------|-------|
| Nobles . . . . .      | 437,300    | 436,800    | 874,100    | 12    |
| Merchants . . . . .   | 232,600    | 216,100    | 448,700    | 6     |
| Clergy . . . . .      | 281,500    | 315,000    | 596,500    | 8     |
| Artisans, &c. . . . . | 3,044,000  | 3,105,000  | 6,149,000  | 85    |
| Peasants . . . . .    | 31,941,600 | 32,223,000 | 64,164,700 | 889   |
| Total . . . . .       | 35,937,000 | 36,296,100 | 72,233,000 | 1,000 |

The following table of ratios was published in 1867 :—

|                       | Ratio  |        |
|-----------------------|--------|--------|
|                       | Russia | Poland |
| Clergy . . . . .      | 10     | 2      |
| Nobles . . . . .      | 13     | 14     |
| Soldiers . . . . .    | 57     | 13     |
| Citizens, &c. . . . . | 96     | 267    |
| Peasants . . . . .    | 824    | 704    |
| Total . . . . .       | 1,000  | 1,000  |

Lendheim gave the following table in 1873, apparently excluding Poland :—

|                                  | Ratio |
|----------------------------------|-------|
| Nobles . . . . .                 | 13    |
| Clergy . . . . .                 | 9     |
| Foreigners . . . . .             | 2     |
| Military . . . . .               | 53    |
| Merchants, artisans, &c. . . . . | 99    |
| Peasants . . . . .               | 824   |
| Total . . . . .                  | 1,000 |

#### AUSTRIA-HUNGARY

The Census of 1870 showed as follows :—

|                        | Austria    | Hungary   | Total      |
|------------------------|------------|-----------|------------|
| Agriculture . . . . .  | 5,520,000  | 5,010,000 | 10,530,000 |
| Manufactures . . . . . | 2,198,000  | 647,000   | 2,845,000  |
| Commerce . . . . .     | 303,000    | 105,000   | 408,000    |
| Transport . . . . .    | 139,000    | 29,000    | 168,000    |
| Mines . . . . .        | 104,000    | 50,000    | 154,000    |
| Capitalists . . . . .  | 435,000    | 81,000    | 516,000    |
| Servants, &c. . . . .  | 2,806,000  | 1,143,000 | 3,949,000  |
| Various . . . . .      | 465,000    | 264,000   | 729,000    |
| Total . . . . .        | 11,970,000 | 7,329,000 | 19,299,000 |

That of 1880 was as follows :—

|                         | Austria    | Hungary   | Total      |
|-------------------------|------------|-----------|------------|
| Agriculture . . . . .   | 6,161,000  | 4,521,000 | 10,682,000 |
| Manufactures . . . . .  | 2,157,000  | 789,000   | 2,946,000  |
| Commerce . . . . .      | 435,000    | 186,000   | 621,000    |
| Mines . . . . .         | 118,000    | 26,000    | 144,000    |
| Capitalists . . . . .   | 278,000    | 53,000    | 331,000    |
| Civil service . . . . . | 99,000     | 66,000    | 165,000    |
| Domestics . . . . .     | 890,000    | 430,000   | 1,320,000  |
| Various . . . . .       | 1,217,000  | 1,216,000 | 2,433,000  |
| Total . . . . .         | 11,355,000 | 7,287,000 | 18,642,000 |

|                        | Austria   |           | Hungary   |           | All Empire |           |
|------------------------|-----------|-----------|-----------|-----------|------------|-----------|
|                        | Males     | Females   | Males     | Females   | Males      | Females   |
| Agriculture . . . . .  | 3,432,000 | 2,729,000 | 3,548,000 | 973,000   | 6,980,000  | 3,702,000 |
| Manufactures . . . . . | 1,632,000 | 525,000   | 714,000   | 75,000    | 2,346,000  | 600,000   |
| Commerce . . . . .     | 351,000   | 84,000    | 166,000   | 20,000    | 517,000    | 104,000   |
| Servants . . . . .     | 245,000   | 645,000   | 46,000    | 384,000   | 291,000    | 1,029,000 |
| Various . . . . .      | 1,101,000 | 611,000   | 734,000   | 628,000   | 1,835,000  | 1,239,000 |
| Total . . . . .        | 6,761,000 | 4,594,000 | 5,208,000 | 2,080,000 | 11,969,000 | 6,674,000 |

In 1880 the population of Austria was classified thus :—

|                        | Principals | Family     | Servants  | Total      | Ratio |
|------------------------|------------|------------|-----------|------------|-------|
| Agriculture . . . . .  | 2,365,000  | 5,697,000  | 4,127,000 | 12,189,000 | 550   |
| Manufactures . . . . . | 576,000    | 2,399,000  | 1,735,000 | 4,710,000  | 212   |
| Commerce . . . . .     | 185,000    | 459,000    | 196,000   | 840,000    | 38    |
| Transport . . . . .    | 18,000     | 227,000    | 114,000   | 359,000    | 16    |
| Capitalists . . . . .  | 207,000    | 273,000    | 63,000    | 543,000    | 24    |
| Various . . . . .      | 518,000    | 1,691,000  | 1,294,000 | 3,503,000  | 160   |
| Total . . . . .        | 3,869,000  | 10,746,000 | 7,529,000 | 22,144,000 | 1,000 |

The population of Hungary is classified thus :—

|                        | Principals | Family, &c. | Total      | Ratio |
|------------------------|------------|-------------|------------|-------|
| Agriculture . . . . .  | 1,475,000  | 3,046,000   | 4,521,000  | 367   |
| Manufactures . . . . . | 381,000    | 408,000     | 789,000    | 64    |
| Commerce . . . . .     | 97,000     | 89,000      | 186,000    | 15    |
| Various . . . . .      | 264,000    | 6,557,000   | 6,821,000  | 554   |
| Total . . . . .        | 2,217,000  | 10,100,000  | 12,317,000 | 1,000 |

Besides the above, there were in Hungary 3,325,000 persons of no occupation.

Adding together the two foregoing tables, we find for the whole monarchy as follows :—

|                        | Principals | Family, &c. | Total      | Ratio |
|------------------------|------------|-------------|------------|-------|
| Agriculture . . . . .  | 3,840,000  | 12,870,000  | 16,710,000 | 484   |
| Manufactures . . . . . | 957,000    | 4,542,000   | 5,499,000  | 160   |
| Commerce . . . . .     | 282,000    | 744,000     | 1,026,000  | 30    |
| Various . . . . .      | 1,007,000  | 10,219,000  | 11,226,000 | 326   |
| Total . . . . .        | 6,086,000  | 28,375,000  | 34,461,000 | 1,000 |

## ITALY

The Census of 1861 gave the following classification :—

|                               |            |
|-------------------------------|------------|
| Agriculture . . . . .         | 8,290,000  |
| Manufactures . . . . .        | 3,230,000  |
| Sundry and children . . . . . | 10,250,000 |

Total population . . . . . 21,770,000

That of 1871 was as follows :—

|                               |            |
|-------------------------------|------------|
| Agriculture . . . . .         | 8,566,000  |
| Manufactures, &c. . . . .     | 5,817,000  |
| Sundry and children . . . . . | 12,423,000 |

Total population . . . . . 26,801,000

That of 1881 was as follows :—

|                                    | Men        | Women      | Children  | Total      |
|------------------------------------|------------|------------|-----------|------------|
| Agriculture . . . . .              | 5,397,000  | 3,094,000  | 678,000   | 9,169,000  |
| Manufactures . . . . .             | 2,281,000  | 1,904,000  | 309,000   | 4,494,000  |
| Commerce . . . . .                 | 247,000    | 33,000     | 5,000     | 285,000    |
| Transport . . . . .                | 310,000    | 3,000      | 9,000     | 322,000    |
| Mines . . . . .                    | 60,000     | ...        | 5,000     | 65,000     |
| Professions . . . . .              | 215,000    | 80,000     | ...       | 295,000    |
| Domestics . . . . .                | 266,000    | 448,000    | 47,000    | 761,000    |
| Various . . . . .                  | 1,102,000  | 675,000    | 42,000    | 1,819,000  |
| Useful occupations } . . . . .     | 9,878,000  | 6,237,000  | 1,095,000 | 17,210,000 |
| Indefinite } . . . . .             | 1,308,000  | 4,999,000  | 2,150,000 | 8,457,000  |
| Prisoners and vagrants } . . . . . | 73,000     | 56,000     | 5,000     | 134,000    |
| Total . . . . .                    | 11,259,000 | 11,292,000 | 3,250,000 | 25,801,000 |

The total population was 28,460,000, including 2,659,000 infants under 9 years, of whom the Census took no cognisance. Children in the above table are all over 9 and under 14 years.

## SPAIN

The Census of 1877 showed as follows :—

|                                  | Ratio         |
|----------------------------------|---------------|
| Agriculture . . . . .            | 2,723,000 475 |
| Manufactures . . . . .           | 1,167,000 203 |
| Commerce, &c. . . . .            | 213,000 37    |
| Vagrants, smugglers, &c. . . . . | 1,630,000 285 |

Total . . . . . 5,736,000 1,000

Women and children . . . . . 11,018,000

Total population . . . . . 16,754,000

## SWEDEN

The classification of the people down to 1855 was as follows :—

|                    | 1805      | 1830      | 1855      | Families in 1855 |
|--------------------|-----------|-----------|-----------|------------------|
| Nobles . . . . .   | 9,503     | 10,458    | 11,742    | 1,666            |
| Clergy . . . . .   | 15,145    | 14,153    | 15,362    | 2,232            |
| Citizens . . . . . | 65,411    | 66,693    | 81,408    | 13,366           |
| Peasants . . . . . | 1,759,000 | 2,169,000 | 2,378,000 | 394,610          |
| Various . . . . .  | 563,641   | 627,796   | 1,152,788 | 180,489          |
| Total . . . . .    | 2,412,700 | 2,888,100 | 3,639,300 | 592,303          |

The Census of 1870 showed as follows :—

|                        | Principals |          |         | Principals and Dependents, Ratio |         |       |
|------------------------|------------|----------|---------|----------------------------------|---------|-------|
|                        | Males      | Fe-males | Total   | Males                            | Females | Total |
| Agriculture . . . . .  | 414,000    | 33,000   | 447,000 | 270                              | 271     | 541   |
| Manufactures . . . . . | 62,000     | 6,000    | 68,000  | 52                               | 47      | 99    |
| Commerce . . . . .     | 22,000     | 2,000    | 24,000  | 17                               | 17      | 34    |
| Various . . . . .      | 190,000    | 214,000  | 404,000 | 145                              | 181     | 326   |
| Total . . . . .        | 688,000    | 255,000  | 943,000 | 484                              | 516     | 1,000 |

The Census of Sweden for 1880 gave the following results :—

|                            | Principals |         |           | Families |           |           |
|----------------------------|------------|---------|-----------|----------|-----------|-----------|
|                            | Males      | Females | Total     | Males    | Females   | Total     |
| Agriculture . . . . .      | 641,000    | 212,000 | 853,000   | 434,000  | 840,000   | 1,274,000 |
| Manufactures . . . . .     | 157,000    | 17,000  | 174,000   | 134,000  | 243,000   | 377,000   |
| Commerce . . . . .         | 68,000     | 5,000   | 73,000    | 41,000   | 81,000    | 122,000   |
| Various . . . . .          | 66,000     | 8,000   | 174,000   | ...      | ...       | ...       |
| Total . . . . .            | 932,000    | 242,000 | 1,174,000 | 664,000  | 1,265,000 | 1,929,000 |
| Unoccupied . . . . .       | 270,000    | 214,000 | 484,000   | 237,000  | 428,000   | 665,000   |
| Total population . . . . . | 1,202,000  | 456,000 | 1,658,000 | 901,000  | 1,693,000 | 2,594,000 |

|                        | Total Population |           |           | Ratio |         |       |
|------------------------|------------------|-----------|-----------|-------|---------|-------|
|                        | Males            | Females   | Total     | Males | Females | Total |
| Agriculture . . . . .  | 1,172,000        | 1,173,000 | 2,345,000 | 257   | 257     | 514   |
| Manufactures . . . . . | 297,000          | 280,000   | 577,000   | 64    | 62      | 126   |
| Commerce . . . . .     | 113,000          | 109,000   | 222,000   | 25    | 24      | 49    |
| Various . . . . .      | 125,000          | 128,000   | 253,000   | 27    | 27      | 54    |
| Unoccupied . . . . .   | 509,000          | 660,000   | 1,169,000 | 112   | 145     | 257   |
| Total . . . . .        | 2,216,000        | 2,350,000 | 4,566,000 | 485   | 515     | 1,000 |

## NORWAY

The Censuses of 1865 and 1875 gave these results :—

|                    | Principals, 1875 |         | Total Population, 1875 |         |           | Total Population, 1865 |
|--------------------|------------------|---------|------------------------|---------|-----------|------------------------|
|                    | Males            | Females | Males                  | Females | Total     |                        |
| Agriculture . . .  | 106,000          | 9,000   | 437,000                | 466,000 | 903,000   | 1,035,000              |
| Manufactures . . . | 39,000           | 26,000  | 155,000                | 151,000 | 306,000   | 343,000                |
| Commerce . . .     | 12,000           | 2,000   | 96,000                 | 99,000  | 195,000   | 149,000                |
| Various . . .      | 75,000           | 4,000   | 189,000                | 214,000 | 403,000   | 175,000                |
| Total . . .        | 232,000          | 41,000  | 877,000                | 930,000 | 1,807,000 | 1,702,000              |

There was a further classification in 1875 as follows :—

|                    | Principals | Families | Servants | Total     |
|--------------------|------------|----------|----------|-----------|
| Agriculture . . .  | 115,000    | 523,000  | 265,000  | 903,000   |
| Manufactures . . . | 65,000     | 91,000   | 150,000  | 306,000   |
| Commerce . . .     | 14,000     | 39,000   | 142,000  | 195,000   |
| Various . . .      | 79,000     | 86,000   | 238,000  | 403,000   |
| Total . . .        | 273,000    | 739,000  | 795,000  | 1,807,000 |

## DENMARK

The official tables give the occupations of the people thus :—

|                    | 1860  | 1880  | No. in 1880 |
|--------------------|-------|-------|-------------|
| Agriculture . . .  | 395   | 469   | 931,000     |
| Manufactures . . . | 228   | 229   | 590,000     |
| Commerce . . .     | 53    | 68    | 459,000     |
| Various . . .      | 324   | 234   |             |
| Total . . .        | 1,000 | 1,000 | 1,980,000   |

The numbers in 1880 include children, and are double the real numbers.

## FINLAND

The Census of 1865 showed the following ratios :—

|                    | Males | Females | Total Population |
|--------------------|-------|---------|------------------|
| Agriculture . . .  | 834   | 755     | 793              |
| Manufactures . . . | 55    | 43      | 49               |
| Commerce . . .     | 20    | 12      | 16               |
| Various . . .      | 91    | 190     | 142              |
| Total . . .        | 1,000 | 1,000   | 1,000            |

## BELGIUM

The Census of 1856 was as follows :—

|                    | Males     | Females   | Total     |
|--------------------|-----------|-----------|-----------|
| Agriculture . . .  | 709,000   | 353,000   | 1,062,000 |
| Manufactures . . . | 466,000   | 326,000   | 792,000   |
| Commerce . . .     | 80,000    | 49,000    | 129,000   |
| Transport . . .    | 26,000    | 1,000     | 27,000    |
| Domestics . . .    | 19,000    | 68,000    | 87,000    |
| Mines . . .        | 63,000    | 10,000    | 73,000    |
| Capitalists . . .  | 22,000    | 28,000    | 50,000    |
| Various . . .      | 88,000    | 19,000    | 107,000   |
| Total . . .        | 1,473,000 | 854,000   | 2,327,000 |
| Children, &c. . .  | 799,000   | 1,404,000 | 2,203,000 |
| Population . . .   | 2,272,000 | 2,258,000 | 4,530,000 |

That of 1880 for Belgium was as follows :—

|                    | Males     | Females   | Total     |
|--------------------|-----------|-----------|-----------|
| Mines . . .        | 226,000   | 18,000    | 244,000   |
| Manufactures . . . | 467,000   | 242,000   | 709,000   |
| Commerce . . .     | 143,000   | 101,000   | 244,000   |
| Agriculture . . .  | 530,000   | 452,000   | 982,000   |
| Various . . .      | 433,000   | 148,000   | 581,000   |
| Total . . .        | 1,799,000 | 961,000   | 2,760,000 |
| Children, &c. . .  | 1,010,000 | 1,825,000 | 2,835,000 |
| Population . . .   | 2,809,000 | 2,786,000 | 5,595,000 |

## GREECE

The principal occupations in 1861 were :—

|                    | Ratio   |
|--------------------|---------|
| Agriculture . . .  | 187,000 |
| Manufactures . . . | 52,000  |
| Commerce, &c. . .  | 91,000  |
| Total . . .        | 330,000 |

The above is exclusive of 1,003,000 women and children.

## SWITZERLAND

The Census of 1880 gave as follows :—

|                    | Ratio     |
|--------------------|-----------|
| Agriculture . . .  | 1,139,000 |
| Manufactures . . . | 971,000   |
| Commerce . . .     | 206,000   |
| Transport . . .    | 112,000   |
| Various . . .      | 418,000   |
| Total . . .        | 2,846,000 |

That of 1870 was as follows :—

|                    | Ratio     |
|--------------------|-----------|
| Agriculture . . .  | 543,000   |
| Manufactures . . . | 492,000   |
| Commerce . . .     | 49,000    |
| Various . . .      | 233,000   |
| Total . . .        | 1,317,000 |

The latter is apparently only of adults, that of 1880 of the whole population. In 1860 the number of hands employed in manufactures was 330,000.

## PORTUGAL

The Census of 1861 gave as follows :—

|                    | Ratio     |
|--------------------|-----------|
| Agriculture . . .  | 873,000   |
| Manufactures . . . | 210,000   |
| Commerce . . .     | 30,000    |
| Various . . .      | 20,000    |
| Total . . .        | 1,133,000 |

The above is exclusive of 2,650,000 women and children.

## UNITED STATES

The first Census as to occupation was taken in 1820, the second in 1840, since which latter date they have been decennial, viz. :—

| Year | Agriculture | Manufactures | Commerce, &c. | Total      |
|------|-------------|--------------|---------------|------------|
| 1820 | 2,071,000   | 350,000      | 72,000        | 2,493,000  |
| 1840 | 3,718,000   | 792,000      | 287,000       | 4,797,000  |
| 1850 | 2,401,000   | 958,000      | 2,013,000     | 5,372,000  |
| 1860 | 3,220,000   | 1,311,000    | 3,756,000     | 8,287,000  |
| 1870 | 5,923,000   | 2,054,000    | 4,529,000     | 12,506,000 |
| 1880 | 7,671,000   | 2,707,000    | 7,014,000     | 17,392,000 |

The returns for 1820 and 1840 include all ages and colours, but those for 1850 and 1860 are only for free male adults. Assuming that in these years 50 per cent. of negro adults were engaged in agriculture, and 50 per cent. in commerce, &c., the real number of workers would be :—

| Year | Agriculture | Manufactures | Commerce, &c. | Total      |
|------|-------------|--------------|---------------|------------|
| 1820 | 2,071,000   | 350,000      | 72,000        | 2,493,000  |
| 1840 | 3,718,000   | 792,000      | 287,000       | 4,797,000  |
| 1850 | 3,329,000   | 958,000      | 2,950,000     | 7,237,000  |
| 1860 | 4,342,000   | 1,311,000    | 4,878,000     | 10,531,000 |
| 1870 | 5,923,000   | 2,054,000    | 4,529,000     | 12,506,000 |
| 1880 | 7,671,000   | 2,707,000    | 7,014,000     | 17,392,000 |

Adopting the second table as more correct, and comparing the numbers of persons occupied with that of all inhabitants, male and female, between 16 and 60 years of age, we find as follows :—

|              | Workers    | Persons of Working Age | Ratio of Workers |
|--------------|------------|------------------------|------------------|
| 1820 . . . . | 2,493,000  | 4,816,000              | 51.7             |
| 1840 . . . . | 4,797,000  | 8,887,000              | 53.9             |
| 1850 . . . . | 7,237,000  | 12,596,000             | 57.4             |
| 1860 . . . . | 10,531,000 | 17,301,000             | 60.7             |
| 1870 . . . . | 12,506,000 | 21,561,000             | 58.2             |
| 1880 . . . . | 17,392,000 | 27,307,000             | 63.6             |

The Census for 1820 showed as follows :—

| States       | Agriculture | Manufactures | Commerce, &c. | Total     |
|--------------|-------------|--------------|---------------|-----------|
| New England  | 285,000     | 82,000       | 22,000        | 389,000   |
| Middle . . . | 523,000     | 160,000      | 23,000        | 706,000   |
| South . . .  | 1,064,000   | 83,000       | 22,000        | 1,169,000 |
| West . . .   | 199,000     | 25,000       | 5,000         | 229,000   |
| Total . . .  | 2,071,000   | 350,000      | 72,000        | 2,493,000 |

That of 1840 was as follows :—

| States       | Agriculture | Manufactures | Commerce, &c. | Total     |
|--------------|-------------|--------------|---------------|-----------|
| New England  | 415,000     | 187,000      | 74,000        | 676,000   |
| Middle . . . | 810,000     | 334,000      | 108,000       | 1,252,000 |
| South . . .  | 1,790,000   | 149,000      | 63,000        | 2,002,000 |
| West . . .   | 703,000     | 122,000      | 42,000        | 867,000   |
| Total . . .  | 3,718,000   | 792,000      | 287,000       | 4,797,000 |

| In 1870            | Americans | Irish   | Germans | British | Various | Total      |
|--------------------|-----------|---------|---------|---------|---------|------------|
| Agriculture . . .  | 5,303,000 | 138,000 | 225,000 | 95,000  | 162,000 | 5,923,000  |
| Manufactures . . . | 1,778,000 | 265,000 | 308,000 | 176,000 | 180,000 | 2,707,000  |
| Commerce, &c. . .  | 2,721,000 | 544,000 | 303,000 | 103,000 | 205,000 | 3,876,000  |
| Total . . .        | 9,802,000 | 947,000 | 836,000 | 374,000 | 547,000 | 12,506,000 |

The minor industries of 1840 were in detail thus :—

| States       | Commerce | Navigation | Professions | Mining | Total   |
|--------------|----------|------------|-------------|--------|---------|
| New England  | 18,000   | 44,000     | 11,000      | 1,000  | 74,000  |
| Middle . . . | 50,000   | 27,000     | 24,000      | 7,000  | 108,000 |
| South . . .  | 31,000   | 11,000     | 17,000      | 4,000  | 63,000  |
| West . . .   | 19,000   | 7,000      | 13,000      | 3,000  | 42,000  |
| Total . . .  | 118,000  | 89,000     | 65,000      | 15,000 | 287,000 |

The Census of 1850 excluded the slave population, as already observed, and showed as follows :—

| States       | Agriculture | Manufactures | Commerce, &c. | Total     |
|--------------|-------------|--------------|---------------|-----------|
| New England  | 269,000     | 313,000      | 230,000       | 812,000   |
| Middle . . . | 592,000     | 418,000      | 780,000       | 1,790,000 |
| South . . .  | 736,000     | 104,000      | 360,000       | 1,200,000 |
| West . . .   | 804,000     | 123,000      | 643,000       | 1,570,000 |
| Total . . .  | 2,401,000   | 958,000      | 2,013,000     | 5,372,000 |

The Census of 1860 also excluded the slave population, and showed thus :—

| States       | Occupied  | Persons of Working Age (16-60) |           |            | Ratio of Workers |
|--------------|-----------|--------------------------------|-----------|------------|------------------|
|              |           | Males                          | Females   | Total      |                  |
| New England  | 1,104,000 | 915,000                        | 968,000   | 1,883,000  | 58.7             |
| Middle . . . | 2,684,000 | 2,357,000                      | 2,406,000 | 4,763,000  | 56.4             |
| South . . .  | 1,645,000 | 2,548,000                      | 2,163,000 | 5,011,000  | 33.0             |
| West . . .   | 2,854,000 | 3,098,000                      | 2,554,000 | 5,652,000  | 50.5             |
| Total . . .  | 8,287,000 | 9,918,000                      | 8,391,000 | 17,309,000 | 47.8             |

| States       | Agriculture | Manufactures | Commerce, &c. | Total     |
|--------------|-------------|--------------|---------------|-----------|
| New England  | 293,000     | 390,000      | 421,000       | 1,104,000 |
| Middle . . . | 721,000     | 542,000      | 1,421,000     | 2,684,000 |
| South . . .  | 860,000     | 126,000      | 659,000       | 1,645,000 |
| West . . .   | 1,346,000   | 253,000      | 1,255,000     | 2,854,000 |
| Total . . .  | 3,220,000   | 1,311,000    | 3,756,000     | 8,287,000 |

That of 1870 included the entire population, and gave the following results :—

| States        | Agriculture | Manufactures | Commerce, &c. | Total      |
|---------------|-------------|--------------|---------------|------------|
| New England   | 316,000     | 555,000      | 428,000       | 1,299,000  |
| Middle . . .  | 793,000     | 1,012,000    | 1,302,000     | 3,107,000  |
| South . . .   | 2,669,000   | 283,000      | 792,000       | 3,744,000  |
| West . . .    | 2,145,000   | 857,000      | 1,354,000     | 4,356,000  |
| Total . . .   | 5,923,000   | 2,707,000    | 3,876,000     | 12,506,000 |
| Males . . .   | 5,526,000   | 2,353,000    | 2,790,000     | 10,670,000 |
| Females . . . | 397,000     | 354,000      | 1,086,000     | 1,836,000  |
| Total . . .   | 5,923,000   | 2,707,000    | 3,876,000     | 12,506,000 |

That of 1880 gave the following :—

| States       | Agriculture | Manufactures | Commerce, &c. | Total      |
|--------------|-------------|--------------|---------------|------------|
| New England  | 301,000     | 709,000      | 562,000       | 1,572,000  |
| Middle . . . | 847,000     | 1,425,000    | 1,912,000     | 4,184,000  |
| South . . .  | 3,626,000   | 392,000      | 1,236,000     | 5,254,000  |
| West . . .   | 2,897,000   | 1,311,000    | 2,174,000     | 6,382,000  |
| Total .      | 7,671,000   | 3,837,000    | 5,884,000     | 17,392,000 |

| States       | Males      | Females   | Total      | Ratio |         |       |
|--------------|------------|-----------|------------|-------|---------|-------|
|              |            |           |            | Males | Females | Total |
| New England  | 1,239,000  | 333,000   | 1,572,000  | 72    | 19      | 91    |
| Middle . . . | 3,453,000  | 731,000   | 4,184,000  | 108   | 42      | 240   |
| South . . .  | 4,253,000  | 1,001,000 | 5,254,000  | 245   | 57      | 302   |
| West . . .   | 5,800,000  | 582,000   | 6,382,000  | 333   | 34      | 367   |
| Total .      | 14,745,000 | 2,647,000 | 17,392,000 | 848   | 152     | 1,000 |

Some of the principal States showed as follows :—

|                     | Agriculture | Manufactures | Commerce, &c. | Total      | Ratio of Workers |
|---------------------|-------------|--------------|---------------|------------|------------------|
| New York . . .      | 377,000     | 630,000      | 878,000       | 1,885,000  | 10.9             |
| Pennsylvania . . .  | 301,000     | 528,000      | 627,000       | 1,456,000  | 8.4              |
| Illinois . . .      | 436,000     | 206,000      | 357,000       | 999,000    | 5.8              |
| Ohio . . .          | 397,000     | 242,000      | 355,000       | 994,000    | 5.8              |
| Massachusetts . . . | 65,000      | 370,000      | 286,000       | 721,000    | 4.1              |
| Missouri . . .      | 355,000     | 110,000      | 228,000       | 693,000    | 4.0              |
| Indiana . . .       | 331,000     | 110,000      | 194,000       | 635,000    | 3.6              |
| Georgia . . .       | 432,000     | 36,000       | 130,000       | 598,000    | 3.5              |
| Michigan . . .      | 220,000     | 131,000      | 198,000       | 549,000    | 3.3              |
| Iowa . . .          | 304,000     | 70,000       | 154,000       | 528,000    | 3.0              |
| Texas . . .         | 359,000     | 30,000       | 133,000       | 522,000    | 3.0              |
| Kentucky . . .      | 321,000     | 61,000       | 138,000       | 520,000    | 3.0              |
| Various . . .       | 3,753,000   | 1,313,000    | 2,206,000     | 7,272,000  | 41.6             |
| Total .             | 7,671,000   | 3,837,000    | 5,884,000     | 17,392,000 | 100.0            |

The classification of nationality (counting sons of foreigners as Americans) was in 1880 as follows :—

|                 |            | Ratio |
|-----------------|------------|-------|
| Americans . . . | 13,897,000 | 802   |
| Germans . . .   | 1,033,000  | 59    |
| Irish . . .     | 979,000    | 56    |
| British . . .   | 467,000    | 26    |
| Various . . .   | 1,016,000  | 57    |
| Total . . .     | 17,392,000 | 1,000 |

Age and sex are classified in the following manner :—

|                | Males    |            |         |            |
|----------------|----------|------------|---------|------------|
|                | Under 16 | 16 to 60   | Over 60 | Total      |
| Agriculture .  | 585,000  | 5,888,000  | 603,000 | 7,076,000  |
| Manufactures . | 87,000   | 2,978,000  | 140,000 | 3,205,000  |
| Commerce .     | 26,000   | 1,672,000  | 53,000  | 1,751,000  |
| Various . . .  | 128,000  | 2,447,000  | 138,000 | 2,713,000  |
| Total .        | 826,000  | 12,985,000 | 934,000 | 14,745,000 |

|                | Females |           |        |           |
|----------------|---------|-----------|--------|-----------|
| Agriculture .  | 136,000 | 436,000   | 23,000 | 595,000   |
| Manufactures . | 47,000  | 577,000   | 8,000  | 632,000   |
| Commerce .     | 3,000   | 54,000    | 2,000  | 59,000    |
| Various . .    | 108,000 | 1,215,000 | 38,000 | 1,361,000 |
| Total .        | 294,000 | 2,282,000 | 71,000 | 2,647,000 |

|                | Total     |            |           |            |
|----------------|-----------|------------|-----------|------------|
| Agriculture .  | 721,000   | 6,320,000  | 626,000   | 7,671,000  |
| Manufactures . | 134,000   | 3,555,000  | 148,000   | 3,837,000  |
| Commerce .     | 29,000    | 1,726,000  | 55,000    | 1,810,000  |
| Various . .    | 236,000   | 3,666,000  | 176,000   | 4,078,000  |
| Total .        | 1,120,000 | 15,267,000 | 1,005,000 | 17,392,000 |

Of the total number of workers 80 per cent. were men, 13 per cent. women, 5 per cent. boys, 2 per cent. girls.

The Census of 1881 showed as follows :—

#### AUSTRALIA

|                         | Agriculture | Commerce | Mining | Various | Children and Servants | Total     |
|-------------------------|-------------|----------|--------|---------|-----------------------|-----------|
| New South Wales . . .   | 113,000     | 28,000   | 18,000 | 165,000 | 427,000               | 751,000   |
| Victoria . . .          | 124,000     | 21,000   | 36,000 | 177,000 | 504,000               | 862,000   |
| Queensland . . .        | 33,000      | 6,000    | 11,000 | 42,000  | 122,000               | 214,000   |
| South Australia . . .   | 35,000      | 8,000    | 2,000  | 60,000  | 175,000               | 280,000   |
| New Zealand . . .       | 55,000      | 14,000   | 14,000 | 90,000  | 317,000               | 490,000   |
| Tasmania . . .          | 19,000      | 3,000    | 3,000  | 22,000  | 69,000                | 116,000   |
| Western Australia . . . | 5,000       | 1,000    | ...    | 6,000   | 18,000                | 30,000    |
| Total . . .             | 384,000     | 81,000   | 84,000 | 562,000 | 1,632,000             | 2,743,000 |

Under agriculture are included both tillage and pastoral pursuits. It is probable that the real number employed in such occupations in 1881 was larger than appears, say 50 per cent. more, as the numbers under "Servants" and "Various" are large. The ratios show :—

|                | N. S. Wales | Victoria | Queensland | South Australia | New Zealand | Tasmania | Western Australia |
|----------------|-------------|----------|------------|-----------------|-------------|----------|-------------------|
| Agriculture    | 15.0        | 14.4     | 15.6       | 12.4            | 11.1        | 16.8     | 16.0              |
| Mining . . .   | 2.4         | 4.2      | 5.4        | 0.8             | 2.9         | 2.7      | 0.3               |
| Servants . . . | 82.6        | 81.4     | 79.0       | 86.8            | 86.0        | 80.5     | 83.7              |
| Total .        | 100.0       | 100.0    | 100.0      | 100.0           | 100.0       | 100.0    | 100.0             |

#### OIL

There are three principal kinds of oil—vegetable, marine, and mineral. The annual product, in gallons, is approximately as follows: vegetable, 140 millions; marine, 6 millions; mineral, 1800 millions.

The yield of oil from vegetable products is as follows :—

*Pounds of Oil from 100 Lbs. of*

|                        |    |                       |    |
|------------------------|----|-----------------------|----|
| Horse-chestnuts . . .  | 6  | Rape . . .            | 33 |
| Beech-mast . . .       | 16 | Colza . . .           | 40 |
| Hempseed . . .         | 18 | Almonds . . .         | 48 |
| European linseed . . . | 25 | Poppy . . .           | 58 |
| Indian linseed . . .   | 29 | Walnuts . . .         | 60 |
| Olives . . .           | 33 | Castor-oil seed . . . | 62 |

The ordinary product of olive-oil is approximately as follows:—

|              | Tons Olives | Gallons Oil | Value, £   |
|--------------|-------------|-------------|------------|
| France . . . | 170,000     | 12,000,000  | 3,300,000  |
| Italy . . .  | 720,000     | 50,000,000  | 13,400,000 |
| Spain . . .  | 300,000     | 21,000,000  | 5,800,000  |
| Portugal . . | 90,000      | 6,000,000   | 1,700,000  |
| Greece . . . | 50,000      | 3,500,000   | 1,000,000  |

The production of colza in 1884 was as follows:—

|               | Acres   | Bushels   | Oil, Gallons |
|---------------|---------|-----------|--------------|
| France . . .  | 284,000 | 5,800,000 | 14,000,000   |
| Belgium . . . | 17,000  | 380,000   | 1,000,000    |
| Denmark . . . | 2,500   | 70,000    | 200,000      |

The imports into Great Britain of palm-oil and cocoa-nut-oil have been as follows:—

| Year       | Tons   |           |        |
|------------|--------|-----------|--------|
|            | Palm   | Cocoa-nut | Total  |
| 1840 . . . | 15,800 | 2,100     | 17,900 |
| 1850 . . . | 22,400 | 4,900     | 27,300 |
| 1860 . . . | 40,200 | 9,700     | 49,900 |
| 1870 . . . | 43,400 | 9,900     | 53,300 |
| 1880 . . . | 51,600 | 15,900    | 67,500 |
| 1889 . . . | 54,600 | 10,700    | 65,300 |

These figures are by Mr. Simmonds, author of *Science and Commerce*.

The annual production of marine oil is approximately as follows:—

|              | Annual Slaughter | Gallons Oil | Gallons per Carcass |
|--------------|------------------|-------------|---------------------|
| Whales . . . | 1,500            | 3,300,000   | 2,200               |
| Seals . . .  | 550,000          | 2,600,000   | 5                   |
| Penguins . . | 1,300,000        | 130,000     | 1-10th              |

About 300 gallons of oil will suffice in twenty minutes to smooth the roughest sea (Admiralty experiments, Aberdeen, December 3, 1882).

The production of mineral oil is shown as follows:—

#### UNITED STATES

Two men boring for salt, 25 miles from Pittsburg, in 1845, struck an oil spring, which gave 40 gallons in 24 hours. The first oil company was formed at New York in 1854. A well sunk at Oil Creek, Pennsylvania, in 1859, gave 1000 gallons daily, and in a week others were sunk 600 feet, which gave 3000 gallons each in 24 hours. An oil fever ensued, and in 1860 there were 2000 wells at Oil Creek, 74 of which gave collectively 50,000 gallons daily. Down to 1889 more than 53,000 wells had been dug, the depth varying from 400 to 1200 feet, each bore costing about £800. One well in five strikes oil, and the number now working is about 6000. The total product since their discovery in 1859 has been approximately:—

| Period   | Millions of Gallons |           |          | Price, Cents per Gallon |          | Value at Pit's Mouth, £ |
|----------|---------------------|-----------|----------|-------------------------|----------|-------------------------|
|          | Raised              | Ex-ported | Home Use | Pit's Mouth             | Re-fined |                         |
| 1859-63  | 240                 | 24        | 168      | 10                      | 44       | 5,000,000               |
| 1864-73  | 2,250               | 900       | 900      | 5                       | 22       | 23,500,000              |
| 1874-80  | 4,760               | 2,400     | 1,400    | 2½                      | 10       | 24,000,000              |
| 1881-88  | 8,630               | 3,740     | 3,160    | 2½                      | 9        | 27,300,000              |
| 30 years | 15,880              | 7,064     | 5,628    | ...                     | ...      | 89,800,000              |

The cost of boring wells, good and bad, was 42 millions sterling, or about 46 per cent. of the value of crude oil extracted. The market value of the refined petroleum exported or consumed in the United States was 330 millions sterling. The ordinary yield of refined oil is 80 gallons to 100 of crude petroleum.

#### RUSSIA

The Baku oil springs began to yield in 1863, and 363 wells have been sunk, of which 207 are working. The average depth is 550 feet, but some are only 190, others 1000 feet deep. At first the yield averaged 35 gallons of refined to 100 of crude oil, but it has since fallen to 28 gallons.

The production has been approximately as follows:—

|                | Millions of Gallons |         | Value at Pit, £ |
|----------------|---------------------|---------|-----------------|
|                | Crude               | Refined |                 |
| 1863-73 . . .  | 120                 | 42      | 2,500,000       |
| 1874-80 . . .  | 550                 | 165     | 5,500,000       |
| 1881-89 . . .  | 4,510               | 1,300   | 18,000,000      |
| 27 years . . . | 5,180               | 1,507   | 26,000,000      |

#### AUSTRIA

Ozokerit is a mineral oil from layers of wax found at Borislav, Galitzia. The mines are about 250 feet deep.

| Year       | Mines | Miners | Tons Raised | Value, £ |
|------------|-------|--------|-------------|----------|
| 1883 . . . | 1,292 | 3,800  | 4,500       | 210,000  |
| 1887 . . . | 560   | 4,800  | 5,000       | 210,000  |

#### GERMANY

The consumption of petroleum has increased very notably, viz. :—

| Year          | Tons per Annum | Year          | Tons per Annum |
|---------------|----------------|---------------|----------------|
| 1861-70 . . . | 70,000         | 1881-85 . . . | 300,000        |
| 1871-80 . . . | 195,000        | 1887 . . .    | 510,000        |

#### ORDERS

The principal religious Orders are the following:—

|                    | Founded |                          | Founded |
|--------------------|---------|--------------------------|---------|
|                    | A.D.    |                          | A.D.    |
| Benedictines . . . | 543     | Dominicans . . .         | 1215    |
| Carthusians . . .  | 1084    | Augustinians . . .       | 1256    |
| Carmelites . . .   | 1156    | Jesuits . . .            | 1534    |
| Franciscans . . .  | 1209    | Sisters of Charity . . . | 1734    |

*Chambers's Encyclopædia* (1891) has the following regarding the Jesuits: "In 1634 the Order comprised 13,112 members, distributed all over the world in 32 'provinces.' In 1773 it counted 22,589 members, who had 930 colleges and 610 residences or missionary stations."

The Jesuit Missions of Paraguay, in the territory now called Misiones, counted in 1732 an Indian population of 30,362 families, or 141,242 souls, possessing 788,000 cows, 225,000 sheep, and 111,400 horses. The annual tribute to the King of Spain was £3000 sterling. The value of exports, such as yerba-maté, hides and timber, averaged £25,000 yearly. For military service against the Portuguese, the Indians, whenever required, had to furnish the Viceroy with a force of 3000 men, 4000 horses, and 5000 draught oxen.

The Jesuit Order counted in 1882 the following members:—

|                                       |       |
|---------------------------------------|-------|
| Great Britain and United States . . . | 1,894 |
| Spain and South America . . .         | 1,933 |
| China, India, Africa, &c. . .         | 7,222 |

Total . . . 11,049

Respecting the other Orders the *Catholic Times* says: "During the last 600 years the Order of St. Francis has given to the Church 247 saints, 1500 martyrs, 10 popes, and 4000 archbishops and bishops; the Order of St. Dominic, 4 popes, 80 cardinals, and 2000 bishops; the Order of St. Benedict, 43 popes, 200 cardinals, 256 patriarchs, 600 archbishops, and 40,000 bishops, besides 25 emperors, kings, and queens who left their thrones for the cloisters of the celebrated Order."

## ENGLAND

At the Dissolution Henry VIII. confiscated 608 abbeys, with an aggregate income of £141,000, equal to the rent of 720,000 acres. The number of religious houses in the United Kingdom in 1873 was:—

|                     |     |
|---------------------|-----|
| For men . . . . .   | 86  |
| For women . . . . . | 286 |
| Total . . . . .     | 372 |

Of this total there were 256 in Ireland and 116 in Great Britain, mostly devoted to teaching the poor or caring the sick.

## FRANCE

The numbers of religious of both sexes were as follows:—

|                |        |                |         |
|----------------|--------|----------------|---------|
| 1815 . . . . . | 12,200 | 1861 . . . . . | 108,120 |
| 1842 . . . . . | 25,000 | 1871 . . . . . | 97,400  |

The composition of the houses in 1861 was:—

|                         | Men    | Women  | Total   |
|-------------------------|--------|--------|---------|
| Hospitals . . . . .     | 389    | 20,292 | 20,681  |
| Schools . . . . .       | 12,845 | 58,883 | 71,728  |
| Contemplative . . . . . | 4,542  | 11,169 | 15,711  |
| Total . . . . .         | 17,776 | 90,344 | 108,120 |

|                  | Houses | Endowed Capital, £ | Approximate Income, £ |
|------------------|--------|--------------------|-----------------------|
| Friars . . . . . | 2,026  | 100,000            | 5,000                 |
| Nuns . . . . .   | 12,004 | 4,100,000          | 205,000               |
| Total . . . . .  | 14,030 | 4,200,000          | 210,000               |

The estates of religious houses consist of £3,200,000 in house property and £1,000,000 in lands. The total number of religious in 1871 was 13,000 men and 84,300 women.

## RUSSIA

The religious houses of the Greek Church are:—

|                 | Houses | Religious | Aspirants |
|-----------------|--------|-----------|-----------|
| Men . . . . .   | 484    | 6,800     | 3,470     |
| Women . . . . . | 198    | 6,037     | 16,018    |
| Total . . . . . | 682    | 12,837    | 19,488    |

## AUSTRIA

In 1880 the Orders stood thus:—

|                 | Austria |           | Hungary |           |
|-----------------|---------|-----------|---------|-----------|
|                 | Houses  | Religious | Houses  | Religious |
| Men . . . . .   | 475     | 7,127     | 186     | 2,243     |
| Women . . . . . | 429     | 8,727     | 64      | 915       |
| Total . . . . . | 904     | 15,854    | 250     | 3,158     |

The above communities possessed houses and lands valued at £4,680,000. The abbeys and convents suppressed in 1790 by Joseph II. were 359 in number.

## ITALY

In 1867 the Government suppressed 4254 religious houses, containing 31,000 men and 28,250 women, whose endowed estates gave an annual income of £970,000, equal to £16 per religious. The estates were sold for £17,510,000, averaging £13 per acre. In ten years ending 1876, the Government paid to friars and nuns pensions which made up an aggregate of £6,840,000 sterling. In 1840 Rome counted 1560 priests, 2140 friars, and 1500 nuns, besides 440 ecclesiastical students. In 1830 the kingdom of Naples had 8500 friars and 8200 nuns.

## SPAIN

There are four military Orders:—

| Name                | Commanderies | Income, £ |
|---------------------|--------------|-----------|
| Calatrava . . . . . | 56           | 64,000    |
| Santiago . . . . .  | 87           | 73,000    |
| Alcantara . . . . . | 37           | 37,000    |
| Montesa . . . . .   | 193          | 196,000   |
| Total . . . . .     | 373          | 370,000   |

In 1803 there were 2923 religious houses, but in 1884, after numerous suppressions, the number had fallen to 1188, including 161 of friars, and 1027 of nuns. The numbers of religious at various dates compared thus:—

|                  | 1788   | 1803    | 1884   |
|------------------|--------|---------|--------|
| Friars . . . . . | 49,270 | 69,700  | 1,684  |
| Nuns . . . . .   | 22,230 | 38,400  | 14,592 |
| Total . . . . .  | 71,500 | 108,100 | 16,276 |

In 1820 the Government confiscated monastic properties to the value of £3,200,000.

## BELGIUM

In 1789 there were 631 houses with 12,000 religious. The numbers in later times have been:—

|                 | 1846   |           | 1866   |           |
|-----------------|--------|-----------|--------|-----------|
|                 | Houses | Religious | Houses | Religious |
| Men . . . . .   | 137    | 2,051     | 178    | 2,991     |
| Women . . . . . | 642    | 9,917     | 1,144  | 15,205    |
| Total . . . . . | 779    | 11,968    | 1,322  | 18,196    |

The houses in 1866 were composed thus:—

| Occupation          | Men   | Women  | Total  |
|---------------------|-------|--------|--------|
| Teaching . . . . .  | 975   | 7,249  | 8,224  |
| Hospitals . . . . . | 797   | 5,527  | 6,324  |
| Various . . . . .   | 1,219 | 2,429  | 3,648  |
| Total . . . . .     | 2,991 | 15,205 | 18,196 |

Houses and lands held by the above communities represented a total value of £940,000, including £640,000 of charitable bequests by 2615 benefactors since 1838.

According to the Census of 1880 there were:—

|                  | Houses | Religious |
|------------------|--------|-----------|
| Friars . . . . . | 213    | 4,027     |
| Nuns . . . . .   | 1,346  | 20,645    |
| Total . . . . .  | 1,559  | 24,672    |

## GERMANY

The Orders in 1873 stood thus:—

|                        | Houses | Religious |
|------------------------|--------|-----------|
| Prussia . . . . .      | 958    | 9,048     |
| Bavaria . . . . .      | 620    | 6,148     |
| Other states . . . . . | 450    | 4,238     |
| Total . . . . .        | 2,028  | 19,434    |

|                 | Prussia | Bavaria | Other States |
|-----------------|---------|---------|--------------|
| Men . . . . .   | 1,037   | 1,094   | 457          |
| Women . . . . . | 8,011   | 5,054   | 3,781        |
| Total . . . . . | 9,048   | 6,148   | 4,238        |

## HOLLAND

In 1862 the Orders stood thus:—

|                  | Houses | Religious |
|------------------|--------|-----------|
| Friars . . . . . | 38     | 820       |
| Nuns . . . . .   | 137    | 2,187     |
| Total . . . . .  | 175    | 3,007     |

## PORTUGAL

In 1834 the Government suppressed 750 religious houses, and seized the revenues.

## SWITZERLAND

In 1871 there were:—

|                 | Houses | Religious |
|-----------------|--------|-----------|
| Men . . . . .   | 33     | 546       |
| Women . . . . . | 55     | 2,020     |
| Total . . . . . | 88     | 2,566     |

These houses held real estate valued at £480,000, producing an income of about £10 a year for each religious. The Capuchins numbered 235, other friars 311. The most numerous Order of nuns was Theodosians, who were 417, the Sisters of St. Francis coming next.

## GREECE

There are 161 religious houses of the Greek Church, containing 2620 monks and 485 nuns.

## UNITED STATES

According to a Catholic paper there are in the United States 7000 nuns in charge of schools and orphans, 3000 Sisters of Charity tending the sick, and 3000 clergy of monastic Orders doing missionary work or in colleges.

## PALMS

The number of cocoa-nut palms given by Simmonds is:—

|                          |            |
|--------------------------|------------|
| New Caledonia . . . . .  | 45,000,000 |
| Ceylon . . . . .         | 30,000,000 |
| Madras . . . . .         | 11,000,000 |
| Feejee Islands . . . . . | 500,000    |

Brazil has probably 100 millions. The betel-nut palm is also cultivated in India; the area under this tree in Ceylon is 50,000 acres. As for the date-palm, Tunis has 2,500,000, Egypt 4,500,000, and India 13,000,000. Even in the oases of Sahara there are 16,000. See *Fruit*.

## ORGANS

|                                        | Benches of Keys | Stops | Pipes |
|----------------------------------------|-----------------|-------|-------|
| Hamburg . . . . .                      | 4               | 70    | ...   |
| Lübeck . . . . .                       | 4               | 82    | ...   |
| Cologne . . . . .                      | 4               | 104   | ...   |
| Ulm . . . . .                          | 4               | 100   | 6,594 |
| Meresburg . . . . .                    | 4               | 81    | 5,866 |
| Frankfort . . . . .                    | 3               | 75    | ...   |
| Prague . . . . .                       | 4               | 71    | ...   |
| Stuttgart . . . . .                    | 4               | 70    | ...   |
| Seville . . . . .                      | ...             | 110   | 5,300 |
| Rotterdam . . . . .                    | 4               | 75    | 5,700 |
| Haarlem . . . . .                      | ...             | 60    | 4,088 |
| San Sulpice, Paris . . . . .           | 5               | 100   | 6,700 |
| Albert Hall, London . . . . .          | 4               | 111   | ...   |
| Alexandra Palace . . . . .             | 4               | 88    | ...   |
| Town-Hall, Leeds . . . . .             | ...             | 100   | 6,500 |
| St. George's Hall, Liverpool . . . . . | 4               | 100   | ...   |
| Doncaster . . . . .                    | ...             | 94    | ...   |
| Glasgow . . . . .                      | 4               | 64    | ...   |
| Boston Music-Hall . . . . .            | 4               | 89    | ...   |
| Riga . . . . .                         | ...             | ...   | 7,000 |

That of Haarlem, built in 1735, cost £12,000; that of Liverpool, £10,000. The proposed new organ for St. Peter's at Rome is to have 124 stops, some 32 ft. long.

## OSTRICHES

The production of ostrich feathers averages as follows:—

|                        | Lbs. Feathers | Value, £  |
|------------------------|---------------|-----------|
| Cape Colony . . . . .  | 260,000       | 1,040,000 |
| Tripoli . . . . .      | 20,000        | 200,000   |
| Egypt . . . . .        | 4,000         | 40,000    |
| Morocco . . . . .      | 2,000         | 20,000    |
| Buenos Ayres . . . . . | 160,000       | 32,000    |

About 35,000 birds are plucked annually at the Cape, averaging 3 lbs. per bird. In Buenos Ayres they are slaughtered, and the race is dying out.

According to Simmonds, the Buenos Ayres "rears" is not really an ostrich at all, and the feathers are sold as "vulture feathers." He gives the exports of Cape feathers and the imports of ostrich feathers from all quarters into Great Britain thus:—

| Year           | Cape Export, Lbs. | Year           | Great Britain Import, Lbs. | Value, £  |
|----------------|-------------------|----------------|----------------------------|-----------|
| 1875 . . . . . | 50,000            | 1860 . . . . . | 25,000                     | 80,000    |
| 1880 . . . . . | 160,000           | 1870 . . . . . | 65,000                     | 175,000   |
| 1885 . . . . . | 250,000           | 1880 . . . . . | 190,000                    | 1,010,000 |
| 1889 . . . . . | 230,000           | 1889 . . . . . | 150,000                    | 400,000   |

## P.

## PAPER

The consumption in 1882 was estimated as follows:—

|                               | Tons      |
|-------------------------------|-----------|
| Printing . . . . .            | 455,000   |
| Schools and offices . . . . . | 160,000   |
| Account-books . . . . .       | 55,000    |
| Letter-paper . . . . .        | 100,000   |
| Wall-paper . . . . .          | 200,000   |
| Sundry manufactures . . . . . | 80,000    |
| Total . . . . .               | 1,050,000 |

In 1881 there were 3960 paper-mills, employing 90,000 men and 180,000 women: there were 2780 mills worked

by steam-power. The capital employed in the industry exceeded 62 millions sterling. The paper industry of the world sums up thus :—

|                                    |             |
|------------------------------------|-------------|
| Rag, jute, &c. . . . .             | £14,000,000 |
| Chemicals . . . . .                | 8,500,000   |
| Wages . . . . .                    | 9,000,000   |
| Coal . . . . .                     | 3,400,000   |
| Profit, interest on capital, &c. . | 3,600,000   |

Value of paper . . . . . £38,500,000

In 1882 the production and consumption in the several countries was stated as follows (the consumption in 1890 being probably one-fourth more) :—

|                           | Millions Lbs. |             | Consumption, Lbs. per Inhab. |
|---------------------------|---------------|-------------|------------------------------|
|                           | Production    | Consumption |                              |
| United Kingdom            | 470           | 430         | 12.1                         |
| France*                   | 380           | 330         | 8.4                          |
| Germany . . . . .         | 450           | 410         | 9.1                          |
| Russia . . . . .          | 80            | 90          | 1.2                          |
| Austria . . . . .         | 160           | 120         | 3.3                          |
| Italy . . . . .           | 105           | 110         | 3.9                          |
| Spain . . . . .           | 20            | 32          | 2.0                          |
| Portugal . . . . .        | 10            | 10          | 2.2                          |
| Belgium . . . . .         | 70            | 40          | 7.2                          |
| Holland . . . . .         | 16            | 16          | 4.0                          |
| Scandinavia . . . . .     | 38            | 30          | 3.5                          |
| Switzerland . . . . .     | 20            | 18          | 6.8                          |
| Turkey and Greece         | ...           | 12          | 1.2                          |
| Europe . . . . .          | 1,819         | 1,648       | 5.1                          |
| United States . . . . .   | 530           | 540         | 10.2                         |
| Canada . . . . .          | 14            | 18          | 4.1                          |
| Spanish America . . . . . | 2             | 44          | 1.3                          |
| Australia . . . . .       | ...           | 17          | 6.1                          |
| Other countries . . . . . | ...           | 98          | ...                          |
| Total . . . . .           | 2,365         | 2,365       | ...                          |

The above total was equivalent to 1,050,000 tons, which were supposed to be produced from the following materials :—

| Material                   | Tons Used | Tons, Paper | Ratio of Paper to Material, per Cent. |
|----------------------------|-----------|-------------|---------------------------------------|
| Woolen rags . . . . .      | 670,000   | 390,000     | 59                                    |
| Cotton rag . . . . .       | 450,000   | 280,000     | 62                                    |
| Linen, &c., rags . . . . . | 100,000   | 50,000      | 50                                    |
| Jute and sparta . . . . .  | 300,000   | 50,000      | 17                                    |
| Wood and straw . . . . .   | 400,000   | 40,000      | 10                                    |
| Sundries . . . . .         | 2,400,000 | 240,000     | 10                                    |
| Total . . . . .            | 4,320,000 | 1,050,000   | 25                                    |

In 1813 Stevenson estimated the value of paper made yearly in Great Britain at one million sterling; in 1835, McCulloch at £1,300,000. The consumption has risen twelvefold since 1840, viz. :—

| Year           | Tons   |          |         |
|----------------|--------|----------|---------|
|                | Press  | Sundries | Total   |
| 1840 . . . . . | 3,000  | 13,000   | 16,000  |
| 1864 . . . . . | 31,000 | 52,000   | 83,000  |
| 1885 . . . . . | 95,000 | 100,000  | 195,000 |

\* The quantity of paper which paid excise in France in 1885 was only 217,000 tons.

In 1880-85 the paper-mills in various countries were :—

|                         | Number | Hands  | Steam, Horse-Power | Water, Horse-Power | Product, Tons |
|-------------------------|--------|--------|--------------------|--------------------|---------------|
| Great Britain . . . . . | 354    | 28,000 | 27,000             | 8,000              | 200,000       |
| France . . . . .        | 512    | 31,000 | 7,000              | 13,000             | 170,000       |
| Germany . . . . .       | 446    | 54,000 | 24,000             | 30,000             | 200,000       |

The consumption of paper for books is relatively small, only 6 per cent. of the total; the annual issue being supposed to reach 85 million volumes, which take 65,000 tons of paper, an average of 14 oz. per volume.

The first paper-mill in America was at Germantown, Pennsylvania, in 1693. There were 63 in 1787, which turned out 250 tons yearly. In 1870 one factory in Massachusetts produced 25,000 tons of writing-paper yearly, and another 100 miles a day of wall-paper.

## PARIS

In 1887 this city had 82,500 houses and 2,261,000 population, including 180,000 foreigners. The streets had a length of exactly 600 miles. Total area, 18,700 acres, of which 14,500 are covered by houses, the rest being streets and squares. In the parish of the Temple there are 290 persons per acre, in that of Passy only 42; general average 116. There are 440 miles of sewers, the construction of which cost 4 millions sterling; they vary from 5 ft. to 18 ft. diameter. Water-supply averages 90 million gallons daily, there being 66,000 subscribers who pay water-rate. Gas-supply in 1888 reached 8800 million cubic feet, of which 900 millions were used for streets and public buildings. Vital statistics showed 57,000 deaths and 60,000 births, 28 per cent. of the latter being illegitimate. The hospitals admitted 131,000 patients, of whom 13,900 died, say 10½ per cent. There are 6000 police, 500 steamboats, 8000 cabs, and 1200 busses or tramcars. Food consumption was 350,000 tons of bread, 175,000 tons of meat, 24,000 tons of poultry, 5500 tons of cheese, 400 million eggs, and 104 million gallons of wine and liquors.

## PARKS

The area of park to the principal cities of the United Kingdom is shown in the following table :—

| Cities                  | Area, Acres | Park, Acres | Inhabitants to an Acre |           |
|-------------------------|-------------|-------------|------------------------|-----------|
|                         |             |             | Municipal Area         | Park Area |
| Birmingham . . . . .    | 8,400       | 211         | 46                     | 1,736     |
| Bradford . . . . .      | 7,200       | 215         | 26                     | 889       |
| Brighton . . . . .      | 2,400       | 106         | 45                     | 996       |
| Bristol . . . . .       | 4,500       | 442         | 47                     | 475       |
| Dublin . . . . .        | 10,100      | 1,753       | 31                     | 175       |
| Edinburgh . . . . .     | 4,200       | 407         | 54                     | 410       |
| Glasgow . . . . .       | 6,100       | 447         | 96                     | 1,293     |
| Hull . . . . .          | 3,600       | 26          | 40                     | 4,721     |

### PARLIAMENT

That of the United Kingdom made 27,010 laws in eighty-two years, as follows :—

| Period             | Acts of Parliament |         |        |
|--------------------|--------------------|---------|--------|
|                    | Public             | Private | Total  |
| 1801-10 . . . . .  | 1,322              | 2,514   | 3,836  |
| 1811-20 . . . . .  | 1,487              | 2,233   | 3,720  |
| 1821-30 . . . . .  | 986                | 1,979   | 2,965  |
| 1831-40 . . . . .  | 1,038              | 1,706   | 2,744  |
| 1841-50 . . . . .  | 1,129              | 2,140   | 3,269  |
| 1851-60 . . . . .  | 1,158              | 2,057   | 3,215  |
| 1861-68 . . . . .  | 1,010              | 2,140   | 3,150  |
| 1869-82 . . . . .  | 1,283              | 2,828   | 4,111  |
| 82 years . . . . . | 9,413              | 17,597  | 27,010 |

The following Ministers have held power since 1801 :—

| Period            | Premier              | Months |
|-------------------|----------------------|--------|
| 1801-4 . . . . .  | Addington . . . . .  | 38     |
| 1804-6 . . . . .  | Pitt . . . . .       | 20     |
| 1806-7 . . . . .  | Grenville . . . . .  | 14     |
| 1807-10 . . . . . | Portland . . . . .   | 39     |
| 1810-12 . . . . . | Perceval . . . . .   | 24     |
| 1812-27 . . . . . | Liverpool . . . . .  | 178    |
| 1827 . . . . .    | Canning . . . . .    | 4      |
| 1827-28 . . . . . | Goderich . . . . .   | 5      |
| 1828-30 . . . . . | Wellington . . . . . | 34     |
| 1830-34 . . . . . | Grey . . . . .       | 44     |
| 1834 . . . . .    | Melbourne . . . . .  | 5      |
| 1834-35 . . . . . | Peel . . . . .       | 4      |
| 1835-41 . . . . . | Melbourne . . . . .  | 77     |
| 1841-46 . . . . . | Peel . . . . .       | 58     |
| 1846-52 . . . . . | Russell . . . . .    | 68     |
| 1852 . . . . .    | Derby . . . . .      | 10     |
| 1852-55 . . . . . | Aberdeen . . . . .   | 25     |
| 1855-58 . . . . . | Palmerston . . . . . | 37     |
| 1858-59 . . . . . | Derby . . . . .      | 16     |
| 1859-65 . . . . . | Palmerston . . . . . | 76     |
| 1865-66 . . . . . | Russell . . . . .    | 8      |
| 1866-68 . . . . . | Derby . . . . .      | 20     |
| 1868 . . . . .    | Disraeli . . . . .   | 9      |
| 1868-74 . . . . . | Gladstone . . . . .  | 62     |
| 1874-80 . . . . . | Disraeli . . . . .   | 74     |
| 1880-85 . . . . . | Gladstone . . . . .  | 62     |
| 1885-86 . . . . . | Salisbury . . . . .  | 7      |
| 1886 . . . . .    | Gladstone . . . . .  | 6      |
| 1886 . . . . .    | Salisbury . . . . .  | ...    |

Parliament consists of 515 Lords and 670 Commons. The composition of the latter House was greatly changed in 1885 under the new Reform Act, viz. :—

|                    | County |      | Borough |      | University |      | Total |      |
|--------------------|--------|------|---------|------|------------|------|-------|------|
|                    | 1884   | 1885 | 1884    | 1885 | 1884       | 1885 | 1884  | 1885 |
| England . . . . .  | 172    | 234  | 282     | 226  | 5          | 5    | 459   | 465  |
| Wales . . . . .    | 15     | 19   | 15      | 11   | ...        | ...  | 30    | 30   |
| Scotland . . . . . | 32     | 39   | 26      | 31   | 2          | 2    | 60    | 72   |
| Ireland . . . . .  | 64     | 85   | 37      | 16   | 2          | 2    | 103   | 103  |
| United Kingdom     | 283    | 377  | 360     | 284  | 9          | 9    | 652   | 670  |

The French Chamber contained 97 noblemen, 116 lawyers, 57 manufacturers, 92 farmers, 48 doctors, 40 journalists, 14 engineers, 23 soldiers, 12 bankers, and 123 of various occupations in 1888.

### PASSENGERS

In 1885 it was computed that 80,000 vehicles and 400,000 foot-passengers crossed the bridges of London daily.

The number of persons who crossed Waterloo Bridge in a year was as follows :—

|                |           |                |           |
|----------------|-----------|----------------|-----------|
| 1820 . . . . . | 1,821,000 | 1850 . . . . . | 4,295,000 |
| 1830 . . . . . | 2,423,000 | 1860 . . . . . | 4,873,000 |
| 1840 . . . . . | 2,486,000 | 1863 . . . . . | 5,145,000 |

At present the number will probably reach 8,000,000. In 1875 there were 7,300,000 vehicles and 38,500,000 persons that crossed London Bridge. In 1882 the ferryboats between Liverpool and Birkenhead carried 22,000,000 passengers. London has 12,000 cabs, Paris 8000; the former carry 90,000, the latter 60,000 passengers daily, the average fare earned being 15d. per passenger in Paris, 18d. in London. The daily earnings of a cab in London are 19s. in the season, 9s. the rest, and 12s. all the year round.

The London Omnibus Company carried as follows :—

|                       | 1888       | 1889       |
|-----------------------|------------|------------|
| Passengers . . . . .  | 61,200,000 | 69,300,000 |
| Receipts, £ . . . . . | 400,000    | 430,000    |
| Expenses . . . . .    | 375,000    | 395,000    |

The local passenger traffic of London has grown as follows :—

|                       | Millions of Passengers Yearly |      |      |
|-----------------------|-------------------------------|------|------|
|                       | 1864                          | 1874 | 1884 |
| Underground . . . . . | 42                            | 65   | 115  |
| Omnibus . . . . .     | 11                            | 48   | 75   |
| Tramway . . . . .     | ...                           | 42   | 119  |
| Total . . . . .       | 53                            | 155  | 309  |

The Underground Railway now carries 150 million persons yearly.

As regards Paris, the traffic shows thus :—

| Year           | Passengers  | Year           | Passengers  |
|----------------|-------------|----------------|-------------|
| 1860 . . . . . | 72,000,000  | 1880 . . . . . | 234,000,000 |
| 1870 . . . . . | 108,000,000 | 1888 . . . . . | 279,000,000 |

The traffic of 1880 and of 1888 was computed thus :—

|                               | 1880        | 1888        |
|-------------------------------|-------------|-------------|
| Tramcars and busses . . . . . | 209,000,000 | 241,000,000 |
| Steamboats, &c. . . . .       | 25,000,000  | 38,000,000  |
| Total . . . . .               | 234,000,000 | 279,000,000 |

The above does not include about 22,000,000 persons carried in cabs in 1888. The average fare paid in 1880 was about three halfpence (1.6). The passenger traffic between the various ports of the United Kingdom is not ascertained, but it is found that between domestic and foreign traffic 10,000 persons leave the ports of the United Kingdom daily. The number of pilgrims yearly to Mecca is not known, but 35,000 pass through Suez.

### PATENTS

The number applied for, and that of those granted, in the United Kingdom were as follows :—

| Period             | Applications | Granted |
|--------------------|--------------|---------|
| 1860-69 . . . . .  | 34,870       | 21,910  |
| 1870-79 . . . . .  | 44,950       | 30,360  |
| 1880-87 . . . . .  | 91,940       | 53,040  |
| 28 years . . . . . | 171,760      | 105,310 |

## FRANCE

The number granted in various years was as follows :—

| Year           | Patents | Year           | Patents |
|----------------|---------|----------------|---------|
| 1844 . . . . . | 625     | 1870 . . . . . | 3,029   |
| 1850 . . . . . | 1,687   | 1880 . . . . . | 6,057   |
| 1860 . . . . . | 4,606   | 1885 . . . . . | 7,060   |

## AUSTRIA

The total number granted in the Empire was :—

| Period            | Patents |
|-------------------|---------|
| 1852-69 . . . . . | 10,480  |
| 1870-84 . . . . . | 24,090  |

33 years . . . . . 34,570

## BELGIUM

The returns for forty-eight years showed as follows :—

| Period             | Inventions | Improvements | Total  |
|--------------------|------------|--------------|--------|
| 1841-60 . . . . .  | 5,879      | 10,651       | 16,530 |
| 1861-70 . . . . .  | 7,572      | 10,355       | 17,927 |
| 1871-88 . . . . .  | 30,600     | 25,680       | 56,280 |
| 48 years . . . . . | 44,051     | 46,686       | 90,737 |

## UNITED STATES

The records show as follows :—

| Year           | Applications | Granted | Fees, £ |
|----------------|--------------|---------|---------|
| 1840 . . . . . | 735          | 473     | 8,000   |
| 1850 . . . . . | 2,193        | 993     | 18,000  |
| 1860 . . . . . | 7,653        | 4,778   | 53,000  |
| 1870 . . . . . | 19,171       | 13,333  | 120,000 |
| 1880 . . . . . | 23,021       | 13,917  | 156,000 |
| 1889 . . . . . | 40,575       | 24,158  | 266,000 |

## UNITED KINGDOM

Official returns show as follows :—

| Year           | England   | Scotland | Ireland | U. Kingdom | Ratio to Population |          |         |            |
|----------------|-----------|----------|---------|------------|---------------------|----------|---------|------------|
|                |           |          |         |            | England             | Scotland | Ireland | U. Kingdom |
| 1850 . . . . . | 921,000   | 79,000   | 308,000 | 1,308,000  | 5.11                | 2.72     | 4.61    | 4.75       |
| 1860 . . . . . | 851,000   | 77,000   | 45,000  | 973,000    | 4.26                | 2.50     | 0.77    | 3.35       |
| 1870 . . . . . | 1,079,000 | 126,000  | 74,000  | 1,279,000  | 4.69                | 3.78     | 1.38    | 4.06       |
| 1880 . . . . . | 803,000   | 99,000   | 115,000 | 1,016,000  | 3.09                | 2.66     | 2.21    | 2.90       |
| 1889 . . . . . | 810,000   | 96,000   | 109,000 | 1,015,000  | 2.80                | 2.40     | 2.30    | 2.65       |

| Expenditure :—           | 1860      | 1870      | 1880       | 1888       |
|--------------------------|-----------|-----------|------------|------------|
|                          | £         | £         | £          | £          |
| England . . . . .        | 5,400,000 | 7,650,000 | 8,020,000  | 8,440,000  |
| Scotland . . . . .       | 580,000   | 910,000   | 850,000    | 890,000    |
| Ireland . . . . .        | 1,830,000 | 810,000   | 1,190,000  | 1,390,000  |
| United Kingdom . . . . . | 7,810,000 | 9,370,000 | 10,060,000 | 10,720,000 |

The average outlay yearly on each pauper, and the cost per inhabitant, as regards the three kingdoms, are shown as follows :—

| Year           | Outlay per Pauper, £ |          |         | Cost per Inhabitant, Pence |          |         |
|----------------|----------------------|----------|---------|----------------------------|----------|---------|
|                | England              | Scotland | Ireland | England                    | Scotland | Ireland |
| 1850 . . . . . | 5.9                  | 7.3      | 6.0     | 72                         | 48       | 65      |
| 1860 . . . . . | 6.4                  | 8.6      | 11.6    | 66                         | 52       | 22      |
| 1870 . . . . . | 7.1                  | 7.4      | 11.0    | 50                         | 66       | 36      |
| 1880 . . . . . | 10.0                 | 8.5      | 10.4    | 74                         | 55       | 54      |
| 1889 . . . . . | 10.4                 | 9.3      | 12.7    | 72                         | 54       | 70      |

## PAUPERS

It is difficult to compare the numbers in different countries. England, for example, counts the number receiving relief on 1st January; France the total of persons succoured during the year, the latter being a repetition of persons who needed relief. The following may be taken as an estimate of pauperism in 1888 :—

|                    | Paupers | Per 100 Population | Annual Outlay, £ |
|--------------------|---------|--------------------|------------------|
| England . . . . .  | 810,000 | 2.8                | 8,400,000        |
| Scotland . . . . . | 96,000  | 2.4                | 900,000          |
| Ireland . . . . .  | 109,000 | 2.3                | 1,400,000        |
| France . . . . .   | 290,000 | 0.8                | 1,500,000        |
| Germany . . . . .  | 320,000 | 0.7                | 4,600,000        |
| Russia . . . . .   | 350,000 | 0.4                | ...              |
| Austria . . . . .  | 290,000 | 0.7                | 400,000          |
| Italy . . . . .    | 270,000 | 0.9                | 1,900,000        |
| Holland . . . . .  | 88,000  | 2.0                | 510,000          |

In 1884 the number of paupers relieved at various capitals was as follows :—

|                          | Paupers | Outlay, £ | Per Head, £ |
|--------------------------|---------|-----------|-------------|
| Paris . . . . .          | 490,000 | 800,000   | 1.6         |
| St. Petersburg . . . . . | 215,000 | 140,000   | 0.7         |
| Berlin . . . . .         | 310,000 | 370,000   | 1.2         |
| Vienna . . . . .         | 286,600 | 530,000   | 1.8         |

For some years back the average number of paupers receiving relief in London has been 102,000, at an outlay of more than a million sterling per annum.

The amount spent annually on poor-relief in England and Wales has been at various dates as follows :—

| Period            | Annual Expenditure, £ | Per Inhabitant, Pence | National Income, Millions £ | Percentage of Burden |
|-------------------|-----------------------|-----------------------|-----------------------------|----------------------|
| 1702-14 . . . . . | 910,000               | 41                    | 65                          | 1.40                 |
| 1760-75 . . . . . | 1,520,000             | 58                    | 122                         | 1.24                 |
| 1783-93 . . . . . | 2,050,000             | 66                    | 145                         | 1.41                 |
| 1801-5 . . . . .  | 5,100,000             | 78                    | 180                         | 2.80                 |
| 1815-20 . . . . . | 7,106,000             | 152                   | 220                         | 3.23                 |
| 1830-35 . . . . . | 6,742,000             | 114                   | 385                         | 1.75                 |
| 1841-50 . . . . . | 5,250,000             | 74                    | 490                         | 1.07                 |
| 1851-60 . . . . . | 5,510,000             | 69                    | 580                         | 0.95                 |
| 1861-70 . . . . . | 6,740,000             | 77                    | 720                         | 0.94                 |
| 1871-80 . . . . . | 7,710,000             | 75                    | 935                         | 0.82                 |
| 1884-88 . . . . . | 8,400,000             | 73                    | 1,084                       | 0.78                 |

In the period just after Waterloo the burden was five times as great as it has been in the past five years.

In 1886 the condition of the poor in the east part of London was found by school-agents to be thus :—

| Class            | Number  | Weekly Wages,<br>Shillings |
|------------------|---------|----------------------------|
| Indigent . . .   | 314,000 | 10 to 21                   |
| Struggling . . . | 498,000 | 22 to 50                   |
| Well to do. . .  | 80,000  | ...                        |
| Total . . .      | 892,000 |                            |

The above is the estimated population of the poorer parishes of London.

## FRANCE

In 1886 the number of persons who received relief during the year was 1,440,000, but as the same persons probably were relieved at least five times, the actual number of such paupers would not exceed 290,000. There was much distress in 1847, when 6,000,000 were relieved—that is to say, about 1,200,000 in reality; the sum so expended reaching 8 millions sterling, of which £4,600,000 passed through public officials and £3,400,000 was given by St. Vincent de Paul societies and other charitable associations. In 1884 the sum officially expended was as follows :—

| In                | £         | In             | £         |
|-------------------|-----------|----------------|-----------|
| Paris . . .       | 800,000   | Food . . .     | 520,000   |
| Departments . . . | 660,000   | Money, &c. . . | 940,000   |
| Total . . .       | 1,460,000 | Total . . .    | 1,460,000 |

There are 15,000 offices all over France for poor-relief, the funds being mainly derived from a tax of 10 per cent. on tickets for theatres, and averaging £2,100,000 per annum.

## GERMANY

In 1885 the sum of £4,560,000 was expended in poor-relief, viz. :—

|                  | Paupers   | Outlay, £ | Per Head, £ |
|------------------|-----------|-----------|-------------|
| Prussia . . .    | 953,000   | 2,670,000 | 2.8         |
| Bavaria . . .    | 152,000   | 550,000   | 3.5         |
| Saxony . . .     | 89,000    | 270,000   | 3.1         |
| Alsace . . .     | 73,000    | 220,000   | 3.0         |
| Baden . . .      | 68,000    | 170,000   | 2.5         |
| Wurtemberg . . . | 63,000    | 180,000   | 2.8         |
| Various . . .    | 194,000   | 500,000   | 2.6         |
| Total . . .      | 1,592,000 | 4,560,000 | 2.9         |

The number of paupers relieved in cities per 1000 of the population was as follows :—

|                  |     |                 |    |
|------------------|-----|-----------------|----|
| Strasburg . . .  | 102 | Berlin . . .    | 61 |
| Königsberg . . . | 84  | Leipzig . . .   | 59 |
| Bremen . . .     | 76  | Dresden . . .   | 56 |
| Frankfort . . .  | 70  | Stuttgart . . . | 51 |

## RUSSIA

In 1884 the number of registered mendicants was 350,000; that of persons relieved in St. Petersburg 215,000, at an average of 14s. each.

## AUSTRIA

The system of poor-relief resembles that in France, for which purpose there are 10,650 offices. In 1886 were relieved 290,000 paupers at a cost of £400,000, say 27s. each.

## ITALY

According to the *Statesman's Year-Book*, there are 21,800 offices for poor-relief, endowed with funds representing a capital value of 80 millions sterling, with an annual income of £3,500,000; expenses of management, &c., £1,600,000; balance for the poor, £1,900,000. In

1881 there were 1,365,000 persons relieved; the same remark applies as in France, and the actual number of paupers may be set down at about 270,000.

## BELGIUM

The number of paupers receiving indoor relief is small, viz. :—

| Year       | Paupers | Outlay, £ | Per Head, £ |
|------------|---------|-----------|-------------|
| 1835 . . . | 2,260   | 11,000    | 4.9         |
| 1850 . . . | 3,478   | 21,000    | 6.0         |
| 1870 . . . | 1,925   | 20,000    | 10.4        |
| 1880 . . . | 4,399   | 48,000    | 10.8        |

The above is the mean number in each year, the number of paupers passing through the dépôts being four times as great.

## HOLLAND

The number of persons relieved in the year 1881 was :—

|                         |         |
|-------------------------|---------|
| Permanent paupers . . . | 88,300  |
| Temporary " . . .       | 128,300 |

Total . . . 216,600

The total expenditure was £510,000, or about £2.8 per pauper, religious communities provided £270,000, and the civil authorities £240,000.

## SWEDEN

The number of paupers compared with population thus :—

| Year       | Paupers | Per 100 Pop. |
|------------|---------|--------------|
| 1860 . . . | 133,000 | 3.5          |
| 1870 . . . | 204,000 | 4.8          |
| 1880 . . . | 220,000 | 5.0          |
| 1887 . . . | 230,000 | 4.8          |

There are 2300 workhouses, capable of admitting 40,000 persons.

## PAWN-OFFICES

The number of these offices increases in Great Britain faster than population, viz. :—

| Year       | No.   | Per Million Inhab. | Year       | No.   | Per Million Inhab. |
|------------|-------|--------------------|------------|-------|--------------------|
| 1851 . . . | 1,873 | 89                 | 1871 . . . | 3,450 | 132                |
| 1861 . . . | 2,578 | 111                | 1881 . . . | 4,372 | 146                |

The number of pledges is said to reach 190 millions per annum.

In 1882 the loans of similar institutions, called *Monts de Piété*, were :—

|               | Borrowers | Amount     |
|---------------|-----------|------------|
| France . . .  | 2,970,000 | £2,300,000 |
| Spain . . .   | 235,000   | 985,000    |
| Holland . . . | 602,000   | 260,000    |

The French returns for 1885 showed thus :—

|                 |           |
|-----------------|-----------|
| Under 8s. . .   | 2,187,000 |
| 8s. to 40s. . . | 715,000   |
| £2 to £4 . . .  | 136,000   |
| Over £4 . . .   | 71,000    |

Total . . . 3,109,000

## PEPPER

The annual production averages :—

|                  | Tons   |
|------------------|--------|
| Sumatra . . .    | 13,000 |
| Siam . . .       | 3,500  |
| Malacca, &c. . . | 6,500  |

Total . . . 23,000

## PICTURES

Raphael's "Holy Family," from the Blenheim Gallery, was sold to the National Gallery for £70,000. Millet's "Angelus" was sold at Paris for £24,000 in 1889, Millet having painted it for £72 sterling.

## PINS

In 1888 the production was as follows:—

|                               | Millions Weekly |
|-------------------------------|-----------------|
| England . . . . .             | 280             |
| France . . . . .              | 120             |
| Holland and Germany . . . . . | 120             |
| Total . . . . .               | 520             |

Birmingham stands for 180 millions of those made in England. In 1850 the annual output in England was 1250 tons, valued at £1,100,000.

## PLACARDS

The largest use on record was prior to the Paris election of 27th January 1889. General Boulanger had 15,000 billstickers, who put up 45,000 daily, in all 900,000, at a cost of £8000 sterling. Jacques had 10,000 men, who put up 25,000 daily, in all 500,000, at a cost of £5000. In some places, when they were torn down after the election, there were found sixty layers alternating of the rival placards.

## POLICE

In 1881 the maintenance of police in various cities cost as follows:—

| £                    | Per Inhab. Pence | £                    | Per Inhab. Pence |
|----------------------|------------------|----------------------|------------------|
| London . . 1,060,000 | 68               | Genoa . . 15,000     | 21               |
| Paris . . 1,160,000  | 122              | Florence . . 14,000  | 20               |
| Vienna . . 390,000   | 99               | Turin . . 13,000     | 18               |
| Berlin . . 70,000    | 16               | Antwerp . . 13,000   | 19               |
| S. Francisco 48,000  | 52               | Trieste . . 12,000   | 27               |
| Buda-Pesth 38,000    | 27               | Christiania . 11,000 | 36               |
| Rome . . 30,000      | 24               | Frankfort . 7,000    | 14               |
| Leipsic . 24,000     | 49               | Liege . . 6,000      | 12               |
| Bucharest . 22,000   | 26               | Venice . . 6,000     | 12               |
| Stockholm . 21,000   | 33               | Palermo . . 6,000    | 6                |
| Copenhagen 20,000    | 24               | Stuttgart . 14,000   | 28               |

The following comparison between the police of London and Paris was published in 1881:—

|                     | London | Paris   | Per 10,000 Inhab. |       |
|---------------------|--------|---------|-------------------|-------|
|                     |        |         | London            | Paris |
| Number of men . . . | 10,940 | 8,250   | 29                | 39    |
| Arrests made . . .  | 79,490 | 231,140 | 210               | 1,065 |

The growth of the great European Powers in the last 400 years is shown as follows:—

|                   | 1480       | 1580       | 1680       | 1780        | 1880        |
|-------------------|------------|------------|------------|-------------|-------------|
| England . . . . . | 3,700,000  | 4,600,000  | 5,532,000  | 9,561,000   | 35,004,000  |
| France . . . . .  | 12,600,000 | 14,300,000 | 18,800,000 | 25,100,000  | 37,400,000  |
| Prussia . . . . . | 800,000    | 1,000,000  | 1,400,000  | 5,460,000   | 45,260,000  |
| Russia . . . . .  | 2,100,000  | 4,300,000  | 12,600,000 | 26,800,000  | 84,440,000  |
| Austria . . . . . | 9,500,000  | 16,500,000 | 14,000,000 | 20,200,000  | 37,830,000  |
| Italy . . . . .   | 9,200,000  | 10,400,000 | 11,500,000 | 12,800,000  | 28,910,000  |
| Spain . . . . .   | 8,800,000  | 8,150,000  | 9,200,000  | 9,960,000   | 16,290,000  |
| Total . . . . .   | 46,700,000 | 59,250,000 | 73,032,000 | 109,881,000 | 285,134,000 |

In the above, England at present stands for the United Kingdom, and Prussia for the German Empire.

The population of the world has been estimated as follows:—

| Date | Author     | Millions | Date | Author      | Millions |
|------|------------|----------|------|-------------|----------|
| 1804 | Malte-Brun | 640      | 1874 | Behm-Wagner | 1,391    |
| 1828 | Balbi      | 847      | 1878 | Levasseur   | 1,439    |
| 1845 | Michelot   | 1,009    | 1883 | Behm-Wagner | 1,433    |

The London police cost £97 a year, the Paris £140, per man. The London man arrests seven persons; the Paris, twenty-nine persons, per annum. For each offender (including drunkenness and misdemeanours), the police expenditure is £13 in London, and £5 in Paris. The number of London police in 1888 was 13,900.

In the United Kingdom the number of police was as follows:—

|                          | Number |        | Per 10,000 Pop. |      |
|--------------------------|--------|--------|-----------------|------|
|                          | 1878   | 1888   | 1878            | 1888 |
| England . . . . .        | 30,700 | 37,300 | 12              | 13   |
| Scotland . . . . .       | 3,400  | 4,000  | 10              | 10   |
| Ireland . . . . .        | 12,300 | 13,900 | 24              | 29   |
| United Kingdom . . . . . | 46,400 | 55,200 | 14              | 15   |

The expenditure in 1887 was as follows:—

|                          | Amount, £ | Per Policeman, £ | Pence per Inhabitant |
|--------------------------|-----------|------------------|----------------------|
| England . . . . .        | 3,700,000 | 98               | 31                   |
| Scotland . . . . .       | 380,000   | 92               | 23                   |
| Ireland . . . . .        | 1,570,000 | 115              | 80                   |
| United Kingdom . . . . . | 5,650,000 | 102              | 36                   |

In India the police number 144,000 men, of whom 46,000 carry swords, and 55,000 firearms.

## POPULATION

The population of the Roman Empire at the death of Augustus, 14 B.C., was little more than that of the present German Empire, being estimated by Bodio thus:—

|                           |            |
|---------------------------|------------|
| Italy . . . . .           | 6,000,000  |
| Spain . . . . .           | 6,000,000  |
| Greece . . . . .          | 3,000,000  |
| Gaul . . . . .            | 3,400,000  |
| Other countries . . . . . | 4,600,000  |
| Europe . . . . .          | 23,000,000 |
| Asia . . . . .            | 19,500,000 |
| Africa . . . . .          | 11,500,000 |
| Total . . . . .           | 54,000,000 |

The population of Europe hardly exceeded 50 millions before the 15th century.

The population of Europe, according to the best authorities, has been as follows:—

| Date | Author    | Population  | Date | Author    | Population  |
|------|-----------|-------------|------|-----------|-------------|
| 1762 | Expilly   | 130,000,000 | 1850 | Confronti | 255,000,000 |
| 1778 | Moheau    | 150,000,000 | 1861 | Hausner   | 283,900,000 |
| 1800 | Levasseur | 175,000,000 | 1871 | Berg-Loua | 293,000,000 |
| 1828 | Balbi     | 214,000,000 | 1882 | B.-Wagner | 327,800,000 |
| 1841 | Berg-Loua | 233,700,000 | 1886 | Levasseur | 345,700,000 |

The distribution of the population of the world was as follows :—

|             | Millions |       |          |             |           |
|-------------|----------|-------|----------|-------------|-----------|
|             | 1810     | 1828  | 1845     | 1874        | 1886      |
|             | Gotha    | Balbi | Michelot | Behm-Wagner | Levasseur |
| Europe . .  | 180      | 214   | 245      | 301         | 347       |
| America . . | 21       | 40    | 50       | 85          | 112       |
| Asia . .    | 380      | 481   | 600      | 798         | 822       |
| Africa . .  | 99       | 109   | 90       | 203         | 197       |
| Australia . | 2        | 3     | 4        | 4           | 5         |
| Total . .   | 682      | 847   | 1,009    | 1,391       | 1,483     |

Michelot's and Levasseur's estimates divide Asia and Australia differently from what is usual, including all the Malay Archipelago as Australian. Thus Levasseur would make Australia in 1886 have a population of 38,000,000; but if we follow the ordinary distribution, it will be as above.

The population per square mile in 1820 and 1880 stood thus :—

|              | 1820 | 1880 |               | 1820 | 1880 |
|--------------|------|------|---------------|------|------|
| U. Kingdom   | 172  | 290  | Sweden . .    | 15   | 27   |
| France . .   | 148  | 180  | Norway . .    | 8    | 15   |
| Germany . .  | 124  | 217  | Denmark . .   | 71   | 127  |
| Russia . .   | 20   | 40   | Holland . .   | 195  | 312  |
| Austria . .  | 99   | 158  | Belgium . .   | 287  | 480  |
| Italy . .    | 138  | 247  | Switzerland . | 127  | 175  |
| Spain . .    | 58   | 82   | Greece . .    | 40   | 84   |
| Portugal . . | 92   | 124  | Europe . .    | 54   | 85   |

Levasseur's tables and the various estimates for 1890 show the population of Europe as follows :—

|                      | 1800        | 1830        | 1860        | 1880        | 1890        |
|----------------------|-------------|-------------|-------------|-------------|-------------|
| United Kingdom . . . | 16,200,000  | 24,400,000  | 29,100,000  | 35,300,000  | 38,200,000  |
| France . . .         | 27,350,000  | 32,500,000  | 36,700,000  | 37,600,000  | 38,800,000  |
| Germany . . .        | 23,180,000  | 29,700,000  | 38,100,000  | 45,200,000  | 48,600,000  |
| Russia . . .         | 35,000,000  | 45,500,000  | 68,700,000  | 84,900,000  | 92,000,000  |
| Austria . . .        | 25,000,000  | 29,900,000  | 34,700,000  | 37,600,000  | 40,100,000  |
| Italy . . .          | 17,240,000  | 21,210,000  | 25,000,000  | 28,500,000  | 30,300,000  |
| Spain . . .          | 10,540,000  | 11,200,000  | 15,600,000  | 16,700,000  | 17,600,000  |
| Portugal . . .       | 2,930,000   | 3,100,000   | 3,600,000   | 4,200,000   | 4,700,000   |
| Sweden . . .         | 2,350,000   | 2,800,000   | 3,800,000   | 4,600,000   | 4,800,000   |
| Norway . . .         | 880,000     | 1,100,000   | 1,600,000   | 1,900,000   | 2,000,000   |
| Denmark . . .        | 930,000     | 1,200,000   | 1,600,000   | 2,000,000   | 2,100,000   |
| Holland . . .        | 2,100,000   | 2,600,000   | 3,300,000   | 4,000,000   | 4,600,000   |
| Belgium . . .        | ...         | 3,800,000   | 4,700,000   | 5,500,000   | 6,100,000   |
| Switzerland . . .    | 1,800,000   | 2,000,000   | 2,500,000   | 2,800,000   | 3,000,000   |
| Turkey . . .         | 9,500,000   | 9,500,000   | 15,500,000  | 8,600,000   | 4,500,000   |
| Greece . . .         | ...         | 600,000     | 1,100,000   | 1,600,000   | 2,200,000   |
| Roumania . . .       | ...         | 1,300,000   | 4,000,000   | 5,300,000   | 5,500,000   |
| Servia . . .         | ...         | 400,000     | 1,000,000   | 1,700,000   | 2,000,000   |
| Bulgaria and E. R. . | ...         | ...         | ...         | 2,000,000   | 3,100,000   |
| Total . . .          | 175,000,000 | 222,810,000 | 290,600,000 | 339,000,000 | 359,200,000 |

In the eighty years that have elapsed since 1810 the ratio of increase in each decade, including estimates for 1890, in the various countries is shown as follows :—

|                    | Increase per 1000 Inhabitants in Decade ending |      |      |      |      |      |      |      |  |  |
|--------------------|------------------------------------------------|------|------|------|------|------|------|------|--|--|
|                    | 1820                                           | 1830 | 1840 | 1850 | 1860 | 1870 | 1880 | 1890 |  |  |
| United Kingdom . . | 171                                            | 150  | 113  | 25   | 56   | 88   | 108  | 109  |  |  |
| France . . .       | 47                                             | 69   | 51   | 45   | 27   | 7    | 11   | 37   |  |  |

| Russia . . .       | ...                                            | 70   | 72   | 50   | 40   | 105  | 130  | 140  |  |  |
| Austria . . .      | ...                                            | ...  | 15   | 10   | 75   | 85   | 52   | 50   |  |  |
| Italy . . .        | 50                                             | 95   | 72   | 74   | 44   | 72   | 60   | 60   |  |  |
| Spain . . .        | 45                                             | ...  | 65   | ...  | 100  | 77   | 35   | 54   |  |  |
| Sweden . . .       | 80                                             | 120  | 86   | 108  | 109  | 80   | 96   | 55   |  |  |
| Norway . . .       | 90                                             | 155  | 118  | 112  | 130  | 100  | 88   | 70   |  |  |
| Denmark . . .      | ...                                            | 90   | 80   | 93   | 140  | 111  | 101  | 65   |  |  |
| Holland . . .      | ...                                            | ...  | 96   | 68   | 81   | 80   | 118  | 135  |  |  |
| Belgium . . .      | ...                                            | ...  | 60   | 88   | 68   | 75   | 84   | 115  |  |  |
| Switzerland . . .  | ...                                            | ...  | 95   | 90   | 46   | 64   | 67   | 60   |  |  |

The increase would have been much greater but for the tide of emigration, which took 23,400,000 persons out of Europe between the years 1816 and 1888, viz. :—

|                           |            |
|---------------------------|------------|
| To United States . . .    | 14,963,000 |
| To British Colonies . . . | 3,767,000  |
| To South America . . .    | 2,620,000  |
| To other parts . . .      | 2,050,000  |
| Total . . .               | 23,400,000 |

The above emigration may be divided into two periods, thus :—

| Period        | Emigrants  | Average Yearly |
|---------------|------------|----------------|
| 1816-50 . . . | 4,309,000  | 123,000        |
| 1851-88 . . . | 19,091,000 | 503,000        |

The above does not include about 4,800,000 persons who, without leaving Europe, migrated from their own to another country, as appears from the fact that in 1880-81 there were, according to Census returns, 3,429,000 foreigners then living in the various countries.

The relative loss or gain by emigration or immigration in recent years, as compared with the number of inhabitants, is shown as follows :—

|                     | Increase Yearly per 10,000 Pop. |        |                     | Period  |
|---------------------|---------------------------------|--------|---------------------|---------|
|                     | Natural                         | Actual | Gain by Immigration |         |
| France . . .        | 21                              | 32     | 11                  | 1882-86 |
| Russia . . .        | 133                             | 146    | 13                  | 1871-80 |
| Finland . . .       | 149                             | 155    | 6                   | 1871-80 |
| Greece . . .        | 83                              | 159    | 76                  | 1870-79 |
| Roumania . . .      | 68                              | 73     | 5                   | 1860-64 |
| Servia . . .        | 184                             | 222    | 38                  | 1879-84 |
| United States . . . | 206                             | 274    | 68                  | 1871-80 |
| Australia . . .     | 207                             | 430    | 223                 | 1876-88 |
| Canada . . .        | 120                             | 180    | 60                  | 1871-80 |
| Argentina . . .     | 130                             | 450    | 320                 | 1880-88 |

POPULATION.

| Sweden . . .    | 119                               | 87     | 32                              | 1871-80 |
| Norway . . .    | 122                               | 80     | 42                              | 1865-75 |
| Denmark . . .   | 119                               | 92     | 27                              | 1871-80 |
| Holland . . .   | 119                               | 106    | 13                              | 1871-80 |
| Belgium . . .   | 96                                | 77     | 19                              | 1871-80 |
| Switzerland . . | 73                                | 61     | 12                              | 1871-80 |

The number of men capable of bearing arms, say from 15-55, and that of women of child-bearing age, say 15-45 years of age, are shown for the various countries approximately as follows :—

|                 | Men Capable of Bear-<br>ing Arms |            | Women of Child-<br>bearing Age |            |
|-----------------|----------------------------------|------------|--------------------------------|------------|
|                 | 1860                             | 1890       | 1860                           | 1890       |
| U. Kingdom      | 7,530,000                        | 9,730,000  | 6,960,000                      | 8,766,000  |
| France . . .    | 10,890,000                       | 10,844,000 | 8,700,000                      | 8,586,000  |
| Germany . . .   | 10,555,000                       | 12,460,000 | 9,140,000                      | 10,930,000 |
| Russia . . .    | 17,700,000                       | 25,200,000 | 16,500,000                     | 23,200,000 |
| Austria . . .   | 9,135,000                        | 10,440,000 | 8,490,000                      | 9,680,000  |
| Italy . . .     | 7,020,000                        | 8,480,000  | 5,670,000                      | 6,850,000  |
| Spain . . .     | 4,060,000                        | 4,510,000  | 3,740,000                      | 4,130,000  |
| Portugal . . .  | 860,000                          | 1,120,000  | 830,000                        | 1,080,000  |
| Sweden . . .    | 1,050,000                        | 1,315,000  | 930,000                        | 1,170,000  |
| Norway . . .    | 420,000                          | 505,000    | 370,000                        | 465,000    |
| Denmark . . .   | 420,000                          | 530,000    | 370,000                        | 490,000    |
| Holland . . .   | 880,000                          | 1,220,000  | 770,000                        | 1,070,000  |
| Belgium . . .   | 1,230,000                        | 1,585,000  | 1,030,000                      | 1,340,000  |
| Switzerland . . | 670,000                          | 805,000    | 580,000                        | 690,000    |
| Greece . . .    | 390,000                          | 590,000    | 250,000                        | 490,000    |
| Romania . . .   | 1,040,000                        | 1,430,000  | 920,000                        | 1,260,000  |
| Servia . . .    | 260,000                          | 510,000    | 230,000                        | 450,000    |
| Europe . . .    | 74,020,000                       | 91,274,000 | 65,480,000                     | 80,647,000 |

It is worthy of notice that France is the only country which has fewer men and women than thirty years ago of the able-bodied ages. The following table shows the ratios of men and women of the above ages to population in the several countries :—

*Per 1000 Population*

|                | Men,  |       |                 | Women, |       |
|----------------|-------|-------|-----------------|--------|-------|
|                | 15-55 | 15-45 |                 | 15-55  | 15-45 |
| England . . .  | 256   | 230   | Spain . . .     | 260    | 240   |
| Scotland . . . | 250   | 230   | Portugal . . .  | 240    | 230   |
| Ireland . . .  | 247   | 224   | Sweden . . .    | 274    | 245   |
| U. Kingdom . . | 254   | 228   | Norway . . .    | 252    | 233   |
| France . . .   | 281   | 223   | Denmark . . .   | 260    | 232   |
| Germany . . .  | 256   | 225   | Holland . . .   | 267    | 233   |
| Russia . . .   | 259   | 240   | Belgium . . .   | 260    | 220   |
| Austria . . .  | 261   | 242   | Switzerland . . | 268    | 230   |
| Italy . . .    | 280   | 227   | Greece . . .    | 270    | 225   |

Ireland and Portugal are lowest as regards the ratio of able-bodied men.

The *Almanach de Gotha* gives the ratio of sexes in 1884 in the various countries thus :—

*Females to 1000 Males*

|                |       |                 |       |                |       |
|----------------|-------|-----------------|-------|----------------|-------|
| U. Kingdom . . | 1,047 | Holland . . .   | 1,022 | Canada . . .   | 976   |
| France . . .   | 1,004 | Belgium . . .   | 1,001 | Brazil . . .   | 938   |
| Germany . . .  | 1,039 | Switzerland . . | 1,040 | Argentina . .  | 942   |
| Russia . . .   | 1,027 | Servia . . .    | 957   | Chili . . .    | 1,004 |
| Austria . . .  | 1,034 | Bulgaria . . .  | 952   | Peru . . .     | 986   |
| Italy . . .    | 995   | Roumania . . .  | 937   | Venezuela . .  | 1,063 |
| Spain . . .    | 1,045 | Greece . . .    | 906   | Uruguay . . .  | 934   |
| Portugal . . . | 1,084 | Egypt . . .     | 1,025 | Colombia . . . | 1,058 |
| Sweden . . .   | 1,064 | Cape . . .      | 972   | Greenland . .  | 1,134 |
| Norway . . .   | 1,049 | India . . .     | 944   | Europe . . .   | 1,019 |
| Denmark . . .  | 1,035 | Japan . . .     | 973   | America . . .  | 970   |
| Finland . . .  | 1,042 | U. States . . . | 965   | Australia . .  | 843   |

The latest Census returns show the ratio of foreigners in various countries thus :—

*Per 1000 of Population*

|                |    |               |    |                 |     |
|----------------|----|---------------|----|-----------------|-----|
| U. Kingdom . . | 4  | Spain . . .   | 3  | Belgium . . .   | 26  |
| France . . .   | 29 | Sweden . . .  | 4  | Switzerland . . | 74  |
| Germany . . .  | 6  | Norway . . .  | 20 | Servia . . .    | 21  |
| Austria . . .  | 16 | Denmark . . . | 32 | Greece . . .    | 19  |
| Hungary . . .  | 15 | Holland . . . | 17 | United States   | 133 |
| Italy . . .    | 2  |               |    |                 |     |

The ratio of foreigners to population is 21 per thousand in London, 90 in Paris, 13 in Berlin, 14 in Buda-Pesth, 210 in Monte Video, and 360 in Buenos Ayres.

The population of the great cities of the world is shown as follows :—

|                    | 1881      | 1888      |
|--------------------|-----------|-----------|
| Amsterdam . . .    | 201,000   | 372,000   |
| Antwerp . . .      | 65,000    | 205,000   |
| Belfast . . .      | 53,000    | 230,000   |
| Berlin . . .       | 220,000   | 1,438,000 |
| Birmingham . .     | 142,000   | 448,000   |
| Bombay . . .       | 229,000   | 773,000   |
| Bordeaux . . .     | 94,000    | 241,000   |
| Boston . . .       | 61,000    | 363,000   |
| Brussels . . .     | 102,000   | 462,000   |
| Buda-Pesth . . .   | 67,000    | 443,000   |
| Buenos Ayres . .   | 81,000    | 455,000   |
| Cairo . . .        | 333,000   | 375,000   |
| Calcutta . . .     | 280,000   | 433,000   |
| Constantinople . . | 590,000   | 874,000   |
| Copenhagen . . .   | 109,000   | 300,000   |
| Christiania . . .  | 21,000    | 136,000   |
| Dresden . . .      | 70,000    | 259,000   |
| Dublin . . .       | 227,000   | 353,000   |
| Edinburgh . . .    | 130,000   | 263,000   |
| Florence . . .     | 82,000    | 168,000   |
| Genoa . . .        | 83,000    | 179,000   |
| Glasgow . . .      | 164,000   | 526,000   |
| Hamburg . . .      | 112,000   | 306,000   |
| Havana . . .       | 111,000   | 230,000   |
| Leipsic . . .      | 42,000    | 170,000   |
| Lisbon . . .       | 202,000   | 243,000   |
| Liverpool . . .    | 165,000   | 600,000   |
| London . . .       | 1,655,000 | 4,283,000 |
| Lyons . . .        | 146,000   | 402,000   |
| Madrid . . .       | 205,000   | 387,000   |
| Manchester . . .   | 238,000   | 604,000   |
| Manilla . . .      | 134,000   | 270,000   |
| Marseilles . . .   | 116,000   | 376,000   |
| Milan . . .        | 125,000   | 321,000   |
| Moscow . . .       | 308,000   | 753,000   |
| Munich . . .       | 65,000    | 275,000   |
| Naples . . .       | 354,000   | 491,000   |
| New Orleans . . .  | 46,000    | 216,000   |
| New York . . .     | 203,000   | 1,493,000 |
| Palermo . . .      | 168,000   | 245,000   |
| Philadelphia . . . | 167,000   | 1,017,000 |
| Prague . . .       | 85,000    | 296,000   |
| Rio Janeiro . . .  | 145,000   | 356,000   |

|                          | 1831    | 1888    |
|--------------------------|---------|---------|
| Rome . . . . .           | 128,000 | 388,000 |
| Rotterdam . . . . .      | 66,000  | 194,000 |
| St. Petersburg . . . . . | 324,000 | 843,000 |
| Smyrna . . . . .         | 115,000 | 187,000 |
| Stockholm . . . . .      | 79,000  | 222,000 |
| Stuttgart . . . . .      | 32,000  | 126,000 |
| Turin . . . . .          | 114,000 | 241,000 |
| Tunis . . . . .          | 108,000 | 210,000 |
| Venice . . . . .         | 110,000 | 151,000 |
| Vienna . . . . .         | 280,000 | 801,000 |
| Warsaw . . . . .         | 151,000 | 432,000 |

Dr. Beloch gives the population of ancient cities thus:—

| City                 | Date      | Population | Area, Acres | Population per Acre |
|----------------------|-----------|------------|-------------|---------------------|
| Rome . . . . .       | A. D. 14  | 900,000    | 2,950       | 306                 |
| Thebes . . . . .     | B. C. 335 | 50,000     | 500         | 100                 |
| Tyre . . . . .       | " 332     | 40,000     | 185         | 210                 |
| Palermo . . . . .    | " 254     | 27,000     | 115         | 230                 |
| Athens . . . . .     | " 350     | 150,000    | 145         | 103                 |
| Alexandria . . . . . | " 60      | 500,000    | 230         | 218                 |

The density of population in modern cities is shown thus, according to figures for 1881:—

|                  | Population | Acres  | Population per Acre |
|------------------|------------|--------|---------------------|
| London . . . . . | 3,893,000  | 75,000 | 52                  |
| Paris . . . . .  | 2,240,000  | 14,500 | 154                 |
| Berlin . . . . . | 1,192,000  | 4,500  | 264                 |
| Vienna . . . . . | 724,000    | 2,800  | 258                 |
| Rome . . . . .   | 273,000    | 800    | 341                 |

The city of greatest density in the United Kingdom is Liverpool, with 106 inhabitants to the acre.

The ratios of urban and rural population are not ascertained in all countries, nor determined alike in many. Some include in the former villages and small towns. If we consider only towns of 20,000 or more inhabitants, we find as follows (1881):—

|                          | Number of Towns | Aggregate Population | Percentage of Total Population |       |
|--------------------------|-----------------|----------------------|--------------------------------|-------|
|                          |                 |                      | Urban                          | Rural |
| England . . . . .        | 101             | 11,420,000           | 44                             | 56    |
| Scotland . . . . .       | 10              | 1,310,000            | 35                             | 65    |
| Ireland . . . . .        | 9               | 820,000              | 16                             | 84    |

| Australia . . . . .      | 16              | 710,000              | 25                             | 75    |
| Total . . . . .          | 807             | 61,370,000           | 15                             | 85    |

#### UNITED KINGDOM

The kingdoms now composing the United Kingdom, according to the most reliable estimates and official returns at various periods, had the following population:—

| Year           | England    | Scotland  | Ireland   | Total      | Inhabitants per Square Mile |          |         |
|----------------|------------|-----------|-----------|------------|-----------------------------|----------|---------|
|                |            |           |           |            | England                     | Scotland | Ireland |
| 1066 . . . . . | 2,150,000  | 350,000   | 1,000,000 | 3,500,000  | 37                          | 11       | 32      |
| 1381 . . . . . | 2,360,000  | 400,000   | 1,100,000 | 3,860,000  | 41                          | 13       | 35      |
| 1528 . . . . . | 4,356,000  | 550,000   | 770,000   | 5,676,000  | 75                          | 17       | 24      |
| 1672 . . . . . | 5,500,000  | 900,000   | 1,320,000 | 7,720,000  | 96                          | 29       | 41      |
| 1712 . . . . . | 6,280,000  | 1,050,000 | 2,099,000 | 9,429,000  | 110                         | 34       | 66      |
| 1754 . . . . . | 7,020,000  | 1,265,000 | 2,373,000 | 10,658,000 | 120                         | 40       | 74      |
| 1780 . . . . . | 8,080,000  | 1,430,000 | 3,050,000 | 12,560,000 | 140                         | 47       | 96      |
| 1801 . . . . . | 8,893,000  | 1,608,000 | 5,216,000 | 15,717,000 | 155                         | 53       | 165     |
| 1811 . . . . . | 10,164,000 | 1,806,000 | 5,957,000 | 17,927,000 | 175                         | 60       | 189     |
| 1821 . . . . . | 12,090,000 | 2,092,000 | 6,802,000 | 20,984,000 | 207                         | 68       | 212     |
| 1831 . . . . . | 14,001,000 | 2,364,000 | 7,768,000 | 24,133,000 | 241                         | 77       | 243     |
| 1841 . . . . . | 16,038,000 | 2,620,000 | 8,197,000 | 26,855,000 | 275                         | 86       | 256     |
| 1851 . . . . . | 18,071,000 | 2,889,000 | 6,574,000 | 27,534,000 | 310                         | 94       | 205     |
| 1861 . . . . . | 20,209,000 | 3,062,000 | 5,799,000 | 29,070,000 | 347                         | 100      | 181     |
| 1871 . . . . . | 22,857,000 | 3,360,000 | 5,412,000 | 31,629,000 | 391                         | 110      | 169     |
| 1881 . . . . . | 26,109,000 | 3,734,000 | 5,160,000 | 35,003,000 | 443                         | 122      | 161     |
| 1889 . . . . . | 29,016,000 | 4,077,000 | 4,716,000 | 37,809,000 | 500                         | 133      | 159     |

Meantime it must be observed that the estimates for Ireland in 1754 and 1780 were much too low, since it is impossible to suppose an increase of 70 per cent. between 1780 and 1801. It is clear that the above table should be amended thus:—

| Year           | England   | Scotland  | Ireland   | Total      |
|----------------|-----------|-----------|-----------|------------|
| 1754 . . . . . | 7,020,000 | 1,265,000 | 3,200,000 | 11,485,000 |
| 1780 . . . . . | 8,080,000 | 1,430,000 | 4,200,000 | 13,710,000 |

The ratio of sexes at each Census stood for the United Kingdom thus:—

|                   | 1821  | 1831  | 1841  | 1851  | 1861  | 1871  | 1881  |
|-------------------|-------|-------|-------|-------|-------|-------|-------|
| Males . . . . .   | 487   | 486   | 488   | 489   | 485   | 486   | 485   |
| Females . . . . . | 513   | 514   | 512   | 511   | 515   | 514   | 515   |
| Total . . . . .   | 1,000 | 1,000 | 1,000 | 1,000 | 1,000 | 1,000 | 1,000 |

This shows an increasing preponderance of females.

The population according to sexes since 1821 has been as follows :—

| Year | Males      |           |           |            |
|------|------------|-----------|-----------|------------|
|      | England    | Scotland  | Ireland   | U.Kingdom  |
| 1821 | 5,850,000  | 980,000   | 3,340,000 | 10,170,000 |
| 1831 | 6,770,000  | 1,110,000 | 3,790,000 | 11,672,000 |
| 1841 | 7,770,000  | 1,240,000 | 4,010,000 | 13,020,000 |
| 1851 | 8,780,000  | 1,370,000 | 3,190,000 | 13,340,000 |
| 1861 | 9,801,000  | 1,453,000 | 2,832,000 | 14,086,000 |
| 1871 | 11,059,000 | 1,603,000 | 2,640,000 | 15,302,000 |
| 1881 | 12,625,000 | 1,798,000 | 2,523,000 | 16,946,000 |

| Year | Females    |           |           |            |
|------|------------|-----------|-----------|------------|
|      | England    | Scotland  | Ireland   | U.Kingdom  |
| 1821 | 6,140,000  | 1,100,000 | 3,450,000 | 10,690,000 |
| 1831 | 7,120,000  | 1,240,000 | 3,970,000 | 12,330,000 |
| 1841 | 8,130,000  | 1,370,000 | 4,150,000 | 13,650,000 |
| 1851 | 9,140,000  | 1,510,000 | 3,360,000 | 14,010,000 |
| 1861 | 10,318,000 | 1,613,000 | 2,957,000 | 14,891,000 |
| 1871 | 11,653,000 | 1,757,000 | 2,773,000 | 16,183,000 |
| 1881 | 13,343,000 | 1,937,000 | 2,637,000 | 17,917,000 |

The ratios of males of working age, 15 to 55, were as follows :—

|                | Per 1000 Inhabitants |      |
|----------------|----------------------|------|
|                | 1841                 | 1881 |
| England . . .  | 262                  | 256  |
| Scotland . . . | 255                  | 250  |
| Ireland . . .  | 255                  | 247  |

Women of child-bearing age, 15 to 45, were as follows :—

|                | Per 1000 Inhabitants |      |
|----------------|----------------------|------|
|                | 1841                 | 1881 |
| England . . .  | 240                  | 230  |
| Scotland . . . | 247                  | 230  |
| Ireland . . .  | 236                  | 224  |

Ireland stands lowest in men and women of the most useful and productive ages, which is the result of emigration.

The principal towns of England in the 14th century (1377) were supposed to have the following population :—

|                   |                    |                     |
|-------------------|--------------------|---------------------|
| London . 35,200   | Norwich . 6,300    | Newcastle . 4,300   |
| York . . 11,400   | Lincoln . . 5,500  | Oxford . . 3,800    |
| Bristol . . 9,200 | Lynn . . . 5,200   | Gloucester . 3,400  |
| Plymouth . 7,300  | Canterbury 4,700   | Leicester . . 3,200 |
| Coventry . 7,100  | Colchester . 4,500 | Shrewsbury 3,000    |

The twelve great towns of England have grown in this manner :—

|               | 1801      | 1831      | 1841      | 1861      | 1887      |
|---------------|-----------|-----------|-----------|-----------|-----------|
| London .      | 959,000   | 1,379,000 | 1,948,000 | 2,804,000 | 4,215,000 |
| Liverpool .   | 82,000    | 138,000   | 286,000   | 444,000   | 593,000   |
| Manchester .  | 77,000    | 129,000   | 243,000   | 358,000   | 378,000   |
| Birmingham .  | 71,000    | 102,000   | 183,000   | 296,000   | 441,000   |
| Leeds . .     | 53,000    | 84,000    | 152,000   | 207,000   | 345,000   |
| Sheffield . . | 46,000    | 65,000    | 111,000   | 185,000   | 316,000   |
| Bristol . .   | 61,000    | 85,000    | 125,000   | 154,000   | 224,000   |
| Nottingham .  | 29,000    | 40,000    | 52,000    | 75,000    | 224,000   |
| Bradford . .  | 13,000    | 26,000    | 67,000    | 106,000   | 224,000   |
| Hull . . .    | 30,000    | 45,000    | 67,000    | 97,000    | 199,000   |
| Newcastle .   | 33,000    | 42,000    | 70,000    | 109,000   | 157,000   |
| Brighton .    | 7,000     | 25,000    | 49,000    | 87,000    | 118,000   |
| Total .       | 1,461,000 | 2,160,000 | 3,353,000 | 4,922,000 | 7,434,000 |

The urban and rural population have been as follows :—

|            | Rural      | Urban      | Total      | Rural, Ratio per Cent. |
|------------|------------|------------|------------|------------------------|
| 1851 . . . | 8,772,000  | 9,156,000  | 17,928,000 | 49.0                   |
| 1861 . . . | 9,133,000  | 10,933,000 | 20,066,000 | 45.5                   |
| 1871 . . . | 9,802,000  | 12,911,000 | 22,713,000 | 43.2                   |
| 1881 . . . | 10,523,000 | 15,445,000 | 25,968,000 | 40.4                   |

According to the Census of 1881 the population showed :—

| England and Wales  | Ireland           | Scotland          |
|--------------------|-------------------|-------------------|
| Natives 24,856,000 | Natives 5,064,000 | Natives 3,398,000 |
| Irish . 562,000    | English . 69,000  | English . 92,000  |
| Scotch . 254,000   | Scotch . 22,000   | Irish . 219,000   |
| Foreign . 303,000  | Foreign . 20,000  | Foreign . 27,000  |
| Total 25,975,000   | Total 5,175,000   | Total 3,736,000   |

The density of towns in England (that is, the population per acre) is shown thus :—

|                  |                  |                   |
|------------------|------------------|-------------------|
| Norwich . . 12   | Bradford . . 28  | Bristol . . . 49  |
| Leeds . . . 15   | Portsmouth . 31  | London . . . 49   |
| Sheffield . . 16 | Leicester . . 42 | Plymouth . . 54   |
| Nottingham . 18  | Hull . . . . 42  | Manchester . 85   |
| Oldham . . . 26  | Birmingham . 48  | Liverpool . . 106 |

#### FRANCE

According to respectable authorities and Census returns, the population was at various dates as follows :—

| Year   | Population | Year   | Population | Year   | Population |
|--------|------------|--------|------------|--------|------------|
| 1328 . | 10,000,000 | 1791 . | 26,303,000 | 1851 . | 35,783,000 |
| 1515 . | 14,000,000 | 1801 . | 27,350,000 | 1861 . | 36,746,000 |
| 1599 . | 16,000,000 | 1811 . | 29,090,000 | 1866 . | 38,067,000 |
| 1698 . | 19,670,000 | 1821 . | 30,462,000 | 1872 . | 37,013,000 |
| 1762 . | 21,770,000 | 1831 . | 32,569,000 | 1881 . | 37,406,000 |
| 1778 . | 23,665,000 | 1841 . | 34,230,000 | 1886 . | 38,219,000 |

The area varied often from the 14th century downwards; but comparing it with population, we find at different dates the inhabitants per square mile were as follows :—

| Year       | Per Sq. Mile | Year       | Per Sq. Mile | Year       | Per Sq. Mile |
|------------|--------------|------------|--------------|------------|--------------|
| 1515 . . . | 80           | 1754 . . . | 96           | 1800 . . . | 135          |
| 1600 . . . | 88           | 1778 . . . | 112          | 1881 . . . | 180          |

The ratio of sexes to population showed as follows :—

| Males to 1000 Females |       |            |       |
|-----------------------|-------|------------|-------|
| Year                  | Males | Year       | Males |
| 1801 . . .            | 950   | 1841 . . . | 976   |
| 1821 . . .            | 945   | 1851 . . . | 982   |
|                       |       | 1876 . . . | 993   |

Urban and rural population stood in these ratios :—

|             | 1846  | 1851  | 1861  | 1872  |
|-------------|-------|-------|-------|-------|
| Urban . . . | 244   | 255   | 289   | 311   |
| Rural . . . | 756   | 745   | 711   | 689   |
| Total . . . | 1,000 | 1,000 | 1,000 | 1,000 |

The nine principal cities of France had the following population :—

|              | 1801      | 1835      | 1881      | 1886      |
|--------------|-----------|-----------|-----------|-----------|
| Paris . . .  | 553,000   | 881,000   | 2,226,000 | 2,345,000 |
| Lyons . . .  | 110,000   | 162,000   | 377,000   | 402,000   |
| Marseilles . | 111,000   | 125,000   | 360,000   | 376,000   |
| Bordeaux . . | 91,000    | 110,000   | 212,000   | 241,000   |
| Lille . . .  | 55,000    | 77,000    | 178,000   | 188,000   |
| Toulouse . . | 50,000    | 62,000    | 140,000   | 148,000   |
| Nantes . . . | 42,000    | 78,000    | 124,000   | 127,000   |
| Rouen . . .  | 48,000    | 91,000    | 106,000   | 107,000   |
| Havre . . .  | 16,000    | 24,000    | 106,000   | 112,000   |
| Total . . .  | 1,076,000 | 1,610,000 | 3,829,000 | 4,046,000 |

The population of Paris has been as follows :—

| Year     | Population | Year     | Population | Year     | Population |
|----------|------------|----------|------------|----------|------------|
| 1675 . . | 540,000    | 1800 . . | 547,000    | 1851 . . | 1,053,000  |
| 1700 . . | 720,000    | 1811 . . | 623,000    | 1861 . . | 1,697,000  |
| 1762 . . | 600,000    | 1831 . . | 786,000    | 1872 . . | 1,852,000  |
| 1789 . . | 525,000    | 1841 . . | 935,000    | 1886 . . | 2,345,000  |

## GERMANY

Levasseur gives the following :—

| Year     | Population | Year     | Population | Year     | Population |
|----------|------------|----------|------------|----------|------------|
| 1816 . . | 24,830,000 | 1840 . . | 32,786,000 | 1871 . . | 41,060,000 |
| 1822 . . | 27,040,000 | 1852 . . | 35,960,000 | 1880 . . | 45,234,000 |
| 1831 . . | 29,768,000 | 1861 . . | 38,140,000 | 1885 . . | 46,856,000 |

The German Confederation at various dates, down to its dissolution at the battle of Königgratz in 1866, showed as follows :—

| States       | Area, Sq. Miles |         | Population |            |            |
|--------------|-----------------|---------|------------|------------|------------|
|              | 1786            | 1866    | 1786       | 1816       | 1866       |
| Austria . .  | 84,500          | 76,400  | 10,930,000 | 9,180,000  | 13,250,000 |
| Prussia . .  | 46,500          | 72,000  | 4,110,000  | 7,920,000  | 14,720,000 |
| Bavaria . .  | 22,600          | 29,600  | 2,100,000  | 3,560,000  | 4,810,000  |
| Saxony . .   | 15,600          | 5,800   | 1,870,000  | 1,200,000  | 2,340,000  |
| Brunswick .  | 2,000           | 1,400   | 185,000    | 210,000    | 290,000    |
| Wurtemberg . | 4,300           | 7,500   | 585,000    | 1,400,000  | 1,750,000  |
| Hanover . .  | ...             | 14,900  | ...        | 1,310,000  | 1,920,000  |
| Baden . .    | ...             | 5,900   | ...        | 1,000,000  | 1,430,000  |
| Various . .  | 92,200          | 30,100  | 6,485,000  | 4,380,000  | 5,900,000  |
| Total . .    | 267,700         | 243,600 | 26,265,000 | 30,160,000 | 46,410,000 |

Kolb gives the population according to sexes since 1855 as follows :—

|             | 1855       | 1864       | 1871       | 1885       |
|-------------|------------|------------|------------|------------|
| Males . .   | 16,185,000 | 17,785,000 | 20,250,000 | 22,934,000 |
| Females . . | 16,535,000 | 18,095,000 | 21,005,000 | 23,922,000 |
| Total . .   | 32,700,000 | 35,880,000 | 41,255,000 | 46,856,000 |
| Ratio       |            |            |            |            |
| Males . .   | 495        | 495        | 491        | 489        |
| Females . . | 505        | 505        | 509        | 511        |
| Total . .   | 1,000      | 1,000      | 1,000      | 1,000      |

The Census of 1885 may be condensed thus :—

|                   | Males      | Females    | Total      | No. per Sq. Mile |
|-------------------|------------|------------|------------|------------------|
| Prussia . .       | 13,894,000 | 14,425,000 | 28,319,000 | 216              |
| Bavaria . .       | 2,639,000  | 2,781,000  | 5,420,000  | 192              |
| Saxony . .        | 1,542,000  | 1,640,000  | 3,182,000  | 560              |
| Wurtemberg .      | 961,000    | 1,034,000  | 1,995,000  | 272              |
| Baden . .         | 782,000    | 819,000    | 1,601,000  | 280              |
| Alsace-Lorraine } | 771,000    | 793,000    | 1,564,000  | 288              |
| Small Duchies }   | 2,345,000  | 2,430,000  | 4,775,000  | ...              |
| Total . .         | 22,934,000 | 23,922,000 | 46,856,000 | 230              |

Official records of Prussia give the population thus :—

| Year     | Population | Year     | Population | Year     | Population |
|----------|------------|----------|------------|----------|------------|
| 1801 . . | 8,020,000  | 1840 . . | 14,929,000 | 1875 . . | 25,742,000 |
| 1816 . . | 10,349,000 | 1850 . . | 16,608,000 | 1880 . . | 27,251,000 |
| 1831 . . | 13,039,000 | 1861 . . | 18,497,000 | 1885 . . | 28,319,000 |

The Census of 1843 for Prussia showed as follows :—

|               |            |             |            |
|---------------|------------|-------------|------------|
| Married . . . | 5,133,000  | Urban . . . | 4,263,000  |
| Unmarried . . | 10,388,000 | Rural . . . | 11,208,000 |
| Total . . .   | 15,471,000 | Total . . . | 15,471,000 |

The ratio of sexes in Prussia has been as follows :—

|               | 1810  | 1820  | 1840  | 1880  |
|---------------|-------|-------|-------|-------|
| Males . . .   | 495   | 495   | 499   | 492   |
| Females . . . | 505   | 505   | 501   | 508   |
| Total . . .   | 1,000 | 1,000 | 1,000 | 1,000 |

The effects of the Franco-German war are visible in the increased preponderance of women in 1880. The composition of the population of Prussia as to sex and age in 1880 compared with 1843 thus :—

| Age         | Per 1000 Inhabitants |         |       |       |         |       |
|-------------|----------------------|---------|-------|-------|---------|-------|
|             | 1843                 |         |       | 1880  |         |       |
|             | Males                | Females | Total | Males | Females | Total |
| Under 5 . . | 76                   | 74      | 150   | 70    | 69      | 139   |
| 5-15 . .    | 99                   | 97      | 196   | 110   | 109     | 219   |
| 15-45 . .   | 242                  | 242     | 484   | 216   | 225     | 441   |
| 45-60 . .   | 54                   | 58      | 112   | 60    | 65      | 125   |
| Over 60 . . | 28                   | 30      | 58    | 36    | 40      | 76    |
| Total . .   | 499                  | 501     | 1,000 | 492   | 508     | 1,000 |

The records of Bavaria, Saxony, and Hanover show thus :—

| Bavaria |            | Saxony |            | Hanover |            |
|---------|------------|--------|------------|---------|------------|
| Year    | Population | Year   | Population | Year    | Population |
| 1818    | 3,708,000  | 1815   | 1,179,000  | 1822    | 1,464,000  |
| 1843    | 4,440,000  | 1841   | 1,687,000  | 1836    | 1,688,000  |
| 1861    | 4,690,000  | 1861   | 2,225,000  | 1852    | 1,819,000  |
| 1875    | 5,022,000  | 1875   | 2,761,000  | 1862    | 1,958,000  |
| 1885    | 5,420,000  | 1885   | 3,182,000  | 1880    | 2,118,000  |

Since 1866 Hanover has formed a province of Prussia. The ratio of sexes in Saxony has been as follows :—

In 1815 there were 1080 females to 1000 males  
 In 1832 " 1058 " 1000 "  
 In 1875 " 1041 " 1000 "

The Census of 1885 showed the chief cities of Germany thus :—

|               |           |                |         |
|---------------|-----------|----------------|---------|
| Berlin . .    | 1,315,000 | Königsberg . . | 151,000 |
| Hamburg . .   | 306,000   | Magdeburg . .  | 143,000 |
| Breslau . .   | 300,000   | Hanover . .    | 140,000 |
| Munich . .    | 262,000   | Stuttgart . .  | 126,000 |
| Dresden . .   | 246,000   | Bremen . .     | 118,000 |
| Leipzig . .   | 170,000   | Nuremberg . .  | 115,000 |
| Cologne . .   | 161,000   | Dantzig . .    | 115,000 |
| Frankfort . . | 155,000   | Strasbourg . . | 112,000 |

The records of Berlin give the population as follows :—

| Year     | Population | Year     | Population | Year     | Population |
|----------|------------|----------|------------|----------|------------|
| 1602 . . | 8,000      | 1819 . . | 185,000    | 1861 . . | 548,000    |
| 1700 . . | 55,000     | 1831 . . | 249,000    | 1871 . . | 826,000    |
| 1787 . . | 147,000    | 1852 . . | 433,000    | 1885 . . | 1,315,000  |

In 1875 the population of Berlin was made up thus :—

|             |         |                    |         |
|-------------|---------|--------------------|---------|
| Males . .   | 481,500 | Born in Berlin . . | 399,100 |
| Females . . | 477,700 | " elsewhere . .    | 560,100 |
| Total . .   | 959,200 | Total . .          | 959,200 |

There were 213,900 families, of whom 43,600 kept servants, the rest none.

The number of foreign residents in Germany was as follows :—

| In                     | 1871    | 1885    |
|------------------------|---------|---------|
| Prussia . . . . .      | 87,000  | 157,000 |
| Saxony . . . . .       | 39,000  | 62,000  |
| Saxony . . . . .       | 24,000  | 53,000  |
| Other States . . . . . | 57,000  | 101,000 |
| Total . . . . .        | 207,000 | 373,000 |

#### RUSSIA

M'Gregor's tables for the 17th and 18th centuries, along with later estimates for Russia and Poland, show population thus :—

| Year           | Population | Year           | Population | Year           | Population |
|----------------|------------|----------------|------------|----------------|------------|
| 1689 . . . . . | 15,000,000 | 1820 . . . . . | 51,500,000 | 1871 . . . . . | 72,233,000 |
| 1762 . . . . . | 25,000,000 | 1840 . . . . . | 59,134,000 | 1885 . . . . . | 89,680,000 |
| 1801 . . . . . | 40,170,000 | 1858 . . . . . | 64,096,000 |                |            |

Kolb, however, gives the following table :—

| Year           | Sq. Miles | Population | Year           | Sq. Miles | Population |
|----------------|-----------|------------|----------------|-----------|------------|
| 1722 . . . . . | 5,953,000 | 14,000,000 | 1811 . . . . . | 7,123,000 | 42,000,000 |
| 1742 . . . . . | 6,889,000 | 16,000,000 | 1829 . . . . . | "         | 50,500,000 |
| 1762 . . . . . | "         | 19,000,000 | 1838 . . . . . | "         | 59,000,000 |
| 1782 . . . . . | 7,123,000 | 27,500,000 | 1851 . . . . . | "         | 65,000,000 |
| 1803 . . . . . | "         | 36,000,000 | 1870 . . . . . | 7,867,000 | 78,000,000 |

The preponderance of females is not so great as it was forty years ago, the official returns showing :—

| Year           | Males      | Females    | Females to Males |
|----------------|------------|------------|------------------|
| 1840 . . . . . | 28,806,000 | 30,238,000 | 1,045 to 1,000   |
| 1882 . . . . . | 42,289,000 | 43,007,000 | 1,016 to 1,000   |

In 1867, on the other hand, the males preponderated in all the large cities except Warsaw, viz. :—

#### Females to 100 Males

|                          |    |                   |    |                  |     |
|--------------------------|----|-------------------|----|------------------|-----|
| Moscow . . . . .         | 56 | Saratov . . . . . | 87 | Kazan . . . . .  | 92  |
| St. Petersburg . . . . . | 72 | Riga . . . . .    | 88 | Warsaw . . . . . | 112 |
| Kiev . . . . .           | 76 | Odessa . . . . .  | 91 |                  |     |

The principal cities in 1882 showed the following population :—

|                          |         |                    |         |
|--------------------------|---------|--------------------|---------|
| St. Petersburg . . . . . | 843,000 | Kazan . . . . .    | 141,000 |
| Moscow . . . . .         | 753,000 | Kichinev . . . . . | 130,000 |
| Warsaw . . . . .         | 432,000 | Kiev . . . . .     | 127,000 |
| Odessa . . . . .         | 240,000 | Lodz . . . . .     | 113,000 |
| Riga . . . . .           | 169,000 | Saratov . . . . .  | 112,000 |
| Kharkoff . . . . .       | 167,000 | Tiflis . . . . .   | 104,000 |

In 1882 the total urban population amounted to 13,800,000 :—

|                                |           |
|--------------------------------|-----------|
| 4 first-class cities . . . . . | 2,354,000 |
| 9 second-class . . . . .       | 1,163,000 |
| 23 third-class . . . . .       | 1,610,000 |
| 93 fourth-class . . . . .      | 3,100,000 |
| 164 fifth-class . . . . .      | 2,190,000 |
| 690 villages . . . . .         | 3,383,000 |

Total . . . . . 13,800,000

The population in 1888 was made up thus :—

|                         |            |
|-------------------------|------------|
| Russia proper . . . . . | 81,700,000 |
| Poland . . . . .        | 7,980,000  |

Total . . . . . 89,680,000

This gave for Poland an average of 170 per square mile against 125 in 1865, in which year there were 107 females to 100 males, and the urban population was 20 per cent. of the total.

Asiatic Russia in 1801 had 3,600,000 inhabitants, and in 1883 the number was 16,400,000.

Finland is not strictly a part of the Russian Empire: its population in 1885 was 2,200,000.

The ratio of sexes and of urban population in Finland was as follows :—

| Males to 1000 Females |       | Percentage of Urban Population |       |
|-----------------------|-------|--------------------------------|-------|
| Year                  | Males | Year                           | Urban |
| 1751 . . . . .        | 917   | 1815 . . . . .                 | 47    |
| 1800 . . . . .        | 949   | 1840 . . . . .                 | 59    |
| 1820 . . . . .        | 929   | 1850 . . . . .                 | 64    |
| 1840 . . . . .        | 940   | 1860 . . . . .                 | 63    |
| 1860 . . . . .        | 947   | 1870 . . . . .                 | 77    |

The advance of population in the Russian Empire since 1858 is shown as follows :—

|                    | 1858       | 1870       | 1885        |
|--------------------|------------|------------|-------------|
| Russia . . . . .   | 59,331,000 | 65,705,000 | 81,725,000  |
| Poland . . . . .   | 4,765,000  | 6,026,000  | 7,960,000   |
| Finland . . . . .  | 1,636,000  | 1,774,000  | 2,176,000   |
| Caucasus . . . . . | 4,309,000  | 4,763,000  | 7,285,000   |
| Siberia . . . . .  | 2,936,000  | 3,405,000  | 4,314,000   |
| Tartary . . . . .  | 1,295,000  | 3,357,000  | 5,327,000   |
| Total . . . . .    | 74,272,000 | 85,030,000 | 108,787,000 |

The distribution of sexes was in 1880 as follows :—

|                             | Males      | Females    | Total       | Females to 100 Males |
|-----------------------------|------------|------------|-------------|----------------------|
| Russia and Poland . . . . . | 40,925,000 | 42,051,000 | 82,976,000  | 103                  |
| Finland . . . . .           | 1,019,000  | 1,063,000  | 2,082,000   | 104                  |
| Caucasus . . . . .          | 3,352,000  | 2,939,000  | 6,291,000   | 88                   |
| Siberia . . . . .           | 2,044,000  | 1,904,000  | 3,948,000   | 93                   |
| Tartary . . . . .           | 2,631,000  | 2,445,000  | 5,076,000   | 93                   |
| Total . . . . .             | 49,971,000 | 50,402,000 | 100,373,000 | 101                  |

#### AUSTRIA

The population of the Empire, exclusive of the Italian provinces, was as follows :—

| Year           | Population | Year           | Population |
|----------------|------------|----------------|------------|
| 1789 . . . . . | 18,000,000 | 1857 . . . . . | 31,994,000 |
| 1810 . . . . . | 22,420,000 | 1869 . . . . . | 35,811,000 |
| 1840 . . . . . | 32,835,000 | 1880 . . . . . | 37,882,000 |

| Year           | Austria    | Hungary    | Total      |
|----------------|------------|------------|------------|
| 1840 . . . . . | 17,455,000 | 15,380,000 | 32,835,000 |
| 1857 . . . . . | 18,225,000 | 13,769,000 | 31,994,000 |
| 1869 . . . . . | 20,395,000 | 15,416,000 | 35,811,000 |
| 1880 . . . . . | 22,144,000 | 15,738,000 | 37,882,000 |

As regards sex, the Census of 1880 compares with that of 1840 as follows :—

|         | 1840       |            |            |         |         |       |
|---------|------------|------------|------------|---------|---------|-------|
|         | Population |            |            | Ratio   |         |       |
|         | Austria    | Hungary    | Total      | Austria | Hungary | Total |
| Males . | 8,850,000  | 7,560,000  | 16,410,000 | 507     | 491     | 500   |
| Females | 8,605,000  | 7,820,000  | 16,425,000 | 493     | 509     | 500   |
| Total   | 17,455,000 | 15,380,000 | 32,835,000 | 1,000   | 1,000   | 1,000 |

|         | 1880       |            |            |       |       |       |
|---------|------------|------------|------------|-------|-------|-------|
|         |            |            |            |       |       |       |
|         |            |            |            |       |       |       |
| Males . | 10,820,000 | 7,703,000  | 18,523,000 | 489   | 491   | 490   |
| Females | 11,324,000 | 8,035,000  | 19,359,000 | 511   | 509   | 510   |
| Total   | 22,144,000 | 15,738,000 | 37,882,000 | 1,000 | 1,000 | 1,000 |

In 1880 the various nationalities that made up the Empire were:—

| <i>Austria</i>   |           | <i>Hungary</i>  |           |
|------------------|-----------|-----------------|-----------|
| Germans . . .    | 8,009,000 | Magyars . . .   | 6,165,000 |
| Bohemians . . .  | 5,181,000 | Germans . . .   | 1,798,000 |
| Poles . . .      | 3,239,000 | Slovacs . . .   | 1,790,000 |
| Ruthenians . . . | 2,793,000 | Wallacks . . .  | 2,324,000 |
| Various . . .    | 2,922,000 | Croats, &c. . . | 3,661,000 |
| Total . . .      |           | 22,144,000      |           |

The principal cities in 1888 showed as follows:—

|                  |         |               |         |
|------------------|---------|---------------|---------|
| Vienna . . .     | 801,000 | Prague . . .  | 296,000 |
| Buda-Pesth . . . | 443,000 | Lemberg . . . | 110,000 |

The population of Vienna, including the suburbs, has been:—

| Year     | Population | Year     | Population | Year     | Population |
|----------|------------|----------|------------|----------|------------|
| 1754 . . | 175,000    | 1830 . . | 333,000    | 1860 . . | 608,000    |
| 1800 . . | 231,000    | 1840 . . | 357,000    | 1880 . . | 1,104,000  |

## ITALY

Estimates before 1860, and Census returns since then, gave:—

| Year     | Population | Year     | Population | Year     | Population |
|----------|------------|----------|------------|----------|------------|
| 1800 . . | 13,380,000 | 1840 . . | 18,610,000 | 1871 . . | 26,801,000 |
| 1820 . . | 15,790,000 | 1858 . . | 24,860,000 | 1888 . . | 30,565,000 |

The principal cities in 1881 were as follows:—

|            |         |             |         |              |         |
|------------|---------|-------------|---------|--------------|---------|
| Naples . . | 463,000 | Turin . .   | 230,000 | Florence . . | 135,000 |
| Milan . .  | 320,000 | Palermo . . | 206,000 | Venice . .   | 129,000 |
| Rome . .   | 273,000 | Genoa . .   | 138,000 | Bologna . .  | 104,000 |

The population and sexes of Rome were as follows:—

| Period   | Males   | Females | Total   | Males to 100 Females |
|----------|---------|---------|---------|----------------------|
| 1716 . . | 79,900  | 58,100  | 138,000 | 138                  |
| 1777 . . | 89,800  | 73,300  | 163,200 | 123                  |
| 1872 . . | 105,200 | 139,200 | 244,400 | 76                   |

The population of Italy, according to sexes, was as follows:—

|             | Number     |            | Ratio |       |
|-------------|------------|------------|-------|-------|
|             | 1871       | 1881       | 1871  | 1881  |
| Males . .   | 13,472,000 | 14,265,000 | 502   | 501   |
| Females . . | 13,329,000 | 14,195,000 | 498   | 499   |
| Total . .   | 26,801,000 | 28,460,000 | 1,000 | 1,000 |

The population of Milan has grown as follows:—

|          |         |          |         |
|----------|---------|----------|---------|
| 1780 . . | 133,000 | 1871 . . | 261,000 |
| 1848 . . | 195,000 | 1884 . . | 349,000 |

Its great development has been since the expulsion of the Austrians in 1867.

## SPAIN

Official reports gave the population as follows:—

| Year     | Population | Year     | Population | Year     | Population |
|----------|------------|----------|------------|----------|------------|
| 1681 . . | 7,500,000  | 1797 . . | 10,514,000 | 1860 . . | 15,664,000 |
| 1723 . . | 7,625,000  | 1803 . . | 10,351,000 | 1870 . . | 16,799,000 |
| 1769 . . | 9,302,000  | 1821 . . | 11,248,000 | 1877 . . | 16,754,000 |
| 1788 . . | 10,140,000 | 1837 . . | 12,195,000 | 1887 . . | 17,550,000 |

The Census of 1788 showed as follows:—

|               | Male      | Female    | Total      |
|---------------|-----------|-----------|------------|
| Unmarried . . | 2,926,000 | 2,754,000 | 5,680,000  |
| Married . . . | 1,947,000 | 1,943,000 | 3,890,000  |
| Widowed . . . | 282,000   | 470,000   | 752,000    |
| Total . . .   | 5,155,000 | 5,167,000 | 10,322,000 |

The Census of 1877 showed the sexes thus:—

|               |            | Ratio |
|---------------|------------|-------|
| Males . . .   | 8,253,000  | 492   |
| Females . . . | 8,501,000  | 508   |
| Total . . .   | 16,754,000 | 1,000 |

The principal cities were in 1885 as follows:—

|               |         |              |         |
|---------------|---------|--------------|---------|
| Madrid . .    | 387,000 | Valencia . . | 140,000 |
| Barcelona . . | 243,000 | Seville . .  | 131,000 |

## PORTUGAL

Official returns are as follows:—

| Year     | Population | Year     | Population | Year     | Population |
|----------|------------|----------|------------|----------|------------|
| 1732 . . | 1,770,000  | 1850 . . | 3,471,000  | 1878 . . | 4,551,000  |
| 1805 . . | 3,630,000  | 1860 . . | 3,608,000  |          |            |

The population of Lisbon in 1878 was 243,000, and of Oporto 106,000.

The sexes stood thus:—

|               |           | Ratio |
|---------------|-----------|-------|
| Males . . .   | 2,176,000 | 478   |
| Females . . . | 2,375,000 | 522   |
| Total . . .   | 4,551,000 | 1,000 |

## SWEDEN

The Census reports show as follows:—

| Year     | Males     | Females   | Total     | Males to 1000 Females |
|----------|-----------|-----------|-----------|-----------------------|
| 1751 . . | 841,000   | 945,000   | 1,786,000 | 889                   |
| 1772 . . | 968,000   | 1,057,000 | 2,025,000 | 915                   |
| 1790 . . | 1,033,000 | 1,126,000 | 2,159,000 | 918                   |
| 1810 . . | 1,134,000 | 1,244,000 | 2,378,000 | 913                   |
| 1830 . . | 1,391,000 | 1,407,000 | 2,888,000 | 928                   |
| 1850 . . | 1,687,000 | 1,795,000 | 3,482,000 | 940                   |
| 1860 . . | 1,874,000 | 1,985,000 | 3,859,000 | 944                   |
| 1870 . . | 2,047,000 | 2,152,000 | 4,169,000 | 936                   |
| 1888 . . | 2,301,000 | 2,447,000 | 4,748,000 | 941                   |

The ratios of urban and rural population were:—

|           | 1810  | 1830  | 1850  | 1875  | 1886  |
|-----------|-------|-------|-------|-------|-------|
| Urban . . | 94    | 97    | 101   | 140   | 181   |
| Rural . . | 906   | 903   | 899   | 860   | 819   |
| Total . . | 1,000 | 1,000 | 1,000 | 1,000 | 1,000 |

The principal cities in 1888 showed thus:—

|                 |         |                  |         |
|-----------------|---------|------------------|---------|
| Stockholm . . . | 235,000 | Gothenburg . . . | 100,000 |
|-----------------|---------|------------------|---------|

## NORWAY

Official returns give the following population:—

| Year     | Population | Year     | Population | Year     | Population |
|----------|------------|----------|------------|----------|------------|
| 1665 . . | 460,000    | 1825 . . | 1,051,000  | 1865 . . | 1,702,000  |
| 1769 . . | 746,000    | 1845 . . | 1,328,000  | 1875 . . | 1,807,000  |
| 1801 . . | 884,000    | 1855 . . | 1,490,000  | 1885 . . | 1,947,000  |

The ratio of sexes was at various dates as follows:—

|             | 1801  | 1825  | 1845  | 1875  |
|-------------|-------|-------|-------|-------|
| Males . .   | 482   | 485   | 491   | 488   |
| Females . . | 518   | 515   | 509   | 512   |
| Total . .   | 1,000 | 1,000 | 1,000 | 1,000 |

Urban and rural population had the following ratios:—

|             | 1665  | 1801  | 1825  | 1845  | 1865  | 1875  |
|-------------|-------|-------|-------|-------|-------|-------|
| Urban . . . | 80    | 90    | 113   | 123   | 156   | 181   |
| Rural . . . | 920   | 910   | 887   | 877   | 844   | 819   |
| Total . .   | 1,000 | 1,000 | 1,000 | 1,000 | 1,000 | 1,000 |

# POPULATION

449

# POPULATION

The foreign population comprises 37,000, of whom 29,000 are Swedes. Christiania has 130,000 inhabitants.

## DENMARK

The population of Denmark proper was as follows:—

| Year | Population | Year | Population | Year | Population |
|------|------------|------|------------|------|------------|
| 1769 | 786,000    | 1834 | 1,226,000  | 1870 | 1,785,000  |
| 1787 | 840,000    | 1850 | 1,408,000  | 1880 | 1,969,000  |
| 1801 | 926,000    | 1860 | 1,608,000  | 1886 | 2,097,000  |

Previous to 1806 Norway was a province of the Danish monarchy, with 950,000 inhabitants.

In 1866 Denmark was stripped of Sleswig-Holstein, with 900,000 inhabitants. Iceland remains with 60,000 souls, but will soon be depopulated, the inhabitants going to Canada. The distribution of sexes in Denmark in 1880 was as follows:—

|         |           | Ratio |
|---------|-----------|-------|
| Males   | 967,000   | 492   |
| Females | 1,002,000 | 508   |
|         | 1,969,000 | 1,000 |

## BELGIUM

Since the Independence the Census returns show:—

| Year | Population | Year | Population |
|------|------------|------|------------|
| 1830 | 3,780,000  | 1870 | 5,088,000  |
| 1860 | 4,732,000  | 1886 | 5,910,000  |

In 1830 the population was distinguished thus:—

|       |           | Ratio |
|-------|-----------|-------|
| Urban | 998,000   | 245   |
| Rural | 3,006,000 | 755   |
|       | 4,064,000 | 1,000 |

In 1886 the languages spoken were:—

|                    | Inhabitants |
|--------------------|-------------|
| Only Flemish       | 2,485,000   |
| French             | 2,230,000   |
| French and Flemish | 424,000     |
| German and French  | 38,000      |
| Walloon, &c.       | 733,000     |
| Total              | 5,910,000   |

The principal cities in 1886 were as follows:—

|          |         |       |         |
|----------|---------|-------|---------|
| Brussels | 430,000 | Ghent | 145,000 |
| Antwerp  | 205,000 | Liege | 138,000 |

The population of Brussels has more than trebled since 1830, official returns showing:—

|      |         |      |         |
|------|---------|------|---------|
| 1830 | 121,000 | 1863 | 301,000 |
| 1850 | 222,000 | 1884 | 421,000 |

The sexes in Belgium compared as follows:—

|         | 1846      | 1866      | 1887      | Ratio |       |       |
|---------|-----------|-----------|-----------|-------|-------|-------|
|         |           |           |           | 1846  | 1866  | 1887  |
| Males   | 2,164,000 | 2,420,000 | 2,983,000 | 499   | 501   | 499   |
| Females | 2,173,000 | 2,408,000 | 2,992,000 | 501   | 499   | 501   |
| Total   | 4,337,000 | 4,828,000 | 5,975,000 | 1,000 | 1,000 | 1,000 |

The composition of the population of Belgium in 1880 was as follows:—

| Age     | Per 1000 Inhabitants |         |       |
|---------|----------------------|---------|-------|
|         | Males                | Females | Total |
| Under 5 | 61                   | 60      | 121   |
| 5-15    | 105                  | 104     | 209   |
| 15-30   | 122                  | 121     | 243   |
| 30-40   | 62                   | 62      | 124   |
| 40-50   | 53                   | 53      | 106   |
| 50-60   | 43                   | 43      | 86    |
| Over 60 | 53                   | 58      | 111   |
| Total   | 499                  | 501     | 1,000 |

## HOLLAND

Official returns show population as follows (the figure for 1785 apparently including Belgium):—

| Year | Population | Year | Population |
|------|------------|------|------------|
| 1785 | 2,760,000  | 1859 | 3,309,000  |
| 1829 | 2,613,000  | 1869 | 3,580,000  |
| 1839 | 2,861,000  | 1879 | 4,013,000  |
| 1849 | 3,057,000  | 1886 | 4,391,000  |

Sexes compared as follows in 1879 and 1886:—

|         | 1879      | 1886      | Ratio |       |
|---------|-----------|-----------|-------|-------|
|         |           |           | 1879  | 1886  |
| Males   | 1,983,000 | 2,174,000 | 495   | 495   |
| Females | 2,030,000 | 2,217,000 | 505   | 505   |
| Total   | 4,013,000 | 4,391,000 | 1,000 | 1,000 |

In 1886 Amsterdam had 372,000 inhabitants, Rotterdam 174,000, and Hague 139,000.

## SWITZERLAND

Census returns show as follows:—

|      |           |      |           |
|------|-----------|------|-----------|
| 1850 | 2,393,000 | 1880 | 2,846,000 |
| 1870 | 2,669,000 | 1888 | 2,934,000 |

In 1860 and 1880 the ratios of sexes were as follows:—

|         | Number    |           | Ratio |       |
|---------|-----------|-----------|-------|-------|
|         | 1860      | 1880      | 1860  | 1880  |
| Males   | 1,255,000 | 1,395,000 | 495   | 490   |
| Females | 1,280,000 | 1,451,000 | 505   | 510   |
| Total   | 2,535,000 | 2,846,000 | 1,000 | 1,000 |

The languages spoken in 1880 were as follows:—

|         |           | Ratio |
|---------|-----------|-------|
| German  | 2,031,000 | 71.4  |
| French  | 608,000   | 21.3  |
| Italian | 207,000   | 7.3   |
| Total   | 2,846,000 | 100.0 |

## GREECE

According to Beloch, the population of Greece in the year 432 B.C. was as follows:—

|              | Free      | Slaves    | Total     |
|--------------|-----------|-----------|-----------|
| Attica       | 235,000   | 100,000   | 335,000   |
| Sparta       | 230,000   | 175,000   | 405,000   |
| Thessaly     | 460,000   | 250,000   | 710,000   |
| Macedon      | 400,000   | 25,000    | 425,000   |
| Other States | 721,000   | 455,000   | 1,176,000 |
| Total        | 2,046,000 | 1,005,000 | 3,051,000 |

Since the Independence the population of modern Greece shows:—

| Year | Population | Year | Population |
|------|------------|------|------------|
| 1835 | 690,000    | 1870 | 1,458,000  |
| 1853 | 1,042,000  | 1879 | 1,980,000  |
| 1861 | 1,097,000  | 1889 | 2,187,000  |

The sexes in 1879 and 1889 stood thus:—

|         | 1879      | 1889      | Ratio |       |
|---------|-----------|-----------|-------|-------|
|         |           |           | 1879  | 1889  |
| Males   | 881,000   | 1,133,000 | 525   | 515   |
| Females | 799,000   | 1,054,000 | 475   | 485   |
| Total   | 1,680,000 | 2,187,000 | 1,000 | 1,000 |

## TURKEY

In 1840 the population and area of the component States were :—

|                        | Square Miles | Population | Inhabitants per Square Mile |
|------------------------|--------------|------------|-----------------------------|
| Turkey Proper          | 130,000      | 7,100,000  | 55                          |
| Moldavia and Wallachia | 44,000       | 1,420,000  | 32                          |
| Servia                 | 12,000       | 380,000    | 32                          |
| European Turkey        | 186,000      | 8,900,000  | 48                          |
| Asia Minor             | 710,000      | 16,100,000 | 23                          |
| Tripoli                | 360,000      | 1,000,000  | 3                           |
| Egypt                  | 480,000      | 3,100,000  | 6                           |
| Total                  | 1,736,000    | 29,100,000 | ...                         |

Since 1840 Turkey has lost Moldavia, Wallachia, Egypt, Servia, Bulgaria, Bosnia, Herzegovina, Roumelia, &c., and is at present reduced to :—

|                  | Square Miles | Population |
|------------------|--------------|------------|
| Turkey in Europe | 61,000       | 4,490,000  |
| Asia Minor       | 710,000      | 16,133,000 |
| Total            | 771,000      | 20,623,000 |

In 1880 the principal cities were the following :—

|                |         |          |         |
|----------------|---------|----------|---------|
| Constantinople | 874,000 | Damascus | 150,000 |
| Smyrna         | 187,000 | Bagdad   | 100,000 |

In 1888 European Turkey was supposed to have only 4,500,000 inhabitants.

## EGYPT

Without including the outlying dominions, the population of Egypt proper has been officially stated thus :—

|      |           |
|------|-----------|
| 1840 | 3,100,000 |
| 1872 | 5,210,000 |
| 1882 | 6,818,000 |

The last Census showed 499 males to 501 females, viz. :—

|            | Number    |           |           | Per 1000 |         |
|------------|-----------|-----------|-----------|----------|---------|
|            | Males     | Females   | Total     | Males    | Females |
| Egyptians  | 3,222,000 | 3,258,000 | 6,480,000 | 497      | 503     |
| Bedouins   | 131,000   | 116,000   | 247,000   | 530      | 470     |
| Foreigners | 49,000    | 42,000    | 91,000    | 538      | 462     |
| Total      | 3,402,000 | 3,416,000 | 6,818,000 | 499      | 501     |

The population of Cairo and of Alexandria was in 1882 as follows :—

|            | Cairo   | Alexandria |
|------------|---------|------------|
| Natives    | 353,000 | 178,000    |
| Foreigners | 22,000  | 49,000     |
| Total      | 375,000 | 227,000    |

## UNITED STATES

The population of the country now known as the United States was estimated at various periods before Independence, and has been regularly taken in decennial Census since 1790.

| Year | Population | Year | Population | Year | Population |
|------|------------|------|------------|------|------------|
| 1793 | 160,000    | 1800 | 5,308,000  | 1850 | 23,192,000 |
| 1701 | 297,000    | 1810 | 7,240,000  | 1860 | 31,443,000 |
| 1750 | 1,161,000  | 1820 | 9,655,000  | 1870 | 38,558,000 |
| 1775 | 2,803,000  | 1830 | 12,866,000 | 1880 | 50,156,000 |
| 1790 | 3,930,000  | 1840 | 17,063,000 | 1890 | 62,481,000 |

The earliest detailed records of population are as follows :—

|                           | 1701    | 1749      | 1776      | 1790      |
|---------------------------|---------|-----------|-----------|-----------|
| Massachusetts             | 70,000  | 220,000   | 352,000   | 475,000   |
| Connecticut               | 30,000  | 100,000   | 262,000   | 238,000   |
| Rhode Island              | 10,000  | 35,000    | 58,000    | 69,000    |
| New Hampshire             | 10,000  | 30,000    | 102,000   | 228,000   |
| New England               | 120,000 | 385,000   | 774,000   | 1,010,000 |
| New York                  | 30,000  | 100,000   | 260,000   | 340,000   |
| New Jersey                | 15,000  | 60,000    | 150,000   | 184,000   |
| Pennsylvania and Delaware | 20,000  | 250,000   | 401,000   | 494,000   |
| Maryland                  | 25,000  | 85,000    | 255,000   | 320,000   |
| Virginia                  | 75,000  | 200,000   | 516,000   | 748,000   |
| Carolinas, &c.            | 12,000  | 81,000    | 447,000   | 834,000   |
| Middle and South          | 177,000 | 776,000   | 2,029,000 | 2,920,000 |
| Total                     | 297,000 | 1,161,000 | 2,803,000 | 3,930,000 |

Dr. Currie's tables published in 1798 are complete as regards the 18th century, and besides the above he gives figures for the New England States in the preceding century, showing a population of 24,100 souls in 1654, and of 68,400 in 1673. It is to be observed that in the above table the column for 1775 includes 500,000 slaves, and in 1795 likewise 698,000.

The population, according to Tucker and the Census returns, was composed as follows :—

| Year | White, Native | Coloured  | Foreigners | Total      |
|------|---------------|-----------|------------|------------|
| 1800 | 4,262,000     | 1,002,000 | 44,000     | 5,308,000  |
| 1810 | 5,770,000     | 1,377,000 | 93,000     | 7,240,000  |
| 1820 | 7,684,000     | 1,772,000 | 177,000    | 9,633,000  |
| 1830 | 10,178,000    | 2,328,000 | 360,000    | 12,866,000 |
| 1840 | 13,336,000    | 2,874,000 | 859,000    | 17,069,000 |
| 1850 | 17,308,000    | 3,630,000 | 2,245,000  | 23,192,000 |
| 1860 | 22,801,000    | 4,486,000 | 4,139,000  | 31,426,000 |
| 1870 | 28,085,000    | 4,906,000 | 5,567,000  | 38,558,000 |
| 1880 | 36,829,000    | 6,647,000 | 6,680,000  | 50,156,000 |

The increase of population chiefly arose from the surplus of births over deaths, but was materially swelled by the number of European settlers. Tucker's tables down to 1820, and the Census returns since that year, show as follows :—

| Period   | Natural Increase | Immigration Increase | Total      | Ratio of Increase per 1000 Pop. |
|----------|------------------|----------------------|------------|---------------------------------|
| 1801-10  | 1,883,000        | 49,000               | 1,932,000  | 365                             |
| 1811-20  | 2,309,000        | 84,000               | 2,393,000  | 330                             |
| 1821-30  | 3,050,000        | 183,000              | 3,233,000  | 335                             |
| 1831-40  | 3,602,000        | 595,000              | 4,197,000  | 327                             |
| 1841-50  | 4,473,000        | 1,656,000            | 6,129,000  | 359                             |
| 1851-60  | 5,624,000        | 2,627,000            | 8,251,000  | 355                             |
| 1861-70  | 4,820,000        | 2,295,000            | 7,115,000  | 226                             |
| 1871-80  | 8,783,000        | 2,815,000            | 11,598,000 | 301                             |
| 1881-90  | 7,078,000        | 5,247,000            | 12,325,000 | 246                             |
| 90 years | 41,622,000       | 15,551,000           | 57,173,000 | ...                             |

The Census Commissioner believes that the Census returns for 1870 were defective, especially in the Southern States, and that the real returns since 1860 should be read thus :—

| Period  | Natural Increase | Immigration | Total      | Per 1000 |
|---------|------------------|-------------|------------|----------|
| 1861-70 | 6,262,000        | 2,295,000   | 8,557,000  | 272      |
| 1871-80 | 7,341,000        | 2,815,000   | 10,156,000 | 254      |
| 1881-90 | 7,078,000        | 5,247,000   | 12,325,000 | 246      |

Allowing this amendment, as recommended by Commissioner Porter, the ratio of increase in each decade per 1000 inhabitants was as follows :—

|                 | 1801-10 | 1811-20 | 1821-30 | 1831-40 | 1841-50 | 1851-60 | 1861-70 | 1871-80 | 1881-90 |
|-----------------|---------|---------|---------|---------|---------|---------|---------|---------|---------|
| Natural . . . . | 356     | 318     | 316     | 280     | 262     | 242     | 200     | 181     | 141     |
| Immigration . . | 9       | 12      | 19      | 47      | 97      | 114     | 72      | 73      | 105     |
| Total . . . .   | 365     | 330     | 335     | 327     | 359     | 356     | 272     | 254     | 246     |

The various nationalities that composed nearly 15 millions of settlers from 1820 to 1888 stood thus :—

|                  | 1831-50   | 1851-60   | 1861-70   | 1871-80   | 1881-88   | Total      |
|------------------|-----------|-----------|-----------|-----------|-----------|------------|
| Germans . . . .  | 682,000   | 951,000   | 820,000   | 759,000   | 1,104,000 | 4,316,000  |
| Irish . . . . .  | 1,352,000 | 1,013,000 | 723,000   | 450,000   | 536,000   | 4,074,000  |
| British . . . .  | 49,000    | 325,000   | 385,000   | 542,000   | 658,000   | 1,959,000  |
| Scandinavians .  | 5,000     | 25,000    | 136,000   | 261,000   | 412,000   | 839,000    |
| Italians . . . . | ...       | 9,000     | 13,000    | 61,000    | 201,000   | 284,000    |
| French . . . . . | 125,000   | 76,000    | 38,000    | 75,000    | 36,000    | 350,000    |
| Dutch . . . . .  | 5,000     | 11,000    | 10,000    | 18,000    | 151,000   | 195,000    |
| Swiss . . . . .  | 4,000     | 25,000    | 24,000    | 31,000    | 68,000    | 152,000    |
| Various . . . .  | 354,000   | 163,000   | 318,000   | 748,000   | 1,154,000 | 2,737,000  |
| Total . . . .    | 2,576,000 | 2,598,000 | 2,467,000 | 2,945,000 | 4,320,000 | 14,906,000 |

There is a very marked decline of natural increase, which is now only two-thirds of the ratio that prevailed early in the century. The total immigration may be summed up thus :—

| Period            | Number     | Per Annum |
|-------------------|------------|-----------|
| 1654-1701. . . .  | 134,000    | 2,800     |
| 1702-1800. . . .  | 492,000    | 4,950     |
| 1801-20 . . . .   | 178,000    | 8,900     |
| 1821-50 . . . .   | 2,576,000  | 86,000    |
| 1851-80 . . . .   | 8,010,000  | 267,000   |
| 1881-90 . . . .   | 5,247,000  | 540,000   |
| 237 years . . . . | 16,637,000 | ...       |

The number of foreign residents at each Census, and the number of those who died or left the country, are shown in the following table :—

| Census Year | Number Enrolled | Immigrants of Decade | Total     | Number at End of Decade | Missing   |
|-------------|-----------------|----------------------|-----------|-------------------------|-----------|
| 1850        | 2,245,000       | 2,598,000            | 4,843,000 | 4,139,000               | 704,000   |
| 1860        | 4,139,000       | 2,467,000            | 6,606,000 | 5,567,000               | 1,039,000 |
| 1870        | 5,567,000       | 2,945,000            | 8,512,000 | 6,680,000               | 1,832,000 |
| 1880        | 6,680,000       | ...                  | ...       | ...                     | ...       |
| ...         | ...             | ...                  | ...       | ...                     | 3,575,000 |

The number missing at the end of each decade ranged from 15 to 21 per cent.

The loss by death or leaving the country in thirty years ending 1880 is shown as follows :—

|                          | Germans   | Irish     | British   | Various   | Total      |
|--------------------------|-----------|-----------|-----------|-----------|------------|
| Number in 1850 . . . .   | 584,000   | 962,000   | 380,000   | 319,000   | 2,245,000  |
| Arrived, 1851-80 . . . . | 2,530,000 | 2,186,000 | 1,252,000 | 2,042,000 | 8,010,000  |
| Total . . . . .          | 3,114,000 | 3,148,000 | 1,632,000 | 2,361,000 | 10,255,000 |
| Number in 1880 . . . .   | 1,967,000 | 1,855,000 | 916,000   | 1,942,000 | 6,680,000  |
| Loss . . . . .           | 1,147,000 | 1,293,000 | 716,000   | 419,000   | 3,575,000  |

In thirty years 35 per cent. of the total either died or left the country.

The foreign residents found living in the United States at each Census since 1850 were as follows :—

|                  | 1850      | 1860      | 1870      | 1880      |
|------------------|-----------|-----------|-----------|-----------|
| Germans . . . .  | 584,000   | 1,276,000 | 1,691,000 | 1,967,000 |
| Irish . . . . .  | 962,000   | 1,611,000 | 1,856,000 | 1,855,000 |
| British . . . .  | 380,000   | 588,000   | 766,000   | 916,000   |
| Scandinavians .  | 18,000    | 73,000    | 242,000   | 440,000   |
| Italians . . . . | 4,000     | 11,000    | 17,000    | 44,000    |
| French . . . . . | 54,000    | 110,000   | 116,000   | 107,000   |
| Dutch . . . . .  | 10,000    | 28,000    | 47,000    | 58,000    |
| Swiss . . . . .  | 13,000    | 53,000    | 75,000    | 89,000    |
| Various . . . .  | 220,000   | 389,000   | 757,000   | 1,204,000 |
| Total . . . .    | 2,245,000 | 4,139,000 | 5,567,000 | 6,680,000 |

The losses among Germans in the several decades were :—

| Census | Resident  | Immigration | Total     | Number at End of Decade | Missing   |
|--------|-----------|-------------|-----------|-------------------------|-----------|
| 1850   | 584,000   | 951,000     | 1,535,000 | 1,276,000               | 259,000   |
| 1860   | 1,276,000 | 820,000     | 2,096,000 | 1,691,000               | 405,000   |
| 1870   | 1,691,000 | 759,000     | 2,450,000 | 1,967,000               | 483,000   |
| 1880   | 1,967,000 | ...         | ...       | ...                     | ...       |
| ...    | ...       | ...         | ...       | ...                     | 1,147,000 |

The percentage of loss was less than among Irish, as appears from the subjoined table of all nationalities.

The loss in the first decade ending 1860 was 17 per cent., and in the subsequent decades almost 20 per cent.

The tables as regard Irish settlers show as follows:—

| Census | Resident  | Immigration | Total     | Number at End of Decade | Missing   |
|--------|-----------|-------------|-----------|-------------------------|-----------|
| 1850   | 962,000   | 1,013,000   | 1,975,000 | 1,611,000               | 364,000   |
| 1860   | 1,611,000 | 723,000     | 2,334,000 | 1,856,000               | 478,000   |
| 1870   | 1,856,000 | 450,000     | 2,306,000 | 1,855,000               | 451,000   |
| 1880   | 1,855,000 | ...         | ...       | ...                     | ...       |
|        | ...       | ...         | ...       | ...                     | 1,293,000 |

The loss among Irish settlers in the first decade was 18 per cent., in the second 20, and in the third 19 per cent. The war of 1861-65 apparently cost the Union 53,000 German, and 48,000 Irish settlers. According to the Census of 1880, it appeared that for every 100 foreign settlers, of whatever age, there were 124 children born in the country of foreign parents, whereas in 1870 there were only 96. It appears, moreover, that foreign settlers comprise a larger ratio of people of working age than they do of the general population, viz.:—

|                | Population of all Ages |       |       |       |       |       |
|----------------|------------------------|-------|-------|-------|-------|-------|
|                | 1830                   | 1840  | 1850  | 1860  | 1870  | 1880  |
| Americans . .  | 972                    | 950   | 903   | 868   | 856   | 867   |
| Foreigners . . | 28                     | 50    | 97    | 132   | 144   | 133   |
| Total . .      | 1,000                  | 1,000 | 1,000 | 1,000 | 1,000 | 1,000 |

|                | Population between 15 and 60 |       |       |       |       |       |
|----------------|------------------------------|-------|-------|-------|-------|-------|
|                | 1830                         | 1840  | 1850  | 1860  | 1870  | 1880  |
| Americans . .  | 960                          | 928   | 866   | 821   | 807   | 817   |
| Foreigners . . | 40                           | 72    | 134   | 179   | 193   | 183   |
| Total . .      | 1,000                        | 1,000 | 1,000 | 1,000 | 1,000 | 1,000 |

When the American native population would have 100 persons of working age, foreigners have 145.

The percentages of persons of working age in Ameri-

can and in foreign population are shown at each decade thus:—

| Year       | Persons between 15 and 60 Years of Age |                  |                      |
|------------|----------------------------------------|------------------|----------------------|
|            | Of 1000 Americans                      | Of 1000 Settlers | Of 1000 Genera. Pop. |
| 1830 . . . | 504                                    | 750              | 511                  |
| 1840 . . . | 509                                    | 751              | 521                  |
| 1850 . . . | 520                                    | 748              | 543                  |
| 1860 . . . | 520                                    | 748              | 551                  |
| 1870 . . . | 527                                    | 752              | 559                  |
| 1880 . . . | 513                                    | 750              | 544                  |

There was a steady rise until 1870, notwithstanding the war of 1861-65, but the last decade showed a fall, which is explained by the greater number of persons over sixty years of age, who were 56 per 1000 in 1880, against 50 in 1870. It is, nevertheless, surprising to find that the able-bodied ratio among foreign settlers is precisely the same as it was fifty years ago, and has not sensibly varied in the whole period. It has improved remarkably among the American population. If we compare the growth of the three great elements of population between 1850 and 1880, counting the children born of foreign parents as foreigners, and assuming their ratio in 1850 to have been as in 1870—that is, 96 per 100 settlers—we find as follows:—

|                         | 1850       | 1880       | Ratio of Increase, per Cent. |
|-------------------------|------------|------------|------------------------------|
| American whites . .     | 15,152,000 | 28,553,000 | 88                           |
| Coloured population . . | 3,639,000  | 6,647,000  | 83                           |
| Foreign . . . . .       | 4,401,000  | 14,956,000 | 240                          |
| Total . .               | 23,192,000 | 50,156,000 | 116                          |

The aliquot parts of the population, always counting children of foreign parents as foreign, show as follows:—

|                         | 1800  | 1830  | 1840  | 1860  | 1880  |
|-------------------------|-------|-------|-------|-------|-------|
| Americans . . . . .     | 794   | 781   | 733   | 602   | 570   |
| Coloured population . . | 190   | 184   | 169   | 141   | 132   |
| Foreign . . . . .       | 16    | 35    | 98    | 257   | 298   |
| Total . .               | 1,000 | 1,000 | 1,000 | 1,000 | 1,000 |

The growth of the white American and of the coloured population, in intervals of twenty years, is shown thus:—

| Year           | Number     |           | Increase  |           | Rate of Increase    |                     |
|----------------|------------|-----------|-----------|-----------|---------------------|---------------------|
|                | American   | Coloured  | American  | Coloured  | American, per Cent. | Coloured, per Cent. |
| 1800 . . . . . | 4,220,000  | 1,002,000 | ...       | ...       | ...                 | ...                 |
| 1820 . . . . . | 7,514,000  | 1,772,000 | 3,294,000 | 770,000   | 78                  | 77                  |
| 1840 . . . . . | 12,511,000 | 2,874,000 | 4,997,000 | 1,102,000 | 67                  | 62                  |
| 1860 . . . . . | 18,827,000 | 4,486,000 | 6,316,000 | 1,612,000 | 51                  | 56                  |
| 1880 . . . . . | 28,553,000 | 6,647,000 | 9,726,000 | 2,161,000 | 52                  | 48                  |

The white American race increased faster than the coloured, except during the interval of 1841-60.

The total increase during eighty years was:—

|                               |               |
|-------------------------------|---------------|
| American whites . . . . .     | 576 per cent. |
| Coloured population . . . . . | 564 per cent. |

The difference is small, but the figures show conclusively that the white American race has no tendency to die out, as often stated.

The rate of increase has, however, declined very notably since 1820, both among whites and blacks, especially the latter, that among whites having been nearly stationary since 1840.

In considering the ratios of the sexes, we find the preponderance of males was very great in 1860, the year before the war, and the lowest in 1870. If the ratio in the latter year were the same as in 1860, there would have been 19,900,000 males, instead of 19,550,000. This shows a loss of 350,000 males, which may be set down as the blood-cost of the war.

It will be seen from the preceding tables that the white American population in 1880 was 28,553,000, or 57 per cent. of the total. This, however, supposes the grandchildren of European settlers to be of American race, which is not strictly true.

[illegible]

The following table shows the population of each State at three distinct periods :—

|                    | 1800      | 1840       | 1880       | 1890       |
|--------------------|-----------|------------|------------|------------|
| New York . . .     | 589,000   | 2,429,000  | 5,083,000  | 5,982,000  |
| Pennsylvania . .   | 602,000   | 1,724,000  | 4,283,000  | 5,249,000  |
| Ohio . . .         | 45,000    | 1,519,000  | 3,198,000  | 3,667,000  |
| Illinois . . .     | ...       | 476,000    | 3,078,000  | 3,819,000  |
| Missouri . . .     | ...       | 384,000    | 2,168,000  | 2,677,000  |
| Indiana . . .      | 6,000     | 686,000    | 1,978,000  | 2,189,000  |
| Massachusetts . .  | 423,000   | 738,000    | 1,783,000  | 2,233,000  |
| Kentucky . . .     | 221,000   | 780,000    | 1,649,000  | 1,855,000  |
| Michigan . . .     | ...       | 212,000    | 1,637,000  | 2,090,000  |
| Iowa . . .         | ...       | 43,000     | 1,625,000  | 1,907,000  |
| Texas . . .        | ...       | ...        | 1,592,000  | 2,232,000  |
| Tennessee . . .    | 106,000   | 829,000    | 1,542,000  | 1,764,000  |
| Georgia . . .      | 163,000   | 691,000    | 1,542,000  | 1,834,000  |
| Virginia . . .     | 880,000   | 1,240,000  | 1,513,000  | 1,649,000  |
| North Carolina . . | 478,000   | 753,000    | 1,399,000  | 1,617,000  |
| Wisconsin . . .    | ...       | 31,000     | 1,315,000  | 1,684,000  |
| Alabama . . .      | ...       | 591,000    | 1,263,000  | 1,508,000  |
| Mississippi . . .  | 9,000     | 376,000    | 1,132,000  | 1,285,000  |
| New Jersey . . .   | 211,000   | 373,000    | 1,131,000  | 1,441,000  |
| Kansas . . .       | ...       | ...        | 996,000    | 1,423,000  |
| South Carolina . . | 346,000   | 594,000    | 996,000    | 1,147,000  |

| California . . .   | ...       | ...        | 865,000    | 1,204,000  |
| Arkansas . . .     | ...       | 98,000     | 803,000    | 1,125,000  |
| Minnesota . . .    | ...       | ...        | 781,000    | 1,300,000  |
| Maine . . .        | 152,000   | 502,000    | 649,000    | 660,000    |
| Connecticut . . .  | 251,000   | 310,000    | 623,000    | 746,000    |
| West Virginia . .  | ...       | ...        | 618,000    | 760,000    |
| Nebraska . . .     | ...       | ...        | 452,000    | 1,057,000  |
| New Hampshire . .  | 184,000   | 285,000    | 347,000    | 376,000    |
| Vermont . . .      | 154,000   | 292,000    | 332,000    | 332,000    |
| Rhode Island . . . | 69,000    | 109,000    | 277,000    | 345,000    |
| Delaware . . .     | 64,000    | 78,000     | 147,000    | 168,000    |
| Florida . . .      | ...       | 54,000     | 269,000    | 390,000    |
| Colorado . . .     | ...       | ...        | 194,000    | 411,000    |
| Oregon . . .       | ...       | ...        | 175,000    | 312,000    |
| Utah . . .         | ...       | ...        | 144,000    | 206,000    |
| Dakota . . .       | ...       | ...        | 135,000    | 510,000    |
| Territories . . .  | 13,000    | 50,000     | 564,000    | 1,169,000  |
| The Union . . .    | 5,308,000 | 17,069,000 | 50,153,000 | 62,480,000 |

The principal cities showed at various dates thus :—

| Year       | New York  | Philadelphia | Boston  | Baltimore | New Orleans | Cincinnati | Chicago |
|------------|-----------|--------------|---------|-----------|-------------|------------|---------|
| 1730 . . . | 8,600     | 12,000       | 11,500  | ...       | ...         | ...        | ...     |
| 1750 . . . | 10,000    | 18,000       | 14,000  | ...       | ...         | ...        | ...     |
| 1790 . . . | 33,000    | 44,000       | 18,000  | 13,800    | ...         | ...        | ...     |
| 1800 . . . | 60,000    | 69,000       | 25,000  | 26,000    | ...         | ...        | ...     |
| 1810 . . . | 96,000    | 95,000       | 33,000  | 36,000    | 17,000      | 3,000      | ...     |
| 1820 . . . | 124,000   | 113,000      | 43,000  | 63,000    | 27,000      | 10,000     | ...     |
| 1830 . . . | 203,000   | 161,000      | 61,000  | 81,000    | 46,000      | 25,000     | ...     |
| 1840 . . . | 313,000   | 220,000      | 93,000  | 102,000   | 102,000     | 46,000     | 4,300   |
| 1850 . . . | 516,000   | 340,000      | 137,000 | 169,000   | 116,000     | 115,000    | 30,000  |
| 1860 . . . | 814,000   | 568,000      | 178,000 | 214,000   | 171,000     | 160,000    | 109,000 |
| 1870 . . . | 942,000   | 674,000      | 251,000 | 267,000   | 191,000     | 216,000    | 299,000 |
| 1880 . . . | 1,207,000 | 847,000      | 363,000 | 332,000   | 216,000     | 256,000    | 503,000 |
| 1888 . . . | 1,493,000 | 1,017,000    | ...     | ...       | ...         | ...        | ...     |

## AUSTRALIA

The population was at various dates as follows :—

|            |         |            |           |
|------------|---------|------------|-----------|
| 1800 . . . | 6,500   | 1860 . . . | 1,224,000 |
| 1820 . . . | 35,600  | 1870 . . . | 1,900,000 |
| 1840 . . . | 257,000 | 1880 . . . | 2,725,000 |
| 1850 . . . | 510,000 | 1888 . . . | 3,672,000 |

The ratio of increase was :—

|               |               |
|---------------|---------------|
| 1851-60 . . . | 140 per cent. |
| 1861-70 . . . | 55 "          |
| 1871-80 . . . | 43 "          |
| 1881-88 . . . | 33 "          |

Dividing the Union into four great sections, the population stood thus at each Census :—

| Year | New England | Middle States | South      | West       | Total      |
|------|-------------|---------------|------------|------------|------------|
| 1790 | 1,010,000   | 1,342,000     | 1,580,000  | ...        | 3,932,000  |
| 1800 | 1,233,000   | 1,807,000     | 2,214,000  | 54,000     | 5,308,000  |
| 1810 | 1,472,000   | 2,479,000     | 2,997,000  | 292,000    | 7,240,000  |
| 1820 | 1,659,000   | 3,194,000     | 3,932,000  | 849,000    | 9,634,000  |
| 1830 | 1,954,000   | 4,138,000     | 5,164,000  | 1,610,000  | 12,866,000 |
| 1840 | 2,236,000   | 5,088,000     | 6,367,000  | 3,378,000  | 17,069,000 |
| 1850 | 2,724,000   | 6,593,000     | 8,288,000  | 5,587,000  | 23,192,000 |
| 1860 | 3,145,000   | 8,294,000     | 10,297,000 | 9,707,000  | 31,443,000 |
| 1870 | 3,506,000   | 9,770,000     | 11,330,000 | 13,952,000 | 38,558,000 |
| 1880 | 4,010,000   | 11,757,000    | 15,254,000 | 19,135,000 | 50,156,000 |
| 1890 | 4,691,000   | 14,110,000    | 18,283,000 | 25,396,000 | 62,480,000 |

At the beginning of the century there were only four towns that had more than 20,000 inhabitants : in 1880 there were 102, viz :—

| Population          | 1800 | 1830 | 1840 | 1860 | 1880 |
|---------------------|------|------|------|------|------|
| Over 100,000 . . .  | 0    | 2    | 1    | 9    | 20   |
| 50 to 100,000 . . . | 2    | 1    | 4    | 9    | 16   |
| 20 to 50,000 . . .  | 2    | 2    | 16   | 25   | 66   |
| Total . . .         | 4    | 5    | 21   | 43   | 102  |

The aggregate of urban compared with total population in the United States was as follows :—

|            | Urban     | Total      | Ratio of Urban |
|------------|-----------|------------|----------------|
| 1800 . . . | 340,000   | 5,310,000  | 6.4            |
| 1820 . . . | 460,000   | 9,640,000  | 4.8            |
| 1840 . . . | 1,550,000 | 17,070,000 | 9.1            |
| 1860 . . . | 4,240,000 | 31,440,000 | 13.5           |
| 1880 . . . | 9,160,000 | 50,310,000 | 18.2           |

The urban class comprises only towns over 20,000 population.

The several Colonies since 1850 stood thus :—

|              | 1850    | 1860      | 1870      | 1880      | 1888      |
|--------------|---------|-----------|-----------|-----------|-----------|
| N. S. Wales  | 189,000 | 349,000   | 499,000   | 742,000   | 1,086,000 |
| Victoria . . | 76,000  | 538,000   | 727,000   | 860,000   | 1,091,000 |
| S. Australia | 99,000  | 124,000   | 184,000   | 268,000   | 313,000   |
| Tasmania . . | 70,000  | 88,000    | 101,000   | 115,000   | 146,000   |
| New Zealand  | 63,000  | 79,000    | 248,000   | 485,000   | 607,000   |
| Queensland   | ...     | 28,000    | 116,000   | 226,000   | 387,000   |
| W. Australia | 13,000  | 16,000    | 25,000    | 29,000    | 42,000    |
| Total . . .  | 510,000 | 1,222,000 | 1,900,000 | 2,725,000 | 3,672,000 |

Mr. Coghlan compares 1860 and 1888, to show the natural increase from excess of births over deaths, and the net immigration into each Colony in that interval, viz. :-

|                        | 1860-1888        |             |                |
|------------------------|------------------|-------------|----------------|
|                        | Natural Increase | Immigration | Total Increase |
| New South Wales . . .  | 415,000          | 322,000     | 737,000        |
| Victoria . . . . .     | 431,000          | 122,000     | 553,000        |
| South Australia . . .  | 150,000          | 39,000      | 189,000        |
| Tasmania . . . . .     | 53,000           | 5,000       | 58,000         |
| New Zealand . . . . .  | 262,000          | 266,000     | 528,000        |
| Queensland . . . . .   | 103,000          | 256,000     | 359,000        |
| West Australia . . . . | 13,000           | 13,000      | 26,000         |
| Total . . . . .        | 1,427,000        | 1,023,000   | 2,450,000      |

The Census of 1881 showed the population to be compared thus :-

|            | Total | N. S. Wales | Victoria | South Australia | Tasmania | New Zealand | Queensland | Western Australia |
|------------|-------|-------------|----------|-----------------|----------|-------------|------------|-------------------|
| Australian | 60.8  | 62.2        | 57.9     | 59.8            | 69.1     | 45.6        | 40.4       | 59.8              |
| English    | 18.2  | 14.7        | 17.1     | 21.1            | 15.0     | 24.7        | 17.5       | 22.8              |
| Irish      | 9.6   | 9.2         | 10.1     | 6.5             | 6.2      | 10.1        | 13.3       | 10.0              |
| Scotch     | 5.5   | 3.3         | 5.6      | 3.8             | 3.2      | 10.8        | 4.6        | 2.5               |
| Various    | 5.9   | 10.6        | 9.3      | 8.8             | 6.5      | 8.8         | 24.2       | 4.9               |
| Total      | 100.0 | 100.0       | 100.0    | 100.0           | 100.0    | 100.0       | 100.0      | 100.0             |

The ratio of sexes since 1861 showed as follows :-

|         | Number    |           |           | Ratio |       |       |
|---------|-----------|-----------|-----------|-------|-------|-------|
|         | 1861      | 1871      | 1887      | 1861  | 1871  | 1887  |
| Males   | 731,000   | 1,094,000 | 1,929,000 | 576   | 552   | 543   |
| Females | 536,000   | 885,000   | 1,622,000 | 424   | 448   | 457   |
| Total   | 1,267,000 | 1,979,000 | 3,551,000 | 1,000 | 1,000 | 1,000 |

The disparity of the sexes is diminishing year by year. It is nevertheless more remarkable in some of the Colonies than in others, the figures for 1887 being as follows :-

|                   | Males     | Females   | Females to 100 Males |
|-------------------|-----------|-----------|----------------------|
| New South Wales   | 574,000   | 469,000   | 82                   |
| Victoria          | 550,000   | 486,000   | 88                   |
| South Australia   | 165,000   | 152,000   | 92                   |
| Western Australia | 24,000    | 17,000    | 71                   |
| Tasmania          | 76,000    | 66,000    | 88                   |
| New Zealand       | 325,000   | 279,000   | 86                   |
| Queensland        | 215,000   | 153,000   | 74                   |
| Total             | 1,929,000 | 1,622,000 | 84                   |

Mr. Coghlan gives the male population of working age (20 to 60) in the seven Colonies as follows :-

|                         | Ratio   |
|-------------------------|---------|
| Victoria . . . . .      | 211,000 |
| New South Wales . . .   | 200,000 |
| New Zealand . . . . .   | 135,000 |
| South Australia . . . . | 74,000  |
| Queensland . . . . .    | 69,000  |
| Tasmania . . . . .      | 26,000  |
| Western Australia . . . | 9,000   |
| Total . . . . .         | 724,000 |

The population of the cities has been as follows :-

|            | 1841   | 1861    | 1871    | 1881    | 1889      |
|------------|--------|---------|---------|---------|-----------|
| Melbourne  | 4,000  | 140,000 | 207,000 | 283,000 | 458,000   |
| Sydney     | 39,000 | 94,000  | 135,000 | 224,000 | 382,000   |
| Adelaide   | 5,000  | 18,000  | 60,000  | 104,000 | 122,000   |
| Brisbane   | ...    | 6,000   | 15,000  | 31,000  | 87,000    |
| Auckland   | ...    | 10,000  | 30,000  | 50,000  | 62,000    |
| Wellington | ...    | 5,000   | 10,000  | 21,000  | 33,000    |
| Hobart     | 10,000 | 19,000  | 19,000  | 21,000  | 35,000    |
| Perth      | 2,000  | 3,000   | 5,000   | 6,000   | 9,000     |
| Total      | 60,000 | 295,000 | 481,000 | 740,000 | 1,188,000 |

There are twenty minor towns, with an aggregate population of 355,000 souls, making a total urban population of 1,543,000, or 40 per cent. of the total.

#### CANADA

The population of Canada, including Nova Scotia, Newfoundland, &c., has been as follows :-

| Year | Population | Year | Population | Year | Population |
|------|------------|------|------------|------|------------|
| 1665 | 3,200      | 1800 | 476,000    | 1860 | 3,360,000  |
| 1695 | 13,700     | 1820 | 840,000    | 1870 | 3,830,000  |
| 1726 | 29,400     | 1830 | 910,000    | 1880 | 4,500,000  |
| 1736 | 39,000     | 1840 | 1,690,000  | 1887 | 5,020,000  |

The Census of 1881 showed the population of Canada thus :-

|                  | Number    | Ratio |
|------------------|-----------|-------|
| French Canadians | 1,209,000 | 30.0  |
| Irish            | 957,000   | 22.2  |
| English          | 881,000   | 20.4  |
| Scotch           | 700,000   | 16.2  |
| Germans          | 254,000   | 5.9   |
| Indians          | 109,000   | 2.5   |
| Various          | 125,000   | 3.0   |
| Total            | 4,325,000 | 100.0 |
| Males            | 2,189,000 | 506   |
| Females          | 2,136,000 | 494   |
| Total            | 4,325,000 | 1,000 |

#### MEXICO

The Census of 1882 showed as follows :-

| Sex               | Ratio      | Race                | Ratio      |
|-------------------|------------|---------------------|------------|
| Males . . . . .   | 5,070,000  | White . . . . .     | 1,980,000  |
| Females . . . . . | 5,375,000  | Indian, &c. . . . . | 8,465,000  |
| Total             | 10,445,000 | Total               | 10,445,000 |

The city of Mexico has 350,000, Puebla 112,000 inhabitants. An official return in 1837 gave the population of Mexico as 7,557,000, and another in 1857 as 7,995,000.

#### CHILE

According to Census returns the population was :-

|      |           |
|------|-----------|
| 1865 | 1,811,000 |
| 1875 | 2,076,000 |
| 1885 | 2,548,000 |

The Census of 1885 was as follows :-

|                   | Ratio     |
|-------------------|-----------|
| Males . . . . .   | 1,284,000 |
| Females . . . . . | 1,264,000 |
| Total             | 2,548,000 |

Santiago had 189,000, Valparaiso 105,000 inhabitants. There were 87,000 foreign residents, including 35,000 Peruvians, 13,000 Bolivians, 7000 Germans, and 4000 Italians.

## BRAZIL

The Census of 1883 compares with that of 1872 thus :—

|                  | 1872      | 1888       |
|------------------|-----------|------------|
| Free . . . . .   | 8,420,000 | 10,684,000 |
| Slaves . . . . . | 1,511,000 | 1,319,000  |
| Total . . . . .  | 9,931,000 | 12,003,000 |

The sexes in 1872 stood as follows :—

|                   | Free      | Slaves    | Total     | Ratio |        |       |
|-------------------|-----------|-----------|-----------|-------|--------|-------|
|                   |           |           |           | Free  | Slaves | Total |
| Males . . . . .   | 4,319,000 | 805,000   | 5,124,000 | 503   | 533    | 516   |
| Females . . . . . | 4,101,000 | 706,000   | 4,807,000 | 497   | 467    | 484   |
| Total . . . . .   | 8,420,000 | 1,511,000 | 9,931,000 | 1,000 | 1,000  | 1,000 |

In 1872 there were 244,000 foreign residents, including 121,000 Portuguese, 46,000 Germans, besides Italians, French, &c.

The population was classified thus :—

|                            |           | Ratio |
|----------------------------|-----------|-------|
| Europeans . . . . .        | 244,000   | 2.5   |
| White Brazilians . . . . . | 3,543,000 | 35.7  |
| Mulattoes . . . . .        | 3,802,000 | 38.2  |
| Negroes . . . . .          | 1,954,000 | 19.6  |
| Indians . . . . .          | 388,000   | 4.0   |
| Total . . . . .            | 9,931,000 | 100.0 |

## ARGENTINA

The population has trebled in thirty years, viz. :—

|                           | 1867      | 1869      | 1886      |
|---------------------------|-----------|-----------|-----------|
| Buenos Ayres . . . . .    | 277,000   | 495,000   | 1,085,000 |
| Upper Provinces . . . . . | 883,000   | 1,342,000 | 2,009,000 |
| Total . . . . .           | 1,160,000 | 1,837,000 | 3,094,000 |

Estimates for 1886 compare with the Census returns of 1869 as follows :—

|                             | Number    |           | Ratio |       |
|-----------------------------|-----------|-----------|-------|-------|
|                             | 1869      | 1886      | 1869  | 1886  |
| Italians . . . . .          | 71,000    | 530,000   | 3.8   | 17.1  |
| French . . . . .            | 32,000    | 120,000   | 1.8   | 3.9   |
| Spaniards . . . . .         | 34,000    | 140,000   | 1.9   | 4.5   |
| British and Irish . . . . . | 11,000    | 30,000    | 0.6   | 1.0   |
| Germans, Swiss, &c. . . . . | 64,000    | 100,000   | 3.5   | 3.2   |
| Argentines . . . . .        | 1,625,000 | 2,174,000 | 88.4  | 70.3  |
| Total . . . . .             | 1,837,000 | 3,094,000 | 100.0 | 100.0 |

In 1869 the sexes stood thus :—

|                   | Ratio     |
|-------------------|-----------|
| Males . . . . .   | 858,000   |
| Females . . . . . | 846,000   |
| Total . . . . .   | 1,744,000 |

In 1886 the population appears to have been composed as follows :—

|                                | Ratio     |
|--------------------------------|-----------|
| Europeans . . . . .            | 920,000   |
| Children of settlers . . . . . | 1,250,000 |
| Argentines . . . . .           | 924,000   |
| Total . . . . .                | 3,094,000 |

A Census taken in the city of Buenos Ayres in 1887 showed 435,000 inhabitants, against 178,000 in 1869.

## CHINA

According to different authorities we find as follows :—

| Year           | Population  | Year           | Population  |
|----------------|-------------|----------------|-------------|
| 1736 . . . . . | 125,046,000 | 1812 . . . . . | 360,280,000 |
| 1792 . . . . . | 307,467,000 | 1877 . . . . . | 381,600,000 |

Probably the figures for 1736 were much too low, or applied only to a part of the Empire. The population of eight cities in 1877 was stated thus :—

|                    |           |                      |         |
|--------------------|-----------|----------------------|---------|
| Pekin . . . . .    | 1,600,000 | Shanghai . . . . .   | 355,000 |
| Canton . . . . .   | 1,600,000 | Ningpo . . . . .     | 240,000 |
| Tientsin . . . . . | 950,000   | Takao . . . . .      | 235,000 |
| Hankow . . . . .   | 750,000   | Tchinkiang . . . . . | 135,000 |
| Foochoo . . . . .  | 630,000   |                      |         |

The number of foreign residents is only 6000, of whom 2500 are British, 800 Americans, 600 Germans, and 400 French.

The occupations of the natives are as follows :—

| Per 1000 of the Population |     |                       |     |
|----------------------------|-----|-----------------------|-----|
| Agriculture . . . . .      | 100 | Bricklayers . . . . . | 10  |
| Washing . . . . .          | 10  | Carpenters . . . . .  | 10  |
|                            |     | Blacksmiths . . . . . | 7   |
|                            |     | Sundry . . . . .      | 863 |

## JAPAN

The Census of 1888 showed as follows :—

|                   | Ratio      |
|-------------------|------------|
| Males . . . . .   | 20,008,000 |
| Females . . . . . | 19,599,000 |
| Total . . . . .   | 39,607,000 |

There were 7,803,600 houses, and 7,420,000 married couples.

The principal cities are as follows :—

|                 | Population |                  | Population |
|-----------------|------------|------------------|------------|
| Tokio . . . . . | 903,000    | Kioto . . . . .  | 255,000    |
| Osaka . . . . . | 353,000    | Nagoya . . . . . | 127,000    |

There are 3000 foreign residents including 1400 British and 600 Americans.

## POST-OFFICE

The total traffic in 1888 may be approximately summed up thus :—

|                            | Millions          |             |        | Postal Revenue, £ |
|----------------------------|-------------------|-------------|--------|-------------------|
|                            | Letters and Cards | Papers, &c. | Total  |                   |
| United Kingdom . . . . .   | 1,759             | 542         | 2,363  | 11,200,000        |
| Continent . . . . .        | 3,727             | 3,147       | 6,874  | 31,200,000        |
| United States . . . . .    | 2,300             | 4,728       | 7,028  | 11,700,000        |
| South America . . . . .    | 125               | 105         | 230    | 1,100,000         |
| British Colonies . . . . . | 570               | 210         | 780    | 3,200,000         |
| Various . . . . .          | 146               | 27          | 173    | 700,000           |
| Total . . . . .            | 8,569             | 8,759       | 17,448 | 59,100,000        |

In the above postal revenue are included, moreover, the receipts for telegraphic service, except in the case of the United States and those other countries where the telegraphs are mostly owned by companies.

Postal traffic increased 95 per cent. in seven years, viz. :—

|                            | Millions of Letters, Papers, &c. |        |
|----------------------------|----------------------------------|--------|
|                            | 1881                             | 1888   |
| United Kingdom . . . . .   | 1,682                            | 2,363  |
| Continental . . . . .      | 4,536                            | 6,874  |
| United States . . . . .    | 2,243                            | 7,028  |
| British Colonies . . . . . | 287                              | 780    |
| South America . . . . .    | 54                               | 230    |
| Various . . . . .          | 86                               | 173    |
| Total . . . . .            | 8,888                            | 17,448 |

The following table gives a general view of the traffic in 1888, or latest year published:—

|             | Millions |       |        |          |        | Average per Inhabitant | Postal Revenue, £ |
|-------------|----------|-------|--------|----------|--------|------------------------|-------------------|

| The World   | 7,762    | 865   | 3,886  | 4,935    | 17,448 | 25                     | ...               |

In the preceding table post-cards are in many cases included with letters. As regards the United States, the official table gives no more than the total of letters, papers, and parcels, but the figures given above may be taken as a fair estimate, the returns for 1881 having shown 1155 million letters and cards and 761 million newspapers.

A summary of postal traffic in Europe in 1883 was published at Florence in 1885, which compares with the figures given above for 1888 as follows:—

| Year | Millions |       |        |          |       | Postal Revenue, £ |
|------|----------|-------|--------|----------|-------|-------------------|
|      | Letters  | Cards | Papers | Sundries | Total |                   |
| 1883 | 3,683    | 546   | 1,672  | 1,046    | 6,947 | 38,150,000        |
| 1888 | 4,681    | 805   | 2,091  | 1,660    | 9,237 | 42,500,000        |

In 1883 there were in Europe 65,500 post-offices, 41,150 telegraph offices, and 225,000 letter-boxes. The postal service employed 356,000 men, and carried (Europe only) 800,000 tons of letters, papers, &c., according to the Florentine writer. In 1879 there were, says Fischer, 70 regular lines of mail-steamers, 26 British, 11 German, 11 French, 6 Dutch, 6 American, 5 Italian, and 5 Austrian. The amount represented by money orders transmitted through countries of the Postal Union in 1887 was 480

millions sterling; the value of goods sent through the parcel-post, 540 millions sterling.

Telegraphs have increased in late years with great rapidity, as shown thus:—

|                  | Miles  |         |         | Messages, Millions |      |
|------------------|--------|---------|---------|--------------------|------|
|                  | 1858   | 1870    | 1888    | 1870               | 1888 |
| United Kingdom   | 10,000 | 24,000  | 30,700  | 10                 | 58   |
| France           | 8,000  | 25,600  | 58,500  | 6                  | 28   |
| Germany          | 9,500  | 20,400  | 57,700  | 9                  | 24   |
| Russia           | 5,000  | 29,200  | 92,700  | 3                  | 11   |
| Austria          | 6,500  | 22,000  | 38,200  | 5                  | 13   |
| Italy            | 2,500  | 11,100  | 21,100  | 2                  | 9    |
| Spain & Portugal | 1,000  | 9,000   | 14,700  | 2                  | 5    |
| Scandinavia      | 2,400  | 9,000   | 14,500  | 2                  | 5    |

| Cape Colony      | ...    | 600     | 4,400   | ...                | 1    |
| Various          | ...    | 400     | 3,500   | ...                | 1    |
| The World        | 99,800 | 281,000 | 767,800 | 62                 | 266  |

The following is the summary of a report published in 1886 on the progress of telegraphs in Europe only, from 1860 to 1885:—

| Year | Miles   | Offices | Messages    |
|------|---------|---------|-------------|
| 1860 | 78,000  | 3,500   | 9,000,000   |
| 1865 | 110,000 | 7,800   | 21,000,000  |
| 1870 | 170,000 | 13,400  | 39,000,000  |
| 1875 | 210,000 | 26,100  | 79,000,000  |
| 1880 | 260,000 | 34,000  | 90,000,000  |
| 1885 | 315,000 | 45,000  | 118,000,000 |

The number of messages for 1870 is too low; perhaps official messages were not counted; but even this would not wholly explain the deficit. According to Mr. Preece, the telegraph system of the world in 1886 was summed up thus:—

|                   | Miles   | Cost, £    |
|-------------------|---------|------------|
| Land lines        | 714,000 | 51,700,000 |
| Company cables    | 107,550 | 36,000,000 |
| Government cables | 12,520  | 3,700,000  |
| Total             | 834,070 | 91,400,000 |

In 1888 the mileage was considerably higher, and at the value expressed above would stand thus:—

|            | Miles   | Cost, £    |
|------------|---------|------------|
| Land lines | 768,000 | 55,500,000 |
| 950 cables | 132,000 | 44,000,000 |
| Total      | 900,000 | 99,500,000 |

Mr. Preece shows that the maximum speed of transmission has been thus :—

| Year           | Words per Minute |
|----------------|------------------|
| 1870 . . . . . | 80               |
| 1880 . . . . . | 200              |
| 1885 . . . . . | 350              |
| 1887 . . . . . | 600              |

Six messages can now go on one wire simultaneously.

The time occupied in sending a message from London to various parts of the world is as follows :—

| To               | Minutes | To                  | Minutes |
|------------------|---------|---------------------|---------|
| Egypt . . . . .  | 20      | China . . . . .     | 120     |
| Bombay . . . . . | 50      | Australia . . . . . | 160     |

The following table shows the number of post and telegraph offices, of employees, the average receipt on each telegram, and on every 100 letters or papers sent :—

|                       | Post-Offices | Telegraph Offices | Em-<br>ployees | Tele-<br>grams | Per 100<br>Letters,<br>&c. |
|-----------------------|--------------|-------------------|----------------|----------------|----------------------------|
|                       | 1888         | 1888              | 1881           | Pence          | Pence                      |
| U. Kingdom            | 17,800       | 7,030             | 74,000         | 8              | 88                         |
| France . . . . .      | 6,930        | 8,000             | 49,000         | 9              | 88                         |
| Germany . . . . .     | 20,660       | 13,400            | 79,000         | 12             | 82                         |
| Russia . . . . .      | 5,430        | 3,780             | 15,000         | 22             | 111                        |
| Austria . . . . .     | 8,670        | 5,240             | 19,000         | 12             | 87                         |
| Italy . . . . .       | 5,300        | 4,060             | 16,000         | 16             | 86                         |
| Spain . . . . .       | 3,070        | 950               | 7,400          | 16             | ...                        |
| Portugal . . . . .    | 1,640        | 275               | 1,300          | 10             | ...                        |
| Scandinavia . . . . . | 3,770        | 1,560             | 5,700          | 11             | 67                         |

## UNITED KINGDOM

The importance of the post-office at successive dates may be judged by its receipts, viz. :—

| Year           | Receipts, £ | Pence<br>per Inhabitant |
|----------------|-------------|-------------------------|
| 1663 . . . . . | 22,000      | 1                       |
| 1685 . . . . . | 65,000      | 3                       |
| 1707 . . . . . | 111,000     | 5                       |
| 1744 . . . . . | 235,000     | 7                       |
| 1790 . . . . . | 480,000     | 12                      |
| 1835 . . . . . | 2,353,000   | 22                      |
| 1889 . . . . . | 10,340,000  | 66                      |

The following were the charges on letters at three distinct epochs :—

| London to             | Pence |      |      |
|-----------------------|-------|------|------|
|                       | 1645  | 1835 | 1889 |
| York . . . . .        | 6     | 11   | 1    |
| Edinburgh . . . . .   | 8     | 13   | 1    |
| Dublin . . . . .      | ...   | 16   | 1    |
| Madrid . . . . .      | ...   | 26   | 2½   |
| New York . . . . .    | ...   | 26   | 2½   |
| Rio Janeiro . . . . . | ...   | 42   | 4    |

The inland postal tariff from 1710 to 1840 was as follows :—

| Miles              | Pence |      |         |
|--------------------|-------|------|---------|
|                    | 1710  | 1783 | 1812-40 |
| Under 15 . . . . . | 3     | 2    | 4       |
| 15-30 . . . . .    | 3     | 3    | 5       |
| 30-50 . . . . .    | 3     | 4    | 7       |
| 50-80 . . . . .    | 3     | 4    | 8       |
| 80-120 . . . . .   | 4     | 5    | 9       |
| Over 120 . . . . . | 4     | 6    | 10-16   |

The number of letters yearly passing through the United Kingdom was :—

| Year              | Millions Yearly Average |          |         |       |
|-------------------|-------------------------|----------|---------|-------|
|                   | England                 | Scotland | Ireland | Total |
| 1839 . . . . .    | 65                      | 8        | 9       | 82    |
| 1841-45 . . . . . | 179                     | 24       | 24      | 227   |
| 1851-55 . . . . . | 330                     | 41       | 39      | 410   |
| 1861-65 . . . . . | 534                     | 61       | 53      | 648   |
| 1871-75 . . . . . | 772                     | 85       | 68      | 925   |
| 1881-85 . . . . . | 1,082                   | 116      | 85      | 1,283 |
| 1889 . . . . .    | 1,327                   | 136      | 95      | 1,558 |

The annual number of letters was about 1,500,000 under Charles II., 8,000,000 under George II., and 20,000,000 at the beginning of the wars with Bonaparte.

In 1881 the number of letters, papers, &c., which passed through the British post-office was 1682 millions, viz. :—

|                              | Millions of Letters,<br>Papers, &c. |         |       | Ratio |
|------------------------------|-------------------------------------|---------|-------|-------|
|                              | Received<br>from                    | Sent to | Total |       |
| United Kingdom . . . . .     | 1,526                               | 1,526   | 1,526 | 90.7  |
| America . . . . .            | 22                                  | 22      | 44    | 2.6   |
| European Continent . . . . . | 37                                  | 44      | 81    | 4.8   |
| The East . . . . .           | 4                                   | 9       | 13    | 0.8   |
| Australia . . . . .          | 4                                   | 6       | 10    | 0.6   |
| Africa . . . . .             | 2                                   | 6       | 8     | 0.5   |
| Total . . . . .              | 1,595                               | 1,613   | 1,682 | 100.0 |

The following table, comparing the number of letters in the United Kingdom and France, was published in 1882 :—

| Period            | Annual Average,<br>Millions |        | Number per Inha-<br>bitant |        |
|-------------------|-----------------------------|--------|----------------------------|--------|
|                   | U. Kingdom                  | France | U. Kingdom                 | France |
| 1841-50 . . . . . | 277                         | 122    | 10                         | 4      |
| 1851-60 . . . . . | 466                         | 210    | 17                         | 6      |
| 1861-70 . . . . . | 724                         | 340    | 24                         | 9      |
| 1881 . . . . .    | 1,299                       | 595    | 37                         | 16     |

The letters and papers despatched from the United Kingdom in 1888 showed this ratio :—

| To                      |       |
|-------------------------|-------|
| France . . . . .        | 21.3  |
| United States . . . . . | 19.4  |
| Germany . . . . .       | 16.7  |
| Colonies . . . . .      | 16.4  |
| Various . . . . .       | 26.2  |
| Total . . . . .         | 100.0 |

In nine years the postal traffic rose 50 per cent., viz. :—

|                    | 1880     | 1889     |
|--------------------|----------|----------|
|                    | Millions | Millions |
| Letters . . . . .  | 1,128    | 1,558    |
| Cards . . . . .    | 114      | 201      |
| Books, &c. . . . . | 214      | 452      |
| Papers . . . . .   | 131      | 152      |
| Total . . . . .    | 1,587    | 2,363    |

In 1889 the British post-office left a net profit of £3,000,000, against £400,000 in 1855 and £1,800,000 in 1875.

The telegraphs showed as follows :—

| Year           | Miles of Wire | Stations | Messages   |
|----------------|---------------|----------|------------|
| 1851 . . . . . | 7,303         | 108      | 48,000     |
| 1862 . . . . . | 57,879        | 1,616    | 2,676,000  |
| 1872 . . . . . | 87,719        | 5,179    | 15,502,000 |
| 1881 . . . . . | 121,052       | 5,637    | 31,345,000 |
| 1889 . . . . . | 183,500       | 7,030    | 58,000,000 |

The following table shows the increase, in ten years, in letters and telegrams for the three kingdoms :—

|                          | Letters, Millions |       | Letters per Inhab. |      |
|--------------------------|-------------------|-------|--------------------|------|
|                          | 1879              | 1889  | 1879               | 1889 |
| England . . . . .        | 922               | 1,327 | 37                 | 46   |
| Scotland . . . . .       | 99                | 136   | 27                 | 33   |
| Ireland . . . . .        | 76                | 95    | 14                 | 20   |
| United Kingdom . . . . . | 1,097             | 1,558 | 32                 | 41   |

|                      | Telegrams  |            | Per Inhab. |      |
|----------------------|------------|------------|------------|------|
|                      | 1879       | 1889       | 1879       | 1889 |
| England . . . . .    | 20,400,000 | 48,500,000 | 0.8        | 1.7  |
| Scotland . . . . .   | 2,500,000  | 6,000,000  | 0.7        | 1.5  |
| Ireland . . . . .    | 1,600,000  | 3,200,000  | 0.3        | 0.7  |
| U. Kingdom . . . . . | 24,500,000 | 57,700,000 | 0.7        | 1.5  |

The number and amount of postal and money orders issued in the United Kingdom were as follows :—

| Year           | Number     | Amount, £  |
|----------------|------------|------------|
| 1880 . . . . . | 17,300,000 | 26,400,000 |
| 1889 . . . . . | 50,800,000 | 42,700,000 |

The parcel post, begun in 1883, showed as follows :—

| Year           | Number     | Weight, Tons | Receipts, £ | £ per Ton | Paid to Railways, £ |
|----------------|------------|--------------|-------------|-----------|---------------------|
| 1884 . . . . . | 22,100,000 | 19,700       | 490,000     | 25        | 250,000             |
| 1888 . . . . . | 38,800,000 | 40,900       | 860,000     | 21        | 425,000             |

Official returns of postal revenue and expenditure show as follows :—

| Period             | Revenue, £  | Expenditure, £ | Profit, £  |
|--------------------|-------------|----------------|------------|
| 1865-69 . . . . .  | 22,200,000  | 15,400,000     | 6,800,000  |
| 1870-74 . . . . .  | 28,000,000  | 21,000,000     | 7,000,000  |
| 1875-79 . . . . .  | 36,400,000  | 25,400,000     | 11,000,000 |
| 1880-84 . . . . .  | 43,200,000  | 29,100,000     | 14,100,000 |
| 1885-89 . . . . .  | 51,700,000  | 38,800,000     | 12,900,000 |
| 25 years . . . . . | 181,500,000 | 129,700,000    | 51,800,000 |

In 1889 the accounts stood thus :—

|                       | Receipts, £ | Expenses, £ | Profit, £ |
|-----------------------|-------------|-------------|-----------|
| Post-office . . . . . | 9,100,000   | 6,300,000   | 2,800,000 |
| Telegraphs . . . . .  | 2,100,000   | 1,950,000   | 150,000   |
| Total . . . . .       | 11,200,000  | 8,250,000   | 2,950,000 |

#### FRANCE

The official returns are as follows :—

| Year           | Millions |             |       | Receipts, £ |
|----------------|----------|-------------|-------|-------------|
|                | Letters  | Papers, &c. | Total |             |
| 1830 . . . . . | 64       | 40          | 104   | 1,200,000   |
| 1840 . . . . . | 94       | 53          | 147   | 1,600,000   |
| 1850 . . . . . | 160      | 94          | 254   | 1,500,000   |
| 1860 . . . . . | 264      | 179         | 443   | 2,400,000   |
| 1870 . . . . . | 281      | 348         | 629   | 2,600,000   |
| 1880 . . . . . | 531      | 700         | 1,231 | 4,300,000   |
| 1887 . . . . . | 671      | 852         | 1,523 | 6,500,000   |

The receipts of course include the telegraph department, of which we have the following :—

| Year           | Miles  | Messages   | Receipts, £ | Pence per Message |
|----------------|--------|------------|-------------|-------------------|
| 1851 . . . . . | 1,200  | 9,000      | 3,000       | 80                |
| 1860 . . . . . | 14,700 | 720,000    | 168,000     | 56                |
| 1870 . . . . . | 25,600 | 5,660,000  | 380,000     | 16                |
| 1880 . . . . . | 40,200 | 17,100,000 | 930,000     | 13                |
| 1887 . . . . . | 58,500 | 27,900,000 | 1,060,000   | 9                 |

The above does not include railway telegraphic service. In 1885 the railways had 21,000 miles of telegraphs, which carried 6,500,000 messages. This makes the total 80,000 miles, 34,500,000 messages.

The parcel-post was instituted in 1880, in which year 4,000,000 parcels were carried; in 1888 more than 21 millions. In nine years the total carried was 131 million parcels, which paid £3,550,000, averaging 6d. each. Money orders in 1887 were issued to the number of 22,600,000, the aggregate amount being £28,500,000, being an average of 25s. each. France has 6932 post-offices and 58,500 letter-boxes.

#### GERMANY

Official returns give the number of letters thus :—

| Year           | Millions | Per Inhabitant |
|----------------|----------|----------------|
| 1871 . . . . . | 339      | 85             |
| 1877 . . . . . | 717      | 160            |
| 1888 . . . . . | 956      | 200            |

The total traffic of 1888 compares with that of 1881 as follows :—

|                             | 1881     | 1888     |
|-----------------------------|----------|----------|
|                             | Millions | Millions |
| Letters and cards . . . . . | 721      | 1,252    |
| Newspapers . . . . .        | 452      | 725      |
| Sundries . . . . .          | 126      | 511      |
| Total . . . . .             | 1,299    | 2,488    |

In 1888 the amount transmitted in 74 million money orders was £933,600,000, or about 3 millions sterling daily. The postal and telegraph services earned £11,350,000; expenditure £9,800,000; net profit

£1,550,000. Telegraphic service has grown as follows, viz. :—

|            | Miles  | Messages   | Receipts, £ | Pence per Message |
|------------|--------|------------|-------------|-------------------|
| 1870 . . . | 20,400 | 8,600,000  | 390,000     | 11                |
| 1880 . . . | 44,100 | 17,200,000 | 850,000     | 12                |
| 1888 . . . | 57,700 | 24,100,000 | 1,200,000   | 12                |

The number of postal and telegraph servants in 1886 was 98,000, the weight of goods carried by parcel-post 404,000 tons.

## RUSSIA

The returns for 1887 compare with those for 1881 thus :—

|                  | 1881        | 1887        |
|------------------|-------------|-------------|
| Letters . . .    | 110,000,000 | 152,600,000 |
| Newspapers . . . | 75,000,000  | 106,200,000 |
| Sundries . . .   | 7,000,000   | 66,900,000  |
| Total . . .      | 192,000,000 | 325,700,000 |

Besides the railways and canals, there are 110,000 miles of mail-coach roads, on which the State maintains 47,000 horses at various posting-stations. The post-office in 1887 transmitted money orders to the number of 11,300,000, and value of 390 millions sterling, an average of £34 each. The growth of telegraphs has been as follows :—

| Year       | Miles  | Messages   | Receipts, £ | Pence per Message |
|------------|--------|------------|-------------|-------------------|
| 1870 . . . | 29,200 | 2,700,000  | 300,000     | 26                |
| 1880 . . . | 58,800 | 7,300,000  | 770,000     | 25                |
| 1887 . . . | 92,700 | 10,500,000 | 950,000     | 22                |

There are 3780 telegraph offices. In the years 1884–87 the annual averages for postal and telegraph services were :—

|                       |             |
|-----------------------|-------------|
| Receipts . . . . .    | £ 2,550,000 |
| Expenditure . . . . . | 2,470,000   |

Leaving a net profit of £80,000 a year.

## AUSTRIA

Official returns are as follows :—

| Year       | Letters and Papers, Millions |         |       |
|------------|------------------------------|---------|-------|
|            | Austria                      | Hungary | Total |
| 1850 . . . | 42                           | ...     | ...   |
| 1860 . . . | 60                           | ...     | ...   |
| 1870 . . . | 194                          | 57      | 251   |
| 1880 . . . | 399                          | 135     | 534   |
| 1888 . . . | 730                          | 230     | 960   |

The figures for the whole Empire were made up thus in 1888 :—

|                  | Austria     | Hungary     | Total       |
|------------------|-------------|-------------|-------------|
| Letters . . .    | 484,400,000 | 126,600,000 | 611,000,000 |
| Cards . . .      | 91,200,000  | 30,800,000  | 122,000,000 |
| Newspapers . . . | 93,400,000  | 53,500,000  | 146,900,000 |
| Books, &c. . .   | 59,900,000  | 20,500,000  | 80,400,000  |
| Total . . .      | 728,900,000 | 231,400,000 | 960,300,000 |

In 1886 there were 29,200,000 postal orders transmitted, for a total value of £70,600,000, averaging 48s. each.

The progress of telegraphs is shown as follows :—

| Year       | Miles  | Messages   | Receipts, £ | Pence per Message |
|------------|--------|------------|-------------|-------------------|
| 1875 . . . | 29,300 | 6,800,000  | 320,000     | 11                |
| 1880 . . . | 30,800 | 8,300,000  | 410,000     | 12                |
| 1887 . . . | 38,200 | 13,200,000 | ...         | ...               |

The returns for 1887 showed thus :—

|                | Austria   | Hungary   | Total      |
|----------------|-----------|-----------|------------|
| Miles . . .    | 26,700    | 11,500    | 38,200     |
| Offices . . .  | 3,690     | 1,550     | 5,240      |
| Messages . . . | 9,520,000 | 3,720,000 | 13,240,000 |

The total postal and telegraph receipts and outlay were :—

|               | Receipts, £ | Outlay, £ |
|---------------|-------------|-----------|
| Austria . . . | 2,800,000   | 2,410,000 |
| Hungary . . . | 1,230,000   | 860,000   |
| Total . . .   | 4,030,000   | 3,270,000 |

## ITALY

The post-office traffic at various dates showed thus :—

| Year       | Letters     | Papers, &c. | Total       | Per Inhab. |
|------------|-------------|-------------|-------------|------------|
| 1862 . . . | 72,000,000  | 40,000,000  | 112,000,000 | 5          |
| 1871 . . . | 99,000,000  | 96,000,000  | 195,000,000 | 8          |
| 1881 . . . | 169,000,000 | 107,000,000 | 276,000,000 | 10         |
| 1887 . . . | 252,000,000 | 199,200,000 | 452,800,000 | 15         |

There are 5300 post-offices and 4060 telegraph offices. Receipts and expenses were in 1888 as follows :—

|                  | Receipts, £ | Expenses, £ |
|------------------|-------------|-------------|
| Mails . . .      | 1,700,000   | 1,400,000   |
| Telegraphs . . . | 600,000     | 520,000     |
| Total . . .      | 2,300,000   | 1,920,000   |

In 1885 there were 4,300,000 postal orders transmitted, showing an aggregate of 22 millions sterling, say £5 each. Telegraph service has grown as follows :—

| Year       | Miles  | Messages  | Receipts, £ | Pence per Message |
|------------|--------|-----------|-------------|-------------------|
| 1870 . . . | 11,100 | 2,200,000 | 200,000     | 22                |
| 1880 . . . | 16,200 | 6,100,000 | 420,000     | 16                |
| 1887 . . . | 21,100 | 8,800,000 | 560,000     | 16                |

Government lines exceed 20,000 miles, the rest belonging to companies.

## SPAIN

Official returns show the number of letters thus :—

| Year       | Letters     | Per Inhabitant |
|------------|-------------|----------------|
| 1846 . . . | 15,200,000  | 1.2            |
| 1880 . . . | 71,400,000  | 4.4            |
| 1887 . . . | 102,600,000 | 6.0            |

There are 3070 post-offices and 952 telegraph offices. There were 90,000 postal orders in 1887, representing a

# POST-OFFICE

461

total of 7 millions sterling, averaging £78 each. Telegraph lines have grown as follows :—

| Year         | Miles  | Messages  | Receipts, £ | Pence per Message |
|--------------|--------|-----------|-------------|-------------------|
| 1855 . . . . | 440    | 3,000     | 5,000       | 400               |
| 1860 . . . . | 4,500  | 310,000   | 60,000      | 45                |
| 1870 . . . . | 7,200  | 1,040,000 | 60,000      | 14                |
| 1880 . . . . | 10,010 | 2,250,000 | 160,000     | 17                |
| 1887 . . . . | 11,510 | 3,550,000 | 240,000     | 16                |

Down to 1886 the construction of telegraphs had cost £700,000 sterling.

## PORTUGAL

The number of letters carried was as follows :—

| Year         | Letters    | Per Inhabitant |
|--------------|------------|----------------|
| 1878 . . . . | 12,200,000 | 3.0            |
| 1887 . . . . | 20,200,000 | 4.4            |

Telegraphs show as follows :—

| Year         | Miles | Messages  | Receipts, £ | Pence per Message |
|--------------|-------|-----------|-------------|-------------------|
| 1875 . . . . | 2,200 | 1,300,000 | 45,000      | 8                 |
| 1880 . . . . | 2,700 | 1,600,000 | 55,000      | 8                 |
| 1885 . . . . | 3,200 | 1,730,000 | 70,000      | 10                |

There are 1640 post-offices and 275 for telegraphs.

## SWEDEN AND NORWAY

The aggregate post-office traffic of the two kingdoms was as follows :—

| Year         | Letters and Papers | Per Inhabitant |
|--------------|--------------------|----------------|
| 1881 . . . . | 81,000,000         | 12             |
| 1887 . . . . | 142,000,000        | 21             |

The telegraph returns for 1888 showed thus :—

|                | Miles  | Messages  |
|----------------|--------|-----------|
| Sweden . . . . | 5,120  | 1,430,000 |
| Norway . . . . | 5,640  | 1,310,000 |
| Total . . . .  | 10,760 | 2,740,000 |

In 1886 the Norwegian post-office transmitted money orders worth 11 millions sterling. The postal finances showed thus for the two kingdoms :—

|                  | Sweden    | Norway    | Total     |
|------------------|-----------|-----------|-----------|
| Receipts . . . . | £ 340,000 | £ 185,000 | £ 525,000 |
| Expenses . . . . | 335,000   | 195,000   | 530,000   |

If we take collectively the whole telegraph system of the two countries, we find as follows :—

| Year         | Miles  | Messages  | Receipts, £ | Pence per Message |
|--------------|--------|-----------|-------------|-------------------|
| 1855 . . . . | 1,900  | 80,000    | 9,000       | 27                |
| 1860 . . . . | 4,700  | 290,000   | 40,000      | 34                |
| 1870 . . . . | 7,800  | 1,060,000 | 70,000      | 16                |
| 1880 . . . . | 9,800  | 1,770,000 | 120,000     | 16                |
| 1888 . . . . | 10,760 | 2,740,000 | 130,000     | 11                |

The above does not include Government telegrams.

# POST-OFFICE

## DENMARK

The total business in 1887 comprised :—

|                   |            |
|-------------------|------------|
| Letters . . . .   | 42,000,000 |
| Papers, &c. . . . | 45,000,000 |

Total . . . . 87,000,000

Total post-office income £380,000, expenses £470,000. Telegraphic service shows as follows :—

|              | Miles | Messages  |
|--------------|-------|-----------|
| 1870 . . . . | 1,210 | 520,000   |
| 1880 . . . . | 2,200 | 1,170,000 |
| 1887 . . . . | 3,670 | 1,500,000 |

No separate accounts of receipts are kept, being included in those of the post-office. There are 360 telegraph offices, of which 200 belong to the railway companies.

## HOLLAND

Postal traffic was as follows :—

|                           | 1884        | 1888        |
|---------------------------|-------------|-------------|
| Letters and cards . . . . | 84,300,000  | 92,700,000  |
| Papers, &c. . . .         | 73,600,000  | 86,200,000  |
| Total . . . .             | 157,900,000 | 178,900,000 |

Telegraphic service has progressed as follows :—

| Year         | Miles | Messages  | Receipts, £ | Pence per Message |
|--------------|-------|-----------|-------------|-------------------|
| 1855 . . . . | 620   | 140,000   | 13,000      | 23                |
| 1865 . . . . | 1,220 | 970,000   | 43,000      | 11                |
| 1875 . . . . | 2,140 | 2,200,000 | 62,000      | 7                 |
| 1880 . . . . | 2,370 | 3,100,000 | 85,000      | 7                 |
| 1888 . . . . | 3,100 | 4,100,000 | 100,000     | 6                 |

The above comprises only the State lines, besides which there are twenty-nine companies, but their business is small. In 1888 the finances of the post-office and telegraph service were :—

|                     | Receipts, £ | Expenses, £ |
|---------------------|-------------|-------------|
| Post-office . . . . | 500,000     | 380,000     |
| Telegraphs . . . .  | 100,000     | 120,000     |
| Total . . . .       | 600,000     | 500,000     |

## BELGIUM

The official tables show as follows :—

| Year         | Letters     | Papers, &c. | Total       | Per Inhab. | Receipts, £ |
|--------------|-------------|-------------|-------------|------------|-------------|
| 1850 . . . . | 13,000,000  | 12,000,000  | 25,000,000  | 6          | 120,000     |
| 1860 . . . . | 28,000,000  | 33,000,000  | 61,000,000  | 13         | 200,000     |
| 1870 . . . . | 53,000,000  | 67,000,000  | 120,000,000 | 24         | 280,000     |
| 1880 . . . . | 85,000,000  | 131,000,000 | 216,000,000 | 39         | 480,000     |
| 1888 . . . . | 106,900,000 | 183,300,000 | 290,200,000 | 49         | 620,000     |

Telegraphic statistics are summed up thus :—

| Year         | Miles | Messages  | Receipts, £ | Pence per Message |
|--------------|-------|-----------|-------------|-------------------|
| 1850 . . . . | 250   | 14,000    | 4,000       | 68                |
| 1860 . . . . | 920   | 330,000   | 20,000      | 15                |
| 1870 . . . . | 2,700 | 2,400,000 | 60,000      | 6                 |
| 1880 . . . . | 3,500 | 6,200,000 | 100,000     | 4                 |
| 1888 . . . . | 4,200 | 7,300,000 | 130,000     | 4                 |

The aggregate income in 1888 from mails and telegraphs was £750,000; expenditure £505,000; leaving a net profit of £245,000.

## SWITZERLAND

Postal traffic showed as follows:—

|                         | 1881        | 1888        |
|-------------------------|-------------|-------------|
| Letters and cards . . . | 65,000,000  | 121,800,000 |
| Papers, &c. . . . .     | 65,000,000  | 99,400,000  |
| Total . . . . .         | 130,000,000 | 221,200,000 |

Postal orders in 1888 amounted to £13,200,000 sterling. The telegraphic service was as follows:—

| Year           | Miles | Messages  | Receipts, £ | Pence per Message |
|----------------|-------|-----------|-------------|-------------------|
| 1855 . . . . . | 1,350 | 160,000   | 12,000      | 18                |
| 1860 . . . . . | 1,790 | 300,000   | 20,000      | 16                |
| 1870 . . . . . | 3,200 | 1,600,000 | 50,000      | 8                 |
| 1880 . . . . . | 4,070 | 2,800,000 | 95,000      | 8                 |
| 1887 . . . . . | 4,400 | 3,200,000 | 140,000     | 10                |

Down to 1887 the cost of construction was £200,000 sterling.

## UNITED STATES

Official returns for 100 years show as follows:—

| Year | Routes, Miles | Post-Offices | Revenue, £ | Expenditure, £ |
|------|---------------|--------------|------------|----------------|
| 1790 | 1,875         | 75           | 8,000      | 7,000          |
| 1800 | 20,800        | 903          | 60,000     | 45,000         |
| 1810 | 36,400        | 2,300        | 110,000    | 100,000        |
| 1820 | 72,400        | 4,500        | 220,000    | 240,000        |
| 1830 | 115,200       | 8,450        | 390,000    | 395,000        |
| 1840 | 155,700       | 13,470       | 950,000    | 980,000        |
| 1850 | 178,700       | 18,420       | 1,150,000  | 1,120,000      |
| 1860 | 240,600       | 28,500       | 1,770,000  | 3,950,000      |
| 1870 | 231,200       | 28,500       | 3,680,000  | 4,400,000      |
| 1880 | 343,900       | 42,990       | 6,920,000  | 7,600,000      |
| 1889 | 416,200       | 59,000       | 11,700,000 | 12,800,000     |

The railroad postal service is shown as follows:—

| Year           | Miles of Railway | Miles Run with Mails | Cost, £   |
|----------------|------------------|----------------------|-----------|
| 1844 . . . . . | 4,380            | 5,750,000            | 110,000   |
| 1850 . . . . . | 9,020            | 6,520,000            | 170,000   |
| 1860 . . . . . | 30,640           | 27,600,000           | 700,000   |
| 1870 . . . . . | 52,910           | 47,600,000           | 940,000   |
| 1880 . . . . . | 93,350           | 96,500,000           | 2,240,000 |
| 1889 . . . . . | 156,080          | 204,200,000          | 4,500,000 |

The number of letters and papers, &c., that passed through the post-office was:—

| Year           | Millions | Per Inhab. |
|----------------|----------|------------|
| 1885 . . . . . | 4,965    | 90         |
| 1889 . . . . . | 7,028    | 110        |

In 1889 there were issued 17,760,000 money orders, to a value of £29,400,000, averaging 34s. each.

The postal traffic of the United States, as already shown (at p. 457), constitutes 40 per cent. of that of the world, and exceeds the aggregate of all the nations of Continental Europe. As compared with population, the ratio in the United States is almost double what it is in the United Kingdom, or three times that of France. Postal revenue in the above table does not include telegraph receipts, which belong to companies; but if these were added, the total would be £16,500,000, or a little over 5s. per head, against 6s. in the United Kingdom.

The Western Union Telegraph has most of the busi-

ness of the United States, possessing in 1889 a mileage of 179,000 out of a total of 200,000 miles. The Western Company showed as follows:—

| Year | Miles   | Offices | Messages   | Receipts, £ | Pence per Message |
|------|---------|---------|------------|-------------|-------------------|
| 1867 | 46,300  | 2,560   | 5,880,000  | 1,360,000   | 54                |
| 1870 | 54,100  | 3,970   | 9,200,000  | 1,400,000   | 36                |
| 1880 | 85,600  | 9,080   | 29,200,000 | 2,660,000   | 23                |
| 1889 | 178,800 | 18,470  | 54,100,000 | 4,320,000   | 19                |

If the other lines, which sum up 21,000 miles, be credited with half the mileage traffic of the Western Union, this would add 2,900,000 messages, bringing up the total to 57 millions and the receipts to £4,800,000 per annum.

## CANADA

The Handbook gives the following statistics:—

| Year | Post-Offices | Letters    | Papers, &c. | Total       | Per Inhab. | Postal Revenue, £ |
|------|--------------|------------|-------------|-------------|------------|-------------------|
| 1870 | 3,820        | 24,500,000 | 20,200,000  | 44,700,000  | 12         | 210,000           |
| 1880 | 5,770        | 45,800,000 | 58,400,000  | 104,200,000 | 24         | 340,000           |
| 1888 | 7,840        | 92,700,000 | 106,400,000 | 199,100,000 | 40         | 620,000           |

The expenditure in 1888 was £160,000 over the receipts, caused by the fact that many post-offices are in remote, thinly-settled districts. In 1888 the mails were carried over 25,760,000 miles, against 10,600,000 miles in 1868. The "dead-letter" office in 1887 showed 830,000 letters and papers, say 5 per 1000 of total traffic, against 592,000, or 6 per 1000, in 1880.

The money order office showed as follows:—

| Year           | Orders  | Amount, £ | Average, £ |
|----------------|---------|-----------|------------|
| 1870 . . . . . | 110,000 | 820,000   | 7.5        |
| 1880 . . . . . | 306,000 | 1,500,000 | 4.9        |
| 1888 . . . . . | 674,000 | 2,360,000 | 3.5        |

Telegraph lines mostly belong to companies. The traffic in 1887 was as follows:—

|                          | Miles  | Offices | Messages  |
|--------------------------|--------|---------|-----------|
| Pacific Railroad Co. . . | 5,000  | 550     | 500,000   |
| North-Western Co. . .    | 17,660 | 1,502   | 3,100,000 |
| Western . . . . .        | 2,920  | 176     | 400,000   |
| Total . . . . .          | 25,580 | 2,228   | 4,000,000 |

The returns for 1888 compare with 1880 as follows:—

|                | Miles  | Messages  |
|----------------|--------|-----------|
| 1880 . . . . . | 11,300 | 1,200,000 |
| 1888 . . . . . | 29,460 | 4,050,000 |

In 1888 the mileage included 2900 miles of Government lines.

## AUSTRALIA

Coghlan's table shows as follows for Australasia:—

| Year           | Letters     | Papers, &c. | Total       | Per Inhab. |
|----------------|-------------|-------------|-------------|------------|
| 1851 . . . . . | 2,100,000   | 2,200,000   | 4,300,000   | 9          |
| 1861 . . . . . | 14,600,000  | 11,500,000  | 26,100,000  | 21         |
| 1871 . . . . . | 31,300,000  | 17,600,000  | 48,900,000  | 26         |
| 1881 . . . . . | 99,020,000  | 53,440,000  | 152,460,000 | 56         |
| 1888 . . . . . | 174,500,000 | 119,200,000 | 293,700,000 | 82         |

In 1888 the several Colonies stood thus :—

|                         | Post-Offices | Letters     | Papers, &c. | Total       | Per Inhab. | Receipts, £ | Expenses, £ |
|-------------------------|--------------|-------------|-------------|-------------|------------|-------------|-------------|
| New South Wales . . .   | 1,203        | 49,000,000  | 40,400,000  | 89,400,000  | 81         | 370,000     | 420,000     |
| Victoria . . . . .      | 1,544        | 47,700,000  | 30,800,000  | 78,500,000  | 71         | ...         | ...         |
| Queensland . . . . .    | 766          | 12,900,000  | 12,200,000  | 25,100,000  | 62         | 130,000     | 200,000     |
| South Australia . . . . | 594          | 17,000,000  | 8,700,000   | 25,700,000  | 82         | 110,000     | 180,000     |
| New Zealand . . . . .   | 1,145        | 42,100,000  | 20,900,000  | 63,000,000  | 103        | 210,000     | 160,000     |
| Tasmania . . . . .      | 278          | 4,700,000   | 4,800,000   | 9,500,000   | 64         | 35,000      | 40,000      |
| Western Australia . . . | 78           | 1,100,000   | 1,400,000   | 2,500,000   | 60         | 15,000      | ...         |
| Total . . . . .         | 5,608        | 174,500,000 | 119,200,000 | 293,700,000 | 82         | ...         | ...         |

The telegraph service was introduced at Sydney in 1851, and a line was opened from that city to Melbourne and Adelaide in 1858. A cable from Melbourne to Tasmania was laid in 1869, and communication by cable with Europe commenced in 1872. Connection was established with New Zealand in 1876, and finally in 1877 Western Australia was joined to the other colonies. The line between London and Adelaide consists of 9146 miles of cable and 3424 of land line. The cable from Australia to New Zealand is 1191 miles long. The land lines of the Colonies had the following :—

| Year           | Miles  | Messages   |
|----------------|--------|------------|
| 1861 . . . . . | 2,385  | ...        |
| 1880 . . . . . | 26,900 | 5,100,000  |
| 1888 . . . . . | 39,200 | 10,580,000 |

In 1888 the telegraphs of the several Colonies showed :—

|                         | Miles  | Messages   | Receipts, £ | Pence per Message |
|-------------------------|--------|------------|-------------|-------------------|
| N. S. Wales . . . . .   | 10,690 | 3,410,000  | 185,000     | 13                |
| Victoria . . . . .      | 4,190  | 2,740,000  | 125,000     | 11                |
| Queensland . . . . .    | 9,170  | 1,440,000  | 105,000     | 17                |
| South Australia . . . . | 5,510  | 990,000    | 105,000     | 25                |
| New Zealand . . . . .   | 4,790  | 1,550,000  | 90,000      | 14                |
| Tasmania . . . . .      | 1,900  | 270,000    | 20,000      | 18                |
| W. Australia . . . . .  | 2,960  | 180,000    | 10,000      | 13                |
| Total . . . . .         | 39,210 | 10,580,000 | 640,000     | 15                |

### INDIA

Postal development dates from the overthrow of the East India Company in 1856, when there were only 750 post-offices. The traffic in 1884 and 1888 showed :—

| Year           | Post-Offices | Letters and Papers | Revenue, £ | Expenditure, £ |
|----------------|--------------|--------------------|------------|----------------|
| 1884 . . . . . | 14,305       | 203,300,000        | 1,100,000  | 1,010,000      |
| 1888 . . . . . | 16,970       | 274,400,000        | 1,200,000  | 1,370,000      |

The mileage of mails carried was as follows :—

| By              | 1870   | 1888   |
|-----------------|--------|--------|
| Rail . . . . .  | 4,200  | 14,040 |
| Boat . . . . .  | 40,600 | 48,900 |
| Horse . . . . . | 5,500  | 4,000  |
| Total . . . . . | 50,300 | 66,940 |

The telegraph service shows as follows :—

| Year           | Miles  | Messages  | Receipts, £ | Pence per Message |
|----------------|--------|-----------|-------------|-------------------|
| 1880 . . . . . | 22,200 | 1,600,000 | ...         | ...               |
| 1888 . . . . . | 31,900 | 2,800,000 | 76,000      | 7                 |

The above does not include Government messages, nor those of the Indo-European cable.

### ARGENTINA

Official returns give the following :—

| Year           | Letters and Papers | Per Inhabitant |
|----------------|--------------------|----------------|
| 1860 . . . . . | 410,000            | 0.3            |
| 1865 . . . . . | 990,000            | 0.6            |
| 1875 . . . . . | 6,920,000          | 3.0            |
| 1880 . . . . . | 9,880,000          | 3.6            |
| 1888 . . . . . | 76,810,000         | 21.2           |

There are 14,700 miles of telegraph, of which 7300 belong to the State. In 1889 the number of messages was 3,510,000.

### POTATOES

Spallart's table down to 1884 is included in the following :—

|                     | Production, Tons | Value, £    | Year 1887  |            | Tons per Acre |
|---------------------|------------------|-------------|------------|------------|---------------|
|                     |                  |             | Tons       | Acres      |               |
| G. Britain          | 3,300,000        | 9,900,000   | 3,560,000  | 560,000    | 6.4           |
| Ireland . . . . .   | 3,590,000        | 9,700,000   | 3,570,000  | 800,000    | 4.5           |
| France . . . . .    | 11,300,000       | 22,600,000  | 11,290,000 | 3,570,000  | 3.2           |
| Germany             | 21,860,000       | 44,000,000  | 25,140,000 | 7,250,000  | 3.5           |
| Russia . . . . .    | 12,110,000       | 18,200,000  | 7,500,000  | 3,700,000  | 2.0           |
| Austria . . . . .   | 7,210,000        | 14,400,000  | 8,200,000  | 2,760,000  | 3.0           |
| Hungary             | 2,390,000        | 4,800,000   | 2,200,000  | 1,020,000  | 2.2           |
| Italy . . . . .     | 700,000          | 1,400,000   | 620,000    | 370,000    | 1.7           |
| Spain . . . . .     | 1,590,000        | 3,200,000   | 1,590,000  | 800,000    | 2.0           |
| Portugal            | 280,000          | 600,000     | 280,000    | 140,000    | 2.0           |
| Sweden . . . . .    | 1,610,000        | 3,200,000   | 1,500,000  | 390,000    | 3.9           |
| Norway . . . . .    | 630,000          | 1,300,000   | 500,000    | 90,000     | 5.5           |
| Denmark             | 360,000          | 700,000     | 360,000    | 110,000    | 3.3           |
| Finland . . . . .   | 380,000          | 750,000     | 380,000    | 100,000    | 3.8           |
| Holland . . . . .   | 1,490,000        | 3,000,000   | 1,550,000  | 350,000    | 4.4           |
| Belgium . . . . .   | 2,490,000        | 5,000,000   | 3,000,000  | 490,000    | 6.1           |
| Switzerland         | 1,250,000        | 2,500,000   | 1,250,000  | 400,000    | 3.1           |

| U. States . . . . . | 4,590,000        | 16,000,000  | 5,060,000  | 2,530,000  | 2.0           |
| Canada . . . . .    | 1,200,000        | 2,400,000   | 1,200,000  | 430,000    | 2.8           |
| Australia . . . . . | 400,000          | 800,000     | 430,000    | 110,000    | 3.9           |
| Total . . . . .     | 79,730,000       | 166,450,000 | 80,180,000 | 26,370,000 | 3.1           |

We have nothing later than 1884 as regards Spain, Portugal, Switzerland, Roumania, Servia, and Greece. Four bushels of potatoes contain as much food as one bushel of wheat. They were first introduced into Germany in 1710, into Russia in 1769, and into Scotland about

1775: the man who sowed the first field of potatoes in Scotland died in 1850.

The production in various countries at different dates was approximately as follows:—

| France  |            | Germany |            | Russia |           |
|---------|------------|---------|------------|--------|-----------|
| Years   | Tons       | Year    | Tons       | Year   | Tons      |
| 1815-20 | 1,950,000  | 1861    | 15,200,000 | 1849   | 2,550,000 |
| 1861-80 | 6,500,000  | 1879    | 18,900,000 | 1870   | 8,000,000 |
| 1887    | 11,300,000 | 1887    | 25,100,000 | 1887   | 7,500,000 |

| Austria |           | Holland |           | Belgium |           |
|---------|-----------|---------|-----------|---------|-----------|
| Years   | Tons      | Year    | Tons      | Year    | Tons      |
| 1846    | 2,300,000 | 1851    | 700,000   | 1846    | 1,800,000 |
| 1859    | 5,020,000 | 1861    | 850,000   | 1856    | 2,000,000 |
| 1887    | 8,200,000 | 1887    | 1,550,000 | 1887    | 3,000,000 |

| Sweden |           | United States |           |
|--------|-----------|---------------|-----------|
| Years  | Tons      | Year          | Tons      |
| 1837   | 400,000   | 1840          | 2,700,000 |
| 1859   | 510,000   | 1850          | 2,600,000 |
| 1887   | 1,500,000 | 1860          | 2,800,000 |

For consumption of potatoes see *Food*.

### POULTRY.

The numbers are not known. The following is an approximate estimate:—

|                 | Poultry, Number | Eggs Millions Yearly |             | Consumption per Inhabitant |
|-----------------|-----------------|----------------------|-------------|----------------------------|
|                 |                 | Production           | Consumption |                            |
| United Kingdom  | 30,000,000      | 2,100                | 3,230       | 85                         |
| France . . . .  | 50,000,000      | 3,500                | 3,000       | 78                         |
| Germany . . . . | 50,000,000      | 3,500                | 3,500       | 75                         |
| Belgium . . . . | 4,500,000       | 320                  | 420         | 70                         |
| Denmark . . . . | 4,000,000       | 280                  | 160         | 80                         |
| Italy . . . . . | 25,000,000      | 1,800                | 1,400       | 47                         |
| Canada . . . .  | 10,000,000      | 700                  | 450         | 90                         |
| United States . | 80,000,000      | 5,600                | 5,600       | 85                         |

In the United Kingdom it is believed that 5 per cent. of eggs are hatched, and the gross product yearly is set down thus:—

|                                |             |
|--------------------------------|-------------|
| 160 million dozen eggs . . . . | £ 5,300,000 |
| 80 million birds . . . . .     | 4,000,000   |

Total . . . . . 9,300,000

The countries which have a surplus for exportation, and the quantities exported, appear as follows:—

| Year | Millions Eggs Exported |       |        |         | Value, £  |           |         |         |
|------|------------------------|-------|--------|---------|-----------|-----------|---------|---------|
|      | France                 | Italy | Canada | Denmark | France    | Italy     | Canada  | Denmark |
| 1861 | 264                    | 42    | 12     | ...     | 710,000   | 67,000    | 19,000  | ...     |
| 1870 | 499                    | 139   | 31     | ...     | 1,250,000 | 206,000   | 65,000  | ...     |
| 1880 | 428                    | 502   | 109    | 23      | 1,202,000 | 1,450,000 | 230,000 | 60,000  |
| 1888 | 500                    | 420   | 220    | 111     | 1,100,000 | 1,000,000 | 450,000 | 260,000 |

Importation into the United Kingdom has been as follows:—

| Year           | Millions | Eggs per Inhabitant |
|----------------|----------|---------------------|
| 1853 . . . . . | 123      | 4                   |
| 1865 . . . . . | 364      | 12                  |
| 1875 . . . . . | 741      | 23                  |
| 1889 . . . . . | 1,131    | 30                  |

The ordinary weight of hen-eggs is seven to 1 lb. in Spain, eight in England and France, nine in Poland, and ten in Germany. Frankland says that 100 oz. of eggs contain as much nutriment as 104 oz. of beef, but 100 oz. of the yolk of eggs contain as much as 230 oz. of beef.

Mr. Baker, of New York, the "chicken-king," hatches 250,000 chickens yearly by steam. France has 1,800,000 turkeys, the United Kingdom 1,500,000.

### POWER

The working-power of an able-bodied adult is equal to 300 foot-tons daily, that of a horse 3000, and of steam horse-power 4000. In the following table the number of horses in Russia is supposed to be only half that recorded officially, as it is probable that not more than half are available for labour:—

|                | Millions of Foot-Tons Daily |         |         |         | Foot-Tons per Inhab. |
|----------------|-----------------------------|---------|---------|---------|----------------------|
|                | Hand                        | Horse   | Steam   | Total   |                      |
| U. Kingdom .   | 2,310                       | 8,700   | 36,800  | 47,810  | 1,200                |
| France . . .   | 2,970                       | 9,600   | 18,100  | 30,670  | 770                  |
| Germany . . .  | 3,330                       | 10,500  | 24,800  | 38,630  | 790                  |
| Russia . . .   | 6,300                       | 30,000  | 9,000   | 45,300  | 520                  |
| Austria . . .  | 2,850                       | 11,300  | 8,600   | 22,750  | 550                  |
| Italy . . . .  | 2,160                       | 3,300   | 3,300   | 8,760   | 290                  |
| Spain . . . .  | 1,260                       | 5,500   | 3,000   | 9,760   | 550                  |
| Portugal . . . | 360                         | 400     | 300     | 1,060   | 280                  |
| Switzerland .  | 210                         | 330     | 1,200   | 1,740   | 580                  |
| Belgium . . .  | 420                         | 850     | 3,200   | 4,470   | 700                  |
| Holland . . .  | 300                         | 840     | 1,400   | 2,540   | 550                  |
| Scandinavia .  | 630                         | 2,900   | 2,500   | 6,030   | 660                  |
| Europe . . .   | 23,100                      | 84,220  | 112,200 | 219,520 | 700                  |
| United States  | 4,400                       | 46,200  | 57,600  | 108,200 | 700                  |
| Total . . .    | 27,500                      | 130,420 | 169,800 | 327,720 | 600                  |

In Spain and Italy mules are counted the same as horses. The above table excludes water-power, as it is impossible to make any comparison of how much is available in the various countries.

### PRESS

The number of newspapers has multiplied nearly ten-fold since 1840, viz.:—

|                    | 1840  | 1890   | Approximate Issue Monthly | Date of First Paper |
|--------------------|-------|--------|---------------------------|---------------------|
| United Kingdom     | 493   | 1,840  | 150,000,000               | 1622                |
| France . . . .     | 776   | 4,100  | 120,000,000               | 1605                |
| Germany . . . .    | 305   | 5,500  | 140,000,000               | 1524                |
| Russia . . . .     | 204   | 667    | 12,000,000                | 1714                |
| Austria . . . .    | 132   | 2,233  | 40,000,000                | 1560                |
| Italy . . . . .    | 210   | 1,606  | 36,000,000                | 1562                |
| Spain . . . . .    | 74    | 1,161  | 11,000,000                | 1704                |
| Portugal . . . .   | 18    | 42     | 3,000,000                 | ...                 |
| Belgium . . . .    | 52    | 872    | 13,000,000                | 1764                |
| Holland . . . .    | 28    | 300    | 6,000,000                 | 1757                |
| Scandinavia . . .  | 104   | 250    | 9,000,000                 | 1644                |
| Switzerland . . .  | 54    | 450    | 6,000,000                 | ...                 |
| Greece, &c. . . .  | 10    | 100    | 1,000,000                 | ...                 |
| Europe . . . .     | 2,460 | 19,121 | 547,000,000               | ...                 |
| United States . .  | 1,210 | 15,392 | 230,000,000               | 1704                |
| Spanish America .  | 99    | 1,170  | 14,000,000                | 1726                |
| Australia . . . .  | 43    | 408    | 13,000,000                | 1803                |
| Canada . . . . .   | 88    | 565    | 9,000,000                 | 1765                |
| India . . . . .    | 63    | 644    | ...                       | 1781                |
| Japan . . . . .    | 1     | 470    | ...                       | ...                 |
| Africa . . . . .   | 14    | 200    | ...                       | ...                 |
| West Indies, &c. . | 38    | 66     | ...                       | ...                 |
| Total . . . .      | 4,016 | 38,036 | 813,000,000               | ...                 |

This means an average circulation in the world of about 33,000,000 newspapers daily. The number of books printed yearly cannot be ascertained; a certain London publisher sells a million. Great Britain exports annually over 10 millions.

According to *Hubbard's American Newspaper Directory* for 1880, there were in:—

|                   | Dailies | Periodicals | Total  |
|-------------------|---------|-------------|--------|
| Europe . . . .    | 2,403   | 10,730      | 13,133 |
| North America . . | 1,136   | 9,656       | 10,792 |
| South America . . | 208     | 427         | 635    |
| Africa . . . .    | 25      | 125         | 150    |
| Asia . . . .      | 154     | 337         | 491    |
| Australasia . . . | 94      | 471         | 565    |
| Total . . . .     | 4,020   | 21,746      | 26,766 |

Mr. P. L. Simmonds, an old journalist, from a careful investigation, gives the following result, excluding the papers published at intervals longer than a week:—

|                   |        |
|-------------------|--------|
| Europe . . . .    | 17,000 |
| North America . . | 12,794 |
| South America . . | 1,260  |
| Africa . . . .    | 210    |
| Asia . . . .      | 692    |
| Australasia . . . | 568    |
| West Indies . . . | 181    |
| Total . . . .     | 32,705 |

Mr. Simmonds also gives the following as a rough

#### UNITED KINGDOM

The advance of the newspaper press is shown thus:—

|                    | Average Monthly Issue |           |            |             | Per 1000 Inhabitants |       |
|--------------------|-----------------------|-----------|------------|-------------|----------------------|-------|
|                    | 1801                  | 1831      | 1864       | 1882        | 1831                 | 1882  |
| England . . . .    | 1,330,000             | 2,750,000 | 40,200,000 | 112,500,000 | 190                  | 4,270 |
| Scotland . . . .   | 80,000                | 160,000   | 2,300,000  | 11,700,000  | 70                   | 3,130 |
| Ireland . . . .    | 160,000               | 330,000   | 3,000,000  | 10,800,000  | 43                   | 2,120 |
| United Kingdom . . | 1,570,000             | 3,240,000 | 45,500,000 | 135,000,000 | 137                  | 3,700 |

The new works issued in 1888 and 1889 were:—

|                         | 1888  | 1889  |
|-------------------------|-------|-------|
| Economy . . . .         | 111   | 110   |
| History and travels . . | 601   | 513   |
| Theology . . . .        | 743   | 630   |
| Medicine . . . .        | 136   | 133   |
| Poetry . . . .          | 163   | 133   |
| Fiction . . . .         | 929   | 1,040 |
| Sandries . . . .        | 2,277 | 2,135 |
| New . . . .             | 4,960 | 4,694 |
| Reprints . . . .        | 1,631 | 1,375 |
| Total . . . .           | 6,591 | 6,069 |

In 1885 the newspapers of the United Kingdom were:—

|                    | Dailies | Weeklies, &c. | Total |
|--------------------|---------|---------------|-------|
| London . . . .     | 15      | 360           | 375   |
| Provinces . . . .  | 116     | 987           | 1,103 |
| Scotland . . . .   | 22      | 161           | 183   |
| Ireland . . . .    | 16      | 140           | 156   |
| United Kingdom . . | 169     | 1,648         | 1,817 |

summary of the papers published in the English language:—

|                                       |        |
|---------------------------------------|--------|
| United Kingdom . . . .                | 2,100  |
| North America . . . .                 | 12,700 |
| South America and the West Indies . . | 60     |
| Australasia . . . .                   | 575    |
| European Continent . . . .            | 20     |
| Africa . . . .                        | 114    |
| Asia . . . .                          | 203    |
| Total . . . .                         | 15,772 |

The average number of works published yearly has been as follows:—

|                     | 1828-32 | 1866-69 | 1878-80 |
|---------------------|---------|---------|---------|
| Great Britain . . . | 1,060   | 3,220   | 5,771   |
| France . . . .      | 4,610   | 7,350   | 7,000   |
| Germany . . . .     | 5,530   | 9,095   | 14,560  |
| United States . . . | 1,013   | 2,165   | 2,500   |
| Total . . . .       | 12,243  | 21,830  | 29,831  |

No book has been so often printed as the Bible. No fewer than 1326 editions of the Bible were published in the 16th century. In the 17th and 18th centuries it was translated and published in many languages by the polyglot press of the Propaganda Fide at Rome. Rev. Dr. Ginsburg, British Museum, has more than 4000 editions of the Bible, one of the most interesting being the polyglot version printed by Cardinal Ximenes at the University of Alcalá. Down to 1870 there were printed 55,000,000 copies of Webster's Spelling-book, and the sale of his Dictionary is said to average 300,000 yearly. There were two million copies of *Uncle Tom's Cabin* sold in ten years down to 1870.

#### FRANCE

In 1811 the news in the Paris papers took the following number of days to reach Paris:—

| From               | Days | From            | Days | From           | Days |
|--------------------|------|-----------------|------|----------------|------|
| Strasbourg . . . . | 6    | Brest . . . .   | 6    | Rome . . . .   | 11   |
| Lyons . . . .      | 6    | Antwerp . . . . | 7    | Madrid . . . . | 21   |

The average speed was 70 miles a day.

In 1882 the French daily papers issued as follows:—

|                     | Daily     | Copies per 1000 Inhab. |
|---------------------|-----------|------------------------|
| Paris . . . .       | 1,470,000 | 630                    |
| Lyons . . . .       | 73,000    | 190                    |
| Marseilles . . . .  | 70,000    | 194                    |
| Bordeaux . . . .    | 40,000    | 188                    |
| Other towns . . . . | 647,000   | ...                    |
| France . . . .      | 2,300,000 | 60                     |

In 1840 the daily issue of all the Paris journals summed up only 90,000 copies. The number of new works published yearly in France exceeds 7000.

#### GERMANY

The first steam printing-press was put up in 1848. At present about 11,000,000 books are printed yearly,

of which 5,000,000 are exported. At the annual fair of Leipzig 8000 tons of books are sold, valued at £1,600,000 sterling. Germany had 2350 newspapers in 1882, the oldest being the *Allgemeine Zeitung* of Augsburg, dating from 1794. The new works published yearly average 17,500 on the following subjects:—

|                                 | Annual Average |         |
|---------------------------------|----------------|---------|
|                                 | 1884-85        | 1888-89 |
| Theology . . . . .              | 1,425          | 1,605   |
| Trade, economy, &c. . . . .     | 1,475          | 1,520   |
| Romance and poetry . . . . .    | 1,320          | 1,570   |
| School-books . . . . .          | 2,100          | 2,020   |
| Medicine . . . . .              | 915            | 1,180   |
| Classics . . . . .              | 1,190          | 1,185   |
| History and geography . . . . . | 1,270          | 1,390   |
| Sundries . . . . .              | 6,255          | 7,030   |
| Total . . . . .                 | 15,950         | 17,500  |

## RUSSIA

In 1882 this immense Empire had only 360 printing offices, and 1543 book-shops. The importation of books from France and elsewhere averages two million volumes yearly.

The press turned out in 1882 the following:—

|                          | Newspapers | Books |
|--------------------------|------------|-------|
| St. Petersburg . . . . . | 123        | 714   |
| Moscow . . . . .         | 31         | 525   |
| Provinces . . . . .      | 164        | 853   |
| Total . . . . .          | 318        | 2,092 |

The total number of works published down to 1839 was:—

| Period              | Number |
|---------------------|--------|
| 1750-1807 . . . . . | 4,000  |
| 1808-21 . . . . .   | 9,250  |
| 1822-39 . . . . .   | 13,750 |
| Total . . . . .     | 27,000 |

In 1888 the following number of books was published:—

| Language          | Number | Copies     |
|-------------------|--------|------------|
| Russian . . . . . | 5,318  | 17,400,000 |
| Polish . . . . .  | 716    | 1,890,000  |
| Hebrew . . . . .  | 343    | 1,005,000  |
| German . . . . .  | 311    | 515,000    |
| Various . . . . . | 739    | 2,295,000  |
| Total . . . . .   | 7,427  | 23,105,000 |

The aggregate daily issue of newspapers in St. Petersburg in 1880 was 125,000 copies. There were in the Empire 318 newspapers—264 Russian, 29 German, 6 French, 19 in various provincial tongues. According to the *Statesman's Yearbook* there were in 1889 no fewer than 667 papers and magazines:—

|                   |     |
|-------------------|-----|
| Russian . . . . . | 493 |
| Polish . . . . .  | 76  |
| German . . . . .  | 49  |
| Various . . . . . | 49  |
| Total . . . . .   | 667 |

## AUSTRIA

The first paper was the *Wiener Blatt*, 1671. The number of newspapers (excluding Hungary) was as follows:—

|                |     |                |       |
|----------------|-----|----------------|-------|
| 1847 . . . . . | 79  | 1873 . . . . . | 866   |
| 1862 . . . . . | 345 | 1886 . . . . . | 1,472 |

In twenty-five years down to 1873 there were 1931 papers started, of which—

|                                        |       |
|----------------------------------------|-------|
| Died under twelve months . . . . .     | 910   |
| Between first and fifth year . . . . . | 781   |
| Survived fifth year . . . . .          | 240   |
| Total . . . . .                        | 1,931 |

The age of papers in 1873 was—

|                         |     |
|-------------------------|-----|
| Over 20 years . . . . . | 51  |
| 3 to 20 years . . . . . | 409 |
| Under 3 years . . . . . | 406 |
| Total . . . . .         | 866 |

In 1886 the press of Austria counted—

|                    | Papers |
|--------------------|--------|
| German . . . . .   | 965    |
| Bohemian . . . . . | 263    |
| Italian . . . . .  | 54     |
| Polish . . . . .   | 84     |
| Various . . . . .  | 107    |
| Total . . . . .    | 1,473  |

There were 100 dailies, 450 weeklies, and 923 reviews, &c. In 1887 Hungary had 760 newspapers.

## ITALY

The number of newspapers has been as follows:—

|                |       |
|----------------|-------|
| 1840 . . . . . | 210   |
| 1875 . . . . . | 914   |
| 1887 . . . . . | 1,606 |

In 1875 the press stood thus:—

|                    |     |                        |     |
|--------------------|-----|------------------------|-----|
| Milan . . . . .    | 104 | Dailies . . . . .      | 127 |
| Florence . . . . . | 82  | Weeklies, &c. . . . .  | 787 |
| Turin . . . . .    | 68  |                        |     |
| Rome . . . . .     | 67  | Total . . . . .        | 914 |
| Naples . . . . .   | 52  | 20 years old . . . . . | 80  |
| Various . . . . .  | 541 | 5 to 20 . . . . .      | 236 |
| Total . . . . .    | 914 | Under 5 . . . . .      | 598 |
|                    |     | Total . . . . .        | 914 |

In 1887 the papers were as follows:—

|                      |       |                        |       |
|----------------------|-------|------------------------|-------|
| Dailies . . . . .    | 135   | Political . . . . .    | 420   |
| Weeklies . . . . .   | 667   | Agricultural . . . . . | 198   |
| Reviews, &c. . . . . | 804   | Various . . . . .      | 979   |
| Total . . . . .      | 1,606 | Total . . . . .        | 1,606 |

All were in Italian except twelve French and five English. The book-press issued in 1888 the following works:—

|                                      |        |
|--------------------------------------|--------|
| Religious . . . . .                  | 992    |
| History and geography . . . . .      | 1,141  |
| Agriculture and industries . . . . . | 1,133  |
| Various . . . . .                    | 7,597  |
| Total . . . . .                      | 10,863 |

## SPAIN

In 1889 there were 1161 papers and magazines, with an aggregate issue of 1,250,000, or about 1100 copies each, viz.:—

|                     |       |                      |       |
|---------------------|-------|----------------------|-------|
| Madrid . . . . .    | 327   | Political . . . . .  | 496   |
| Barcelona . . . . . | 177   | Scientific . . . . . | 237   |
| Seville . . . . .   | 38    | Religious . . . . .  | 113   |
| Various . . . . .   | 679   | Various . . . . .    | 315   |
| Total . . . . .     | 1,161 | Total . . . . .      | 1,161 |

## BELGIUM

In 1888 the press stood thus:—

|                      |     |                      |     |
|----------------------|-----|----------------------|-----|
| Dailies . . . . .    | 81  | Political . . . . .  | 365 |
| Weeklies . . . . .   | 594 | Scientific . . . . . | 90  |
| Reviews, &c. . . . . | 197 | Various . . . . .    | 417 |
| Total . . . . .      | 872 | Total . . . . .      | 872 |

In 1878, excluding reviews, there were 180 papers, of which 124 were in French and 56 in Flemish.

## UNITED STATES

The first printing-press was brought from Amsterdam with 49 lbs. of type, and set up at Cambridge, Massachusetts, A.D. 1639, where Harvard University now stands. Another was started by W. Penn at Philadelphia in 1686. The "Hoe" press was invented by Robert Hoe at New York in 1833, and improved by his sons, who have made 10-cylinder presses for many of the great journals of America and Great Britain. The first newspaper was at Boston in 1690, and was at once suppressed by the Governor. The *Boston Newsletter* was founded in 1704; the *Mercury* of Philadelphia in 1719. Franklin began the *New England Courant* in 1721. The *New York Gazette* appeared in 1725.

The number of papers at various dates, and the aggregate issue of copies monthly, were as follows:—

| Year | Dailies | Weeklies | Reviews, &c. | Total  | Issue Monthly |
|------|---------|----------|--------------|--------|---------------|
| 1788 | ...     | ...      | ...          | 37     | 330,000       |
| 1810 | ...     | ...      | ...          | 364    | 1,850,000     |
| 1828 | ...     | ...      | ...          | 892    | 6,100,000     |
| 1840 | 130     | 1,304    | 200          | 1,634  | ...           |
| 1850 | 254     | 1,902    | 370          | 2,526  | 34,400,000    |
| 1860 | 387     | 3,173    | 491          | 4,051  | 74,600,000    |
| 1870 | 574     | 4,256    | 1,001        | 5,871  | 119,600,000   |
| 1880 | 980     | 8,718    | 1,705        | 11,403 | 186,100,000   |
| 1890 | ...     | ...      | ...          | 15,392 | 230,000,000   |

The monthly issue for 1890 is only an estimate.

The circulation was as follows:—

|              | 1850      | 1860       | 1870       | 1880       |
|--------------|-----------|------------|------------|------------|
| Dailies      | 760,000   | 1,480,000  | 2,602,000  | 3,640,000  |
| Weeklies     | 2,940,000 | 7,580,000  | 10,594,000 | 19,460,000 |
| Reviews, &c. | 1,440,000 | 4,605,000  | 7,646,000  | 8,080,000  |
| Total        | 5,140,000 | 13,665,000 | 20,842,000 | 31,180,000 |

The aggregate number of copies issued monthly in the above years was approximately as follows:—

|              | 1850       | 1860       | 1870        | 1880        |
|--------------|------------|------------|-------------|-------------|
| Dailies      | 19,000,000 | 37,000,000 | 65,000,000  | 90,000,000  |
| Weeklies     | 14,000,000 | 33,000,000 | 47,000,000  | 88,000,000  |
| Reviews, &c. | 1,400,000  | 4,600,000  | 7,600,000   | 8,100,000   |
| Total        | 34,400,000 | 74,600,000 | 119,600,000 | 186,100,000 |

Census returns give the following daily issues:—

| States      | Number of Papers |      | Issue     |           |
|-------------|------------------|------|-----------|-----------|
|             | 1870             | 1880 | 1870      | 1880      |
| New England | 60               | 84   | 310,000   | 403,000   |
| Middle      | 171              | 259  | 1,369,000 | 1,799,000 |
| South       | 82               | 122  | 146,000   | 174,000   |
| West        | 261              | 497  | 776,000   | 1,264,000 |
| Total       | 574              | 962  | 2,601,000 | 3,640,000 |

In 1880 there were 10,515 papers in English, 641 in German, 49 in Swedish or Danish, 41 in French, and 26 in Spanish. No fewer than 57 were edited by women.

## JAPAN

In 1888 there were 470 newspapers and magazines, the principal journal being the *Osaka-Nippo*, which issues 10,000 copies daily. The *Japan Mail* and *Hiogo Times* are in English. The aggregate issue of newspapers is

about two millions monthly. The *Life of Washington* was published in 1880 in 42 quarto volumes.

## CHINA

The *Pekin Court Gazette* celebrated in 1884 the completion of its 10th century: it was 640 years old when the first newspaper was printed in Europe in 1524. Secretary Ho has published a translation of Shakespeare, and a Peking publisher has also issued Blackstone's Commentaries in Chinese.

## AUSTRALIA

The first paper was printed at Sydney in 1803. There were 43 in Australasia in 1840, and the number rose to 270 in 1882. The returns at present are incomplete, but may be taken approximately thus:—

|               |     |
|---------------|-----|
| Dailies       | 156 |
| Weeklies, &c. | 252 |
| Total         | 408 |

The number of newspapers sent through the post compared with population thus:—

| Year | Number     | Per Inhab. |
|------|------------|------------|
| 1851 | 2,150,000  | 4.7        |
| 1871 | 17,580,000 | 9.3        |
| 1888 | 93,410,000 | 25.9       |

The above shows an average postal circulation of 300,000 copies daily: the total issue, therefore, can hardly fall short of half-a-million copies, say 13 millions monthly, or one-tenth of that of the United Kingdom in 1882.

## CANADA

In 1765 the first paper was printed at Quebec. There were 88 in 1840, and the latest report showed 565. The number of newspapers sent through the post was:—

| Year | Number     | Per Inhab. |
|------|------------|------------|
| 1870 | 20,200,000 | 5.5        |
| 1887 | 64,300,000 | 13.2       |

The total issue is approximately 350,000 copies daily.

## SOUTH AMERICA

The first printing-press introduced into the New World was that established by the Jesuits at Cordoba, in the province of Tucuman, about 1610. Another was established at Misiones, in Paraguay, about 1680, and some books of this press are in the British Museum, dated 1705-24. General Auchmuty, after the capture of Monte Video, founded a paper called the *Southern Star* in 1806, which lasted only three months. In 1826 Mr. Love founded at Buenos Ayres a weekly called the *British Packet*, which died in 1858. A well-known weekly paper called the *Panama Star*, was founded by Archibald Boyd in 1849, which still flourishes. The first daily paper in the English language which appeared in Spanish America was the *Buenos Ayres Standard*, founded by the author of this Dictionary, 1st May 1861, which is now the best known journal of South America. The press of Argentina in 1886 was as follows:—

|              | Dailies | Weeklies, &c. | Total |
|--------------|---------|---------------|-------|
| Buenos Ayres | 25      | 57            | 82    |
| Provinces    | 13      | 101           | 114   |
| Total        | 38      | 158           | 196   |

There are 4 English, 3 French, 3 Italian, 2 German, and 184 Spanish newspapers, which issue 3,600,000 copies monthly.

## INDIA

In 1880 there were 644 newspapers, of which forty were in English, the rest in Bengali, Marathi, and other native tongues. In 1886 there were published 8900 works, of which nine-tenths were in native languages.

## PRICES

The earliest table of prices is that fixed by the Emperor Diocletian, A.D. 303, for the whole Roman Empire, viz. :—

*Prices in English Pence and English Measure*

| <i>Wines, &amp;c.</i> | <i>Per Pint</i> | <i>Meat, &amp;c.</i>       | <i>Per Lb.</i> | <i>Game</i>              | <i>Per Head</i> |
|-----------------------|-----------------|----------------------------|----------------|--------------------------|-----------------|
| Falernian . . .       | 15              | Beef . . .                 | 4              | Grouse . . .             | 15              |
| Sorrento . . .        | 15              | Mutton . . .               | 4              | Dove . . .               | 12              |
| Sabine . . .          | 15              | Lamb . . .                 | 6              | Pigeon . . .             | 18              |
| Ordinary . . .        | 10              | Pork . . .                 | 6              | Wood do. . .             | 15              |
| Inferior . . .        | 8               | Ham . . .                  | 10             | Partridge . . .          | 24              |
| Rustic . . .          | 4               | Sausages . . .             | 4              | Duck . . .               | 30              |
| Vinegar . . .         | 3               | Venison . . .              | 7              | Rabbit . . .             | 30              |
| Beer . . .            | 2               | Boar . . .                 | 9              | Fowl . . .               | 45              |
| Small do. . .         | 1               | Sea-fish . . .             | 14             | Goose . . .              | 75              |
| Oil, 1st . . .        | 20              | River-fish . . .           | 7              | Fat do. . .              | 150             |
| „ and . . .           | 12              | Salted „ . . .             | 4              | Pheasant . . .           | 80              |
| „ 3rd . . .           | 6               | Snails, dozen . . .        | 1              | Hare . . .               | 110             |
| <i>Groceries</i>      | <i>Per Lb.</i>  | <i>Vegetables, &amp;c.</i> | <i>Per 20</i>  | <i>Clothing, &amp;c.</i> | <i>Pence</i>    |
| Tallow . . .          | 3               | Apples . . .               | 2              | Socks . . .              | 3               |
| Cheese . . .          | 7               | Cherries . . .             | 1              | Tunic . . .              | 12              |
| Butter . . .          | 9               | Almonds . . .              | 1              | Breeches . . .           | 15              |
| Lard . . .            | 9               | Walnuts . . .              | 1              | Cloak . . .              | 30              |
| Honey . . .           | 12              | Chestnuts . . .            | 1              | Boots . . .              | 100             |
| Beans . . .           | 5               | Onions . . .               | 4              | Shoes . . .              | 120             |
| Peas . . .            | 3               | Turnips . . .              | 8              | Slippers . . .           | 50              |
| Lentils . . .         | 5               | Cucumbers . . .            | 8              | Clogs . . .              | 40              |
| 20 eggs . . .         | 15              | Lettuce . . .              | 15             | Saddle . . .             | 400             |
| 20 oysters . . .      | 15              | Cauliflowers . . .         | 15             | Bridle . . .             | 80              |
| 20 figs . . .         | 2               | Melons . . .               | 30             | Whip . . .               | 12              |
| 20 roses . . .        | 1               | Artichokes . . .           | 30             | Bath . . .               | 2               |

According to Landrin and Roswag, the quantity of wheat that could be bought at various epochs for an ounce of silver, say 4s. of present money, was as follows :—

| Period            | Lbs. of Wheat for 4s. | Price per Ton |
|-------------------|-----------------------|---------------|
| B.C. 600 . . .    | 430                   | £ 1 1 6       |
| „ 300 . . .       | 360                   | 1 5 0         |
| „ 200 . . .       | 346                   | 1 6 0         |
| „ 50 . . .        | 330                   | 1 7 0         |
| A.D. 50-300 . . . | 324                   | 1 7 6         |
| „ 301-500 . . .   | 320                   | 1 8 0         |
| „ 501-800 . . .   | 314                   | 1 8 6         |
| „ 801-1400 . . .  | 307                   | 1 9 0         |
| „ 1401-1500 . . . | 314                   | 1 8 6         |
| „ 1501-1600 . . . | 250                   | 1 16 0        |
| „ 1601-1650 . . . | 200                   | 2 4 6         |
| „ 1651-1700 . . . | 154                   | 2 18 0        |
| „ 1701-1750 . . . | 124                   | 3 12 0        |
| „ 1751-1800 . . . | 75                    | 6 0 0         |
| „ 1801-1850 . . . | 37                    | 12 0 0        |
| „ 1851-1880 . . . | 34                    | 13 5 0        |

From the above it would appear that from the time of Alexander the Great down to that of Columbus the price of wheat averaged 28s. per ton; but the discovery of America, in 1492, was followed by such an influx of gold and silver into Europe that prices of all commodities rose in succeeding centuries, and the price of wheat from 1751 to 1800 averaged four times as much as in the time of Columbus.

The tables of Sir Morton Eden and Marquis Garnier from 1401 to 1756, with continuation to the present date, show the price of wheat reduced to English money as follows :—

| Period          | England, per Ton |        |         | Year of Price |        | France, per Ton |        |         | Year of Price |        |
|-----------------|------------------|--------|---------|---------------|--------|-----------------|--------|---------|---------------|--------|
|                 | Highest          | Lowest | Average | Highest       | Lowest | Highest         | Lowest | Average | Highest       | Lowest |
| 1401-10 . . .   | £ 2 15           | £ 0 13 | £ 1 8   | 1401          | 1404   | £ 3 18          | £ 2 7  | £ 3 2   | 1410          | 1406   |
| 1411-20 . . .   | 3 3              | 1 0    | 1 18    | 1416          | 1411   | 2 10            | 1 3    | 1 17    | 1411          | 1413   |
| 1421-30 . . .   | 2 2              | 1 0    | 1 10    | 1429          | 1427   | 9 1             | 1 0    | 4 1     | 1430          | 1428   |
| 1431-40 . . .   | 6 13             | 1 2    | 2 15    | 1434          | 1437   | 13 4            | 1 15   | 6 15    | 1437          | 1435   |
| 1441-50 . . .   | 1 13             | 1 0    | 1 7     | 1442          | 1450   | 5 14            | 0 14   | 2 1     | 1443          | 1448   |
| 1451-60 . . .   | 1 15             | 0 11   | 1 5     | 1451          | 1454   | 2 7             | 0 19   | 1 15    | 1457          | 1452   |
| 1461-70 . . .   | 1 13             | 0 18   | 1 6     | 1464          | 1463   | 2 12            | 0 12   | 1 4     | 1466          | 1464   |

In 1831 was published the following table of average

prices of wheat in various countries during sixty years, per ton :—

| Period        | Great Britain | France | Germany | Russia | Austria | United States | General Average |
|---------------|---------------|--------|---------|--------|---------|---------------|-----------------|
| 1821-30 . . . | £ 5           | £ 5    | £ 5     | £ 5    | £ 5     | £ 5           | £ 5             |
| 1831-40 . . . | 15 0          | 10 10  | 8 3     | 7 17   | 6 10    | 10 0          | 10 2            |
| 1841-50 . . . | 14 6          | 11 0   | 7 14    | 7 7    | 5 17    | 11 7          | 9 12            |
| 1851-60 . . . | 13 7          | 11 10  | 9 7     | 7 0    | 7 10    | 9 14          | 9 15            |
| 1861-70 . . . | 13 17         | 13 0   | 11 13   | 10 16  | 11 7    | 13 3          | 12 6            |
| 1871-80 . . . | 13 0          | 12 10  | 11 7    | 11 7   | 13 0    | 12 10         | 12 6            |
|               | 11 17         | 13 3   | 13 13   | 11 3   | 11 13   | 10 16         | 12 1            |

\* The price of wheat in 1846, the year of the Irish famine, was as follows in various parts of the world, per ton :—

|                   | £ s.  |                      | £ s.  |
|-------------------|-------|----------------------|-------|
| Alexandria . . .  | 5 16  | Edinburgh . . .      | 14 10 |
| Amsterdam . . .   | 20 6  | Genoa . . .          | 13 18 |
| Ancona . . .      | 9 18  | London . . .         | 15 14 |
| Bilbao . . .      | 11 0  | Malaga . . .         | 13 7  |
| Brussels . . .    | 15 8  | Milan . . .          | 13 7  |
| Christiania . . . | 15 2  | New York . . .       | 9 18  |
| Copenhagen . . .  | 11 12 | Odessa . . .         | 8 2   |
| Dantzic . . .     | 13 7  | St. Petersburg . . . | 10 8  |
| Dublin . . .      | 19 14 | Trieste . . .        | 11 0  |

Commendatore Bodio gives the following prices of wheat per ton in ten different markets, from 1869 to 1884 :—

| Year                   | London | Paris | Berlin | Brussels | Amsterdam | Rome  | Vienna | Buda-Pesth | Algiers | New York |
|------------------------|--------|-------|--------|----------|-----------|-------|--------|------------|---------|----------|
| 1869 . . .             | £ 5    | £ 5   | £ 5    | £ 5      | £ 5       | £ 5   | £ 5    | £ 5        | £ 5     | £ 5      |
| 1870 . . .             | 11 8   | 10 18 | 10 0   | 11 8     | 11 10     | 9 18  | 8 6    | ...        | 10 2    | 10 8     |
| 1871 . . .             | 11 4   | 12 4  | 9 18   | 11 18    | 11 18     | 10 12 | 9 5    | ...        | 10 9    | 9 6      |
| 1872 . . .             | 12 16  | 14 15 | 10 15  | 15 0     | 13 4      | 11 18 | 10 18  | 10 0       | 11 18   | 12 6     |

Mr. Newmarch gives the following table of prices at Melbourne during the gold fever:—

|                 | 1852  | 1853  | 1854  | 1855  | 1856  | 1857-58 |
|-----------------|-------|-------|-------|-------|-------|---------|
|                 | s. d. | s. d. | s. d. | s. d. | s. d. | s. d.   |
| Barley, bushel. | 4 0   | 12 0  | 9 6   | 6 0   | ...   | 8 0     |
| Beef, lb.       | 0 5   | 0 6   | 0 7   | 0 6   | 0 5   | 0 6     |
| Beer, hhd.      | 160 0 | 160 0 | 200 0 | 200 0 | 182 0 | 180 0   |
| Brandy, gallon  | 12 3  | 13 0  | 10 3  | 12 0  | 13 9  | 12 2    |
| Bricks, 1000    | 120 0 | 235 0 | 175 0 | 80 0  | 65 0  | 135 0   |
| Candles, lb.    | 2 3   | 2 3   | 1 10  | 1 7   | 1 7   | 1 10    |
| Coffee, cwt.    | 70 0  | 76 0  | 56 0  | 51 0  | 90 0  | 69 0    |
| Ducks, pair     | 9 0   | 15 0  | 24 0  | 20 0  | 18 0  | 17 0    |
| Flour, cwt.     | 33 0  | 30 0  | 33 0  | 41 0  | 27 0  | 33 0    |
| Goose           | 7 6   | 18 0  | 23 0  | 20 0  | 19 0  | 17 6    |
| Hay, cwt.       | 16 0  | 29 0  | 30 0  | 15 0  | 8 0   | 19 6    |
| Hens, pair      | 8 6   | 15 0  | 14 0  | 15 0  | 15 0  | 13 6    |
| Oats, bushel    | 5 9   | 8 6   | 10 3  | 8 6   | ...   | 8 3     |
| Ox              | 120 0 | 165 0 | 220 0 | 220 0 | 195 0 | 184 0   |
| Potatoes, cwt.  | 14 6  | 21 6  | 23 0  | 10 6  | 10 0  | 16 0    |
| Rice, cwt.      | 9 0   | 11 6  | 16 0  | 15 6  | 14 6  | 13 6    |
| Sheep           | 5 6   | 13 0  | 22 6  | 18 6  | 18 6  | 15 6    |
| Sugar, cwt.     | 21 3  | 19 6  | 23 0  | 28 0  | ...   | 23 0    |
| Tea, chest      | 63 0  | 96 0  | 102 0 | 83 0  | 82 0  | 85 0    |
| Tobacco, lb.    | 2 2   | 2 0   | 2 2   | 2 0   | ...   | 2 1     |
| Wheat, bushel   | 8 6   | 9 0   | 14 3  | 15 6  | 8 2   | 11 1    |
| Wine, gallon    | 3 4   | 3 4   | 3 9   | 4 2   | 3 4   | 3 7     |

He also gives the prices of food at San Francisco under similar circumstances in 1854 as follows:—

|             | s. d. | s. d.          | s. d. |
|-------------|-------|----------------|-------|
| Beef, lb.   | 1 7   | Duck           | 4 2   |
| Butter, lb. | 4 2   | Hen            | 11 0  |
| Eggs, doz.  | 5 3   | Cabbage        | 1 0   |
|             |       | Cauliflower    | 2 0   |
|             |       | Milk, quart    | 1 0   |
|             |       | Potatoes, cwt. | 13 0  |

Neumann Spallart ascertained the prices of all kinds of grain in 1884 in the principal countries of the world to be as follows:—

|               | Per Ton |      |        |      |       |
|---------------|---------|------|--------|------|-------|
|               | Wheat   | Rye  | Barley | Oats | Maize |
|               | £ s.    | £ s. | £ s.   | £ s. | £ s.  |
| England       | 8 2     | ...  | 8 1    | 7 5  | 5 14  |
| Russia        | 4 16    | 4 6  | 3 19   | 3 8  | ...   |
| France        | 7 16    | 7 0  | 7 3    | 7 10 | 7 12  |
| Germany       | 7 16    | 7 0  | 7 0    | 6 1  | ...   |
| Italy         | 8 11    | 5 17 | 6 13   | 4 17 | 6 7   |
| Austria       | 4 10    | 3 19 | 3 15   | 3 8  | 3 10  |
| Hungary       | 3 12    | 3 10 | 2 17   | 2 13 | 3 3   |
| Denmark       | 7 7     | 6 14 | 7 0    | 6 15 | ...   |
| Holland       | 8 11    | 6 14 | 6 9    | 6 6  | ...   |
| United States | 5 2     | 4 10 | 5 0    | 4 8  | 3 3   |
| Average       | 6 12    | 5 8  | 5 14   | 5 6  | 5 6   |

The prices of various commodities in different countries in 1888 were as follows:—

|                    | G. Britain | France | Germany | Austria | Sweden | Norway | Belgium | Switzerland | U. States |
|--------------------|------------|--------|---------|---------|--------|--------|---------|-------------|-----------|

## PRICES OF BRITISH IMPORTS AND EXPORTS, 1854-88.

There are ninety-five principal articles of British commerce, and these attained their highest and lowest prices in the years stated below:—

| Years   | Highest | Lowest | Years           | Highest | Lowest |
|---------|---------|--------|-----------------|---------|--------|
| 1854-55 | 12      | 11     | Brought forward | 75      | 25     |
| 1856-57 | 19      | 0      | 1874-75         | 6       | 0      |
| 1858-59 | 1       | 2      | 1876-77         | 2       | 0      |
| 1860-61 | 1       | 0      | 1878-79         | 2       | 7      |
| 1862-63 | 3       | 4      | 1880-81         | 1       | 0      |
| 1864-65 | 12      | 3      | 1882-83         | 3       | 1      |
| 1866-67 | 9       | 1      | 1884-85         | 2       | 7      |
| 1868-69 | 7       | 3      | 1886-87         | 2       | 30     |
| 1870-71 | 2       | 1      | 1888            | 0       | 16     |
| 1872-73 | 9       | 0      | 1889            | 2       | 9      |
| Total   | 75      | 25     | Total           | 95      | 95     |

The highest and lowest prices recorded, and the years in which these prices occurred, are given as follows:—

|              | Highest | Lowest  | Year of Price | Average Price for 36 Years |
|--------------|---------|---------|---------------|----------------------------|
|              | £ s. d. | £ s. d. | Highest       | Lowest                     |
| Bacon, cwt.  | 3 6 0   | 1 15 0  | 1869          | 1862                       |

The preceding table gives the following averages :—

| Years     | Wheat   | Barley | Oats  |
|-----------|---------|--------|-------|
| 1786-90   | £ 11 16 | £ 5 17 | £ 4 8 |
| 1791-1800 | 15 18   | 8 11   | 5 13  |
| 1801-10   | 21 0    | 10 10  | 7 0   |
| 1811-20   | 21 18   | 11 7   | 7 12  |
| 1821-30   | 14 18   | 8 6    | 6 8   |
| 1831-40   | 14 5    | 8 4    | 5 14  |
| 1841-50   | 13 7    | 7 18   | 5 5   |
| 1851-60   | 13 13   | 8 13   | 5 18  |
| 1861-70   | 12 15   | 9 0    | 5 18  |
| 1871-80   | 12 16   | 9 10   | 6 7   |
| 1881-89   | 9 5     | 6 17   | 5 0   |

The prices of meat at Smithfield Market, London, averaged as follows, per ton, from 1835 to date :—

| Year. | £ s.  | Year. | £ s.  | Year.   | £ s.  |
|-------|-------|-------|-------|---------|-------|
| 1835  | 49 10 | 1853  | 56 0  | 1871    | 69 10 |
| 1836  | 53 7  | 1854  | 54 18 | 1872    | 67 5  |
| 1837  | 53 7  | 1855  | 54 18 | 1873    | 75 3  |
| 1838  | 54 10 | 1856  | 58 5  | 1874    | 76 5  |
| 1839  | 52 10 | 1857  | 56 0  | 1875    | 76 5  |
| 1840  | 54 10 | 1858  | 58 5  | 1876    | 74 0  |
| 1841  | 56 10 | 1859  | 58 5  | 1877    | 72 18 |
| 1842  | 55 10 | 1860  | 60 10 | 1878    | 72 18 |
| 1843  | 48 8  | 1861  | 58 5  | 1879    | 71 15 |
| 1844  | 48 8  | 1862  | 58 5  | 1880-81 | 69 10 |
| 1845  | 51 10 | 1863  | 57 3  | 1882    | 75 3  |
| 1846  | 48 8  | 1864  | 65 0  | 1883    | 71 15 |
| 1847  | 53 9  | 1865  | 60 10 | 1884    | 70 12 |
| 1848  | 57 10 | 1866  | 63 18 | 1885    | 61 12 |
| 1849  | 48 8  | 1867  | 58 5  | 1886    | 59 7  |
| 1850  | 47 7  | 1868  | 62 15 | 1887    | 58 5  |
| 1851  | 51 10 | 1869  | 67 5  | 1888    | 59 7  |
| 1852  | 50 7  | 1870  | 67 5  | 1889    | 61 0  |

The prices at Christmas, per stone of 8 lbs. beef, averaged thus :—

| Years   | Pence | Years   | Pence | Years   | Pence |
|---------|-------|---------|-------|---------|-------|
| 1841-42 | 50    | 1857-58 | 49    | 1873-74 | 70    |
| 1843-44 | 50    | 1859-60 | 53    | 1875-76 | 66    |
| 1845-46 | 54    | 1861-62 | 50    | 1877-78 | 63    |
| 1847-48 | 48    | 1863-64 | 54    | 1879-80 | 61    |
| 1849-50 | 44    | 1865-66 | 54    | 1881-82 | 64    |
| 1851-52 | 40    | 1867-68 | 57    | 1883-84 | 61    |
| 1853-54 | 51    | 1869-70 | 57    | 1885-86 | 52    |
| 1855-56 | 50    | 1871-72 | 60    | 1887-89 | 53    |

Tooke and Newmarch give the prices of hay and straw per ton in twenty-three years, thus :—

| Year                   | Hay  | Straw | Year                   | Hay  | Straw |
|------------------------|------|-------|------------------------|------|-------|
|                        | £ s. | £ s.  |                        | £ s. | £ s.  |
| 1834 . . .             | 5 0  | 1 13  | 1846 . . .             | 4 2  | 1 13  |
| 1835 . . .             | 4 19 | 1 18  | 1847 . . .             | 3 14 | 1 15  |

| 1872 . . . . . | 13 16     | 9 10     | 9 10     | 4 18     |
| 1873 . . . . . | 14 5      | 11 6     | 10 5     | 5 13     |
| 1874 . . . . . | 10 14     | 9 8      | 9 8      | 6 5      |
| 1875 . . . . . | 10 14     | 9 5      | 9 6      | 6 5      |
| 1876 . . . . . | 11 7      | 9 3      | 7 15     | 5 14     |
| 1877 . . . . . | 12 16     | 10 7     | 7 14     | 5 17     |
| 1878 . . . . . | 12 5      | 9 1      | 9 7      | 5 11     |
| 1879 . . . . . | 9 16      | 7 0      | 8 18     | 4 7      |
| 1880 . . . . . | 12 19     | 9 16     | 9 5      | 4 16     |

The foregoing table is summed up as follows :—

| Period            | Wheat     | Rye      | Barley    | Oats      |
|-------------------|-----------|----------|-----------|-----------|
| 1826-30 . . . . . | £ s. 7 14 | £ s. 5 5 | £ s. 3 11 | £ s. 2 12 |
| 1831-40 . . . . . | 8 0       | 5 16     | 3 17      | 2 10      |
| 1841-50 . . . . . | 9 6       | 6 15     | 4 8       | 2 18      |
| 1851-60 . . . . . | 15 17     | 8 15     | 6 4       | 4 3       |
| 1861-70 . . . . . | 12 9      | 8 15     | 7 9       | 4 13      |
| 1871-80 . . . . . | 12 2      | 9 9      | 9 3       | 5 8       |

The prices of twenty-one principal articles of consumption were as follows, per ton :—

|                     | 1880     | 1887      | 1880               | 1887      |
|---------------------|----------|-----------|--------------------|-----------|
| Barley . . . . .    | £ s. 9 2 | £ s. 7 10 | Pork . . . . .     | £ s. 55 0 |
| Beef . . . . .      | 49 0     | 46 0      | Potatoes . . . . . | 1 16      |
| Coal . . . . .      | 0 5      | 0 4       | Rice . . . . .     | 13 0      |
| Coffee . . . . .    | 63 0     | 78 0      | Rye . . . . .      | 7 4       |
| Copper . . . . .    | 63 0     | 47 0      | Silk . . . . .     | 136 0     |
| Cotton . . . . .    | 55 0     | 52 0      | Sugar . . . . .    | 33 0      |
| Herring . . . . .   | 12 0     | 7 0       | Tin . . . . .      | 79 0      |
| Iron . . . . .      | 2 12     | 2 10      | Tobacco . . . . .  | 53 0      |
| Mutton . . . . .    | 51 0     | 44 0      | Wheat . . . . .    | 11 14     |
| Oats . . . . .      | 6 14     | 5 12      | Wool . . . . .     | 167 0     |
| Petroleum . . . . . | 8 0      | 6 0       | Zinc . . . . .     | 160 0     |

The prices of live stock in 1883 were as follows :—

|                       | Horses    | Oxen       | Milch Cows |
|-----------------------|-----------|------------|------------|
| Prussia . . . . .     | £ s. 23 6 | £ s. 13 16 | £ s. 11 6  |
| Bavaria . . . . .     | 22 8      | 13 12      | 10 8       |
| Saxony . . . . .      | 33 0      | 13 0       | 12 2       |
| Wurtemberg . . . . .  | 20 10     | 14 12      | 11 10      |
| All Germany . . . . . | 23 18     | 14 0       | 11 8       |

The prices of four principal articles in Germany in late years were as follows, per ton :—

| Year           | Cotton    | Wool       | Lead      | Iron      |
|----------------|-----------|------------|-----------|-----------|
| 1879 . . . . . | £ s. 62 0 | £ s. 167 0 | £ s. 15 0 | £ s. 2 12 |
| 1885 . . . . . | 55 0      | 134 0      | 11 0      | 2 8       |
| 1886 . . . . . | 49 0      | 133 0      | 13 0      | 2 3       |
| 1887 . . . . . | 52 0      | 116 0      | 12 10     | 2 10      |
| 1888 . . . . . | 53 0      | 130 0      | 14 0      | 2 12      |

## AUSTRIA

The prices of grain in fifteen years, taking the gulden at 20 pence, were as follows, per ton :—

|                | Wheat      | Rye      | Barley   | Oats     | Maize    |
|----------------|------------|----------|----------|----------|----------|
| 1874 . . . . . | £ s. 11 14 | £ s. 9 9 | £ s. 9 0 | £ s. 7 2 | £ s. 7 2 |
| 1875 . . . . . | 9 7        | 7 5      | 7 11     | 7 9      | 5 0      |
| 1876 . . . . . | 9 16       | 8 0      | 7 15     | 7 2      | 5 3      |
| 1877 . . . . . | 10 15      | 8 0      | 8 18     | 6 18     | 6 11     |
| 1878 . . . . . | 9 14       | 6 9      | 8 0      | 5 15     | 5 18     |
| 1879 . . . . . | 10 16      | 7 5      | 9 15     | 5 18     | 5 9      |
| 1880 . . . . . | 11 14      | 9 0      | 8 5      | 6 2      | 6 11     |
| 1881 . . . . . | 10 17      | 8 10     | 8 15     | 6 5      | 5 14     |
| 1882 . . . . . | 9 18       | 7 7      | 8 10     | 6 5      | 6 14     |
| 1883 . . . . . | 8 17       | 7 0      | 9 0      | 6 0      | 5 14     |
| 1884 . . . . . | 8 0        | 6 10     | 8 17     | 6 0      | 5 18     |
| 1885 . . . . . | 7 7        | 6 5      | 7 2      | 5 17     | 5 7      |
| 1886 . . . . . | 7 14       | 6 0      | 7 18     | 5 11     | 5 5      |
| 1887 . . . . . | 7 10       | 5 15     | 7 14     | 5 7      | 5 11     |
| 1888 . . . . . | 6 17       | 5 7      | 7 10     | 5 0      | 5 3      |

The averages, in periods of five years, were as follows :—

| Period                 | Wheat     | Rye       | Barley   | Oats      | Maize     |
|------------------------|-----------|-----------|----------|-----------|-----------|
| 1874-78 . . . . .      | £ s. 10 5 | £ s. 7 17 | £ s. 8 5 | £ s. 6 17 | £ s. 5 19 |
| 1879-83 . . . . .      | 10 8      | 7 16      | 8 17     | 6 2       | 6 0       |
| 1884-88 . . . . .      | 7 10      | 6 0       | 7 16     | 5 11      | 5 9       |
| Gen. average . . . . . | 9 7       | 7 4       | 8 6      | 6 3       | 5 16      |

The prices of some other commodities were as follows :—

|                         | 1882      | 1887      |                            | 1882       | 1887      |

Nothing is more surprising than the great difference of prices of grain in Italian cities. For instance, wheat in 1865 was £2 per ton dearer in Florence than in Genoa, and in 1877 it was £3 dearer in Genoa than in Florence, as shown in the following table :—

| Year         | Wheat     |            | Maize    |           |
|--------------|-----------|------------|----------|-----------|
|              | Genoa     | Florence   | Verona   | Florence  |
| 1862 . . . . | £ s. 13 0 | £ s. 14 16 | £ s. 9 8 | £ s. 7 16 |
| 1863 . . . . | 12 10     | 14 7       | 6 14     | 5 8       |
| 1864 . . . . | 12 0      | 13 19      | 6 15     | 6 8       |
| 1865 . . . . | 11 0      | 13 0       | 6 6      | 6 8       |

| 1884 . . . .      | 14 4      | 8 5               | 20 4                   |
| 1885 . . . .      | 12 10     | 10 8              | 18 8                   |
| 1862-65 . . . .   | 12 19     | 8 13              | 18 15                  |
| 1866-70 . . . .   | 12 19     | 7 17              | 19 2                   |
| 1871-75 . . . .   | 14 11     | 6 2               | 18 4                   |
| 1876-80 . . . .   | 14 9      | 8 12              | 19 14                  |
| 1881-85 . . . .   | 13 11     | 8 15              | 18 12                  |
| General average . | 13 18     | 8 0               | 18 17                  |

Rice ranged from £10 14s. in 1870 to £15 12s. in 1876; wine from £4 16s. in 1871 to £12 6s. in 1878; and oil from £16 4s. in 1870 to £23 4s. in 1878. It would seem, therefore, that wine is subject to much more violent fluctuations of price than either rice or oil.

# PRICES

The preceding table may be summed up thus:—

| Years    | Average, Pence | Maximum Year |
|----------|----------------|--------------|
| 1800-10. | 20.1           | 1800         |
| 1811-20. | 23.1           | 1817         |
| 1821-30. | 15.3           | 1830         |
| 1831-40. | 18.7           | 1847         |
| 1851-60. | 20.2           | 1854         |
| 1861-70. | 18.7           | 1867         |
| 1871-81. | 21.0           | 1872         |

The price of the best potatoes per ton was as follows:—

| Year | £ s. | Year | £ s. | Year | £ s. |
|------|------|------|------|------|------|
| 1846 | 5 10 | 1858 | 3 8  | 1870 | 4 4  |
| 1847 | 7 10 | 1859 | 4 2  | 1871 | 4 4  |
| 1848 | 4 2  | 1860 | 5 16 | 1872 | 6 0  |
| 1849 | 3 7  | 1861 | 5 19 | 1873 | 5 0  |
| 1850 | 3 12 | 1862 | 3 11 | 1874 | 3 12 |
| 1851 | 4 14 | 1863 | 4 1  | 1875 | 4 4  |
| 1852 | 5 4  | 1864 | 4 8  | 1876 | 5 0  |
| 1853 | 5 7  | 1865 | 4 12 | 1877 | 5 1  |
| 1854 | 7 0  | 1866 | 4 4  | 1878 | 5 8  |
| 1855 | 5 12 | 1867 | 5 13 | 1879 | 5 13 |
| 1856 | 4 18 | 1868 | 4 9  | 1880 | 4 11 |
| 1857 | 5 10 | 1869 | 3 14 | 1881 | 5 8  |

## DENMARK.

Dr. Broch gives the following table of prices per ton at Copenhagen:—

| Period    | Rye      | Barley    | Oats     | Period  | Rye       | Barley    | Oats     |
|-----------|----------|-----------|----------|---------|-----------|-----------|----------|
| 1601-10   | £ s. 3 8 | £ s. 2 18 | £ s. ... | 1851-52 | £ s. 6 10 | £ s. 4 18 | £ s. 3 3 |
| 1611-20   | 3 9      | 3 3       | ...      | 1853-54 | 9 7       | 6 8       | 4 13     |
| 1621-30   | 5 16     | 4 1       | ...      | 1855-56 | 9 8       | 7 9       | 5 3      |
| 1631-40   | 4 8      | 3 12      | 2 1      | 1857    | 6 1       | 5 16      | 4 4      |
| 1641-50   | 4 16     | 3 17      | 2 1      | 1858    | 5 12      | 5 3       | 3 17     |
| 1651-60   | 4 1      | 3 9       | 1 15     | 1859    | 6 0       | 5 3       | 3 17     |
| 1661-70   | 4 7      | 3 9       | 2 1      | 1860    | 6 15      | 6 4       | 3 19     |
| 1671-80   | 4 1      | 3 3       | 2 4      | 1861    | 8 12      | 6 5       | 4 0      |
| 1681-90   | 3 18     | 3 0       | 1 17     | 1862    | 6 11      | 5 8       | 3 18     |
| 1691-1700 | 5 1      | 3 11      | 2 3      | 1863    | 5 10      | 4 11      | 3 3      |
| 1701-10   | 4 1      | 3 1       | 1 14     | 1864    | 6 10      | 5 6       | 4 7      |
| 1711-20   | 4 6      | 3 4       | 1 18     | 1865    | 7 14      | 6 1       | 4 15     |
| 1721-30   | 3 15     | 2 17      | 1 12     | 1866    | 7 7       | 7 3       | 4 11     |
| 1731-40   | 3 12     | 2 16      | 1 9      | 1867    | 11 4      | 7 19      | 5 10     |
| 1741-50   | 4 2      | 2 14      | 1 11     | 1868    | 8 17      | 8 11      | 6 6      |
| 1751-60   | 4 4      | 3 2       | 2 0      | 1869    | 6 8       | 5 8       | 3 17     |
| 1761-70   | 5 6      | 3 11      | 2 1      | 1870    | 7 6       | 6 8       | 4 9      |
| 1771-80   | 5 5      | 3 9       | 2 3      | 1871    | 8 3       | 6 19      | 4 11     |
| 1781-90   | 5 14     | 4 9       | 2 18     | 1872    | 7 16      | 7 10      | 4 12     |
| 1791-1800 | 6 10     | 4 11      | 3 3      | 1873    | 9 12      | 8 6       | 5 10     |
| 1801-10   | 9 18     | 5 14      | 3 17     | 1874    | 8 8       | 8 3       | 6 0      |
| 1810-20   | 3 18     | 2 16      | 2 0      | 1875    | 8 0       | 7 14      | 5 12     |
| 1821-30   | 4 15     | 3 9       | 2 9      | 1876    | 8 8       | 7 16      | 5 17     |
| 1831-40   | 5 9      | 4 3       | 2 18     | 1877    | 7 3       | 7 9       | 4 16     |
| 1841-50   | 7 5      | 6 0       | 4 4      | 1878    | 6 8       | 6 10      | 4 2      |
| 1851-60   | 7 13     | 6 6       | 4 9      | 1879    | 7 4       | 7 2       | 4 7      |
| 1861-70   | 8 1      | 7 10      | 5 0      | 1880    | 9 7       | 7 10      | 5 1      |

The prices from 1811 to 1818 cannot be given, owing to the fluctuations of paper money. All the above prices are reduced to silver.

The preceding table arranged in half centuries shows thus:—

| Period    | Rye      | Barley    | Oats     |
|-----------|----------|-----------|----------|
| 1601-50   | £ s. 4 8 | £ s. 3 11 | £ s. 2 1 |
| 1651-1700 | 4 6      | 3 8       | 2 0      |
| 1701-50   | 4 0      | 2 18      | 1 13     |
| 1751-1800 | 5 8      | 4 10      | 2 9      |
| 1801-50   | 4 13     | 3 9       | 2 9      |
| 1851-80   | 7 14     | 6 11      | 4 11     |

## SWEDEN AND NORWAY

| 1889 | 20 0          | 77 0          | 39 0        | 39 0       | 35 0       | 25 6       | 76 0         | 45 0         | 41 0          | 32 0                   | 5 9        |

Retail prices in 1870 were as follows :—

|                   | New England | Middle States | Southern | Western | Union |
|-------------------|-------------|---------------|----------|---------|-------|
| Beef, lb.         | 0 10        | 0 9           | 0 5      | 0 6     | 0 7   |
| Butter, lb.       | 1 10        | 1 8           | 1 5      | 1 3     | 1 7   |
| Coal, ton         | 46 0        | 31 0          | 40 0     | 32 0    | 44 0  |
| Cheese, lb.       | 0 10        | 1 0           | 1 1      | 1 0     | 1 0   |
| Coffee, ..        | 1 4         | 1 3           | 1 2      | 1 2     | 1 3   |
| Eggs, dozen       | 1 5         | 1 2           | 1 0      | 1 1     | 1 2   |
| Flour, barrel     | 40 0        | 30 0          | 36 0     | 25 0    | 30 0  |
| Lard, lb.         | 1 0         | 0 10          | 1 0      | 0 11    | 0 11  |
| Mutton, ..        | 0 8         | 0 7           | 0 5      | 0 5     | 0 7   |
| Milk, gallon      | 1 2         | 1 6           | 2 0      | 1 2     | 1 6   |
| Molasses, gallon  | 4 2         | 4 0           | 4 2      | 4 4     | 4 2   |
| Pork, lb.         | 0 9         | 0 7           | 0 6      | 0 6     | 0 7   |
| Potatoes, bushel  | 2 10        | 3 5           | 4 6      | 2 2     | 3 0   |
| Petroleum, gallon | 2 0         | 2 3           | 3 0      | 2 4     | 2 6   |
| Rice, cwt.        | 60 0        | 60 0          | 60 0     | 60 0    | 60 0  |
| Soap, ..          | 56 0        | 47 0          | 51 0     | 47 0    | 50 0  |
| Sugar, ..         | 65 0        | 70 0          | 78 0     | 74 0    | 70 0  |
| Tea, lb.          | 4 10        | 5 6           | 8 0      | 6 8     | 5 10  |

## PRICE-LEVELS.

Mr. Jevons constructed several price-levels from 1782 to 1869, as follows :—

Table of Forty Classified Articles.

| Years     | Metals | Fibre | Grain | Colonial Products | General Average |
|-----------|--------|-------|-------|-------------------|-----------------|
| 1782      | 100    | 100   | 100   | 100               | 100             |
| 1783-90   | 95     | 102   | 109   | 88                | 91              |
| 1791-1800 | 116    | 119   | 135   | 86                | 112             |
| 1801-10   | 150    | 157   | 170   | 71                | 133             |
| 1811-20   | 124    | 134   | 166   | 72                | 115             |
| 1821-30   | 102    | 97    | 135   | 56                | 88              |
| 1831-40   | 91     | 96    | 134   | 53                | 83              |
| 1841-50   | 88     | 76    | 127   | 42                | 73              |
| 1851-60   | 97     | 84    | 132   | 39                | 79              |
| 1861-69   | 93     | 105   | 128   | 40                | 77              |

General Table at Intervals of Ten Years.

| Year | Number | Year | Number | Year | Number |
|------|--------|------|--------|------|--------|
| 1789 | 100    | 1819 | 131    | 1849 | 75     |
| 1799 | 151    | 1829 | 93     | 1859 | 90     |
| 1809 | 184    | 1839 | 108    | 1869 | 89     |

Table of Price-Level from 1846 to 1869.

| Year | Number | Year | Number | Year | Number |
|------|--------|------|--------|------|--------|
| 1846 | 100    | 1854 | 115    | 1862 | 108    |
| 1847 | 106    | 1855 | 112    | 1863 | 107    |
| 1848 | 89     | 1856 | 117    | 1864 | 106    |
| 1849 | 85     | 1857 | 123    | 1865 | 105    |
| 1850 | 87     | 1858 | 108    | 1866 | 111    |
| 1851 | 87     | 1859 | 110    | 1867 | 102    |
| 1852 | 89     | 1860 | 112    | 1868 | 104    |
| 1853 | 106    | 1861 | 110    | 1869 | 103    |

According to the prices given by Arthur Young, the following is a general price-level from A.D. 1301 down to his time, and continued to 1884 :—

|        | 1301-1400 | 1401-1500 | 1501-1600 | 1601-1700 | 1701-1800 | 1801-80 | 1880-84 |
|--------|-----------|-----------|-----------|-----------|-----------|---------|---------|
| Cattle | 100       | 95        | 80        | 160       | 246       | 350     | 500     |
| Beer   | 100       | 80        | 80        | 80        | 160       | 280     | 350     |
| Butter | 100       | 75        | 75        | 100       | 125       | 250     | 350     |
| Grain  | 100       | 95        | 133       | 270       | 330       | 350     | 240     |
| Horses | 100       | 105       | 100       | 132       | 346       | 700     | 800     |
| Wine   | 100       | 70        | 130       | 200       | 500       | 600     | 700     |
| Eggs   | 100       | 100       | 70        | 70        | 135       | 160     | 270     |
| Meat   | 100       | 85        | 65        | 200       | 300       | 400     | 550     |
| Total  | 800       | 705       | 733       | 1212      | 2142      | 3090    | 3760    |

The following price-levels embrace a period of forty years to 1884 :—

| Years   | Jevons | Economist | Hamburg | Soetbeer | Average |
|---------|--------|-----------|---------|----------|---------|
| 1845-50 | 100    | 100       | 100     | 100      | 100     |
| 1851-55 | 107    | ...       | 112     | 114      | 111     |
| 1856-60 | 120    | 127       | 121     | 125      | 123     |
| 1861-65 | 123    | ...       | 124     | 127      | 125     |
| 1866-70 | 121    | 140       | 124     | 125      | 127     |
| 1871-75 | ...    | 127       | 133     | 136      | 132     |
| 1876-80 | ...    | 115       | 123     | 127      | 122     |
| 1881-84 | ...    | 105       | 118     | 124      | 116     |

Sauerbeck's and other index-numbers for late years are as follows :—

| Sauerbeck |     | Kral    |     | Economist |     | Hamburg |     |
|-----------|-----|---------|-----|-----------|-----|---------|-----|
| Year      | No. | Year    | No. | Year      | No. | Year    | No. |
| 1867-77   | 100 | 1861-70 | 100 | 1845-50   | 100 | 1847-50 | 100 |

| " woollen . . . . .    | 100     | 123     | 112     | 82      | 77    |
| Zinc . . . . .         | 100     | 79      | 74      | 51      | 55    |
| Total . . . . .        | 5,000   | 5,077   | 4,872   | 4,151   | 4,047 |

The summary of import and export numbers is:—

|                   | Imports | Exports | Total  |
|-------------------|---------|---------|--------|
| 1854-60 . . . . . | 5,000   | 5,000   | 10,000 |
| 1861-70 . . . . . | 4,921   | 5,077   | 9,998  |
| 1871-80 . . . . . | 4,727   | 4,872   | 9,599  |
| 1881-88 . . . . . | 4,252   | 4,151   | 8,403  |
| 1889 . . . . .    | 4,026   | 4,047   | 8,073  |

The foregoing method, however, has the disadvantage that all articles are treated as of equal importance, wheat the same as gunpowder in affecting the level of prices. The British Association appointed a committee under Professor Edgeworth to frame a more suitable method of price-level, and the committee adopted one similar to that of Mr. Jevons.

The following are the various scales that have been proposed:—

|                          | Jevons | Edgeworth | Giffen | Sauerbeck | Soetbeer | Mulhall | Average |
|--------------------------|--------|-----------|--------|-----------|----------|---------|---------|
| Butter* . . . . .        | 35     | 75        | 75     | 30        | 45       | 80      | 57      |
| Sugar . . . . .          | 35     | 25        | 25     | 55        | 45       | 15      | 33      |
| Wine . . . . .           | 35     | 25        | 25     | ...       | 70       | 45      | 40      |
| Wool . . . . .           | 35     | 25        | 25     | 75        | 20       | 20      | 33      |
| Silk . . . . .           | 35     | 25        | 25     | 10        | 20       | 15      | 22      |
| Tea and coffee . . . . . | 35     | 25        | 25     | 20        | 20       | 15      | 23      |
| Wheat . . . . .          | 35     | 65        | 50     | 110       | 45       | 100     | 67      |
| Barley . . . . .         | 35     | 65        | 50     | 55        | 45       | 35      | 47      |
| Oats . . . . .           | 35     | 65        | 50     | 60        | 20       | 50      | 47      |
| Metals . . . . .         | 70     | 50        | 50     | 15        | 40       | 80      | 51      |
| Coal . . . . .           | ...    | ...       | 100    | ...       | ...      | 40      | 70      |
| Indigo . . . . .         | 35     | 1         | 10     | 5         | 20       | 1       | 12      |
| Flax . . . . .           | 35     | 3         | 30     | 10        | 20       | 5       | 17      |
| Palm-oil . . . . .       | 35     | 1         | 10     | ...       | 20       | 1       | 13      |
| Timber . . . . .         | 70     | 30        | 30     | 20        | 70       | 60      | 47      |
| Leather . . . . .        | 70     | 25        | 25     | 20        | 70       | 40      | 68      |
| Meat . . . . .           | 110    | 100       | 100    | 155       | 90       | 120     | 113     |
| Cotton . . . . .         | 110    | 30        | 25     | 100       | 20       | 20      | 51      |
| Sundries . . . . .       | 150    | 365       | 370    | 260       | 320      | 258     | 195     |
| Total . . . . .          | 1000   | 1000      | 1000   | 1000      | 1000     | 1000    | 1000    |

\* Butter includes also cheese and milk.

In the foregoing scales it will be observed that our writers took no account of coal, and one omitted wine. There seems to have been no good reason for inserting indigo and palm-oil, which are items of trifling value, while fish, lard, rice, potatoes, and other important articles, are omitted. Another feature that seems inexplicable is, that four of the above writers give barley the same relative importance as wheat, whereas the latter, (see page 12) ought to be three times greater than the former. A similar remark applies to oats, which should stand for only half the value of wheat.

A general price-level for the principal countries from 1860-62 to 1883 is taken as follows from my *History of Prices* (Longmans, 1885):—

| Year    | Ratio of Values |        |       |         |               |         |
|---------|-----------------|--------|-------|---------|---------------|---------|
|         | United Kingdom  | France | Italy | Belgium | United States | Average |
| 1860-62 | 100             | 100    | 100   | 100     | 100           | 100     |
| 1863    | 121             | 103    | 101   | 94      | 90            | 109     |
| 1864    | 138             | 107    | 100   | 96      | 106           | 120     |
| 1865    | 126             | 102    | 107   | 92      | 104           | 113     |
| 1866    | 127             | 98     | 98    | 97      | 170           | 116     |
| 1867    | 115             | 86     | 107   | 90      | 99            | 102     |
| 1868    | 110             | 87     | 105   | 87      | 107           | 101     |
| 1869    | 109             | 87     | 106   | 81      | 125           | 101     |
| 1870    | 100             | 80     | 105   | 85      | 108           | 95      |
| Average | 118             | 94     | 104   | 90      | 114           | 107     |
| 1871    | 100             | 83     | 106   | 97      | 112           | 97      |
| 1872    | 106             | 87     | 118   | 105     | 125           | 102     |
| 1873    | 110             | 89     | 122   | 103     | 100           | 103     |
| 1874    | 104             | 83     | 107   | 99      | 102           | 97      |
| 1875    | 99              | 78     | 96    | 97      | 96            | 92      |
| 1876    | 93              | 80     | 109   | 93      | 85            | 89      |
| 1877    | 94              | 77     | 100   | 97      | 101           | 91      |
| 1878    | 87              | 76     | 92    | 92      | 83            | 84      |
| 1879    | 84              | 80     | 97    | 89      | 90            | 85      |
| 1880    | 86              | 81     | 90    | 96      | 96            | 88      |
| Average | 96              | 81     | 104   | 97      | 99            | 92      |
| 1881    | 85              | 78     | 87    | 95      | 94            | 86      |
| 1882    | 85              | 76     | 82    | 83      | 98            | 85      |
| 1883    | 84              | 71     | 77    | 78      | 91            | 81      |
| Average | 85              | 75     | 82    | 85      | 94            | 84      |

The manner in which the above price-levels were arrived at was this. The trade of each country, imports and exports, was set down for each year side by side with what the amount would have been (seeing the quantities imported and exported) if the prices of 1860-62 had been maintained. As regards Great Britain, the exports of foreign and colonial merchandise are not included.

Actual trade returns (millions £ sterling):—

| Year    | United Kingdom | France | Italy | Belgium | United States | Aggregate |
|---------|----------------|--------|-------|---------|---------------|-----------|
| 1860-62 | 346            | 180    | 54    | 41      | 101           | 722       |
| 1863    | 396            | 203    | 61    | 46      | 59            | 765       |
| 1864    | 435            | 218    | 62    | 51      | 46            | 812       |
| 1865    | 437            | 229    | 61    | 54      | 47            | 828       |
| 1866    | 484            | 239    | 59    | 56      | 82            | 920       |
| 1867    | 456            | 234    | 65    | 55      | 99            | 909       |
| 1868    | 475            | 244    | 67    | 61      | 92            | 939       |

| 1875    | 598            | 296    | 89    | 96      | 184           | 1,263     |
| 1876    | 576            | 303    | 101   | 101     | 182           | 1,263     |
| 1877    | 593            | 284    | 83    | 100     | 206           | 1,266     |
| 1878    | 562            | 294    | 82    | 103     | 225           | 1,266     |
| 1879    | 555            | 313    | 93    | 109     | 236           | 1,306     |
| 1880    | 634            | 340    | 91    | 116     | 308           | 1,489     |
| Average | 592            | 296    | 90    | 100     | 213           | 1,291     |
| 1881    | 631            | 337    | 96    | 117     | 314           | 1,495     |
| 1882    | 655            | 336    | 95    | 117     | 300           | 1,503     |
| 1883    | 667            | 330    | 99    | 116     | 312           | 1,524     |

At prices of 1860-62 (millions £ sterling):—

| Year    | United Kingdom | France | Italy | Belgium | United States | Aggregate |
|---------|----------------|--------|-------|---------|---------------|-----------|
| 1863    | 328            | 197    | 60    | 49      | 65            | 699       |
| 1864    | 315            | 204    | 62    | 53      | 43            | 677       |
| 1865    | 347            | 225    | 57    | 58      | 45            | 732       |
| 1866    | 381            | 244    | 60    | 58      | 48            | 791       |
| 1867    | 396            | 273    | 61    | 61      | 100           | 891       |
| 1868    | 432            | 280    | 64    | 70      | 86            | 932       |
| 1869    | 445            | 286    | 65    | 79      | 85            | 960       |
| 1870    | 503            | 283    | 63    | 75      | 133           | 1,057     |
| Average | 393            | 249    | 61    | 63      | 76            | 842       |
| 1871    | 554            | 310    | 77    | 90      | 156           | 1,187     |
| 1872    | 599            | 338    | 80    | 88      | 154           | 1,259     |
| 1873    | 570            | 330    | 78    | 100     | 207           | 1,285     |
| 1874    | 586            | 348    | 85    | 97      | 206           | 1,322     |
| 1875    | 604            | 380    | 93    | 99      | 192           | 1,368     |
| 1876    | 618            | 379    | 93    | 109     | 214           | 1,413     |
| 1877    | 631            | 368    | 83    | 103     | 204           | 1,389     |
| 1878    | 648            | 387    | 89    | 112     | 271           | 1,507     |
| 1879    | 657            | 391    | 96    | 122     | 262           | 1,528     |
| 1880    | 737            | 420    | 101   | 121     | 321           | 1,700     |
| Average | 620            | 366    | 87    | 104     | 219           | 1,396     |
| 1881    | 742            | 431    | 110   | 123     | 334           | 1,740     |
| 1882    | 770            | 442    | 116   | 141     | 306           | 1,775     |
| 1883    | 794            | 463    | 129   | 149     | 343           | 1,883     |
| Average | 769            | 445    | 118   | 138     | 328           | 1,798     |

The following price-level for twelve principal items of international consumption is taken from the same work (to which the late Professor Neumann Spallart alludes in his *Uebersichten Ueber Production*, 1886):—

Price-Levels of the World for 100 Years.

| Years     | Agricultural |      |       |      |        |       |
|-----------|--------------|------|-------|------|--------|-------|
|           | Grain        | Meat | Dairy | Wool | Cotton | Sugar |
| 1782-90   | 100          | 100  | 100   | 100  | 100    | 100   |
| 1791-1800 | 133          | 141  | 131   | 121  | 110    | 170   |
| 1801-10   | 165          | 188  | 167   | 259  | 75     | 138   |
| 1811-20   | 175          | 208  | 190   | 206  | 75     | 165   |
| 1821-30   | 118          | 157  | 153   | 90   | 46     | 113   |
| 1831-40   | 110          | 173  | 144   | 75   | 41     | 110   |
| 1841-50   | 105          | 165  | 155   | 60   | 26     | 110   |
| 1851-60   | 128          | 184  | 175   | 54   | 28     | 104   |
| 1861-70   | 123          | 194  | 198   | 46   | 61     | 110   |
| 1871-80   | 115          | 220  | 218   | 36   | 34     | 88    |
| 1881-84   | 98           | 244  | 222   | 30   | 29     | 64    |

| Years     | Industrial |        |      |         |          |         |
|-----------|------------|--------|------|---------|----------|---------|
|           | Hardware   | Timber | Coal | Cottons | Woollens | Leather |
| 1782-90   | 100        | 100    | 100  | 100     | 100      | 100     |
| 1791-1800 | 124        | 138    | 109  | 107     | 112      | 128     |
| 1801-10   | 159        | 263    | 85   | 82      | 199      | 173     |
| 1811-20   | 181        | 238    | 91   | 82      | 161      | 168     |
| 1821-30   | 144        | 108    | 91   | 58      | 92       | 90      |
| 1831-40   | 124        | 127    | 71   | 54      | 84       | 100     |
| 1841-50   | 82         | 182    | 57   | 42      | 73       | 111     |
| 1851-60   | 75         | 144    | 61   | 36      | 68       | 103     |
| 1861-70   | 72         | 144    | 61   | 52      | 78       | 108     |
| 1871-80   | 85         | 128    | 61   | 37      | 75       | 96      |
| 1881-84   | 55         | 116    | 48   | 32      | 62       | 94      |

It appears from the above that agricultural products have risen 13 per cent., manufactures fallen 43 per cent., in price-level since 1782-90.

Beginning from 1841, we have in the following table a retrospect of values for 44 years; that is to say, if the same quantity of merchandise produced and consumed yearly from 1881 to 1884 were bought and sold at prices ruling in the four preceding decades, the amounts would be approximately as follows:—

|                          | Millions, £ Sterling |         |         |         |         |
|--------------------------|----------------------|---------|---------|---------|---------|
|                          | 1841-50              | 1851-60 | 1861-70 | 1871-80 | 1881-84 |
| Grain . . . . .          | 1,419                | 1,724   | 1,658   | 1,547   | 1,326   |
| Meat . . . . .           | 560                  | 628     | 661     | 747     | 830     |
| Hardware . . . . .       | 576                  | 525     | 504     | 593     | 384     |
| Dairy products . . . . . | 236                  | 266     | 303     | 333     | 340     |
| Cotton goods . . . . .   | 386                  | 335     | 484     | 346     | 302     |
| Woolen goods . . . . .   | 263                  | 245     | 280     | 268     | 223     |
| Timber . . . . .         | 428                  | 338     | 338     | 301     | 273     |
| Coal . . . . .           | 224                  | 241     | 241     | 241     | 189     |
| Leather . . . . .        | 218                  | 202     | 212     | 188     | 184     |
| Potatoes . . . . .       | 115                  | 125     | 154     | 164     | 181     |
| Wine . . . . .           | 86                   | 105     | 111     | 111     | 130     |
| Raw cotton . . . . .     | 76                   | 85      | 183     | 101     | 87      |
| Wool . . . . .           | 160                  | 145     | 125     | 97      | 83      |
| Books . . . . .          | 120                  | 115     | 105     | 87      | 79      |
| Silks . . . . .          | 68                   | 82      | 104     | 88      | 73      |
| Linens, &c. . . . .      | 77                   | 74      | 78      | 74      | 70      |
| Sugar . . . . .          | 106                  | 100     | 106     | 84      | 61      |
| Coffee . . . . .         | 23                   | 30      | 38      | 50      | 42      |
| Tobacco . . . . .        | 29                   | 44      | 53      | 38      | 37      |
| Tea . . . . .            | 16                   | 20      | 24      | 21      | 16      |
| Total . . . . .          | 5,186                | 5,429   | 5,762   | 5,479   | 4,910   |

The above twenty items comprise 90 per cent. of all human industries as regards products or manufactures, and therefore enable us to arrive at the variations of price-level for the whole world—that is, the rise or fall in the purchasing power of gold since 1850. The result is as follows:—

| Years             |       |
|-------------------|-------|
| 1841-50 . . . . . | 100.0 |
| 1851-60 . . . . . | 104.7 |
| 1861-70 . . . . . | 111.1 |
| 1871-80 . . . . . | 105.7 |
| 1881-84 . . . . . | 94.7  |

## PROSTITUTION

|                      | Prostitutes | Per 10,000 Inhab. |
|----------------------|-------------|-------------------|
| London . . . . .     | 31,800      | 83                |
| Paris . . . . .      | 26,990      | 122               |
| Berlin . . . . .     | 27,300      | 248               |
| Lyons . . . . .      | 5,520       | 145               |
| Marseilles . . . . . | 4,080       | 112               |
| Bordeaux . . . . .   | 2,610       | 125               |

The Paris police reports show that 89 per cent. are French, 11 per cent. foreign. According to the *Dict. des Sciences Med.*, 100 prostitutes may be expected in their lives to give birth to 60 infants; 100 married women to 480.

## PROTECTION

In order to promote certain local products or manufactures, which in some cases could not be profitably cultivated otherwise, "protection" is given either by means of bounties or by heavy import dues on foreign goods.

### UNITED KINGDOM.

Between the years 1690 and 1830 Great Britain paid the inhabitants of Belfast and Dundee 28 millions sterling to enable them to sell and export Irish and Scotch linen at less than cost. The export of linen has quadrupled since the bounties were abolished in 1830, the average bounty before that year having been £150,000 per annum.

Bounties on the exportation of grain in England averaged £160,000 per annum for some years, until their abolition in 1805.

### FRANCE

In 1860, by virtue of the Cobden Treaty, it was stipulated that no duties on foreign imports should exceed 25 per cent. *ad valorem*. The treaty has since lapsed. In 1880 a system of shipping bounties was established as follows:—48 shillings per ton for building iron vessels, and 16 shillings for wooden; 15 pence per ton per 1000 miles run on French-built vessels entering French ports; 7½ pence per ton for French vessels not built in France. The amounts paid for these bounties were:—

| Year           | Building | Navigation | Total   |
|----------------|----------|------------|---------|
| 1881 . . . . . | £38,000  | £39,000    | £77,000 |
| 1884 . . . . . | 179,000  | 344,000    | 523,000 |
| 1886 . . . . . | 120,000  | 303,000    | 423,000 |

There are also fishing bounties, which in some years reach £200,000, and sugar bounties, £600,000. The effect of the shipping bounties has certainly been to promote French shipping, viz:—

| Entries           | 1880      | 1887      | Increase     |
|-------------------|-----------|-----------|--------------|
| French . . . . .  | 3,614,000 | 4,770,000 | 33 per cent. |
| Foreign . . . . . | 8,750,000 | 8,710,000 | ...          |

In 1889 the duties were increased on imported food to protect the French farmers: cattle now pay 32 shillings, sheep 4 shillings per head, and wheat 50 shillings per ton. This causes bread to be at times so dear that municipal bakeries are established to sell cheap bread to the poor.

### BELGIUM.

Sugar bounties average £170,000 a year in Belgium, and £150,000 in Holland.

### UNITED STATES.

Protective duties in 1885 compelled San Francisco to pay £9 a ton for American made rails, when as good could be landed from England at £5 a ton. Iron ore at Pittsburg cost 40 shillings per ton, when Bilbao ores could be landed in New York at 12 shillings.

## PUBLIC WORKS

There is no means of ascertaining the value or cost of these in the various countries. In France a sum of 402 millions sterling was expended in 80 years, down to 1880, on roads, bridges, harbours, and canals. In England about 200 millions have been spent on sanitary works and schools. The United States Government in 90 years, down to 1880, spent 93 millions sterling on public edifices, arsenals, lighthouses, &c. The system of dykes in Holland represents an outlay of 300 millions sterling. The following table shows the amount of loans for public works in the United Kingdom from 1817 to 1881:—

|                         | Advanced    | Balance Due |
|-------------------------|-------------|-------------|
| Great Britain . . . . . | £44,700,000 | £26,020,000 |
| Ireland . . . . .       | 31,800,000  | 6,100,000   |
| Total . . . . .         | £76,500,000 | £32,120,000 |

The total account of public works loans from 1792 to 1890 for the whole United Kingdom showed thus:—

|                               |              |
|-------------------------------|--------------|
| Sums advanced . . . . .       | £115,324,000 |
| Repaid by borrowers . . . . . | 63,979,000   |
| Bad debts, &c. . . . .        | 12,635,000   |
| Balance due in 1890 . . . . . | 38,660,000   |

Q.

**QUAKERS**

There are 18,000 in the United Kingdom. They have a longer span of life than the general population, their death-rate during twenty years averaging only 18 per thousand as compared with 22 per thousand, probably the result of temperate habits. They have, however, one-fifth more insane than the rest of the population, namely, 33 per 10,000 against 28, which perhaps arises from inter-marriage.

**QUICKSILVER**

The *Times* published the following estimate of production:—

| Year                    | Tons          |            |       |
|-------------------------|---------------|------------|-------|
|                         | United States | Spain, &c. | Total |
| 1880 . . .              | 2005          | 1995       | 4000  |
| 1889 . . .              | 880           | 2500       | 3380  |
| Average ten years . . . | 1360          | 2280       | 3640  |

The Almaden mines in Spain were worked by the Romans: they still employ 4000 miners, who suffer a

tremendous death-rate. In 1888 the value exported from Spain was £500,000. A flask of quicksilver weighs 76 lbs. According to Kolb, the production in California was as follows:—

| Year       | Flasks | Tons  | Value   | Value per Flask |
|------------|--------|-------|---------|-----------------|
| 1859 . . . | 3,400  | 113   | £26,000 | 7.6             |
| 1860 . . . | 9,450  | 315   | 66,000  | 7.0             |
| 1865 . . . | 42,500 | 1,420 | 232,000 | 5.5             |
| 1870 . . . | 13,800 | 460   | 96,000  | 7.0             |
| 1876 . . . | 41,100 | 1,370 | 342,000 | 8.3             |

It appears that the production has now fallen to 26,000 flasks or 880 tons yearly, being about equal to one-third of what is produced annually in Spain.

The annual production and consumption average:—

| Production       |      | Consumption         |      |
|------------------|------|---------------------|------|
|                  | Tons |                     | Tons |
| California . . . | 900  | Great Britain . . . | 1600 |
| Spain . . .      | 1100 | United States . . . | 600  |
| Austria . . .    | 300  | China . . .         | 500  |
| Various . . .    | 1000 | Various . . .       | 600  |
| Total . . .      | 3300 | Total . . .         | 3300 |

R.

**RABBITS**

The annual slaughter is supposed to reach 20 millions in Great Britain, 70 millions in France.\* The annual exportation from Belgium averages 5 millions; the importation into Great Britain, 3 millions. The consumption in Melbourne market is one million yearly. Rabbits were introduced into Australia a few years ago for food, but multiplied so rapidly as to become a pest. A single pair of rabbits can become multiplied in four years into 1,250,000. The Sydney Cabinet in the year 1887 destroyed 25,300,000 rabbits, having spent £700,000 in four years to mitigate the pest. Mr. Coghlan says that 100 million acres of land have been more or less injured by them. To check their onward march a fence of 290 miles between the Macquarie and Darling rivers was made at a cost of £24,000; another of 346 miles from the Murray River north; another of 260 miles on the southern line of Queensland; another of 340 miles from Albany to the Macquarie; but the rabbits broke through. The number of rabbit-skins exported averages yearly:—

|                       |            |
|-----------------------|------------|
| New South Wales . . . | 15,000,000 |
| New Zealand . . .     | 6,000,000  |
| Victoria . . .        | 3,000,000  |

besides 1000 bales yearly from South Australia. The Cabinet of Victoria spends £15,000 a year in killing rabbits.

**RAILWAYS**

The *Aimanac de Gotha* gives the total mileage at various dates as follows:—

| Year       | Miles  | Year       | Miles   |
|------------|--------|------------|---------|
| 1830 . . . | 210    | 1870 . . . | 139,860 |
| 1840 . . . | 5,420  | 1875 . . . | 177,600 |
| 1850 . . . | 23,960 | 1880 . . . | 224,900 |
| 1860 . . . | 67,350 | 1885 . . . | 307,400 |

The Actual mileage, however, was as follows:—

|                    | 1840  | 1850   | 1860   | 1870    | 1880    | 1888    |
|--------------------|-------|--------|--------|---------|---------|---------|
| U. Kingdom . . .   | 838   | 6,620  | 10,430 | 15,540  | 17,930  | 19,810  |
| France . . .       | 360   | 1,890  | 5,880  | 9,770   | 14,500  | 20,900  |

\* De Foville questions the number of rabbits in France.

The following table shows the condition of railways actually working, mostly for the years 1887-88:—

|                          | Miles   | Cost, Millions £ | Passengers, Millions | Goods, Tons, Millions | Receipts, £ | Expenses, £ | Net, £      |
|--------------------------|---------|------------------|----------------------|-----------------------|-------------|-------------|-------------|
| England . . . . .        | 13,980  | 714              | 720                  | 239                   | 62,000,000  | 32,400,000  | 29,600,000  |
| Scotland . . . . .       | 3,100   | 114              | 74                   | 39                    | 8,000,000   | 3,800,000   | 4,200,000   |
| Ireland . . . . .        | 2,730   | 37               | 22                   | 4                     | 2,900,000   | 1,500,000   | 1,400,000   |
| United Kingdom . . . . . | 19,810  | 865              | 816                  | 282                   | 72,900,000  | 37,700,000  | 35,200,000  |
| France . . . . .         | 20,900  | 570              | 218                  | 78                    | 42,400,000  | 22,400,000  | 20,000,000  |
| Germany . . . . .        | 24,270  | 495              | 316                  | 179                   | 54,600,000  | 29,300,000  | 25,300,000  |

| Total . . . . .          | 354,310 | 5,736            | 2,362                | 1,424                 | 494,500,000 | 300,530,000 | 193,970,000 |

There are no particulars, except length of line, known as regards Servia, Bulgaria, Greece, and Turkey: it is assumed in the above table that the ratios per mile are the same as in Roumania. The cost of construction in Mexico, being unknown, is assumed to be the same as in the United States. In some cases the traffic is not for the same year as the mileage. Tables of traffic per mile are given farther on. In the preceding table there are blanks as regards traffic for 5780 miles, or  $1\frac{1}{2}$  per cent. of the total. Allowing for these blanks, the whole railway business of the world is summed up as follows:—

|                     | Miles   | Cost, Millions £ | Millions   |             | Millions £ |          |     |                  |
|---------------------|---------|------------------|------------|-------------|------------|----------|-----|------------------|
|                     |         |                  | Passengers | Goods, Tons | Receipts   | Expenses | Net | Interest on Cost |
| Europe . . . . .    | 130,000 | 3,055            | 1,663      | 765         | 250        | 135      | 115 | 3.8              |
| America . . . . .   | 191,010 | 2,348            | 507        | 619         | 219        | 153      | 66  | 2.8              |
| Africa . . . . .    | 5,530   | 67               | 12         | 5           | 5          | 3        | 2   | 3.0              |
| Asia . . . . .      | 17,630  | 172              | 121        | 25          | 17         | 9        | 8   | 4.6              |
| Australia . . . . . | 10,140  | 94               | 81         | 17          | 8          | 5        | 3   | 3.3              |
| The World . . . . . | 354,310 | 5,736            | 2,384      | 1,431       | 499        | 305      | 194 | 3.4              |

The total mileage and cost of construction for Europe and the world at various dates were approximately as follows:—

| Year | Europe  |            |            | The World |            |            |
|------|---------|------------|------------|-----------|------------|------------|
|      | Miles   | Millions £ | £ per Mile | Miles     | Millions £ | £ per Mile |
| 1840 | 1,679   | 52         | 30.900     | 4,515     | 71         | 15.800     |
| 1850 | 14,465  | 404        | 27.800     | 23,555    | 465        | 19.800     |
| 1860 | 31,885  | 797        | 25.000     | 66,290    | 1,079      | 16.300     |
| 1870 | 63,300  | 1,476      | 23.300     | 128,235   | 2,097      | 16.400     |
| 1880 | 101,720 | 2,411      | 23.700     | 228,440   | 3,938      | 17.200     |
| 1888 | 130,000 | 3,055      | 23.300     | 354,310   | 5,736      | 16.100     |

A French scientific journal in 1890 summed up existing railways thus:—

|                     | Miles   |
|---------------------|---------|
| Europe . . . . .    | 135,200 |
| Asia . . . . .      | 17,900  |
| Africa . . . . .    | 5,300   |
| Australia . . . . . | 10,500  |
| America . . . . .   | 191,200 |
| Total . . . . .     | 360,100 |

The amount of capital invested in railways at various dates was as follows :—

|                 | Millions £ Sterling |      |       |       |       |       |
|-----------------|---------------------|------|-------|-------|-------|-------|
|                 | 1840                | 1850 | 1860  | 1870  | 1880  | 1888  |
| United Kingdom  | 28                  | 240  | 348   | 530   | 728   | 865   |
| France          | 11                  | 57   | 171   | 274   | 392   | 570   |

In the United States in 1888 the average compared with the rates on the Canadian Pacific line thus :—

|                     | Pence per 100 Miles |           |
|---------------------|---------------------|-----------|
|                     | Passenger           | Ton Goods |
| United States . . . | 112                 | 52        |
| Canada . . . . .    | 90                  | 51        |

The passenger rates are those of first class, and are lower than in Europe.

The speed on some of the principal railways is :—

|                        | Miles | Hours | Minutes | Miles per<br>Hour |
|------------------------|-------|-------|---------|-------------------|
| London to Grantham     | 105   | 1     | 57      | 54                |
| Paris to Poitiers . .  | 209   | 5     | 20      | 39                |
| Berlin to Minden . .   | 202   | 5     | 35      | 37                |
| Vienna to Pilsen . . . | 220   | 6     | 45      | 33                |
| Rome to Pisa . . . .   | 211   | 7     | ...     | 30                |
| Madrid to Saragossa .  | 214   | 9     | 26      | 23                |
| Lisbon to Oporto . . . | 212   | 11    | ...     | 19                |
| N. York to Washington  | 230   | 5     | 18      | 44                |

The distribution of passengers in 1884 was as follows :—

|                     | Percentage of Passengers |        |       |       |
|---------------------|--------------------------|--------|-------|-------|
|                     | First                    | Second | Third | Total |
| England . . . . .   | 6                        | 10     | 84    | 100   |
| Scotland . . . . .  | 7                        | 6      | 87    | 100   |
| Ireland . . . . .   | 7                        | 16     | 77    | 100   |
| United Kingdom . .  | 6                        | 10     | 84    | 100   |
| France . . . . .    | 7                        | 34     | 59    | 100   |

| Russia . . . . .    | 2                        | 9      | 89    | 100   |
| Austria . . . . .   | 1                        | 13     | 86    | 100   |
| Italy . . . . .     | 6                        | 28     | 66    | 100   |
| Sweden . . . . .    | 4                        | 10     | 86    | 100   |
| Norway . . . . .    | ...                      | 8      | 92    | 100   |
| Denmark . . . . .   | 1                        | 14     | 85    | 100   |
| Holland . . . . .   | 9                        | 25     | 66    | 100   |
| Belgium . . . . .   | 5                        | 14     | 81    | 100   |
| Switzerland . . . . | 2                        | 17     | 81    | 100   |
| Roumania . . . . .  | 5                        | 22     | 73    | 100   |
| India . . . . .     | 1                        | 2      | 97    | 100   |

In European countries the highest ratio of first-class passengers is in Holland, of second class in France, and of third class in Norway.

The following table shows the earnings and expenses per mile run by locomotives in various countries in 1887-88 :—

|                     | Miles Run   | Pence per<br>Mile Run |               |     | Miles Run per<br>Locomotive |
|---------------------|-------------|-----------------------|---------------|-----|-----------------------------|
|                     |             | Receipts              | Ex-<br>penses | Net |                             |
| United States . . . | 688,800,000 | 69                    | 48            | 21  | 24,000                      |
| Germany . . . . .   | 171,400,000 | 77                    | 41            | 36  | 14,000                      |
| France . . . . .    | 158,800,000 | 64                    | 33            | 31  | 18,000                      |
| Italy . . . . .     | 46,600,000  | 48                    | 32            | 16  | 24,000                      |
| Austria . . . . .   | 66,100,000  | 76                    | 42            | 34  | 16,000                      |
| Switzerland . . . . | 13,100,000  | 61                    | 33            | 28  | 22,000                      |
| Sweden . . . . .    | 10,500,000  | 48                    | 30            | 18  | 15,000                      |
| Holland . . . . .   | 15,500,000  | 37                    | 21            | 16  | 26,000                      |
| Belgium . . . . .   | 32,700,000  | 50                    | 26            | 24  | 14,000                      |

The mileage run by locomotives in the United States far exceeds the aggregate mileage for the Continent of Europe. The cost of running in the United States is higher per mile than in Europe.

An ordinary locomotive has 300 horse-power, and burns one ton of coke for 40 miles of goods train, or 80 miles of passenger train. The life of a locomotive is usually fifteen years, during which it will run 240,000 miles, and earn £60,000. The price is usually £2000; and according to *Engineering*, Europe could turn out 6400 locomotives yearly, viz., Great Britain, 2200; Germany, 2000; France, 1000; Belgium, 500; Austria, 400; and other countries, 300. Boesig's factory at Berlin could make 300 yearly. Each locomotive has 5416 pieces. The first in use from Liverpool to Manchester in 1830 was of 8 tons, and had a speed of 20 miles an hour. In 1872 the largest in the United Kingdom were of 27 tons, rising in 1889 to 45 tons.

There are many 60-ton locomotives in the United States, and some in Canada of 70 tons. The weight of an empty passenger train in England is: locomotive, 35; tender, 25; two trucks, 12; eight carriages, 64; in all, 136 tons. If there be 60 passengers, their weight will be 3 tons, against 136 tons dead-weight. The engine of an express train consumes 10 gallons of water per mile; some of the American locomotives have tenders with a capacity of 3000 gallons.

Jeans's table of rolling-stock in 1885 compares with mileage and traffic as follows :—

|                 | Locomotives,<br>Number | Carriages,<br>Number | Waggons,<br>Number | Locomotives,<br>per 100 Miles | Carriages,<br>per Million<br>Passengers | Tons of Goods<br>Carried per<br>Wagon |
|-----------------|------------------------|----------------------|--------------------|-------------------------------|-----------------------------------------|---------------------------------------|
| U. Kingdom      | 15,200                 | 33,700               | 464,000            | 76                            | 41                                      | 610                                   |
| France . .      | 8,800                  | 19,700               | 223,000            | 44                            | 90                                      | 340                                   |

| India . .       | 3,000                  | 1,900                | 82,000             | 20                            | 18                                      | 270                                   |
| Various . .     | 4,100                  | 8,400                | 75,000             | 44                            | ...                                     | ...                                   |
| Total . .       | 99,000                 | 150,000              | 2,510,000          | 28                            | 63                                      | 570                                   |

A French scientific journal in 1890 states that Europe has 61,000 locomotives, and the rest of the world 43,000, making a total of 104,000; it adds that England has 80 per 100 miles of railway, Germany 53, and France 47.

The increase of rolling-stock in ten years was very great :—

|             | Europe    |           | The World |           |
|-------------|-----------|-----------|-----------|-----------|
|             | 1875      | 1885      | 1875      | 1885      |
| Locomotives | 42,000    | 56,500    | 62,000    | 99,000    |
| Carriages   | 90,000    | 116,500   | 112,000   | 150,000   |
| Waggons     | 1,000,000 | 1,360,000 | 1,470,000 | 2,510,000 |

Jeans adds that the above rolling-stock in 1875 carried 1371 million passengers and 715 million tons of goods.

The weight of rail in England varies from 28 to 76 lbs. per yard. In 1882 the tonnage of rails in various countries was as follows (an estimate for 1888 is added) :—

|                | Tons of Rails |            |            | Tons per<br>Mile of<br>Rail | Tons Estimate<br>in 1888 |
|----------------|---------------|------------|------------|-----------------------------|--------------------------|
|                | Iron          | Steel      | Total      |                             |                          |
| United Kingdom | 1,980,000     | 2,410,000  | 4,390,000  | 240                         | 4,750,000                |
| France . .     | 1,570,000     | 1,715,000  | 3,285,000  | 202                         | 4,000,000                |
| Germany . .    | 2,550,000     | 1,570,000  | 4,120,000  | 195                         | 4,650,000                |
| Russia . .     | 820,000       | 920,000    | 1,740,000  | 126                         | 2,200,000                |
| Austria . .    | 930,000       | 700,000    | 1,630,000  | 128                         | 2,100,000                |
| Belgium . .    | 265,000       | 255,000    | 520,000    | 210                         | 600,000                  |
| Various . .    | 2,215,000     | 1,620,000  | 3,835,000  | 150                         | 4,400,000                |
| Europe . .     | 10,330,000    | 9,190,000  | 19,520,000 | 182                         | 22,700,000               |
| United States  | 7,200,000     | 5,200,000  | 12,400,000 | 118                         | 18,600,000               |
| Colonies, &c.  | 3,200,000     | 3,100,000  | 6,300,000  | 110                         | 7,800,000                |
| Total . .      | 20,730,000    | 17,490,000 | 38,220,000 | 152                         | 49,100,000               |

The following table shows the steepest gradients in some of the most difficult railways :—

|                 | Per Cent. |                | Per Cent. |
|-----------------|-----------|----------------|-----------|
| Mont Cenis . .  | 3.0       | Oroya . .      | 6.0       |
| Genoa-Turin . . | 3.5       | Utlberg . .    | 7.0       |
| Darjeeling . .  | 4.0       | Cantagallo . . | 9.5       |
| Tiflis . .      | 4.5       | Righi . .      | 28.0      |
| Einsiedlen . .  | 5.0       | Vesuvius . .   | 63.0      |

The Righi is in one part as steep as a staircase, the Vesuvius as a ladder. Resistance increases with gradient, and if the normal figure be adopted of 8 lbs. per ton on level way, the resistance at various gradients will be :—

| Gradient     | Lbs. per Ton | Gradient     | Lbs. per Ton |
|--------------|--------------|--------------|--------------|
| 1 in 100 . . | 15           | 5 in 100 . . | 45           |
| 3 " . .      | 30           | 10 " . .     | 83           |

Resistance likewise increases with speed as follows, on level way :—

| Miles per Hour | Lbs. per Ton | Miles per Hour | Lbs. per Ton |
|----------------|--------------|----------------|--------------|
| 10 . .         | 8            | 40 . .         | 26           |
| 20 . .         | 14           | 50 . .         | 33           |
| 30 . .         | 17           | 60 . .         | 51           |

The resistance on a railway is only one-third of what it is on an ordinary highroad.

The standard gauge of the world may be said to be 4 ft. 8½ inches. In 1885 the lines were summed up thus :—

| Gauge                    | Miles   | Ratio |
|--------------------------|---------|-------|
| 4 ft. 8½ in. . . .       | 224,000 | 74.0  |
| Under 4 ft. 8½ in. . . . | 42,400  | 14.0  |
| Over 4 ft. 8½ in. . . .  | 36,600  | 12.0  |
| Total . .                | 303,000 | 100.0 |

Steel rails average 130 tons per mile of way, iron 145 tons. The consumption of iron and steel for railways has been approximately as follows :—

| Period          | Europe, Tons | The World, Tons |
|-----------------|--------------|-----------------|
| 1825-40 . . . . | 400,000      | 800,000         |
| 1841-60 . . . . | 8,500,000    | 12,500,000      |
| 1861-70 . . . . | 10,100,000   | 14,000,000      |
| 1871-80 . . . . | 13,200,000   | 23,400,000      |
| 1881-88 . . . . | 12,800,000   | 32,300,000      |
| Total . .       | 45,000,000   | 83,000,000      |

The railways of greatest elevation are the following :—

| Line                | Over the        | Feet Over Sea-Level | Date of Construction |
|---------------------|-----------------|---------------------|----------------------|
| Semmering . . . .   | Alps . . . .    | 2,970               | 1854                 |
| Santos—San Paulo    | Serra Cubaton . | 3,500               | 1866                 |
| St. Gothard . . . . | Alps . . . .    | 3,780               | 1882                 |
| Mont Cenis . . . .  | Alps . . . .    | 4,290               | 1871                 |
| Aarberg . . . . .   | Alps . . . .    | 4,320               | 1884                 |
| Bremer . . . . .    | Alps . . . .    | 4,450               | 1867                 |
| Union Pacific . . . | Rocky Mountns.  | 8,573               | 1869                 |
| Uspallata . . . . . | Andes . . . .   | 10,570              | 1890                 |
| Mollendo . . . . .  | Andes . . . .   | 14,610              | 1878                 |
| Lima-Oroya . . . .  | Andes . . . .   | 15,840              | 1874                 |

All the above are working except Clark's line over the Uspallata Pass, which will establish direct transit from Buenos Ayres to Valparaiso, and approaches com-

pletion. The Union Pacific has a length of 1780 miles, of which 300 are through mountains. The cost was £38,800,000, including a subsidy of £11,000,000 from Congress: it was begun in 1862, and the first train ran from Chicago on May 1, 1869, for the terminus on the Pacific at San Francisco. The company received, moreover, a grant of 34,000 square miles of land, or 23 million acres, in alternate lots 20 miles deep on either side of the line. The cost of construction was £22,000 per mile, varying from £11,000 in level country to £36,000 a mile in the Rocky Mountains.

The saving which railways have effected for the public welfare in the matter of freight charges has been computed in different countries. In Prussia, in 1878, it was estimated at £6300 a mile for goods and passengers; in Great Britain, in 1848, at £1500 for passengers only. It may be roughly estimated that railways as a rule have caused a saving to the public of each country equal to at least 10 per cent. per annum on the cost of construction.

The following table, according to latest returns, shows the number of persons killed or wounded by railways :—

|                        | Killed     |        |       | Wounded    |        |        | Killed or Wounded | Per Million Passengers |
|------------------------|------------|--------|-------|------------|--------|--------|-------------------|------------------------|
|                        | Passengers | Others | Total | Passengers | Others | Total  |                   |                        |
| United Kingdom . . . . | 183        | 956    | 1,139 | 1,829      | 2,944  | 4,773  | 5,912             | 7.2                    |
| France . . . . .       | 39         | 336    | 375   | 131        | 498    | 629    | 1,004             | 4.6                    |
| Germany . . . . .      | 27         | 436    | 463   | 107        | 1,227  | 1,334  | 1,797             | 5.7                    |
| Russia . . . . .       | 19         | 425    | 444   | 88         | 609    | 697    | 1,141             | 30.0                   |
| Austria . . . . .      | 5          | 241    | 246   | 16         | 569    | 585    | 831               | 13.0                   |

| Belgium . . . . .      | 7          | 145    | 152   | 60         | 640    | 700    | 852               | 11.6                   |
| Switzerland . . . . .  | 8          | 34     | 42    | 6          | 194    | 200    | 242               | 9.0                    |
| Europe . . . . .       | 323        | 2,847  | 3,181 | 2,440      | 8,004  | 10,500 | 13,681            | 8.2                    |

The railways of the United Kingdom pay £1400 a day compensation, of which 60 per cent. for damage to passengers, 40 per cent. to goods. In other countries the amount is unknown.

#### UNITED KINGDOM

The first regular railway for carrying passengers was opened from Stockton to Darlington, 27th September 1825.

The following table shows the development of railways :—

| Year | Miles Open | Cost, £     | Receipts, £ | Expenses, £ | Passengers Carried |
|------|------------|-------------|-------------|-------------|--------------------|
| 1843 | 1,950      | 65,500,000  | 4,540,000   | ...         | ...                |
| 1846 | 3,040      | 126,300,000 | 7,570,000   | ...         | 43,800,000         |
| 1850 | 6,620      | 240,300,000 | 13,200,000  | ...         | 72,900,000         |
| 1855 | 8,280      | 297,600,000 | 21,500,000  | 10,300,000  | 118,600,000        |
| 1860 | 10,430     | 348,100,000 | 27,800,000  | 13,200,000  | 163,500,000        |
| 1870 | 15,540     | 529,900,000 | 43,400,000  | 21,700,000  | 330,200,000        |
| 1880 | 17,930     | 728,300,000 | 63,000,000  | 33,600,000  | 603,900,000        |
| 1888 | 19,810     | 864,700,000 | 72,900,000  | 37,800,000  | 742,500,000        |

Holders of season-tickets are not counted; add 10 per cent. for them.

The mileage and traffic of the three kingdoms showed as follows :—

|                    | Miles  |        | Cost, £     |             | Receipts, £ per Mile |       | Expenses, £ per Mile |       |
|--------------------|--------|--------|-------------|-------------|----------------------|-------|----------------------|-------|
|                    | 1880   | 1888   | 1880        | 1888        | 1880                 | 1888  | 1880                 | 1888  |
| England . . . . .  | 7,580  | 13,980 | 289,000,000 | 714,000,000 | 3,090                | 4,430 | 1,490                | 2,310 |
| Scotland . . . . . | 1,490  | 3,100  | 39,000,000  | 114,100,000 | 1,990                | 2,580 | 905                  | 1,240 |
| Ireland . . . . .  | 1,360  | 2,730  | 20,100,000  | 36,600,000  | 1,030                | 1,060 | 440                  | 560   |
| United Kingdom . . | 10,430 | 19,810 | 348,100,000 | 864,700,000 | 2,670                | 3,680 | 1,270                | 1,910 |

The earnings and expenditure of thirty-four years are summed up thus :—

| Period             | Earnings, Millions £ |            |       | Expenses, Millions £ | Net Revenue, Millions £ |
|--------------------|----------------------|------------|-------|----------------------|-------------------------|
|                    | Passengers           | Goods, &c. | Total |                      |                         |
| 1855-59 . . . . .  | 58                   | 61         | 119   | 64                   | 55                      |
| 1860-69 . . . . .  | 159                  | 185        | 344   | 169                  | 175                     |
| 1870-79 . . . . .  | 242                  | 312        | 554   | 275                  | 279                     |
| 1880-88 . . . . .  | 265                  | 336        | 601   | 302                  | 299                     |
| 34 years . . . . . | 724                  | 894        | 1618  | 810                  | 808                     |

In the first period, ending 1859, the passenger earnings were 49 per cent. of the total; in the second, ending 1869, they fell to 46 per cent.; in the third, ending 1879, to 44 per cent.; and in the fourth, ending 1888, they were likewise 44 per cent.

The following table (allowing mean average for missing years) shows the traffic during the same period, adding 10 per cent. for holders of season-tickets to the number of passengers :—

| Period         | Passengers, Millions | Goods, Millions Tons | Earnings, Pence |         |
|----------------|----------------------|----------------------|-----------------|---------|
|                |                      |                      | Per Passenger   | Per Ton |
| 1855-59 . . .  | 740                  | 348                  | 18              | 42      |
| 1860-69 . . .  | 2,620                | 1,160                | 15              | 38      |
| 1870-79 . . .  | 5,270                | 1,923                | 11              | 39      |
| 1880-88 . . .  | 6,780                | 2,328                | 9               | 35      |
| 34 years . . . | 15,410               | 5,759                | 11              | 37      |

The aggregate traffic for ten years ending December 1888 showed the three kingdoms as follows :—

|                | Mean                |        | Passengers, Millions Carried | Goods, Millions Tons | Ten Years, Millions £ |           |        |
|----------------|---------------------|--------|------------------------------|----------------------|-----------------------|-----------|--------|
|                | Capital, Millions £ | Miles  |                              |                      | Earnings              | Ex-penses | Profit |
| England . . .  | 660                 | 13,300 | 6,580                        | 2,165                | 588                   | 308       | 280    |
| Scotland . . . | 101                 | 3,000  | 601                          | 344                  | 75                    | 38        | 37     |
| Ireland . . .  | 35                  | 2,500  | 205                          | 37                   | 27                    | 15        | 12     |
| U. Kingdom . . | 796                 | 18,800 | 7,386                        | 2,546                | 690                   | 361       | 329    |

From the above we derive the following averages :—

|                    | Cost per Mile, £ | Yearly Traffic per Mile |             | Annual Mileage |             |           | Interest on Capital per Cent. |
|--------------------|------------------|-------------------------|-------------|----------------|-------------|-----------|-------------------------------|
|                    |                  | Passengers              | Goods, Tons | Earnings, £    | Expenses, £ | Profit, £ |                               |
| England . . . . .  | 49,600           | 49,400                  | 16,200      | 4,410          | 2,310       | 2,100     | 4.2                           |
| Scotland . . . . . | 33,700           | 20,000                  | 11,500      | 2,500          | 1,270       | 1,230     | 3.7                           |
| Ireland . . . . .  | 14,000           | 8,200                   | 1,500       | 1,080          | 600         | 480       | 3.4                           |
| United Kingdom . . | 42,200           | 39,300                  | 13,500      | 3,670          | 1,920       | 1,750     | 4.1                           |

The cost, traffic, and mileage earnings for the whole United Kingdom at various dates showed thus :—

| Year           | Cost, £ | Passengers | Tons, Goods | Receipts, £ | Expenses, £ | Profit, £ | Interest on Capital per Cent. |
|----------------|---------|------------|-------------|-------------|-------------|-----------|-------------------------------|
| 1845 . . . . . | 35,900  | 15,700     | ...         | 2,590       | 1,240       | 1,350     | 3.7                           |
| 1860 . . . . . | 33,400  | 17,300     | 8,500       | 2,670       | 1,270       | 1,400     | 4.2                           |
| 1870 . . . . . | 34,200  | 23,400     | 10,300      | 2,800       | 1,400       | 1,400     | 4.1                           |
| 1880 . . . . . | 40,700  | 37,100     | 13,100      | 3,520       | 1,880       | 1,640     | 4.0                           |
| 1888 . . . . . | 43,600  | 41,200     | 14,200      | 3,680       | 1,910       | 1,770     | 4.1                           |

The goods traffic returns for 1870 were lost : the above mileage is the medium between the preceding and succeeding years. The number of passengers killed or injured at various dates in the United Kingdom was as follows :—

| Year           | Passengers Carried | Killed or Injured | Per Million |
|----------------|--------------------|-------------------|-------------|
| 1846 . . . . . | 48,200,000         | 151               | 3.2         |
| 1855 . . . . . | 130,400,000        | 321               | 2.5         |
| 1864 . . . . . | 252,000,000        | 711               | 2.8         |
| 1873 . . . . . | 501,000,000        | 1,542             | 3.1         |
| 1888 . . . . . | 816,000,000        | 1,515             | 1.9         |

In the above table 10 per cent. for season-ticket holders is added. The number of killed or injured on railways, including servants and trespassers, is much greater than that given above, which applies only to passengers.

The last four years show thus :—

| Year           | Killed | Injured | Total |
|----------------|--------|---------|-------|
| 1886 . . . . . | 938    | 3,539   | 4,477 |
| 1887 . . . . . | 919    | 3,590   | 4,509 |
| 1888 . . . . . | 905    | 3,826   | 4,731 |
| 1889 . . . . . | 1,076  | 4,836   | 5,912 |

The returns for 1889 were made up thus :—

|                        | Killed | Injured | Total |
|------------------------|--------|---------|-------|
| Passengers . . . . .   | 183    | 1,829   | 2,012 |
| Railway servants . . . | 435    | 2,769   | 3,204 |
| Trespassers . . . . .  | 351    | 122     | 473   |
| Various . . . . .      | 170    | 53      | 223   |
| Total . . . . .        | 1,139  | 4,773   | 5,912 |

The block system, which is considered a safeguard against collisions, is used as follows :—

|                    | Miles  | Ratio of Total |
|--------------------|--------|----------------|
| England . . . . .  | 12,160 | 94 per cent.   |
| Scotland . . . . . | 2,310  | 82 "           |
| Ireland . . . . .  | 570    | 21 "           |
| United Kingdom . . | 15,040 | 76 "           |

The number of passengers by the several classes in the United Kingdom were as follows in 1889 :—

| Class           | Number      | Ratio |
|-----------------|-------------|-------|
| 1st . . . . .   | 30,100,000  | 3.9   |
| 2nd . . . . .   | 62,700,000  | 8.1   |
| 3rd . . . . .   | 682,400,000 | 88.0  |
| Total . . . . . | 775,200,000 | 100.0 |

The above, however, counts 1,271,000 season-ticket holders for only one journey each, whereas it is believed they should stand for 77,500,000, or 10 per cent. extra added to the traffic. Dividing them evenly between 1st and 2nd class (by which such subscribers usually travel) the result is as follows :—

| Class           | Number      | Ratio |
|-----------------|-------------|-------|
| 1st . . . . .   | 69,000,000  | 8.1   |
| 2nd . . . . .   | 101,500,000 | 11.9  |
| 3rd . . . . .   | 682,500,000 | 80.0  |
| Total . . . . . | 853,000,000 | 100.0 |

The above estimate, as already stated, allows for holders of season-tickets six journeys yearly, which is, doubtless, below the reality.

## FRANCE

The length of lines at various dates was as follows:—

|           | Miles |       |       |       |        |        |
|-----------|-------|-------|-------|-------|--------|--------|
|           | 1841  | 1850  | 1860  | 1870  | 1880   | 1888   |
| State     | ...   | ...   | ...   | ...   | 1,400  | 1,550  |
| Companies | 360   | 1,890 | 5,880 | 9,770 | 14,880 | 19,210 |
| Total     | 360   | 1,890 | 5,880 | 9,770 | 16,280 | 20,760 |

The first line was opened to traffic in 1828, the first Government line constructed in 1878. In the following returns of traffic since 1841 the number of miles working in 1880 appears to have been less than that of lines completed.

| Year | Miles  | Passengers  | Goods, Tons | Average per Mile |       |
|------|--------|-------------|-------------|------------------|-------|
|      |        |             |             | Passengers       | Goods |
| 1841 | 360    | 6,400,000   | 1,100,000   | 17,500           | 3,000 |
| 1850 | 1,890  | 18,700,000  | 4,300,000   | 9,900            | 2,300 |
| 1860 | 5,880  | 56,500,000  | 23,000,000  | 9,600            | 4,000 |
| 1870 | 9,770  | 102,600,000 | 37,100,000  | 10,500           | 3,800 |
| 1880 | 14,500 | 165,000,000 | 80,800,000  | 11,400           | 5,500 |
| 1887 | 19,700 | 218,400,000 | 78,100,000  | 11,000           | 4,000 |

The mileage statistics were as follows:—

| Year | Per Mile     |              |           | Pence, per Mile |            | Per-centage of Ex-penses |
|------|--------------|--------------|-----------|-----------------|------------|--------------------------|
|      | Earn-ings, £ | Ex-penses, £ | Profit, £ | Pas-senger      | Ton, Goods |                          |
| 1843 | 1,810        | 970          | 840       | 1.08            | 1.71       | 53.6                     |
| 1850 | 2,080        | 990          | 1,090     | 1.01            | 1.56       | 47.6                     |
| 1860 | 2,890        | 1,300        | 1,590     | 0.90            | 1.10       | 45.0                     |
| 1870 | 2,550        | 1,230        | 1,320     | 0.78            | 0.97       | 48.2                     |
| 1880 | 2,830        | 1,410        | 1,420     | 0.80            | 0.95       | 49.8                     |
| 1887 | 2,110        | 1,090        | 1,020     | 0.70            | 0.95       | 51.6                     |

Counting the goods traffic by kilometer tons, that is, the number of tons carried one kilometer, and reducing it to English form by the number of tons carried 100 miles, we find as follows:—

| Year | Millions of Kilometer Tons | Tons Carried 100 Miles |
|------|----------------------------|------------------------|
| 1843 | 59                         | 378,000                |
| 1850 | 314                        | 1,980,000              |
| 1860 | 3,119                      | 19,700,000             |
| 1870 | 5,057                      | 31,900,000             |
| 1880 | 10,350                     | 65,200,000             |
| 1885 | 9,790                      | 61,700,000             |

As the actual number of tons carried in 1885 was 75,200,000, it appears that the average haulage of each ton of goods was 83 miles, against 80 miles in 1880.

Passenger traffic in 1885 showed as follows:—

| Class | Number      | Ratio |
|-------|-------------|-------|
| 1st   | 16,200,000  | 7.5   |
| 2nd   | 73,000,000  | 34.0  |
| 3rd   | 125,200,000 | 58.0  |

Total . . . 214,400,000 100.0

When railways were first made, in 1845, the cost of construction averaged thus per mile:—

|                      | £      | Ratio |
|----------------------|--------|-------|
| Land                 | 2,540  | 8.0   |
| Earthworks           | 11,430 | 36.0  |
| Rails, engines, cars | 12,700 | 40.0  |
| Stations, &c.        | 5,080  | 16.0  |

Total . . . 31,750 100.0

Subsequently, however, the cost diminished (being the reverse of what occurred in England), and the average

on 31st December 1885 for all railways then running in France was exactly £27,000 per mile. The number of railway servants at that date was 232,000. The following table shows approximately the number of passengers and that of tons of goods carried from 1841 to 1887:—

| Period   | Millions   |       |
|----------|------------|-------|
|          | Passengers | Tons  |
| 1841-49  | 90         | 18    |
| 1850-59  | 320        | 110   |
| 1860-69  | 810        | 330   |
| 1870-79  | 1,320      | 560   |
| 1880-87  | 1,608      | 650   |
| 47 years | 4,148      | 1,668 |

The earnings and expenses in thirty-nine years were approximately as follows:—

| Period   | Earnings, Millions £ | Expenses, Millions £ | Profit, Millions £ |
|----------|----------------------|----------------------|--------------------|
| 1850-59  | 97                   | 45                   | 52                 |
| 1860-69  | 211                  | 98                   | 113                |
| 1870-79  | 327                  | 161                  | 166                |
| 1880-88  | 374                  | 194                  | 180                |
| 39 years | 1,009                | 498                  | 511                |

## GERMANY

The statistics for Prussia and other States show thus:—

| Year | Miles Open |         |        |             |       |         |        |
|------|------------|---------|--------|-------------|-------|---------|--------|
|      | Prussia    | Bavaria | Saxony | Wur-temberg | Baden | Various | Total  |
| 1840 | 106        | 42      | 79     | ...         | 16    | 98      | 341    |
| 1850 | 1,770      | 370     | 290    | 160         | 170   | 880     | 3,640  |
| 1860 | 3,450      | 1,130   | 470    | 210         | 220   | 1,500   | 6,980  |
| 1870 | 6,860      | 1,690   | 710    | 650         | 600   | 1,220   | 11,730 |
| 1880 | 12,640     | 3,000   | 1,300  | 840         | 820   | 2,090   | 20,690 |
| 1888 | 15,255     | 3,320   | 1,585  | 985         | 860   | 2,265   | 24,270 |

Hanoverian railways, which were included in the column "Various" down to 1860, were amalgamated with those of Prussia after the conquest in 1866. The returns for the whole German Empire show:—

| Year | Miles Open | Cost, Mil-lions £ | Receipts, £ | Expenses, £ | Profit, £  | Interest on Capital, Per Cent. |
|------|------------|-------------------|-------------|-------------|------------|--------------------------------|
| 1868 | 10,600     | 169               | 22,300,000  | 11,200,000  | 11,100,000 | 6.5                            |
| 1870 | 11,730     | 204               | 25,300,000  | 12,800,000  | 12,500,000 | 6.1                            |
| 1880 | 20,690     | 431               | 43,300,000  | 25,200,000  | 18,100,000 | 4.2                            |
| 1888 | 24,270     | 495               | 54,600,000  | 29,300,000  | 25,300,000 | 5.1                            |

The traffic and rolling-stock are shown below, kilo-metric passengers and tons being reduced to English form as passengers travelling 10 miles, goods 100 miles average.

| Year | Kilometric, Millions |             | Millions of Passengers, 10 Miles | Millions of Tons, 100 Miles | Locomotives | Cars   | Waggons |
|------|----------------------|-------------|----------------------------------|-----------------------------|-------------|--------|---------|
|      | Pas-sengers          | Goods, Tons |                                  |                             |             |        |         |
| 1868 | 3,213                | 5,042       | 203                              | 32                          | 4,640       | 8,920  | 98,440  |
| 1870 | 4,372                | 5,336       | 275                              | 34                          | 5,460       | 10,430 | 113,570 |
| 1875 | 5,994                | 10,392      | 378                              | 66                          | 9,940       | 17,520 | 206,000 |
| 1880 | 6,149                | 12,224      | 389                              | 77                          | 10,840      | 19,800 | 220,000 |
| 1887 | 8,385                | 16,516      | 527                              | 104                         | 12,750      | 23,440 | 256,000 |

The value of rolling-stock in 1887 was £75,800,000; it had a capacity for carrying 1,020,000 passengers, and 2,750,000 tons of merchandise.

Prussian railways showed as follows from 1844 to 1878:—

| Year    | Kilometric Millions |             | Passengers,<br>10 Miles | Tons, 100<br>Miles |
|---------|---------------------|-------------|-------------------------|--------------------|
|         | Passengers          | Goods, Tons |                         |                    |
| 1844-50 | 130                 | 20          | 8,000,000               | 130,000            |
| 1850-55 | 420                 | 190         | 26,000,000              | 1,200,000          |
| 1860-65 | 870                 | 926         | 55,000,000              | 5,830,000          |
| 1870-75 | 3,020               | 4,044       | 196,000,000             | 25,700,000         |
| 1878    | 3,740               | 8,033       | 235,000,000             | 50,600,000         |

The total carried in thirty-five years was as follows:—

| Period   | Kilometric Millions |             | Millions of<br>Passengers,<br>10 Miles | Millions of<br>Tons, 100<br>Miles |
|----------|---------------------|-------------|----------------------------------------|-----------------------------------|
|          | Passengers          | Goods, Tons |                                        |                                   |
| 1844-50  | 1,730               | 611         | 109                                    | 4                                 |
| 1851-60  | 6,100               | 6,297       | 384                                    | 40                                |
| 1861-70  | 16,530              | 24,412      | 1,040                                  | 153                               |
| 1871-78  | 28,710              | 55,767      | 1,810                                  | 351                               |
| 35 years | 53,070              | 87,087      | 3,343                                  | 548                               |

In 1879 the following statement was published, showing the saving of freight charges and passengers fares effected by the railways of Prussia in the above period, estimating the old charges at 27 silbergroschen for a ton of goods carried 10 kilometers, and a passenger at 40 silbergroschen the same distance:—

| Period   | Waggon Fares,<br>Millions £ |                 |       | Railway Fares,<br>Millions £ |                 |       | Savings,<br>Millions £ |
|----------|-----------------------------|-----------------|-------|------------------------------|-----------------|-------|------------------------|
|          | Goods                       | Passen-<br>gers | Total | Goods                        | Passen-<br>gers | Total |                        |
| 1844-50  | 8                           | 5               | 13    | 3                            | 4               | 7     | 6                      |
| 1851-60  | 84                          | 16              | 100   | 25                           | 14              | 39    | 61                     |
| 1861-70  | 326                         | 44              | 370   | 71                           | 31              | 102   | 268                    |
| 1871-78  | 744                         | 77              | 821   | 136                          | 52              | 188   | 633                    |
| 35 years | 1,162                       | 142             | 1,304 | 235                          | 101             | 336   | 968                    |

Traffic returns for Russia showed as follows:—

| Year | Miles  | Passengers | Goods, Tons | Receipts, £ | Expenses, £ | Net, £     |
|------|--------|------------|-------------|-------------|-------------|------------|
| 1870 | 7,100  | 14,400,000 | 7,700,000   | ...         | ...         | ...        |
| 1880 | 14,020 | 33,700,000 | 37,500,000  | 19,300,000  | 15,200,000  | 4,100,000  |
| 1887 | 18,380 | 38,200,000 | 50,400,000  | 25,300,000  | 14,400,000  | 10,900,000 |

|             | Per Mile |       |       |
|-------------|----------|-------|-------|
|             | 1870     | 1880  | 1887  |
| Passengers  | 2,030    | 2,400 | 2,080 |
| Goods, tons | 1,090    | 2,690 | 2,740 |
| Receipts, £ | ...      | 1,380 | 1,380 |
| Expenses, £ | ...      | 1,090 | 790   |
| Net, £      | ...      | 290   | 590   |

The total mileage in 1887 was made up thus:—

|                 | Miles  |
|-----------------|--------|
| European Russia | 16,760 |
| Finland         | 960    |
| Central Asia    | 660    |
| Total           | 18,380 |

At that time (1878) the cost of construction had reached 240 millions sterling; the saving which the railways effected to the benefit of the Prussian people was therefore four times what the lines had cost to make. If it be supposed that the traffic per mile on the other German lines was the same as on the Prussian, the business of all Germany since 1844 would be approximately as follows:—

| Period   | Millions of<br>Passengers,<br>10 Miles | Millions of<br>Tons<br>Goods, 100<br>Miles | Receipts,<br>Millions £ | Expenses,<br>Millions £ | Net<br>Earnings,<br>Millions £ |
|----------|----------------------------------------|--------------------------------------------|-------------------------|-------------------------|--------------------------------|
| 1844-50  | 229                                    | 9                                          | 15                      | ...                     | ...                            |
| 1851-60  | 776                                    | 82                                         | 80                      | ...                     | ...                            |
| 1861-70  | 1,890                                  | 281                                        | 186                     | ...                     | ...                            |
| 1871-80  | 3,720                                  | 726                                        | 398                     | 236                     | 162                            |
| 1881-87  | 3,220                                  | 630                                        | 341                     | 193                     | 148                            |
| 44 years | 9,835                                  | 1,728                                      | 1,020                   | ...                     | ...                            |

The distinction between State and Companies' lines is shown as follows in English miles:—

|            | State |        | Companies |       | Total  |        |
|------------|-------|--------|-----------|-------|--------|--------|
|            | 1875  | 1888   | 1875      | 1888  | 1875   | 1888   |
| Prussia    | 4,280 | 14,120 | 5,590     | 1,135 | 9,870  | 15,255 |
| Bavaria    | 1,580 | 2,890  | 880       | 430   | 2,460  | 3,320  |
| Saxony     | 740   | 1,520  | 360       | 65    | 1,100  | 1,585  |
| Wurtemberg | 790   | 970    | 10        | 15    | 800    | 985    |
| Baden      | 650   | 800    | 60        | 60    | 710    | 860    |
| Hesse, &c. | 590   | 800    | 1,490     | 1,465 | 2,080  | 2,265  |
| Total      | 8,630 | 21,100 | 8,390     | 3,070 | 17,020 | 24,270 |

The total mileage in 1889 was 25,450, representing a cost of about 527 millions sterling. Railway employees numbered 343,000.

#### RUSSIA

The first line, 16 miles, was opened from St. Petersburg to Charsko-Selo in 1837, the second in 1844, the mileage increasing as follows:—

| Year | Miles | Year | Miles  |
|------|-------|------|--------|
| 1840 | 16    | 1870 | 7,100  |
| 1850 | 310   | 1880 | 14,020 |
| 1860 | 990   | 1887 | 18,380 |

The respective mileages of Government lines and those belonging to companies are shown thus:—

|            | 1870  | 1886   |
|------------|-------|--------|
| Government | 730   | 2,250  |
| Companies  | 6,370 | 14,000 |
| Total      | 7,100 | 16,250 |

All the companies' lines enjoy concessions or guarantees. The rolling-stock in 1884 comprised 5810 locomotives and 121,000 carriages and waggons. In the same year there were 420 persons killed and 634 injured, of whom passengers were 25 and 85 respectively.

## AUSTRIA

Official tables give the following mileage :—

| Year | Austria | Hungary | Total  | State Lines | Companies' Lines |
|------|---------|---------|--------|-------------|------------------|
| 1840 | 90      | ...     | 90     | ...         | 90               |
| 1850 | 820     | 140     | 960    | 640         | 320              |
| 1860 | 1,810   | 1,000   | 2,810  | ...         | 2,810            |
| 1870 | 3,790   | 2,160   | 5,950  | 230         | 5,720            |
| 1880 | 7,080   | 4,420   | 11,500 | 2,240       | 9,260            |
| 1888 | 9,260   | 6,350   | 15,610 | 7,020       | 8,590            |

In the last-mentioned year 340 miles of Bosnian lines are counted as Austrian. The traffic for the whole Empire at various dates was as follows :—

| Year | Passengers | Goods, Tons | Receipts, £ | Per Mile   |       |
|------|------------|-------------|-------------|------------|-------|
|      |            |             |             | Passengers | Tons  |
| 1863 | 15,000,000 | ...         | 7,400,000   | 4,700      | ...   |
| 1870 | 21,500,000 | 24,500,000  | 13,200,000  | 3,600      | 4,100 |
| 1880 | 40,500,000 | 54,400,000  | 21,100,000  | 3,500      | 4,700 |
| 1887 | 65,400,000 | 78,600,000  | 20,800,000  | 4,600      | 5,100 |

The receipts in 1889 rose to £23,300,000, being at the rate of £1500 a mile. Capital, earnings, and expenditure at various dates compare as follows :—

| Year | Miles  | Cost, Millions £ | Per Mile, £ |          |         |     |
|------|--------|------------------|-------------|----------|---------|-----|
|      |        |                  | Cost        | Earnings | Expense | Net |
| 1870 | 5,950  | 120              | 20,200      | 2,220    | 1,280   | 940 |
| 1880 | 11,500 | 255              | 22,200      | 1,840    | 1,470   | 370 |
| 1887 | 15,050 | 298              | 19,800      | 1,390    | 780     | 610 |

Traffic returns on the railways of Italy at various dates compare as follows :—

| Year | Miles | Passengers | Goods, Tons | Receipts, £ | Expenses, £ | Net, £    |
|------|-------|------------|-------------|-------------|-------------|-----------|
| 1875 | 4,770 | 28,000,000 | 7,200,000   | 5,800,000   | 3,900,000   | 1,900,000 |
| 1880 | 5,340 | 32,500,000 | 9,300,000   | 7,200,000   | 4,300,000   | 2,900,000 |
| 1887 | 7,330 | 45,500,000 | 15,400,000  | 9,400,000   | 6,200,000   | 3,200,000 |

Averages per mile were as follows :—

| Year | Construction, £ | Passengers | Goods, Tons | Receipts, £ | Expenses, £ | Net, £ |
|------|-----------------|------------|-------------|-------------|-------------|--------|
| 1875 | 19,300          | 5,900      | 1,500       | 1,220       | 820         | 400    |
| 1880 | 19,600          | 6,100      | 1,700       | 1,350       | 800         | 550    |
| 1887 | 17,800          | 6,200      | 2,100       | 1,290       | 850         | 440    |

Returns on capital showed as follows :—

| Year | Cost, Millions £ | Net Earnings, £ | Percentage |
|------|------------------|-----------------|------------|
| 1875 | 92               | 1,900,000       | 2.1        |
| 1880 | 105              | 2,900,000       | 2.8        |
| 1887 | 122              | 3,200,000       | 2.6        |

Passenger and goods traffic showed the following earnings :—

| Year | Passengers, £ | Goods, £  | Pence         |         |
|------|---------------|-----------|---------------|---------|
|      |               |           | Per Passenger | Per Ton |
| 1875 | 2,700,000     | 3,100,000 | 23            | 103     |
| 1880 | 3,000,000     | 4,200,000 | 22            | 108     |
| 1887 | 3,800,000     | 5,600,000 | 20            | 87      |

The net return on capital invested was as follows :—

| Year | Cost, £     | Net Earnings, £ | Percentage |
|------|-------------|-----------------|------------|
| 1870 | 120,000,000 | 5,600,000       | 4.7        |
| 1880 | 255,000,000 | 4,200,000       | 1.6        |
| 1887 | 298,000,000 | 9,100,000       | 3.1        |

Excluding 340 miles of Bosnian lines, the mileage in 1888 was made up thus :—

|               | Austria | Hungary | Total  |
|---------------|---------|---------|--------|
| State lines   | 3,650   | 3,370   | 7,020  |
| Company lines | 5,270   | 2,980   | 8,250  |
| Total         | 8,920   | 6,350   | 15,270 |

## ITALY

The official returns of mileage show thus :—

| Year | Miles | Year | Miles |
|------|-------|------|-------|
| 1840 | 13    | 1870 | 3,830 |
| 1850 | 270   | 1880 | 5,340 |
| 1860 | 1,120 | 1889 | 8,130 |

The mileage of State lines and those of companies' lines were as follows :—

|           | 1870  | 1880  | 1887  |
|-----------|-------|-------|-------|
| State     | 500   | 2,380 | 5,030 |
| Companies | 3,330 | 2,960 | 2,300 |
| Total     | 3,830 | 5,340 | 7,330 |

## SPAIN

In 1848 the first railway was opened from Barcelona to Mataró, 18 miles. Progress is shown as follows :—

| Year | Miles | Year | Miles |
|------|-------|------|-------|
| 1848 | 18    | 1870 | 3,200 |
| 1855 | 300   | 1880 | 4,550 |
| 1860 | 1,190 | 1888 | 5,920 |

Traffic and earnings were as follows :—

| Year | Miles | Passengers | Goods, Tons | Receipts, £ | Expenses, £ |
|------|-------|------------|-------------|-------------|-------------|
| 1873 | 3,310 | 10,800,000 | 3,900,000   | 3,530,000   | ...         |
| 1880 | 4,550 | 14,800,000 | 8,100,000   | 5,570,000   | 2,450,000   |

Averages per mile were as follows :—

|      | Construction, £ | Passengers | Goods, Tons | Receipts, £ | Expenses, £ |
|------|-----------------|------------|-------------|-------------|-------------|
| 1873 | ...             | 3,300      | 1,200       | 1,070       | ...         |
| 1880 | 15,800          | 3,300      | 1,800       | 1,220       | 540         |

The cost of construction down to 1880 was officially stated thus :—

|                     |             |
|---------------------|-------------|
| State subsidies     | £28,000,000 |
| Outlay by companies | 44,000,000  |
| Total               | £72,000,000 |

If the existing lines in 1888 be taken at the same mileage cost, they will represent an outlay of £98,700,000. The ratio of working expenses is the lowest in the world, only 43 per cent. of earnings. The net earnings in 1880 were about 4½ per cent. (4.4) on the cost of construction. Later information is wanting. All the lines in Spain are owned by companies.

## PORTUGAL

The first line was in 1854, from Lisbon to Carregado, twenty-two miles. Official returns of mileage are as follows :—

| Year           | Miles | Year           | Miles |
|----------------|-------|----------------|-------|
| 1855 . . . . . | 22    | 1875 . . . . . | 640   |
| 1860 . . . . . | 42    | 1880 . . . . . | 710   |
| 1870 . . . . . | 440   | 1888 . . . . . | 1190  |

The official returns for 1881 and 1885 showed thus :—

| Year           | Miles | Passengers | Goods, Tons | Receipts, £ | Expenses, £ |
|----------------|-------|------------|-------------|-------------|-------------|
| 1881 . . . . . | 760   | 2,200,000  | 740,000     | 750,000     | 310,000     |
| 1885 . . . . . | 950   | 2,600,000  | 960,000     | 860,000     | 370,000     |

Averages per mile were as follows :—

| Year           | Passengers | Goods, Tons | Receipts, £ | Expenses, £ | Net, £ |
|----------------|------------|-------------|-------------|-------------|--------|
| 1881 . . . . . | 2,900      | 970         | 990         | 410         | 580    |
| 1885 . . . . . | 2,700      | 1,010       | 900         | 390         | 510    |

Traffic returns on the railways of Sweden were as follows :—

| Year           | Miles | Passengers | Goods, Tons | Receipts, £ | Expenses, £ | Net, £  |
|----------------|-------|------------|-------------|-------------|-------------|---------|
| 1875 . . . . . | 2,170 | 6,500,000  | 5,100,000   | 1,390,000   | 870,000     | 520,000 |
| 1880 . . . . . | 3,650 | 7,000,000  | 5,900,000   | 1,800,000   | 1,000,000   | 800,000 |
| 1887 . . . . . | 4,580 | 10,100,000 | 7,600,000   | 2,090,000   | 1,310,000   | 780,000 |

Averages per mile were as follows :—

| Year           | Construction, £ | Passengers | Goods, Tons | Receipts, £ | Expenses, £ |
|----------------|-----------------|------------|-------------|-------------|-------------|
| 1875 . . . . . | 6,300           | 3,000      | 2,400       | 640         | 400         |
| 1880 . . . . . | 6,400           | 1,900      | 1,600       | 500         | 270         |
| 1887 . . . . . | 6,100           | 2,200      | 1,700       | 470         | 290         |

Earnings showed the following returns for capital :—

| Year           | Cost, £    | Net Receipts, £ | Percentage |
|----------------|------------|-----------------|------------|
| 1875 . . . . . | 13,800,000 | 520,000         | 3.8        |
| 1880 . . . . . | 23,300,000 | 800,000         | 3.4        |
| 1887 . . . . . | 27,900,000 | 800,000         | 2.8        |

Mileage and traffic of Swedish railways in 1887 were made up thus :—

|                     | Miles | Passengers | Goods, Tons | Receipts, £ | Expenses, £ | Net, £  |
|---------------------|-------|------------|-------------|-------------|-------------|---------|
| State . . . . .     | 1,550 | 4,000,000  | 2,500,000   | 1,030,000   | 730,000     | 300,000 |
| Companies . . . . . | 3,030 | 6,100,000  | 5,100,000   | 1,060,000   | 580,000     | 480,000 |
| Total . . . . .     | 4,580 | 10,100,000 | 7,600,000   | 2,090,000   | 1,310,000   | 780,000 |

The average percentage which net earnings gave on capital during five years ending 1886 was as follows :—

|                         |     |
|-------------------------|-----|
| State lines . . . . .   | 3.3 |
| Company lines . . . . . | 4.1 |

The average cost of construction down to 1886 was £8690 per mile on Government lines and £4700 on companies' lines.

## NORWAY

The first line was opened in 1855, and the miles open since have been as follows :—

| Year           | State | Companies | Total |
|----------------|-------|-----------|-------|
| 1860 . . . . . | ...   | 42        | 42    |
| 1870 . . . . . | 182   | 42        | 224   |
| 1880 . . . . . | 650   | 42        | 692   |
| 1889 . . . . . | 973   | 42        | 1015  |

If we suppose the cost of construction (which is unknown) to have been the same as in Spain, say £15,800 per mile, the cost and net percentage on capital of Portuguese lines will have been thus :—

| Year           | Cost, £    | Net Earnings, £ | Percentage |
|----------------|------------|-----------------|------------|
| 1881 . . . . . | 12,600,000 | 440,000         | 3.5        |
| 1885 . . . . . | 15,800,000 | 490,000         | 3.1        |

The receipts in 1885 were as follows :—

|                      | £       | Average Pence |
|----------------------|---------|---------------|
| Passengers . . . . . | 360,000 | 34 each       |
| Goods . . . . .      | 500,000 | 125 per ton   |
| Total . . . . .      | 860,000 | ...           |

The average fare for each passenger and ton of goods carried is much higher than in other countries. The lines belong to companies which receive State subsidies.

## SWEDEN

Official statement of mileage is as follows :—

| Year           | State | Companies | Total |
|----------------|-------|-----------|-------|
| 1860 . . . . . | 187   | 188       | 375   |
| 1870 . . . . . | 700   | 390       | 1,090 |
| 1880 . . . . . | 1,210 | 2,440     | 3,650 |
| 1888 . . . . . | 1,580 | 3,120     | 4,700 |

Traffic returns in Norway showed as follows :—

| Year           | Miles | Passengers | Goods, Tons | Receipts, £ | Expenses, £ | Net, £  |
|----------------|-------|------------|-------------|-------------|-------------|---------|
| 1872 . . . . . | 256   | 840,000    | 540,000     | 130,000     | 85,000      | 45,000  |
| 1880 . . . . . | 690   | 1,650,000  | 600,000     | 240,000     | 180,000     | 60,000  |
| 1888 . . . . . | 970   | 3,300,000  | 1,200,000   | 420,000     | 290,000     | 130,000 |

Net returns compared with cost of construction as follows :—

| Year           | Cost, £   | Net Earnings | Percentage |
|----------------|-----------|--------------|------------|
| 1872 . . . . . | 2,000,000 | 45,000       | 2.3        |
| 1880 . . . . . | 4,450,000 | 60,000       | 1.4        |
| 1888 . . . . . | 7,100,000 | 130,000      | 1.8        |

Averages per mile in Norway were as follows :—

| Year | Construction, £ | Passengers | Goods, Tons | Receipts, £ | Expenses, £ | Net, £ |
|------|-----------------|------------|-------------|-------------|-------------|--------|
| 1872 | 7,800           | 3,300      | 2,100       | 510         | 340         | 170    |
| 1880 | 6,400           | 2,400      | 900         | 340         | 250         | 90     |
| 1888 | 7,100           | 3,400      | 1,200       | 430         | 300         | 130    |

All are State railways except a short line of forty-two miles.

## DENMARK

The number of miles open was as follows :—

| Year | State | Companies | Total |
|------|-------|-----------|-------|
| 1850 | ...   | 20        | 20    |
| 1860 | ...   | 70        | 70    |
| 1870 | 300   | 170       | 470   |
| 1880 | 770   | 210       | 980   |
| 1888 | 970   | 250       | 1,220 |

Traffic returns were as follows :—

| Year | Miles | Passengers | Goods, Tons | Receipts, £ | Expenses, £ | Net, £  |
|------|-------|------------|-------------|-------------|-------------|---------|
| 1875 | 780   | 5,600,000  | 1,800,000   | 560,000     | 340,000     | 220,000 |
| 1880 | 830   | 5,900,000  | 2,000,000   | 590,000     | 370,000     | 220,000 |
| 1888 | 1,220 | 8,800,000  | 2,900,000   | 780,000     | 680,000     | 100,000 |

Traffic returns on railways in Holland were as follows :—

| Year | Miles | Passengers | Goods, Tons | Receipts, £ | Expenses, £ | Net, £    |
|------|-------|------------|-------------|-------------|-------------|-----------|
| 1873 | 830   | 9,300,000  | 1,700,000   | 1,130,000   | 880,000     | 250,000   |
| 1880 | 1,440 | 16,000,000 | 4,400,000   | 1,860,000   | 930,000     | 930,000   |
| 1888 | 1,700 | 18,500,000 | 8,100,000   | 2,290,000   | 1,280,000   | 1,010,000 |

In 1888 the traffic was as follows :—

|           | Miles | Passengers | Goods, Tons | Receipts, £ | Expenses, £ | Net, £    |
|-----------|-------|------------|-------------|-------------|-------------|-----------|
| State     | 930   | 5,900,000  | 4,600,000   | 1,120,000   | 640,000     | 480,000   |
| Companies | 770   | 12,600,000 | 3,500,000   | 1,170,000   | 640,000     | 530,000   |
| Total     | 1,700 | 18,500,000 | 8,100,000   | 2,290,000   | 1,280,000   | 1,010,000 |

The averages per mile were as follows :—

| Year | Passengers | Goods, Tons | Receipts, £ | Expenses, £ | Net, £ |
|------|------------|-------------|-------------|-------------|--------|
| 1873 | 11,200     | 2,050       | 1,360       | 1,050       | 310    |
| 1880 | 11,100     | 3,050       | 1,300       | 650         | 650    |
| 1888 | 10,900     | 4,800       | 1,350       | 750         | 600    |

The return on capital was as follows in 1885 :—

|           | Construction, £ | Net Earnings, £ | Percentage |
|-----------|-----------------|-----------------|------------|
| State     | 15,900,000      | 390,000         | 2.5        |
| Companies | 10,400,000      | 520,000         | 5.0        |

In four years ending 1886 the average was 36 persons killed and 35 injured, but of passengers only 1 killed and 4 injured per annum.

## BELGIUM

A line from Brussels to Malines, opened in 1835, was the first of any importance on the European Continent,

The returns of traffic are exclusive of 100 miles of company's line in Jutland. The mileage traffic on Danish railways showed thus :—

| Year       | Per Mile        |                |                |                  |        |
|------------|-----------------|----------------|----------------|------------------|--------|
|            | Pas-<br>sengers | Goods,<br>Tons | Receipts,<br>£ | Ex-<br>penses, £ | Net, £ |
| 1875 . . . | 7,200           | 2,300          | 720            | 430              | 290    |
| 1880 . . . | 7,100           | 2,400          | 710            | 445              | 265    |
| 1888 . . . | 7,900           | 2,700          | 700            | 600              | 100    |

In 1889 the State lines had a length of 1000 miles, having cost exactly eight millions sterling. At this rate the total outlay on the existing 1210 miles would be £9,700,000. The net earnings in 1888 being £100 per mile, would represent only 1½ per cent. on the cost of construction, against 3.7 in 1875 and 3.3 in 1880.

## HOLLAND

The first line was opened in 1839. Government lines were not begun until 1863. The mileage grew thus :—

| Year | State | Companies | Total |
|------|-------|-----------|-------|
| 1840 | ...   | 11        | 11    |
| 1850 | ...   | 110       | 110   |
| 1860 | ...   | 200       | 200   |
| 1870 | 500   | 280       | 780   |
| 1880 | 670   | 770       | 1,440 |
| 1888 | 930   | 770       | 1,700 |

although the Lyons and St. Etienne preceded it by seven years. The growth of mileage is shown as follows :—

| Year | State | Companies | Total |
|------|-------|-----------|-------|
| 1840 | 210   | ...       | 210   |
| 1850 | 390   | 160       | 550   |
| 1860 | 460   | 610       | 1,070 |
| 1870 | 540   | 1,260     | 1,800 |
| 1880 | 1,730 | 670       | 2,400 |
| 1888 | 1,990 | 770       | 2,760 |

The balance-sheet of the State lines was :—

| Period   | Receipts, £ | Expenses, £ | Profit, £  |
|----------|-------------|-------------|------------|
| 1835-60  | 14,700,000  | 8,200,000   | 6,500,000  |
| 1861-70  | 15,400,000  | 8,200,000   | 7,200,000  |
| 1871-80  | 35,600,000  | 22,300,000  | 13,300,000 |
| 1881-87  | 33,400,000  | 19,800,000  | 13,600,000 |
| 53 years | 99,100,000  | 58,500,000  | 40,600,000 |

The number of passengers on all lines carried, and that of those killed, were :—

| 1835-87.      |             |        |           |
|---------------|-------------|--------|-----------|
| Period        | Number      | Killed | One in    |
| 1835-50 . . . | 45,000,000  | 15     | 3,000,000 |
| 1851-70 . . . | 232,000,000 | 34     | 6,600,000 |
| 1871-80 . . . | 465,000,000 | 77     | 6,100,000 |
| 1881-87 . . . | 445,000,000 | 60     | 7,400,000 |

The return on capital of Belgian lines in 1888 was :—

|                 | Cost, £    | Net Product, £ | Percentage |
|-----------------|------------|----------------|------------|
| State . . .     | 55,300,000 | 2,460,000      | 4.5        |
| Companies . . . | 16,200,000 | 780,000        | 4.8        |
| Total . . .     | 71,500,000 | 3,240,000      | 4.6        |

The traffic returns on all the railways of Belgium in 1888 were as follows :—

|                     | Miles | Passengers | Goods, Tons | Receipts, £ | Expenses, £ | Net, £    |
|---------------------|-------|------------|-------------|-------------|-------------|-----------|
| State . . . . .     | 1,990 | 57,900,000 | 25,500,000  | 5,260,000   | 2,800,000   | 2,460,000 |
| Companies . . . . . | 770   | 15,500,000 | 15,300,000  | 1,520,000   | 740,000     | 780,000   |
| Total . . . . .     | 2,760 | 73,400,000 | 40,800,000  | 6,780,000   | 3,540,000   | 3,240,000 |

Averages per mile were as follows :—

|                     | Pas-<br>sengers | Goods,<br>Tons | Receipts,<br>£ | Ex-<br>penses, £ | Net, £ |
|---------------------|-----------------|----------------|----------------|------------------|--------|
| State . . . . .     | 29,000          | 12,800         | 2,630          | 1,400            | 1,230  |
| Companies . . . . . | 20,100          | 19,900         | 1,980          | 960              | 1,020  |
| Total . . . . .     | 26,700          | 14,800         | 2,450          | 1,280            | 1,170  |

The average cost of construction was £25,800 per mile, the highest ratio on the Continent except France.

#### SWITZERLAND

Notwithstanding the mountainous character of the country, railways are general; the mileage was :—

| Year           | Miles | Year           | Miles |
|----------------|-------|----------------|-------|
| 1850 . . . . . | 15    | 1870 . . . . . | 890   |
| 1855 . . . . . | 130   | 1880 . . . . . | 1,600 |
| 1860 . . . . . | 650   | 1889 . . . . . | 1,950 |

Traffic returns were as follows :—

| Year           | Miles | Passengers | Goods,<br>Tons | Receipts, £ | Expenses,<br>£ |
|----------------|-------|------------|----------------|-------------|----------------|
| 1875 . . . . . | 1,260 | 21,300,000 | 5,100,000      | 2,300,000   | ...            |
| 1880 . . . . . | 1,600 | 21,600,000 | 5,800,000      | 2,400,000   | 1,260,000      |
| 1888 . . . . . | 1,870 | 27,100,000 | 8,600,000      | 3,300,000   | 1,760,000      |

Averages per mile were as follows :—

| Year           | Passen-<br>gers | Goods,<br>Tons | Receipts,<br>£ | Ex-<br>penses, £ | Net, £ |
|----------------|-----------------|----------------|----------------|------------------|--------|
| 1875 . . . . . | 17,100          | 4,100          | 1,840          | ...              | ...    |
| 1880 . . . . . | 13,500          | 3,600          | 1,500          | 790              | 710    |
| 1888 . . . . . | 14,500          | 4,600          | 1,780          | 940              | 840    |

All the lines belong to companies. The cost of construction down to the end of 1888 was £20,500 a mile.

#### ROUMANIA

Official statements show mileage thus :—

| Year           | Miles | Year           | Miles |
|----------------|-------|----------------|-------|
| 1870 . . . . . | 150   | 1880 . . . . . | 860   |
| 1875 . . . . . | 770   | 1889 . . . . . | 1,530 |

The cost of construction down to 1882 was approximately as follows, according to Census report, and in order to bring the general average up to that of Poor's *Manual*, a percentage must be added as below :—

|                       | Census Report |               |             | Amended Average |             |
|-----------------------|---------------|---------------|-------------|-----------------|-------------|
|                       | Miles         | Cost, £       | Per Mile, £ | Cost, £         | Per Mile, £ |
| New England . . . . . | 6,150         | 64,000,000    | 10,500      | 70,400,000      | 11,500      |
| Middle . . . . .      | 16,440        | 306,000,000   | 18,500      | 337,400,000     | 20,500      |
| South . . . . .       | 15,800        | 112,000,000   | 7,100       | 123,200,000     | 7,800       |
| West . . . . .        | 66,420        | 708,000,000   | 10,500      | 779,000,000     | 11,700      |
| Total . . . . .       | 104,810       | 1,190,000,000 | 11,300      | 1,310,000,000   | 12,500      |

#### GREECE

As late as 1880 there were but seven miles of railways, the length in 1889 being 360 miles, besides 240 miles actually under construction.

#### TURKEY

All the lines belong to companies; mileage as follows :—

| Year           | Miles | Year           | Miles |
|----------------|-------|----------------|-------|
| 1860 . . . . . | 40    | 1880 . . . . . | 730   |
| 1870 . . . . . | 390   | 1888 . . . . . | 1,260 |

In 1888 there were 900 miles of rail in European, and 360 in Asiatic, Turkey.

#### UNITED STATES

The first line was from Boston to Quincy, four miles, opened in 1827. All the lines belong to companies, and the returns of mileage show thus :—

| Year           | Miles  | Year           | Miles   |
|----------------|--------|----------------|---------|
| 1830 . . . . . | 23     | 1870 . . . . . | 53,400  |
| 1840 . . . . . | 2,820  | 1880 . . . . . | 93,670  |
| 1850 . . . . . | 9,020  | 1885 . . . . . | 123,320 |
| 1860 . . . . . | 30,630 | 1889 . . . . . | 161,250 |

The distribution of mileage, according to Poor's *Manual*, at various dates, was as follows :—

| States                | 1850  | 1860   | 1870   | 1880   | 1889    |
|-----------------------|-------|--------|--------|--------|---------|
| New England . . . . . | 2,510 | 3,660  | 4,490  | 5,980  | 6,730   |
| Middle . . . . .      | 3,200 | 6,350  | 10,580 | 15,180 | 19,740  |
| South . . . . .       | 1,280 | 8,540  | 12,560 | 19,570 | 39,240  |
| West . . . . .        | 2,030 | 12,080 | 25,290 | 52,570 | 95,540  |
| Total . . . . .       | 9,020 | 30,630 | 52,920 | 93,300 | 161,250 |

The cost of construction per mile varied as follows :—

| Year           | Miles   | Cost, £       | Per Mile, £ |
|----------------|---------|---------------|-------------|
| 1850 . . . . . | 9,020   | 60,200,000    | 6,600       |
| 1860 . . . . . | 30,640  | 239,000,000   | 7,800       |
| 1871 . . . . . | 60,520  | 555,200,000   | 9,300       |
| 1881 . . . . . | 101,730 | 1,274,100,000 | 12,500      |
| 1888 . . . . . | 156,080 | 1,949,000,000 | 12,490      |

New railways had a marvellous effect in opening up the Western and some of the Southern States as follows:—

|                         | Railways, Miles |        | Increase<br>per Cent. | Farms, Acres |             | Increase<br>per Cent. |
|-------------------------|-----------------|--------|-----------------------|--------------|-------------|-----------------------|
|                         | 1871            | 1880   |                       | 1871         | 1880        |                       |
| Illinois . . . . .      | 5,904           | 8,326  | 41                    | 25,883,000   | 31,674,000  | 21                    |
| Ohio . . . . .          | 3,740           | 6,664  | 78                    | 21,713,000   | 24,529,000  | 13                    |
| Iowa . . . . .          | 3,160           | 6,113  | 93                    | 15,542,000   | 24,753,000  | 61                    |
| Texas . . . . .         | 865             | 5,344  | 520                   | 18,397,000   | 36,292,000  | 98                    |
| Indiana . . . . .       | 3,529           | 4,765  | 36                    | 18,120,000   | 31,674,000  | 74                    |
| Michigan . . . . .      | 2,116           | 4,284  | 102                   | 10,019,000   | 13,807,000  | 38                    |
| Missouri . . . . .      | 2,580           | 4,211  | 62                    | 21,707,000   | 27,879,000  | 27                    |
| Kansas . . . . .        | 1,760           | 3,718  | 111                   | 5,657,000    | 21,417,000  | 282                   |
| Wisconsin . . . . .     | 1,725           | 3,442  | 99                    | 11,715,000   | 15,353,000  | 31                    |
| Minnesota . . . . .     | 1,612           | 3,391  | 110                   | 6,484,000    | 13,403,000  | 106                   |
| Nebraska . . . . .      | 943             | 2,310  | 146                   | 9,945,000    |             | 380                   |
| Eleven States . . . . . | 27,934          | 52,568 | 88                    | 157,311,000  | 250,726,000 | 60                    |

It appears that in the above eleven States the construction of 26,600 miles of railway, at a cost of 280 millions sterling, was accompanied by a spread of farming to an extent of 93,500,000 acres; the value of the increased area amounting to 520 million dollars, or 108 millions sterling, that is, 39 per cent. of the total cost of the new railways.

The annual construction of railways has averaged:—

| Period            | Miles made Yearly |                  |       |       |       |
|-------------------|-------------------|------------------|-------|-------|-------|
|                   | New<br>England    | Middle<br>States | South | West  | Total |
| 1851-60 . . . . . | 115               | 315              | 726   | 1,005 | 2,161 |
| 1861-70 . . . . . | 83                | 423              | 402   | 1,321 | 2,229 |
| 1871-80 . . . . . | 149               | 460              | 701   | 2,728 | 4,038 |
| 1881-89 . . . . . | 75                | 456              | 1,967 | 4,297 | 6,795 |

Averages per mile, on the aggregate, of all railways in the United States were as follows:—

| Year           | Passengers | Goods, Tons | Re-<br>ceipts, £ | Ex-<br>penses, £ | Net, £ |
|----------------|------------|-------------|------------------|------------------|--------|
| 1872 . . . . . | 2,300      | 2,500       | 1,260            | 1,030            | 230    |
| 1875 . . . . . | 2,600      | 2,700       | 1,400            | 880              | 520    |
| 1882 . . . . . | 3,300      | 3,200       | 1,410            | 850              | 560    |
| 1888 . . . . . | 2,900      | 3,800       | 1,290            | 900              | 390    |

Traffic returns for the whole Union show as follows:—

| Year           | Miles   | Passengers  | Goods, Tons | Receipts, £ | Expenses, £ |
|----------------|---------|-------------|-------------|-------------|-------------|
| 1872 . . . . . | 66,200  | 150,000,000 | 170,000,000 | 84,200,000  | 68,800,000  |
| 1875 . . . . . | 74,370  | 191,000,000 | 202,000,000 | 104,800,000 | 66,100,000  |
| 1882 . . . . . | 113,330 | 375,400,000 | 360,500,000 | 160,500,000 | 95,800,000  |
| 1888 . . . . . | 154,280 | 451,400,000 | 589,400,000 | 198,000,000 | 138,000,000 |

The receipts in 1888 were as follows:—

|                      | Amount, £   | Pence per Mile |
|----------------------|-------------|----------------|
| Passengers . . . . . | 52,200,000  | 1.12           |
| Goods . . . . .      | 145,800,000 | 0.52           |
| Total . . . . .      | 198,000,000 | ...            |

£1800, sleeping cars £3500. The railway of greatest passenger traffic was the New York Elevated, carrying 191 million passengers yearly. The construction of this line took 2200 tons of iron per mile, and cost £44 per yard, against £500 for the London Metropolitan.

The return on capital is shown thus:—

| Year           | Cost, £       | Net Product, £ | Percentage |
|----------------|---------------|----------------|------------|
| 1872 . . . . . | 658,300,000   | 15,400,000     | 2.3        |
| 1875 . . . . . | 920,000,000   | 38,700,000     | 4.2        |
| 1882 . . . . . | 1,436,600,000 | 65,300,000     | 4.6        |
| 1888 . . . . . | 1,949,000,000 | 60,000,000     | 3.1        |

The average for each passenger was a journey of 25 miles, for which he paid 28d., and for each ton of goods a haulage of 115 miles, for which the fare was 60d. The value of merchandise carried was estimated at 2950 millions sterling. The average price of locomotives was

The following table for 1888 shows the traffic on the lines actually working in the principal States:—

|                        | Miles<br>Worked | Receipts, £ |             |             | Expenses, £ | Cost of<br>Construction,<br>£ | Net<br>Product, £ | Per-<br>centage |
|------------------------|-----------------|-------------|-------------|-------------|-------------|-------------------------------|-------------------|-----------------|
|                        |                 | Passengers  | Goods       | Total       |             |                               |                   |                 |
| Illinois . . . . .     | 18,055          | 5,200,000   | 15,900,000  | 21,100,000  | 14,600,000  | 155,000,000                   | 6,500,000         | 4.2             |
| Ohio . . . . .         | 10,345          | 4,100,000   | 13,300,000  | 17,400,000  | 12,160,000  | 158,300,000                   | 5,240,000         | 3.3             |
| Minnesota . . . . .    | 8,863           | 2,060,000   | 6,260,000   | 8,320,000   | 5,060,000   | 104,000,000                   | 3,260,000         | 3.1             |
| Missouri . . . . .     | 8,801           | 2,200,000   | 7,300,000   | 9,500,000   | 6,540,000   | 79,000,000                    | 2,960,000         | 3.7             |
| Pennsylvania . . . . . | 7,532           | 4,900,000   | 21,300,000  | 26,200,000  | 15,800,000  | 142,500,000                   | 10,400,000        | 7.3             |
| Wisconsin . . . . .    | 7,482           | 1,600,000   | 5,100,000   | 6,700,000   | 4,620,000   | 56,000,000                    | 2,080,000         | 3.7             |
| New York . . . . .     | 7,429           | 4,900,000   | 12,300,000  | 17,200,000  | 11,940,000  | 178,300,000                   | 5,260,000         | 2.9             |
| Kansas . . . . .       | 7,233           | 1,390,000   | 3,510,000   | 4,900,000   | 3,800,000   | 52,800,000                    | 1,100,000         | 2.1             |
| California . . . . .   | 6,940           | 2,980,000   | 7,580,000   | 10,560,000  | 7,030,000   | 78,300,000                    | 3,530,000         | 4.5             |
| Indiana . . . . .      | 6,116           | 2,060,000   | 5,240,000   | 7,300,000   | 5,550,000   | 51,200,000                    | 1,750,000         | 3.4             |
| Michigan . . . . .     | 5,486           | 1,940,000   | 4,160,000   | 6,100,000   | 4,360,000   | 47,500,000                    | 1,740,000         | 3.7             |
| Texas . . . . .        | 5,019           | 850,000     | 3,050,000   | 3,900,000   | 3,160,000   | 61,800,000                    | 740,000           | 1.2             |
| Various . . . . .      | 45,997          | 18,059,000  | 40,530,000  | 58,589,000  | 41,177,000  | 568,400,000                   | 17,412,000        | 3.1             |
| Total . . . . .        | 145,298         | 52,239,000  | 145,530,000 | 197,769,000 | 135,797,000 | 1,733,100,000                 | 61,972,000        | 3.6             |

## CANADA

Traffic returns were as follows :—

| Year           | Miles  | Passengers | Goods, Tons | Receipts, £ | Expenses, £ | Miles Run  |
|----------------|--------|------------|-------------|-------------|-------------|------------|
| 1875 . . . . . | 4,830  | 5,200,000  | 5,700,000   | 4,050,000   | 3,280,000   | 17,700,000 |
| 1880 . . . . . | 6,890  | 6,500,000  | 9,900,000   | 4,900,000   | 3,500,000   | 22,400,000 |
| 1889 . . . . . | 12,630 | 12,200,000 | 17,900,000  | 8,430,000   | 6,210,000   | ...        |

The first line was opened in 1836 to Laprairie, in the province of Quebec, sixteen miles. Mileage open to traffic has been as follows :—

| Year           | Miles | Year           | Miles  |
|----------------|-------|----------------|--------|
| 1840 . . . . . | 16    | 1870 . . . . . | 2,500  |
| 1851 . . . . . | 71    | 1880 . . . . . | 6,890  |
| 1860 . . . . . | 2,090 | 1890 . . . . . | 13,330 |

Averages per mile were as follows :—

| Year           | Passengers | Tons  | Receipts, £ | Expenses, £ | Net, £ |
|----------------|------------|-------|-------------|-------------|--------|
| 1875 . . . . . | 1,100      | 1,200 | 830         | 660         | 170    |
| 1880 . . . . . | 940        | 1,440 | 710         | 500         | 210    |
| 1889 . . . . . | 970        | 1,440 | 670         | 490         | 180    |

The mileage cost of construction and traffic of the several lines in 1887 showed as follows :—

|                         | Miles         | Cost, £            | Receipts, £      | Expenses, £      | Net, £           | Interest on Cost |
|-------------------------|---------------|--------------------|------------------|------------------|------------------|------------------|
| Pacific . . . . .       | 4,320         | 42,800,000         | 2,210,000        | 1,520,000        | 690,000          | 1.6              |
| Grand Trunk . . . . .   | 2,600         | 60,300,000         | 3,330,000        | 2,290,000        | 1,040,000        | 1.7              |
| Intercolonial . . . . . | 900           | 9,200,000          | 540,000          | 580,000          | ...              | ...              |
| Various . . . . .       | 3,870         | 30,200,000         | 2,000,000        | 1,310,000        | 690,000          | 2.3              |
| <b>Total . . . . .</b>  | <b>11,690</b> | <b>142,500,000</b> | <b>8,080,000</b> | <b>5,700,000</b> | <b>2,380,000</b> | <b>1.6</b>       |

|                        | Passengers        | Tons              | Per Mile   |              |             |             |            | Miles Run         |
|------------------------|-------------------|-------------------|------------|--------------|-------------|-------------|------------|-------------------|
|                        |                   |                   | Passengers | Tons         | Receipts, £ | Expenses, £ | Net, £     |                   |
| Pacific . . . . .      | 1,950,000         | 2,120,000         | 450        | 490          | 510         | 350         | 160        | 6,900,000         |
| Grand Trunk . . . . .  | 5,080,000         | 6,460,000         | 1,950      | 2,490        | 1,280       | 880         | 400        | 13,800,000        |
| Various . . . . .      | 3,670,000         | 7,820,000         | 750        | 1,620        | 530         | 390         | 140        | 12,900,000        |
| <b>Total . . . . .</b> | <b>10,700,000</b> | <b>16,400,000</b> | <b>900</b> | <b>1,400</b> | <b>700</b>  | <b>490</b>  | <b>210</b> | <b>33,600,000</b> |

Some of the railways belong to the State, and to most of the others the Government has given subsidies. The mileage and traffic of all were made up in 1887 thus :—

|                        | Miles         | Passengers        | Goods, Tons       | Receipts, £      | Expenses, £      | Net, £           | Miles Run         |
|------------------------|---------------|-------------------|-------------------|------------------|------------------|------------------|-------------------|
| State . . . . .        | 1,200         | 1,100,000         | 1,200,000         | 580,000          | 600,000          | ...              | 4,800,000         |
| Companies . . . . .    | 10,490        | 9,600,000         | 15,200,000        | 7,500,000        | 5,100,000        | 2,400,000        | 28,800,000        |
| <b>Total . . . . .</b> | <b>11,690</b> | <b>10,700,000</b> | <b>16,400,000</b> | <b>8,080,000</b> | <b>5,700,000</b> | <b>2,380,000</b> | <b>33,600,000</b> |

The average cost of construction and earnings per train-mile run were as follows :—

|                        | Cost, £            | Cost £, per Mile | Per Train Mile, Pence |           |           |
|------------------------|--------------------|------------------|-----------------------|-----------|-----------|
|                        |                    |                  | Receipts              | Expenses  | Net       |
| Pacific . . . . .      | 42,800,000         | 9,900            | 77                    | 53        | 24        |
| Grand Trunk . . . . .  | 60,300,000         | 23,100           | 57                    | 39        | 18        |
| Various . . . . .      | 39,400,000         | 8,200            | 47                    | 35        | 12        |
| <b>Total . . . . .</b> | <b>142,500,000</b> | <b>12,200</b>    | <b>58</b>             | <b>41</b> | <b>17</b> |

The paid-up capital on all the lines in 1887 was made up as follows :—

|                               |                    |
|-------------------------------|--------------------|
| Shares . . . . .              | 67,600,000         |
| Debentures . . . . .          | 40,600,000         |
| Dominion Government . . . . . | 26,900,000         |
| Provincial grants . . . . .   | 7,400,000          |
| <b>Total . . . . .</b>        | <b>142,500,000</b> |

Latest returns to the end of 1889 showed 13,330 miles, made at a cost of £152,100,000, say £11,400 per mile.

## MEXICO

Official returns of mileage show as follows :—

| Year           | Miles | Year           | Miles |
|----------------|-------|----------------|-------|
| 1865 . . . . . | 20    | 1880 . . . . . | 660   |
| 1870 . . . . . | 220   | 1889 . . . . . | 5,010 |

In 1889 the traffic was as follows :—

|                        | No.        | Receipts, £      |
|------------------------|------------|------------------|
| Passengers . . . . .   | 12,980,000 | 310,000          |
| Goods, tons . . . . .  | 880,000    | 720,000          |
| <b>Total . . . . .</b> | <b>...</b> | <b>1,030,000</b> |

There are no State railways in Mexico.

## PERU

The number of miles working was as follows :—

| Year           | Miles | Year           | Miles |
|----------------|-------|----------------|-------|
| 1860 . . . . . | 47    | 1880 . . . . . | 1,180 |
| 1870 . . . . . | 250   | 1889 . . . . . | 1,630 |

In 1870-72 the Government borrowed in London 49 millions sterling, and proceeded to make railways up

the Andes. In 1877 the lines then made had cost £35,990,000, of which £25,670,000 came from the State. The Oroya line, with many tunnels, cost £29,000 per mile, say £4,200,000; that from Tacua to Bolivia £34,000 a mile, say £3,700,000.

## CHILI

Mr. Wheelwright began railways in 1851, making a line from Copiapo to Caldera. Mileage progressed as follows:—

| Year | Miles | Year | Miles |
|------|-------|------|-------|
| 1860 | 120   | 1880 | 1,100 |
| 1870 | 450   | 1889 | 1,750 |

Companies own 1000 miles, the State 750, the latter having cost £6,000,000, and the total about 14 millions sterling. The earnings of State lines in 1887 amounted to £800,000, and expenses £520,000, leaving a net gain of £280,000, say 4.7 per cent. on the cost.

## BRAZIL

The first line was made by Baron Mauá to the Organ Mountains, near Rio Janeiro, in 1851. The progress of mileage was as follows:—

| Year | Miles | Year | Miles |
|------|-------|------|-------|
| 1860 | 135   | 1880 | 2,175 |
| 1870 | 505   | 1889 | 5,580 |

The Pedro Segundo is one of the finest in the New World, with a length of 520 miles, mostly through a difficult country, having sixteen great tunnels. It cost £12,200,000 and earns 5½ per cent. net on the outlay. Most of the railways are 5 feet 4 inch gauge, but there are 40-inch gauge in Rio Grande and some other parts.

The total traffic returns on Argentine railways were as follows:—

| Year | Miles | Cost, £    | Passengers | Goods, Tons | Receipts, £ | Expenses, £ | Net, £    | Interest on Cost |
|------|-------|------------|------------|-------------|-------------|-------------|-----------|------------------|
| 1872 | 600   | 5,300,000  | 2,300,000  | 330,000     | 680,000     | 400,000     | 280,000   | 5.3              |
| 1876 | 1,370 | 11,400,000 | 2,700,000  | 680,000     | 920,000     | 630,000     | 290,000   | 2.6              |
| 1886 | 3,780 | 32,700,000 | ...        | ...         | 3,060,000   | 1,740,000   | 1,320,000 | 4.1              |
| 1888 | 4,440 | 38,500,000 | ...        | ...         | 2,800,000   | 1,650,000   | 1,150,000 | 3.0              |

In 1889 there were 5550 miles, representing an outlay of about 48 millions sterling. All the lines now belong to companies, the State lines having been recently sold. The number of train-miles run in 1889 was 1,200,000, the Great Southern of Buenos Ayres occupying the first place. The rolling-stock on all the lines comprised 12,000 waggons, capable of carrying 2,400,000 tons yearly.

## URUGUAY

Mileage progressed as follows:—

| Year | Miles | Year | Miles |
|------|-------|------|-------|
| 1870 | 60    | 1880 | 270   |
| 1875 | 190   | 1889 | 450   |

Traffic returns were as follows:—

| Year | Miles | Passengers | Goods, Tons | Receipts, £ | Receipts per Mile, £ |
|------|-------|------------|-------------|-------------|----------------------|
| 1877 | 230   | 270,000    | 77,000      | 95,000      | 410                  |
| 1883 | 300   | 290,000    | 160,000     | 170,000     | 570                  |
| 1887 | 400   | 405,000    | ...         | ...         | ...                  |

The system which Mr. Robert Crawford is pushing forward will, when completed, have a total length of 700 miles. There are no State railways.

## JAPAN

Mileage records are as follows:—

| Year | Miles | Year | Miles |
|------|-------|------|-------|
| 1875 | 40    | 1885 | 260   |
| 1880 | 75    | 1889 | 910   |

The San Paulo line crosses the Serra Cubaton by four successive inclined planes, up which the train is drawn, till attaining a height of 3500 feet over sea-level. The total cost of railways down to 1888 was:—

|             | £          | Miles | £ per Mile |
|-------------|------------|-------|------------|
| State lines | 16,100,000 | 900   | 18,000     |
| Companies   | 32,700,000 | 4,400 | 7,400      |
| Total       | 48,800,000 | 5,300 | 9,200      |

Traffic returns in 1887 showed 7,300,000 passengers and 1,820,000 tons merchandise; receipts, £3,820,000; expenses, £2,540,000; net profit, £1,280,000, being a little over 2½ per cent. (2.6) on the total outlay of capital.

## ARGENTINA

The first line from Buenos Ayres to Flores, six miles, was opened in 1857. Official records of mileage show thus:—

| Year | Miles | Year | Miles |
|------|-------|------|-------|
| 1860 | 15    | 1880 | 1,540 |
| 1870 | 540   | 1889 | 5,530 |

The mileage at various dates was composed thus:—

|           | 1875  | 1884  | 1886  | 1889  |
|-----------|-------|-------|-------|-------|
| State     | 570   | 1,520 | 1,710 | ...   |
| Companies | 600   | 1,520 | 2,070 | 5,530 |
| Total     | 1,170 | 3,040 | 3,780 | 5,530 |

Traffic receipts in Japan were as follows:—

| Year | Miles | Passengers | Goods, Tons | Receipts, £ | Expenses, £ | Net, £  |
|------|-------|------------|-------------|-------------|-------------|---------|
| 1886 | 360   | 4,100,000  | 320,000     | 240,000     | 130,000     | 110,000 |
| 1889 | 910   | 11,700,000 | 770,000     | 570,000     | 220,000     | 350,000 |

Averages per mile were as follows:—

| Year | Passengers | Goods, Tons | Receipts, £ | Expenses, £ | Net, £ |
|------|------------|-------------|-------------|-------------|--------|
| 1886 | 11,200     | 900         | 670         | 350         | 320    |
| 1889 | 12,900     | 850         | 630         | 240         | 390    |

Two-thirds of the lines belong to the State, one-third to companies.

## INDIA

In 1853 there was but one short line of 22 miles; at subsequent dates we find as follows:—

| Year | Miles | Year | Miles  |
|------|-------|------|--------|
| 1860 | 840   | 1880 | 9,320  |
| 1870 | 4,830 | 1889 | 15,230 |

Traffic returns on Indian railways taking the rupee at 24 pence, were as follows :—

| Year           | Miles  | Passengers  | Goods, Tons | Receipts, £ | Expenses, £ | Net, £    |
|----------------|--------|-------------|-------------|-------------|-------------|-----------|
| 1874 . . . . . | 6,190  | 24,300,000  | 4,800,000   | 7,790,000   | 3,830,000   | 3,960,000 |
| 1888 . . . . . | 14,380 | 103,200,000 | 22,400,000  | 19,700,000  | 9,870,000   | 9,890,000 |

Averages per mile were as follows :—\*

| Year           | Passengers | Tons  | Receipts, £ | Expenses, £ | Net, £ |
|----------------|------------|-------|-------------|-------------|--------|
| 1874 . . . . . | 3,900      | 800   | 1,250       | 620         | 630    |
| 1888 . . . . . | 7,100      | 1,510 | 1,400       | 700         | 700    |

In 1889 there were 10,410 miles of State railways, the rest belonging to companies who had guarantees or subsidies. The total cost to end of 1888 was nominally £193,200,000, taking the rupee at 24 pence, but really about 145 millions sterling.

The receipts in 1888 were made up thus :—

|                   | No.         | Receipts, £ | Each, Pence |
|-------------------|-------------|-------------|-------------|
| Passengers . . .  | 103,200,000 | 6,440,000   | 15          |
| Goods, tons . . . | 22,400,000  | 13,320,000  | 14          |
| Total . . . . .   | ...         | 19,760,000  | ...         |

The return on capital in 1888 was over 5 per cent., viz., 5.2, being the highest average in the World for any country.

\* These returns being on the fictitious basis of 24 pence the rupee, it is necessary to take off at least one-fourth; thus mile-earnings were really £1050, expenses £525.

The cost of construction down to 1888 and traffic in that year were as follows :—

|                           | Cost, £    | Cost, £ per Mile | Receipts, £ | Expenses, £ | Net, £    | Interest on Capital |
|---------------------------|------------|------------------|-------------|-------------|-----------|---------------------|
| New South Wales . . . . . | 26,600,000 | 12,500           | 2,510,000   | 1,580,000   | 930,000   | 3.5                 |
| Victoria . . . . .        | 27,500,000 | 13,600           | 2,750,000   | 1,750,000   | 1,000,000 | 3.6                 |
| Queensland . . . . .      | 13,100,000 | 6,800            | 780,000     | 510,000     | 270,000   | 2.1                 |
| South Australia . . . . . | 9,700,000  | 6,400            | 950,000     | 450,000     | 500,000   | 5.1                 |
| New Zealand . . . . .     | 13,500,000 | 7,600            | 1,000,000   | 650,000     | 350,000   | 2.6                 |
| Tasmania . . . . .        | 2,400,000  | 8,400            | 135,000     | 130,000     | 5,000     | ...                 |
| West Australia . . . . .  | 900,000    | 4,400            | 40,000      | 45,000      | ...       | ...                 |
| Total . . . . .           | 93,700,000 | 9,500            | 8,165,000   | 5,115,000   | 3,050,000 | 3.2                 |

The traffic returns for three of the Colonies in 1888 compare thus :—

|                       | Miles | Passengers | Goods, Tons | Per Mile   |       |             |             |
|-----------------------|-------|------------|-------------|------------|-------|-------------|-------------|
|                       |       |            |             | Passengers | Tons  | Receipts, £ | Expenses, £ |
| New South Wales . . . | 2,206 | 15,900,000 | 3,200,000   | 7,300      | 1,450 | 1,150       | 720         |
| Victoria . . . . .    | 2,018 | 56,000,000 | 3,560,000   | 27,700     | 1,750 | 1,360       | 865         |
| New Zealand . . . . . | 1,865 | 3,100,000  | 1,920,000   | 1,650      | 1,030 | 540         | 350         |

Mr. Coghlan shows that the saving of freight charges in New South Wales in twenty-five years down to 1888 by railways was £4,670,000. This is equal to £240 a mile per annum, and, applied to all Australia, would give the following result :—

| Period            | Saving in Freight Charges |           |            |                 |             |          |                   |
|-------------------|---------------------------|-----------|------------|-----------------|-------------|----------|-------------------|
|                   | New South Wales           | Victoria  | Queensland | South Australia | New Zealand | Tasmania | Western Australia |
| 1855-70 . . . . . | £ 450,000                 | £ 680,000 | £ 200,000  | £ 350,000       | £ 100,000   | £ 30,000 | £ ...             |
| 1871-80 . . . . . | 1,220,000                 | 1,390,000 | 850,000    | 800,000         | 1,200,000   | 240,000  | 60,000            |
| 1881-88 . . . . . | 2,880,000                 | 2,800,000 | 2,400,000  | 2,100,000       | 2,800,000   | 600,000  | 400,000           |
| Total . . . . .   | 4,550,000                 | 4,870,000 | 3,450,000  | 3,250,000       | 4,100,000   | 870,000  | 460,000           |
|                   |                           |           |            |                 |             |          | 21,550,000        |

#### AUSTRALIA

The first line was opened in 1854 from Melbourne to Hobson's Bay, and the growth of mileage has been as follows :—

|                           | 1861 | 1871  | 1881  | 1888   |
|---------------------------|------|-------|-------|--------|
| New South Wales . . . . . | 73   | 358   | 1,041 | 2,206  |
| Victoria . . . . .        | 214  | 329   | 1,247 | 2,018  |
| Queensland . . . . .      | ...  | 218   | 800   | 1,931  |
| South Australia . . . . . | 56   | 134   | 832   | 1,518  |
| New Zealand . . . . .     | ...  | 145   | 1,333 | 1,865  |
| Tasmania . . . . .        | ...  | 45    | 168   | 327    |
| West Australia . . . . .  | ...  | ...   | 122   | 272    |
| Total . . . . .           | 343  | 1,229 | 5,543 | 10,137 |

The gauge is 42 inches in all the Colonies except New South Wales, 56½, and Victoria, 63 inches.

The traffic returns in New South Wales showed thus :—

| Year           | Miles | Passengers | Goods, Tons | Per Mile   |             |
|----------------|-------|------------|-------------|------------|-------------|
|                |       |            |             | Passengers | Goods, Tons |
| 1856 . . . . . | 23    | 350,000    | 2,500       | 15,000     | 110         |
| 1888 . . . . . | 2,206 | 15,900,000 | 3,200,000   | 7,300      | 1,450       |

The above estimate shows that, speaking approximately, the railways of Australia have already in saving of freight charges paid nearly one-fourth of the cost of construction; also that they cause an annual saving to the people of £1,600,000 sterling.

## SOUTH AFRICA

Mileage returns show as follows:—

| Year           | Cape Colony | Natal | Total |
|----------------|-------------|-------|-------|
| 1874 . . . . . | 64          | ...   | 64    |
| 1880 . . . . . | 910         | 100   | 1,010 |
| 1888 . . . . . | 1,780       | 230   | 2,010 |

All the lines belong to the State, except one of 180 miles in Cape Colony. Cape lines in 1880 carried 2,700,000 passengers and 420,000 tons goods, being 1500 passengers and 230 tons per mile. The average cost of construction was £8900. This would give a total outlay of 16 millions sterling. Receipts £1,450,000, expenses £760,000, leaving a net profit of £690,000, say 4.3 on the cost of construction.

The first line was from Cape Town to Wellington, 58 miles, opened in 1860; cost £500,000. The line to Kimberley diamond fields was opened in 1885. In 1888 there were three principal lines: the Western 720, the Midland 590, and the Eastern 290 miles.

## ALGERIA

The official returns are as follows:—

| Year           | Miles | Cost, £    | Passengers | Goods, Tons | Receipts, £ | Expenses, £ | Net, £  |
|----------------|-------|------------|------------|-------------|-------------|-------------|---------|
| 1877 . . . . . | 410   | 7,700,000  | 1,020,000  | 260,000     | 270,000     | 230,000     | 40,000  |
| 1880 . . . . . | 1,160 | 16,000,000 | 2,350,000  | 1,080,000   | 850,000     | 605,000     | 245,000 |
| 1887 . . . . . | 1,580 | ...        | ...        | ...         | 840,000     | ...         | ...     |

Goods tons, as given above, averaged a haulage of 100 kilometres, or 63 miles: official returns give this item under the form of kilometric tons. Including the Tunis lines, 260 miles, the whole system in 1889 reached a length of 1840 miles, representing an approximate outlay of 26 millions sterling.

## EGYPT

The first line was opened in 1856, from Alexandria to Cairo, 130 miles; cost of construction, £8000 per mile. Records of mileage show thus:—

| Year           | Miles | Net Product, £ |
|----------------|-------|----------------|
| 1860 . . . . . | 275   | ...            |
| 1879 . . . . . | 920   | 750,000        |
| 1885 . . . . . | 950   | 930,000        |
| 1889 . . . . . | 956   | 730,000        |

Details of receipts and expenditure showed thus:—

| Year           | Receipts, £ | Expenses, £ | Per Mile    |             |
|----------------|-------------|-------------|-------------|-------------|
|                |             |             | Receipts, £ | Expenses, £ |
| 1885 . . . . . | 1,540,000   | 610,000     | 1,620       | 640         |
| 1889 . . . . . | 1,330,000   | 600,000     | 1,400       | 630         |

In 1888 the lines carried 3,600,000 passengers. The actual length of railways is 1260 miles, but some are not working. The earnings on the total mileage would not exceed £1050, expenses £480 per mile.

Ismail Pachà, during his reign, expended a sum of £13,300,000 in the construction of railways, one line extending along the Nile valley to Siout, in Upper Egypt. Net earnings are 4 per cent. on cost.

## WEST INDIES

The principal railways in this part of the world are:—

|                         | Miles |
|-------------------------|-------|
| Cuba . . . . .          | 930   |
| Jamaica, &c. . . . .    | 160   |
| Santo Domingo . . . . . | 70    |
| Martinique . . . . .    | 120   |
|                         | 1,280 |

The traffic and earnings of these lines are unknown.

## VARIOUS COUNTRIES

The latest returns of mileage in the following countries are:—

|                           | Miles |                            | Miles |
|---------------------------|-------|----------------------------|-------|
| Asia Minor . . . . .      | 360   | Mauritius . . . . .        | 90    |
| Bourbon . . . . .         | 70    | Newfoundland . . . . .     | 90    |
| Central America . . . . . | 570   | Paraguay . . . . .         | 90    |
| Ceylon . . . . .          | 180   | Persia . . . . .           | 10    |
| China . . . . .           | 86    | Sandwich Islands . . . . . | 50    |
| Cochin-China . . . . .    | 40    | Senegal . . . . .          | 250   |
| Malta . . . . .           | 10    | Venezuela . . . . .        | 180   |

Making a total of 2082 miles for which we have no traffic returns.

## RANSOM

In 1360 that of King John of France was fixed at £1,200,000 sterling. In 1521 that of Francis I. of France was fixed by Charles V. the Emperor at £800,000 sterling.

## RELIGION

The following are the latest numbers as well as can be ascertained:—

|                          | Roman Catholics | Protestants | Greeks     | Jews      | Mahometans | Total      |
|--------------------------|-----------------|-------------|------------|-----------|------------|------------|
| England . . . . .        | 1,066,000       | 24,858,000  | ...        | 44,000    | ...        | 25,968,000 |
| Scotland . . . . .       | 318,000         | 3,371,000   | ...        | 6,000     | ...        | 3,695,000  |
| Ireland . . . . .        | 3,952,000       | 1,169,000   | ...        | 1,000     | ...        | 5,122,000  |
| United Kingdom . . . . . | 5,336,000       | 29,398,000  | ...        | 51,000    | ...        | 34,785,000 |
| France . . . . .         | 29,202,000      | 693,000     | ...        | 53,000    | ...        | 29,948,000 |
| Germany . . . . .        | 16,789,000      | 29,370,000  | ...        | 563,000   | ...        | 46,722,000 |
| Russia . . . . .         | 8,300,000       | 2,950,000   | 65,549,000 | 3,000,000 | 2,600,000  | 80,399,000 |
| Austria . . . . .        | 20,227,000      | 400,000     | 493,000    | 1,005,000 | ...        | 22,125,000 |
| Hungary . . . . .        | 9,410,000       | 3,174,000   | 2,447,000  | 641,000   | ...        | 15,672,000 |
| Italy . . . . .          | 28,360,000      | 62,000      | ...        | 38,000    | ...        | 28,460,000 |
| Spain . . . . .          | 17,542,000      | 7,600       | ...        | 400       | ...        | 17,550,000 |

|                           | Roman Catholics | Protestants | Greeks     | Jews      | Mahometans | Total       |
|---------------------------|-----------------|-------------|------------|-----------|------------|-------------|
| Portugal . . . . .        | 4,707,500       | 500         | ...        | ...       | ...        | 4,708,000   |
| Sweden . . . . .          | 1,000           | 4,561,000   | ...        | 3,000     | ...        | 4,565,000   |
| Norway . . . . .          | 500             | 1,806,500   | ...        | ...       | ...        | 1,807,000   |
| Denmark . . . . .         | 3,000           | 1,973,000   | ...        | 4,000     | ...        | 1,980,000   |
| Holland . . . . .         | 1,440,000       | 2,491,000   | ...        | 82,000    | ...        | 4,013,000   |
| Belgium . . . . .         | 6,016,000       | 10,000      | ...        | 4,000     | ...        | 6,030,000   |
| Switzerland . . . . .     | 1,190,000       | 1,724,000   | ...        | 8,000     | ...        | 2,922,000   |
| Greece . . . . .          | 14,000          | 1,000       | 1,903,000  | 6,000     | 24,000     | 1,948,000   |
| Roumania . . . . .        | 114,000         | 14,000      | 4,529,000  | 400,000   | 2,000      | 5,059,000   |
| Servia . . . . .          | 8,000           | 1,000       | 1,874,000  | 4,000     | 15,000     | 1,902,000   |
| Bulgaria . . . . .        | 19,000          | ...         | 2,432,000  | 24,000    | 668,000    | 3,143,000   |
| Turkey . . . . .          | 280,000         | 45,000      | 788,000    | 51,000    | 3,626,000  | 4,790,000   |
| Europe . . . . .          | 148,959,000     | 78,681,600  | 80,015,000 | 5,937,400 | 6,935,000  | 320,528,000 |
| United States . . . . .   | 9,000,000       | 50,890,000  | ...        | 110,000   | ...        | 60,000,000  |
| Canada . . . . .          | 1,792,000       | 2,440,000   | ...        | ...       | ...        | 4,232,000   |
| Spanish America . . . . . | 33,340,000      | 115,000     | ...        | 47,000    | ...        | 33,502,000  |
| Australia . . . . .       | 845,000         | 2,880,000   | ...        | 1,000     | ...        | 3,726,000   |
| West Indies . . . . .     | 2,480,000       | 1,030,000   | ...        | ...       | ...        | 3,510,000   |
| Total . . . . .           | 196,416,000     | 136,036,600 | 80,015,000 | 6,095,400 | 6,935,000  | 425,498,000 |

The creeds of the world may be briefly stated thus :—

|                           | Roman Catholics | Protestants | Greeks     | Jews      | Mahometans  | Various     | Total         |
|---------------------------|-----------------|-------------|------------|-----------|-------------|-------------|---------------|
| Europe . . . . .          | 148,900,000     | 78,700,000  | 80,000,000 | 6,000,000 | 6,900,000   | ...         | 320,500,000   |
| America . . . . .         | 44,100,000      | 55,300,000  | ...        | 100,000   | ...         | ...         | 91,500,000    |
| Australia . . . . .       | 850,000         | 2,900,000   | ...        | ...       | ...         | ...         | 3,750,000     |
| Asia and Africa . . . . . | 6,600,000       | 3,100,000   | ...        | 670,000   | 194,000,000 | 440,000,000 | 644,370,000   |
| Total . . . . .           | 200,450,000     | 140,000,000 | 80,000,000 | 6,770,000 | 200,900,000 | 440,000,000 | 1,060,120,000 |

The 440 millions of pagans in the above table marked "various" are made up, in almost equal proportions, of Buddhists, Brahmins, and followers of Confucius.

## UNITED KINGDOM

In 1881 the classification was as follows :—

|                          | Anglicans  | Roman Catholics | Presbyterians | All Others | Total      |
|--------------------------|------------|-----------------|---------------|------------|------------|
| England . . . . .        | 18,798,000 | 1,066,000       | 114,000       | 5,990,000  | 25,968,000 |
| Scotland . . . . .       | 99,000     | 318,000         | 2,997,000     | 281,000    | 3,695,000  |
| Ireland . . . . .        | 636,000    | 3,952,000       | 486,000       | 48,000     | 5,122,000  |
| United Kingdom . . . . . | 19,533,000 | 5,336,000       | 3,597,000     | 6,319,000  | 34,785,000 |

In 1871 the estimated numbers were :—

|                    | Anglicans  | Roman Catholics | Dissenters | Jews   | Total      |
|--------------------|------------|-----------------|------------|--------|------------|
| England . . . . .  | 17,781,000 | 1,058,000       | 3,971,000  | 39,000 | 22,849,000 |
| Scotland . . . . . | 73,000     | 320,000         | 2,959,000  | 6,000  | 3,358,000  |
| Ireland . . . . .  | 683,000    | 4,142,000       | 577,000    | 1,000  | 5,403,000  |
| U.Kingd. . . . .   | 18,537,000 | 5,520,000       | 7,507,000  | 46,000 | 31,610,000 |

No census as to religion is taken in England or Scotland. The above estimates are according to the ratios resulting from the marriages solemnised yearly in the different churches.

In 1882 a private census of people attending church on Sundays was taken, showing percentage to population as follows :—

|                      |    |                       |    |
|----------------------|----|-----------------------|----|
| Sheffield . . . . .  | 23 | Southampton . . . . . | 38 |
| Nottingham . . . . . | 24 | Hull . . . . .        | 41 |
| Liverpool . . . . .  | 26 | Portsmouth . . . . .  | 41 |
| Bristol . . . . .    | 31 | Bath . . . . .        | 52 |

The above was, however, much in excess of the real percentage, many persons going to church twice. Only 37 per cent. of the total worshippers attended the Church of England, 8 per cent. being Roman Catholics and 55 per cent. Dissenters.

## UNITED STATES.

The number of churches at various dates was :—

|                               | 1830  | 1840  | 1850   | 1860   | 1870   | 1885    |
|-------------------------------|-------|-------|--------|--------|--------|---------|
| Baptist . . . . .             | 4,384 | 7,900 | 9,600  | 12,100 | 13,900 | 31,350  |
| Methodist . . . . .           | ...   | ...   | 13,300 | 19,900 | 21,300 | 29,000  |
| Presby-<br>terian } . . . . . | 2,253 | 2,800 | 4,800  | 6,400  | 7,100  | 10,940  |
| R. Catholic . . . . .         | 210   | 512   | 1,200  | 2,600  | 3,800  | 6,755   |
| Various . . . . .             | 3,170 | 3,450 | 9,200  | 13,020 | 17,000 | 30,100  |
| Total . . . . .               | ...   | ...   | 38,100 | 54,020 | 63,100 | 108,145 |

The value of church property was as follows :—

|                         | 1850       | 1870       | Number of Believers |            |
|-------------------------|------------|------------|---------------------|------------|
|                         | £          | £          | 1835                | 1880       |
| Methodists . . . . .    | 3,100,000  | 14,600,000 | 1,240,000           | 14,667,000 |
| Baptists . . . . .      | 2,300,000  | 8,700,000  | 2,929,000           | 10,464,000 |
| Presbyterians . . . . . | 3,100,000  | 11,000,000 | 2,102,000           | 6,478,000  |
| R. Catholics . . . . .  | 1,900,000  | 12,700,000 | 555,000             | 6,143,000  |
| Various . . . . .       | 7,800,000  | 27,200,000 | 7,532,000           | 12,407,000 |
| Total . . . . .         | 18,200,000 | 74,200,000 | 14,358,000          | 50,159,000 |

In 1888 the Roman Catholics possessed 7424 churches, 650 colleges, 3100 schools, and 520 hospitals and asylums.

The *American Almanac* gives the following statistics for 1883-85 :—

|                                | Churches | Clergy | Sittings  |
|--------------------------------|----------|--------|-----------|
| Baptists . . . . .             | 31,350   | 16,190 | 2,572,000 |
| Episcopal Methodists . . . . . | 17,935   | 11,676 | 1,660,000 |
| Other Methodists . . . . .     | ...      | 10,770 | 2,050,000 |
| Presbyterians . . . . .        | 10,940   | 9,050  | 1,020,000 |
| Roman Catholics . . . . .      | 6,755    | 7,370  | ...       |
| Various . . . . .              | 30,240   | 29,100 | 3,650,000 |
| Total . . . . .                | 97,220   | 84,156 | ...       |

In 1883 the number of Roman Catholics was 6,832,900, but the number of sittings was not known. In 1889 Cardinal Gibbon stated their number at 9,000,000.

## GERMANY

The Census of 1885 compares with 1871 as follows :—

|                           | 1871       | 1885       |
|---------------------------|------------|------------|
| Protestants . . . . .     | 25,582,000 | 29,370,000 |
| Roman Catholics . . . . . | 14,868,000 | 16,789,000 |
| Jews . . . . .            | 512,000    | 563,000    |
| Undefined . . . . .       | 99,000     | 137,000    |
| Total . . . . .           | 41,061,000 | 46,859,000 |

In 1885 the distribution was as follows :—

|                        | Percentage |         |        |             |              |
|------------------------|------------|---------|--------|-------------|--------------|
|                        | Prussia    | Bavaria | Saxony | Wurtem-berg | All Ger-many |
| Protestants . . . . .  | 64.4       | 28.1    | 96.6   | 69.1        | 62.7         |
| R. Catholics . . . . . | 34.0       | 70.8    | 2.8    | 30.0        | 35.8         |
| Jews . . . . .         | 1.3        | 1.0     | 0.2    | 0.7         | 1.2          |
| Undefined . . . . .    | 0.3        | 0.1     | 0.4    | 0.2         | 0.3          |
| Total . . . . .        | 100.0      | 100.0   | 100.0  | 100.0       | 100.0        |

## CANADA

|                           | Number    | Ratio |
|---------------------------|-----------|-------|
| Roman Catholics . . . . . | 1,792,000 | 42.2  |
| Anglicans . . . . .       | 575,000   | 13.6  |
| Presbyterians . . . . .   | 676,000   | 16.0  |
| Methodists . . . . .      | 743,000   | 17.6  |
| Various . . . . .         | 446,000   | 10.6  |
| Total . . . . .           | 4,232,000 | 100.0 |

Roman Catholics count 1,170,000 in Lower Canada, 320,000 in Ontario, and 302,000 in the other provinces, about 1,100,000 being French and 700,000 Irish.

## AUSTRALIA

In 1889 the various congregations stood as follows :—

|                             | Anglicans | R. Catholics | Presbyterians | Methodists | Various | Total     |
|-----------------------------|-----------|--------------|---------------|------------|---------|-----------|
| New South Wales . . . . .   | 503,000   | 306,000      | 107,000       | 95,000     | 95,000  | 1,106,000 |
| Victoria . . . . .          | 399,000   | 261,000      | 170,000       | 139,000    | 135,000 | 1,104,000 |
| Queensland . . . . .        | 139,000   | 95,000       | 46,000        | 31,000     | 86,000  | 397,000   |
| South Australia . . . . .   | 85,000    | 48,000       | 20,000        | 59,000     | 103,000 | 315,000   |
| New Zealand . . . . .       | 216,000   | 85,000       | 138,000       | 58,000     | 85,000  | 612,000   |
| Tasmania . . . . .          | 60,000    | 38,000       | 19,000        | 16,000     | 15,000  | 148,000   |
| Western Australia . . . . . | 23,000    | 12,000       | 1,000         | 3,000      | 4,000   | 43,000    |
| Total . . . . .             | 1,455,000 | 845,000      | 501,000       | 401,000    | 523,000 | 3,725,000 |

## INDIA

The Census of 1881 showed as follows :—

|                      | Christians | Hindoos     | Mahometans | Buddhists | Various    | Total       |
|----------------------|------------|-------------|------------|-----------|------------|-------------|
| Assam . . . . .      | 7,000      | 3,062,000   | 1,317,000  | 6,000     | 489,000    | 4,881,000   |
| Bengal . . . . .     | 128,000    | 45,453,000  | 21,705,000 | 156,000   | 2,095,000  | 69,537,000  |
| Bombay . . . . .     | 145,000    | 17,835,000  | 3,774,000  | ...       | 1,642,000  | 23,396,000  |
| Burmah . . . . .     | 84,000     | 88,000      | 169,000    | 3,252,000 | 144,000    | 3,737,000   |
| Madras . . . . .     | 711,000    | 28,498,000  | 1,934,000  | 2,000     | 26,000     | 31,171,000  |
| Punjab . . . . .     | 34,000     | 9,252,000   | 11,662,000 | 3,000     | 1,761,000  | 22,712,000  |
| Travancore . . . . . | 499,000    | 1,756,000   | 147,000    | ...       | ...        | 2,402,000   |
| Various . . . . .    | 255,000    | 81,993,000  | 9,414,000  | ...       | 4,393,000  | 96,055,000  |
| Total . . . . .      | 1,863,000  | 187,937,000 | 50,122,000 | 3,419,000 | 10,550,000 | 253,891,000 |

"Christians" included 963,000 Roman Catholics, 432,000 Protestants, and 568,000 Syrians, Greeks, &c.

## RIBBONS

The value manufactured was estimated as follows :—

|                           | 1872       | 1881       |
|---------------------------|------------|------------|
| France . . . . .          | 4,920,000  | 5,016,000  |
| Germany . . . . .         | 2,810,000  | 2,420,000  |
| Switzerland . . . . .     | 2,590,000  | 2,230,000  |
| Austria . . . . .         | 920,000    | 710,000    |
| Great Britain . . . . .   | 800,000    | 800,000    |
| United States . . . . .   | 100,000    | 3,430,000  |
| Other countries . . . . . | 400,000    | 900,000    |
| Total . . . . .           | 12,540,000 | 15,506,000 |

## RICE

The ordinary production is approximately as follows :—

|                     | Acres      | Crop, Tons | Consumption | Surplus   |
|---------------------|------------|------------|-------------|-----------|
| India . . . . .     | 22,600,000 | 16,800,000 | 15,400,000  | 1,400,000 |
| Burmah . . . . .    | 3,800,000  | 2,700,000  | 1,700,000   | 1,000,000 |
| Japan . . . . .     | 6,580,000  | 4,800,000  | 4,600,000   | 200,000   |
| Manilla . . . . .   | 3,140,000  | 1,800,000  | 1,750,000   | 50,000    |
| Java . . . . .      | 5,000,000  | 3,000,000  | 2,500,000   | 500,000   |
| Ceylon . . . . .    | 600,000    | 400,000    | 350,000     | 50,000    |
| Italy . . . . .     | 500,000    | 400,000    | 360,000     | 40,000    |
| Spain . . . . .     | 50,000     | 40,000     | 40,000      | ...       |
| U. States . . . . . | 120,000    | 90,000     | 160,000     | ...       |

There are also 1,870,000 acres in Cochinchina, and 500,000 in Siam under this product; no return as to crops.

The consumption in Europe has doubled since 1870, and now exceeds two million tons yearly. Consumption in the United Kingdom has been as follows:—

| Year           | Tons    | Lbs. per Inhab. |
|----------------|---------|-----------------|
| 1860 . . . . . | 18,100  | 1½              |
| 1870 . . . . . | 95,200  | 7               |
| 1880 . . . . . | 221,000 | 14              |
| 1889 . . . . . | 178,000 | 10½             |

It has been grown successfully in the Thames valley near Windsor.

## RIVERS

The magnitude of rivers is best judged by their outflow, which is as follows:—

|                          | Cubic Feet per Second |                     | Cubic Feet per Second |
|--------------------------|-----------------------|---------------------|-----------------------|
| Amazon . . . . .         | 1,030,000             | Dnieper . . . . .   | 120,000               |
| La Plata . . . . .       | 850,000               | Don . . . . .       | 115,000               |
| Mississippi . . . . .    | 570,000               | Euphrates . . . . . | 110,000               |
| St. Lawrence . . . . .   | 470,000               | Rhine . . . . .     | 65,000                |
| Obi . . . . .            | 330,000               | Rhone . . . . .     | 60,000                |
| Volga . . . . .          | 310,000               | Po . . . . .        | 60,000                |
| Yang-tse-kiang . . . . . | 300,000               | Vistula . . . . .   | 45,000                |
| Congo . . . . .          | 250,000               | Loire . . . . .     | 35,000                |
| Danube . . . . .         | 250,000               | Elbe . . . . .      | 30,000                |
| Ganges . . . . .         | 200,000               | Seine . . . . .     | 20,000                |
| Nile . . . . .           | 160,000               | Thames . . . . .    | 10,000                |

The following table shows the length of the more important rivers:—\*

|                       | Miles |                          | Miles |
|-----------------------|-------|--------------------------|-------|
| Amazon . . . . .      | 3,270 | Mississippi . . . . .    | 2,250 |
| Amoor . . . . .       | 2,240 | Murray . . . . .         | 1,703 |
| Brahmaputra . . . . . | 1,560 | Niger . . . . .          | 2,300 |
| Columbia . . . . .    | 1,090 | Nile . . . . .           | 2,750 |
| Congo . . . . .       | 2,700 | Norte . . . . .          | 1,250 |
| Danube . . . . .      | 1,540 | Obi . . . . .            | 2,800 |
| Darling . . . . .     | 2,345 | Orange . . . . .         | 1,000 |
| Dnieper . . . . .     | 1,070 | Orinoco . . . . .        | 1,150 |
| Don . . . . .         | 985   | Oxus . . . . .           | 1,300 |
| Douro . . . . .       | 490   | Plata . . . . .          | 2,130 |
| Ebro . . . . .        | 470   | Po . . . . .             | 356   |
| Elbe . . . . .        | 615   | Rhine . . . . .          | 715   |
| Euphrates . . . . .   | 1,360 | Rhone . . . . .          | 450   |
| Ganges . . . . .      | 1,350 | St. Lawrence . . . . .   | 1,930 |
| Garonne . . . . .     | 400   | Seine . . . . .          | 429   |
| Guadiana . . . . .    | 320   | Senegal . . . . .        | 850   |
| Hoang-ho . . . . .    | 2,400 | Severn . . . . .         | 210   |
| Hadson . . . . .      | 280   | Shannon . . . . .        | 220   |
| Indus . . . . .       | 1,720 | Tagus . . . . .          | 570   |
| Irrawaddy . . . . .   | 900   | Thames . . . . .         | 204   |
| Jenisei . . . . .     | 2,100 | Tiber . . . . .          | 210   |
| Kiang-ku . . . . .    | 1,050 | Vistula . . . . .        | 601   |
| Lena . . . . .        | 2,500 | Volga . . . . .          | 1,990 |
| Loire . . . . .       | 549   | Yang-tse-kiang . . . . . | 2,700 |
| Mackenzie . . . . .   | 1,600 | Zambesi . . . . .        | 950   |
| Magdalena . . . . .   | 820   |                          |       |

The basins drained by the great rivers are as follows:—

|                          | Sq. Miles |                        | Sq. Miles |
|--------------------------|-----------|------------------------|-----------|
| Amazon . . . . .         | 1,920,000 | St. Lawrence . . . . . | 340,000   |
| La Plata . . . . .       | 1,560,000 | Danube . . . . .       | 310,000   |
| Obi . . . . .            | 1,370,000 | Euphrates . . . . .    | 240,000   |
| Congo . . . . .          | 1,300,000 | Don . . . . .          | 220,000   |
| Mississippi . . . . .    | 1,170,000 | Dnieper . . . . .      | 170,000   |
| Yang-tse-kiang . . . . . | 740,000   | Rhine . . . . .        | 90,000    |
| Nile . . . . .           | 710,000   | Vistula . . . . .      | 75,000    |
| Volga . . . . .          | 650,000   | Elbe . . . . .         | 50,000    |
| Ganges . . . . .         | 440,000   | Rhone . . . . .        | 45,000    |

\* The navigable length of rivers has been already given under the heading of *Canals*.

The outflow of European rivers is estimated as follows:—

### Cubic Feet per Second

| Into                |         | Into                    |         |
|---------------------|---------|-------------------------|---------|
| North Sea . . . . . | 336,000 | Mediterranean . . . . . | 310,000 |
| Baltic . . . . .    | 273,000 | Caspian . . . . .       | 365,000 |
| Atlantic . . . . .  | 285,000 | Black Sea . . . . .     | 603,000 |

Making a total of 2,172,000 cubic feet per second, or more than eight times the outflow of the Danube.

The current of certain rivers in ordinary times is as follows:—

|                  | Feet per Minute |                   | Feet per Minute |
|------------------|-----------------|-------------------|-----------------|
| Seine . . . . .  | 135             | Garonne . . . . . | 230             |
| Thames . . . . . | 180             | Rhone . . . . .   | 390             |
| Tiber . . . . .  | 200             | Durance . . . . . | 510             |
| Danube . . . . . | 210             | Rhine . . . . .   | 540             |
| Loire . . . . .  | 220             | Amazon . . . . .  | 780             |

The Amazon falls 2 ft., the Elbe 10 ft., the Paraná 22 ft. per 100 miles. The Danube falls 264 ft. from Vienna to Buda-Pesth, and 216 ft. from the latter place to the sea.

There have been some remarkable floods of the Seine at Paris and the Tiber at Rome, when the height over ordinary level was as follows:—

| Date           | River           | Feet | Date           | River           | Feet |
|----------------|-----------------|------|----------------|-----------------|------|
| 1658 . . . . . | Seine . . . . . | 29   | 1530 . . . . . | Tiber . . . . . | 45   |
| 1740 . . . . . | Seine . . . . . | 26   | 1686 . . . . . | Tiber . . . . . | 35   |
| 1802 . . . . . | Seine . . . . . | 24   | 1742 . . . . . | Tiber . . . . . | 31   |

The outflow of all Italian rivers is estimated thus, in cubic feet per second:—

|                        | Cubic Feet | Basin, Sq. Miles |
|------------------------|------------|------------------|
| Po . . . . .           | 60,000     | 28,000           |
| Tiber . . . . .        | 10,000     | 6,000            |
| Other rivers . . . . . | 45,000     | 51,000           |
| Total . . . . .        | 115,000    | 85,000           |

The basin and outflow of French rivers are as follows:—

|                   | Basin, Sq. Miles | Cubic Feet per Second |
|-------------------|------------------|-----------------------|
| Rhone . . . . .   | 48,000           | 60,000                |
| Gironde . . . . . | 50,000           | 40,000                |
| Loire . . . . .   | 54,000           | 35,000                |
| Seine . . . . .   | 32,000           | 20,000                |
| Various . . . . . | 15,000           | 40,000                |
| Total . . . . .   | 199,000          | 195,000               |

The outflow of the Nile varies from 16,000 cubic feet per second in June to 400,000 in September, the yearly average being at the rate of 160,000 cubic feet per second; Sir John Fowler makes it only 120,000. The ordinary rise of the Nile is shown in the averages for thirteen years thus:—

|                   | Feet. | In. |
|-------------------|-------|-----|
| 1866-70 . . . . . | 25    | 2   |
| 1871-78 . . . . . | 24    | 0   |

The ordinary discharge of the Nile is sixteen times that of the Thames.

## ROADS

The following is a table of resistance for waggons-draughts per ton:—

|                          | Gradients of |             |             |             |             |
|--------------------------|--------------|-------------|-------------|-------------|-------------|
| Description              | Level Road   | 1 per Cent. | 3 per Cent. | 5 per Cent. | 8 per Cent. |
| Pavement . . . . .       | 33           | 63          | 123         | 185         | 278         |
| Macadam . . . . .        | 46           | 87          | 170         | 255         | 382         |
| Stone and clay . . . . . | 65           | 123         | 245         | 368         | 552         |
| Thick gravel . . . . .   | 147          | 280         | 550         | 825         | 1,238       |

M'Neill's mail-coach dynamometer is as follows :—

| Speed,<br>Miles<br>per<br>Hour | Force Required |                          |                         |                         |
|--------------------------------|----------------|--------------------------|-------------------------|-------------------------|
|                                | Level<br>Road  | 2½ per Cent.<br>Gradient | 4 per Cent.<br>Gradient | 5 per Cent.<br>Gradient |
|                                | Lbs.           | Lbs.                     | Lbs.                    | Lbs.                    |
| 6 . .                          | 111            | 160                      | 213                     | 268                     |
| 8 . .                          | 120            | 166                      | 219                     | 296                     |
| 10 . .                         | 128            | 172                      | 225                     | 318                     |

There are practically three kinds of roads—ordinary highways, railways, and rivers or canals. The total length is approximately as follows :—

|                        | Miles         |               |         |           | Miles of<br>Way per<br>100 Sq.<br>Miles |
|------------------------|---------------|---------------|---------|-----------|-----------------------------------------|
|                        | High-<br>ways | Rail-<br>ways | Rivers  | Total     |                                         |

| Argentina . .          | ...           | 5,600         | 2,200   | 7,800     | 1                                       |
| Brazil . .             | 700           | 5,600         | 24,300  | 30,700    | 1                                       |
| Total . .              | 1,307,100     | 341,600       | 169,900 | 1,818,700 | 10                                      |

In Switzerland, lake routes are counted as navigable rivers. The term "highways" includes also byways practicable for wheeled vehicles. The ordinary cost of making a road is £800 a mile in England, £1200 in France, £600 in Italy. The cost of maintenance is £18 a mile in England, £33 in France, £38 in Austria.

Macadamised roads are called after a Scotch engineer who began his labours in 1818.

#### UNITED KINGDOM

The mileage of roads in England and Wales increased until the introduction of railways, and then began to decline, viz :—

| Year       | Miles  |          |         |
|------------|--------|----------|---------|
|            | Main   | Ordinary | Total   |
| 1813 . . . | 19,700 | 95,100   | 114,800 |
| 1839 . . . | 21,960 | 104,770  | 126,730 |
| 1870 . . . | 15,125 | 102,615  | 117,740 |
| 1889 . . . | 17,745 | 93,115   | 110,860 |

Expenditure in 1889 was as follows :—

|                | £         | Average per<br>Mile, £ |
|----------------|-----------|------------------------|
| Main . . .     | 802,000   | 45                     |
| Ordinary . . . | 1,222,000 | 13                     |
| Total . . .    | 2,024,000 | 18                     |

The Romans had roads from Brighton to York; these were repaired by Edward I. and subsequent monarchs. In the 18th century Arthur Young wrote of the turnpike road from Preston to Wigan: "This infernal road has ruts four feet deep; in 18 miles I counted three cars broken down." Scotland had no regular roads, at least in the northern parts, before 1745, when General Wade's soldiers made them. Telford resumed the work in 1800, and made 900 miles of road and 1200 bridges in twenty years. In 1887 Scotland had 2530 miles of main and ordinary highways. As for Ireland, it was customary in the 18th century to travel on horseback, Colonel Knox Gore stating recently in the House of Commons that he was the first man who travelled by coach from Connaught to Dublin.

#### FRANCE

Expenditure in 1885 was as follows :—

| Roads              | Miles   | £          | £ per Mile |
|--------------------|---------|------------|------------|
| National . . .     | 23,700  | 1,280,000  | 54         |
| Departmental . . . | 18,900  | 880,000    | 47         |
| Local . . .        | 277,400 | 8,360,000  | 30         |
| Total . . .        | 320,000 | 10,520,000 | 33         |

In 1835 the mileage and value of routes was as follows :—

|                  | Miles  | £          | £ per Mile |
|------------------|--------|------------|------------|
| Canals . . .     | 2,300  | 18,000,000 | 7,800      |
| Highroads . . .  | 21,500 | 21,000,000 | 9,800      |
| Byroads . . .    | 24,000 | 15,000,000 | 6,200      |
| Bridges, No. . . | 1,750  | 7,000,000  | ...        |
| Total value . .  | ...    | 61,000,000 | ...        |

There are four classes of roads in France, viz :—

| Class     | Width, Feet | Cost, £ per Mile |
|-----------|-------------|------------------|
| 1st . . . | 50          | 1,900            |
| 2nd . . . | 40          | 1,200            |
| 3rd . . . | 33          | 800              |
| 4th . . . | 25          | 400              |

In fifty years ending 1880 France spent 180 millions sterling on highroads; those now existing are worth about 240 millions sterling.

#### GERMANY

The main roads of the Empire in 1878 were as follows :—

|                    | Miles  |
|--------------------|--------|
| Prussia . . .      | 25,300 |
| Bavaria . . .      | 6,200  |
| Other States . . . | 33,700 |
| Total . . .        | 65,200 |

There were also 200,000 miles of byroads.

#### AUSTRIA

After the peace of 1815 the Government began to make roads, and in sixty years, down to 1875, no less than 60,000 miles of macadamised roads were laid down, besides sixty passes made over the Alps, with casemates for travellers. The grand trunk road from Verona (then Austrian Italy) to Bukowina was 1000 miles in length. Road-making is still carried on at the rate of 1000 miles yearly.

The returns of Austria proper, without Hungary, show as follows:—

|                   | Mileage |        |
|-------------------|---------|--------|
|                   | 1878    | 1887   |
| Highroads . . . . | 9,700   | 9,800  |
| Byroads . . . . . | 42,300  | 52,300 |
| Total . . . . .   | 52,000  | 62,100 |

Highroads are kept in repair by the State at a cost of £38 per mile per annum, byroads by the local communes. Hungary had 18,800 miles of road in 1886, of which 4,400 were maintained by the State, and 14,400 of minor importance by the communes.

## ITALY

In the last thirty years no less than 28,000 miles of road have been constructed, at an outlay of 17 millions sterling, being an average of £600 per mile. There are at present 5800 miles of main routes maintained by the State, and 45,000 of local roads by the communes.

## SPAIN

The length of highroads at various dates was:—

| Year           | Miles | Year           | Miles  |
|----------------|-------|----------------|--------|
| 1808 . . . . . | 1,860 | 1869 . . . . . | 9,980  |
| 1827 . . . . . | 3,300 | 1880 . . . . . | 13,970 |

In 1827 waggons paid a toll of twopence every 10 miles, and the State expended £91,000 on the maintenance of 3300 miles and thirty-five bridges. The rest of Spain had only mule-tracks. When Church properties were confiscated, a part of the spoil was devoted to making roads, and in this way £7,000,000 were expended between 1846 and 1858. In 1880 there were 12,420 miles of good carriage roads maintained by the State, and 1550 by the local authorities.

## PORTUGAL

In 1840 there were neither roads nor mail-coaches; men travelled on mules, ladies in sedan-chairs borne by hand. At present there are about 2000 miles of road, including the great northern route, 300 miles, to Valenza on the Minho, and the great eastern to Badajoz.

## BELGIUM

The mileage of roads has nearly trebled since 1830:—

| Year           | Highroads | Byroads | Total |
|----------------|-----------|---------|-------|
| 1830 . . . . . | 1,620     | 430     | 2,050 |
| 1850 . . . . . | 2,550     | 1,360   | 3,910 |
| 1870 . . . . . | 3,360     | 1,280   | 4,640 |
| 1887 . . . . . | 4,350     | 1,350   | 5,700 |

## SALT

The following table shows the percentage of salt in various seas:—

| Sea                       | Percentage of Salt | Salt per Ton of Water, lbs. |
|---------------------------|--------------------|-----------------------------|
| Caspian . . . . .         | 0.5                | 11                          |
| Black . . . . .           | 1.2                | 26                          |
| Baltic . . . . .          | 1.3                | 28                          |
| English Channel . . . . . | 3.3                | 72                          |
| Red . . . . .             | 4.3                | 93                          |
| Dead . . . . .            | 8.5                | 187                         |
| Mediterranean . . . . .   | 3.9                | 85                          |
| Atlantic . . . . .        | 3.7                | 81                          |
| Salt Lake . . . . .       | 20.0               | 440                         |

In 1879 the waggons used on the above roads had a carrying power of 470,000 tons.

## UNITED STATES

The length of mail-coach roads at various dates was:—

| Year           | Miles   |
|----------------|---------|
| 1800 . . . . . | 20,820  |
| 1850 . . . . . | 169,700 |
| 1889 . . . . . | 260,100 |

At the period of independence there were not 1000 miles of highroad, the colonies of New England, Virginia, &c., having little other means of communication than by sea.

In 1834 the mail-coach roads of the principal States were as follows:—

|                        | Miles  |                          | Miles |
|------------------------|--------|--------------------------|-------|
| New York . . . . .     | 12,300 | North Carolina . . . . . | 6,500 |
| Pennsylvania . . . . . | 9,800  | Kentucky . . . . .       | 5,600 |
| Virginia . . . . .     | 9,500  | Tennessee . . . . .      | 5,500 |
| Ohio . . . . .         | 8,100  | Vermont . . . . .        | 4,700 |

The other States having an aggregate of 42,500 miles, and thus making up a total of 104,500 for the Union.

## CANADA

In 1826 there was such a want of roads that Major Strickland described a journey of fifty miles near Toronto, which took him three days to accomplish. In 1878 there were 5500 miles of regular mail-coach road.

## BRAZIL

The interior is still destitute of good roads, but there are some admirable ones in the Maritime provinces. Those of Tijuca and Petropolis, near Rio Janeiro, are *chefs d'œuvre*, besides which those in the provinces of San Paulo and Rio Grande are worth mention. Waggon-tracks from Rio Janeiro to Matto Grosso and Goyaz, are in use for freight, the journey taking six months.

## ARGENTINA

Except the routes over the Andes to Chili, roads are almost unknown. President Sarmiento bridged many of the rivers in 1868-74. Railways have meantime rendered roads superfluous. In 1860 the bullock-waggons between Tucuman and Rosario, 600 miles, usually took twelve months on the round trip, going ten miles a day, and making long halts. The distance is now done in one day by rail.

S.

In the Dead Sea the percentage of salt increases with depth, viz:—

| Depth, Feet     | Salt | Water |
|-----------------|------|-------|
| 1 . . . . .     | 93   | 907   |
| 66 . . . . .    | 204  | 796   |
| 400 . . . . .   | 263  | 737   |
| 1,000 . . . . . | 278  | 722   |

The production of salt in Europe and the United States has been approximately as follows, in tons:—

|                         | 1830      | 1889      |
|-------------------------|-----------|-----------|
| Great Britain . . . . . | 400,000   | 1,900,000 |
| Continent . . . . .     | 1,700,000 | 4,350,000 |
| United States . . . . . | 100,000   | 1,050,000 |
| Total . . . . .         | 2,200,000 | 7,300,000 |

The following table shows approximately the present production and consumption yearly:—

|                              | Tons       |             | Lbs. Consumed per Inhabitant |
|------------------------------|------------|-------------|------------------------------|
|                              | Production | Consumption |                              |
| United Kingdom . . . . .     | 1,950,000  | 1,050,000   | 62                           |
| France . . . . .             | 640,000    | 640,000     | 36                           |
| Germany . . . . .            | 910,000    | 755,000     | 35                           |
| Russia . . . . .             | 1,200,000  | 1,310,000   | 33                           |
| Austria . . . . .            | 340,000    | 340,000     | 18                           |
| Italy . . . . .              | 600,000    | 350,000     | 25                           |
| Spain and Portugal . . . . . | 600,000    | 190,000     | 19                           |
| Scandinavia . . . . .        | ...        | 190,000     | 44                           |
| United States . . . . .      | 1,050,000  | 1,360,000   | 48                           |
| Canada . . . . .             | 55,000     | 105,000     | 45                           |
| India . . . . .              | 700,000    | 1,100,000   | 12                           |
| Various . . . . .            | 755,000    | 1,130,000   | ...                          |
| Total . . . . .              | 8,800,000  | 8,520,000   | ...                          |

Whenever the consumption falls below 20 lbs. per inhabitant, it is bad for public health. During the Paraguayan War of 1864-70, it was observed that the men who had been without salt for three months, when wounded, however slightly, died, as their wounds would not heal.

## UNITED KINGDOM

| Period            | Average Production, Tons per Annum | Duty per Ton | Price per Ton | Lbs. Consumed per Inhabitant |
|-------------------|------------------------------------|--------------|---------------|------------------------------|
| 1800-06 . . . . . | 203,000                            | £30          | £32           | 16                           |
| 1807-15 . . . . . | 230,000                            | 30           | 32            | 16                           |
| 1816-23 . . . . . | 257,000                            | 30           | 32            | 16                           |
| 1824-40 . . . . . | 410,000                            | ...          | 1             | 19                           |
| 1841-60 . . . . . | 880,000                            | ...          | 16s.          | 32                           |
| 1861-70 . . . . . | 1,540,000                          | ...          | 14s.          | 58                           |
| 1871-80 . . . . . | 2,020,000                          | ...          | 12s.          | 72                           |

The consumption in the United Kingdom averages 40 lbs. per inhabitant for cooking or condiment, the rest being used for chemicals, manure, &c. Reduced death-rate and higher efficiency of workmen are in some manner the result of increased consumption of salt.

The exportation at various dates has been as follows:—

| Year           | Tons      | Value, £ | Shillings per Ton |
|----------------|-----------|----------|-------------------|
| 1830 . . . . . | 220,000   | ...      | ...               |
| 1853 . . . . . | 520,000   | 270,000  | 10.4              |
| 1860 . . . . . | 700,000   | 360,000  | 10.3              |
| 1870 . . . . . | 760,000   | 380,000  | 10.0              |
| 1880 . . . . . | 1,050,000 | 600,000  | 11.4              |
| 1888 . . . . . | 900,000   | 490,000  | 10.9              |

The number of salt-pans in the United Kingdom rose from 752 in 1867 to 1311 in 1876, the production in the latter year including 1,780,000 tons of white salt made from brine, and 190,000 of rock-salt from Cheshire and Carrickfergus.

## FRANCE

Production at various dates was approximately as follows:—

| Year           | Tons    | Lbs. per Inhabitant |
|----------------|---------|---------------------|
| 1830 . . . . . | 300,000 | 20                  |
| 1840 . . . . . | 400,000 | 25                  |
| 1850 . . . . . | 600,000 | 36                  |
| 1868 . . . . . | 600,000 | 34                  |
| 1886 . . . . . | 640,000 | 36                  |

The quantity made in 1886 was officially valued at £480,000, say 15 shillings a ton. The surplus for exportation is insignificant. The saltworks employ 4000 hands. The amount of salt which paid excise in 1885

was only 330,000 tons, being for cookery and table use; what is used in manufactures is untaxed.

## GERMANY

Official returns show as follows:—

| Year           | Tons       |         |             |
|----------------|------------|---------|-------------|
|                | Production | Export  | Consumption |
| 1870 . . . . . | 430,000    | 40,000  | 390,000     |
| 1880 . . . . . | 660,000    | 100,000 | 560,000     |
| 1887 . . . . . | 910,000    | 155,000 | 755,000     |

Consumption compared with population showed:—

| Year           | Lbs. per Inhabitant |              |       |
|----------------|---------------------|--------------|-------|
|                | Table Use           | Manufactures | Total |
| 1870 . . . . . | 17                  | 8            | 25    |
| 1880 . . . . . | 17                  | 13           | 30    |
| 1887 . . . . . | 17                  | 18           | 35    |

In 1887 Prussia produced 470,000 tons, Wurtemberg 180,000, and the other states 260,000 tons.

## RUSSIA

Production and consumption at various dates were:—

| Year           | Tons       |         |             | Lbs. per Inhabitant |
|----------------|------------|---------|-------------|---------------------|
|                | Production | Imports | Consumption |                     |
| 1840 . . . . . | 440,000    | ...     | 440,000     | 18                  |
| 1860 . . . . . | 420,000    | 150,000 | 570,000     | 20                  |
| 1870 . . . . . | 450,000    | 180,000 | 630,000     | 20                  |
| 1880 . . . . . | 780,000    | 150,000 | 930,000     | 24                  |
| 1888 . . . . . | 1,200,000  | 110,000 | 1,310,000   | 33                  |

## AUSTRIA

The salt-mine of Wieliczka in Galitzia, at the base of the Carpathians, is the greatest in the world, extending 600 miles, and seeming inexhaustible. For six centuries it has given prodigious quantities of salt, and it still occupies 9000 miners. The total tonnage production of the Empire for the years given was estimated thus:—

|                |         |
|----------------|---------|
| 1834 . . . . . | 260,000 |
| 1850 . . . . . | 600,000 |
| 1887 . . . . . | 340,000 |

If the estimate in 1850 was correct, this shows that the industry is declining apace, perhaps owing to the heavy salt-tax, the Government selling it at £1 per ton for exportation, but at £10 per ton for home use.

## HOLLAND

In 1880-83 the average consumption was as follows:—

|                        | Tons   |
|------------------------|--------|
| For food . . . . .     | 39,000 |
| Manufactures . . . . . | 19,000 |

Total . . . . . 58,000

The consumption for food averaged 20 lbs. per head. The salt-tax yields £300,000 per annum, say 18 pence per inhabitant.

## SPAIN AND PORTUGAL

In 1850 Spain was estimated to produce 800,000; Portugal, 520,000 tons. An official report in 1863 gave the production in Spain as 3,800,000 tons, probably ten times the real quantity. Experts were as follows:—

| Year           | Tons    |          |         | Total Value, £ |
|----------------|---------|----------|---------|----------------|
|                | Spain   | Portugal | Total   |                |
| 1872 . . . . . | 220,000 | 180,000  | 400,000 | 410,000        |
| 1880 . . . . . | 320,000 | 190,000  | 510,000 | 320,000        |
| 1888 . . . . . | 240,000 | 170,000  | 410,000 | 200,000        |

The production of the two countries is not thought to exceed 600,000 tons.

## SCANDINAVIA

Imports of salt were as follows:—

| Year       | Tons   |         |         |         |
|------------|--------|---------|---------|---------|
|            | Sweden | Norway  | Denmark | Total   |
| 1860 . . . | 40,000 | 65,000  | 10,000  | 115,000 |
| 1870 . . . | 60,000 | 100,000 | 20,000  | 180,000 |
| 1880 . . . | 60,000 | 70,000  | 20,000  | 150,000 |
| 1888 . . . | 70,000 | 90,000  | 30,000  | 190,000 |

The large consumption in Norway is explained by the fisheries.

## UNITED STATES

Production and consumption at various dates were:—

| Year | Tons       |         |             | Lbs. per Inhabitant |
|------|------------|---------|-------------|---------------------|
|      | Production | Imports | Consumption |                     |
| 1840 | 150,000    | ...     | ...         | ...                 |
| 1870 | 400,000    | ...     | ...         | ...                 |
| 1880 | 670,000    | 430,000 | 1,100,000   | 48                  |
| 1888 | 1,050,000  | 310,000 | 1,360,000   | 48                  |

Saltworks were established at Cape Charles, Virginia, in 1620, and the French began working salt-springs in Illinois in 1720. The principal works in 1850 were at Syracuse, New York, producing 250,000 tons yearly. The method of solar evaporation is by tanks six inches deep, with an area of 300 square feet, each tank producing one ton per annum, worth 8s. Boiling is also practised at Syracuse in kettles of 100 gallons; the consumption of coal being one ton for each ton of salt. The production in 1870 and 1880 was as follows:—

|                 | Saltworks |      | Tons Produced |         |
